## Section 1. Introduction

Population totals recorded by field personnel during the taking of the Census of 30 June 1966 have already been published in Field Count Statements nos. 1 to 12.

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.1). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications; viz.

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued in this series is contained on page 25.

Additional bulletins will be issued for Australia as a whole early in 1968.

The figures published in this bulletin are preliminary and subject to amendment.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

All tables in this bulletin exclude particulars of full-blood Aborigines. However an analysis is now being carried out of all persons with Aboriginal blood who were enumerated at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include Statistics of characteristics of all persons with Aboriginal blood.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

Section 3. Population Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. A brief comment on the application of the criteria to Sydney and other urban centres in New South Wales is contained in Field Count Statement No. 6. In this bulletin, totals for each section of State only are published, viz.

- (a) Sydney Metropolitan Area. This area is the "urban" centre of Sydney. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban. Includes all urban centres other than the Sydney Metropolitan Area. For the definition of urban centres other than the Sydney Metropolitan Area refer to Field Count Statement No. 6.
- (c) Rural. Includes all areas not included in (a) or (b) above.
- (d) Migratory. Refers to persons who at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in New South Wales' ports, or ships which had left an Australian port prior to Census night with a next port of call in New South Wales. It also includes persons, who at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

NOTE. For Metropolitan and other urban centres which are delimited by moving boundaries (see Field Count Statement No. 6), boundaries for 1961 were redrawn according to the new criteria. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the original 1961 boundaries, (ii) urban growth beyond the original boundaries i.e. the absorption of rural areas by urban and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

Minus sign (-) denotes decrease in population.

#### Section 4. Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In 1954 and later Censuses, "not stated" ages have been individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lies (to conform with other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. The random list for the allocation of "not stated" ages had been compiled previously using the latest available estimates of the age distribution of the population.

The proportion of persons who failed to state an age is very small.

### Section 5. Marital Status

At the 1966 Census, persons were asked to state marital status in accordance with the following instructions.

"If never married, write "N.M."; at present married, write "M"; married but permanently separated (legally or otherwise), write "P.S."; divorced and not remarried, write "D"; widowed and not remarried, write "W".

A very small proportion of persons omitted to state any marital status. In such cases, marital status was assessed as follows.

Males under 20 years of age and females under 18 years of age were classified "never married" unless there was definite evidence of marriage given in the Schedule, in which case they were classified "married". All other persons were classified "married" if there was any evidence of marriage given in the Schedule. Otherwise a marital status was allocated from a random list according to the age and sex of the person concerned. The random list for the allocation of "not stated" marital status had been compiled previously using the latest available Statistics of the distribution of the population by marital status.

## Section 6. Birthplace

At the 1966 Census persons were asked to state birthplace in accordance with the following instructions.

"For persons born in Australia write the name of the State or Territory where born. For persons born outside Australia write the name of the country where born (not town or locality)."

For the small number of cases where no reply was given the allocation of a birthplace was made in accordance with other information on the Schedule (usually nationality).

Section 7. Period of Residence in Australia

Persons who were born outside Australia were asked to state their period of residence in Australia in accordance with the following instructions.

"For persons born outside Australia write the number of completed years of continuous residence in Australia ignoring absences of less than twelve months. If resident less than twelve months, write "0"."

It should be noted that table 11 below relates to period of residence of overseas born persons in Australia and not to period of residence in New South Wales.

#### Section 8. Nationality

At the 1966 Census persons were asked to state nationality in accordance with the following instructions.

"State nationality or citizenship of the person in relation to the country to which he or she owes legal allegiance, for example: "Australian", "British", "French", "Stateless", etc. If Australian or British by naturalization, write "Australian" or "British"."

The tables in this section relate to nationality rather than to citizenship and consequently the category "British" includes all persons who, by virtue of the Nationality and Citizenship Act, 1948-1966, are deemed to be British subjects. Under Section 7 of the Act this includes citizens of: "(a) the United Kingdom and Colonies; (b) Canada; (c) New Zealand; (d) the Union of South Africa; (e) India; (f) Pakistan; (g) Ceylon; (h) the Federation of Rhodesia and Nyasaland; (i) Ghana; (j) The Federation of Malaya; (k) the State of Singapore."

Also included as "British" are persons who, under the Nationality and Citizenship Act 1948-1966, are Australian citizens or citizens of any other country declared by Regulation 5A of the Citizenship Regulations to be "a country within the Commonwealth of Nations". These are the Federation of Nigeria, the Republic of Cyprus, Sierra Leone, Tanganyika, Trinidad and Tobago, Uganda, Jamaica and Malaysia.

Additionally for the purposes of these tables Irish Nationality is included with British.

In the small number of cases where nationality was not stated allocation of a selected nationality was made in accordance with other information on the Schedule (usually birthplace).

Section 9. Religion

At the 1966 Census persons were asked to State their religion in accordance with the following instructions.

"State the full name of the religious denomination. (There is no penalty for failure to answer this question)."

Section 21 of the Census and Statistics Act, 1905-1966 provides that "No person shall be liable to any penalty for omitting or refusing to state the religious denomination or sect to which he belongs or adheres."

Owing to the very large numbers of persons who take advantage of the voluntary nature of the question and who failed to give any particulars regarding religion at the 1966 Census and at the three preceding Censuses, it is not possible to define precisely the composition of the population in terms of religious creed; neither is it possible to make entirely satisfactory intercensal comparisons of the numbers of persons adhering to the various religious denominations.

## Section 10. Education

At the 1966 Census persons in New South Wales were asked to state their level of education in accordance with the following instructions.

**"Education.** For each person state the highest level of schooling completed. If passed at Leaving or Matriculation level, write 'M'. If passed at Intermediate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Intermediate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), Merit or High School Entrance, write 'P'. If never attended school, write 'N'.

**Note:** For persons whose highest level of schooling was received overseas, or in another Australian State or Territory, give what is considered to be the equivalent in terms of the above categories."

In addition to the above, which relates to level of schooling, persons with qualifications received after completion of formal schooling were required to supply information in accordance with the following instruction.

**"Qualifications.** State the person's qualifications, trade training or other qualifications and the institution at which obtained e.g., Bachelor of Engineering, University of Sydney; Diploma of Architecture, South Australian Institute of Technology; A.A.S.A.; Certificate of Management, Hobart Technical College; Five years' Apprenticeship."

The information obtained was used to determine two additional levels of completed education, viz. University degree and Other tertiary qualifications. Particulars of individual qualifications are not available.

It was intended that persons attending secondary school who had not passed examinations at intermediate level should answer "H". However, this intention was obscured by the use of the past tense in the instruction, with the result that some secondary school students were either recorded as having attended primary school ("P") or the level of schooling was not stated.

To provide for this misunderstanding, all 12, 13 and 14 year olds shown as "P" were redistributed as "P" or "H" in proportion with age distributions obtained from the Department of Education.

In the cases where education level was not stated for children aged 0-16 years the level was determined as follows. Children aged 0-11 years were classified "never attended school" or "primary" according to relevant information on the Schedule (particularly activity). Children aged 12-14 years were allocated in accordance with the proportion of children of each age in primary and secondary school as recorded by the Department of Education during the intercensal period. Children aged 15 or 16 years were classified "secondary" where other information on the Schedule showed them to be still attending school.

## Section 11. Work Force

At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 34,000 additional persons in the work force i.e. a proportionate increase of approximately 0.8 per cent. The majority factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

## Section 12. Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F".

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (.e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)."

### Section 13. Occupation

Persons in the work force were asked to state occupation in accordance with the following instructions.

"State in precise (or award) terms the person's main occupation last week, using where possible two or more words. For example, "Builder's Labourer", "Dairy Farm Hand", "Clothing Machinist", "Wood Machinist", "Motor Mechanic", "Electrical Fitter", "Coal Wheeler", "Dairy Farmer", etc. Employees of Government Departments or Authorities should be described by their official designation, such as "District Employment Officer", "Shire Clerk", etc., and not by such terms as "Public Servant", etc."

The precise classification of persons in the work force according to Occupation and Industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force (see Section 11) but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification according to Occupation and Industry is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

Classification according to occupation is particularly difficult because: (a) the range of occupations is so extensive; (b) there is lack of uniformity in occupational terms, which vary between industries, locations and States; and (c) respondents fail to give precise descriptions, especially of other members of the family, either through carelessness or ignorance of occupational designations. Similarly classification according to industry is complicated by the development of new fields of industrial enterprise and the splitting and overlapping of previously identifiable fields.

The information relating to occupations and industries will therefore be subjected to detailed investigation when further tabulations become available. Occupations tabulated according to industry and other characteristics such as age will throw further light on those statistics which prima facie appear to warrant verification, (e.g. where females have been classified to occupations traditionally - but not necessarily exclusively - undertaken by males). However the information relating to occupations and industries in the following tables is published now with the above qualifications in order to obviate the delay which would eventuate if all investigations were to be undertaken prior to publication. The figures can be regarded as generally satisfactory but subject to revision.

## Section 14. Industry

Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

The precise classification of persons in the work force according to their industry is extremely difficult for reasons outlined on page 19.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.2). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia.

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 18.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole in the near future.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An additional publication containing details of the characteristics of the Aboriginal population is in preparation and will be issued shortly.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

## Section 2. Geographical Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. In this bulletin, totals for each section of State only are published, namely:

- (a) Metropolitan Areas - These areas are the "urban centres" of each of the six State capital cities and of Canberra in the Australian Capital Territory. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban - Includes all urban centres other than the Metropolitan Areas.
- (c) Rural - Includes all areas not included in (a) or (b) above.

## Section 3. Definitions

At the 1966 Census the following definitions were used as a basis for the Census of Dwellings.

- (a) An "occupied dwelling" is any habitation occupied by a Household group and may comprise the whole or only a part of a building.
- (b) A "household group" is a person or group of persons living as a domestic unit with common eating arrangements.

The number of "occupied dwellings" and the number of "households" are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

## Section 4. Class of Dwelling

Details of the numbers of each class of dwelling have been obtained from householders' statements made in accordance with the following instructions.

"State below whether the dwelling is a -

- Private house (including semi-detached and terrace house).
- Share of private house.
- Self-contained flat (including home unit).
- Share of a flat.
- Room(s), apartment or flat (not self-contained).
- Shed, hut, caravan, tent, boat, etc.
- Licensed hotel, motel, hostel, boarding house, institution, barracks, staff quarters, etc.

Where a private house or flat is shared without structural subdivision by two or more household groups each householder should fill in a separate Householder's Schedule.

"Self-contained" means able to be completely closed off and with own cooking and bathing facilities."

Dwellings are classified as follows:

Private dwellings -

Private house  
Share of private house  
Self-contained flat  
Share of self-contained flat  
Shed, hut, tent, caravan, etc.  
"Other" private dwellings

Non-private dwellings -

These include -

licensed hotels  
motels  
boarding houses  
educational institutions  
religious institutions  
charitable institutions  
hospitals  
staff barracks  
etc.

Where the class of dwelling was "not stated" a class was allocated prior to tabulation on the basis of other information in the Census Schedule or answers given for neighbouring dwellings.

Persons not enumerated in dwellings

Persons who on Census night were camping out, travelling on board ships in Australian waters, or ships which had left an Australian port prior to Census night with a next port of call in Australia or were enumerated on long-distance trains, motor coaches or aircraft are not regarded as living in a dwelling for Census purposes. Persons classified as "camping out" include those living temporarily (e.g. on holidays) in tents, caravans or houseboats, or who were "camped out" on Census night. If a tent, caravan or houseboat constituted a semi-permanent dwelling it was classified as a dwelling and is included in Table 1 of this bulletin.

(a) Represents 4,206 private houses in Sydney Metropolitan area, 1,081 in other urban areas and 265 in rural areas. (b) At the 1961 Census share of self-contained flat was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat. (c) Represents 264 self-contained flats in Sydney Metropolitan area, 51 in other urban areas and 6 in rural areas. (d) Details of the number of each of the types of non-private dwellings referred to on Page 5 are available on request. (e) See section 11. Minus sign (-) denotes decrease.

(a) It has not been found possible to provide all 1961 Census dwelling statistics on a basis comparable with that adopted for 1966.

#### 5. Material of Outer Walls

At the 1966 Census each householder was asked to state the material of which the outer walls of the dwelling was built in accordance with the following instructions.

"Material of which Outer Walls are Built. State below whether brick, brick veneer, fibro-cement, wood, stone, concrete, iron, or other material (please specify). If more than one material state the one most largely used."

At the 1961 Census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. However, in view of the increased use of brick veneer in the construction of dwellings, separate details are shown for the 1966 Census.

In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 Census Schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

#### 6. Number of Rooms

At the 1966 Census each householder was asked to state the number of rooms in the dwelling in accordance with the following instructions.

"State below the number of rooms in this dwelling. Count all rooms (including permanently enclosed sleep-out) except bathroom, toilet, pantry, laundry or storeroom.

Note: Rooms in non-attached buildings should be included only if used for living or sleeping purposes by members of this household. A combined living-dining room or combined kitchen-living or kitchen-dining room should be counted as one room.

A shared kitchen or shared living room in a shared house should be included only by the owner or principal tenant."

The specific instructions relating to non-attached buildings were included at the 1961 Census but those relating to combined-usage rooms were introduced at the 1966 Census.

Where the number of rooms in a dwelling was not stated a number was allocated prior to tabulation, on the basis of the answer given for the geographically nearest dwelling of the same class except in the case of sheds, huts, tents, garages, caravans and houseboats where allocation was made by the use of a series of random numbers. The random numbers, which ranged from 1 to 8 rooms, were based upon the distribution of the number of rooms recorded in these types of dwellings at the 1961 Census.

The number of cases for which number of rooms was not stated is relatively small.

8. Nature of Occupancy

At the 1966 Census each householder in New South Wales was asked to state the nature of occupancy of the dwelling according to the following instructions.

"Indicate the basis on which the dwelling is occupied (mark with a cross in the appropriate box) -

Owner (including persons buying or paying off the dwelling) ..

Tenant or Subtenant

Of Housing Commission .. .. .

Of other Landlord .. .. .

Caretaker .. .. .

Other (please specify) .....

At the 1961 Census persons paying interest only on a mortgage on the dwelling were instructed to enter "owner" but a person buying a house by regular payments including interest and principal was instructed to enter "purchaser by instalment". Despite these specific instructions it is probable that some "purchasers by instalment" described themselves on 1961 Census Schedules as "owners" especially in cases where they possessed the title to the property. However the extent of such mis-statements has not been measured. At the 1966 Census, as the two categories can be logically grouped, separate details for "owners" and "purchasers by instalment" were not collected.

9. Facilities

At the 1966 Census each householder was asked to state the facilities installed in the dwelling according to the following instructions.

"State "Yes" or "No" whether the dwelling has the following facilities

- (a) Gas (i) Mains .....  
(ii) Bottled .....
- (b) Electricity (i) Mains .....  
(ii) Home generated .....
- (c) Television Set .....
- (d) Kitchen\* .....
- (e) Bathroom\* .....

\* If shared with another household add "S".

Data relating to kitchens and bathrooms was sought for office use only and has not been tabulated.

At the 1961 Census there was no specific provision on the Schedule for householders with a power supply other than mains (i.e. home generated electricity or bottled gas); it was anticipated that such dwellings would be included in either the gas or electricity category by householders. However, it is possible that at the 1961 Census a number of householders, whose dwellings had a non-mains source of power refrained from stating the facilities of their dwellings. The instructions were revised at the 1966 Census and provision was made for the specific inclusion of dwellings with a non-mains power supply.

10. Number of Motor Vehicles

At the 1966 Census each householder was asked to state the number of motor vehicles at the dwelling in accordance with the following instructions.

"State below the number of Motor Vehicles (excluding Motor Cycles and Scooters) used by members of this household that were garaged or parked at or near this dwelling for the night of Thursday, 30 June. If no motor vehicles, write "NIL"."

Information relating to number of motor vehicles was not sought at the 1961 Census.

Details of the number of motor vehicles were obtained only for private dwellings.

11. Unoccupied Dwellings

For dwellings not occupied on the night of the Census, collectors were required to determine as many particulars as possible and to enter on the Schedule the reasons why the dwelling was unoccupied.

Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as weekenders or holiday homes and seasonal workers' quarters which were not occupied on Census night; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on Census night; dwellings described as "to be demolished", "condemned", "exhibition home", etc; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

(a) The inter-censal increase in unoccupied non-private dwellings is mainly the result of a better coverage at the 1966 Census of unoccupied seasonal quarters (e.g. shearers' huts).

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.3). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 11.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of age and of marital status of the population at the 1966 Census is contained in Census Bulletin No. 1.1 - "Summary of Population, New South Wales".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.4). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:  
 "Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and  
 "..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service....."
2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows:  
 "Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO".  
 "Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO".  
 "Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO".  
 "Did the person look for work last week? ANSWER "YES" or "NO".  
 (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."
3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.
4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.
5. The net effect of the new definition is to include approximately 34,000 additional persons in the New South Wales work force i.e. a proportionate increase in the New South Wales work force of approximately 1.9 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Industry

6. Persons in the work force were asked to state industry in accordance with the following instructions.  
 "State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

7. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

8. The precise classification of persons in the work force according to occupation and industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required ( e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

9. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

### Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some misstatement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, "not stated" ages were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 will be issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.5). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 7.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of all persons who were reported as having some degree of Aboriginal blood at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include statistics of characteristics of all persons with Aboriginal blood.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of the birthplace and nationality of the population at the 1966 Census is contained in Census Bulletin 1.1 "Summary of Population, New South Wales".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 will be issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.5). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 7.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of all persons who were reported as having some degree of Aboriginal blood at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include statistics of characteristics of all persons with Aboriginal blood.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of the birthplace and nationality of the population at the 1966 Census is contained in Census Bulletin 1.1 "Summary of Population, New South Wales".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.6). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 20.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

5. The net effect of the new definition is to include approximately 34,000 additional persons in the New South Wales work force i.e. a proportionate increase in the New South Wales work force of approximately 1.9 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Occupational Status

6. Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O"."

"If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F"."

7. Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question.)"

#### Industry

8. Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

9. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

10. The precise classification of persons in the work force according to industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

11. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.7). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 10.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of procedure used to obtain details of age and of marital status of the population at the 1966 Census is contained in Census Bulletin 1.1 - "Summary of Population, New South Wales".

## Explanatory Notes

### Work Force

At the 1961 and previous Censuses the work force was determined as:

"Those who were engaged in an industry, business, profession, trade

or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO".  
(Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 34,000 additional persons in the New South Wales work force i.e. a proportionate increase in the New South Wales work force of approximately 1.9 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service".

#### Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F"."

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 1.8). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 45.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole in the near future.

The figures in this bulletin are final. At this stage only details of total occupied and unoccupied dwellings are available; details of the numbers of private and non-private dwellings in local government areas will be issued at a later date.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An additional publication containing details of the characteristics of the Aboriginal population is in preparation and will be issued shortly.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

### Explanatory Notes

For the purpose of presenting population and dwelling statistics obtained at the Census of 30 June 1966, new concepts have been adopted for the delimitation of Metropolitan and other urban centres. These are described in detail in Field Count Statement No. 4 - Population : Principal Urban Centres of Australia. Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts) the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts, to other urban centres with a population of 30,000 or more and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook and urban centres in the Shires of Wyong and Gosford in New South Wales; Moe-Yallourn in Victoria; Cairns in Queensland and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future Censuses.

Briefly the new concepts, which, as explained above, have in general only been applied to the larger urban centres, are as follows:-

- (i) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated "Urban". This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as "Urban" on other grounds (e.g. holiday areas, industrial areas).
- (ii) Around each principal urban centre with a population of 75,000 or more two boundaries shall be drawn. The outer boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong and Geelong).

The inner boundary shall delimit the principal urban centre itself. It shall be a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities, the principal urban centre encompassed by the inner boundary shall be designated the "METROPOLITAN AREA".

- (iii) Other urban centres shall be described by name as "URBAN \_\_\_\_\_".

2. For urban centres not yet delimited by the new criteria, the following procedures were used:-

- (i) Municipalities, cities, towns and boroughs of 1,000 population and over have been classified as urban (except where they contain a very large rural component, in which case the urban centres have been delimited from aerial photographs or by field inspection). Where extensive urban development is known to extend beyond the boundary the extension has been regarded as an integral part of the urban centre and so included.
- (ii) Other urban centres have been intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 has enabled more meaningful boundaries to be delineated for many small urban centres.

3. Comparable population data for the 1961 Census have been prepared using the new concepts although, because 1961 collector's districts were not especially designed for this purpose, some estimations have had to be made.

4. Comparable dwelling data for the 1961 Census, using the same concepts, are not yet available for all urban centres. The 1961 figures shown in this bulletin have been adjusted only to take account of local government area boundary changes which have occurred since the 1961 Census.

5. Where, through growth or decline, an urban centre at one Census was non-urban at the other, figures for both Censuses have been shown where available for comparison, the non-urban figure being in brackets.

6. In some instances, urban centres may extend across State boundaries. Examples are Gold Coast, which includes Tweed Heads, Albury-Wodonga and a number of smaller urban centres along the River Murray. In such cases, State tables include only that part of the urban centre situated within the State, the population of the whole urban centre being shown in a footnote.

7. A statement of the procedure used to obtain details of dwellings at the 1966 Census is contained on page 3 of Census Bulletin 9.2 (Interim) - "Summary of Dwellings, Australia".

8. Throughout this statement the following abbreviations have been used:

(C) = City; (M) = Municipality; (S) = Shire; n.a. = not available.

TABLE 2. - POPULATION, URBAN CENTRES : NEW SOUTH WALES, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

TABLE 3. - POPULATION AND DWELLINGS, LOCAL GOVERNMENT AREAS : NEW SOUTH WALES, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

(a) Indicates those local government areas where a boundary change occurred between the 1961 and 1966 Censuses. In some cases such boundary changes resulted in a change in the population of the local government area. In order to provide a comparison with the 1966 population, the 1961 local government area populations shown in this table have been adjusted, where necessary, to the boundaries existing at 30 June 1966.

(b) Merged with Metropolitan Area. (c) Non-urban in 1966. (d) New South Wales part of Urban Gold Coast. Population of Urban Gold Coast - 1961, 34,764; 1966, 53,183. (e) Non-urban in 1961. (f) The separate urban centres of Budgewoi and Toukley-Gorokan merged in 1966 to form the urban centre of Toukley-Gorokan-Budgewoi. The 1961 population includes only Toukley-Gorokan which forms the comparable urban centre in 1961. (g) Merged with Urban Wollongong. (h) New South Wales part of Urban Albury-Wodonga. Population of Urban Albury-Wodonga - 1961, 28,796; 1966, 32,032. (i) New South Wales part of Urban Yarrawonga-Mulwala. Population of Urban Yarrawonga-Mulwala - 1961, 3,770; 1966, 3,990.

(j) New South Wales part of Urban Echuca-Moama. Population of Urban Echuca-Moama - 1961, 7,253; 1966, 8,010. (k) New South Wales part of Urban Barham-Koondrook. Population of Urban Barham-Koondrook - 1961, 1,736; 1966, 1,743. (m) Refers to persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in New South Wales' ports or ships which had left an Australian port prior to Census night with a next port of call in New South Wales. It also includes persons who, at Census time, were enumerated on long-distance trains, motor coaches or aircraft. NOTE. Minus sign(-) denotes decrease.

TABLE 4. - POPULATION, URBAN CENTRES WITH POPULATION OF 5,000 AND OVER

NEW SOUTH WALES, CENSUSES, 1961 AND 1966

**NOTE.** For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

## Section 1. Introduction

Population totals recorded by field personnel during the taking of the Census of 30 June 1966 have already been published in Field Count Statements nos. 1 to 12.

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.1). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued in this series is contained on page 26.

Additional bulletins will be issued for Australia as a whole early in 1968.

The figures published in this bulletin are preliminary and subject to amendment.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

All tables in this bulletin exclude particulars of full-blood Aborigines. However an analysis is now being carried out of all persons with Aboriginal blood who were enumerated at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include statistics of characteristics of all persons with Aboriginal blood.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

## Section 3. Population Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. A brief comment on the application of the criteria to Melbourne and other urban centres in Victoria is contained in Field Count Statement No. 7. In this bulletin, totals for each section of State only are published, namely:

- (a) Melbourne Metropolitan Area. This area is the "urban" centre of Melbourne (see Field Count Statement Nos. 4 and 7 for a description of criteria used). Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban. Includes all urban centres other than the Melbourne Metropolitan Area. For definition of these Urban centres refer to Field Count Statement No. 7.
- (c) Rural. Includes all areas not included in (a) or (b) above.
- (d) Migratory. Refers to persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Victorian ports or ships which had left an Australian port prior to Census night with a next port of call in Victoria. It also includes persons who, at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

NOTE. For Metropolitan and other urban centres which are delimited by moving boundaries (see Field Count Statement No. 7), boundaries for 1961 were redrawn according to the new criteria. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries i.e. the absorption of rural areas by urban and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

Minus sign (-) denotes decrease in population.

#### Section 4. Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In 1954 and later Censuses, "not stated" ages have been individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lies (to conform with other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. The random list for the allocation of "not stated" ages had been compiled previously using the latest available estimates of the age distribution of the population.

The proportion of persons who failed to state an age is very small.

EXPLANATORY NOTES

- Local Government Areas are as used in Commonwealth Census 30th June 1988.
- Cities and Municipalities contain Urban Centres of 1,000 persons or more.
- For the 1988 Census, boundaries were placed around all population concentrations which had a 1981 Census non-farm population of 400 persons or more, and around military areas which had 250 dwellings or more. Symbols on the map for all the above localities refer to the 1981 Census results. For other localities symbols are based on the 1981 Census.

### Section 5. Marital Status

At the 1966 Census, persons were asked to state marital status in accordance with the following instructions.

"If never married, write "N.M."; at present married, write "M"; married but permanently separated (legally or otherwise), write "P.S."; divorced and not remarried, write "D"; widowed and not remarried, write "W".

A very small proportion of persons omitted to state any marital status. In such cases, marital status was assessed as follows.

Males under 20 years of age and females under 18 years of age were classified "never married" unless there was definite evidence of marriage given in the Schedule, in which case they were classified "married". All other persons were classified "married" if there was any evidence of marriage given in the Schedule. Otherwise a marital status was allocated from a random list according to the age and sex of the person concerned. The random list for the allocation of "not stated" marital status had been compiled previously using the latest available statistics of the distribution of the population by marital status.

Section 6. Birthplace

At the 1966 Census persons were asked to state birthplace in accordance with the following instructions.

"For persons born in Australia write the name of the State or Territory where born. For persons born outside Australia write the name of the country where born (not town or locality)."

For the small number of cases where no reply was given the allocation of a birthplace was made in accordance with other information on the Schedule (usually nationality).

Section 7. Period of Residence in Australia

Persons who were born outside Australia were asked to state their period of residence in Australia in accordance with the following instructions.

"For persons born outside Australia write the number of completed years of continuous residence in Australia ignoring absences of less than twelve months. If resident less than twelve months, write "0"."

It should be noted that table 11 below relates to period of residence of overseas born persons in Australia and not to period of residence in Victoria.

### Section 8. Nationality

At the 1966 Census persons were asked to state nationality in accordance with the following instructions.

"State nationality or citizenship of the person in relation to the country to which he or she owes legal allegiance, for example: "Australian", "British", "French", "Stateless", etc. If Australian or British by naturalization, write "Australian" or "British"."

The tables in this section relate to nationality rather than to citizenship and consequently the category "British" includes all persons who, by virtue of the Nationality and Citizenship Act, 1948-1966, are deemed to be British subjects. Under Section 7 of the Act this includes citizens of: "(a) the United Kingdom and Colonies; (b) Canada; (c) New Zealand; (d) the Union of South Africa; (e) India; (f) Pakistan; (g) Ceylon; (h) the Federation of Rhodesia and Nyasaland; (i) Ghana; (j) The Federation of Malaya; (k) the State of Singapore."

Also included as "British" are persons who, under the Nationality and Citizenship Act 1948-1966, are Australian citizens or citizens of any other country declared by Regulation 5A of the Citizenship Regulations to be "a country within the Commonwealth of Nations". These are the Federation of Nigeria, the Republic of Cyprus, Sierra Leone, Tanganyika, Trinidad and Tobago, Uganda, Jamaica and Malaysia.

Additionally for the purposes of these tables Irish Nationality is included with British.

In the small number of cases where nationality was not stated allocation of a selected nationality was made in accordance with other information on the Schedule (usually birthplace).

Section 9. Religion

At the 1966 Census persons were asked to State their religion in accordance with the following instructions.

"State the full name of the religious denomination. (There is no penalty for failure to answer this question)."

Section 21 of the Census and Statistics Act, 1905-1966 provides that "No person shall be liable to any penalty for omitting or refusing to state the religious denomination or sect to which he belongs or adheres."

Owing to the very large numbers of persons who take advantage of the voluntary nature of the question and who failed to give any particulars regarding religion at the 1966 Census and at the three preceding Censuses, it is not possible to define precisely the composition of the population in terms of religious creed; neither is it possible to make entirely satisfactory intercensal comparisons of the numbers of persons adhering to the various religious denominations.

## Section 10. Education

At the 1966 Census persons in Victoria were asked to state their level of education in accordance with the following instructions.

**"Education.** For each person state the highest level of schooling completed. If passed at Leaving or Matriculation level, write 'M'. If passed at Intermediate level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Intermediate level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as Qualifying Certificate (Q.C.), or Merit, write "P". If never attended school, write "N".

**Note:** For persons whose highest level of schooling was received overseas, or in another Australian State or Territory, give what is considered to be the equivalent in terms of the above categories."

In addition to the above, which relates to level of schooling, persons with qualifications received after completion of formal schooling were required to supply information in accordance with the following instruction.

**"Qualifications.** State the person's qualifications, trade training or other qualifications and the institution at which obtained e.g., Bachelor of Engineering, University of Sydney; Diploma of Architecture, South Australian Institute of Technology; A.A.S.A.; Certificate of Management, Hobart Technical College; Five years' Apprenticeship."

The information obtained was used to determine two additional levels of completed education, namely: University degree and Other tertiary qualifications. Particulars of individual qualifications are not available.

It was intended that persons attending secondary school who had not passed examinations at intermediate level should answer "H". However, this intention was obscured by the use of the past tense in the instruction, with the result that some secondary school students were either recorded as having attended primary school ("P") or the level of schooling was not stated.

To provide for this misunderstanding, all 12, 13 and 14 year olds shown as "P" were redistributed as "P" or "H" in proportion with age distributions obtained from the Department of Education.

In the cases where education level was not stated for children aged 0-16 years the level was determined as follows. Children aged 0-11 years were classified "never attended school" or "primary" according to relevant information on the Schedule (particularly activity). Children aged 12-14 years were allocated in accordance with the proportion of children of each age in primary and secondary school as recorded by the Department of Education during the intercensal period. Children aged 15 or 16 years were classified "secondary" where other information on the Schedule showed them to be still attending school.

Section 11. Work Force

At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 33,000 additional persons in the Victorian work force i.e. a proportionate increase in the Victorian work force of approximately 2.5 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Section 12. Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F"."

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (.e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)."

Section 13. Occupation

Persons in the work force were asked to state occupation in accordance with the following instructions.

"State in precise (or award) terms the person's main occupation last week, using where possible two or more words. For example, "Builder's Labourer", "Dairy Farm Hand", "Clothing Machinist", "Wood Machinist", "Motor Mechanic", "Electrical Fitter", "Coal Wheeler", "Dairy Farmer", etc. Employees of Government Departments or Authorities should be described by their official designation, such as "District Employment Officer", "Shire Clerk", etc., and not by such terms as "Public Servant", etc."

The precise classification of persons in the work force according to Occupation and Industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force (see Section 11) but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification according to Occupation and Industry is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

Classification according to occupation is particularly difficult because: (a) the range of occupations is so extensive; (b) there is lack of uniformity in occupational terms, which vary between industries, locations and States; and (c) respondents fail to give precise descriptions, especially of other members of the family, either through carelessness or ignorance of occupational designations. Similarly classification according to industry is complicated by the development of new fields of industrial enterprise and the splitting and overlapping of previously identifiable fields.

The information relating to occupations and industries will therefore be subjected to detailed investigation when further tabulations become available. Occupations tabulated according to industry and other characteristics such as age will throw further light on those statistics which prima facie appear to warrant verification, (e.g. where females have been classified to occupations traditionally - but not necessarily exclusively - undertaken by males). However the information relating to occupations and industries in the following tables is published now with the above qualifications in order to obviate the delay which would eventuate if all investigations were to be undertaken prior to publication. The figures can be regarded as generally satisfactory but subject to revision.

## Section 14. Industry

Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

The precise classification of persons in the work force according to their industry is extremely difficult for reasons outlined on page 19.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.2). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia.

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole in the near future.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An additional publication containing details of the characteristics of the Aboriginal population is in preparation and will be issued shortly.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

## Section 2. Geographical Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. In this bulletin, totals for each section of State only are published, namely:

- (a) Metropolitan Areas - These areas are the "urban centres" of each of the six State capital cities and of Canberra in the Australian Capital Territory. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban - Includes all urban centres other than the Metropolitan Areas.
- (c) Rural - Includes all areas not included in (a) or (b) above.

## Section 3. Definitions

At the 1966 Census the following definitions were used as a basis for the Census of Dwellings.

- (a) An "occupied dwelling" is any habitation occupied by a "household group" and may comprise the whole or only a part of a building.
- (b) A "household group" is a person or group of persons living as a domestic unit with common eating arrangements.

The number of "occupied dwellings" and the number of "households" are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

## Section 4. Class of Dwelling

Details of the numbers of each class of dwelling have been obtained from householders' statements made in accordance with the following instructions.

"State below whether the dwelling is a -

- Private house (including semi-detached and terrace house).
- Share of private house.
- Self-contained flat (including home unit).
- Share of a flat.
- Room(s), apartment or flat (not self-contained).
- Shed, hut, caravan, tent, boat, etc.
- Licensed hotel, motel, hostel, boarding house, institution, barracks, staff quarters, etc.

Where a private house or flat is shared without structural subdivision by two or more household groups each householder should fill in a separate Householder's Schedule.

"Self-contained" means able to be completely closed off and with own cooking and bathing facilities."

Dwellings are classified as follows:

Private dwellings -

Private house  
 Share of private house  
 Self-contained flat  
 Share of self-contained flat  
 Shed, hut, tent, caravan, etc.  
 "Other" private dwellings

Non-private dwellings -

These include -

licensed hotels  
 motels  
 boarding houses  
 educational institutions  
 religious institutions  
 charitable institutions  
 hospitals  
 staff barracks  
 etc.

Where the class of dwelling was "not stated" a class was allocated prior to tabulation on the basis of other information in the Census Schedule or answers given for neighbouring dwellings.

Persons not enumerated in dwellings

Persons who on Census night were camping out, travelling on board ships in Australian waters, or ships which had left an Australian port prior to Census night with a next port of call in Australia or were enumerated on long-distance trains, motor coaches or aircraft are not regarded as living in a dwelling for Census purposes. Persons classified as "camping out" include those living temporarily (e.g. on holidays) in tents, caravans or houseboats, or who were "camped out" on Census night. If a tent, caravan or houseboat constituted a semi-permanent dwelling it was classified as a dwelling and is included in Table 1 of this bulletin.

(a) Represents 3,954 private houses in the Melbourne Metropolitan area, 330 in other urban areas and 123 in rural areas. (b) At the 1961 Census share of self-contained flat was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat. (c) Represents 124 self-contained flats in the Melbourne Metropolitan area and 12 in other urban areas. (d) Details of the number of each of the types of non-private dwellings referred to on Page 4 are available on request. (e) See section 11. Minus sign(-) denotes decrease.

#### 5. Material of Outer Walls

At the 1966 Census each householder was asked to state the material of which the outer walls of the dwelling was built in accordance with the following instructions.

"Material of which Outer Walls are Built. State below whether brick, brick veneer, fibro-cement, wood, stone, concrete, iron or other material (please specify). If more than one material state the one most largely used."

At the 1961 Census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. However, in view of the increased use of brick veneer in the construction of dwellings, separate details are shown for the 1966 Census.

In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 Census Schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

#### 6. Number of Rooms

At the 1966 Census each householder was asked to state the number of rooms in the dwelling in accordance with the following instructions

"State below the number of rooms in this dwelling. Count all rooms (including permanently enclosed sleep-out) except bathroom, toilet, pantry, laundry or storeroom.

Note: Rooms in non-attached buildings should be included only if used for living or sleeping purposes by members of this household. A combined living-dining room or combined kitchen-living or kitchen-dining room should be counted as one room.

A shared kitchen or shared living room in a shared house should be included only by the owner or principal tenant."

The specific instructions relating to non-attached buildings were included at the 1961 Census but those relating to combined-usage rooms were introduced at the 1966 Census.

Where the number of rooms in a dwelling was not stated a number was allocated prior to tabulation, on the basis of the answer given for the geographically nearest dwelling of the same class except in the case of sheds, huts, tents, garages, caravans and houseboats where allocation was made by the use of a series of random numbers. The random numbers, which ranged from 1 to 8 rooms, were based upon the distribution of the number of rooms recorded in these types of dwellings at the 1961 Census.

The number of cases for which number of rooms was not stated is relatively small.

8. Nature of Occupancy

At the 1966 Census each householder in Victoria was asked to state the nature of occupancy of the dwelling according to the following instructions.

"Indicate the basis on which the dwelling is occupied (mark with a cross in the appropriate box) -

Owner (including persons buying or paying off the dwelling) .. ..

Tenant or Subtenant .. ..

    Of Housing Commission, Victoria .. ..

    Of other Landlord .. ..

Caretaker .. ..

Other (please specify) .. .. ."

At the 1961 Census persons paying interest only on a mortgage on the dwelling were instructed to enter "owner" but a person buying a house by regular payments including interest and principal was instructed to enter "purchaser by instalment". Despite these specific instructions it is probable that some "purchasers by instalment" described themselves on 1961 Census Schedules as "owners" especially in cases where they possessed the title to the property. However the extent of such mis-statements has not been measured. At the 1966 Census, as the two categories can be logically grouped, separate details for "owners" and "purchasers by instalment" were not collected.

9. Facilities

At the 1966 Census each householder was asked to state the facilities installed in the dwelling according to the following instructions.

"State "Yes" or "No" whether the dwelling has the following facilities

- |                          |                           |

| (c) Television Set ..... |                           |
| (d) Kitchen* .....       |                           |
| (e) Bathroom* .....      |                           |

\* If shared with another household add "S".

Data relating to kitchens and bathrooms was sought for office use only and has not been tabulated.

At the 1961 Census there was no specific provision on the Schedule for householders with a power supply other than mains (i.e. home generated electricity or bottled gas); it was anticipated that such dwellings would be included in either the gas or electricity category by householders. However, it is possible that at the 1961 Census a number of householders, whose dwellings had a non-mains source of power refrained from stating the facilities of their dwellings. The instructions were revised at the 1966 Census and provision was made for the specific inclusion of dwellings with a non-mains power supply.

### 10. Number of Motor Vehicles

At the 1966 Census each householder was asked to state the number of motor vehicles at the dwelling in accordance with the following instructions.

"State below the number of Motor Vehicles (excluding Motor Cycles and Scooters) used by members of this household that were garaged or parked at or near this dwelling for the night of Thursday, 30 June. If no motor vehicles, write "NIL"."

Information relating to number of motor vehicles was not sought at the 1961 Census.

Details of the number of motor vehicles were obtained only for private dwellings.

### 11. Unoccupied Dwellings

For dwellings not occupied on the night of the Census, collectors were required to determine as many particulars as possible and to enter on the Schedule the reason why the dwelling was unoccupied.

Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as weekenders or holiday homes and seasonal workers' quarters which were not occupied on Census night; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on Census night; dwellings described as "to be demolished", "condemned", "exhibition home", etc; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.3). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 11.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure to obtain details of age and of marital status of the population at the 1966 Census is contained in Census Bulletin No. 2.1 - "Summary of Population, Victoria".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.4). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;

The second digit identifies the content of the bulletin as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

5. The net effect of the new definition is to include approximately 33,000 additional persons in the Victorian work force i.e. a proportionate increase in the Victorian work force of approximately 2.5 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Industry

6. Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private

households, write "P.H.".

7. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

8. The precise classification of persons in the work force according to occupation and industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

9. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

#### Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some misstatement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, "not stated" ages were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 will be issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.5). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the overseas born population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 7.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of all persons who were reported as having some degree of Aboriginal blood at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include statistics of characteristics of all persons with Aboriginal blood.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of the birthplace and nationality of the population at the 1966 census is contained in Census Bulletin 2.1. "Summary of Population, Victoria".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.6). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 20.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO".  
(Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

5. The net effect of the new definition is to include approximately 33,000 additional persons in the Victorian work force i.e. a proportionate increase in the Victorian work force of approximately 2.5 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service".

Occupational Status

6. Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

"If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F".

7. Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write, "H.D.". Inmates of institutions (e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)."

#### Industry

8. Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

9. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

10. The precise classification of persons in the work force according to industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

11. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.7). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 10.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of the age and marital status of the population at the 1966 Census is contained in Census bulletin 2.1 - "Summary of Population, Victoria".

EXPLANATORY NOTESWork Force

At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

".....those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 33,000 additional persons in the Victorian work force i.e. a proportionate increase in the Victorian work force of approximately 2.5 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as ".....engaged in an industry, business, profession, trade or service."

Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F"."

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)."

TABLE 2. - POPULATION, URBAN CENTRES : VICTORIA, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 2.8). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 39.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole in the near future.

The figures in this bulletin are final. At this stage only details of total occupied and unoccupied dwellings are available; details of the numbers of private and non-private dwellings in local government areas will be issued at a later date.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An additional publication containing details of the characteristics of the Aboriginal population is in preparation and will be issued shortly.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

Explanatory Notes -

For the purpose of presenting population and dwelling statistics obtained at the Census of 30 June 1966, new concepts have been adopted for the delimitation of Metropolitan and other urban centres. These are described in detail in Field Count Statement No. 4 - Population : Principal Urban Centres of Australia. Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts) the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts, to other urban centres with a population of 30,000 or more and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook and urban centres in the Shires of Wyong and Gosford in New South Wales; Moe-Yallourn in Victoria; Cairns in Queensland and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future Censuses.

Briefly the new concepts, which, as explained above, have in general only been applied to the larger urban centres, are as follows:-

- (i) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated "Urban". This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as "Urban" on other grounds (e.g. holiday areas, industrial areas).
- (ii) Around each principal urban centre with a population of 75,000 or more two boundaries shall be drawn. The outer boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong and Geelong).

The inner boundary shall delimit the principal urban centre itself. It shall be a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities, the principal urban centre encompassed by the inner boundary shall be designated the "METROPOLITAN AREA".

- (iii) Other urban centres shall be described by name as "URBAN \_\_\_\_\_".

2. For urban centres not yet delimited by the new criteria, the following procedures were used :-

- (i) Municipalities, cities, towns and boroughs of over 1,000 population have been classified as urban (except where they contain a very large rural component, in which case the urban centres have been delimited from aerial photographs or by field inspection). Where extensive urban development is known to extend beyond the boundary the extension has been regarded as an integral part of the urban centre and so included.
- (ii) Other urban centres have been intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 has enabled more meaningful boundaries to be delineated for many small urban centres.

3. Comparable population data for the 1961 Census have been prepared using the new concepts although, because 1961 collector's districts were not especially designed for this purpose, some estimations have had to be made.

4. Comparable dwelling data for the 1961 Census, using the same concepts, are not yet available for all urban centres. The 1961 figures shown in this bulletin have been adjusted only to take account of local government area boundary changes which have occurred since the 1961 Census.

5. Where, through growth or decline, an urban centre at one Census was non-urban at the other, figures for both Censuses have been shown where available for comparison, the non-urban figure being in brackets.

6. In some instances, urban centres may extend across State boundaries. Examples are Gold Coast, which includes Tweed Heads, Albury-Wodonga and a number of smaller urban centres along the River Murray. In such cases, State tables include only that part of the urban centre situated within the State, the population of the whole urban centre being shown in a footnote.

7. A statement of the procedure used to obtain details of dwellings at the 1966 Census is contained on page 3 of Census Bulletin 9.2 (Interim) - "Summary of Dwellings, Australia".

8. Throughout this statement the following abbreviations have been used:

(C) = City; (T) = Town; (S) = Shire; (B) = Borough; n.a. = not available.

TABLE 3. - POPULATION AND DWELLINGS, LOCAL GOVERNMENT AREAS : VICTORIA, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

(a) Indicates those local government areas where a boundary change occurred between the 1961 and 1966 Censuses. In some cases such boundary changes resulted in a change in the population of the local government area. In order to provide a comparison with the 1966 population, the 1961 local government area populations shown in this table have been adjusted, where necessary, to the boundaries existing at 30 June 1966. (b) Merged with Metropolitan Area. (c) Non-Metropolitan in 1961. (d) Non-urban in 1961. (e) Merged with Urban Geelong. (f) Victorian part of Urban Echuca-Moama. Population of Urban Echuca-Moama - 1961, 7,253; 1966, 8,010. (g) Victorian part of Urban Barham-Koondrook. Population of Urban Barham-Koondrook - 1961, 1,736; 1966, 1,743. (h) Victorian part of Urban Yarrowonga - Mulwala. Population of Urban Yarrowonga - Mulwala - 1961, 3,770; 1966, 3,990. (i) Victorian part of Urban Albury-Wodonga. Population of Urban Albury-Wodonga - 1961, 28,796; 1966 - 32,032. (j) Refers to persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Victorian ports or ships which had left an Australian port prior to Census night with a next port of call in Victoria. It also includes persons who, at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

NOTE. Minus sign (-) denotes decrease.

TABLE 4. - POPULATION, URBAN CENTRES WITH A POPULATION OF  
5,000 AND OVER : VICTORIA, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

## EXPLANATORY NOTES

- Local Government Areas are as used in Commonwealth Census 2001-June 1995.
- Cities, Towns and Burroughs contain Urban Centres of 1,000 persons or more.
- For the 1987 Census, boundaries were placed around all population concentrations which had a 1987 Census non-farm population of 450 persons or more, and around holiday areas which had 250 dwellings or more. Symbols on the maps for all the above counties refer to the 1987 Census results. For other localities symbols are based on the 1987 Census.

## Section 1. Introduction

Population totals recorded by field personnel during the taking of the Census of 30 June 1966 have already been published in Field Count Statements nos. 1 to 12.

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.1). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued in this series is contained on page 26.

Additional bulletins will be issued for Australia as a whole early in 1968.

The figures published in this bulletin are preliminary and subject to amendment.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

All tables in this bulletin exclude particulars of full-blood Aborigines. However an analysis is now being carried out of all persons with Aboriginal blood who were enumerated at the 1966 Census, and at a later date it is proposed to publish the results of this analysis. The publication will include statistics of characteristics of all persons with Aboriginal blood.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

Section 3. Population Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. A brief comment on the application of the criteria to Brisbane and other urban centres in Queensland is contained in Field Count Statement No. 8. In this bulletin, totals for each section of State only are published, namely:

- (a) Brisbane Metropolitan Area. This area is the "urban" centre of Brisbane. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban. Includes all urban centres other than the Brisbane Metropolitan Area. For the definition of these urban centres refer to Field Count Statement No. 8.
- (c) Rural. Includes all areas not included in (a) or (b) above.
- (d) Migratory. Refers to persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Queensland's ports, or ships which had left an Australian port prior to Census night with a next port of call in Queensland. It also includes persons who, at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

NOTE. For Metropolitan and other urban centres which are delimited by moving boundaries (see Field Count Statement No. 8), boundaries for 1961 were redrawn according to the new criteria. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries i.e. the absorption of rural areas by urban and (iii) the merging of other urban areas, one with another, or with the Metropolitan Area.

Minus sign (-) denotes decrease in population.

#### Section 4. Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, "not stated" ages were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex, which had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

Section 9. Marital Status

At the 1966 Census, persons were asked to state marital status in accordance with the following instructions.

"If never married, write "N.M."; at present married, write "M"; married but permanently separated (legally or otherwise), write "P.S."; divorced and not remarried, write "D"; widowed and not remarried, write "W".

A very small proportion of persons omitted to state any marital status. In such cases, marital status was assessed as follows.

Males under 20 years of age and females under 18 years of age were classified "never married" unless there was definite evidence of marriage given in the Schedule, in which case they were classified "married". All other persons were classified "married" if there was any evidence of marriage given in the Schedule. Otherwise a marital status was allocated from a random list according to the age and sex of the person concerned. The random list for the allocation of "not stated" marital status had been compiled previously using the latest available statistics of the distribution of the population by marital status.

## Section 6. Birthplace

At the 1966 Census persons were asked to state birthplace in accordance with the following instructions.

"For persons born in Australia write the name of the State or Territory where born. For persons born outside Australia write the name of the country where born (not town or locality)."

For the small number of cases where no reply was given the allocation of a birthplace was made in accordance with other information on the Schedule (usually nationality).

Section 7. Period of Residence in Australia

Persons who were born outside Australia were asked to state their period of residence in Australia in accordance with the following instructions.

"For persons born outside Australia write the number of completed years of continuous residence in Australia ignoring absences of less than twelve months. If resident less than twelve months, write "0"."

It should be noted that table 11 below relates to period of residence of oversea born persons in Australia and not to period of residence in Queensland.

### Section 8. Nationality

At the 1966 Census persons were asked to state nationality in accordance with the following instructions.

"State nationality or citizenship of the person in relation to the country to which he or she owes legal allegiance, for example: "Australian", "British", "French", "Stateless", etc. If Australian or British by naturalization, write "Australian" or "British"."

The tables in this section relate to nationality rather than to citizenship and consequently the category "British" includes all persons who, by virtue of the Nationality and Citizenship Act, 1948-1966, are deemed to be British subjects. Under Section 7 of the Act this includes citizens of: "(a) the United Kingdom and Colonies; (b) Canada; (c) New Zealand; (d) the Union of South Africa; (e) India; (f) Pakistan; (g) Ceylon; (h) the Federation of Rhodesia and Nyasaland; (i) Ghana; (j) The Federation of Malaya; (k) the State of Singapore."

Also included as "British" are persons who, under the Nationality and Citizenship Act 1948-1966, are Australian citizens or citizens of any other country declared by Regulation 5A of the Citizenship Regulations to be "a country within the Commonwealth of Nations". These are the Federation of Nigeria, the Republic of Cyprus, Sierra Leone, Tanganyika, Trinidad and Tobago, Uganda, Jamaica and Malaysia.

Additionally for the purposes of these tables Irish Nationality is included with British.

In the small number of cases where nationality was not stated allocation of a selected nationality was made in accordance with other information on the Schedule (usually birthplace).

Section 9. Religion

At the 1966 Census persons were asked to state their religion in accordance with the following instructions.

"State the full name of the religious denomination. (There is no penalty for failure to answer this question)."

Section 21 of the Census and Statistics Act, 1905-1966 provides that "No person shall be liable to any penalty for omitting or refusing to state the religious denomination or sect to which he belongs or adheres."

Owing to the very large numbers of persons who take advantage of the voluntary nature of the question and who failed to give any particulars regarding religion at the 1966 Census and at the three preceding Censuses, it is not possible to define precisely the composition of the population in terms of religious creed; neither is it possible to make entirely satisfactory intercensal comparisons of the numbers of persons adhering to the various religious denominations.

## Section 10. Education

At the 1966 Census persons in Queensland were asked to state their level of education in accordance with the following instructions.

**"Education.** For each person state the highest level of schooling completed. If passed at Senior or Matriculation level, write 'M'. If passed at Junior level, write 'J'. If attended secondary school (e.g. high, technical, non-Government) but passed no examinations at Junior level or above, write 'H'. If attended or completed infants' or primary school or passed final primary examinations such as the Scholarship or High School Entrance, write "P". If never attended school, write "N".

**Note:** For persons whose highest level of schooling was received overseas, or in another Australian State or Territory, give what is considered to be the equivalent in terms of the above categories."

In addition to the above, which relates to level of schooling, persons with qualifications received after completion of formal schooling were required to supply information in accordance with the following instruction.

**"Qualifications.** State the person's qualifications, trade training or other qualifications and the institution at which obtained e.g., Bachelor of Engineering, University of Sydney; Diploma of Architecture, South Australian Institute of Technology; A.A.S.A.; Certificate of Management, Hobart Technical College; Five years' Apprenticeship."

The information obtained was used to determine two additional levels of completed education, namely: University degree and Other tertiary qualifications. Particulars of individual qualifications are not available.

It was intended that persons attending secondary school who had not passed examinations at junior level should answer "H". However, this intention was obscured by the use of the past tense in the instruction, with the result that some secondary school students were either recorded as having attended primary school ("P") or the level of schooling was not stated.

To provide for this misunderstanding, all 12, 13 and 14 year olds shown as "P" were redistributed as "P" or "H" in proportion with age distributions obtained from the Department of Education.

In the cases where education level was not stated for children aged 0-16 years the level was determined as follows. Children aged 0-11 years were classified "never attended school" or "primary" according to relevant information on the Schedule (particularly activity). Children aged 12-14 years were allocated in accordance with the proportion of children of each age in primary and secondary school as recorded by the Department of Education during the intercensal period. Children aged 15 or 16 years were classified "secondary" where other information on the Schedule showed them to be still attending school.

## Section 11. Work Force

At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 12,900 additional persons in the Queensland work force i.e. a proportionate increase in the Queensland work force of approximately 2.0 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

## Section 12. Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H".  
If looking for first job, write "F"."

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (.e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question)."

Section 13. Occupation

Persons in the work force were asked to state occupation in accordance with the following instructions.

"State in precise (or award) terms the person's main occupation last week, using where possible two or more words. For example, "Builder's Labourer", "Dairy Farm Hand", "Clothing Machinist", "Wood Machinist", "Motor Mechanic", "Electrical Fitter", "Coal Wheeler", "Dairy Farmer", etc. Employees of Government Departments or Authorities should be described by their official designation, such as "District Employment Officer", "Shire Clerk", etc., and not by such terms as "Public Servant", etc."

The precise classification of persons in the work force according to Occupation and Industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force (see Section 11) but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification according to Occupation and Industry is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

Classification according to occupation is particularly difficult because: (a) the range of occupations is so extensive; (b) there is lack of uniformity in occupational terms, which vary between industries, locations and States; and (c) respondents fail to give precise descriptions, especially of other members of the family, either through carelessness or ignorance of occupational designations. Similarly, classification according to industry is complicated by the development of new fields of industrial enterprise and the splitting and overlapping of previously identifiable fields.

The information relating to occupations and industries will therefore be subjected to detailed investigation when further tabulations become available. Occupations tabulated according to industry and other characteristics such as age will throw further light on those statistics which prima facie appear to warrant verification, (e.g. where females have been classified to occupations traditionally - but not necessarily exclusively - undertaken by males). However the information relating to occupations and industries in the following tables is published now with the above qualifications in order to obviate the delay which would eventuate if all investigations were to be undertaken prior to publication. The figures can be regarded as generally satisfactory but subject to revision.

Section 14. Industry

Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

The precise classification of persons in the work force according to industry is subject to the difficulties outlined on page 19.

Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.2). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia.

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional publications containing further cross-classifications and more detailed geographical data will be issued progressively for Australia as a whole.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A publication containing details of the characteristics of the Aboriginal population was issued on 16 April 1969.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Although careful efforts are made to keep errors in the Census to a minimum, the large and complex task of processing Census data invariably results in minor discrepancies between the Census results produced at different stages of the Census programme. Because of the complexity of processing, and the fact that tabulations are produced progressively, it is frequently not practicable to rectify such small discrepancies. Consequently, some differences will be evident between tables included in a particular Census publication, as well as between a particular Census publication and previous publications. In all such cases the differences are small (generally no more than .02%) and in no way affect the general validity of the Census results.

Any discrepancies in the addition of percentages to totals within tables in this bulletin are due to rounding.

## Section 2. Geographical Distribution

New criteria were adopted at the 1966 Census for the delimitation of urban centres, a full description of which is contained in Field Count Statement No. 4. In this bulletin, totals for each section of State only are published, namely:

- (a) Metropolitan Areas - These areas are the "urban centres" of each of the six State capital cities and of Canberra in the Australian Capital Territory. Briefly, "urban" includes all that area with a population density of 500 or more persons per square mile, together with some other areas (e.g. industrial areas) classified as "urban" on other grounds. The urban boundary is a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. Statistics for this area are comparable with statistics for other urban centres which have been delimited according to the same criteria.
- (b) Other Urban - Includes all urban centres other than the Metropolitan Areas.
- (c) Rural - Includes all areas not included in (a) or (b) above.

## Section 3. Definitions

At the 1966 Census the following definitions were used as a basis for the Census of Dwellings.

- (a) An "occupied dwelling" is any habitation occupied by a "household group" and may comprise the whole or only a part of a building.
- (b) A "household group" is a person or group of persons living as a domestic unit with common eating arrangements.

The number of "occupied dwellings" and the number of "households" are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

## Section 4. Class of Dwelling

Details of the numbers of each class of dwelling have been obtained from householders' statements made in accordance with the following instructions.

"State below whether the dwelling is a -

- Private house (including semi-detached and terrace house).
- Share of private house.
- Self-contained flat (including home unit).
- Share of a flat.
- Room(s), apartment or flat (not self-contained).
- Shed, hut, caravan, tent, boat, etc.
- Licensed hotel, motel, hostel, boarding house, institution, barracks, staff quarters, etc.

Where a private house or flat is shared without structural subdivision by two or more household groups each householder should fill in a separate Householder's Schedule.

"Self-contained" means able to be completely closed off and with own cooking and bathing facilities."

Dwellings are classified as follows:

Private dwellings -

Private house  
 Share of private house  
 Self-contained flat  
 Share of self-contained flat  
 Shed, hut, tent, caravan, etc.  
 "Other" private dwellings

Non-private dwellings -

These include -

licensed hotels  
 motels  
 boarding houses  
 educational institutions  
 religious institutions  
 charitable institutions  
 hospitals  
 staff barracks  
 etc.

Where the class of dwelling was "not stated" a class was allocated prior to tabulation on the basis of other information in the Census Schedule or answers given for neighbouring dwellings.

Persons not enumerated in dwellings

Persons who on Census night were camping out, travelling on board ships in Australian waters, or ships which had left an Australian port prior to Census night with a next port of call in Australia or were enumerated on long-distance trains, motor coaches or aircraft are not regarded as living in a dwelling for Census purposes. Persons classified as "camping out" include those living temporarily (e.g. on holidays) in tents, caravans or houseboats, or who were "camped out" on Census night. If a tent, caravan or houseboat constituted a semi-permanent dwelling it was classified as a dwelling and is included in Table 1 of this bulletin.

(a) Represents 470 private houses in the Brisbane Metropolitan area, 185 in other urban areas and 117 in rural areas. (b) At the 1961 Census share of self-contained flat was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat. (c) Represents 26 self-contained flats in the Brisbane Metropolitan area, 23 in other urban areas and 2 in rural areas. (d) Details of the number of each of the types of non-private dwellings referred to on Page 4 are available on request. (e) See section 11. Minus sign (-) denotes decrease.

#### 5. Material of Outer Walls

At the 1966 Census each householder was asked to state the materials of which the outer walls of the dwelling was built in accordance with the following instructions.

"Material of which Outer Walls are Built. State below whether brick, brick veneer, fibro-cement, wood, stone, concrete, iron, or other material (please specify). If more than one material state the one most largely used".

At the 1961 Census, dwellings with walls of brick veneer were not separately identified and for tabulation purposes were included with brick walled dwellings. However, in view of the increased use of brick veneer in the construction of dwellings, separate details are shown for the 1966 Census.

In the small number of cases where material of outer walls was not stated a material was selected during processing of the 1966 Census Schedules. Selection was based upon the answer given for the geographically nearest dwelling of the same class as the dwelling for which material of outer walls was not stated.

6. Number of Rooms

At the 1966 Census each householder was asked to state the number of rooms in the dwelling in accordance with the following instructions.

"State below the number of rooms in this dwelling. Count all rooms (including permanently enclosed sleep-out) except bathroom, toilet, pantry, laundry or storeroom.

Note : Rooms in non-attached buildings should be included only if used for living or sleeping purposes by members of this household. A combined living-dining room or combined kitchen-living or kitchen-dining room should be counted as one room.

A shared kitchen or shared living room in a shared house should be included only by the owner or principal tenant."

The specific instructions relating to non-attached buildings were included at the 1961 Census but those relating to combined-usage rooms were introduced at the 1966 Census.

Where the number of rooms in a dwelling was not stated a number was allocated prior to tabulation, on the basis of the answer given for the geographically nearest dwelling of the same class except in the case of sheds, huts, tents, garages, caravans and houseboats where allocation was made by the use of a series of random numbers. The random numbers, which ranged from 1 to 8 rooms, were based upon the distribution of the number of rooms recorded in these types of dwellings at the 1961 Census.

The number of cases for which number of rooms was not stated is relatively small.

8. Nature of Occupancy

At the 1966 Census each householder in Queensland was asked to state the nature of occupancy of the dwelling according to the following instructions.

"Indicate the basis on which the dwelling is occupied (mark with a cross in the appropriate box) -

- Owner (including persons buying or paying off the dwelling) .. ..
- Tenant or Subtenant
- of Queensland Housing Commission .. .. .
- of other Landlord .. .. .
- Caretaker .. .. .
- Other (please specify) .....

At the 1961 Census persons paying interest only on a mortgage on the dwelling were instructed to enter "owner" but a person buying a house by regular payments including interest and principal was instructed to enter "purchaser by instalment". Despite these specific instructions it is probable that some "purchasers by instalment" described themselves on 1961 Census Schedules as "owners" especially in cases where they possessed the title to the property. However the extent of such mis-statements has not been measured. At the 1966 Census, as the two categories can be logically grouped, separate details for "owners" and "purchasers by instalment" were not collected.

## 9. Facilities

At the 1966 Census each householder was asked to state the facilities installed in the dwelling according to the following instructions:

"State "Yes" or "No" whether the dwelling has the following facilities

- (a) Gas
  - (i) Mains .....
  - (ii) Bottled .....
- (b) Electricity
  - (i) Mains .....
  - (ii) Home Generated .....
- (c) Television Set .....
- (d) Kitchen\* .....
- (e) Bathroom\* .....

\* If shared with another household add "S".

Data relating to kitchens and bathrooms was sought for office use only and has not been tabulated.

At the 1961 Census there was no specific provision on the Schedule for householders with a power supply other than mains (i.e. home generated electricity or bottled gas); it was anticipated that such dwellings would be included in either the gas or electricity category by householders. However, evidence suggests that at the 1961 Census a number of householders, whose dwellings had a non-mains source of power refrained from stating the facilities of their dwellings. The instructions were revised at the 1966 Census and provision was made for the specific inclusion of dwellings with a non-mains power supply.

10. Number of Motor Vehicles

At the 1966 Census each householder was asked to state the number of motor vehicles at the dwelling in accordance with the following instructions.

"State below the number of Motor Vehicles (excluding Motor Cycles and Scooters) used by members of this household that were garaged or parked at or near this dwelling for the night of Thursday, 30 June. If no motor vehicles, write "NIL"."

Information relating to number of motor vehicles was not sought at the 1961 Census.

Details of the number of motor vehicles were obtained only for private dwellings.

11. Unoccupied Dwellings

For dwellings not occupied on the night of the Census, collectors were required to determine as many particulars as possible and to enter on the Schedule the reason why the dwelling was unoccupied.

Unoccupied dwellings include vacant dwellings available for sale or renting; dwellings such as weekenders or holiday homes and seasonal workers' quarters which were not occupied on Census night; dwellings normally occupied but whose occupants were temporarily absent on the night of the Census; newly completed dwellings whose owners or tenants had not entered into occupation on Census night; dwellings described as "to be demolished", "condemned", "exhibition home", etc; and buildings constructed as dwellings but used for non-dwelling purposes on the night of the Census. The total number of unoccupied dwellings does not, therefore, represent the number of vacant houses and flats available for sale or renting.

(a) The inter-censal increase in unoccupied other private and non-private dwellings is mainly the result of a better coverage at the 1966 Census of dwellings occupied for only a short period of time each year, such as shearers' huts, seasonal workers' quarters, etc.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.3). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 11.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of age and marital status of the population is contained in Census Bulletin No. 3.1 - "Summary of Population, Queensland".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.4). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.)....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO".  
(Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."

3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

5. The net effect of the new definition is to include approximately 12,900 additional persons in the Queensland work force i.e. a proportionate increase in the Queensland work force of approximately 2.0 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Industry

6. Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H.". "

7. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

8. The precise classification of persons in the work force according to occupation and industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

9. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

#### Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, "not stated" ages were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.5). The first digit identifies the State or Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia.

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 7.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of the birthplace and nationality of the population at the 1966 Census is contained in Census Bulletin 3.1 "Summary of Population, Queensland".

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.6). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the overseas born population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 20.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:
 

"Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."
2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows:
 

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO".  
(Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications.)"
3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.
4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.
5. The net effect of the new definition is to include approximately 12,900 additional persons in the Queensland work force i.e. a proportionate increase in the Queensland work force of approximately 2.0 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service".

Occupational Status

6. Persons in the work force were asked to state occupational status in accordance with the following instructions.
 

|   |   |
|---|---|
| <p>"If working for wages or salary (including apprentices), write "W".<br/>If conducting own business or profession and not at present employing others, write "O".</p> | <p>"If conducting own business or profession and at present employing others, write "E".<br/>If helping but not receiving wages or salary, write "H".<br/>If looking for first job, write "P"."</p> |
|---|---|

7. Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (e.g. for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question.)"

#### Industry

8. Persons in the work force were asked to state industry in accordance with the following instructions.

"State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc. Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name. For paid housekeepers and domestic servants in private households, write "P.H."."

9. From the answers to this question, persons were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

10. The precise classification of persons in the work force according to industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

11. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.7). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the overseas born population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 10.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

A statement of the procedure used to obtain details of age and of marital status of the population at the 1966 Census is contained in Census Bulletin 3.1 - "Summary of Population, Queensland".

EXPLANATORY NOTESWork Force

At the 1961 and previous Censuses the work force was determined as:

"Those who were engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) ....."; and

"..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service ....."

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

"Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it? ANSWER "YES" or "NO"."

"Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO"."

"Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO"."

"Did the person look for work last week? ANSWER "YES" or "NO". (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications.)"

The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The net effect of the new definition is to include approximately 12,900 additional persons in the Queensland work force i.e. a proportionate increase in the Queensland work force of approximately 2.0 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service".

Occupational Status

Persons in the work force were asked to state occupational status in accordance with the following instructions.

"If working for wages or salary (including apprentices), write "W".  
If conducting own business or profession and not at present employing others, write "O".

If conducting own business or profession and at present employing others, write "E".  
If helping but not receiving wages or salary, write "H". If looking for first job, write "F"."

Persons not in the work force were asked to state activity in accordance with the following instructions.

"Persons not engaged in an industry, business, profession, trade or service. For - Children not attending school, write "C". Full-time students or children attending school, write "S". Mainly dependent on pension or superannuation, write "P". Of independent means, write "M". Engaged in unpaid home duties, write "H.D.". Inmates of institutions (e.g., for invalids and the aged, gaols, reformatories, etc.), write "I". Others not engaged in industry, etc., write "N.A.". (Young persons seeking work but not previously employed, write "O" in answer to this question.)"

## Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 3.8). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

- 1. Summary of population;
- 2. Summary of dwellings;
- 3. Ages of the population according to marital status;
- 4. Ages of the population according to industry;
- 5. Birthplaces of the overseas born population according to nationality;
- 6. Occupational status of the population according to industry;
- 7. Occupational status of the population according to age and marital status;
- 8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 38.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole in the near future.

The figures in this bulletin are final. At this stage only details of total occupied and unoccupied dwellings are available; details of the numbers of private and non-private dwellings in local government areas will be issued at a later date.

All tables in this bulletin exclude particulars of full-blood Aborigines and dwellings occupied solely by them. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An additional publication containing details of the characteristics of the Aboriginal population is in preparation and will be issued shortly.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included. Dwellings occupied by persons having diplomatic immunity have also been excluded.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

Explanatory Notes -

For the purpose of presenting population and dwelling statistics obtained at the Census of 30 June 1966, new concepts have been adopted for the delimitation of Metropolitan and other urban centres. These are described in detail in Field Count Statement No. 4 - Population : Principal Urban Centres of Australia. Because of practical difficulties (notably lack of time to carry out an extensive examination of each area in order to re-design suitable collector's districts) the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts, to other urban centres with a population of 30,000 or more and to a few smaller centres (Katoomba-Wentworth Falls, Lawson-Hazelbrook and urban centres in the Shires of Wyong and Gosford in New South Wales; Moe-Yallourn in Victoria; Cairns in Queensland and Kalgoorlie in Western Australia). It is proposed to extend the application of the new criteria to smaller centres in future Censuses.

Briefly the new concepts, which, as explained above, have in general only been applied to the larger urban centres, are as follows:-

- (i) Population clusters of 1,000 or more persons having a minimum density of 500 persons per square mile shall be designated "Urban". This density shall be determined for each census collector's district (the smallest geographical area available). Additionally, some areas of lower population and/or density shall be classified as "Urban" on other grounds (e.g. holiday areas, industrial areas).
- (ii) Around each principal urban centre with a population of 75,000 or more two boundaries shall be drawn. The outer boundary shall circumscribe the area which is expected to be in close economic and social contact with the principal urban centre for the next two or three decades. These areas shall be designated STATISTICAL DIVISIONS (for State capital cities) or STATISTICAL DISTRICTS (for Canberra, Newcastle, Wollongong and Geelong).

The inner boundary shall delimit the principal urban centre itself. It shall be a moving boundary, which from Census to Census, as urbanisation proceeds, will move outwards to encompass peripheral development. For capital cities, the principal urban centre encompassed by the inner boundary shall be designated the "METROPOLITAN AREA".

- (iii) Other urban centres shall be described by name as "URBAN \_\_\_\_\_".

2. For urban centres not yet delimited by the new criteria, the following procedures were used :-

- (i) Municipalities, cities, towns and boroughs of over 1,000 population have been classified as urban (except where they contain a very large rural component, in which case the urban centres have been delimited from aerial photographs or by field inspection). Where extensive urban development is known to extend beyond the boundary the extension has been regarded as an integral part of the urban centre and so included.
- (ii) Other urban centres have been intensively examined on the most recent aerial photographs available and the boundaries set as closely as possible to the periphery of the built-up area without regard to local government boundaries. The greater availability of recent aerial photographs in 1966 than in 1961 has enabled more meaningful boundaries to be delineated for many small urban centres.

3. Comparable population data for the 1961 Census have been prepared using the new concepts although, because 1961 collector's districts were not especially designed for this purpose, some estimations have had to be made.

4. Comparable dwelling data for the 1961 Census, using the same concepts, are not yet available for all urban centres. The 1961 figures shown in this bulletin have been adjusted only to take account of local government area boundary changes which have occurred since the 1961 Census.

5. Where, through growth or decline, an urban centre at one Census was non-urban at the other, figures for both Censuses have been shown where available for comparison, the non-urban figure being in brackets.

6. In some instances, urban centres may extend across State boundaries. Examples are Gold Coast, which includes Tweed Heads, Albury-Wodonga and a number of smaller urban centres along the River Murray. In such cases, State tables include only that part of the urban centre situated within the State, the population of the whole urban centre being shown in a footnote.

7. A statement of the procedure used to obtain details of dwellings at the 1966 Census is contained on page 3 of Census Bulletin 9.2 (Interim) - "Summary of Dwellings, Australia".

8. Because of its size the City of Brisbane is divided into fifty-four areas, termed Statistical Areas, which are not separately administered for local government purposes. In this bulletin the Statistical Areas are grouped into a convenient number of major areas based upon their location.

9. Through this statement the following abbreviations have been used:

(C) = City; (T) = Town; (S) = Shire; n.a. = not available.

TABLE 2. - POPULATION, URBAN CENTRES: QUEENSLAND, CENSUSES, 1961 AND 1966

**NOTE.** For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

(a) Non-Metropolitan in 1961. (b) That part of Urban Gold Coast in Queensland.  
Population of Urban Gold Coast - 1961, 34,764; 1966, 53,183. (c) Non-urban in 1961.

NOTE. (i) Minus sign (-) denotes decrease.

(ii) Only 1966 urban centres are included.

TABLE 3. - POPULATION AND DWELLINGS, LOCAL GOVERNMENT AREAS: QUEENSLAND, CENSUSES, 1961 AND 1966

NOTE. For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

(a) Non-Metropolitan in 1961. (b) Merged with Metropolitan Area. (c) Non-urban in 1961. (d) Indicates those local government areas where a boundary change occurred between the 1961 and 1966 Censuses. In some cases such boundary changes resulted in a change in the population of the local government area. In order to provide a comparison with the 1966 population, the 1961 local government area populations shown in this table have been adjusted, where necessary, to the boundaries existing at 30 June 1966. (e) Non-urban in 1966. (f) Refers to persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Queensland ports or ships which had left an Australian port prior to Census night with a next port of call in Queensland. It also includes persons who, at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

NOTE. Minus sign (-) denotes decrease.

TABLE 4. - POPULATION, URBAN CENTRES WITH A POPULATION OF 5,000 AND OVER : QUEENSLAND  
CENSUSES, 1961 AND 1966

**NOTE.** For Metropolitan and other urban centres, which are delimited by moving boundaries (see Explanatory Notes), boundaries for 1961 were redrawn according to the new criteria. The urban populations (partly estimated) within these boundaries are shown in this table for comparison with 1966 population. The intercensal increase or decrease between 1961 and 1966 therefore reflects (i) population changes within the revised 1961 boundaries, (ii) urban growth beyond the revised boundaries, i.e. the absorption of rural areas by urban, and (iii) the merging of other urban centres, one with another, or with the Metropolitan Area.

## EXPLANATORY NOTES

\*Local Government Areas as at used in Commonwealth Census 2006-June 1986.

†Cities and Towns contain Urban Concentrations of 1,000 persons or more.

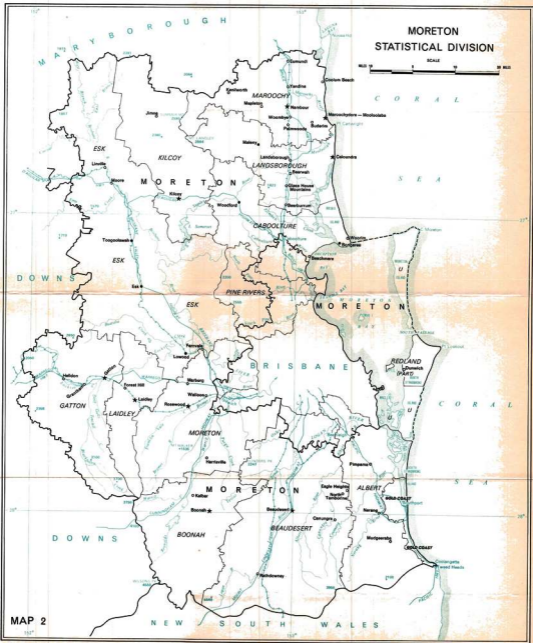

For the 1986 Census, boundaries were placed around all population concentrations which had a 1981 Census non-farm population of 400 persons or more, and around holiday areas which had 250 dwellings or more. Symbols on the maps for all the above localities refer to the 1986 Census results. For other localities symbols are based on the 1981 Census.
