## POSTS AND TELEGRAPHS.

THE first Australasiản post-office was established by Governor Macquarie in the year 1810, Mr. Isaac Nichols being appointed Postmaster. The office was in High-street (now known as George-street), Sydney, at the residence of Mr. Nichols, who was, "in consideration of the trouble and expense attendant upon this duty," allowed to charge on delivery to the addressee 8 d . for every English or foreign letter of whatever weight, and for every parcel weighing not more than 20 lb ., $1 \mathrm{~s} .6 \mathrm{~d} .$, and exceeding that weight, 3 s . The charge on Colonial letters was 4d., irrespective of weight; and soldiers' letters, or those addressed to their wives; were charged 1d. Very little improvement in regard to postal matters took place for some years.

In 1825 an Aot was passed by Sir Thomas Brisbane, with the advice of the Council, "to regulate the postage of letters in New South Wales," giving power for the establishment of post-offices, and to fix the rates of postage. It was not, however, until 1828 that the provisions of the Act were put into full force. The rates of postage appear to have depended upon the distance and the difficulty of transmission. The lowest single inland rate was 3d., and the highest 12d., the postage on a letter increasing according to its weight, which was fixed for a single letter at $\frac{1}{4}$-ounce. Letters between New South Wales and Van Diemen's Land were charged 3d. each (ship rate), and newspapers ld. Other ship letters were charged 4 d . single rate, and 6 d . for any weight in excess. The privilege of franking was allowed to the Governor and a number of the chief public officials, and letters to and from convicts passed free under certain regulations.

In 1831 a twopenny post was established in Sydney; and in 1835, under Sir Richard Bourke, the Act of 1825 was repealed and another Act was passed, fixing the charge on a single letter at 4 d . for 15 miles, 5 d . for 20 miles, 6 d . for 30 miles, and so on up to 1 s . for 300 miles. In 1837 a post-office was established in Melbourne, and a fortnightly mail was established between that city and Sydney. Stamps were introduced in the same year in the shape of stamped covers or envelopes, which are believed to have been the first postage-stamps ever issued. By 1838 there were 40 post-offices in the colony of New South Wales, which at that time, of course, included the territory now known
as Victoria and Queensland; and in the Sydney office about 15 persons were employed. The revenue of the Department for the year was $£ 8,390$, and the expenditure $£ 10,347$; while payments were made by the New South Wales Government to the post office at Korraika, in New Zealand, which was not created a separate colony until 1841. In 1847 an overland mail between Sydney and Adelaide was established. Stamps in their present form were issued in 1849, and the postage rates were fixed at 1d. per $\frac{1}{2}$ oz. for town and 2d. for country letters, at which they remain in most of the colonies to-day.

Regular steam mail communication with Great Britain was first established in 1852. Until that time the Australian colonies had to depend upon the irregular arrival and despatch of sailing vessels for the carriage of mails; but in the year mentioned the steamships Australia, Chusan, and Great Britain were despatched from England, making the voyage in 60 days, and causing a strong desire in the minds of the colonists for a more frequent and steady system of steam communication with the Old World. The outbreak of the Crimean War in 1854 hindered for a while the accomplishment of this object; but in 1856 a line of steamers was again laid on, and the service was carried on by the Peninsular and Oriental Company and the Royal Mail Company for some years, but without giving so much satisfaction to the public as might have been expected.

As far back as 1854 a proposal was made for the establishment of a line of mail packets via Panama, and negotiations on the subject were carried on for several years between the British Government and the Governments of New South Walcs and New Zealand. The result was that in 1866 the service was started, and continued in operation until the end of 1868 , when it was terminated through the failure of the company by which it had been carried out. In the following year New South Wales, in conjunction with New Zealand, inaugurated a mail service via San Francisco, which, with a few interiruptions and under various conditions, has been continued up to the present time.

The establishment of a mail route via America had the effect of stimulating the steamship-owners who were engaged in the service via Suez, and from that time there was a marked improvement in the steamers employed, as well as in the punctuality and speed with which the mails were delivered. The Peninsular and Oriental Company have carried mails for the colonies almost from the inception of the ocean steam service, with very few interruptions. Towards the end of 1878 the Orient Company commenced carrying mails between Australia and the United Kingdom, and have continued to do so ever since. In the year 1883 the fine steamers of the Messageries Maritimes of France entered the service, followed in 1887 by the North German Tloyd's, so that there are now sometimes two or even three mails received and despatched every week, and a voyage to Europe, which was formerly a formidable undertaking, in rolving great loss of time and mucks discomfort, is regarded as a mere pleasure trip to fill up a holiday.

In the year 1893 another mail service was established, by a line of steamers running from Sydney to Vancouver Island, in British Columbia. This line seems likely to open up a valuable trade between the Australian colonies and British North America. There is also a line of steamers running between Brisbane and London, but the colonies other than Queensland make little use of these vessels.

## Growth of Postal Business.

The growth of postal business in each of the colonies during the thirty-five years from 1861 to 1896 is shown below. It will be seen that the number of letters for all Australasia in 1861 was less than is now transacted by any individual colony, Tasmania and Western Australia excepted. The true total for Australasia is, of course, not to be found by adding the figures of the several colonies together, as intercolonial letters are counted both in the colony from which they are despatched and in that in which they are received for delivery. A second total is therefore given from which this excess has been excluded :-

| Colony. | Post Offices. |  | Letters and Postcards. |  | Newspapers. |  | Packets. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1861. | 1896. | 1861. | 1890. | 1881. | 1890. | 1861. | 1896. |
| New South Wales.... | 340 | 2,009 | 4,369,463 | 70,301,900 | 3,384,245 | 45,558,300 | 105,338 | 15,603,600 |
| Victoria | 369 | 1,572 | 6,109,929 | 61,602,700 | 4,277,179 | 30,305,000 | $\ldots$ | 9,250,000 |
| Queensland | 24 | 1,100 | 515,211 | 17,590,700 | 427,489 | 11,645,300 | 3,555 | 4,906,400 |
| South Australia . | 160 | 676 | 1,540,472 | 18,765,000 | 1,089,424 | 9,551,700 | .... | 1,895,000 |
| Western Australia | .. | 438 | 193,317 | 10,097,700 | 137,476 | 6,243,000 | $\ldots$ | 2,011,800 |
| Tasmania | 100 | 328 | 835,873 | 7,551,800 | 805,656 | 4,861,900 | $\ldots$ | 2,343,600 |
| Now Zealand. | . | 1,464 | 1,236,768 | 31,673,900 | 1,428,351 | 13,216,500 | .... | 12,647,300 |
| Australasia. | . | 7,587 | 14,801,033 | 217,583,700 | 11,639,820 | 121,381,700 | $\ldots$ | 48,753,700 |
| Australasia(excluding intercolonial excess) $\qquad$ | .. | $\cdots$ | 14,061,000 | 201,204,000 | 10,941,400 | 113,613,000 | .... | 45,243,000 |

For Victoria an estimate of the number of letters and postcards transmitted in 1896 has been made, as the figures are not given by the postal authorities of that colony. It is based on a careful analysis of the departmental revenue, and is believed to approach closely to the actual business transacted during the year. For Victoria, also, the
newspapers and packets carried in 1896 have been estimated, as the returns of the postal authorities only cover the intercolonial and international business. A corresponding table to that already given, showing the number of letters, newspapers, and packets per head of population, is appended :-

| Colony. | Lotters and Postcards. |  | Newspapers. |  | Packets. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1861. | 1890. | 1561. | 1896. | 1801. | 1896. |
| New South Wales | 12 | 55 | 10 | 35 | 1 | 12 |
| Victoria..... | 11 | 52 | 8 | 26 | ... | 8 |
| Queensland | 17 | 38 | 14 | 25 | 1 | 11 |
| South Australia | 13 | 52 | 9 | 27 | . | 5 |
| Western Australia | 12 | 84 | 9 | 52 | - | 17 |
| Tasmania | 9 | 46 | 10 | 30 | ...... | 14 |
| New Zealand | 14 | 45 | 16 | 19 |  | 18 |
| Australasia* | 11 | 47 | 9 | 27 | .... | 11 |

- Intercolouial excess excluded.

The colonies of Western Australia and New South Wales take the lead in letters and post-cards, as well as in the transmission of newspapers, while in the matter of packets New Zealand apparently transacts a greater amount of business proportionally than the other colonies. A comparison of the average number of letters and postcards per head of population in Australasia with similar figures for the principal countries of the world is afforded by the table given below. It will be seen that on a population basis the correspondence of Australasia exceeds that of any of the countries named, with the exception of the United Kingdom and the United States of America:-

| Countrs. | Letters and Post-cards per head. | Country. | Letters and Post-cards per head. |
| :---: | :---: | :---: | :---: |
| United Kingdom | 56 | Sweden. | 13 |
| United States | 51 | Norway... | 13 |
| Australasia | 47 | Hungary | 9 |
| Switzerland | 40 | Chili .......... | 7 |
| Germany. | 31 | Italy | 7 |
| Canada | 30 | Portugal ...... | 6 |
| Denmark | 29 | Spain.......... | 5 |
| Austria ... | 25 | Roumania... | 4 |
| Argentine Republic... | 24 | Greece .. | 2 |
| Netherlands ........... | 23 | Bulgaria | 2 |
| Belgium ................ | 21 | Russia ... | 2 |
| France... | 19 |  |  |

The inland letter postage is 1 d . per $\frac{1}{2}$ oz. on town and 2d. on country letters in all the colonies except Victoria and South Australia, where the charge is 2 d . per oz. and $\frac{1}{2}$ oz. respectively on all letters posted for delivery within the colony. In Victoria the minimum charge was in 1890 reduced to 1d.; but the loss was too great, and in 1892 the rate was again raised to 2d., at which it still remains. In New South Wales the city and suburban rate of 1d. per $\frac{1}{2}$ oz. has been extended to nearly fifty of the principal country towns. The intercolonial rate is uniformly 2d. per $\frac{1}{2}$ oz. in Australasia. The most liberal inland newspaper rates are to be found in New South Wales, Western Australia, and Tasmania, where newspapers printed within the colony are transmitted free if posted within one week of publication, although in New South Wales the maximum weight which escapes postage is 10 oz . It is, therefore, only natural that those colonies, as shown in the table given on page 195, should exceed their neighbours in the average number of newspapers carried per head of population. In Victoria and New Zealand the charge is $\frac{1}{2} \mathrm{~d}$. each, and in South Australia and Queensland $\frac{1}{2} \mathrm{~d}$. per 10 oz . The intercolonial postage on newspapers is $\frac{1}{2} \mathrm{~d}$. per 10 oz . in New South Wales, Victoria, South Australia, and Western Australia, and ld. each in New Zealand, to all colonies except Queensland, to which province the charge is $\frac{1}{2} \mathrm{~d}$. for every 2 oz . In Tasmania newspapers posted to Western Australia and New Zealand are carried free if posted within seven days of publication ; to Queensland the charge is $\frac{1}{2} \mathrm{~d}$. for every 2 oz . ; and to the other colonies, $\frac{1}{2} \mathrm{~d}$. each. In Queensland the uniform charge to the other provinces is $\frac{1}{2} \mathrm{~d}$. per 2 oz .

## Registered Letters.

The number of registered letters and packets passing through the post-offices of the Austraiasian colonies has largely increased of late years, and in New South Wales the number which passed through the General Post Office alone in 1892 was no less than 1,075,241, an increase of 203 per cent. in seven years. This large increase was not, however, a natural growth, but arose chiefly from correspondence relating to so-called "consultations," or lottery sweeps connected with horse-racing, which were established in Sydney, and to support which large sums of money. were sent to that city from all parts of Australasia, as well as from other countries. Probably not less tham 600,000 of the total for New South Wales in 1892 were associated with these lotteries. The Government of that colony dealt with the evil in an amending Postal Bill in 1893, and this illicit branch of the postal traffic was removed to Queensland, the number of registrations dealt with at all post-offices in New South Wales in 1894 being 938,546-a reduction of 174,362 letters at the General Post Office alone during the year-while in the northern colony the registered letters in 1894 numbered 430,148, an increase of 158,656 on the figures for the previous twelve months.

In 1895 the registered letters dealt with in New South Wales numbered only 902,448 , but in 1896 the total reached $1,000,665$. In the colony of Queensland the registered letters increased to 541,148 in 1895 ; but in the beginning of 1896 the Parliament passed an Act making these lotteries illegal, and the evil was transferred to Hobart, the registrations in the northern colony in 1896 numbering only 190,153. In Western Australia 342,518 registered letters and packets were passed through the head office during 1896; while in New Zealand the registered articles dealt with numbered 355,671 . For Victoria, South Australia, and Tasmania no particulars of registrations whatever are available.

## Parcels Posts.

Excepting Western Australia, where there was no inland service, there were inland, intercolonial, and international parcels posts in operation in 1896; but statistics of the services on a uniform basis are not obtainable. During the year there were passed through the post-office of New South Wales 506,111 parcels, weighing $1,780,648 \mathrm{lb}$., and having a value of $£ 197,763$, the postage collected amounting to $£ 32,180$; in Victoria 250,019 parcels, yielding a revenue of $£ 12,744$, were dealt with ; in Queensland the number of parcels which passed through the post-office was 168,023 , weighing $674,912 \mathrm{lb}$., and the revenue derived from the service amounted to $£ 9,926$; in Western Australia 23,944 parcels, the declared value of which was $£ 44,189$, were dealt with ; in Tasmania 6,927 inland and 1,637 ship parcels were posted during the year, while 10,922 packets and parcels, valucd at $£ 11,903$, were received from the United Kingdom and the other colonies; and in New Zealand the parcels dealt with numbered 186,611 , weighing $654,334 \mathrm{lb}$., of which 19,909 , weighing $64,473 \mathrm{lb}$., and valued at $£ 36,438$, were received from places ontside the colony; and 7,522 , weighing $17,060 \mathrm{lb}$., and valued at $£ 7,703$, were despatched from the colony. No particulars are available of the South Australian service; but allowing the average rates of the other provinces, the total business of that colony represented 131,600 parcels, weighing about $475,400 \mathrm{lb}$., and valued at $£ 61,750$.

## Money Orders and Postal Notes.

In all the colonies there are money order and postal note systems in operation, and in all the colonies except Victoria, Queensland, and South Australia post-office savings banks. In Queensland there is a Government Savings Bank, but it is not placed under the administration of the Postmaster-General. The Victorian Post Office Savings Bank was amalgamated with the Commissioners' Savings Bank in September, 1897. Particulars of the working of these services will be found in the chapter dealing with Private Finance.

## Postal Facilities.

The following table shows the number of inhabitants and the area in square miles to each post-office for the year 1896. It will be seen that the most sparsely populated colonies have the greatest number of post-offices in comparison with their population, but in order to judge of the relative extension of postal facilities the area of country to each office must also be taken into account:-

| Colony. | $\begin{aligned} & \text { Number of } \\ & \text { Inhabitants to each } \\ & \text { Post Oftice. } \end{aligned}$ | Number of Square Miles of Territory to each Otfice. |
| :---: | :---: | :---: |
| New South Wales | 646 | 155 |
| Victoria | 747 | 56 |
| Queensland | 429 | 608 |
| South Australia .. | 533 | 1,337 |
| Western Australia | 315 | 2,228 |
| Tasmania ........... | 506 | 80 |
| New Zealand ..... | 488 | 71 |
| Australasia | 570 | 406 |

## Ocean Mall Services.

The Federal Ocean Mail Service, which is carried on by the Orient and Peninsular and Oriental Steam Navigation Companies, is subsidised by the United Kingdom and all the Australasian colonies, with the exception of New Zealand. New contracts were entered into on the 1st February, 1898, for a period of seven years. The total amount of the subsidy is $£ 170,000$, of which $£ 95,000$ is payable by the Imperial authorities and $£ 75,000$ by the colonies in proportion to their population. The sea transit rates collected from other countries and colonies making use of the service are credited to the Imperial and Colonial Governments in proportion to the amount of their contribution towards the subsidy. The following table shows the amount of the subsidy payable by each of the colonies during 1896, on the basis of the population at the end of the preceding year. In addition to the subsidy, there are other charges in connection with the service, such as transit rates in France and

Italy and in Australia. After adding these, and deducting the postages collected in the colonies, and the proportion of sea transit rates payable by other countries using the service, the net cost to New South Wales in 1896 was $£ 10,510$, and to Victoria $£ 6,807$, as shown in the table given below. For the other colonies, the net cost of the service is not obtainable. New Zealand, although not a contracting party, yet avails itself of the Federal Service for the carriage of mail matter, and its net loss during the year amounted to $£ 2,074$ :-

| United Kingdom | Subsidy, 1890. Net Cost, 1896. |  |  |
| :---: | :---: | :---: | :---: |
|  | ..... | £95,000 | ...... |
| Australasia- |  |  |  |
| New South Wales. | £27,076 | ...... | £10,510 |
| Victoria | 25,040 | ...... | 6,507 |
| Queensland. | 9,758 | ...... | ...... |
| South Australia. | 7,573 | ...... | ...... |
| Western Australia | 2,145 | ...... | ...... |
| Tasmania | 3,408 | ...... | ...... |
|  |  | £75,000 | ...... |
| Total |  | £170,000 | $\ldots$ |

The mail service has been performed with great regularity and expedition. The average time occupied by the outward and homeward services in 1896 was as follows:-

| , | Orient. | P. and 0 . |
| :---: | :---: | :---: |
| London to Sydney ..... ............ | 34-4 days. | $33{ }^{236}$ days. |
| Sydney to London | 332 ${ }^{\text {S }}$, | 3490 ${ }^{\text {g }}$ |

On several occasions the mails from London have been delivered in Sydney in 31 days.

In addition to the Federal Ocean Mail Service via Suez, New South Wales and New Zealand until November, 1890, subsidised the Union Steamship Company, in conjunction with the Pacific Steamship Company, for a four-weekly service via San Francisco, to the amount of $£ 37,000$, of which New South Wales paid £25,750, and New Zealand $£ 11,250$. Under the new contract which was entered into, the amount of the subsidy was largely reduced, the contribution being based on the weight of mail matter carried, and New South Wales made an annual payment of $£ 4,000$ to the New Zealand Government, subject to appropriation by Parliament. Various extensions of the contract have been made, and at present the New Zealand Government guarantees a minimum payment of $£ 7,500$, and a similar sum to the CanadianAustralian Line running to Vancouver, thus securing a fortnightly Pacific service. During the year 1896 the net cost of the service to New Zealand was $£ 7,605$; to New South Wales, $£ 1,645$; and to

Victoria, £194. The average time occupied in carrying the mails by the San Francisco route during the same year was as follows:-
London to Sydney.................................................................................................... $38_{\frac{7}{10}}^{\frac{8}{3}}$ rlays.
Sydney to London............

During 1893 a calendar monthly service between Sydney and Vancouver was established by the Canadian-Australian Royal Mail Line, the colony of New South Wales granting an annual subsidy of $£ 10,000$, and the Canadian Dominion one of $£ 25,000$. This action was taken more in the interests of trade between the great British colonies in Australasia and America than in those of the postal service. The Government of New Zealand has guaranteed a minimum payment of $£ 7,500$ annually to this line in consideration of Wellington being made a port of call. It is proposed to establish a fast Atlantic service, to be subsidised by the British and Canadian Governments. During 1896 the net cost of the Vancouver' service to New South Wales was $£ 7,717$; and to Victoria, $£ 397$. •The average time occupied by the mails in transit from Sydney to London was $38_{1}^{-\frac{8}{1}-}$ days.

The Queensland line of steamers, sailing from Brisbane via Torres Straits, carry mails for the Queensland Government, payment being made according to weight. This route is from four to ten days longer than those previously mentioned. Queensland, under a former contract, paid the company an annual subsidy of $£ 55,000$. This arrangement ceased in January, 1890, and under a new contract the colony agreed to pay the company an annual subsidy of $£ 19,800$ for a four-weekly, or $£ 32,500$ for a fortuightly service. The latter service was commenced on 1st July, 1890, the monthly service having lasted nearly six months; but in November, 1891, the contractors, on account of the heavy losses under the fortnightly system, were allowed to revert to the four-weekly service, the subsidy being reduced to the smaller amount mentioned above, viz., £19,800. When the contract expired, an agreement was arrived at for the institution of a subsidised service for purely commercial purposes. This arrangement lasted but a short time, when the subsidy was abandoned by the shipping company, who preferred to run their steamers without restriction. Payment is now only made in accordance with the weight of the mails carried. The amount of mail matter despatched from the other colonies by the Torres Straits route is very small.

Besides those mentioned, the other steamship companies trading with the Australasian colonies carry mails, notably the Messageries Maritimes Company and the North German Lloyd's, sailing from Sydney; and the Shaw, Saville, and Albion Company, and the New Zealand Sbipping Company, sailing from Lyttelton, via Magellan Straits. The companies are paid by the colonies in proportion to the weight of mail matter carried, but the Messageries Maritimes Company and the North German Lloyd's are in receipt of large subsidies from the French and German Governments respectively.

The postage to the United Kingdom was reduced in January, 1891, from 6d. per $\frac{1}{2}$ ounce via Italy and 4d. via the long sea route to the uniform rate of 21 d. In 1891 the colonies were represented at the Congress of the Universal Postal Union held in Vienna, and on July 4 a convention was signed on their behalf, by which they joined the Union from the lst October of that year. From that date the rate of postage to all British colonies and possessions and foreign countries included in the Union was reduced to $2 \frac{1}{2} \mathrm{~d}$.

A common scale of postage on newspapers to the United Kingdom and foreign countries has been adopted by the Australasian colonies, the rate being $1 d$. for the first 4 ounces, and $\frac{1}{2}$ d. for every additional 2 ounces.

## Telegraphs.

The electric telegraph was introduced into these colonies almost at the time of the earliest railway construction. The first telegraph messages were sent in New South Wales in 1851. In Victoria the telegraph line from Melbourne to Williamstown was opened in 1854. The first line in South Australia, from Adelaide to Port Adelaide, was opened in 1856 ; and the first Tasmanian line was completed in 1857. In New Zeiland the first telegraph office was opened in 1862 ; and the line from Brisbane to Rockhampton, the first in Queensland, was opened in 1864. Telegraphic communication was established between Sydney, Melbourne, and Adelaide in 1858. The first telegraph in Western Australia was opened in 1869, and communication between that colony and all the others of the group was completed in 1877.

All the colonies show very rapid progress in regard to telegraphic matters during the period from 1871 to 1881 . In the case of Queensland this increase was largely due to the construction of the line to the Gulf of Carpentaria; and in the case of South Australia, to the construction of the lines to Port Darwin and to Eucla, on the boundary of Western Australia. The following table shows the length of telegraphic lines in each colony at the last four census periods, as well as for the year 1896, as far as the returns are available :-

| Colony. | 1881. | 1871. | 1581. | 1891. | 1896. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| New South Wales ... | 1,616 | *4,674 | 8,515 | 11,697 | 12,418 |
| Victoria |  | *2,295 | 3;350 | 7,170 | 7,528 |
| Queensland | 169 | 2,525 | 6,280 | 9,996 | 10,026 |
| South Australia ...... | 597 | 1,183 | 4,946 | 5,640 | 5,565 |
| Western Australia ... | ..... | *750 | 1,585 | 2,921 | 5,429 |

| New Zealand........... | ...... | 3,287 | 9,653 | 13,235 | 16,471 |
| Australasia ..... | ... | 17,661 | 49,120 | 89,081 | 101,335 |

* In 1873. † Including telephone wires.

In 1896 there were 636 miles of cable from New Zealand to Sydney and from Tasmania to Melbourne, in addition to the length shown above. The number of telegrams passing along the wires of each colony and the revenue received by the Telegraph Departments during the year 1896 were as appended. In the total for Australasia a correction has been made for intercolonial telegrams recorded in both the despatching and the receiving colony :-

| Colony. | Number of Tclegrams. | Revenue received. |
| :---: | :---: | :---: |
| New South Wales | 2,796,776 | £159,741 |
| Victoria | 1,372,615 | 108,722 |
| Queensland | 1,134,006 | 71,753 |
| South Australia | 1,209,419 | 102,375 |
| Western Australia | 1,178,406 | 99,088 |
| Tasmania | 208,784 | 14,051 |
| New Zealand | 2,520,169 | 100,386 |
| Australasia .............................. | 10,920,175 | £656,121 |
| Australasia (Intercolonial excess excluded). | 9,441,000 | ............ |

In the whole of Australasia there are 3,387 telegraph stations, of which 856 are in New South Wales, 791 in Victoria, 377 in Queensland, 254 in South Australia, 111 in Western Australia, 218 in Tasmania, and 780 in New Zealand.

In no country in the world has the development of telegraphic communication been so rapid as in Australasia, and in none has it been taken advantage of by the public to anything like the same extent. Taking Australasia as a whole, there are only four countries that possess a greater extent of telegraph lines, and only seven in which a larger number of messages are actually sent. In no other country, however, except the United Kingdom, does the number of messages bear anything approaching the same ratio to the population. The following table illustrates these remarks:-

| Country. | Length of Telegraph Lines. | Messages. | Messages per head of population. |
| :---: | :---: | :---: | :---: |
|  | miles. | No. | No. |
| United Kingdom | 41,073 | 82,116,679 | $2 \cdot 1$ |
| France. | 58,888 | 44,708,298 | $1 \cdot 2$ |
| Belgium | 3,956 | 5,704,461 | $0 \cdot 9$ |
| Netherlands* | 3,537 | 4,621,954 | 1.0 |
| Germany | 84,370 | 38,392,224 | $0 \cdot 7$ |
| Denmark | 2,945 | 1,849,768 | $0 \cdot 9$ |
| Sweden | 5,399 | 2,275,717 | 0.5 |
| Norway ...................... | 5,232 | 1,835,145 | 0.9 |
| Austria-Fiungary ........... | 33,518 | 20,360,638 | $0 \cdot 5$ |
| Switzerland.. ................. | 4,436 | 3,848,459 | $1 \cdot 3$ |
| Italy. | 24,539 | 10,033,284 | $0 \cdot 3$ |
| Spain | 19,924 | 5,433,362 | $0 \cdot 3$ |
| Portugal | 3,985 | 1,354,827 | $0 \cdot 3$ |
| Russia. | 83,387 | 15,592,75 | $0 \cdot 1$ |
| Roumania | 4,269 | 2,373,121 | $0 \cdot 4$ |
| United Statest | 190,418 | 58,109,860 | $0 \cdot 9$ |
| Canada. | 31,735 | 3,945,744 | $0 \cdot 8$ |
| Cape Colony | 6,465 | 2,229,663 | $1 \cdot 2$ |
| Argentine Republic ......... | 25,345 | 6,447,122 | $1 \cdot 7$ |
| Australissia ..................... | 49,364 | 9,441,000 | $2 \cdot 2$ |

* Government lines only. $\dagger$ Westeru Union Company only.

From the above table it appears that in Australasia during the year two and a fifth messages were sent over the telegraph for each inhabitant. In the United Kingdom the number was two and one-tenth for each inhabitant; and in the United States of America about one message to every inhabitant. The return for the United States, however, includes only the lines of the Western Union Company, who own the principal part of the telegraph system of that country. In the Argentine Republic, one and three-fourths; in Switzerland, one and a
third message ; in France, one and a fifth; in Holland and Belgium, one message ; and in Germany, Denmark, and Norway about one message was sent for every person; in Austria-Hungary, Roumania, and Sweden, one message for every two persons; in Italy, Spain, and Portugal about one message for every three persons; and in Russia, one message for every ten persons. In Cape Colony rather more than one message, and in Canada rather less than one message, was sent for every inhabitant during the year.

## Cable Services.

Australasia is in telegraphic communication with Europe and the rest of the world by means of three cables connecting with the various Asiatic continental lines. The first of these cables, which were all laid by the Eastern Extension Telegraph Company, Limited, was opened in October, 1872, joining Port Darwin to Banjowangie, in Java, whence communication is provided with Europe by way of Batavia, Singapore, Madras, and Bombay. In 1879 a duplicate cable was laid down, the colonies of New Sonth Wales, Victoria, South Australia, Western Australia, and Tasmania agreeing to pay the company a subsidy of $£ 32,400$ per annum for a period of 20 years, the amount to be apportioned between the colonies on the basis of population. At Port Darwin the cables connect with an overland wire, which extends to Adelaide, a distance of 1,971 miles, and to construct which cost the South Australian Government about half a million sterling. The total length of line between Adelaide and London is 12,570 miles, of which 9,146 miles are submarine cable, and 3,424 miles overland wire. The third cable was laid in 1888 from Broome, in Roebuck Bay, Western Australia, to Banjowangie. The length of line by this route from Perth to London is 12,296 miles, 10,811 being cable and 1,485 land wire. The eastern colonies are connected with Broome by a line running from Adelaide, via Port Augusta, Eucla, and Albany, to Perth.

The cable joining Tasmania to the continent of Australia was laid in 1869, the length being about 170 miles. It starts from the township of Flinders, near Cape Schanck, in Victoria, and terminates at Low Head, at the mouth of the Tamar, in Tasmania. This line is subsidised to the extent of $£ 4,200$ yearly by the colonies of New South Wales, Victoria, South Australia, Western Australia, and Tasmania, the contributions being based on the population figures. New Zealand was joined to the continent by a cable laid in 1876 , the length being about 1,191 miles. The line has its Australian terminus within sight of the spot where Captain Cook landed on the shores of Botany Bay, and within a stone's throw of the monument of La Perouse. The New Zealand terminus of the cable is at Wakapuaka, near Nelson, on the Middle or South Island, whence another cable, 109 miles in length, is laid to Wanganui, in the

North Island, with an alternate line from White's Bay across Cook Strait to Wellington. For the first ten years afterits opening the New Zealand cable was subsidised by the Governments of New South Wales and New Zealand, their annual contributions being $£ 2,500$ and $£ 7,500$ respectively. During 1893 the cable rates to New Zealand were reduced from 6s. to 3 s . for 10 words, ordinary messages. An amount of $£ 20,000$ is guaranteed to the Company, and the deficiency is paid by the Australasian Governments at the rate of one-third by New Zealand, and the remaining two-thirds by the contributing colonies, including New Zealand. The deficiency for the year ended 30th April, 1897, was $£ 3,856$, of which New Zealand paid $£ 1,285$, and the remaining sum of $£ 2,571$ was distributed over the colonies as shown in the table on page 206. Queensland joined the guarantee fund in July, 1897. A cable connecting New Caledonia with Queensland at Bundaberg was opened in October, 1893. It was constructed by a French company, and is guaranteed by the French Government to the extent of $£ 8,000$, and by the colonies of New South Wales and Queensland to the amount of $£ 2,000$ each annually for a period of thirty years, in return for which these two Australian Governments are entitled to use the cable for the transmission of official messages up to the amount of the guarantee.

During the year 1890 the colonies opened negotiations with the Eastern Extension Telegraph Company for a reduction in the cable rates to Europe, which at that time were 9s. 4d. per word for ordinary messages and 2s. 8d. per word for press messages sent from New South Wales; and at a conference of the postal and telegraphic authorities a proposal to reduce the tariff to 4 s . per word for ordinary messages and 1 s . 10d. per word for press messages was agreed to, the colonies contributing to the subsidy undertaking to make good half the loss which the company would sustain by this reduction in the schedule of charges, and New South Wales, Victoria, Western Australia, Tasmania, and New Zealand at the same time agreeing to pay to South Australia a proportion of the loss to the revenue of that colony which the lower charges would cause in the working of the overland wires. The amended tariff came into force in May, 1891, and the amount to be guaranteed to the company for the portion of the year during which the contract was in existence was $£ 158,491$. The sum earned by the company for the same period was $£ 120,141$, so that the deficiency on the eight months' business was $£ 38,350$, one-half of which was made good by the contributing colonies according to population. But this sum, combined with the amount of the subsidy, was more than the colonies were prepared to bear, and on the 1st January, 1893, the rates were again slightly raised, and stand now at 4 s. 1ld. per word from Sydney to London for ordinary messages, and 1 s .10 d . for press messages. Even at these charges there was a loss to be borne, the total amount payable to the cable company being $£ 21,778$ in 1893 (as compared with $£ 27,520$ in 1892), and $£ 6,191$ in 1894 ; and to the South Australian

Government $£ 7,675$ in 1893 (as compared with $£ 10,415$ in 1892), $£ 822$ in 1894 , and $£ 1,125$ in 1895 . Since the years mentioned the amounts guaranteed-now $£ 227,000$ to the cable company, and $£ 37,552$ to the South Australian Government-have been met by the revenue, and the colonies have therefore not been called upon to contribute. Queensland has now joined the other colonies in the guarantee.

The following table shows the amount paid by each colony towards cable subsidies and guarantees during the year 1896. The proportions are based on the 1891 census populations:-

| Colony. | Port Darwin- Banjowangie Subsidy. | Tasmanian | $\begin{gathered} \text { New } \\ \text { Zealand } \\ \text { Guarantee. } \end{gathered}$ | Total. |
| :---: | :---: | :---: | :---: | :---: |
|  | £ s. d. | £ s. d. | £ s. d. | £ s. d. |
| New Sonth Wales | 13,150 1510 | 1,704 148 | 853155 | 15,709 511 |
| Victoria. | 13,245 1311 | 1,717 008 | 85918 8 | 15,822 133 |
| Queensland |  |  |  |  |
| South Australia ..... | $3,721 \quad 15 \quad 6$ | 48291 | 241126 | 4,445 171 |
| Western Australia ... | $578 \quad 4 \quad 3$ | $7419 \quad 1$ | 37109 | 690141 |
| Tasmania | 1,703 106 | 220166 | 1101111 | 2,034 18 11 |
| New Zealand |  |  | 467109 | $46710 \quad 9$ |
| Australasia...... | 32,40000 | 4,200 00 | 2,571 00 | 39,171 00 |

The desirability of constructing a Pacific cable, which shall touch only British territory on its way from Australia to America, is acknowledged by the Governments of most of the Australasian colonies as well as by those of the United Kingdom and Canada, and a Commission was appointed, consisting of two representatives of Great Britain, two of Canada, and two of Australasia, to decide upon the best route to be taken, the probable cost of construction of the line, and the basis upon which the three countries should contribute. The report of this Commission, which has not yet been made public, recommends the construction of a cable with the landing places entirely in British territory, and the distribution of the cost of construction and maintenance equally between Great Britain, Canada, and Australasia. In response to a call for tenders by the Colonial Conference, which sat in Ottawa in 1894, a company offered to lay the cable and maintain it for the space of three years for the sum of $1 \frac{1}{2}$ millions sterling. The completion of such a work would have the effect of largely reducing the cable rates to America and Europe, besides being of immense service in the event of an outbreak of war. At a conference of the Premiers of New South Wales, Victoria, and Queensland, held in Sydney on the 20th August, 1898, it was agreed to offer, on behalf of those colonies, to pay threeninths of the cost of the outlay, and New Zealand has consented to pay another ninth part.

## Telephones.

In connection with the telegraph departments of the various colonies, telephone exchanges have been established in the capitals and other important centres of population. In order to popularise the use of the instrument, the charges in some of the colonies have lately been reduced, and the result is seen in a satisfactory extension of this means of communication. Information regarding telephones in the different colonies during 1896, as far as can be ascertained, will be found in the following table :-

| Colony. | Exchanges. | Tolephones. | $\begin{aligned} & \text { Length of } \\ & \text { Tclephone Wires. } \end{aligned}$ | Revenue. |
| :---: | :---: | :---: | :---: | :---: |
| New South Woles | No. | No. | miles. | ${ }_{8}^{ \pm}$ |
| Victoria .......... | 13 | 2,939 | 10,135 | 31,955 |
| Queensland. | 22 | 840 | 1,043 | 5,228 |
| South Australia. | 8 | 1,022 | 2,749 | 15,514 |
| Western Australia | 6 | 942 | 577 | 6,264 |
| Tasmania........... | 4 | 722 | 549 | 3,382 |
| New Zenland .... | 29 | 5,747 | 5,201 | 29,249 |
| Anstralasia. | 104 | 17,671 | ...... | 129,103 |

* Not ascertained.

In the Australasian colonies the rates for telephones at places of business range from $£ 5$ to $£ 10$ for the minimum length of wiregenerally one mile, the colonies with a half-mile radius being New Zealand and Qucensland-and the charge is higher in the city than in the country. In New South Wales and Victoria the city and suburban rates are $\mathfrak{£} 9$ per annum, and the country rates, $£ 8$. In South Australia the city rate is higher, being $£ 10$; but in the suburbs and country the rates range from $£ 6$ to $£ 8$. Queensland, for a radius of half-a-mile, has a uniform rate of $£ 6$, which is also the charge made in Tasmania, for a one mile radius, in Fobart, Launceston, and Zeehan, while for the suburbs and country districts the rate is a matter of arringement. In New Zealand a distinction is drawn between exchanges continuously open and not continuously open, the charges being respectively $£ 7$ and $£ 5$; while in Western Australia, in the towns of Perth, Fremantle, and Guildford, the rate is $£ 7$, and $£ 10$ where the exchange has less than 100 subscribers. The charges for telephones at private residences is, of course, less than for places of business. In New South Wales, Victorin, and New Zealand, the rate is uniformly $£ 5$; and in Queensland, $£ 6$. In South Australia the charge is $£ 6$ for the city, and from $£ 6$ to $£ \delta$ in the suburbs and country ; in Tasmania, it is $£ 410$ s. in Hobart, Launceston, and Zeehan, and a matter of arrangement in the suburbs and country; while in Western Australia, at Perth, Fremantle, and Guildford, the charge is $£ 5$, and $£ 6$ where the exchange has less than 100 subscribers.

## Postal and Telegraphic Finances.

The following table shows the revenue and expenditure of the Postal and Telegraph Departments of the colonies during 1896 :-

| Colony. | Revenue. |  |  |  | Expenditure. |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Posts. | Telegraphs. | Telephones. | Total. |  |
|  | $\pm$ | $\boldsymbol{\chi}$ | $\mathfrak{f}$ | £ | $\mathfrak{L}$ |
| New South Wales..... | 503,930 | 159,741 | 31,955 | 695,626 | 743,841 |
| Victoria ................ | 367,968 | 108,722 | 37,511 | 514,201 | 509,382 |
| Queensland | 161,726 | 71,758 | 5,228 | 238,712 | 302,201 |
| South Australia ....... | 129,215 | 102,375 | 15,514 | 247,104 | 196,024 |
| Western Australia..... | 82,257 | 99,088 | 6,264 | 187,609 | 209,210 |
| Tasmania .............. | 64,153 | 14,051 | 3,382 | 81,586 | 61,314 |
| New Zealand ........... | 262,482 | 100,386 | 29,249 | 392,117 | 353,700 |
| Australasia........... | 1,571,731 | 656,121 | 129,103 | 2,356,955 | 2,375,672 |

The revenue set down for Victoria is but an approximation, as the receipts for postage are merged with those for stamp duty under the general heading of fees. In other colonies postage stamps are also used for the purpose of stamping acknowledgments for the receipt of money. During 1896 the New South Wales Post Office made an allowance of $£ 24,000$ on this account, and this sum is not included in the revenue of that colony as given above. In the expenditure shown in the table, interest on the outlay on post-office buildings and telegraph lines and maintenance of buildings is not taken into account. If allowance be made for these, the total expenditure and the deficiency in revenue would be as follow :-

| Colony. ${ }^{\text {- }}$ | Expenditure, inclusive of Interest and Maintenance. | Defficiency in Revenue. |
| :---: | :---: | :---: |
| New South Wales | $\mathfrak{f}$ | ${ }^{\text {¢ }}$ |
| Victoris |  | 142,318 |
|  | 607,405 | 93,204 |
| Queensland ...... | 354,176 | 115,464 |
| South Australia ......... | 256,035 | 8,931 |
| Western Australia ...... | 231,809 | 44,200 |
| Tasmania ............. ... | 69,036 | *12,550 |
| New Zealand | 413,747 | 21,630 |
| Australasia | 2,770,152 | 413,197 |

* Excess of Revenue.

It is estimated that, under uniform letter postage of 2 d . and 1 d . per half-ounce, the following increases or decreases in the departmental revenues would result:-

| Colony. | Increased Revenue from imposition of 2d. Rate on all Inland Letters. | Decreased Revenue from imposition of 1d. liate on all Australasian Letters. |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | and Inland. | Intercolonial. | Total. |
|  | £ | £ | £ | ¢ |
| New South Wales | 45,000 | 95,000 | 18,650 | 113,650 |
| Victoria | 10,000 | 135,000 | 12,450 | 147,450 |
| Queensland. | 13,500 | 14,500 | 3,300 | 17,800. |
| Sonth Anstralia. |  | 40,000 | 6,000 | 46,000 |
| Western Australia | 6,250 | S,500 | 6,000 | 14,500 |
| Tasmania | 5,500 | 5,000 | 2,350 | 7,350 |
| New Zealand | 27,500 | 27,500 | 2,600 | 30,100 |
| Australasia | 107,750 | 325,500 | 51,350 | 376,850 |

Were a uniform newspaper postage of $\frac{1}{d}$ imposed, it is estimated. that the revenue derivable therefrom in those colonies which now carry. a portion of their newspapers free would be as follows:-

| New South Wales. | $\stackrel{£}{\text { ¢ }}$ |
| :---: | :---: |
| Western Australia | 2,000 |
| Tasmania. | 4,000. |
| Total increase | 131,000 |

As regards telegraphic charges, it is estimated that a loss of $£ 17,000^{\circ}$ would result to the revenue of the New South Wales Telegraph Department by an assimilation of rates to the Victorian rate of 9 d . for nine words on all inland messages. A slight loss would probably also be experienced by the Western Australian and Tasmanian Departments; while it is considered that the South Australian revenue would not be affected by the change. If, on the other hand, the Victorian charges were altered to 6 d . and 1 s . for ten words of local and inland telegrams respectively-the rates in force in New South Wales, South Australia, Western Austmalia, and Tasmania,-it is not expected that any differ ence would be caused in the Victorian revenue by reason of the increased business that would result. Similar estimates for Queensland (where a uniform rate of 1 s . for all inland messages is in force) and New Zealand (which imposes a rate of 6d. for all ordinary, and 1 s . for urgent inland messages) have not been framed, as the available statistics do not distinguish inland telegrams from others.
