**Australian Harmonized Export Commodity Classification (AHECC)
1999 Edition**

The ABS has recently completed a review of the statistical codes of the AHECC. The review, which was conducted in consultation with users of the statistics, identified and removed statistical codes with little or no reported trade, with no apparent users, or with known reporting problems.

The outcome of the review is that from 1 July 1999 there will be 660 fewer statistical codes in the AHECC. 1,161 codes will be deleted, and replaced by 501 new codes. The revised AHECC will comprise 5,618 statistical codes, a reduction of 11% on the 6,278 statistical codes existing prior to 1 July 1999.

Due to the significance of the changes, the ABS has reprinted the complete AHECC. Please replace the contents of your AHECC folder with the attached. You will need to retain only the tabbed section dividers from your old AHECC.

This copy of the AHECC becomes operative on 1 July 1999. Items affected by the 1 July changes are indicated by an asterisk in the margin.

Changes are made to the AHECC each January and July and replacement pages are issued. To ensure that you continue to receive replacement pages, please notify us if your address details change. This can be done by completing and returning the enclosed yellow form, or by advising us via phone, fax or email on the numbers above.

1 INTRODUCTION AND EXPLANATORY NOTES

1.1 PURPOSE AND BASIS OF THE AHECC

The Australian Harmonized Export Commodity Classification (AHECC) is designed:

- for use by exporters and agents to classify goods when providing export declarations to Australian Customs Service (ACS); and
- to assist users in the interpretation of export statistics published by the Australian Bureau of Statistics (ABS).

The AHECC is based on the 6 digit items of the Harmonized Commodity Description and Coding System (HS) and, with a few exceptions, is directly comparable with the 6 digit base of the Customs Tariff for statistical purposes. Further subdivisions have been included in the AHECC where necessary by the addition of two extra digits to the HS 6 digit base.

HS is a broad classification system of approximately 5,000 6-digit headings which are used for classifying goods involved in international trade. First introduced on 1 January 1988, it has subsequently been adopted by most trading nations, including Australia. It provides international statistical and administrative comparability of trade information. While the Harmonized System is reviewed by the World Customs Organisation on a rolling basis, major changes are only implemented every four to six years. The first set of major changes was made on 1 January 1992 and subsequent major changes were implemented from 1 January 1996. The next round of major changes to the Harmonized System is expected to be implemented in Australia in 2002.

In addition to incorporating amendments to the Harmonized System, changes to the statistical items are introduced by the Australian Bureau of Statistics for a variety of reasons. These reasons may include the rationalisation of units of quantity; the creation of more meaningful descriptors for existing statistical items; the creation of additional codes to accommodate changes in technology and user requests; or the amalgamation of codes which are recording minimal volumes of trade.

1.2 GENERAL RULES FOR THE INTERPRETATION OF THE HARMONIZED SYSTEM

Rules for classification of goods in the Harmonized System are prescribed in Schedule 2 of the Customs Tariff. These rules are applicable to the AHECC and are reproduced below.

- 1 *The titles of Sections, Chapters and sub-Chapters are provided for ease of reference only; the classification should be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions:*
- 2
 - (a) *any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled.*
 - (b) *any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of Rule 3.*
- 3 *When by application of Rule 2 (b) or for any other reason, goods are, prima facie, classifiable under two or more headings, classification should be effected as follows:*
 - (a) *the Heading which provides the most specific description shall be preferred to Headings providing a more general description. However, when two or more Headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.*
 - (b) *mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3 (a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.*
 - (c) *when goods cannot be classified by reference to 3 (a) or 3 (b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.*
- 4 *Goods which cannot be classified in accordance with the above Rules should be classified under the heading appropriate to the goods to which they are most akin.*
- 5 *In addition to the foregoing provisions, the following Rules should apply in respect of the goods referred to therein:*
 - (a) *camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. The Rule does not, however, apply to containers which give the whole its essential character,*
 - (b) *subject to the provisions of Rule 5 (a) above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.*
- 6 *For legal purposes, the classification of goods in the subheadings of a heading should be determined according to the terms of those subheadings and any related Subheading Notes and, mutatis mutandis, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of the Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.*

1.3 CLASSIFYING GOODS TO THE ITEMS OF THE AHECC

Goods are classified according to the general rules for the interpretation of the Harmonized System. They are presented in Section 1.2 above.

The following notes are provided to further assist in determining the correct AHECC items to be used in making Customs export declarations. They are not exhaustive but try to cover the most important aspects of the classification of goods.

Structure of the AHECC

The AHECC is arranged according to the Sections (2 digits), Chapters (2 digits), Headings (4 digits) and Subheadings (6 digits) of the Harmonized System and its items can be divided into two broad categories as follows:

- Raw materials (including Manufactures Classified by Material) - Sections 01-15.
- Manufactures not classified by material - Sections 16-21.

Goods obtained from the same material are generally grouped together and are arranged progressively from the raw material or less manufactured product through to the finished or more highly manufactured product. For example,

Chapter 1 : Live animals
 Chapter 2 : Meat and edible meat offal
 Chapter 15 : Animal fats and oils
 Chapter 16 : Preparations of meat, etc
 Chapter 41 : Raw hides and skins, etc
 Chapter 42 : Articles of leather, etc
 Chapter 64 : Leather footwear, etc

Certain categories of exports e.g., goods re-exported after being imported for industrial processing and some ships and aircraft stores, are not classified in the normal manner and are included in either Chapter 98 or 99. (Please refer to Section 1.4 for more details on these chapters).

Classification techniques

The following general principles should be followed when classifying goods:

- (a) Determine the broad category to which the goods fall e.g., raw materials or semi-manufactures and finished goods.
- (b) Select the appropriate Section and Chapter from the category determined under (a) above and from the Section and Chapter headings given in the Summary of Classification (see Section 2.6).
- (c) Examine the 4 digit Headings in the chosen Chapter to determine the most appropriate 6 digit Subheadings. To assist in classifying goods to the six digit Subheadings an alphabetic index is included in Section 4 of this document.
- (d) Examine the detailed 8 digit classifications under the selected 6 digit item to select the one most appropriate.

The following points should also be borne in mind when classifying goods:

- i Classification by end use can at times be misleading: a given commodity could, perhaps be applied to a variety of end uses, eg cut timber. Products of this nature should therefore be classified according to their material content.
- ii In some instances, however, the end use is very clear, and the value-added in adapting the commodity for that end use high. In such instances, classification by end use is appropriate, eg typewriter ribbons of silk should be classified to 9612.10.00 'Typewriter and similar ribbons' not 5007.20.00 'Fabrics of silk'.

For further details see Section 1.2.

Classification of parts

- (a) Parts for general use do not take the classification of the whole goods unless indicated to the contrary by a heading at the 4, 6, or 8 digit level e.g., 7315 "Chain and parts thereof, of iron or steel".
- (b) Where parts can be identified as being mainly for use with particular machines or apparatus they are classified under the same 4 digit heading as that particular machine or apparatus but not necessarily under the same 8 digit AHECC item.
- (c) When a part is given a specific item number in the AHECC that item should be used even when the part is for a specific machine or apparatus. However, the preceding point (b) applies if the part is in a single consignment of mixed parts of what is essentially a complete machine. For example, timing gears for railway locomotives should be entered specifically as timing gears (AHECC item 8483.40.10) not as parts of locomotives (AHECC item 8607.91.00) unless they come in a single consignment with other parts for assembly of an essentially complete locomotive.

Further assistance

If you require further assistance in classifying goods for export declaration purposes you should contact the Export Section of your nearest Customs House. See page E-19 for telephone and facsimile numbers.

1.4 CHAPTERS 98 AND 99 OF THE AHECC

The content of chapters 1 to 97 of the AHECC is defined in the Harmonized System, but the ABS has included two additional chapters in which goods are not classified on a commodity basis.

Chapter 98 - "Special transactions and commodities not classified according to kind"

This chapter includes:

- donated or bequeathed goods;
- goods re-exported from Australia after being imported for industrial processing;
- goods exported from Australia which are to be re-imported after industrial processing;
- exports of mixed goods (including ship and aircraft stores being loaded on foreign registered ships and aircraft) where four or more commodities in a single consignment are reported, with a value of less than \$5,000 for each commodity (excluding goods in bond subject either to excise or Customs duty). Exports coded to AHECC item 9809.00.01 may include: small value ships' and aircraft stores; small value shipments of mixed goods; shipments of small value commodities associated with the initial installation of large scale projects. If you have any questions or queries about the use of this code, please call the Classifications Manager, telephone (02) 6252 5409. All other exports with values of \$5,000 or greater per commodity (including ships' or aircraft stores in bond and subject to excise or Customs duty) should be recorded under their substantive AHECC items.

Chapter 99 - "Commodities and transactions not included in merchandise trade"

This chapter includes goods that the United Nations defines as being outside the scope of merchandise trade statistics. Goods recorded in this chapter are known as non-merchandise trade and are not included in Australia's international merchandise export statistics.

Non-merchandise trade includes:

- goods exported after being imported on a temporary basis - ships, boats, floating structures, goods for public exhibition and goods originally imported under Section 162 or 162A of the Customs Act, e.g., racing cars and associated equipment for the Australian Grand Prix, NZ race horses for the Melbourne Cup, paintings for art exhibitions;
- goods exported on a temporary basis and intended to be re-imported;
- goods exported for repair, alteration or renovation and subsequent re-importation;
- goods re-exported from Australia after being imported for repair, alteration or renovation;
- passengers' personal effects for which a Customs entry is required; and
- miscellaneous commodities and transactions not included in merchandise trade including:
 - ships' and aircraft stores not subject to excise or Customs duty being loaded on Australian registered ships and aircraft
 - Australian-owned airlines' and shipping companies' parts and equipment for use in servicing their aircraft or ships overseas
 - exports by the Australian government for Australian representatives abroad
 - exports by the Australian government for the administration of Australian territories.

1.5 INSTRUCTIONS FOR COMPLETING AN EXPORT ENTRY

The reporting of export details to the Australian Customs Service may be done electronically, through the EXIT system, or manually by completing the Export Entry forms, B957(4/91) and B957(a)(4/91). Exporters **must** report all export details **prior** to the goods being loaded on board the ship or aircraft transporting them out of Australia.

EXEMPT GOODS

The following classes of goods are exempt from Export entry requirements:

- 1 accompanied or unaccompanied personal or household effects of a passenger or crew member of an outgoing ship or aircraft, in reasonable quantities and not to be used in the course of trading outside Australia;
- 2 goods included in a single consignment of cargo that is consigned through the Post Office at or about the same time by one person to another person, being a consignment the total value of which does not exceed the current threshold (currently \$2,000).
- 3 goods exported by ship or aircraft where the total value of the goods that fall within the same export statistical item of the AHECC, within one consignment, does not exceed \$500. Goods excluded are: dutiable goods where the duty is unpaid, excisable goods where the excise duty has been unpaid, goods on which sales tax is generally payable under the Sales Tax Assessment Act (No.5) 1930 but the sales tax is unpaid, and goods for which a claim for drawback of Customs duty, excise duty or sales tax is intended;
- 4 military goods which are the property of:
 - (a) Australian Defence Forces - any value of military goods which are for use overseas by Australian Defence Forces and which will not be sold or otherwise disposed of outside Australia; and
 - (b) Foreign Defence Forces - any value of military goods which are for use in military exercises approved by the Australian Government and which have not been entered in an import entry;
- 5 bags of mail (Australia Post or Diplomatic);
- 6 goods originating in one Australian port or airport moved on an international vessel or aircraft to another Australian port or airport without the intention to export;
- 7 goods temporarily imported under section 162A or temporarily exported under Australian carnet;
- 8 ship and aircraft spares for use only on an Australian owned vessel or aircraft; and
- 9 containers or pallets that are the property of a person carrying on a business in Australia and which are exported on a temporary basis to be re-imported, whether they are empty or loaded.

AGGREGATION OF LINES

Where all the details of a group of transactions within the consignment, other than quantity, value and gross mass, are identical, the transactions may be aggregated to a single line.

INSTRUCTIONS FOR COMPLETING HEADER SCREEN OR COVER PAGE (FORM B957)

Each of the following instructions relates to a field on the Export Entry. Copies of manual Export Entry forms are included at the end of this Section.

Senders Reference

Enter the reference assigned to the consignment. The reference **must be unique** to the particular consignment and cannot be used for any other consignment. To amend the declaration the reference **must be input exactly** the same as the original.

Type of Exporter

There are three recognised types of exporters. They are:

- (N)on-confirming
- (C)onfirming
- (M)ultiline

Confirming exporters and Multiline shippers must be registered as such with the Australian Customs Service to use those facilities.

Owner/Agent

Input "O" if the organisation lodging the entry is the owner of the goods to be exported.

Input "A" if the organisation lodging the entry is acting as an agent on behalf of the owner.

Excisable/Customable

If the goods are subject to excise or are underbond goods, input a "Y". If "Y" is input, the Excise Establishment Code field must be completed.

Excise Establishment Code

This field should only be input if the goods are excisable or customable.

Input the excise establishment or warehouse code from which the goods are to be removed.

Owner Name

If the organisation lodging the entry is not the owner e.g. an agent, input the owner's name.

Owner Phone

If the organisation lodging the entry is not the owner, enter the owner's phone no.

Consignee Name

The name of the person or organisation who takes final physical possession of the goods.

Consignee City

The city of the person or organisation who takes final physical possession of the goods.

Country of Final Destination

The country of final destination of the goods at the time of shipment. The country codes listed in Section 2.5 should be used.

Do not enter the code for the country where the goods are to be discharged for subsequent shipment to the country of final destination. For example, goods exported to Kuwait via Singapore should appear as "KUWA" not "SING".

Exceptions are:

ship and aircraft stores - enter "SHIP". To be used for stores (including fuel) being loaded on foreign (ie other than Australian) registered ships and aircraft.

destination unknown - enter "UNKN". When details of the country of final destination are subsequently established, submit an amending Export Entry.

Port/Airport of Loading

For shipments by **sea**, this is the Australian port at which the goods are loaded onto the ship transporting them out of Australia. For shipments by **air**, it is the airport at which the goods are loaded onto the aircraft transporting them out of Australia. See Section 2.4 for port of loading codes.

Goods **trans-shipped** within Australia prior to export should be shown as having been loaded at the port or airport where they were loaded onto an international carrier. eg goods trans-shipped from Hobart to Melbourne for subsequent export from Melbourne should be shown as having been loaded in Melbourne, even if the Export Entry is lodged in Hobart.

For exports by **post**, enter the Post Office from which they are despatched.

Port/Airport of Discharge

The foreign port at which the ship/aircraft transporting the goods from Australia will discharge them. This may not necessarily be the final destination of the goods.

If **trans-shipment** is to occur, this will be the first port or airport of discharge. For example, for goods exported to Kuwait **via** Singapore, **the port of discharge** is "SINGAPORE" but the **country of final destination** is "KUWA".

For ships' or aircraft stores show "SHIP" as the port of discharge.

Invoice Currency

The currency used on the invoice. See Section 2.3 of this Manual for the codes that should be used.

Total F.O.B. Value

[NOTE: For a definition of Free-on-Board (F.O.B.), see instructions for **F.O.B. Value** later in this section.]

The sum of the values of all commodities as recorded on this Export Entry. It must be in the same currency as the FOB values entered on the Line Screens or Goods Page. Note that for users of the manual form all values must be in Australian dollars.

Mode of Export

The three methods of export are:

- Ship = S
- Air = A
- Post = P

Where goods are not exported as consigned cargo (e.g. commercial goods carried in hand luggage or ship or aircraft stores), the mode of export should be specified as "P".

Proposed Date of Export

The anticipated date of departure of the ship or aircraft from the port of loading, or the date of postage.

Ship/Aircraft Identify Code (Lloyd's No./Registration No.)

For ship and aircraft stores only. Enter the Lloyd's No. for ships and the Registration No. for aircraft.

Total No. of F.C.L. Containers

For exports by sea only.

If the type of container is FCL, the number must be greater than zero.

If the type of container is other than FCL (i.e. LCL or non containerised), input 0 (zero).

Number of Packages

For sea consignments:

- input 0 (zero) if the consignment is FCL, a bulk shipment or live animals
- input the number of packages in all other instances.

For air consignments:

- input the number of packages.

INSTRUCTIONS FOR COMPLETING LINE SCREENS OR GOODS PAGE (FORM B957(a))

Commodity Classification (AHECC) Code

Input the classification code for the goods as specified in this Manual. For details on the determination of the correct statistical item for a commodity, refer to Sections 1.2 - 1.4.

The AHECC may be input more than once. There is no need to consolidate lines with the same AHECC. Goods with the same AHECC but different export scheme or State of origin codes may be listed on up to 99 lines, where necessary.

Origin Code

This is the Australian State or Territory in which the final stage of production or manufacture occurs. The codes to be used are:

- N - New South Wales
- V - Victoria
- Q - Queensland
- W - Western Australia
- S - South Australia
- T - Tasmania
- C - Australian Capital Territory
- X - Northern Territory
- F - Goods of foreign origin, re-exported.

The following examples should assist in attributing the correct origin code:

- Minerals in ore and concentrate form (eg iron ore and concentrate) should be attributed to the State in which they were mined. Metals (eg iron and steel ingots) should be attributed to the State in which they were processed.
- Operations which leave the goods essentially unchanged (ie repair, blending, packaging, bottling, cleaning, sorting, husking and shelling) should not be considered as stages of production or manufacture.

- Goods which are imported and re-exported in the same condition as they arrive, or after undergoing repair or minor alteration (ie **re-exports**), should be shown as "F" indicating goods of foreign origin.
- Goods assembled from parts previously imported from overseas, where the end product does not resemble the component parts, should be attributed to the State in which the assembly took place.

Goods Description

Input the specific invoice or trade description of the goods. Descriptions used in the AHECC should be used only if identical with invoice or trade descriptions.

Net Quantity

The quantity of the goods in terms of the unit prescribed in the AHECC. (Quantity details are not required if the unit of quantity shown in the AHECC is "NR" - ie not recorded.)

Metallic assays are required for some items in addition to the standard quantity. These items are so indicated in the AHECC.

Where quantity is to be expressed by weight the net weight should be used i.e., any outside packages, inner containers or wrappings or any carrying medium (eg liquid) surrounding the goods should be excluded. However, for goods in solution or emulsion, or similar forms, the quantity should be the total weight of the contents, including the liquid.

Unit of Quantity

The unit for the net quantity as specified in the AHECC.

Gross Weight

The gross weight for goods on this line of the export entry. Shipments of 100,000 kg (100 tonnes) or more may be shown in tonnes.

The gross weight is in effect the shipping weight of the goods. It should include the weight of any immediate packaging but not the weight of standard international containers. It should also include any material added to the goods for transportation purposes, eg water sprayed onto coal to prevent explosions in transit, water added to wood chips to facilitate loading and unloading.

Where the gross weight for each commodity is unavailable, an estimated gross weight should be used. The total of such estimates should equal the actual gross mass of the consignment.

Unit of Gross Weight

Input "KG" if the gross weight is measured in kilograms or "T" if it is measured in tonnes.

Container Type

This is only required where the mode of export is sea (S). The three codes which may be input are:

- F = Full Container Load
- L = Less than a full container load
- N = Non-containerised goods such as bulk cargo.

Coal, Thermal use Indicator

Show either (Y)-Yes or (N)-No if coal, with the AHECC classifications listed below, is for thermal use.

The relevant AHECC classifications are:

2701.11.00
 2701.12.13
 2701.12.14
 2701.12.15
 2701.12.99
 2701.19.00

Assay Details

This field is only required if the AHECC code in this manual indicates the goods require an assay. Input the content of each element as determined by the assay.

Container No.

This field is not mandatory but should be input if the details are known, particularly if the goods require a permit.

Seal No.

The details for this field should be input where possible.

Permit No.

Input the relevant permit issuing agency prefix and permit number with **no spaces** between the two.

e.g. PIM123456

A list of permit issuing agencies and their prefixes are contained in Chapter 8 of the EXIT Procedural Manual.

Permit Encryption

Input the permit encryption, if required, as supplied by the permit issuing agency.

Export Scheme Code

As required, input the code for the relevant export scheme as listed below:

Drawback (DRB)
 Tariff Export Concession (TEXCO)
 Motor Vehicle Plan (MVP)

F.O.B. Value

This is the 'free on board' value of the goods. The FOB point of valuation is the point where goods are placed on board the international carrier at the border of the exporting country. The FOB value should include production and other costs up until placement on the international carrier, but exclude international insurance and transport costs.

Exporters who do not know the value of the goods at the time of shipment and enter an approximate value must subsequently submit an amending entry providing the correct FOB value.

Users of the manual form (B957 and B957a) must express the FOB values in Australian dollars.

For Export Entries being lodged through the EXIT system:

- If the invoice currency is Australian Dollars, US Dollars, Japanese Yen, British Pounds, Deutschmarks, Euro Dollars or New Zealand Dollars, FOB values must be entered in terms of that currency.
- If the invoice currency is not one of the seven listed above, FOB values must be converted and quoted in Australian dollars.

F.O.B. Currency (EXIT System only)

The code for the currency in which the FOB values have been reported. For example if the invoice currency is US dollars, FOB values should be reported in US dollars and FOB currency will be US dollars. However, if the invoice currency is Canadian Dollars, FOB values should be reported in Australian dollars and FOB currency will be Australian dollars.

Declaration (Manual entry only)

This is a declaration by the person responsible for the Export Entry, that the details reported are an accurate representation of the goods exported in this consignment.

Before signing, please ensure that all goods included in the consignment have been reported and that the Export Entry has been completed accurately.

1.6 AVAILABILITY OF EXPORT STATISTICS

Information lodged by exporters and their agents with the ACS is used in compiling and publishing export statistics for use by the Australian Government in forming trade and budgetary policies. In addition, statistical information is sought by governments, exporters and industry associations to monitor trends and identify markets.

The statistics produced by the ABS are available in regular publications, computer printout, computer tapes, floppy disk and via internet email. The statistics cover a wide range of information including:

- total exports by value, quantity and gross weight
- details of exports classified by:
 - AHECC statistical item
 - state of origin and loading
 - port of loading
 - mode of transport
 - overseas port of discharge
 - country of final destination

If you require further information on the availability of these statistics please contact the Australian Bureau of Statistics (see Section 1.10).

1.7 SPECIAL CODES USED IN EXPORT STATISTICS

The following codes are used in published export statistics. **THESE CODES ARE NOT TO BE USED WHEN COMPLETING CUSTOMS DOCUMENTATION.**

AHECC Statistical Items

2699.99.99 Aggregate of "Broad Commodity Details" confidential items of trade for Chapter 26

9888.88.88 Miscellaneous items of trade, nes

9999.99.99 Combined confidential items of trade (excluding "Broad Commodity Details" confidential items of trade for Chapter 26)

State Code

NSD - No State Details

Country Codes

CONF - Country Confidential

NCD - No Country Details

UNID - Unidentified

Any queries regarding these codes should be directed to the Client Services Section, ABS, or the Classifications Manager, International Trade Section, ABS (see Section 1.10).

1.8 CONFIDENTIALITY OF EXPORT STATISTICS

Exports information supplied to the ABS by the ACS is only disclosed as statistical aggregates. However, the aggregates for trade in some commodities may relate to a single person or organisation. The ABS operates under legislation that allows it to release international trade statistics that could relate to a single person or organisation except where that person or organisation has shown that such release would be likely to enable their identification.

If you are concerned about the possible disclosure of confidential information please contact the ABS (see Section 1.10 for address details) and your concerns will be investigated. If appropriate, restrictions will then be placed upon the release of the statistics.

An information paper (5487.0) is available on request from the Confidentiality Manager (see Section 1.10).

1.9 REQUESTS FOR CHANGES TO THE AHECC STATISTICAL ITEMS

From time to time, exporters and users of statistics ask the ABS to change statistical codes in the AHECC. Changes are generally sought to increase the amount of detail available about exports of certain commodities.

The ABS has a process in place for checking the viability of proposed changes. This process involves negotiation with the requesting party, to ensure that draft changes are well presented structurally and literally. Draft changes are then vetted with industry associations and other stakeholders. The purpose of the vetting is to ensure that proposed structures can be interpreted, and will record worthwhile amounts of trade.

Once the changes have been endorsed - possibly with amendment - they are applied to the AHECC.

The ABS is no longer able to absorb the costs associated with AHECC changes. These must be met at the time changes are requested, and by the requesting parties. Fees paid to the ABS do not necessarily guarantee a positive outcome for proposals.

Changes are made to the AHECC on 1 January and 1 July of each year. Deadlines for proposals are 1 October and 1 March respectively. The ABS reserves the right at these times, to withdraw statistical code splits which have proved unworkable.

Finally, the ABS has no control over structures at the broader (eg 6-digit) level. It is unable, for instance, to merge adjacent 6-digit codes and re-divide them. Furthermore, the broader levels are also subject to change at the international level. The next broad level changes are expected to occur in 2002.

NOTES

1. "Milk" means full cream milk or partially or completely skimmed milk.
2. For the purposes of 0405:
 - (a) "Butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80% or more but not more than 95% by weight, a maximum milk solids-not-fat content of 2% by weight and a maximum water content of 16% by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colours, neutralising salts and cultures of harmless lactic-acid-producing bacteria.
 - (b) "Dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39% or more but less than 80% by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in 0406 provided that they have the three following characteristics:
 - (a) A milkfat content, by weight of the dry matter, of 5% or more;
 - (b) A dry matter content, by weight, of at least 70% but not exceeding 85%; and
 - (c) They are moulded or capable of being moulded.
4. This Chapter does not cover:
 - (a) Products obtained from whey, containing by weight more than 95% lactose, expressed as anhydrous lactose calculated on the dry matter (1702); or
 - (b) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80% whey proteins, calculated on the dry matter) (3502) or globulins (3504.00).

SUBHEADING NOTES

1. For the purposes of 0404.10, "modified whey" means products consisting of whey constituents, i.e., whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of 0405.10, "butter" does not include dehydrated butter or ghee (0405.90)

AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION

SECTION 04 - PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED
TOBACCO SUBSTITUTES

NOTE

1. In this Section "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3% by weight.

SECTION 04 - PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED
TOBACCO SUBSTITUTES - CONTINUED
CHAPTER 16 - PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC
INVERTEBRATES

- 1601 Sausages and similar products, of meat, meat offal or blood; food preparations based on these products
- 1602 Other prepared or preserved meat, meat offal or blood
- 1603 Extracts and juices of meat, fish or crustaceans, molluscs or other aquatic invertebrates
- 1604 Prepared or preserved fish; caviar and caviar substitutes prepared from fish eggs
- 1605 Crustaceans, molluscs and other aquatic invertebrates, prepared or preserved
-

NOTES

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs and other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or 0504.00.
2. Food preparations fall in this Chapter provided that they contain more than 20% by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of 1902 or to the preparations of 2103 or 2104.

SUBHEADING NOTES

1. For the purposes of 1602.10, "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as infant foods or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of 1602.
2. The fish and crustaceans specified in 1604 or 1605 under their common names only, are of the same species as those mentioned in Chapter 03 under the same name.

CHAPTER 25 - SALT; SULPHUR; EARTHS AND STONE; PLASTERING MATERIALS, LIME AND CEMENT

NOTES

1. Except where their context or Note 4 to this Chapter otherwise requires, the headings of this Chapter cover only products which are in the crude state or which have been washed (even with chemical substances eliminating the impurities without changing the structure of the product), crushed, ground, powdered, levigated, sifted, screened, concentrated by flotation, magnetic separation or other mechanical or physical processes (except crystallisation), but not products which have been roasted, calcined, obtained by mixing or subjected to processing beyond that mentioned in each heading. The products of this Chapter may contain an added anti-dusting agent, provided that such addition does not render the product particularly suitable for specific use rather than for general use.
2. This Chapter does not cover:
 - (a) Sublimed sulphur, precipitated sulphur or colloidal sulphur (2802);
 - (b) Earth colours containing 70% or more by weight of combined iron evaluated as Fe₂O₃ (2821);
 - (c) Medicaments or other products of Chapter 30;
 - (d) Perfumery, cosmetic or toilet preparations (Chapter 33);
 - (e) Setts, curbstones or flagstones (6801); mosaic cubes or the like (6802); roofing, facing or damp course slates (6803);

- 3. For the purposes of 2707.10, 2707.20, 2707.30, 2707.40 and 2707.60, "benzole", "toluole", "xylole", "naphthalene" and "phenols" apply to products which contain more than 50% by weight of benzene, toluene, xylene, naphthalene or phenols, respectively.

ADDITIONAL NOTES

- 1. For the purposes of 2710.00, the physical characteristics of fuel oil are:
 - (a) a density equal to or greater than 920.0 kg/m³ at 15 degrees C as determined by either ASTM D1298 or ASTM D4052; and
 - (b) a carbon residue, on the whole sample, of at least 2.0% mass as determined by ASTM D189 (Conradson Carbon Residue) or by ASTM D4530 (Carbon Residue-Micro Method); and

SECTION 06 - PRODUCTS OF THE CHEMICAL OR ALLIED INDUSTRIES - CONTINUED
CHAPTER 29 - ORGANIC CHEMICALS

NOTES

1. Except where the context otherwise requires, the headings of this Chapter apply only to:
 - (a) Separate chemically defined organic compounds, whether or not containing impurities;
 - (b) Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
 - (c) The products of 2936 to 2939 or the sugar ethers and sugar esters, and their salts, of 2940, or the products of 2941, whether or not chemically defined;
 - (d) The products mentioned in (a), (b) or (c) above dissolved in water;
 - (e) The products mentioned in (a), (b) or (c) above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - (f) The products mentioned in (a), (b), (c), (d) or (e) above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
 - (g) The products mentioned in (a), (b), (c), (d), (e) or (f) above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
 - (h) The following products, diluted to standard strengths, for the production of azo dyes: diazonium salts, couplers used for these salts and diazotisable amines and their salts.

2. This Chapter does not cover:
 - (a) Goods of 1504 or crude glycerol of 1520.00.01;

3. Goods which could be included in two or more of the headings of this Chapter are to be classified in that one of those headings which occurs last in numerical order.

4. In 2904 to 2906, 2908 to 2911.00 and 2913.00 to 2920, any reference to halogenated, sulphonated, nitrated or nitrosated derivatives includes a reference to compound derivatives, such as sulphohalogenated, nitrohalogenated, nitrosulphonated or nitrosulphohalogenated derivatives.
 Nitro or nitroso groups are not to be taken as "nitrogen-functions" for the purposes of 2929.
 For the purposes of 2911.00, 2912, 2914, 2918 and 2922, "oxygen-functions" is to be restricted to the functions (the characteristic organic oxygen-containing groups) referred to in 2905 to 2920.

- (e) Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
6. The compounds of 2930 and 2931 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic, mercury or lead) directly linked to carbon atoms. 2930 (organo-sulphur compounds) and 2931 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of sulphonated or halogenated derivatives (or compound derivatives).
7. 2932, 2933 and 2934 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids or imides of polybasic acids. These provisions apply only when the ring-position hetero-atoms are those resulting solely from the cyclising function or functions here listed.

SUBHEADING NOTE

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.

ADDITIONAL NOTE

1. In 2920, "esters of inorganic acids" is to be taken to include carbonic and peroxocarbonic esters.

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section 06 or 07, are to be classified in the heading appropriate to that product, provided that the constituents are:
 - (a) having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - (b) presented together; and
 - (c) identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of 3918 or 3919, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

ADDITIONAL NOTE

1. For the purposes of 3926.20 and 4015.90, "anti-radiation suits, anti-contamination suits, and similar protective garments" means full body, vapour barrier suits for protection against toxic gases, chemicals or thermal hazards.

NOTES

1. Throughout this Classification "plastics" means those materials of 3901 to 3914.00 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.

Throughout this Classification any reference to "plastics" also includes vulcanised fibre. "Plastics", however, does not apply to materials regarded as textile materials of Section 11.

2. This Chapter does not cover:

(a) Waxes of 2712 or 3404;

3. 3901 to 3911 apply only to goods of a kind produced by chemical synthesis, falling in the following categories:
- (a) Liquid synthetic polyolefins of which less than 60% by volume distils at 300 degrees C, after conversion to 101.3 kPa when a reduced-pressure distillation method is used (3901 and 3902);
- (b) Resins not highly polymerised, of the coumarone-indene type (3911);
- (c) Other synthetic polymers with an average of at least 5 monomer units;
- (d) Silicones (3910.00);
- (e) Resols (3909) and other prepolymers.
4. "Copolymers" covers all polymers in which no single monomer unit contributes 95% or more by weight to the total polymer content.
- For the purposes of this Chapter, except where the context otherwise requires, copolymers (including co-polycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note, constituent comonomer units of polymers falling in the same heading shall be taken together.
- If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in the numerical order among those which equally merit consideration.
5. Chemically modified polymers, that is those in which only appendages to the main polymer chain have been changed by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. In 3901 to 3914, "primary forms" applies only to the following forms:
- (a) Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
- (b) Blocks of irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.

SECTION 07 - PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF - CONTINUED
CHAPTER 39 - PLASTICS AND ARTICLES THEREOF - CONTINUED-----
NOTES - CONTINUED

7. 3915 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (3901 to 3914.00).
8. For the purposes of 3917, "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). "Tubes, pipes and hoses" also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
9. For the purposes of 3918, "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
10. In 3920 and 3921, "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. 3925 applies only to the following articles, not being products covered by any of the earlier headings of Sub-Chapter 2:
- (a) Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 L;

 - (ij) Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

SUBHEADING NOTE

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions:
- (a) Where there is a subheading named "Other" in the same series:
 - (1) The designation in a subheading of a polymer by the prefix "poly" (e.g., polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95% or more by weight of the total polymer content.
 - (2) The copolymers named in 3901.30, 3903.20, 3903.30 and 3904.30 are to be classified in those sub-headings, provided that the comonomer units of the named copolymers contribute 95% or more by weight of the total polymer content.
 - (3) Chemically modified polymers are to be classified in the subheading named "Other", provided that the chemically modified polymers are not more specifically covered by another subheading.
 - (4) Polymers not meeting (1), (2) or (3) above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.
 - (b) Where there is no subheading named "Other" in the same series:
 - (1) Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series under consideration are to be compared.
 - (2) Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer.
- Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.

ADDITIONAL NOTES

1. In this Chapter, addition products of polyols with isocyanates, whether or not containing unreacted hydroxyl or isocyanate groups, are to be classified within subheading 3909.50.
2. In 3909.50, "polyols" means polyhydroxy compounds containing 2 or more hydroxyl groups per molecule.

NOTES

1. Except where the context otherwise requires, throughout this Classification "rubber" means the following products, whether or not vulcanised or hard: natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This Chapter does not cover:
- (a) Goods of Section 11 (textiles and textile articles);
 - (b) Footwear or parts thereof of Chapter 64;
 - (c) Headgear or parts thereof (including bathing caps) of Chapter 65;
 - (d) Mechanical or electrical appliances or parts thereof of Section 16 (including electrical goods of all kinds), of hard rubber;
 - (e) Articles of Chapter 90, 92, 94 or 96; or
 - (f) Articles of Chapter 95 (other than sports gloves and articles of 4011 to 4013).
3. In 4001 to 4003.00 and 4005, "primary forms" applies only to the following forms:
- (a) Liquids and pastes (including latex, whether or not prevulcanised, and other dispersions and solutions);
 - (b) Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In Note 1 to this Chapter and in 4002, "synthetic rubber" applies to:
- (a) Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18 degrees C and 29 degrees C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added: the presence of substances as provided for by Note 5 (b) (ii) and (iii) is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted;
 - (b) Thioplasts (TM); and
-

SECTION 07 - PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF - CONTINUED
CHAPTER 40 - RUBBER AND ARTICLES THEREOF - CONTINUED-----
NOTES - CONTINUED

- (c) Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in (a) above.
5. (a) 4001 and 4002 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with:
- (i) vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);
 - (ii) pigments or other colouring matter, other than those added solely for the purpose of identification;
 - (iii) plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under (b);
- (b) The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in 4001 or 4002 as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material:
- (i) emulsifiers or anti-tack agents;
 - (ii) small amounts of breakdown products of emulsifiers;
 - (iii) very small amounts of the following: heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-active agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
6. For the purposes of 4004.00 "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly or vulcanised rubber, of which any cross-sectional dimension exceeds 5mm, is to be classified as strip, rods or profile shapes, of 4008.
8. 4010 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In 4001, 4002, 4003.00, 4005 and 4008 "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.
- In 4008 "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

- (B) For the purposes of the above rule:
- (a) Gimped horsehair yarn (5110) and metallised yarn (5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

- Single yarn of nylon or other polyamides, or of polyesters.....60 cN/tex
 Multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters.....53 cN/tex

SUBHEADING NOTES

1. In this Section and, where applicable, throughout this Classification the following have the meanings hereby assigned to them:
- (a) Elastomeric yarn
- Filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.
- (b) Unbleached yarn
- Yarn which:
- (i) has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or
- (ii) is of indeterminate colour ("grey yarn"), manufactured from garnetted stock.
- Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibres, treated in the mass with delustrating agents (for example, titanium dioxide).
- (c) Bleached yarn
- Yarn which:
- (i) has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
- (ii) consists of a mixture of unbleached and bleached fibres; or
- (iii) is multiple (folded) or cabled and consists of unbleached and bleached yarns.
- (d) Coloured (dyed or printed) yarn
- Yarn which:
- (i) is dyed (whether or not in the mass) other than white or in a fugitive colour or printed, or made from dyed or printed fibres;

SUBHEADING NOTES - CONTINUED

(e) Unbleached woven fabric

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

(f) Bleached woven fabric

Woven fabric which:

- (i) has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
- (ii) consists of bleached yarn; or
- (iii) consists of unbleached and bleached yarn.

(g) Dyed woven fabric

Woven fabric which:

- (i) is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white (unless the context otherwise requires), in the piece; or
- (ii) consists of coloured yarn of a single uniform colour.

(h) Woven fabric of yarns of different colours

Woven fabric (other than printed woven fabric) which:

- (i) consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);
- (ii) consists of unbleached or bleached yarn and coloured yarn; or
- (iii) consists of marl or mixture yarns.

(In all cases, the yarn used in selvages and piece ends is not taken into consideration).

(ij) Printed woven fabric

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerisation does not affect the classification of yarns or fabrics within the above categories.

(k) Plain weave

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. (A) Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 consisting of the same textile materials.

(B) For the application of this rule:

- (a) where appropriate, only the part which determines the classification under Interpretation Rule 3 shall be taken into account;
- (b) in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
- (c) in the case of embroidery of 5810 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

ADDITIONAL NOTES

1. For the purposes of this Section, fabric shall be taken to be printed if, and only if, the fabric:

- (a) has been printed in a manner that produces over the whole of the fabric a designed or patterned effect employing contrasts in colours;
- (b) complies with the following fastness standards determined by the test methods published by the Standards Association of Australia:
 - (i) AS 2001.4.15 Test A with a minimum standard for change of shade of 3-4; and
 - (ii) AS 2001.4.21 using MBTF lamp with a minimum standard of 3-4;

and

- (c) has a colour contrast of not less than that shown by Grade 2 on the Standard Textile Grey Scale for assessing change in colour when viewed at a distance of 2 m in accordance with the viewing conditions as set out in Standards Association of Australia Standard AS 2001.4.1.

2. Notwithstanding Note 1, fabrics shall not be taken to be printed by reason only of:

- (a) the printing of labels or the printing with words, letters, figures or designs suitable for cutting up into labels;

SECTION 11 - TEXTILES AND TEXTILE ARTICLES - CONTINUED

ADDITIONAL NOTES - CONTINUED

- (b) the printing with markings of any kind that are for identification or distinguishing purposes only;
 - (c) the printing with markings of any kind solely or principally at or near one or both selvages;
 - (d) the printing with markings of any kind, which, excluding unprinted areas within such markings, do not exceed 10% of the total area of the fabric;
 - (e) the printing in an uninterrupted single colour in a manner so that such printing exceeds 70% of the total area of the fabric; or
 - (f) the printing solely in white or a shade of white so that it closely resembles the natural colour of the fabric in its grey state.
3. For the purposes of 6113.00, 6210.40 and 6210.50, "anti-radiation suits, anti-contamination suits, and similar protective garments" means full body, vapour barrier suits for protection against toxic gases, chemicals or thermal hazards.

NOTES

1. Throughout this Classification, "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either:
- (a) By polymerisation of organic monomers, such as polyamides, polyesters, polyurethanes or polyvinyl derivatives; or
 - (b) By chemical transformation of natural organic polymers (for example, cellulose, casein, proteins or algae), such as viscose rayon, cellulose acetate, cupro or alginates.
- "Synthetic" and "artificial", used in relation to fibres, mean: synthetic: fibres as defined at (a); artificial: fibres as defined at (b).
- "Man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".
2. 5402 and 5403 do not apply to synthetic or artificial filament tow of Chapter 55.

NOTES

1. Except where the context otherwise requires, for the purpose of this Chapter "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and 5803 and 5806, the braids and ornamental trimmings in the piece of 5808 and the knitted or crocheted fabrics of 6002.
2. 5903 applies to:
- (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square metre and whatever the nature of the plastic material (compact or cellular), other than:
- (1) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of colour;
- (2) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15 Degrees C and 30 Degrees C (usually Chapter 39);
- (3) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
- (4) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually Chapters 50 to 55, 58 or 60);
- (5) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 39); or
- (6) Textile products of 5811;
- (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of 5604.
3. For the purposes of 5905, "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).
- This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (4814) or on a textile backing (generally 5907).
4. For the purpose of 5906, "rubberised textile fabrics" means:
- (a) Textile fabrics impregnated, coated, covered or laminated with rubber,
- (i) Weighing not more than 1,500 g/square metre; or
- (ii) Weighing more than 1,500 g/square metre containing more than 50% by weight of textile material;
- (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of 5604;
- (c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square metre.

This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (Chapter 40), or textile products of 5811.

NOTES

1. This Chapter applies only to made up knitted or crocheted articles.
2. This Chapter does not cover:
 - (a) Goods of 6212;
 - (b) Worn clothing or other worn articles of 6309; or
 - (c) Orthopaedic appliances, surgical belts, trusses or the like (9021).
3. For the purposes of 6103 and 6104:
 - (a) "Suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in the same fabric and comprising:
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

"Suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

 - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
 - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

SECTION 11 - TEXTILES AND TEXTILE ARTICLES - CONTINUED

CHAPTER 61 - ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED - CONTINUED

NOTES - CONTINUED

- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

(b) "Ensemble" means a set of garments (other than suits and articles of 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

- one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. "Ensemble" does not apply to track suits or ski suits, of 6112.

4. 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10cm X 10cm. 6105 does not cover sleeveless garments.

5. 6109 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garments.

6. For the purposes of 6111:

(a) "Babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86cm; it also covers babies' napkins;

(b) Articles which are, prima facie, classifiable both in 6111 and in other headings of this Chapter are to be classified in 6111.

7. For the purposes of 6112 "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

(a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

(b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

- one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

- one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

8. Garments which are, prima facie, classifiable both in 6113 and in other headings of this Chapter, excluding 6111, are to be classified in 6113.

9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

ADDITIONAL NOTE

1. For the purpose of this Chapter:

(a) goods shall, subject to sub-note (b), be deemed to be elastic or of elastic fibres if they consist of textile materials or textile fibres combined with rubber threads; and

(b) goods shall not be deemed to be elastic by reason only for their containing rubber thread or elastic forming simply a supporting band.

NOTES

1. This Chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of 6212).
2. This Chapter does not cover:
 - (a) Worn clothing or other worn articles of 6309;
 - (b) Orthopaedic appliances, surgical belts, trusses or the like (9021).
3. For the purposes of 6203 and 6204:
 - (a) "Suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers) the constituent lower part shall be one pair of trousers or, in the case of women's or girl's suite, the skirt or divided skirt, the other garments being considered separately.

"Suit" includes the following sets of garments, whether or not they fulfil all the above conditions:

 - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
 - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
 - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

SECTION 11 - TEXTILE AND TEXTILE ARTICLES - CONTINUED

CHAPTER 62 - ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED - CONTINUED

NOTES - CONTINUED

- (b) "Ensemble" means a set of garments (other than suits and articles of 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:
- one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.
- All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. "Ensembles" does not apply to track suits or ski suits, of 6211.

4. For the purposes of 6209:

- (a) "Babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86cm; it also covers babies' napkins;
- (b) Articles which are, prima facie, classifiable both in 6209 and in other headings of this Chapter are to be classified in 6209.

5. Garments which are, prima facie, classifiable both in 6210 and in other headings of this Chapter, excluding 6209, are to be classified in 6210.

6. For the purposes of 6211, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

- (a) a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
- (b) a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:
- one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60cm, are to be classified as handkerchiefs (6213). Handkerchiefs of which any side exceeds 60cm are to be classified in 6214.

8. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings coverings women's or girls' garments.

9. Articles of this Chapter may be made of metal thread.

ADDITIONAL NOTE

1. (a) In 6212, "brassieres, girdles, corsets, braces, suspenders, garters and similar articles" include undergarments, being pants, made of elastomeric fabric:
- the base fabric of which contains 20% or more of elastomeric fibres; and
 - the length of each side of which is 18 cm or more (excluding any added trimmings),
- but does not include other pants made of elastomeric fabric.
- (b) For the purpose of sub-note (a):
- crimped yarn shall not be taken to be an elastomeric fibre; and
 - stretch nylon shall not be taken to be an elastomeric fabric.

SECTION 13 - ARTICLES OF STONE, PLASTER, CEMENT, ASBESTOS, MICA OR SIMILAR MATERIALS;
CERAMIC PRODUCTS; GLASS AND GLASSWARE - CONTINUED
CHAPTER 70 - GLASS AND GLASSWARE

NOTES - CONTINUED

- (c) "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency, or which prevents light from being reflected on the surface of the glass.
3. The products referred to in 7006.00 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of 7019, "glass wool" means:
- (a) Mineral wools with a silica (SiO₂) content not less than 60% by weight;
 - (b) Mineral wools with a silica (SiO₂) content less than 60% but with an alkaline oxide (K₂O or Na₂O) content exceeding 5% by weight or a boric oxide (B₂O₃) content exceeding 2% by weight.
- Mineral wools which do not comply with the above specifications fall in 6806.
5. Throughout this Classification, "glass" includes fused quartz and other fused silica.

SUBHEADING NOTE

1. For the purposes of 7013.21, 7013.31 and 7013.91, "lead crystal" means only glass having a minimum lead monoxide (PbO) content by weight of 24%.

For the purposes of this Chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2%, by weight, of the alloy. Alloys of precious metal are to be classified according to the following:
- (a) An alloy containing 2% or more, by weight, of platinum is to be treated as an alloy of platinum;
 - (b) An alloy containing 2% or more, by weight, of gold but no platinum, or less than 2%, by weight, of platinum, is to be treated as an alloy of gold;

7. Throughout this Classification "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, "metal clad with precious metal" also covers base metal inlaid with precious metal.

SUBHEADING NOTES

1. For the purposes of 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, "powder" and "in powder form" mean products of which 90% or more by weight passes through a sieve having a mesh aperture of 0.5 mm.
2. Notwithstanding the provisions of Chapter Note 4 (b), for the purposes of 7110.11 and 7110.19, "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.
3. For the classification of alloys in the subheadings of 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium which predominates by weight over each other of these metals.

2. Throughout this Classification, "parts of general use" means:

- (a) Articles 7307, 7312, 7315, 7317 or 7318 and similar articles of other base metal;
- (b) Springs and leaves for springs, of base metal, other than clock or watch springs (9114); and
- (c) Articles of 8301, 8302, 8308, 8310 and frames and mirrors, of base metal, 8306.

In Chapters 73 to 76 and 78 to 82 (but not in 7315) references to parts of goods do not include references to parts of general use as defined above.

Subject to the preceding paragraph and to Note 1 to Chapter 83, the articles of Chapter 82 or 83 are excluded from Chapters 72 to 76 and 78 to 81.

3. Throughout this Classification, "base metals" means: iron and steel, copper, nickel, aluminium, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

5. Classification of alloys (other than ferro-alloys and master alloys as defined in Chapters 72 and 74):

- (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals;
- (b) An alloy composed of base metals of this Section and of elements not falling within this Section is to be treated as an alloy of base metals of this Section if the total weight of such metals equals or exceeds the total weight of the other elements present;
- (c) In this Section "alloys" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in this Classification to a base metal includes a reference to alloys which, by virtue of Note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the Interpretative Rules) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose:

- (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;
- (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of Note 5, it is classified; and
- (c) A cermet of 8113 is regarded as a single base metal.

SECTION 15 - BASE METALS AND ARTICLES OF BASE METAL - CONTINUED
CHAPTER 72 - IRON AND STEEL - CONTINUED-----
NOTES - CONTINUED

(g) Remelting scrap ingots of iron or steel

Products roughly cast in the form of ingots without feeder-heads or hot tops, or of pigs, having obvious surface faults and not complying with the chemical composition of pig iron, spiegeleisen or ferro-alloys.

(h) Granules

Products of which less than 90% by weight passes through a sieve with a mesh aperture of 1 mm and of which 90% or more by weight passes through a sieve with a mesh aperture of 5mm.

(ij) Semi-finished products

Continuous cast products of solid section, whether or not subjected to primary hot-rolling; and

Other products of solid section, which have not been further worked than subjected to primary hot-rolling or roughly shaped by orging, including blanks for angles, shapes or sections.

These products are not presented in coils.

(k) Flat-rolled products

Rolled products of solid rectangular (other than square) cross-section, which do not conform to the definition at (ij) above in the form of:

- coils of successively superimposed layers, or

- straight lengths, which if of a thickness less than 4.75mm are of a width measuring at least ten times the thickness or if of a thickness of 4.75 mm or more are of a width which exceeds 150 mm and measures at least twice the thickness.

Flat-rolled products include those with patterns in relief derived directly from rolling (for example, grooves, ribs, chequers, tears, buttons, lozenges) and those which have been perforated, corrugated or polished, provided that they do not thereby assume the character of articles or products of other headings.

Flat-rolled products of a shape other than rectangular or square, of any size, are to be classified as products of a width of 600 mm or more, provided that they do not assume the character of articles or products of other headings.

(l) Bars and rods, hot-rolled, in irregularly wound coils

Hot-rolled products in irregularly wound coils, which have a solid cross-section in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods).

(m) Other bars and rods

Products which do not conform to any of the definitions at (ij), (k) or (l) above or to the definition of wire, which have a uniform solid cross-section along their whole length in the shape of circles, segments of circles, ovals, rectangles (including squares), triangles or other convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). These products may:

- have indentations, ribs, grooves or other deformations produced during the rolling process (reinforcing bars and rods);

- be twisted after rolling.

(n) Angles, shapes and sections

Products having a uniform solid cross-section along their whole length which do not conform to any of the definitions at (ij), (k), (l) or (m) above or to the definition of wire.

Chapter 72 does not include products of 7301 or 7302.

(o) Wire

Cold-formed products in coils, of any uniform solid cross-section along their whole length, which do not conform to the definition of flat-rolled products.

(p) Hollow drill bars and rods

Hollow bars and rods of any cross-section, suitable for drills, of which the greatest external dimension of the cross-section exceeds 15 mm but does not exceed 52mm, and of which the greatest internal dimension does not exceed one half of the greatest external dimension. Hollow bars and rods of iron or steel not conforming to this definition are to be classified in 7304.

2. Ferrous metals clad with another ferrous metal are to be classified as products of the ferrous metal predominating by weight.

3. Iron or steel products obtained by electrolytic deposition, by pressure casting or by sintering are to be classified, according to their form, their composition and their appearance, in the heading of this Chapter appropriate to similar hot-rolled products.

- more than 0.2% of chromium
- more than 0.3% of copper
- more than 0.3% of nickel
- more than 0.1% of any of the following elements: aluminium, molybdenum, titanium, tungsten (wolfram), vanadium.

(b) Non-alloy free-cutting steel

Non-alloy steel containing, by weight, one or more of the following elements in the specified proportions:

- 0.08% or more of sulphur

(c) Silicon-electrical steel

Alloy steels containing by weight at least 0.6% but not more than 6% of silicon and not more than 0.08% of carbon. They may also contain by weight not more than 1% of aluminium but no other element in a proportion that would give the steel the characteristics of another alloy steel.

(d) High speed steel

Alloy steels containing, with or without other elements, at least two of the three elements molybdenum, tungsten and vanadium with a combined content by weight of 7% or more, 0.6% or more of carbon and 3 to 6% of chromium.

(e) Silico-manganese steel

Alloy steels containing by weight:

- not more than 0.7% of carbon,
- 0.5% or more but not more than 1.9% of manganese, and
- 0.6% or more but not more than 2.3% of silicon, but no other element in a proportion that would give the steel the characteristics of another alloy steel.

2. For the classification of ferro-alloys in the subheadings of 7202 the following should be observed:

A ferro-alloy is considered as binary and classified under the subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1 (c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

For the application of this rule the unspecified "other elements" in Chapter Note 1 (c) must each exceed 10% by weight.

ADDITIONAL NOTE

1. Throughout this Classification "high alloy steel" means alloy steels containing by weight one or more of the following elements in the proportion shown:

- 2% or more of manganese
- 2% or more of silicon
- 0.5% or more of nickel
- 1% or more of chromium
- 0.1% or more of molybdenum
- 0.1% or more of vanadium
- 0.3% or more of tungsten
- 0.3% or more of cobalt
- 0.8% or more of copper
- 0.1% or more of any other alloy element not being lead, phosphorus, sulphur, aluminium or carbon.

NOTE

1. In this Chapter the following have the meanings hereby assigned to them:

(a) Refined copper

Metal containing at least 99.85% by weight of copper; or

Metal containing at least 97.5% by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content % by weight	
Ag	Silver	0.25
As	Arsenic	0.5
Cd	Cadmium	1.3
Cr	Chromium	1.4
Mg	Magnesium	0.8
Pb	Lead	1.5
S	Sulphur	0.7
Sn	Tin	0.8
Te	Tellurium	0.8
Zn	Zinc	1
Zr	Zirconium	0.3
Other elements(1), each		0.3

(1) Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) the total content by weight of such other elements exceeds 2.5%.

AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION

SECTION 15 - BASE METALS AND ARTICLES OF BASE METAL - CONTINUED
CHAPTER 74 - COPPER AND ARTICLES THEREOF - CONTINUED

NOTE - CONTINUED

(c) Master alloys

Alloys containing with other elements more than 10% by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15% by weight of phosphorus falls in 2848.00.

(d) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. "Bars and rods" also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of 7403.

(e) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. "Profiles" also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

In the case of 7414, however, "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6mm.

(g) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of 7403), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width;
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

7409 and 7410 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTE

1. In this Chapter the following have the meanings hereby assigned to them:

(a) Copper-zinc base alloys (brasses)

Alloys of copper and zinc, with or without other elements. When other elements are present:

- zinc predominates by weight over each of such other elements;
- any nickel content by weight is less than 5% (see copper-nickel-zinc alloys (nickel silvers)); and
- any tin content by weight is less than 3% (see copper-tin alloys (bronzes)).

AUSTRALIAN HARMONIZED EXPORT COMMODITY CLASSIFICATION

SECTION 15 - BASE METALS AND ARTICLES OF BASE METAL - CONTINUED
CHAPTER 74 - COPPER AND ARTICLES THEREOF - CONTINUED

SUBHEADING NOTE - CONTINUED

(b) Copper-tin base alloys (bronzes)

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3% or more the zinc content by weight may exceed that of tin but must be less than 10%.

(c) Copper-nickel-zinc base alloys (nickel silvers)

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5% or more by weight (see copper-zinc alloys (brasses)).

(d) Copper-nickel base alloys

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1% of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

NOTE

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. "Bars and rods" also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. "Profiles" also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of 7502), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

7506 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

SUBHEADING NOTES

1. In this Chapter the following expressions have the meanings hereby assigned to them:

(ii) the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or

(iii) the total content by weight of elements other than nickel plus cobalt exceeds 1%.

2. Notwithstanding the provisions of Chapter Note 1(c), for the purposes of 7508.10 "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6mm.

"Profiles" also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of 7801), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

7804 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

 - (p) Articles of Chapter 95.
2. Subject to Note 1 to this Section, Note 1 to Chapter 84 and to Note 1 to Chapter 85, parts of machines (not being parts of the articles of 8484, 8544, 8545, 8546 or 8547) are to be classified according to the following rules:
 - (a) Parts which are goods included in any of the headings of Chapters 84 or 85 (other than 8409, 8431, 8448, 8466, 8473, 8485, 8503.00, 8522, 8529, 8538 and 8548) are in all cases to be classified in their respective headings;
 - (b) Other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of 8479 or 8543) are to be classified with the machines of that kind or in 8409, 8431, 8448, 8466, 8473, 8503.00, 8522, 8529 and 8538 as appropriate.  - (c) All other parts are to be classified in 8409, 8431, 8448, 8466, 8473, 8503.00, 8522, 8529, or 8538 as appropriate or, failing that, in 8485 or 8548.
3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines adapted for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.
4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in Chapter 84 or Chapter 85, then the whole falls to be classified in the heading appropriate to that function.
5. For the purposes of these Notes, "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of Chapter 84 or 85.

ADDITIONAL NOTES

1. In this Section, "computer control" means a controlling unit that incorporates at least one electronic microcircuit that is part of the microcircuitry of the controlling unit, being microcircuitry that enables the unit:
 - (a) to store and process, or manipulate, data;
 - (b) when programmed, to automatically control the operation of the appliance, machine or apparatus independently of human control;
 - (c) to wholly or substantially control the operation and movement of the appliance, machine or apparatus by the use of a numeric-servo closed loop; and
 - (d) to be re-programmable in respect of the unit's control of the appliance, machine or apparatus.

(b) Other machines provided the weight of such machines does not exceed 20 kg.

The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not with filters (8414), centrifugal clothes-dryers (8421), dish washing machines (8422), household washing machines (8450), roller or other ironing machines (8420 or 8451), sewing machines (8452), electric scissors (8508) or to electro-thermic appliances (8516).

4. For the purposes of 8534.00, "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or inter-connected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

"Printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in 8542.

5. For the purposes of 8541 and 8542:

(A) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

(B) "Electronic integrated circuits and microassemblies" are:

(a) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, interconnections, etc.) are created in the mass (essentially) and on the surface of a semiconductor material (doped silicon, for example) and are inseparably associated;

(b) Hybrid integrated circuits in which passive elements (resistors, capacitors, interconnections, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

(c) Microassemblies of the moulded module, micromodule or similar types, consisting of discrete, active or both active and passive, components which are combined and interconnected.

For the classification of the articles defined in this Note, 8541 and 8542 shall take precedence over any other heading in this Classification which might cover them by reference to, in particular, their function.

6. Records, tapes and other media of 8523 or 8524 remain classified in those headings, whether or not they are presented with the apparatus for which they are intended.
7. For the purposes of 8548, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

SUBHEADING NOTE

1. 8519.92 and 8527.12 cover only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

ADDITIONAL NOTES

1. In this Chapter "kVA" means kilovoltampere.
2. For the purposes of 8539:
- (a) "lamps" means light globes, bulbs, tubes, and the like which consist of glass, quartz or similar containers, of various shapes, having the necessary elements for converting electrical energy into light rays, including infra-red or ultra-violet rays;
- (b) "lamps" also includes sealed beam lamp units and arc-lamps;
- (c) "lamps" equipped with external features such as lamp holders, switches, flex and plugs, transformers, etc. are excluded from this heading.

NOTES

1. This Chapter does not cover railway or tramway rolling-stock designed solely for running on rails.
2. For the purposes of this Chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilisers or other goods.

Machines and working tools designed for fitting to tractors of 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.
3. Motor chassis fitted with cabs fall in 8702 to 8704, and not in 8706.
4. 8712.00 includes all children's bicycles. Other children's cycles fall in 9501.00.

ADDITIONAL NOTES

1. In this Classification, "agricultural tractors" means:
 - (a) Two-wheel drive tractors of a kind used solely or principally in agriculture, horticulture or viticulture; or
 - (b) Other tractors that are designed for use, and will be used, solely or principally, in agriculture, horticulture or viticulture.
 2. In this Chapter, a reference to a vehicle of a particular kind includes a reference to a vehicle of that kind presented without its motive power.
 3. In this Chapter, "assembled" does not include goods assembled only to a stage that constitutes a sub-assembly.
 4. For the purposes of 8702 and 8703, "off-road vehicles" means four-wheel drive vehicles that have at least four of the following characteristics calculated when the vehicle is at its unladen mass (i.e., vehicle in running order, unoccupied and unladen with all fluid reservoirs including fuel, filled to normal capacity and with all standard equipment) on a level surface, with the front wheels parallel to the vehicle's longitudinal centreline, and the tyres inflated to the manufacturer's recommended pressure -
 - (a) Approach angle of not less than 28 degrees
 - the approach angle is the smallest angle, in the side view of a vehicle, formed by the level surface on which the vehicle is standing and a line tangent to the front tyre "Static Loaded Tyre Radius" arc and touching the underside of the vehicle forward of the front tyre;
-

ADDITIONAL NOTES - CONTINUED

- (b) Breakover angle of not less than 14 degrees
 - the breakover angle is the supplement of the largest angle, in the side view of a vehicle, that can be formed by two lines tangent to the front and rear "Static Loaded Tyre Radius" arcs and intersecting at a point on the underside of the vehicle;
 - (c) Departure angle of not less than 20 degrees
 - the departure angle is the smallest angle, in the side view of a vehicle, formed by the level surface on which the vehicle is standing and a line tangent to the rear tyre "Static Loaded Tyre Radius" arc and touching the underside of the vehicle rearward of the rear tyre;
 - (d) Running clearance of not less than 200 mm
 - the distance from the surface on which a vehicle is standing to the lowest point on the vehicle excluding upsprung mass;
 - (e) Front axle, rear axle and suspension clearance of not less than 175 mm each
 - front axle and rear axle clearance is the vertical distance from the level surface on which the vehicle is standing to the lowest point on the "axle" differential (when applicable in case of a front "axle") of the vehicle;
 - suspension clearance is the minimum distance from the front and rear suspensions to the ground.
5. For the purposes of 8703, "passenger motor vehicles" means motor cars and other motor vehicles (including station wagons) designed for the carriage of 2 or more persons (including the driver), other than:
- (a) ambulances;
 - (b) hearses;
 - (c) police vans;
 - (d) amphibious vehicles; or
 - (e) off-road vehicles.
6. 8708 does not cover textile mats or textile carpets (Chapter 57).
7. For the purposes of this Chapter "g.v.w." (gross vehicle weight) is the road weight specified by the manufacturer as being the maximum design weight capacity of the vehicle. This weight is the combined weight of the vehicle, the maximum specified load, the driver and a tank full of fuel.

2. Subject to Note 1 above, parts and accessories for machines, apparatus, instruments or articles of this Chapter are to be classified according to the following rules:
- (a) Parts and accessories which are goods included in any of the headings of this Chapter or of Chapter 84, 85 or 91 (other than 8485, 8548 or 9033.00) are in all cases to be classified in their respective headings;
 - (b) Other parts and accessories, if suitable for use solely or principally with a particular kind of machine, instrument or apparatus, or with a number of machines, instruments or apparatus of the same heading (including a machine, instrument or apparatus of 9010, 9013 or 9031) are to be classified with the machines, instruments or apparatus of that kind;
 - (c) All other parts and accessories are to be classified in 9033.00.
3. The provisions of Note 4 to Section 16 apply also to this Chapter.
4. 9005 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this Chapter or Section 16; such telescopic sights and telescopes are to be classified in 9013.

- (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled.

ADDITIONAL NOTES

1. In 9021, "orthopaedic appliances", in relation to footwear, means footwear made to measure for a specific disorder.
2. This Chapter does not cover gas pressure regulators (so called) of the piston or diaphragm type, of a kind used with compressed gas cylinders or reticulated gas pipeline systems, incorporating a pressure reducing valve or the like, whether or not combined with a pressure gauge (8481).
