## PREFACE.

---

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered, subject to the Constitution, "to make laws for the peace, order, and good government of the Commonwealth, with respect to . . . . . Census and statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the fortieth Official Year Book issued under the authority of the Commonwealth Government.

The Synopsis on pp. ix to xxviii immediately following shows the general arrangement of the work. The special index (preceding the General Index) provided at the end of the volume, together with certain references given in the various chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, owing to limitations of space, have been omitted or abbreviated in the present volume. Where, in the General Index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Every endeavour has been made to meet the demand occasioned by the current economic and financial conditions for new information, or information expressed in new terms, concerning many branches of statistics, while a Diary of Principal Economic Events of the years 1950 to 1953 is inserted after the last chapter.

It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter incorporated in the present volume, but attention may be drawn to the following:—

- Chapter II. Physiography.—Brief description of the main physical characteristics of the Australian continent (pp. 10-12).
- Chapter III. General Government.—Commonwealth Parliamentary Allowances (pp. 52-3).
- Chapter V. Transport and Communication.—Commonwealth Navigation and Shipping Legislation (pp. 110-2); Motor Vehicles—*Résumé* of fees, arrangements for registration of motor vehicles and issue of drivers' and riders' licences in each State (pp. 135-8).
- Chapter VII. The Territories of Australia.—Papua and New Guinea—Information extended, particularly with regard to finance and agriculture (pp. 243-7).
- Chapter VIII. Labour, Wages and Prices.—Industrial Disputes—New classification of causes used and stoppages analysed by cause and by method of settlement in two separate groups "Coalmining and Stevedoring" and "Other Industries" (pp. 316-9).
- Chapter IX. Population.—Number of assisted migrants who arrived in Australia under the various schemes introduced since 1946 (p. 371).
- Chapter XI. Education.—The chapter has been extensively revised on the basis of a special article contributed by the Commonwealth Office of Education on developments in Australian education since the subject was last treated in Official Year Book No. 22—1929.
- Chapter XIII. Public Health and Related Institutions.—Pensioner Medical Service (p. 531). Free Milk for School Children Scheme (p. 532).
- Chapter XIV. Welfare Services.—United Kingdom—Australia reciprocal agreement on social services (p. 553).
- Chapter XVI. Private Finance.—Outline of the provisions of the Commonwealth Bank Act 1953 and the Banking Act 1953 (pp. 615-6).
- Chapter XVII. Public Finance.—Cost of Commonwealth Departments (p. 686-90).
- Chapter XVIII. Mineral Industry.—Revised basis of recording mineral production (p. 747 et seq.).

Chapter XIX. Pastoral Production.—Consumption of raw wool and consumption of locally-processed wool in Australia and exports of wool from Australia on both greasy and clean bases (pp. 822-4); Stocks of raw wool (p. 825).

Chapter XXVII. Defence.—Revised information on casualties to members of each of the Australian Fighting Services during the 1939-45 War (pp. 1114-8).

Statistical Summary.—Considerably extended by inclusion of additional statistical series.

Appendix.—Summary of Standard Hours and Basic Wage Inquiry 1952-53 by Commonwealth Court of Conciliation and Arbitration (pp. 1239-40); Korean Campaign—Casualties, Prisoner-of-War Exchange Agreement, and Operational Awards granted (pp. 1266-7).

The Statistical Summary and the Chronological Table have been transferred from their former position at the beginning of the volume to the end, following the Diary of Principal Economic Events.

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

Printing difficulties are still being experienced and have delayed the publication of this volume. In order to offset to some extent this delay, the contents of this issue have already been published in separate Parts as the successive chapters or groups of chapters were printed. Particulars of these Parts, numbering eleven in all, are shown in the Price List of Printed Publications at the end of this volume. In a publication of this size, a considerable time must necessarily elapse between the handling, by both author and printer, of the earlier and later parts of the work. The result, in a statistical publication, is an unevenness in the periods to which the statistics relate. To overcome this difficulty at least partially, much more use is now made of the Appendix to the Year Book. So far as space permits, later particulars, where available, of many statistical series appearing in preceding chapters have been inserted in the Appendix. The insertions have been restricted to figures mainly, as the inclusion of current textual matter is not generally practicable.

The Appendix to this issue contains information for various periods up to 1953-54, that is, one, and in some instances two, years in advance of that contained in the body of the book.

It is not inappropriate to mention here that for the most recent statistics the reader should refer to other publications issued by this Bureau, notably the *Monthly Review of Business Statistics* and the *Quarterly Summary of Australian Statistics*. There are also numerous mimeographed statements issued from time to time on a wide range of subjects. Particulars of these are shown in Chapter XXX.—Statistical Organization and Sources of Information.

Commencing with issue No. 38 a change in the title of the Year Book was made, the year now shown being the year of issue.

My thanks are tendered to the State Statisticians, who have collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information.

I also desire to express my keen appreciation of the valuable work performed by Mr. S. H. Begley, Editor of Publications, Mr. J. M. Jones, B.A., former Assistant Editor, and Mr. R. C. Gilligan, B.Com., and Mr. G. I. Neville, B.Com., Assistant Editors, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several Branches of the Commonwealth Bureau of Census and Statistics upon whom has devolved the duty of revising the chapters relative to their respective Branches.

S. R. CARVER,  
Acting Commonwealth Statistician.

§ 6. Leases and Licences under Mining Acts—		1. General .. ..	92
1. General .. ..	79	2-9. States and Territories .. ..	92-5
2-8. States and Northern Territory ..	79-80	10. Summary .. ..	96
9. Summary .. ..	80		
§ 7. Closer Settlement—			
1. General .. ..	80		
2-7. States .. ..	80-1		

## CHAPTER V.—TRANSPORT AND COMMUNICATION.

## A. SHIPPING.

§ 1. System of Record .. ..	97
§ 2. Oversea Shipping—	
1. Total Movement .. ..	97
2. Total Oversea Shipping, States ..	98
3. Shipping Communication with various Countries .. ..	98
4. Nationality of Oversea Shipping ..	99
§ 3. Shipping at Principal Ports—	
1. Total Shipping, Australia .. ..	101
2. Total Shipping—Australia, New Zealand and United Kingdom ..	102
§ 4. Vessels Built and Registered—	
1. Vessels Built .. ..	102
2. Vessels Registered .. ..	103
3. World Shipping Tonnage .. ..	103
§ 5. Interstate Shipping—	
1. System of Record .. ..	104
2. Interstate Movement .. ..	105
3. Shipping Engaged Solely in Interstate Trade .. ..	107
4. Interstate and Coastal Shipping Services .. ..	107
§ 6. Shipping Cargo—	
1. Oversea and Interstate Cargo ..	107
2. Oversea Cargo by Nationality of Vessels .. ..	109
§ 7. Control of Shipping—	
1. War-time Control .. ..	109
2. Post-war Control and Developments ..	109
§ 8. Miscellaneous—	
1. Lighthouses .. ..	110
2. Distances by Sea .. ..	110
3. Shipping Freight Rates .. ..	110
4. Depth of Water at Main Ports ..	110
5. Shipping Casualties .. ..	110
6. Commonwealth Navigation and Shipping Legislation .. ..	110
7. Ports and Harbours .. ..	112

## B. GOVERNMENT RAILWAYS.

1. General .. ..	113
2. Railway Communication in Australia .. ..	113
3. Standardization of Railway Gauges ..	113
4. Government Railways: Lines under Construction and Lines Authorized ..	113

## B. GOVERNMENT RAILWAYS—continued.

5. Grafton-South Brisbane (Uniform Gauge) Line .. ..	114
6. Mileage Open for Traffic, all Lines ..	114
7. Classification of Lines according to Gauge .. ..	115
8. Summary of Operations .. ..	116
9. Summary, States .. ..	116
10. Gross Revenue .. ..	116
11. Working Expenses .. ..	118
12. Net Revenue .. ..	119
13. Exchange .. ..	119
14. Profit or Loss .. ..	119
15. Traffic .. ..	119
16. Rolling Stock .. ..	128
17. Accidents .. ..	128
18. Consumption of Coal and Oil .. ..	128
19. Staff Employed and Salaries and Wages Paid .. ..	129

## C. TRAMWAYS.

1. Systems in Operation .. ..	129
2. Summary of Operations, Australia ..	130
3. Traffic and Accidents .. ..	130
4. State Details .. ..	131

## D. MOTOR OMNIBUS SERVICES.

1. General .. ..	132
2. Government and Municipal Services ..	133
3. Private Services .. ..	133

## E. FERRY (PASSENGER) SERVICES.

1. General .. ..	134
2. Summary of Operations .. ..	134

## F. MOTOR VEHICLES.

1. Motor Industry .. ..	135
2. Registration .. ..	135
3. Taxi-cabs and Other Hire Vehicles ..	138
4. Motor Omnibuses .. ..	138
5. Motor Vehicles on the Register, etc. ..	139
6. New Vehicles Registered .. ..	140
7. World Motor Vehicle Statistics .. ..	140
8. Survey of Motor Vehicles .. ..	141

## G. TRAFFIC ACCIDENTS.

1. General .. ..	141
2. Total Accidents Reported .. ..	141
3. Persons Killed or Injured in Traffic Accidents .. ..	143

CHAPTER V.—TRANSPORT AND COMMUNICATION—*continued.*

PAGE	PAGE
<b>H. AVIATION.</b>	
1. Historical .. .. .	144
2. Foundation and Administration of Civil Aviation .. .. .	144
3. International Activity .. .. .	144
4. Regular Air Services within Australia .. .. .	145
5. Air Ambulance Services .. .. .	145
6. Training of Air Pilots .. .. .	145
7. Gliding Clubs .. .. .	145
8. Airways Engineering .. .. .	145
9. Air Traffic Control .. .. .	146
10. Meteorological Aids to Civil Aviation .. .. .	146
11. Construction and Development of Airports .. .. .	146
12. Aircraft Parts and Materials .. .. .	147
13. Aircraft Maintenance Certificates of Repair .. .. .	147
14. Test and Examination of Aircraft Parts and Materials .. .. .	147
15. Statistical Summaries .. .. .	147
16. Papua-New Guinea Activities .. .. .	148
<b>I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS.</b>	
<b>§ 1. General—</b>	
1. The Postmaster-General's Department .. .. .	149

§ 3. Protection of Aborigines .. .. .	555
§ 4. Royal Life Saving Society .. .. .	556
§ 5. Royal Humane Society .. .. .	556
§ 6. Other Charitable Institutions .. .. .	556

## CHAPTER XV.—LOCAL GOVERNMENT.

§ 1. Introduction—	
1. General .. .. .	557
2. Local Government Authorities .. .. .	557
3. Semi-Governmental Authorities .. .. .	558
4. Roads, Bridges, etc. .. .. .	558
5. Water Supply and Sewerage .. .. .	558
6. Harbours .. .. .	558
7. Fire Brigades .. .. .	558
8. Other Local or Semi-Governmental Activity .. .. .	558
§ 2. Local Government Authorities—	
1. Area, Population, Dwellings and Value of Ratable Property .. .. .	559
2. Finances .. .. .	562
§ 3. Local and Semi-Governmental Authorities' Debt—	
1. General .. .. .	567
2. Local and Semi-Governmental Authorities' Debt .. .. .	567

§ 4. Roads and Bridges—	
1. Commonwealth Government Grants .. .. .	570
2-7. States .. .. .	570-9
8. Summary of Roads used for General Traffic .. .. .	581
9. Summary of Expenditure on Roads and Bridges .. .. .	582
§ 5. Water Supply, Sewerage and Drainage—	
1-6. States .. .. .	584-98
§ 6. Harbour Boards and Trusts—	
1-6. States .. .. .	598-603
§ 7. Fire Brigades—	
1-6. States .. .. .	604-6

CHAPTER XVII.—PUBLIC FINANCE—*continued.*

	PAGE
<b>A. COMMONWEALTH FINANCE—<i>continued.</i></b>	
§ 3. Commonwealth Trust Funds—	
1. Receipts, Expenditure and Balances	699
2. Summary	700
§ 4. Commonwealth Loan Fund	701
<b>B. STATE FINANCE.</b>	
§ 1. General—	
1. Functions of State Governments	702
2. Accounts of State Governments	702
3. Inter-relation of Commonwealth and State Finances	702
§ 2. State Consolidated Revenue Funds—	
DIVISION I.—REVENUE.	
1. General	702
2. Revenue Received	703
3. Sources of Revenue	703
DIVISION II.—EXPENDITURE.	
1. General	708
2. Total Expenditure	709
3. Details of Expenditure	709
DIVISION III.—SURPLUS REVENUE.	
§ 3. State Trust Funds	711
§ 4. State Loan Funds—	
1. General	711
2. Details of Loan Expenditure	712
3. Loan Expenditure on Works, Services, etc.	713
4. Total Net Loan Expenditure	715
5. Total Loan Expenditure	716
<b>C. COMMONWEALTH AND STATE FINANCE.</b>	
1. Revenue and Expenditure	717
2. Taxation	718
<b>D. COMMONWEALTH AND STATE PUBLIC DEBT.</b>	
§ 1. General	719
§ 2. The Financial Agreement between the Commonwealth and the States—	
1. General	719
2. Australian Loan Council	719
3. Loan Raisings for the Commonwealth and States	719
4. Taking over of State Public Debts	719
5. Transferred Properties	720
6. Payment of Interest	720

	PAGE
<b>D. COMMONWEALTH AND STATE PUBLIC DEBT—<i>continued.</i></b>	
§ 2. The Financial Agreement between the Commonwealth and the States— <i>continued.</i>	
7. Sinking Fund	720
8. Borrowing by Semi-Governmental Authorities	721
§ 3. Commonwealth and State Public Debt Outstanding—	
1. Public Debt, Annual Interest Payable, and Average Rate of Interest at 30th June, 1952	721
2. Public Debt and Annual Interest Payable 1939 and 1948 to 1952	723
3. State Public Debt and Annual Interest Payable at 30th June, 1952	724
4. State Public Debt 1939 and 1948 to 1952	726
5. Public Debt and Interest Payable in Australian Currency	726
6. Public Debt at each Rate of Interest	728
7. Dates of Maturity	729
8. Short-term Debt	730
9. State and Municipal and Semi-Governmental Authority Public Debt	731
§ 4. Commonwealth Loan Raisings—	
1. New Loans Raised	732
2. Conversion and Redemption Loans	733
3. International Bank for Reconstruction and Development Loan	734
4. Summary of Loan Transactions	735
§ 5. National Debt Sinking Fund—	
1. Commonwealth Public Debt	735
2. State Public Debt	736
<b>E. TAXES ON INCOME.</b>	
1. General	737
2. Present Taxes	737
3. Assessable Income	737
4. Concessional Deductions	737
5. Effective Exemptions from Tax	738
6. Rates of Income Tax and Social Services Contribution on Individuals	739
7. Taxes on Specified Incomes	740
8. Pay-as-you-earn	742
9. Lodgment of Returns and Assessment of Tax	742
10. Company Income Taxes	743
11. Yield of Income Taxes	744
§ 3. Silver, Lead and Zinc—	
1. Mine Production	758
2. Production and Sales of Refined Silver, Lead and Zinc	762
3. World Production	763
4. Silver, Lead and Zinc Production in Principal Countries	763
5. Prices of Silver, Lead and Zinc	764
6. Employment in Silver, Lead and Zinc Mining	765
§ 4. Copper—	
1. Production	765
2. Sources of Production	766
3. Production and Sales of Refined Copper	766
4. World Production of Copper	767
5. Prices	767
6. Employment in Copper-mining	768
§ 5. Tin—	
1. Production	768
2. Sources of Production	768
3. World Production	769
4. Prices	770
5. Employment in Tin-mining	770

## CHAPTER XVIII.—MINERAL INDUSTRY.

§ 1. The Mineral Wealth of Australia—	
1. Place of Mining in Australian Development	747
2. Extent of Mineral Wealth	747
3. Standardization of Mineral Statistics	747
4. Quantity and Value of Minerals Produced	748
5. Principal Content of Metallic Minerals	751
6. Value of Production	753
7. Total Production since the Inception of Mining in Australia	754
§ 2. Gold—	
1. Discovery in Various States	754
2. Mine Production	755
3. Refinery Production	756
4. Unit Values	756
5. Changes in Relative Positions of States as Gold Producers	756
6. Place of Australia in the World's Gold Production	756
7. Employment in Gold-mining	757
8. Assistance to Gold-mining Industry	758

CHAPTER XVIII.—MINERAL INDUSTRY—*continued.*

	PAGE		PAGE
<b>§ 6. Iron—</b>		<b>§ 9. Coke and Other By-products from Coal—</b>	
1. General .. .. .	770	1. Coke .. .. .	786
2. Production .. .. .	770	2. Other By-products from Coal ..	787
3. Production of Iron and Steel in Principal Countries .. .. .	772	<b>§ 10. Shale Oil and Mineral Oil—</b>	
<b>§ 7. Other Metallic Minerals—</b>		1. Shale Oil .. .. .	787
1. Tungsten .. .. .	773	2. Coal Oil .. .. .	788
2. Cadmium and Cobalt .. .. .	773	3. Natural Oil .. .. .	788
3. Platinum Group Metals .. .. .	774	<b>§ 11. Sulphur .. .. .</b>	789
4. Other .. .. .	774	<b>§ 12. Gems and Gemstones—</b>	
<b>§ 8. Coal—</b>		1. General .. .. .	790
1. Production in each State .. .. .	777	2. Opal .. .. .	790
2. Distribution and Production of Coal in each State .. .. .	778	3. Sapphire .. .. .	790
3. Production in Principal Countries ..	781	<b>§ 13. Persons Engaged, Wages Paid and Acci- dents in Mining—</b>	
4. Exports .. .. .	781	1. Total Employment in Mining ..	790
5. Consumption in Australia .. .. .	782	2. Wages Paid in Mining .. .. .	791
6. Coal Value at the Mine in New South Wales .. .. .	784	3. Accidents in Mining .. .. .	792
7. Prices in New South Wales, Great Britain, Canada and the United States of America .. .. .	784	<b>§ 14. Government Aid to Mining, and Mineral Control—</b>	
8. Employment in Coal-mines .. .. .	785	1. Aid to Mining .. .. .	792
9. Production of Coal per man-day (or man-shift) in New South Wales Underground Mines .. .. .	785	2. Control of Minerals .. .. .	795
10. Accidents in Coal-mining .. .. .	786		
11. Commonwealth Board of Inquiry into the Coal-mining Industry .. .. .	786		
12. Joint Coal Board .. .. .	786		

## CHAPTER XIX.—PASTORAL PRODUCTION.

<b>§ 1. Initiation and Growth of Pastoral Industry—</b>		<b>§ 5. Wool—</b>	
1. General .. .. .	797	1. General .. .. .	815
2. Live Stock Numbers since 1860 ..	797	2. Greasy and Scoured Wool .. .. .	815
3. Fluctuations .. .. .	797	3. Production .. .. .	816
4. Minor Classes of Live Stock .. .. .	798	4. Care Needed in Comparing Clips ..	816
5. Net Exports of Principal Pastoral Products .. .. .	798	5. Average Weights of Fleeces Shorn ..	817
6. Value of Pastoral Production .. .. .	799	6. World Wool Production .. .. .	817
7. Consumption of Meats .. .. .	801	7. War-time Contracts .. .. .	818
8. Marketing of Meat .. .. .	801	8. Australian Wool Realization Com- mission .. .. .	818
<b>§ 2. Horses—</b>		9. Marketing of Wool .. .. .	820
1. Distribution throughout Australia ..	803	10. Wool Publicity and Research .. .. .	821
2. Oversea Trade in Horses .. .. .	803	11. Consumption of Wool .. .. .	821
<b>§ 3. Cattle—</b>		12. Exports of Wool .. .. .	822
1. Purposes for which Raised .. .. .	804	13. Local Sales of Wool .. .. .	824
2. Distribution throughout Australia ..	804	14. Stocks of Wool .. .. .	825
3. Classification of Cattle According to Purpose .. .. .	805	15. Value .. .. .	825
4. Size Classifications of Cattle Herds ..	805	16. United Kingdom Importation of Wool .. .. .	826
5. Comparison with other Countries ..	805	17. Principal Importing Countries and Sources of Supply .. .. .	827
6. Imports and Exports of Cattle .. .. .	806	<b>§ 6. Trade in Hides and Skins—</b>	
7. Cattle Slaughtered .. .. .	806	1. Extent of Trade .. .. .	827
8. Production of Beef and Veal .. .. .	806	2. Sheepskins with Wool .. .. .	827
9. Consumption of Beef and Veal .. .. .	807	3. Sheepskins without Wool .. .. .	828
10. Exports of Frozen Beef and Veal ..	807	4. Hides .. .. .	828
<b>§ 4. Sheep—</b>		5. Furred Skins .. .. .	829
1. Initiation of the Pastoral Industry ..	808	6. Marketing of Hides and Skins ..	829
2. Movement in Sheep Numbers in Australia .. .. .	808	<b>§ 7. Tallow—</b>	
3. Distribution throughout Australia ..	811	1. Production .. .. .	830
4. Classification of Sheep According to Age, Sex and Breed .. .. .	811	2. Consumption in Factories .. .. .	830
5. Numbers of Sheep on Rural Holdings ..	812	3. Exports of Tallow .. .. .	830
6. Comparison with other Countries ..	812	4. Marketing .. .. .	830
7. Oversea Imports and Exports of Sheep .. .. .	812		
8. Sheep Slaughtered .. .. .	813		
9. Production of Mutton and Lamb ..	813		
10. Consumption of Mutton and Lamb ..	813		
11. Exports of Frozen Mutton and Lamb .. .. .	814		

## CHAPTER XX.—AGRICULTURAL PRODUCTION.

	PAGE		PAGE
§ 1. Introductory .. .. .	831	§ 9. Sorghum for Grain—	
§ 2. Progress of Agriculture—		1. Area, Production and Average Yield	868
1. Early Records .. .. .	831	2. Queensland-British Food Cor-	
2. Progress of Cultivation .. .. .	831	poration Project .. .. .	868
3. Area under Sown Pastures .. .. .	832	§ 10. Potatoes—	
4. Australian Agricultural Council .. .. .	832	1. Area, Production and Average Yield	868
§ 3. Distribution, Production and Value of Crops—		2. Gross Value of Potato Crop .. .. .	869
1. Area of Crops in States and Territories .. .. .	834	3. Consumption .. .. .	870
2. Relative Areas of Crops in States and Territories .. .. .	835	4. Marketing .. .. .	870
3. Area of Principal Crops in Australia .. .. .	836	5. Exports .. .. .	870
4. Weights and Measures .. .. .	837	§ 11. Onions—	
5. Production of Crops in States and Territories .. .. .	837	1. Area Production and Average Yield	870
6. Production of Principal Crops in Australia .. .. .	838	2. Gross Value of Onion Crop .. .. .	871
7. Average Yield per Acre of Principal Crops in Australia .. .. .	838	3. Consumption .. .. .	871
8. Gross Value of Principal Crops in Australia .. .. .	838	4. Imports and Exports .. .. .	871
9. Value of Production and Indexes of Price and Quantity of Production .. .. .	839	§ 12. Hay—	
§ 4. Wheat—		1. General .. .. .	872
1. Royal Commission on the Wheat Industry .. .. .	841	2. Value of Hay Crop .. .. .	873
2. Wheat Costs of Production Committee .. .. .	841	3. Farm Stocks of Hay .. .. .	873
3. Licensing of Areas Sown to Wheat, and Acreages Sown .. .. .	841	4. Imports and Exports .. .. .	873
4. Legislation Relating to Wheat Industry .. .. .	841	§ 13. Green Fodder—	
5. Marketing of Wheat .. .. .	842	1. Nature and Extent .. .. .	873
6. International Wheat Agreement .. .. .	844	2. Value of Green Fodder Crops .. .. .	874
7. Wheat Farms .. .. .	845	§ 14. Sugar-cane—	
8. Area, Production and Average Yield .. .. .	846	1. Area .. .. .	874
9. Varieties of Wheat Sown .. .. .	847	2. Productive and Unproductive Cane .. .. .	874
10. F.A.Q. Standard of Wheat .. .. .	849	3. Production of Cane and Sugar .. .. .	874
11. Price of Wheat .. .. .	849	4. Average Production of Cane Sugar .. .. .	879
12. Value of the Wheat Crop .. .. .	850	5. Quality of Cane .. .. .	879
13. Production and Disposal of Wheat in Australia .. .. .	851	6. Production and Utilization .. .. .	880
14. Exports of Wheat and Flour .. .. .	852	7. Consumption in Factories .. .. .	880
15. Stocks of Wheat and Flour .. .. .	853	8. Control of Cane Production in Queensland .. .. .	880
16. Bulk Handling of Wheat in Australia .. .. .	853	9. Sugar-beet .. .. .	881
17. World Area and Production of Wheat .. .. .	856	10. Sugar Agreement in Australia—	
18. Exports—Principal Countries .. .. .	857	Embargo on Imports, etc. .. .. .	881
19. Imports—Principal Countries .. .. .	858	11. International Sugar Agreement .. .. .	881
§ 5. Oats—		12. Net Return for Sugar Crop .. .. .	882
1. Area, Production and Average Yield .. .. .	859	13. Exports of Sugar .. .. .	882
2. Price of Oats .. .. .	860	14. Sugar By-products .. .. .	882
3. Value of Oat Crop .. .. .	860	15. Sugar Prices .. .. .	883
4. Imports and Exports .. .. .	860	16. Marketing Arrangements .. .. .	883
5. Oatmeal, etc. .. .. .	860	17. Fruit Industry Sugar Concession Committee and Sugar Rebates .. .. .	883
6. World Production .. .. .	860	18. Sugar Inquiry Committee .. .. .	884
§ 6. Maize—		19. Bulk Handling of Sugar .. .. .	884
1. States Growing Maize .. .. .	861	§ 15. Vineyards—	
2. Area, Production and Average Yield .. .. .	861	1. Progress of Cultivation .. .. .	884
3. Price of Maize .. .. .	862	2. Imports and Exports of Wine .. .. .	885
4. Value of Crop .. .. .	862	3. Oversea Marketing of Wine .. .. .	886
5. Exports of Maize and Maize Products .. .. .	862	4. Other Viticultural Products .. .. .	886
6. World Production .. .. .	863	5. Production and Disposal of Dried Vine Fruit .. .. .	887
§ 7. Barley—		6. Post-war Contracts .. .. .	888
1. Area, Production and Average Yield .. .. .	863	7. Oversea Marketing of Dried Fruits .. .. .	888
2. Australian Barley Board .. .. .	864	§ 16. Orchards and Fruit-Gardens—	
3. Prices .. .. .	865	1. Area .. .. .	888
4. Value of Barley Crop .. .. .	865	2. Varieties of Crops .. .. .	889
5. Exports .. .. .	866	3. Principal Fruit Crops .. .. .	890
6. Malt .. .. .	866	4. Production of Jams and Jellies and Preserved Fruit .. .. .	891
7. World Production .. .. .	867	5. Consumption of Fruit and Fruit Products .. .. .	891
§ 8. Rice .. .. .	867	6. Imports and Exports of Fruit .. .. .	891
		7. Marketing of Apples and Pears .. .. .	893
		8. Oversea Marketing of Canned Fruits .. .. .	893
		§ 17. Vegetables for Human Consumption—	
		1. Area and Production of Fresh Vegetables .. .. .	894
		2. Production of Canned and Dehydrated Vegetables .. .. .	894
		3. Imports and Exports of Vegetables .. .. .	894
		4. Consumption of Vegetables .. .. .	894
		§ 18. Tobacco—	
		1. States, Area and Production .. .. .	895
		2. The Tobacco Industry .. .. .	895
		3. Oversea Trade .. .. .	896

CHAPTER XX.—AGRICULTURAL PRODUCTION—*continued.*

	PAGE		PAGE
§ 19. Hops .. .. .	896	§ 25. Ensilage—	
§ 20. Flax .. .. .	897	1. Government Assistance in Production .. .. .	903
§ 21. Peanuts .. .. .	898	2. Quantity Made and Stocks held on Farms .. .. .	903
§ 22. Cotton—		§ 26. Agricultural Colleges and Experimental Farms .. .. .	904
1. General .. .. .	899	§ 27. Tractors on Rural Holdings .. .. .	904
2. Area and Production .. .. .	899	§ 28. Number and Area of Rural Holdings and Employment Thereon—	
3. Consumption of Raw Cotton .. .. .	899	1. Number and Area .. .. .	905
§ 23. Financial Assistance to Primary Producers—		2. Special Tabulation Relating to Rural Holdings .. .. .	906
1. Bounties .. .. .	900	3. Employment on Rural Holdings .. .. .	907
2. Subsidies .. .. .	901		
§ 24. Fertilizers—			
1. General .. .. .	901		
2. Imports and Exports .. .. .	901		
3. Quantities Locally Used .. .. .	902		
4. Local Production .. .. .	903		

## CHAPTER XXI.—FARMYARD, DAIRY AND BEE PRODUCTS.

§ 1. Introductory—		§ 4. Pigs and Pig Products—	
1. General .. .. .	909	1. Pigs .. .. .	925
2. Mixed Farming .. .. .	909	2. Size of Pig Herds .. .. .	926
3. Employment .. .. .	909	3. Pork .. .. .	926
4. Growth of the Dairying Industry .. .. .	910	4. Bacon and Ham .. .. .	927
5. Official Supervision of the Dairying Industry .. .. .	910	5. United Kingdom Contracts .. .. .	927
6. Australian Agricultural Council .. .. .	910	6. Oversea Trade in Pigs and Pig Products .. .. .	927
§ 2. Value of Farmyard, Dairy and Bee Production and Indexes of Price and Quantity Production—		§ 5. Poultry-Farming—	
1. Gross Value of Farmyard, Dairy and Bee Production .. .. .	910	1. General .. .. .	928
2. Gross and Net Values .. .. .	911	2. Numbers of Poultry .. .. .	928
3. Net Value of Production .. .. .	912	3. Recorded Production and Disposal of Eggs .. .. .	928
4. Indexes of Quantity and Price of Farmyard Dairy and Bee Production .. .. .	913	4. Production and Consumption of Eggs .. .. .	929
§ 3. Dairy Cattle and Dairy Products—		5. Marketing of Eggs .. .. .	930
1. Dairy Herds .. .. .	913	6. Oversea Trade in Poultry Products .. .. .	931
2. Size of Dairy Herds .. .. .	915	§ 6. Bee-Farming—	
3. Factory System .. .. .	915	1. Production of Honey and Bees-wax .. .. .	931
4. Butter and Cheese—Stabilization Schemes .. .. .	915	2. Oversea Trade in Bee Products .. .. .	932
5. Commonwealth Subsidies .. .. .	915	§ 7. Exports of Australian Farmyard, Dairy and Bee Products .. .. .	932
6. Total Dairy Production .. .. .	917	§ 8. Imports of Dairy and Farmyard Products into United Kingdom—	
7. Whole Milk .. .. .	918	1. Summary, Principal Products .. .. .	934
8. Butter Production .. .. .	919	2. Butter .. .. .	934
9. Cheese Production .. .. .	920	3. Cheese .. .. .	935
10. Condensed, Concentrated and Powdered, etc., Milk Production .. .. .	921	4. Bacon .. .. .	935
11. Local Consumption of Butter and Cheese .. .. .	922	5. Pork .. .. .	935
12. Marketing of Dairy Products .. .. .	922	6. Eggs .. .. .	935
13. Butter and Cheese Contracts .. .. .	923	7. Milk Products .. .. .	936
14. Oversea Trade in Butter, Cheese and Milk .. .. .	924	8. Other Products .. .. .	936

## CHAPTER XXII.—FORESTRY.

§ 1. General—		§ 5. Forestry Production—	
1. Objects of Forestry .. .. .	937	1. Timber .. .. .	944
2. General Account of Forests and Timbers .. .. .	937	2. Paper and Wood Pulp .. .. .	945
3. Extent of Forests .. .. .	938	3. Other Forest Products .. .. .	946
4. Forest Reservations .. .. .	939	4. Value of Production .. .. .	947
5. Plantations .. .. .	940	5. Employment .. .. .	948
§ 2. Forestry Activities of the Commonwealth—		§ 6. Imports and Exports of Timber and Tanning Substances—	
1. Prior to 1925 .. .. .	940	1. Imports of Dressed and Undressed Timber .. .. .	948
2. Forestry and Timber Bureau .. .. .	940	2. Exports of Undressed Timber and Railway Sleepers .. .. .	949
3. Commercial Forests .. .. .	942	3. Classification of Imports and Exports .. .. .	950
4. Forest Products Research .. .. .	942		
§ 3. Forest Congresses .. .. .	942		
§ 4. State Forestry Departments—			
1. Functions .. .. .	943		
2. Forest Reservations .. .. .	943		
3. Reforestation, Afforestation, etc. .. .. .	943		
4. Revenue and Expenditure .. .. .	944		

## CHAPTER XXIII.—FISHERIES.

	PAGE		PAGE
<b>§ 1. General—</b>		<b>§ 4. Inquiries and Research—</b>	
1. Fish Stocks .. .. .	951	1. General .. .. .	955
2. Fishing Areas .. .. .	951	2. Commonwealth Scientific and Industrial Research Organization, Division of Fisheries .. .. .	955
3. Fishing Boats and Equipment .. .. .	951	3. Commonwealth Fisheries Authority .. .. .	956
4. Administration .. .. .	952	4. North Australia Development Committee .. .. .	956
<b>§ 2. Development and Present Condition of the Fishery—</b>		5. Whaling .. .. .	956
1. Fisheries Proper .. .. .	952	<b>§ 5. The Fishing Industry—</b>	
2. Oysters and Shell Fisheries .. .. .	954	1. Boats and Men Engaged, and Take .. .. .	957
3. Pearl-shell and Trochus .. .. .	954	2. Value of Production .. .. .	959
<b>§ 3. Marketing and Distribution—</b>		3. Fish Preserving .. .. .	960
1. Marketing .. .. .	954	4. State Revenue from Fisheries .. .. .	960
2. Consumption of Fish .. .. .	955	<b>§ 6. Oversea Trade in Fishery Products—</b>	
3. Processing, including Canning .. .. .	955	1. Imports of Fish .. .. .	961
4. By-products .. .. .	955	2. Exports of Fish .. .. .	961
		3. Exports of Pearl and other Shell .. .. .	961

## CHAPTER XXIV.—MANUFACTURING INDUSTRY.

<b>§ 1. General—</b>		<b>§ 6. Sex Distribution in Factories—</b>	
1. Introduction .. .. .	963	1. Distribution According to Sex of Persons Employed .. .. .	979
2. Decentralization of Manufacturing Industries .. .. .	963	2. Rate of Variation for each Sex .. .. .	980
3. Commonwealth Division of Industrial Development .. .. .	964	3. Masculinity of Persons Employed in Factories .. .. .	980
4. Customs and Excise Tariffs and Bounties on Manufactures .. .. .	964	4. Employment of Females in Particular Industries .. .. .	981
5. Scientific Research and Standardization .. .. .	964	<b>§ 7. Child Labour in Factories—</b>	
6. Definitions in Factory Statistics .. .. .	965	1. Conditions of Child Labour .. .. .	982
7. Classification of Factories .. .. .	966	2. Number of Children Employed .. .. .	982
8. Factory Development since 1901—Australia .. .. .	967	3. Proportion of Children Employed to Total Employees .. .. .	982
<b>§ 2. Number of Factories—</b>		4. Industries Employing Child Labour .. .. .	983
1. Number of Factories in each State .. .. .	968	5. Apprenticeship .. .. .	983
2. Number of Factories in Industrial Classes .. .. .	968	<b>§ 8. Salaries and Wages Paid and Value of Production—</b>	
<b>§ 3. Classification of Factories according to Number of Persons Employed—</b>		1. General .. .. .	984
1. General .. .. .	969	2. Salaries and Wages Paid .. .. .	984
2. States .. .. .	969	3. Power, Fuel and Light Used .. .. .	988

## CHAPTER XXV.—ELECTRIC POWER GENERATION AND DISTRIBUTION.

	PAGE		PAGE
<b>A. INTRODUCTION.</b>			
1. Distribution of Population and Location of Power Resources	1029	§ 4. South Australia—	
2. Electric Power Generation and Distribution	1030	1. General	1049
3. Future Developments	1031	2. The Electricity Trust of South Australia	1050
<b>B. SNOWY MOUNTAINS HYDRO-ELECTRIC SCHEME.</b>			
1. Geography of Area	1031	3. Capacity and Production	1050
2. Historical	1031	4. Leigh Creek and other new Capacity	1051
3. Description of Scheme	1032	5. The Municipal Tramways Trust	1051
4. Utilization of Power	1033	<b>§ 5. Western Australia—</b>	
<b>C. STATES AND TERRITORIES.</b>			
§ 1. New South Wales—		1. General	1051
1. General	1034	2. Metropolitan Undertaking	1051
2. Organization	1034	3. Kalgoorlie	1052
3. Generation and Transmission	1036	4. General Pattern of Electricity Supply	1052
4. Rural Electrification	1037	5. The State Electricity Commission of Western Australia	1052
§ 2. Victoria—		6. South-west Development	1053
1. General	1038	<b>§ 6. Tasmania—</b>	
2. The State Electricity Commission of Victoria	1038	1. General	1053
§ 3. Queensland—		2. The Hydro-Electric Commission	1054
1. General	1045	3. Power Usage by Secondary Industry	1055
2. Royal Commission on Generation and Distribution of Electric Power in Queensland, 1936	1046	<b>§ 7. Commonwealth Territories—</b>	
3. The State Electricity Commission of Queensland	1046	1. Internal Territories	1055
4. Regional Electricity Boards	1047	2. External Territories—Papua and New Guinea	1056
5. Creation of Southern Electric Authority of Queensland	1048	<b>D. STATISTICAL SUMMARY.</b>	
6. New Capacity	1048		1056

## CHAPTER XXVI.—WATER CONSERVATION AND IRRIGATION.

<b>A. RESOURCES, UTILIZATION AND NATIONAL AND INTERSTATE ASPECTS.</b>		<b>B. STATES AND TERRITORIES—continued.</b>	
§ 1. Introduction	1059	§ 3. Victoria—continued.	
§ 2. Water Resources and their Utilization—		8. Underground Resources	1086
1. Surface Supplies	1059	9. Future Programme	1087
2. Major Dams and Reservoirs	1059	10. Hydro-electricity	1087
3. Irrigation	1060	§ 4. Queensland—	
4. Preservation of Catchments	1062	1. General	1087
5. Sub-surface Supplies	1062	2. Great Artesian Basin	1088
§ 3. National and Interstate Aspects—		3. Stock Route Watering	1089
1. General	1064	4. Irrigation	1089
2. Murray River Scheme	1064	5. Bureau of Investigation	1092
3. New South Wales—Queensland Border Rivers Agreement	1066	6. Channel Country	1092
4. Snowy Mountains Hydro-electric Scheme	1067	7. Hydro-electricity	1092
<b>B. STATES AND TERRITORIES</b>		§ 5. South Australia—	
§ 1. Australian Local Pattern of Water Conservation and Use	1068	1. General	1093
§ 2. New South Wales—		2. Irrigation	1093
1. General	1068	3. Water Supply Schemes	1095
2. Schemes Summarized	1069	4. Underground Water	1095
3. Murrumbidgee Irrigation Areas	1071	5. Farm Water Schemes	1096
4. Other Irrigation Areas	1072	6. South-Eastern Drainage	1096
5. Irrigation Districts	1072	§ 6. Western Australia—	
6. Water Trust Districts, Irrigation Trusts and Flood Control and Irrigation Districts	1081	1. General	1096
7. River and Lake, and Farm Water Supplies	1082	2. Irrigation	1096
8. Underground Water	1082	3. Water Supply Schemes	1097
9. Future Programme	1082	4. Underground Water	1097
10. Hydro-electricity	1082	5. Ord River Scheme	1098
§ 3. Victoria—		§ 7. Tasmania—	
1. General	1083	1. General	1098
2. Systems Summarized	1083	2. Hydro-electricity	1098
3. Goulburn System	1085	3. Industrial	1099
4. Murray River System	1085	4. Irrigation	1099
5. First Mildura Trust District	1086	§ 8. Northern Territory—	
6. Wimmera-Mallee System	1086	1. Climate and Topography	1099
7. Farm Water Supplies	1086	2. Administration	1099
		3. Underground Water	1100
		4. Irrigation	1100
		§ 9. Papua and New Guinea—	
		1. Rainfall	1100
		2. General	1100

Monthly Index (Fixed Weights) ..	1233
§ 17. The Australian Balance of Payments—	
Australia's Balance of Payments on Current and Capital Account ..	1234
Australia's Balance of Payments on Current Account—Various Countries ..	1234
Australia's Balance of Payments with the Dollar Area ..	1235
<b>Chapter VIII.—Labour, Wages and Prices—</b>	
A. RETAIL PRICES AND PRICE INDEXES—	
§ 6. Tabular Statements of Retail Price Index-Numbers—	
“C” Series Retail Price Index ..	1236
B. WHOLESALE PRICES AND PRICE INDEXES—	
§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index—	
Index-numbers ..	1237
§ 3. Melbourne Wholesale Price Index—	
Index-numbers ..	1238
D. WAGES—	
§ 2. Rates of Wage and Hours of Labour—	
Weekly Rates of Wage ..	1238
§ 3. Basic Wages in Australia—	
The Commonwealth Basic Wage—	
Basic Wage and Standard Hours Inquiry, 1952-53 ..	1239
Rates Operative ..	1240
State Basic Wage Rates ..	1241
Average Weekly Total Wages Paid and Average Earnings ..	1241
E. EMPLOYMENT—	
§ 1. Employment—	
Wage and Salary Earners in Civilian Employment ..	1242
Government Employees ..	1243
§ 2. Unemployment—	
Unemployment in reporting Trade Unions ..	1243
§ 4. Industrial Disputes—	
Summary of Disputes involving Stoppage of Work ..	1243
<b>Chapter IX.—Population—</b>	
§ 3. Growth and Distribution of Population—	
Growth of Population ..	1243
§ 4. Mean Population—	
Mean Population ..	1244
§ 5. Elements of Increase—	
Natural Increase, Increase by Net Migration and Total Increase ..	1244
§ 9. Oversea Migration—	
Classes of Arrivals and Departures ..	1244
<b>Chapter X.—Vital Statistics—</b>	
§ 1. Marriages, § 2. Fertility and Reproduction, and § 3. Mortality—	
Numbers and Rates ..	1245
§ 1. Marriages—	
Age and Conjugal Condition at Marriage ..	1245
Celebration of Marriages ..	1245
§ 2. Fertility and Reproduction—	
Gross and Net Reproduction Rates for Females ..	1246
Fertility of Marriages ..	1246
Age, Duration of Marriage and Issue of Mothers ..	1246
Nuptial First Births ..	1247
§ 3. Mortality—	
Infant Deaths : Causes of Death ..	1248
Age Distribution ..	1249
Causes of Death ..	1249
<b>Chapter XI.—Education—</b>	
§ 8. Universities—	
Commonwealth Grants ..	1250
<b>Chapter XII.—Public Justice—</b>	
§ 2. Lower (Magistrates') Courts, § 3. Higher (Judges') Courts, § 4. Civil Courts, § 5. Police and Prisons	
Convictions, Bankruptcies, Police, Prisons ..	1251
<b>Chapter XIII.—Public Health and Related Institutions—</b>	
A. PUBLIC HEALTH—	
§ 9. Hospital Benefits Act, § 12. Pharmaceutical Benefits Act, § 13. Pensioner Medical Service—	
Hospital Benefits, Pharmaceutical Benefits, Pensioner Medical Service ; The National Health Act 1953 ..	1251
Medical Benefits ..	1252
B. INSTITUTIONS—	
§ 2. Public Hospitals (other than Mental Hospitals)—	
Number, Staff, etc. ..	1252
§ 4. Mental Hospitals—	
Number, Staff, etc. ..	1253
<b>Chapter XIV.—Welfare Services—</b>	
A. COMMONWEALTH SOCIAL SERVICE BENEFITS—	
§ 2. Commonwealth Expenditure on Social and Health Services	
States ..	1253

I

# OFFICIAL YEAR BOOK

OF THE

## COMMONWEALTH OF AUSTRALIA.

### CHAPTER I.

## DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

### § 1. Early Knowledge and Discovery of Australia.

1. **Introduction.**—The following paragraphs contain only a bare outline of the more important facts relating to the early history of Australian discovery. Previous issues of the Year Book contain a summary of these facts in greater detail, but for a more complete account of this subject, together with bibliographical references thereto, the reader should consult Official Year Book No. 1 (pp. 45-51), bearing in mind the knowledge that the account must be modified somewhat in view of later investigations.

2. **Terra Australis.**—It would appear that there was an early Chaldean tradition as to the existence of an Austral land to the south of India, and rumours to that effect found their way in the course of time to Europe. References to this *Terra Australis* are found in the works of Ælianus (A.D. 205-234), Manilius (probably a contemporary of Augustus or Tiberius Caesar), and Ptolemy (A.D. 107-161). Evidence which might warrant the supposition of knowledge of such a land appeared in maps and manuscripts of the Middle Ages and the fourteenth and fifteenth centuries, but there is no evidence definitely connecting this so-called *Terra Australis* with Australia.

Reference by Marco Polo (1254-1324) to a land called Locac, and several indications on maps and globes in the fifteenth and sixteenth centuries have been supposed to relate to Australia, but little weight can now be attached to these suppositions. Cornelius Wytfliet's map of 1597, however, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria, although the oft-quoted passage in his *Descriptionis Ptolemaicæ Augmentum* describing the *Australis Terra* has been considered to have had its origin in the voyages through the Straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

3. **Discovery of Australia.**—(i) *The Spaniards.* Disregarding the statement that the Arabs had come to Australia long before the Portuguese, Spaniards or the Dutch, for which there is no evidence, and apart from the possibility that the Portuguese may have discovered part of the Australian coast before 1542, the coastal exploration of Australia began with the Spaniards and the Dutch.

In 1606 the Spaniard Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo*. After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course, and passed through the strait that now bears his name. In all probability he sighted the Australian continent, but no mention of it is made in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(ii) *The Dutch.* The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam to explore the islands of New Guinea. During March, 1606 the *Duyfken* coasted along the southern shores of New Guinea, and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again).

During the following thirty years there were nine visits of Dutch navigators to Australian waters; by 1636, through their efforts, the coast of Australia from Cape York westward around to the Great Australian Bight had been discovered.

In 1642 Abel Janszoon Tasman set out from Batavia to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far down as the tropic of Capricorn. This voyage of Tasman's may be said to have ended the period of Dutch discoveries, although there were subsequent visits by the Dutch to Australia (de Vlamingh in 1696 and Van Delft in 1705).

4. *Discoveries by the English.*—In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnets*, a trading vessel whose crew had turned buccaners. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

At the end of the seventeenth century it was a question whether Tasmania and New Zealand were parts of Australia, or whether they were separated from it, but themselves formed part of a great Antarctic Continent. Lieutenant James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Otaheite, had also for its objective to ascertain whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden, carrying about 85 persons, and accompanied by Sir Joseph Banks, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Otaheite, turned towards New Zealand, sighting that land on 7th October, 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Flinders and Bass in 1798.

## § 2. The Annexation of Australia.

1. **Annexation of Eastern Part of Australia, 1770.**—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770 that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession “of the whole eastern coast, from latitude 38° to this place, latitude 10½° S., in right of His Majesty King George the Third.” Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip’s commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the “First Fleet.”

A full historical account of the period referred to may be found in the *Historical Records of New South Wales* Vol. 1., parts 1 and 2.

2. **Original Extent of New South Wales.**—The Commission appointed Phillip “Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south, and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south.”

Although in November, 1769 Captain Cook had taken possession of the North Island of New Zealand, and in January, 1770 also of the South Island, it is a matter of doubt whether, at the time when Captain Phillip’s commission was drawn up, New Zealand was considered as one of the “islands adjacent in the Pacific Ocean.” The facts that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, while in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have unequivocally become British territory until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. **Extension of New South Wales Westward, 1825.**—On 17th February, 1824 Earl Bathurst advised Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824 of the coast from the 135th to the 129th degree of east longitude. On 16th July, 1825 the whole territory between those boundaries was described in Darling’s commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. **Annexation of Western Australia, 1827.**—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George III. Sound, sailed from Sydney on 9th November, 1826, landed at the Sound on 26th December following, and on 21st January, 1827 hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George's Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country," urging its occupation for the purpose of settlement. He left for England in July, 1827, continuing his advocacy—notwithstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being mainly due to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River, in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of "all that part of New Holland, which is not included within the territory of New South Wales." Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

### § 3. The Creation of the Several Colonies.

1. **New South Wales.**—In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not till 1798 that the contrary was known. In that year, by sailing through Bass Strait, Flinders and Bass proved that it was an island. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

2. **Tasmania.**—In 1825 Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

3. **Western Australia.**—The territory westward of the 129th meridian comprising 975,920 square miles was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, though until 1831 the settlement on King George's Sound remained under the latter jurisdiction.

4. **South Australia.**—On 15th August, 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province," and towards the end of the year 1836 settlement took place. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude, and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by the authority of the Imperial Act 24 and 25 Vic., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory comprising 523,620 square miles was, by letters patent, brought under the jurisdiction of South Australia, which therefore controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales, was, by letters patent of 16th November of that year, constituted a separate colony under the powers of the Act 3 and 4 Vic., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851 what was known as the "Port Phillip District" of New South Wales was constituted the colony of Victoria, "bounded on the north and north-west by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia." The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6th June, 1859, although separation from New South Wales was not consummated until 10th December of the same year, upon the assumption of office of the first Governor. The territory comprised in the new colony was so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8' south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition the area of Queensland became 670,500 square miles.

#### § 4. Establishment of the Commonwealth of Australia.

1. **General.**—On 1st January, 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed into that of "States." The total area of the Commonwealth of Australia is 2,974,581 square miles. The dates of creation and the areas of its component parts, as determined on the final adjustment of their boundaries, are shown below :—

#### THE COMMONWEALTH OF AUSTRALIA : AREA, ETC., OF COMPONENT PARTS.

State.	Year of Formation into Separate Colony.	Present Area in Square Miles.	State.	Year of Formation into Separate Colony.	Present Area in Square Miles.
New South Wales(a)	1786	310,372	Tasmania	1825	26,215
Victoria	1851	87,884	Northern Territory	1863	523,620
Queensland	1859	670,500			
South Australia	1834	380,070	Area of the Commonwealth		2,974,581
Western Australia	1829	975,920			

(a) Includes the Australian Capital Territory embracing an area of 911 square miles, and 28 square miles at Jervis Bay. See par. 3 below.

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907 the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory Surrender Act 1907 (assented to on 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the seat of Government of the Commonwealth. In December, 1909 Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the Jervis Bay Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Transfer of British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles.

5. **Transfer of Norfolk Island.**—Although administered for many years by the Government of New South Wales, this Island was a separate Crown Colony until 1st July, 1914, when it was transferred to the Commonwealth under the authority of the Norfolk Island Act 1913. The Island is situated in latitude  $29^{\circ} 3' 30''$  S. longitude  $167^{\circ} 57' 5''$  E., and comprises an area of 8,528 acres.

6. **Territory of New Guinea.**—In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and  $8^{\circ}$  S., and in longitude between  $141^{\circ}$  E. and  $159^{\circ} 25'$  E. The mandate was issued by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the New Guinea Act 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under Trusteeship Agreement with the United Nations, approved 13th December, 1946.

7. **Nauru.**—In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude  $0^{\circ} 32'$  south of the Equator and longitude  $166^{\circ} 55'$  east of Greenwich, and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and a supplementary agreement of 30th May, 1923, giving the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. The administration under the mandate has operated from 17th December, 1920, and so far the administrators have been appointed by the Commonwealth Government. As with the Territory of New Guinea, Nauru is now administered under Trusteeship Agreement with the United Nations.

8. **Territory of Ashmore and Cartier Islands.**—By Imperial Order in Council, dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the north-west coast of Australia, were placed under the authority of the Commonwealth. The islands were accepted by the Commonwealth in the Ashmore and Cartier Islands Acceptance Act 1933 under the name of the Territory of Ashmore and Cartier Islands and were transferred on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the 1933 Act in July, 1938 annexed the islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

9. **Australian Antarctic Territory.**—An Imperial Order in Council of 7th February, 1933 placed under Australian authority "all the islands and territories other than Adélie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude."

The Order came into force with a proclamation issued by the Governor-General on 24th August, 1936, after the Commonwealth Parliament had passed the Australian Antarctic Territory Acceptance Act on 13th June, 1933. The boundaries of Adélie Land were definitely fixed by a decree of 1st April, 1938 as latitude 60° S., longitude 136° E. and longitude 142° E.

10. **Macquarie Island and Heard and McDonald Islands.**—Macquarie Island, about 1,000 miles south-east of Hobart, has been a dependency of Tasmania since the nineteenth century.

Heard and McDonald Islands, about 2,500 miles south-west of Fremantle were transferred from United Kingdom to Australian control as from 26th December, 1947. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard and McDonald Islands by the Heard and McDonald Islands Act 1953.

## § 5. The Exploration of Australia.

A fairly complete, though brief, account of the exploration of Australia was given in Official Year Book No. 2 (pp. 20-39), and a summary of the more important facts relating to the subject was embodied in this Chapter in succeeding issues up to and including No. 22.

## § 6. The Constitutions of the States and of the Commonwealth.

1. **General.**—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to No. 22.

2. **Commonwealth Constitution Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely: "An Act to constitute the Commonwealth of Australia," as amended by the Constitution Alteration (Senate Elections) 1906, the Constitution Alteration (State Debts) 1909, the Constitution Alteration (State Debts) 1928, and the Constitution Alteration (Social Services) 1946 has been included *in extenso* in previous issues, but is omitted from this issue.

There have been no changes in the Constitution since the previous publication thereof in the Year Book.

## CHAPTER II.

### PHYSIOGRAPHY.

#### § 1. General Description of Australia.

1. **Geographical Position.**—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 9' E. and 153° 39' E., while its northern and southern limits are the parallels of latitude 10° 41' S. and 39° 8' S., or, including Tasmania, 43° 39' S. On its north are the Timor and Arafura Seas and Torres Strait—on its south the Southern Ocean and Bass Strait. The extreme points are “Steep Point” on the west, “Cape Byron” on the east, “Cape York” on the north, “Wilson’s Promontory” on the south, or, if Tasmania be included, “South-East Cape.”

(ii) *Tropical and Temperate Regions.* Of the total area of Australia nearly 40 per cent. lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is 23° 30' S., the areas within the tropical and temperate zones are approximately as follows:—

**AUSTRALIA : AREAS OF TROPICAL AND TEMPERATE REGIONS.**  
(Sq. miles.)

Area.	N.S.W. (a)	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total.
Within Tropical Zone ..			359,000		364,000		426,320	1,149,320
,, Temperate Zone ..	310,372	87,884	311,500	380,070	611,920	26,215	97,300	1,825,261
Total Area ..	310,372	87,884	670,500	380,070	975,920	26,215	523,620	2,974,581

(a) Includes Australian Capital Territory.

Fifty-four per cent. of Queensland lies within the tropical zone and 46 per cent. in the temperate zone; of Western Australia, 37 per cent. is tropical and 63 per cent. temperate; of Northern Territory 81 per cent. is tropical and 19 per cent. temperate. All of the remaining States lie within the temperate zone. The tropical part of Australia thus comprises about 39 per cent. of the whole of the continent, and about 53 per cent. of the three territories which have areas within the tropical zone.

2. **Area of Australia compared with Areas of other Countries.**—The area of Australia is almost as great as that of the United States of America, four-fifths of that of Canada, nearly three-fourths of the whole area of Europe, and about 25 times as large as Great Britain and Ireland. The areas of Australia and of certain other countries are shown in the following table.

## AREA OF AUSTRALIA AND OF OTHER COUNTRIES, circa 1950.

(a) Excludes U.S.S.R., shown below.

The areas shown in the table are obtained from the *Demographic Yearbook*, 1951, published by the United Nations and the countries have been arranged in accordance with the continental groups used therein.

3. Areas of States and Territories, Coastal Configurations and Standard Times.—As already stated, Australia consists of six States and the Northern, and Australian Capital, Territories. Particulars of areas, coast-line and standard times are shown in the following table:—

**AUSTRALIA : AREAS OF STATES AND TERRITORIES, COAST-LINE AND STANDARD TIMES.**

State or Territory.	Area.	Proportion of Total Area.	Coast-line.	Area per Mile of Coast-line.	Standard Times.	
					Meridian Selected.	Ahead of G.M.T.
	Sq. miles.	%	Miles.	Sq. miles.		Hours.
New South Wales ..	399,433	10.40	(a) 700	(a) 443	150° E.	10

Total ..	2,974,581	100.00	12,210	244	..	..

(a) Includes Australian Capital Territory.

There are no striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1 an enumeration is given of the features of the coast-line of Australia (*see pp. 60-68*).

Prior to 1895 the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each. In 1894 and 1895, after several conferences had been held, legislation was enacted by each of the colonies whereby the mean solar times of the meridians of east longitude 120° (Western Australia), 135° (South Australia and Northern Territory) and 150° (Queensland, New South Wales, Victoria and Tasmania) were adopted. In 1898, however, the South Australian legislature amended its earlier provision and adopted the mean solar time of the meridian 142° 30' E. longitude as the standard time for that colony. For further information on this subject *see Official Year Book No. 39, page 65*.

4. Geographical Features of Australia.—(i) *General*. The following description is only a broad summarization of the main physical characteristics of the Australian continent. For greater detail of particular geographical elements earlier issues of the Year Book should be consulted. The list of special articles, etc., at the back of this volume indicates the nature of the information available and its position in the various issues.

(ii) *Orography of Australia.* (a) *General Description of the Surface.* Owing to the absence of any very high mountain chains, and to the great depression in the centre of Australia, the average elevation of the Australian continent over the level of the surrounding oceans is less than that of any of the other continents. Three-quarters of the land-mass lies between the 600 and 1,500 feet contours in the form of a huge plateau.

A section through the continent from east to west, at the point of its greatest breadth, shows first a narrow belt of coastal plain. This plain, extending north and south along the whole eastern coast, is well watered by rivers. Of variable width, seldom more than sixty or seventy miles, and occasionally only a few miles, its average may, nevertheless, be taken as about forty to fifty miles. From this, the Great Dividing Range, extending from the north of Queensland to the south of New South Wales, and thence sweeping westward through Victoria, rises often abruptly, and frequently presents bold escarpments on its eastern face. The descent on its western slopes is gradual, until, in the country to the north of Spencer's Gulf, the plain is not above sea-level, and occasionally is even below it. Then there is another almost imperceptible rise until the mountain ranges of Western Australia are reached, and beyond these another coastal plain.

The great central plain or plateau is the most distinctive feature of the Australian continent and its climatic peculiarities are doubtless to be largely ascribed thereto.

(b) *Mountain Systems.* The main mountain feature of Australia is the Great Dividing Range, which runs along the whole eastern coast of the continent and can be traced over the islands of Torres Strait to New Guinea, while in the south one branch sweeps westwards towards the boundary of Victoria and South Australia, and the other—the main branch—finds its termination in Tasmania.

This mountain system is at no place more than 250 miles from the eastern coastline and it approaches to less than 30 miles. On the whole, it is much closer to the coast in both New South Wales and Victoria than it is in Queensland, the corresponding average distances being about 70, 65 and 130 miles respectively.

The mountains of Australia are of relatively small altitude. Thus in Queensland the Great Dividing Range reaches a height above sea-level of less than 5,500 feet, the highest peak being Mount Bartle Frere. In New South Wales Mount Kosciusko is only about 7,300 feet, and Mount Bogong in Victoria about 6,500 feet high. This fact, viz., that there are no high mountains in Australia, is also an important element in considering the climate of Australia.

There is no connexion between the mountains of the eastern and other States of Australia. In South Australia and Western Australia heights of three and four thousand feet are attained. In Tasmania the greatest height is only a little more than 5,000 feet.

It may be of interest to observe that at one time Tasmania was doubtless connected with the mainland. As the Great Dividing Range can in the north be traced from Cape York across Torres Straits to New Guinea, so can its main axis be similarly followed across the shallow waters of Bass Straits and its islands from Wilson's Promontory to Tasmania, which may be said to be completely occupied by ramifications of the chain. The central part of the island is occupied by an elevated plateau, somewhat triangular in shape, and presenting bold fronts to the east, west and north. This does not extend in any direction more than about 60 miles. The plateau rests upon a more extensive tableland, the contour of which closely follows the coastline, and occasionally broadens out into low-lying tracts not much above sea-level. The extreme south of the island is rugged in character.

(iii) *Hydrology of Australia.* (a) *Rainfall.* On the whole, Australia is a country with a limited rainfall. This is immediately evident on studying its river systems, its lakes, and its artesian areas. Its one large river system is that of the Murray and Darling Rivers, of which the former stream is the larger and more important. Many of the rivers of the interior run only after heavy rains. Depending almost entirely on rainfall, a consequence of the absence of high mountains, they drain large areas with

widely varying relation as between rainfall and flow. Thus it has been estimated that not more than 10 per cent. of the rainfall on the "catchment-area" of the Darling River above Bourke (New South Wales) discharged itself past that town. The rate of fall is often very slight.

(b) *Rivers.* The rivers of Australia may be divided into two great classes, those of the coastal plains, with moderate rates of fall and those of the central plains, with very slight fall. Of the former not many are navigable for any distance from their mouths, and bars make many of them difficult of access or inaccessible from the sea.

The two longest rivers of the northern part of the eastern coast are the Burdekin, discharging into Upstart Bay, with a catchment area of 53,500 square miles, and the Fitzroy, which reaches the sea at Keppel Bay and drains about 55,600 square miles.

The Hunter is the largest coastal river of New South Wales, draining about 11,000 square miles before it empties itself at Newcastle. The Murray River, with its great tributary the Darling, drains a considerable part of Queensland, the major part of New South Wales and a large part of Victoria. It debouches into the arm of the sea known as Lake Alexandrina, on the eastern side of the South Australian coast. The total length of the Murray is about 1,600 miles, 400 being in South Australia and 1,200 constituting the boundary between New South Wales and Victoria. The total length of the Darling-Murray from the source of the Darling to the mouth of the Murray is about 2,300 miles. In good seasons the river is navigable for a considerable proportion of its length.

The rivers of the north-west coast of Australia (Western Australia) are of considerable size, e.g., the Murchison, Gascoyne, Ashburton, Fortesque, De Grey, Fitzroy, Drysdale and Ord. So also are those in the Northern Territory, e.g., Victoria and Daly. The former of these, estimated to drain 90,000 square miles, is said to be navigable for 50 miles.

The rivers on the Queensland side of the Gulf of Carpentaria, such as the Gregory, Leichhardt, Cloncurry, Gilbert and Mitchell, are also of considerable size.

Owing to the small amount of fall of many of the interior rivers, they may flood hundreds of miles of country in wet seasons, while in dry seasons they form a mere succession of waterholes or are entirely dry. It is this fact that explains the apparently conflicting reports of the early explorers, one regarding the interior as an inland sea, and another as a desert.

The rivers of Tasmania have short and rapid courses, as the configuration of the territory would indicate.

(c) *Lakes.* The "lakes" of Australia may be divided into three classes, viz.: (a) true permanent lakes; (b) lakes which, being very shallow, become mere morasses in dry seasons or even dry up and finally present a cracked surface of salt and dry mud, and (c) lakes which are really inlets of the ocean, opening out into a lake-like expanse.

The second class (b) is the only one which seems to demand special mention. These are a characteristic of the great central plain of Australia. Some of them, such as Lake Torrens, Gairdner, Eyre and Frome, are of considerable extent.

(d) *Artesian Areas.* A considerable tract of the plain country of New South Wales and Queensland carries a water-bearing stratum, usually at a great depth. A large number of artesian bores have been put down, from which there is a considerable flow. These are of great value and render large areas available which otherwise would be difficult to occupy even for pastoral purposes.

For further information on this subject, see Chapter XXVI.—Water Conservation and Irrigation.

5. *Fauna, Flora, Geology and Seismology of Australia.*—Special articles dealing with these features have appeared in previous issues of the Official Year Book, but limits of space naturally preclude their repetition in each volume. The nature and location of these articles can be readily ascertained from the special index following the index of maps and graphs at the end of this issue.

## § 2. Climate and Meteorology of Australia.\*

1. **Introductory.**—Previous issues of the Official Year Book, notably No. 3, pp.79 and 80, and No. 4, pp. 84 and 87, contained outlines of the history of Australian meteorology and the creation and organization of the Commonwealth Bureau of Meteorology. Official Year Book No. 38, pp. 30-32, contained paragraphs devoted to (i) Organization of the Meteorological Service; (ii) Meteorological Publications; (iii) Equipment; and (iv) Meteorological Divisions.

By reason of its insular geographical position and the absence of striking physical features, whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is, on the whole, more temperate.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little more than 7,300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior is very limited, and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are large areas also which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character. Climatologically, therefore, Australia may be said to present a great variety of features.

2. **Temperature.**—(i) *Effective Temperature.* When a meteorologist speaks of temperature he means the temperature of the air indicated by a thermometer sheltered from precipitation, from direct rays of the sun and from radiation of heat from the ground and neighbouring objects, yet freely exposed to the circulation of the air. In other words, he means temperature measured under conditions standardized as near as possible in a Stevenson Screen, which is the standard housing for meteorological thermometers.

This shade temperature as measured by a "dry bulb" thermometer shows only the actual temperature experienced by dry inorganic substances, not the *sensible* temperatures felt by organic bodies. In the case of human beings, sensible temperature is affected by the rate of conduction of heat to or from the body by moving air and also by the rate of cooling due to evaporation from the skin and respiratory passages. The wind and humidity therefore determine the sensible temperature.

The humidity (relative humidity) is determined from the readings of the dry and wet bulb thermometers. Of late years, however, with increasing interest in human comfort in tropical climates, another term, *effective* temperature, has come into use. It may be defined as "the temperature of a still, saturated atmosphere which would on the average produce the same feeling of warmth or cold as the atmosphere in question".†

Later investigations have established "comfort zones"‡ bounded by limits of effective temperature within which people will feel comfortable. American research workers have determined the following figures§:—

### COMFORT ZONES : EFFECTIVE TEMPERATURES.

Season.	No subjects feel comfortable below—	Fifty per cent. of subjects feel comfortable between—	No subjects feel comfortable above—
Winter .. .. .	60° F.	63° and 71° F.	74° F.
Summer .. .. .	64° F.	66° and 75° F.	79° F.

\* Prepared from data supplied by the Director, Commonwealth Meteorological Bureau.

† Houghton, F. C., Teague, W. W. and Miller, W. E. (1926) Amer. Soc. Heat. Vent. Engrs.

‡ Yaglou, C. P. (1926) J. Industr. Hyg. § Yaglou, C. P. (1927) Ibid.

Isotherms of effective temperature (not corrected for altitude) have been determined for Australia.\* A map showing effective temperature for Australia for January (9 a.m.) will be found on page 33.

It will be seen that the 80° F. isotherm is confined to a very narrow tract of country on the north-west coast of Western Australia. The 75° F. isotherm extends broadly from Onslow on the north-west coast of Western Australia to Daly Waters to Camooweal to Moreton in Cape York Peninsula following in a general way the coastline of Northern Australia but from 100 to 300 miles inland.

Queensland investigators† in recent years have divided some towns of Queensland into three classes on the basis of deviation from comfort :—

Class 1 (Sub-tropics).—Quite suitable for Caucasian habitation—Rockhampton, Bundaberg, Brisbane, Longreach, Charleville.

Class 2 (Marginal tropics).—Suitable for Caucasian habitation, but requires adaptation in summer—Mackay, Townsville.

Class 3 (Tropics).—(a) Permissible for Caucasian habitation but requires selection and marked adaptation—Cardwell, Cairns, Cloncurry. (b) Not suitable for continuous Caucasian habitation—Cape York, Burketown.

These results of recent years bear out investigations made previously in Australia‡ in which the atmospheric vapour pressure was used as a measure of comfort, its value for this purpose being that it has equal effect in both indoor and outdoor climates. The limits of comfort range from .2 to .5 inch of vapour pressure. After drawing isopleths for effective temperature (not corrected for altitude), mean vapour pressure reduced to a logarithmic scale, and mean wet bulb, it is found that there is close agreement in defining zones of relative discomfort.

(ii) *Seasons*. The Australian seasons are :—Summer, December to February ; autumn, March to May ; winter, June to August ; spring, September to November. In most parts of Australia, January is the hottest month, but in Tasmania and southern Victoria, February is the hottest ; in the tropical north, probably because the cooling “ monsoon ” rains occur in late summer, December is the hottest month, and at Darwin, November.

On a rainfall basis, in the tropical north the year is divisible into “ wet ” and “ dry ” seasons, but on the basis of temperatures and physical comfort the “ dry ” season can be further sub-divided into two parts—“ cool dry ” and “ warm dusty ”.§

(a) “ *Cool dry* ” Season. From May to August. The average maximum temperature ranges from 80° to 85° F., the relative humidity is low and in inland areas cold nights are experienced when the temperature drops to 40° F. The skies generally are cloudless, but in about one year in three during June or July one to two inches of rain fall.

(b) “ *Warm dusty* ” Season. From the end of August temperatures rise and reach a maximum in October or the beginning of November. Temperatures of over 120° F. have been recorded.

(c) “ *Wet* ” Season. After the first of the heavy storms, the maximum temperatures fall but still remain high with high relative humidity. At Wyndham during January, 1944 the minimum temperature did not drop below 75° F. for fourteen consecutive days. A maximum of over 100° F. was recorded on each rainless day.

In Central as in Northern Australia during the hottest months, the average temperatures range from 80° to 85° F., whereas in Southern Australia they vary from 65° to 70°.

Throughout Australia the coldest month is July, when only a very narrow strip of the northern sea-board has an average temperature as high as 75°. Over the southern half of the continent, July temperatures range from 55° to 45° at elevations below 1,500

\* Hounam, C. E. *Effective Temp. Data*, C.W.B. unpublished. † Lee, D. H. K. *Trans. Roy. Soc. Trop. Med. and Hyg.* (1940) Vol. XXXII. ‡ Barkley, H. *Zones of Relative Physical Comfort in Australia*, *Met. Bull.* 20, 1934. § Maze, W. H. *Austn. Geog.* June, 1945. *Settlement in E. Kimberleys*.

feet and fall as low as 35° on the Australian Alps. Here the temperature seldom, if ever, reaches 100° even in the hottest of seasons. Hotham Heights (6,100 feet above Mean Sea Level) recorded the highest maximum of 82.0° on 19th January, 1935. In winter, readings slightly below zero are occasionally recorded on the extreme heights.

Tasmania as a whole enjoys a moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° in the eastern part of the State.

(iii) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° F. extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a higher mean annual temperature than 70°.

The extreme range of temperature is less than 100° over practically the whole of Australia, that figure being only slightly exceeded at a very few places; it is mostly 70° to 90° over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° in some localities.

Along the northern shores of Australia the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8.4°, and the extreme readings for the year, or the highest maximum on record and the lowest minimum, show a difference of under 50°.

The highest temperature recorded in Australia was 127.5° F. at Cloncurry on 16th January, 1889. The world's highest (136° F.) was recorded at Azizia (Tripoli) on 13th August, 1922. The lowest temperature ever recorded in Australia was -8° F. at Charlotte Pass on 14th June, 1945, and again on 22nd July, 1947, as contrasted with the world's lowest recorded temperature of -90° F. at Verkhojansk (Siberia) on 5th and 7th February, 1892.

A comparison of the mean temperatures and the range from the extreme maximum to the extreme minimum temperatures (in whole degrees) of the capital cities of Australia with those of the main cities of some other countries is shown in tabular form in Official Year Book No. 38, p. 42.

(iv) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that, in Australia, as in other continents, the range increases, within certain limits, with increasing distance from the coast. This is clearly illustrated by the map of extreme temperature range (page 33).

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° in the shade. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine gold-fields, where the maximum shade temperature during the summer sometimes exceeds 100° continuously for days and weeks. The longest recorded period was 160 days from 31st October, 1923 to 7th April, 1924.

The area affected and the period of duration of the longest heat waves in Australia are shown in the map and diagram on page 34.

(v) *Tabulated Data for Selected Climatological Stations in Australia.* The following tables show normal mean temperature, extreme temperature and normal rainfall for each month for selected climatological stations in each State. For similar data for other selected stations in the Commonwealth, see Official Year Book No. 39, pp. 41-48. Pages 42-48 of this issue contain this information in respect of Canberra and the six State capitals.

(vi) *Frosts.*\* The Observer's Handbook of the Meteorological Office, London, gives the following definition:—"Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.) and a 'ground frost' is regarded as having occurred when the thermometer on the grass has fallen to 30.4° F. or below".

In Australia this definition is adopted for stations equipped with terrestrial minimum thermometers. However, these are few in number, so although many rainfall observers record "hoar frost" when seen, for statistical purposes a screen temperature of 36° F. is taken as indicating light frosts at ground level. For heavy frosts a screen temperature of 32° F. is taken.

In America a "killing" frost is defined as a frost "that is generally destructive of vegetation". A "black frost" is the phenomenon arising out of a combination of low temperature and low humidity causing rupturing of plant cells by expansion, when freezing takes place, of the water which they contain, though frost crystals are not formed on the ground.

The parts of Australia most subject to low temperature are the eastern highlands from about Omeo in Victoria northward to Cambooya and Bybera in Queensland. Most stations in this region experience more than ten nights per month with readings of 32° F. or under for three to five months of the year. In Tasmania, districts on the Central Plateau are subject to such conditions for three to six months of the year. Minimum temperatures of 32° F. are comparatively infrequent in Western Australia except in parts of the south and south-west. In South Australia the Yongala district is much more subject to such temperatures than other parts of the State. Much of the south-east of Queensland has a higher frequency of such readings than South Australia. Generally speaking, the frequency is controlled mainly by altitude, latitude and, to a lesser degree, by proximity to the sea.

Frosts may occur within a few miles of the coastline over the whole continent, except in the Northern Territory and a considerable area of Northern Queensland. Regions subject to frost in all months of the year comprise portions of the tablelands of New South Wales, the Eastern Highlands and parts of the Central Divide and Western district in Victoria, practically the whole of Tasmania and a small area in the south-west of Western Australia.

A map showing the average annual number of frost-free days (i.e. days on which the temperature does not fall below 36° F.) appears on page 35.

Over most of the interior of the continent and on the Highlands in Queensland as far north as the Atherton Plateau frosts appear in April and end in September, but they are infrequent in these months. Minimum temperatures of 32° F. are experienced in most of the sub-tropical interior in June and July.

3. *Humidity.*—After temperature, humidity is the most important element of climate, particularly as regards its effects on human comfort, rainfall supply and conservation and related problems.

\* Foley, J. C. Frost in the Australian Region (Bull. 32, 1945).

In this publication the humidity of the air has been expressed by the relative humidity, which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., are shown in the tables of climatological data for the capital cities (par. 13). The mean monthly vapour pressure has also been added to these tables.

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities consisting as they do of the extremes for each month do not show the normal annual fluctuation which would be approximately midway between the extremes.

The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity diminishes in the order, Sydney, Canberra, Melbourne, Darwin, Hobart, Brisbane, Perth, Adelaide and Alice Springs.

Further reference to humidity will be found in the section on effective temperature (page 13).

4. **Evaporation.**—(i) *General.* The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia the question is, perhaps, of more than ordinary importance, since in its drier regions water has often to be conserved in "tanks" and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (see page 36) which shows that the yearly amount varies from about 20 inches over Western Tasmania to more than 100 inches over the central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and Eucla divisions of Western Australia, during no month of the year does the rainfall exceed the evaporation. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation more than twice as great as their rainfall; it is noteworthy that the vegetation over most of this region is characterized by acacia, semi-desert, shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more they are protected from the direct rays of the sun and from winds by means of suitable tree planting, the less will be the loss by evaporation. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* The map of average annual evaporation in Australia (see page 36) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263.\* Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings, and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula,  $e = 263 \text{ s.d.}$ , is not an exact relationship, but it takes account of one of the major factors in evaporation, i.e., the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have

\* Prescott, J. A. "Atmospheric Saturation Deficit in Australia" (Trans. Royal Society, S.A., Vol. LV., 1931).

been applied accordingly. No evaporation records are available north of latitude 20°, and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (N.T.) and Winton (Q'land), and to a lesser degree Blackall (Q'land) and Marble Bar (W.A.).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

For graphs and tables of mean monthly evaporation and rainfall at certain selected stations see Official Year Book No. 37, pp. 34-35.

5. *Rainfall.*—(i) *General.* The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its geographical features.

Australia lies within the zones of the south-east trades and "prevailing" westerly winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude, and, with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island, upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable, generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall.* The average annual rainfall map of Australia (page 37) shows that the heaviest yearly falls occur on the north coast of Queensland (up to more than 160 inches) and in Western Tasmania (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay (New South Wales) to the northern part of Cape York Peninsula, also around Darwin (Northern Territory), on the West Kimberley coast, near Cape Leeuwin (Western Australia), about the Australian Alps in eastern Victoria and New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall.* Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially

near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania, and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior, but only infrequently and irregularly.

The map showing mean monthly distribution of rainfall over Australia (page 38) gives in graphic form information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Deeral on the north coast-line has an average annual rainfall of 172.26 inches and Tully on the Tully River 179.26 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 144 and 169 inches. The maximum and minimum annual amounts there are:—Deeral, 287.18 in 1945 and 94.65 inches in 1951, or a range of 192.53 inches; Tully, 310.92 in 1950 and 104.98 inches in 1943, or a range of 205.94 inches; Goondi, 241.53 in 1894 and 67.88 inches in 1915, or a range of 173.65 inches; Innisfail, 232.06 in 1950 and 69.87 inches in 1902, or a range of 162.19 inches; Harvey Creek, 254.77 in 1921 and 80.47 inches in 1902, or a range of 174.30 inches.

On five occasions more than 200 inches have been recorded at Goondi, the last of these being in 1950, when 204.97 inches were registered. The records at this station cover a period of 65 years.

In twenty-five years of record Tully has exceeded 200 inches on ten occasions, whilst in a record of 28 complete years Harvey Creek has four times exceeded this figure.

In Tasmania the wettest part is in the West Coast region, the average annual rainfall at Lake Margaret being 145.53 inches, with a maximum of 177.30 inches in 1948.

The driest known part of the continent is in an area of approximately 180,000 square miles surrounding Lake Eyre in South Australia, where the annual average is between 4 and 6 inches and where the fall rarely exceeds 10 inches for 12 months.

Records at stations have at times been interrupted, but of the 23 stations in this region which have an annual average of less than 5 inches, six have complete records extending from 30 to 55 years. Of these Mulka has the lowest average of 4.05 inches (34 years), followed by Troudaninna with an average of 4.15 inches in 42 years. Troudaninna in the period 1893 to 1936 had only one year in which the total exceeded 9 inches (11.07 inches in 1894). There have been protracted periods when the average has even been less than 3 inches. From 1895 to 1903 Troudaninna received the following annual totals:—2.78, 0.99, 5.71, 3.04, 3.18, 2.83, 1.80, 1.11, 4.87, an average of 2.91 inches. From 1918 to 1929 the average was only 2.65 inches, and in this period from December, 1924 to November, 1929 the average was only 1.70 inches.

Mulka since 1918 has only once exceeded 10 inches for the annual total (11.72 inches in 1920), and in 34 years on 16 occasions the annual total has been less than 3 inches. In one particular period from October, 1926 to September, 1930, the average was only 1.26 inches (505 points in 48 months). However, at Kanowana, an even lower four-year average of 1.12 inches was recorded between 1896 and 1899 with yearly totals of 43, 225, 87 and 94 points. An even smaller total than 43 points was recorded at Mungeranie in 1889 when only 39 points was recorded on 5 days.

The average number of rain days per month in this region is only 1-2 and the annual number ranges between 10 and 20. Oodnadatta (standard 30 years' average rainfall equal to 4.44 inches) has an average of 20 days of rain per year, while Cordillo Downs in the extreme north-east corner of the State of South Australia receives 5.16 inches on 12 days per year, averaging about one day of rain each month in the thirty years' period 1911-1940.

No part of the earth, so far as is known, is absolutely rainless, and although at Arica, in northern Chili, the rainfall over a period of 15 years was nil, a further two years in which there were three measurable showers made the "average" for 17 years 0.02 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map (page 37) which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table:—

## AVERAGE ANNUAL RAINFALL DISTRIBUTION.

(Per Cent.)

Average Annual Rainfall.	N.S.W. (a)	Victoria.	Queens- land.	South Australia.	Western Australia.	Tas- mania. (b)	Northern Territory.	Total.

(a) Includes Australian Capital Territory.  
available.

(b) Over an area of 2,777 square miles no records are

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with an average rainfall of 44.80 inches, occupies the chief place; Brisbane, Perth, Melbourne, Hobart, Canberra and Adelaide follow in that order, Adelaide with 21.09 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.46 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected. (See map on p. 38). The figures for Northern Rivers (District 14), show that nearly the whole of the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse, for while the summer months are dry, the winter months are very wet. In the districts containing Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Tables of Rainfall.* The table of rainfall for a fairly long period of years for each of the Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

7. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where also the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciusko and similar localities the snow never entirely disappears after a severe winter.

8. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

9. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have, under anticyclonic conditions, ranged as high as 30.935 inches (at Hobart on 13th July, 1846) and have fallen as low as 27.55 inches. This lowest record was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. For graphs of Mean Barometric Pressure at Capital Cities see Official Year Book No. 37, p. 35.

10. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the "prevailing" westerly winds. As the belt of the earth's atmosphere in which they blow apparently follows the sun's ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months the anticyclonic belt travels in high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The "prevailing" westerly winds retreat a considerable distance to the south of Australia, and are less in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and only operate to the north of the tropics for the greater part of the winter. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from Cape Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, and occasionally penetrate to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence nor regularity of the Indian south-west monsoon but is sufficiently characteristic for the summer in the north of Australia to be called the "North-west Season". In central and eastern Queensland, the north-west monsoon in the summer has comparatively little effect and the trade winds, albeit weakened, are still dominant winds. With the migration of the sun northward in the autumn, the north-west monsoon is itself replaced first by light variable winds and then by the trade winds.

Further particulars of Australian wind conditions and meteorology will be found in Official Year Book No. 38, pp. 58–61.

(iii) *Cyclones and Storms.* The "elements" in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to deep depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, including the coast-line of Victoria, and on the west coast of Tasmania.

Apparently the more violent wind pressures from these disturbances are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east.

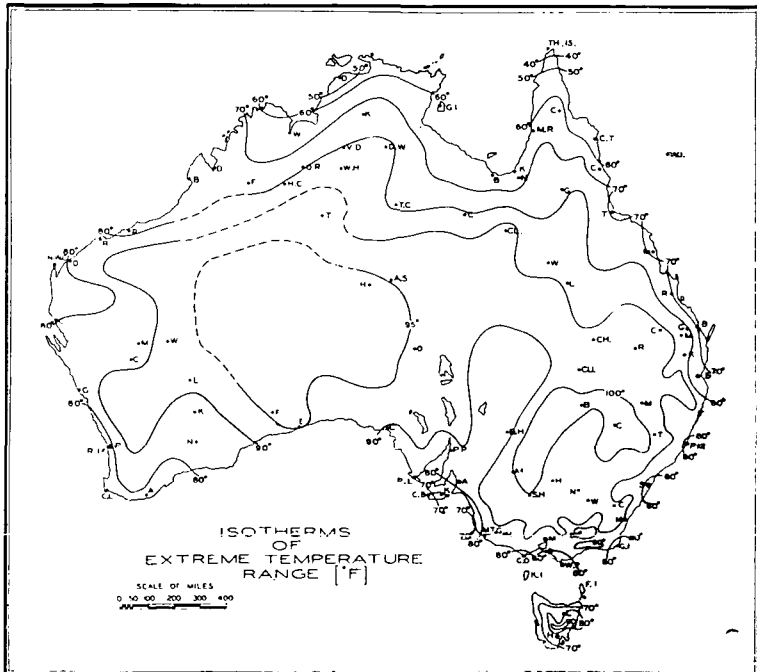

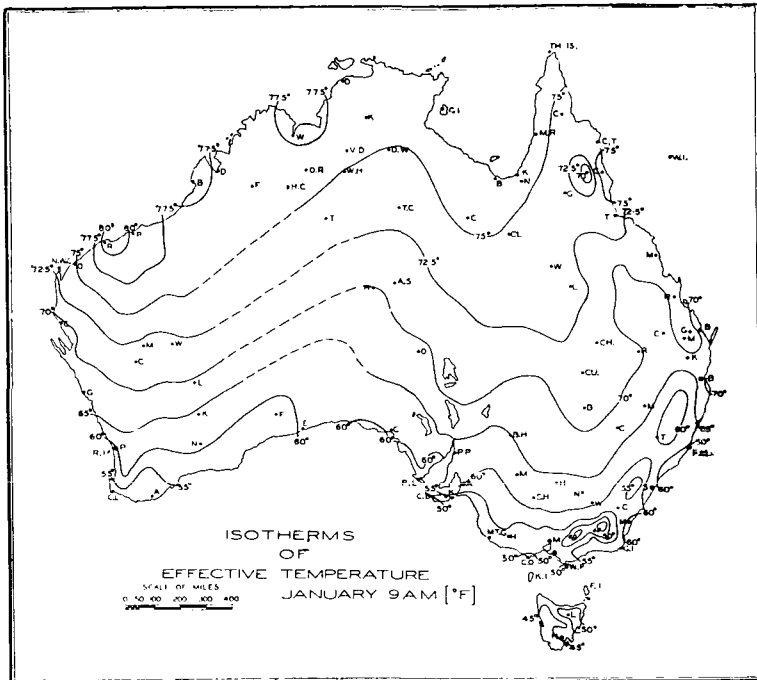

Very severe cyclones, locally known as "willy willies," are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes  $20^{\circ}$  and  $22^{\circ}$  South. The winds in these storms, like those from the north-east tropics, are very violent and destructive. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appear in previous issues of the Official Year Book (*see* No. 6, pp. 84-86), and a special article dealing with "Australian Hurricanes and Related Storms" appears in Official Year Book No. 16, pp. 80-84.

Depressions vary considerably in their isobaric forms, intensity and other characteristics. Some bring rain in variable quantities, some heat and others mainly wind. A common type in southern Australia is the "Λ" shaped trough with an abrupt "backing" of the wind or "line squall" as it passes. The cold front is most frequently found through the centre of the "trough" because it is along this line, and extending into the upper levels of the atmosphere that the demarcation of different air masses is so well defined. The best rains occur in inland Australia when extensive masses of warm moist tropical air move into the interior and are forced to rise by convergence of flow or by impact with a cold air stream.

The speed of low pressure systems is very variable, but in general in southern latitudes the movement is of the order of 500 to 700 miles per day.

11. Influences affecting Australian Climate.—(i) *General*. Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom

subject to frosts, have, with the denudation of the surrounding hills from forests, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forest on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternative periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall has not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

12. *Rainfall and Temperatures, Various Cities.*—The Official Year Book No. 34, p. 28, shows rainfall and temperature for various important cities throughout the world, and for the Australian capitals.

13. *Climatological Tables.*—The averages and extremes for a number of climatological elements, which have been determined from long series of observations at the Australian capitals up to and including the year 1951, are given on pp. 42-48.

NOTE.—The following points apply throughout :—

- (i) Where records are available, mean or average values have been calculated on a standard period of 30 years from 1911 to 1940.
- (ii) Extreme values have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

## CHAPTER III.

### GENERAL GOVERNMENT.

#### § 1. Scheme of Parliamentary Government.

1. **General.**—The legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor, who is the representative of the Sovereign for the State, and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office, and by the instructions which inform him in detail of the manner in which his duties are to be fulfilled. The Legislature in each State was bi-cameral till 1922, in which year the Queensland Parliament became uni-cameral. In the bi-cameral States it consists of (a) a Legislative Council and (b) a Legislative Assembly, or House of Assembly. In Queensland the Legislative Assembly constitutes the legislature. In the Commonwealth Parliament the Upper House is known as the Senate, and in the State Parliaments as the Legislative Council. The Lower House in the bi-cameral Parliaments is known as follows:—in the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. The legislative powers of these Parliaments are delimited by the Commonwealth and the State Constitutions. The Assembly (Queensland as pointed out is uni-cameral) which is the larger House, is always elective, the franchise extending to adult British subjects with certain residential qualifications. The Council in each of the States other than New South Wales is elected by the people of that State, the constituencies being differently arranged and in general, some property or special qualification for the electorate being required. In Victoria, however, under the Legislative Council Reform Act passed in October, 1950, adult suffrage was adopted for Legislative Council elections. In the case of New South Wales, the Council is elected by the members of each House of Parliament at a simultaneous sitting. In the Federal Parliament the qualifications for the franchise are identical for both Houses.

2. **The Sovereign.**—(i) *Death of King George VI. and Proclamation of Queen Elizabeth II.* On 7th February, 1952 the Prime Minister announced that the Governor-General had directed the notification, for general information, of the intelligence of the death of His Majesty King George the Sixth on 6th February, 1952.

On 7th February, 1952 the Governor-General and members of the Federal Executive Council proclaimed Princess Elizabeth Queen Elizabeth the Second, Queen of this Realm and of all her other Realms and Territories, Head of the Commonwealth, Defender of the Faith, Supreme Liege Lady in and over the Commonwealth of Australia.

(ii) *Royal Style and Titles Act 1953.* The Statute of Westminster, 1931 stated that it would be in accord with the established constitutional position of members of the British Commonwealth of Nations that any alteration in the law regarding the Royal Style and Titles should thereafter require the assent of the Parliaments of the Dominions in addition to that of the Parliament of the United Kingdom.

At the conference of Prime Ministers and other representatives of the British Commonwealth in London in December, 1952 it was agreed that the Royal Style and Titles then in use were not in accord with current relationships within the British Commonwealth and that there was need of a new form which would, in particular, "reflect the special position of the Sovereign as Head of the Commonwealth".

It was therefore decided that each member of the British Commonwealth should use a form of the Royal Style and Titles suited for its own circumstances, while retaining as a common element the description "Queen of Her other Realms and Territories and Head of the Commonwealth"; and that consultation between all countries of the Commonwealth should take place on any future proposal to change the form of the Royal Style and Titles used in any country.

To give effect to these decisions in Australia the Royal Style and Titles Bill was introduced in the House of Representatives on 28th February, 1953, and enacted on 3rd April, 1953. The Act gives Parliament's assent to the adoption by the Queen, for use in relation to the Commonwealth of Australia and its Territories, of the following Royal Style and Titles:—"Elizabeth the Second, by the Grace of God of the United Kingdom, Australia and Her other Realms and Territories Queen, Head of the Commonwealth, Defender of the Faith." The Act also approves the adoption by the Queen of a Royal Style and Titles for use in relation to other countries of the British Commonwealth, in accordance with the principles formulated at the London conference.

**3. Powers and Functions of the Governor-General and of the State Governors.**—A detailed statement of the powers and functions of the Governor-General and of the State Governors appears in preceding issues of the Official Year Book (*see* No. 18, pp. 78–80). For the names of the Governors-General since the inception of the Commonwealth and of the present State Governors, *see* § 3. following.

**4. The Cabinet and Executive Government.**—(i) *General.* Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (Her Majesty the Queen, and her representative, the Governor-General or Governor) should perform Governmental acts on the advice of her Ministers; that she should choose her principal Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates by means, chiefly, of constitutional conventions, customs or understandings, and of institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

Formally, the executive power is vested in the Commonwealth in the Governor-General, and in the States in the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by the Ministers of State, meeting, without the Governor-General or Governor, under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, all Ministers are members of the Cabinet. As Ministers are the leaders of the party or parties commanding a

majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State are *ex officio* members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings; for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form; appointments made; resignations accepted; proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the Queen's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. Australian practice follows, broadly, that of the United Kingdom. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the *Official Year Book* (see No. 6, p. 942). It may be added, however, that subsequent legislation has, in most of the States, obviated the necessity of responsible Ministers vacating their seats in Parliament on appointment to office.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in December, 1952:—

AUSTRALIAN PARLIAMENTS : MINISTERS IN UPPER OR LOWER HOUSES, DECEMBER, 1952.

The Upper House ..	5	1	4	(a)	2	2	..	14
The Lower House ..	15	14	10	11	4	8	9	71
Total ..	20	15	14	11	6	10	9	85

(a) Abolished in 1922.

For the names of the occupants of ministerial office in each of the Parliaments of Australia in December, 1952, see § 3. of this chapter. Subsequent changes of importance in Ministries will be found in the Appendix to this volume.

(vi) *Numbers and Salaries of Commonwealth Ministers.* Under sections 65 and 66, respectively, of the Constitution of the Commonwealth, the number of Ministers of State was not to exceed seven, and the annual sum payable for their salaries was not to exceed £12,000, each provision to operate, however, "until the Parliament otherwise provides."

Subsequently, number and salaries were increased to 8—£13,650 (1915) and to 9—£15,300 (1917). During the period of financial emergency in the early thirties the ministerial salary appropriation was reduced as low as £10,710 a year, and was not restored to its former level until 1938. During the period of restoration of salary the number of Ministers was increased to 10 (1935). Later increases were as follows:—to 11—£18,600 (1938); 19—£21,250 (1941)—these increases were war-time provisions, extended into peacetime in 1946; £27,650 (1947—number unaltered); 20—£29,000 (1951); £41,000 (1952—number unaltered). In 1938 an additional ministerial allowance of £1,500 a year was granted to the Prime Minister; this was increased to £3,500 a year (exempt from income tax) in 1952 and at the same time an additional ministerial allowance of £1,000 a year (exempt from income tax) was granted to each other Minister.

All amounts payable in the foregoing paragraphs are in addition to amounts payable as Parliamentary allowances (*see* pars. 5 and 6 below).

5. **Number and Salary of Members of the Legislatures, Australian Parliaments, October, 1952.**—The following table shows the number and annual salary of members in each of the legislative chambers in October, 1952:—

**AUSTRALIAN PARLIAMENTS: MEMBERS AND ANNUAL SALARIES,  
OCTOBER, 1952.**

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
NUMBER OF MEMBERS.								
Upper House ..	60	60	34	(d)	20	30	19	223
Lower House ..	123	94	65	75	39	50	30	476
Total ..	183	154	99	75	59	80	49	690
ANNUAL SALARY. (£.)								
Upper House ..	(a) 1,750	(b) 500	(c) 1,050	(d)	(e) 1,150— 1,225	(f) 1,000	(g) 800— 1,050	..
Lower House ..	(a) 1,750	b, 1,875	(c) 1,050	1,375	(e) 1,150— 1,225	(f) 1,000	(g) 850— 1,050	..

(a) Plus expense allowances exempt from income tax—Senators, £550; Members of House of Representatives, £400—£900, varying with electoral divisions. *See also* par. 6 following. (b) Increased from £300 (Upper House) and £1,375 (Lower House) as from January, 1952. (c) Subject to automatic adjustment in accordance with variations in the cost of living. Plus £100 for urban and country electorates (i.e., excluding Metropolitan Electoral Districts and Provinces). (d) Abolished in 1922. (e) According to distance of electorate from Adelaide. Increased from £900—£975 from 1st July, 1951. (f) Subject to adjustment in accordance with variations of the State basic wage. Plus £50 where any part of electorate is more than 50 miles from Perth. (g) According to area of electorate and distance from the capital. Plus a cost of living adjustment.

Parliamentary salaries affected by cost of living adjustments (i.e., in the States of Victoria, Western Australia and Tasmania) have thereby been brought roughly into line with those of Queensland and South Australia.

6. **Commonwealth Parliamentary Allowances.**—(i) *General Allowance.* Section 48 of the Commonwealth Constitution granted to each Senator and member of the House of Representatives an allowance of £400 a year until Parliament should decide to alter it. The first alteration was made in 1907, when the allowance was increased to £600 for all except the holders of Parliamentary office (i.e., Ministers, and the Presiding Officer and Chairman of Committees of each House), whose allowances in addition to the emoluments of office remained at £400 a year. In 1920 the general allowance was increased to £1,000 a year and the allowance to holders of office to £800 a year. Under financial emergency legislation Parliamentary salaries and allowances were reduced generally, the lowest

level reached for the general allowance being £750 in 1932. Subsequently there was a gradual restoration to former levels, the allowance reaching £1,000 a year again in 1938, when the provision for the reduced allowance for holders of Parliamentary office was removed. In 1947 the general allowance was increased to £1,500 and in 1952 to £1,750 a year.

(ii) *Additional Allowances.* (a) *Holders of Parliamentary Office.* Amounts received by the holders of Parliamentary office in respect of the duties they perform are additional to the allowances to each Senator and member of the House of Representatives as described above. Appropriations for ministerial salaries are referred to in par. 4 (vi) above, but the amounts received because of their duties of office by the President of the Senate, the Speaker of the House of Representatives and the Chairman of Committees in each House are not included in these appropriations.

In 1901-2 the Presiding Officer of each House received £1,100 a year and the Chairmen of Committees each £500 a year. Before the depression years these amounts had been increased to £1,300 and £700 respectively, but, in common with other Parliamentary salaries and allowances, they were reduced during this period, and in 1933-34 were as low as £900 and £500 a year. Following the gradual restoration to previous levels, they remained unchanged until 1947-48, when they were increased to £1,600 and £900 respectively. In 1952 the allowance to the President of the Senate and to the Speaker of the House of Representatives was increased to £1,750 a year each.

(b) *Other Additional Allowances.* In 1920 the Leaders of the Opposition in the Senate and in the House of Representatives were granted additional allowances of £200 a year and £400 a year respectively. These were increased to £300 and £600 in 1947 and to £750 and £1,750 in 1952. In 1947, also, the Leader in the House of Representatives (other than the Leader—and in 1952 the Deputy Leader—of the Opposition) of a recognized political party with not less than ten members in that House and of which none is a Minister received an additional allowance of £400 a year. This was increased to £500 in 1952.

Further additional annual allowances, all of which were granted in 1952, are as follows:—

Deputy Leader of the Opposition in the House of Representatives, £750 ;  
Government Whip in the House of Representatives, £325 ; Other Whips, £275.

Additional allowances (exempt from income tax) for expenses of discharging duties.—Payable to each Senator—£550 ; payable to each Member of the House of Representatives—£400—£900, varying with electoral divisions.

Additional allowances (exempt from income tax) for expenses of discharging duties of Office.—President of the Senate, Speaker of the House of Representatives, Leader of the Opposition in the Senate, and Deputy Leader of the Opposition in the House of Representatives—£250 ; Leader of the Opposition in the House of Representatives—£1,000.

7. *Enactments of the Parliament.*—In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly or House of Assembly. The Governor-General or the State Governor acts on behalf of, and in the name of, the Sovereign, in assenting to Bills passed by the Legislatures, but he may reserve them for the special consideration of the Sovereign. In the States the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

## § 2. Parliaments and Elections.

1. **Commonwealth.**—(i) *Qualifications for Membership and for Franchise—Commonwealth Parliament.* Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age and not disentitled on racial or other ground, who has lived in Australia for six months continuously. Residence in a sub-division for a period of one month prior to enrolment is necessary to enable a qualified person to enrol. Enrolment and voting are compulsory. A British subject member of the Defence Force of the Commonwealth on active service is entitled to vote at Commonwealth elections whether enrolled or not, and, if he is serving or has served outside Australia, irrespective of age.

Disqualification of persons otherwise eligible as members of either Commonwealth House is mainly on the grounds of membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown with certain exceptions, or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than 25 persons. Excluded from the franchise are persons of unsound mind, attainted of treason, convicted and under sentence for any offence punishable by imprisonment for one year or longer, or of certain non-European races. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise.

(ii) *Commonwealth Parliaments and Elections.* From the establishment of the Commonwealth until 1949 the Senate consisted of 36 members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament and, as the population of the Commonwealth had more than doubled since its inception, the Parliament enacted legislation in 1948 enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation. Thus the Representation Act 1948 provides that there shall be ten Senators from each State instead of six, increasing the total to 60 Senators. To effect this transition in the Senate, seven Senators were elected from each State at the elections of 1949, four taking office immediately the Senate sat after the election, the remaining three commencing their term on the usual date—1st July, 1950. Members of this Chamber are normally elected for the term of six years, but half the members retire at the end of every third year, although they are eligible for re-election. Accordingly, at each future periodical election of Senators, five Senators will normally be elected in each State, making 30 to be elected at each such election.

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Correspondingly, in terms of the Constitution and the Representation Act 1905–38, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows:—New South Wales—from 28 to 47; Victoria—20 to 33; Queensland—10 to 18; South Australia—6 to 10; Western Australia—5 to 8; Tasmania—5, no increase; total—74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by the Distribution Commissioners in each State on a quota basis, but taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and sub-divisions, and State electoral boundaries.

Since the general elections of 1922 the Northern Territory has been represented by one member in the House of Representatives. The Australian Capital Territory Representation Act 1948 gave similar representation to the Australian Capital Territory

as from the elections of 1949. The members for the Territories may join in the debates but are not entitled to vote, except on a motion for the disallowance of any ordinance of the Territory or on any amendment to such motion. The Commonwealth Parliament, however, when providing for a Legislative Council for the Northern Territory in 1947, relinquished the power to disallow ordinances for that Territory.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators, the whole State constitutes the electorate. For the purposes of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book.

There have been nineteen complete Parliaments since the inauguration of Federation. Until 1927 the Parliament met at Melbourne; it now meets at Canberra, the first meeting at Parliament House, Canberra, being opened by the late King George VI., then Duke of York, on 9th May, 1927.

The fifth Parliament, which was opened on 9th July, 1913, was dissolved on 30th July, 1914 in somewhat unusual circumstances, when, for the first time in the history of the Commonwealth, a deadlock occurred between the Senate and the House of Representatives, and, in accordance with Section 57 of the Constitution which provides for such an eventuality, both Houses were dissolved by the Governor-General. The nineteenth Parliament was similarly dissolved. It opened on 22nd February, 1950, but on 19th March, 1951, in its first session, a double dissolution was proclaimed for the second time since the inception of the Commonwealth.

Particulars of the ensuing elections for Australia as a whole are given below. For State details see Official Year Book No. 39, page 71.

COMMONWEALTH ELECTION, 28th APRIL, 1951.

House.	Electors Enrolled.			Electors who Voted.			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
Senate	2,438,621	2,524,054	4,962,675	2,352,640	2,411,275	4,763,915	96.47	95.53	95.99
House of Representatives (a)	2,391,984	2,475,729	4,867,713	2,306,543	2,364,872	4,671,415	96.43	95.52	95.97

(a) Contested electorates only.

There were 339,678 informal votes (7 per cent.) cast for the Senate election and 88,671 (2 per cent.) for the House of Representatives election.

The twentieth Parliament opened on 12th June, 1951.

The system of voting for the House of Representatives is preferential, and for the Senate, since the passing of the Commonwealth Electoral Act 1948, proportional representation. Previously it also had been preferential. The Commonwealth Electoral Act 1948, introduced with the Representation Act 1948 to enlarge the Commonwealth Parliament (see page 54), changed the system of scrutiny and counting of votes in Senate elections from preferential to that of proportional representation. For a description of the system, see Official Year Book No. 38, pp. 82-3.

For particulars of electors enrolled and of electors who voted at the various Commonwealth elections, see earlier Year Books, and for particulars of the 1953 Senate election see Appendix to this volume.

(iii) *Commonwealth Referenda.* (a) *General.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution must, in addition to being passed by an absolute majority of each House of Parliament, be submitted to a referendum of the electors in each State, and must further be approved by a majority of the States and of the electors who voted, before it can be presented for Royal Assent. So far 23 proposals have been submitted to referenda and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referenda and the voting thereon were given in previous issues of the Official Year Book (see No. 18, p. 87, No. 31, p. 67, No. 35, p. 60, No. 36, p. 61, No. 37, pp. 64-5 and No. 38, p. 84).

(b) *Constitution Alteration (Powers to deal with Communists and Communism) Referendum, 22nd September, 1951.* Details of the voting in this referendum, which resulted in an overall majority and majorities in three States against the proposed amendment, were as follows:—

**CONSTITUTION ALTERATION (POWERS TO DEAL WITH COMMUNISTS AND COMMUNISM) REFERENDUM, 22nd SEPTEMBER, 1951.**

State.	Votes Recorded in Favour of Proposed Law.		Votes Recorded Against Proposed Law.		Number of Informal Ballot-papers.	Total.
	Number.	Percentage.	Number.	Percentage.		
New South Wales ..	865,838	47.2	969,868	52.8	25,441	1,861,147

Total ..	2,317,927	49.4	2,370,009	50.6	66,653	4,754,589

2. *State Elections.*—(i) *Latest in each State.* (a) *Upper Houses.* The following table shows particulars of the voting at the most recent elections for the Upper Houses or Legislative Councils in the States of Victoria, South Australia and Western Australia. In New South Wales the electorate for the Legislative Council comprises the members of both Houses, in Queensland there has been no Legislative Council since 1922, and in Tasmania three members of the Council are elected annually (but four in each sixth year) and the Council cannot be dissolved as a whole.

**STATE UPPER HOUSE ELECTIONS.**

(a) Approximate. (b) Not available.

For particulars of Lower House elections in 1952 and 1953 see Appendix to this volume, which also shows the dates of dissolutions and openings of Parliament which have occurred since those recorded in the following paragraphs.

(ii) *Elections in Earlier Years.* Official Year Book No. 38 and earlier issues contain particulars of the voting at elections for both Upper and Lower State Houses in years prior to those shown above, and some general information is given in the following paragraphs.

3. *The Parliament of New South Wales.*—The Parliament of New South Wales consists of two Chambers, the Legislative Assembly and the Legislative Council. By legislation assented to in July, 1949, the Assembly was enlarged from 90 to 94 members, elected in single-seat electoral districts, who hold their seats during the existence of the Parliament to which they are elected. The duration of Parliament is limited to three years and by legislation enacted in 1950 cannot be extended beyond that period except with the approval of electors by referendum. Until 1934 the Council was a nominee Chamber, consisting of a variable number of members appointed for life without remuneration, but as from 23rd April, 1934 it was reconstituted and became a House of 60 members to serve without remuneration for a term of twelve years, with one-quarter of the members retiring every third year. As from 1st September, 1948, however, members of the Council have been paid an allowance, now £500 a year. The electorate comprises members of both Chambers, who vote as a single electoral body at simultaneous sittings of both Chambers.

Any person who is an elector entitled to vote at a Legislative Assembly election, or a person entitled to become such elector, and who has been for at least three years resident in Australia, and who is a natural-born or naturalized subject of the Queen, is capable of being elected to the Legislative Council. For the Council franchise an elector must be, for the time being, a Member of the Legislative Council or a Member of the Legislative Assembly. Every person qualified to vote at a Legislative Assembly election for any electoral district in New South Wales is qualified to be elected as a Member for that or any other district. Every person not under twenty-one years of age, who is a natural-born or naturalized subject of the Queen, and who has lived in Australia for at least six months continuously, and in New South Wales for at least three months, and in any subdivision for at least one month immediately preceding the date of claim for enrolment, is entitled to enrolment as an elector for the Legislative Assembly. Persons are disqualified either as members or voters for reasons generally the same as those outlined on page 54.

Since the introduction of responsible government in New South Wales there have been 35 complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-fifth was dissolved on 22nd May, 1950. The thirty-sixth Parliament opened on 12th July, 1950.

The elections of 1920, 1922 and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at the later appeals to the people. The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election. The franchise was extended to women (Women's Franchise Act) in 1902, and was exercised by them for the first time in 1904.

4. **The Parliament of Victoria.**—Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, and there was also, until the Legislative Council Reform Act 1950, in the qualifications necessary for members and electors. The number of members in the Upper House is 34, and in the Lower House, 65. In the Legislative Council the tenure of the seat is for six years, except that one-half of the members who are elected for provinces at any general election for the Council are entitled to hold their seats for a period of only three years, one member for each of the seventeen provinces retiring every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years.

Prior to the passing of the Act just referred to, which operated from November, 1951, there were property qualifications required for membership of, and franchise for, the Legislative Council. As alternatives to the property qualifications for the Council franchise, certain professional and academic qualifications were also allowed. As amended, however, the qualifications for membership of the Council are possessed by any adult natural-born subject of the Queen, or by any adult alien naturalized for five years and resident in Victoria for two years. Entitlement for enrolment as an elector is extended to every adult natural-born or naturalized subject who has resided in Australia for at least six months continuously and in Victoria for at least three months and in any subdivision for at least one month immediately preceding the date of claim for enrolment. These qualifications for membership and electors apply also in respect of the Legislative Assembly. Reasons for disqualification follow the general pattern for Australia (*see page 54*).

Since the introduction of responsible government in Victoria there have been 37 complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the thirty-seventh was dissolved on 13th April 1950. The thirty-eighth Parliament was opened on 20th June, 1950.

Single voting is observed in elections held for either House, plurality of voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937. A preferential system of voting (*see Official Year Book No. 6, p. 1182*) was adopted for the first time in Victoria at the election held in November, 1911. Compulsory voting was first observed at the 1927 elections for the Legislative Assembly, and at the 1937 elections for the Legislative Council. The franchise was extended to women by the Adult Suffrage Act 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

5. **The Parliament of Queensland.**—As stated previously, the Legislative Council in Queensland was abolished in 1922, the date of Royal Assent to the Act being 23rd March, 1922. The Legislative Assembly is composed of 75 members, each elected for a period of three years and each representing an electoral district.

Any person qualified to be enrolled for any electoral district is qualified for election to the Legislative Assembly. Any person of the age of twenty-one years, who is a natural-born or naturalized British subject with continuous residence within Australia for six months, in Queensland for three months, and in an electoral district for one month prior to making a claim for enrolment, is qualified to enrol as an elector. The classes of persons not qualified to be elected are similar to those for other Australian Parliaments (*see page 54*).

Under the Electoral Districts Act of 1949 the number of members and the number of electorates were increased from 62 to 75, and the increase became effective from the beginning of the thirty-second Parliament, elected in 1950. The Act divided the State into four zones, and a commission of three appointed by the Governor-in-Council completely distributed the prescribed zones into the number of electoral districts, taking into account community or diversity of interest, means of communication, physical features, boundaries of Petty Sessions Districts and of areas of Local Authorities.

Since the establishment of responsible government in Queensland there have been 31 complete Parliaments, the last of which was dissolved on 27th March, 1950. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly, the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date, but he duly attended on 29th May, 1860, and delivered the Opening Address. The thirty-second Parliament was opened on 1st August, 1950.

At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. The election of 1907 was the first State election in Queensland at which women voted, the right being conferred under the Elections Acts Amendment Act 1905. In 1942 the system of preferential voting was abolished and that of election of the candidate obtaining the highest number of votes in the electorate now operates.

6. **The Parliament of South Australia.**—In this State there is a Legislative Council composed of twenty members and a House of Assembly with 39 members, both Chambers being elective. For the Legislative Council the State is divided into five districts each returning four members, two of whom retire alternately, the term of office being six years. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were 46 members representing nineteen districts. The duration of the House of Assembly is three years.

Any person who is at least thirty years of age, is a British subject or legally made a denizen of the State and who has resided in the State for at least three years is qualified for membership in the Legislative Council. Qualifications for the Council franchise are that a person is at least twenty-one years of age, a British subject, an inhabitant of the State with residence for at least six months prior to the registration of the electoral claim, and that he or she has had certain war service, or possesses property qualifications relating to ownership, leaseholding, or inhabitant occupancy. Any person qualified and entitled to be registered as an elector for the House of Assembly is qualified and entitled for election as a member of that House. Qualifications for enrolment as an elector for the House of Assembly are that a person is at least twenty-one years of age, is a British subject, and has lived continuously in Australia for at least six months, in the State for three months and in an Assembly subdivision for one month immediately preceding the date of claim for enrolment. Provisions in the Constitution for disqualification from membership or from the franchise in respect of either House follow the usual pattern for Australia (see page 54).

Since the inauguration of responsible government in South Australia there have been 32 complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-second Parliament was opened on 26th June, 1947, and expired on 28th February, 1950. The thirty-third Parliament was opened on 28th June, 1950. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the Constitution (Quinquennial Parliament) Act 1933, but this Act was repealed by the Constitution Act Amendment Act (No. 2) 1939, and the three-year term was reverted to.

South Australia was the first of the States to grant women's suffrage (under the Constitution Amendment Act 1894), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly, provided for by the Electoral Act Amendment Act 1942, was first observed at the 1944 election. A system of preferential voting is in operation.

7. **The Parliament of Western Australia.**—In this State both Chambers are elective. For the Legislative Council there are 30 members, each of the ten provinces returning three members, one of whom retires biennially. At each biennial election the member elected holds office for a term of six years, and automatically retires at the end of that period. The Legislative Assembly is composed of 50 members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

Since the establishment of responsible government in Western Australia there have been nineteen complete Parliaments, the first of which was opened on 30th December, 1890. The nineteenth Parliament was opened on 31st July, 1947, and expired on 31st January, 1950. The twentieth Parliament was opened on 27th July, 1950. The preferential system of voting in use in Western Australia is described in Official Year Book No. 6, p. 1184.

Qualifications required for membership of the Legislative Council are the age of 30 years, residence in Western Australia for two years, being a natural-born British subject or naturalized for five years prior to election and resident in the State for that period, and freedom from legal incapacity. Qualifications required for Council franchise are the age of twenty-one years, residence in Western Australia for six months, being a natural-born British subject or naturalized for twelve months, freedom from legal incapacity, and certain property qualifications relating to freehold, leasehold, or householder occupancy. Qualifications required for membership of the Legislative Assembly are the age of twenty-one years, residence in Western Australia for twelve months, being a natural-born British subject or naturalized for five years and resident in the State for two years prior to election, and freedom from legal incapacity. Qualifications required for the franchise are the age of twenty-one years, residence in Western Australia for six months and in an electoral district continuously for three months, and being a natural-born or naturalized British subject. Persons may be disqualified as members or voters for reasons similar to those for other Australian Parliaments (*see* page 54).

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939.

8. **The Parliament of Tasmania.**—In Tasmania there are two legislative Chambers—the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the Constitution Act 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. Prior to the 1946 Act there were eighteen members elected from fifteen divisions, of which Hobart returned three members and Launceston two. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning six members elected under a system of proportional representation which first came into force at the 1909 elections (*see* Official Year Book No. 6, p. 1185). The life of the Assembly was extended from three to five years by the Constitution Act 1936.

Persons qualified for election to the Legislative Council must be 25 years of age and qualified to vote as Council electors, have been resident in Tasmania for a period of five years at any one time or at least two years immediately preceding the election, and be natural-born subjects of the Queen or naturalized for at least five years. Electors for the Council must be twenty-one years of age, natural-born or naturalized subjects and resident in Tasmania for a period of twelve months, with certain freehold or occupancy, property qualifications or with certain academic, professional, defence force, or war service qualifications. For the House of Assembly members must be twenty-one years of age, have been resident in Tasmania for a period of five years at any one time or for a period of two years immediately preceding the election, and be natural-born subjects

of the Queen or naturalized for a period of five years. Electors must be twenty-one years of age, natural-born or naturalized subjects and resident in Tasmania for a period of six months continuously. Reasons for disqualification of members or voters are similar to those for other Australian Parliaments (see page 54).

The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been 29 complete Parliaments since the inauguration of responsible government. The thirtieth Parliament was opened on 7th June, 1950.

The suffrage was granted to women under the Constitution Amendment Act 1903 and compulsory voting for both Houses came into force on the passing of the Electoral Act in 1928. The system of voting is proportional representation by single transferable vote.

9. Superannuation Funds of the Parliaments of the Commonwealth and of the Australian States.—(i) *General*. In Official Year Book No. 38 there is a conspectus of Superannuation Funds of the Parliaments of the Commonwealth and of the five States (New South Wales, Victoria, Queensland, South Australia and Western Australia) in which such schemes operate (see pp. 91-9). This conspectus summarized the main features of each fund as at 30th June, 1949. Although the schemes are still essentially as described in the conspectus, there have subsequently been several amending Acts providing for extensions or increases in benefits, increased contributions, etc., in some of the schemes. The Commonwealth Retiring Allowances Act 1952 provided *inter alia* for additional benefit of £1,200 a year, subject to certain conditions, to a retired Prime Minister, and in case of his death, additional benefit of £750 a year to his widow.

(ii) *Finances*. For particulars of the financial operations of these schemes see Chapter XVI.—Private Finance of this volume.

### § 3. Administration and Legislation.

1. *The Commonwealth Parliaments*.—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by His Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since Federation :—

#### COMMONWEALTH PARLIAMENTS.

Number of Parliament.	Date of Opening.	Date of Dissolution.
First .. .. .	9th May, 1901 .. .. .	23rd November, 1903
Second .. .. .	2nd March, 1904 .. .. .	5th November, 1906
Third .. .. .	20th February, 1907 .. .. .	19th February, 1910
Fourth .. .. .	1st July, 1910 .. .. .	23rd April, 1913
Fifth .. .. .	9th July, 1913 .. .. .	30th July, 1914(a)
Sixth .. .. .	8th October, 1914 .. .. .	26th March, 1917
Seventh .. .. .	14th June, 1917 .. .. .	3rd November, 1919
Eighth .. .. .	26th February, 1920 .. .. .	6th November, 1922
Ninth .. .. .	28th February, 1923 .. .. .	3rd October, 1925
Tenth .. .. .	13th January, 1926 .. .. .	9th October, 1928
Eleventh .. .. .	9th February, 1929 .. .. .	16th September, 1929
Twelfth .. .. .	20th November, 1929 .. .. .	27th November, 1931
Thirteenth .. .. .	17th February, 1932 .. .. .	7th August, 1934
Fourteenth .. .. .	23rd October, 1934 .. .. .	21st September, 1937
Fifteenth .. .. .	30th November, 1937 .. .. .	27th August, 1940
Sixteenth .. .. .	20th November, 1940 .. .. .	7th July, 1943
Seventeenth .. .. .	23rd September, 1943 .. .. .	16th August, 1946
Eighteenth .. .. .	6th November, 1946 .. .. .	31st October, 1949
Nineteenth .. .. .	22nd February, 1950 .. .. .	19th March, 1951(a)
Twentieth .. .. .	12th June, 1951 .. .. .	.. .. .

(a) A dissolution of both the Senate and the House of Representatives granted by the Governor-General, acting on the advice of the Ministry, and under Section 57 of the Constitution.

2. **Governors-General and Commonwealth Ministries.**—(i) *Governors-General.* The following statement shows the names of the Governors-General since the inception of the Commonwealth :—

GOVERNORS-GENERAL.

- Rt. Hon. JOHN ADRIAN LOUIS, EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), K.T., G.C.M.G., G.C.V.O. From 1st January, 1901 to 9th January, 1903.
- Rt. Hon. HALLAM, BARON TENNYSON, G.C.M.G. From 17th July, 1902 to 9th January, 1903 (Acting).
- Rt. Hon. HALLAM, BARON TENNYSON, G.C.M.G. From 9th January, 1903 to 21st January, 1904.
- Rt. Hon. HENRY STAFFORD, BARON NORTHCOTE, G.C.M.G., G.C.I.E., C.B. From 21st January, 1904 to 9th September, 1908.
- Rt. Hon. WILLIAM HUMBLE, EARL OF DUDLEY, G.C.B., G.C.M.G., G.C.V.O. From 9th September, 1908 to 31st July, 1911.
- Rt. Hon. THOMAS, BARON DENMAN, G.C.M.G., K.C.V.O. From 31st July, 1911 to 18th May, 1914.
- Rt. Hon. SIR RONALD CRAUFORD MUNRO FERGUSON (afterwards VISCOUNT NOVAR OF RAITH), G.C.M.G. From 18th May, 1914 to 6th October, 1920.
- Rt. Hon. HENRY WILLIAM, BARON FORSTER OF LEPE, G.C.M.G. From 6th October, 1920 to 8th October, 1925.
- Rt. Hon. JOHN LAWRENCE, BARON STONEHAVEN, G.C.M.G., D.S.O. From 8th October, 1925 to 22nd January, 1931.
- Lieut.-Colonel the Rt. Hon. ARTHUR HERBERT TENNYSON, BARON SOMERS, K.C.M.G., D.S.O., M.C. From 3rd October, 1930 to 22nd January, 1931 (Acting).
- Rt. Hon. SIR ISAAC ALFRED ISAACS, G.C.B., G.C.M.G. From 22nd January, 1931 to 23rd January, 1936.
- General the Rt. Hon. ALEXANDER GORE ARKWRIGHT, BARON GOWRIE, V.C., G.C.M.G., C.B., D.S.O., K.G.St.J. From 23rd January, 1936 to 30th January, 1945.
- Major-General Sir WINSTON JOSEPH DUGAN, G.C.M.G., C.B., D.S.O. From 5th September, 1944 to 30th January, 1945 (Acting).
- His Royal Highness PRINCE HENRY WILLIAM FREDERICK ALBERT, DUKE OF GLOUCESTER, EARL OF ULSTER AND BARON CULLODEN, K.G., K.T., K.P., P.C., G.C.B., G.C.M.G., G.C.V.O., General in the Army, Air Chief Marshal in the Royal Air Force, One of His Majesty's Personal Aides-de-Camp. From 30th January, 1945 to 11th March, 1947.
- Major-General SIR WINSTON JOSEPH DUGAN, G.C.M.G., C.B., D.S.O. From 18th January, 1947 to 11th March, 1947 (Acting).
- Rt. Hon. SIR WILLIAM JOHN MCKELL, G.C.M.G. From 11th March, 1947 to 8th May, 1953.
- Field-Marshal SIR WILLIAM JOSEPH SLIM, G.C.B., G.C.M.G., G.B.E., D.S.O., M.C., K.St.J. From 8th May, 1953.

(ii) *Commonwealth Ministries.* (a) *Names and Tenure of Office, 1901 to 1951.* The following list shows the name of each Commonwealth Ministry to hold office since 1st January, 1901, and the limits of its term of office.

COMMONWEALTH MINISTRIES.

- (i) BARTON MINISTRY, 1st January, 1901 to 24th September, 1903.
- (ii) DEAKIN MINISTRY, 24th September, 1903 to 27th April, 1904.
- (iii) WATSON MINISTRY, 27th April, 1904 to 17th August, 1904.
- (iv) REID-MCLEAN MINISTRY, 18th August, 1904 to 5th July, 1905.
- (v) DEAKIN MINISTRY, 5th July, 1905 to 13th November, 1908.
- (vi) FISHER MINISTRY, 13th November, 1908 to 1st June, 1909.
- (vii) DEAKIN MINISTRY, 2nd June, 1909 to 29th April, 1910.
- (viii) FISHER MINISTRY, 29th April, 1910 to 24th June, 1913.
- (ix) COOK MINISTRY, 24th June, 1913 to 17th September, 1914.
- (x) FISHER MINISTRY, 17th September, 1914 to 27th October, 1915.
- (xi) HUGHES MINISTRY, 27th October, 1915 to 14th November, 1916.
- (xii) HUGHES MINISTRY, 14th November, 1916 to 17th February, 1917.
- (xiii) HUGHES MINISTRY, 17th February, 1917 to 10th January, 1918.
- (xiv) HUGHES MINISTRY, 10th January, 1918 to 9th February, 1923.
- (xv) BRUCE-PAGE MINISTRY, 9th February, 1923 to 22nd October, 1929.
- (xvi) SCULLIN MINISTRY, 22nd October, 1929 to 6th January, 1932.
- (xvii) LYONS MINISTRY, 6th January, 1932 to 7th November, 1938.
- (xviii) LYONS MINISTRY, 7th November, 1938 to 7th April, 1939.
- (xix) PAGE MINISTRY, 7th April, 1939 to 26th April, 1939.
- (xx) MENZIES MINISTRY, 26th April, 1939 to 14th March, 1940.
- (xxi) MENZIES MINISTRY, 14th March, 1940 to 28th October, 1940.
- (xxii) MENZIES MINISTRY, 28th October, 1940 to 29th August, 1941.
- (xxiii) FADDEN MINISTRY, 29th August, 1941 to 7th October, 1941.
- (xxiv) CURTIN MINISTRY, 7th October, 1941 to 21st September, 1943.
- (xxv) CURTIN MINISTRY, 21st September, 1943 to 6th July, 1945.
- (xxvi) FORDE MINISTRY, 6th July, 1945 to 13th July, 1945.

COMMONWEALTH MINISTRIES—*continued.*

- (xxvii) CHIFLEY MINISTRY, 13th July, 1945 to 1st November, 1946.  
 (xxviii) CHIFLEY MINISTRY, 1st November, 1946 to 19th December, 1949.  
 (xxix) MENZIES MINISTRY, 19th December, 1949 to 11th May, 1951.  
 (xxx) MENZIES MINISTRY, 11th May, 1951.

(b) *Names of Successive Holders of Office, 9th February, 1923 to 31st December, 1952.*  
 In earlier issues of the Official Year Book (see No. 21, 1928 and previous issues) there appeared the names of each Ministry up to the Bruce-Page Ministry (9th February, 1923 to 22nd October, 1929), together with the names of the successive holders of portfolios therein, and issue No. 39 contains a list, commencing with the Bruce-Page Ministry, which covers the period between the date on which it assumed power, 9th February, 1923, and 31st July, 1951, showing the names of all persons who have held office in each Ministry during that period.

This issue shows only particulars of the latest Menzies Ministry, but includes any changes therein during its term of office up to December, 1952. For any subsequent changes see Appendix to this volume.

## MENZIES MINISTRY—from 11th May, 1951 (as at 31st December, 1952).

(The State from which each Minister was elected to Parliament is added in parenthesis).

<i>Departments.</i>	<i>Ministers.</i>
Prime Minister . . . . .	Rt. Hon. ROBERT GORDON MENZIES, C.H., Q.C. (Vic.).
Treasurer . . . . .	Rt. Hon. SIR ARTHUR WILLIAM FADDEN, K.C.M.G.* (Qld.).

Minister for Supply . . . . .	Hon. HOWARD BEALE, Q.C. (N.S.W.).
Minister for the Interior and Minister for Works(a)	Hon. WILFRED SELWYN KENT HUGHES, M.V.O., O.B.E., M.C., E.D. (Vic.).
Minister for Social Services . . . . .	Hon. ATHOL GORDON TOWNLEY (Tas.).
Minister for Territories . . . . .	Hon. PAUL MEERNA CAEDWALLA HASLUCK (W.A.).

\* K.C.M.G., June, 1951. † P.C., June, 1952. ‡ K.C.M.G., January, 1953.

(a) Name changed from Department of Works and Housing, 4th June, 1952.

(iii) *Commonwealth Ministers of State.* In Official Year Book No. 38 a statement was included showing the names of the Ministers of State who had administered the several Departments during the period 1st April, 1925 to 31st December, 1949 (pp. 74-79). This was in continuation of a similar statement covering the period from the inauguration of Commonwealth Government to 1925 which appeared in Official Year Book No. 18.

3. **Governors and State Ministers.**—The names of the Governors and members of the Ministries in each State in December, 1952, are shown in the following statement. (Changes since December, 1952 are shown in the Appendix to this volume.)

#### NEW SOUTH WALES.

*Governor*—LIEUT.-GENERAL SIR JOHN NORTHCOTT, K.C.M.G., C.B., M.V.O.  
*Ministry (from 2nd April, 1952).*

<i>Premier, Colonial Treasurer and Minister for Local Government—</i> THE HON. J. J. CAHILL.	<i>Minister for Agriculture—</i> THE HON. E. H. GRAHAM.
<i>Deputy Premier and Minister for Education—</i> THE HON. R. J. HEFFRON.	<i>Minister without Portfolio—</i> THE HON. G. WEIR.
<i>Minister for Housing, Minister for Co-operative Societies and Assistant Treasurer—</i> THE HON. CLIVE R. EVATT, Q.C.	<i>Minister for Labour and Industry and Minister for Social Welfare—</i> THE HON. F. J. FINNAN.
<i>Attorney-General—</i> THE HON. C. E. MARTIN, Q.C.	<i>Minister for Transport—</i> THE HON. W. F. SHEAHAN.
<i>Minister of Justice and Vice-President of the Executive Council—</i> THE HON. R. R. DOWNING, M.L.C.	<i>Secretary for Mines and Minister for Immigration—</i> THE HON. J. G. ARTHUR.
<i>Chief Secretary—</i> THE HON. C. A. KELLY.	<i>Secretary for Lands—</i> THE HON. F. H. HAWKINS.
<i>Minister for Health—</i> THE HON. M. O'SULLIVAN.	<i>Secretary for Public Works and Assistant Minister for Local Government—</i> THE HON. J. B. RENSHAW.
	<i>Minister for Conservation—</i> THE HON. A. G. ENTICKNAP.

#### VICTORIA.

*Governor*—GENERAL SIR REGINALD ALEXANDER DALLAS BROOKS, K.C.B., K.C.M.G., C.M.G., D.S.O., K.St.J.

*Ministry (from 17th December, 1952).*

<i>Premier and Treasurer—</i> THE HON. J. CAIN.	<i>Minister of Labour and Minister of Mines—</i> THE HON. A. McD. FRASER, M.L.C.
<i>Chief Secretary—</i> THE HON. L. W. GALVIN.	<i>Minister for Education—</i> THE HON. A. E. SHEPHERD.
<i>Minister of Transport and a Vice-President of the Board of Land and Works—</i> THE HON. P. L. COLEMAN, M.L.C.	<i>Commissioner of Crown Lands and Survey, Minister of Soldier Settlement, Minister for Conservation and President of the Board of Land and Works—</i> THE HON. R. W. HOLT.
<i>Attorney-General, Minister-in-charge of Prices and Minister-in-charge of Immigration—</i> THE HON. W. SLATER, M.L.C.	<i>Commissioner of Public Works and a Vice-President of the Board of Land and Works—</i> THE HON. S. MERRIFIELD.
<i>Minister of Health—</i> THE HON. W. P. BARRY.	<i>Minister-in-charge of Electrical Undertakings and Minister of Forests—</i> THE HON. J. W. GALBALLY, M.L.C.
<i>Minister of Agriculture, Minister of State Development and Decentralization, Minister of Water Supply and a Vice-President of the Board of Land and Works—</i> THE HON. C. P. STONEHAM.	<i>Ministers without Portfolio—</i> THE HON. J. H. SMITH. THE HON. F. R. SCULLY.
<i>Minister-in-charge of Housing and Minister-in-charge of Materials—</i> THE HON. T. HAYES.	

GOVERNORS AND STATE MINISTERS—*continued.*

QUEENSLAND.

Governor—LIEUT.-GENERAL SIR JOHN DUDLEY LAVARACK, K.B.E., C.B., C.M.G., D.S.O.

*Ministry (from 17th January, 1952).*

<i>Premier and Chief Secretary; and Vice-President of the Executive Council—</i> THE HON. V. C. GAIR.	<i>Secretary for Public Instruction—</i> THE HON. G. H. DEVRIES.
<i>Minister for Transport—</i> THE HON. J. E. DUGGAN.	<i>Secretary for Health and Home Affairs—</i> THE HON. W. M. MOORE.
<i>Secretary for Public Lands and Irrigation—</i> THE HON. T. A. FOLEY.	<i>Secretary for Public Works and Housing—</i> THE HON. P. J. R. HILTON.
<i>Secretary for Agriculture and Stock—</i> THE HON. H. H. COLLINS.	<i>Treasurer—</i> THE HON. E. J. WALSH.
<i>Secretary for Labour and Industry—</i> THE HON. A. JONES.	<i>Secretary for Mines and Immigration—</i> THE HON. E. J. RIORDAN.
<i>Attorney-General—</i> THE HON. W. POWER.	

SOUTH AUSTRALIA.

Lieut.-Governor—THE HON. SIR JOHN MELLIS NAPIER, K.C.M.G., Chief Justice.

*Ministry (from 15th May, 1944).*

<i>Premier, Treasurer, Minister of Immigration and Minister of Industry and Employment—</i> THE HON. T. PLAYFORD.	<i>Minister of Lands, Minister of Repatriation, and Minister of Irrigation—</i> THE HON. C. S. HINCKS.
<i>Chief Secretary, Minister of Health, and Minister of Mines—</i> THE HON. A. L. McEWIN, M.L.C.	<i>Minister of Works, Minister of Railways, Minister of Marine, and Minister of Local Government—</i> THE HON. M. McINTOSH.
<i>Attorney-General and Minister of Education—</i> THE HON. R. J. RUDALL, M.L.C.	<i>Minister of Agriculture and Minister of Forests—</i> THE HON. SIR GEORGE F. JENKINS, K.B.E.

WESTERN AUSTRALIA.

Governor—LIEUT.-GENERAL SIR CHARLES GAIRDNER, K.C.M.G., C.B., C.B.E.

*Ministry (from 1st April, 1947).*

<i>Premier, Treasurer and Minister for the North-West—</i> THE HON. SIR DUNCAN R. McLARTY, K.B.E., M.M.	<i>Chief Secretary and Minister for Local Government and Native Affairs—</i> THE HON. V. DONEY.

<i>Minister for Works and Water Supply—</i> THE HON. D. BRAND.	<i>Minister for Transport, Railways and Mines—</i> THE HON. C. H. SIMPSON, M.L.C.
<i>Minister for Lands, Labour and Immigration—</i> THE HON. L. THORN.	<i>Minister for Housing and Forests—</i> THE HON. G. P. WILD, M.B.E.
<i>Attorney-General and Minister for Police and Fisheries—</i> THE HON. A. V. R. ABBOTT.	<i>Minister for Agriculture—</i> THE HON. SIR CHARLES G. LATHAM M.L.C.

GOVERNORS AND STATE MINISTERS—*continued.*

## TASMANIA.

*Governor*—THE RT. HON. SIR RONALD HIBBERT CROSS, BT.

*Ministry (from 25th February, 1948).*

<i>Premier, Minister for Education and Minister administering Hydro-electric Commission Act—</i>	<i>Chief Secretary—</i>
THE HON. R. COSGROVE.	THE HON. A. J. WHITE.
<i>Attorney-General—</i>	<i>Honorary Ministers—</i>
THE HON. R. F. FAGAN.	THE HON. C. H. HAND
<i>Treasurer and Minister for Transport—</i>	(Minister for Forests and Minister controlling the Tourist and Immi- gration Department).
THE HON. J. L. MADDEN.	THE HON. C. A. BRAMICH
<i>Minister for Agriculture—</i>	(Minister for Housing).
THE HON. J. J. DWYER, V.C.	THE HON. R. J. D. TURNBULL
<i>Minister for Lands and Works and Minister for Mines—</i>	(Minister for Health).
THE HON. E. E. REECE.	

4. *The Course of Legislation.*—The actual legislation by the Commonwealth Parliament up to the end of 1950 is indicated in alphabetical order in Vol. XLVIII. "The Acts of the Parliament of the Commonwealth of Australia passed during the year 1950, in portion of the First Sesson of the Nineteenth Parliament of the Commonwealth, with Tables and Index."

A "Chronological Table of Acts passed from 1901 to 1950, showing how they are affected by subsequent legislation or lapse of time" is also given, and, further, "A Table of Commonwealth Legislation passed from 1901 to 1950 in relation to the several provisions of the Constitution", is furnished. Reference should be made to these for complete information.

5. *Legislation during 1951.*—The following paragraphs present a selection from the legislative enactments of the Commonwealth and State Parliaments during the year 1951. The acts included have been selected as the more important new measures and amending measures enacted during the year. The selection is somewhat arbitrary, however, because of the task of determining, in view of the limitations on space that might reasonably be allotted, the relative importance of the 495 acts passed during the period. Certain principles regulating the choice of acts have nevertheless been generally observed. Ordinary appropriation and loan acts are excluded, as are also acts relating to less important changes in existing forms of taxation, in superannuation and pension schemes, and in workers' compensation. Acts providing for minor amendments to existing statutes and continuance acts are similarly excluded.

The total enactments of the Commonwealth and State Parliaments for a number of years at fairly even intervals since 1901 show a steady increase during this century. About 270 acts were passed in 1901, 320 in 1914, 410 in 1927, 430 in 1939, and 495 in 1951. The acts of the Commonwealth Parliament during these years numbered 17, 36, 38, 87 and 82 respectively.

*Commonwealth.—Coal Industry.* An amending Act; the principal amendments invest the Coal Industry Tribunal with power to determine industrial disputes.

*Commonwealth Bank.* Repeals the Banking Act 1947 and re-establishes the Commonwealth Bank Board.

*Conciliation and Arbitration.* Effects extensive amendments to the Conciliation and Arbitration Act; confers on the Commonwealth Court of Conciliation and Arbitration power to punish contempts and to order secret ballots in elections of officers of registered organizations.

*Cotton Bounty.* Provides for the payment of bounty on the production of seed cotton. If the average price of seed cotton is less than 9½d. per lb. the bounty payable is the difference between this price and 9½d.

*Defence Preparations.* Empowers the Governor-General to make regulations for the purposes of defence preparations including the maintenance and sustenance of the people of Australia in time of war.

*Hospital Benefits.* Repeals the Hospital Benefits Act 1945-1948 and confers power on the Commonwealth to enter into agreements with the States for the provision of hospital benefits.

*Income Tax and Social Services Contribution Assessment.* Extensively amends the Income Tax and Social Services Contribution Assessment Act 1939-1950. The principal amendments relate to the taxation of private companies, the income derived from mining operations and the averaging system of income as applied to taxpayers who are primary producers.

*National Debt Sinking Fund (Special Payment).* Empowers the Treasurer to pay into the National Debt Sinking Fund out of the Consolidated Revenue Fund sums not exceeding £114,500,000. This amount is the estimated budget surplus for the year 1951-1952.

*National Service.* Provides for national service in the Defence Force of persons between the ages of 18 and 26. Service is to be rendered with the Citizen Naval Forces, the Citizen Military Forces or the Citizen Air Force.

*Public Accounts Committee.* Provides for the appointment in Parliament of a Joint Committee of Public Accounts of ten members to examine and report upon the accounts of receipts and expenditure of the Commonwealth.

*Re-establishment and Employment.* Inserts provisions in the Re-establishment and Employment Act which extend the benefits under that Act to members of the Defence Force serving in Korea and Malaya.

*States Grants (Special Financial Assistance).* Acts granting and applying sums for special financial assistance to the States.

*Wheat Bounty.* Provides for the payment of a bounty on the production of wheat delivered to the Australian Wheat Board for the two years commencing on 1st December, 1951.

*Wool Sales Deduction Legislation Repeal.* Repeals the Wool Sales Deduction (Administration) Act 1950, the Wool Sales Deduction Act (No. 1) 1950 and the Wool Sales Deduction Act (No. 2) 1950 which provided for the payment to the Commonwealth of a proportion of the value of wool sold by producers of that commodity.

*New South Wales.—Blowering Dam.* Authorizes the construction of a dam across the Tumut River at Blowering.

*Great Northern Railway Deviation (Singleton to Nundah).* Authorizes the construction of a railway deviation from Singleton to Nundah.

*Industrial Arbitration (Amendment).* Provides *inter alia* for the insertion in any State award or industrial agreement of provisions entitling employees to up to three months long service leave on full pay. Also provides, in certain cases, for secret ballots in trade union elections.

*Landlord and Tenant (Amendment).* Authorizes an increase in the determination of "fair rent" to the extent of increased outgoings for rates and insurance premiums, and the annual cost of repairs, maintenance and renewals.

*Local Government (Amendment).* Sets out a revised town and country planning scheme for the County of Cumberland (Sydney and surrounding areas), confers additional powers on Cumberland County Council and prescribes a new procedure for the acquisition of land by councils.

*Sydney Harbour Transport.* Constitutes the Sydney Harbour Transport Board to purchase certain existing ferry services on Sydney Harbour from a private company and to continue and extend these services.

*Thirlemere to Burragorang Railway.* Authorizes the construction of a railway from Thirlemere to Burragorang.

*Wheat Industry Stabilization.* Incorporates proposals submitted by the Commonwealth to amend the agreement. Authorizes a differential price for wheat sold for stock feed.

*Workers' Compensation (Amendment).* Brings additional classes of employees under its provisions and provides for increases in the amounts of compensation payable.

*Victoria.—Benefit Associations.* Provides for the registration and control of associations established to provide to contributors and their families hospital, medical or funeral benefits, in cases where such associations are not within the operation of the Friendly Societies Acts, the Trade Unions Act 1928, the Commonwealth Life Insurance Act 1945–1950 or Conciliation and Arbitration Act 1904–1950.

*Health (Radiological Examinations).* Gives to the Chief Health Officer power to require persons to submit to radiological examination for pulmonary tuberculosis.

*Land (Development Leases).* Permits the granting to the Australian Mutual Provident Society of development leases covering a large area in the Mallee-Wimmera district, to be developed and subdivided by the Society, for allocation to settlers. The area comprises about 571,000 acres.

*Land Tax.* Prescribes the rate of Land Tax for 1952, double the rate previously in force.

*Latrobe Valley Drainage.* Establishes the Latrobe Valley Drainage Board to supervise the treatment and disposal of industrial and domestic waste in the Latrobe Valley and to prevent pollution of the Latrobe River.

*Police Regulation (Furlough).* Provides for long service leave on full pay for members of the police force.

*Railways (Furlough).* Provides for long service leave on full pay for employees of the Victorian Railways Commissioners, Railway Construction Branch of the Board of Land and Works, and the State Coal Mine.

*Soldier Settlement.* Increases the amount of loan money that may be made available for Soldier Settlement.

*Transport.* Establishes a Ministry of Transport to provide for better co-ordination of transport in Victoria.

*Wheat Industry Stabilization (Amendment).* Incorporates proposals submitted by Commonwealth Government for uniform legislation to amend the agreement.

*Queensland.—Coal Mining Industry Long Service Leave.* Constitutes a Coal Mining Industry Long Service Leave Trust Fund and provides for payment therefrom to employers in the Coal Mining Industry of amounts paid by them to employees in respect of long service leave accrued under certain awards.

*Co-ordination of Rural Advances and Agricultural Bank Acts Amendment.* Increases maximum general advance to farmers and others from £5,000 to £7,500. Liberalizes the basis of valuation for the purpose of advances.

*Inspection of Machinery.* Sets out a code of law relating to the inspection of machinery which is potentially dangerous.

*Land Acts Amendment.* Provides for the re-assessment of land rentals every seven years instead of every fifteen years.

*Law Reform (Abolition of the Rule of Common Employment).* Abolishes the ancient common law rule of Common Employment.

*Slaughtering.* Consolidates and amends existing legislation in an endeavour to modernize the laws with respect to the regulation of the slaughtering of stock for human consumption.

*Soil Conservation.* Establishes an advisory committee to deal with the problem of soil erosion of rural lands; provides for the conduct of experiments and demonstrations pertaining to soil conservation and erosion mitigation.

*Survey Co-ordination.* Provides for the establishment of a Central Plan Office in the Survey Office, Lands Department, for the recording of plans and surveys made by governmental and public authorities, the avoidance of duplication of surveys, and the establishment and maintenance of permanent marks for the co-ordination of surveys.

*Weights and Measures.* Amends the principal Act to provide for new trading methods<sup>s</sup> such as petrol bowzers, petrol wagons and bulk milk wagons, and the packing before sale of many articles such as bottled milk and fruit juices.

*Wheat Industry Stabilization.* Incorporates proposals submitted by the Commonwealth for uniform legislation to amend the agreement. Provides for differential prices for wheat sold for stock feed.

*Workers' Compensation.* Defines a "worker" as a person earning up to £1,250 per annum. Extends eligibility for compensation to those who are injured while in attendance at, or going to or from, "pick-up places" and employment exchanges.

**South Australia.**—*Building Materials Act Amendment.* Extends operation of the Act and enlarges circumstances under which dwelling houses may be erected without permit.

*Health Act Amendment.* Provides for examination of individuals suspected of being infected with tuberculosis, for compulsory mass X-ray examinations, and for compulsory detention and treatment in an institution, of sufferers from tuberculosis. Also provides for regulations dealing with the production and use of dangerous substances.

*Landlord and Tenant (Control of Rents) Act Amendment.* Provides for rents to be fixed at the general level prevailing in 1939 plus 22½ per cent., together with an allowance for increased costs of maintenance and repairs, rates, taxes, insurance and other costs. The Act also deals with control of evictions, "protected persons" and other matters.

*Local Government Act Amendment.* *Inter alia*, enables councils rating under annual values to adopt waterworks assessment, and grants a general increase in rating powers.

*Public Service Act Amendment.* Provides for temporary employment of persons over the age of retirement and amends the procedure for hearing appeals against appointments.

*Road Traffic Act Amendment.* Deals with rules of the road and safety, such as the use of dipping devices for lights, penalties for driving under the influence of intoxicating liquors, compulsory insurance, right of way of vehicles in cross-overs or double roads, traffic lanes, unsafe vehicles, &c.

**Western Australia.**—*Collie-Cardiff Railway.* Authorizes the construction of a railway from Collie to Cardiff.

*Hospital Benefits Agreement.* Amends the Hospital Benefits Agreement Act 1945 to enable a new agreement to be made with the Commonwealth.

*Law Reform (Common Employment).* Abolishes the Common Law doctrine of Common Employment.

*Library Board of Western Australia.* Sets up the Library Board of Western Australia to supervise the provision of free libraries and the allocation of money made available to assist free library services.

*Muja-Centaur Coal Mine Railway.* Authorizes construction of a railway from Muja to the Centaur Coal Mine.

*Rents and Tenancies Emergency Provisions.* Provides *inter alia* for increases in maximum rents and recovery of possession of premises under specified conditions.

*War Service Land Settlement Agreement.* Ratifies the agreement made with the Commonwealth in accordance with the Commonwealth Re-establishment and Employment Act 1945.

**Tasmania.**—*Highways.* Amends the law relating to the creation of, and the taking over of land for, highways.

*Mineral Resources.* Provides for the investigation and exploration of the mineral resources of the State.

*Municipal Employees Long-Service Leave.* Provides for long-service leave amounting to 90 days after 15 years, or 180 days after 25 years, continuous service, to be granted to employees of municipal councils.

*Noxious Insects.* Makes provision for the eradication, and for prevention of the introduction and spread, of noxious insects.

*Physiotherapists' Registration.* Provides for the constitution of a Physiotherapists' Registration Board and the registration of physiotherapists.

*Plumbers' Registration.* Provides for the constitution of a Plumbers' Registration Board and the registration of plumbers.

*Road Construction (Transfer of Functions).* Transfers certain functions with respect to the construction and maintenance of roads, control of certain plant and incidental matters from the Transport Commission to the Minister for Lands and Works.

*Sexual Offences.* Provides for the protection of women and children against sexual offences and for the treatment of sexual offenders.

*Towns.* Amends the Towns Act 1934 and Public Health Act 1935, to improve provision for the construction of streets in towns.

*Wages Boards.* Empowers Wages Boards to determine the cases in which, and the conditions under which, long service leave of absence on full pay shall be granted to employees engaged in the trade in respect of which the board is established.

*West Derwent Water.* Provides for the augmentation of the water supply for the City of Hobart and the Municipalities of Glenorchy, Kingborough and New Norfolk.

*Wheat Industry Stabilization.* Amends the principal Act to incorporate proposals submitted by the Commonwealth for uniform legislation to amend the agreement. Provides for differential prices for wheat sold for stock feed.

#### § 4. Commonwealth Government Departments.

Official Year Book No. 37 contains, on pp. 76–86, a list of the Commonwealth Government Departments as at 31st March, 1947, showing details of the matters dealt with by each Department, and the Acts administered by the Minister of each Department, and Year Book No. 39 contains, on pp. 100–1, a description of major changes in Departmental structure since that date.

#### § 5. Cost of Parliamentary Government.

The tables in this section are intended to represent the expenditure incurred in the operation of the Parliamentary system in Australia, comprising the Governor-General and Governors, the Ministries, the Upper and Lower Houses of Parliament, and electoral activities; they do not attempt to cover the expenditure on Commonwealth and State administration generally.

Comparison between individual items should be made with caution because of differences in accounting and presentation.

The following statement shows this expenditure for the Commonwealth and for each State, as well as the cost per head of population, for the year ended 30th June, 1951. In order to avoid incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure (with the exception of the item "Governor's salary") under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, and carried out at the request of the Government.

COST OF PARLIAMENTARY GOVERNMENT, 1950-51.

## CHAPTER IV.

### LAND TENURE AND SETTLEMENT.

#### § 1. Introduction.

For descriptions of the land tenure systems of the several States and the internal territories see Official Year Book No. 4 (pp. 235-333) and subsequent issues, in particular No. 22 (pp. 133-195). Conspectuses of land legislation in force and of the systems of land tenures in the several States have appeared in issues up to and including No. 38, but only a brief summary is given below.

The land legislation in force in the several States may be classified broadly under five major types of land enactments, i.e., Crown Lands Acts, Closer Settlement Acts, Mining Acts, Returned Service Personnel Settlement Acts, and Advances to Settlers Acts, but within the groupings there is, of course, a wide variety of individual acts. In the two internal Territories the legislation relating to lands is embodied in various ordinances.

In each of the States there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown Lands. In the Northern Territory the Administrator, under the control of the Minister for Territories, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory the administration of the Leases Ordinances is in the hands of the Department of the Interior.

In each of the States there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory there are several ordinances relative to mining.

As with land legislation, land tenures may be classified under broad headings; these indicate the nature of the tenure and comprise:—Free Grants and Reservations, Unconditional Purchases of Freehold, Conditional Purchases of Freehold, Leases and Licences under Land Acts, Closer Settlement, Leases and Licences under Mining Acts, and Settlement of Returned Service Personnel. For details of the various particular forms of land tenure within these seven groups in each State see Official Year Book No. 38, pp. 114-116 and earlier issues. Descriptions of the systems operating in the two internal Territories may be found on pp. 329-30 and 338 of Official Year Book No. 39.

The following sections contain figures showing the extent of the different tenures in the several States and Territories, together with some general descriptive matter.

#### § 2. Free Grants and Reservations.

1. *New South Wales.*—(i) *Free Grants.* Crown lands may, by notification in the *Gazette*, be dedicated for public purposes and be granted therefor in fee simple. Such lands may be placed under the care and management of trustees, not less than three or more than seven in number, appointed by the Minister.

(ii) *Reservations.* Temporary reservations of Crown lands from sale or lease may be made by the Minister.

(iii) *Areas Granted and Reserved.* During 1950-51, 1,376 acres were permanently reserved or dedicated for miscellaneous recreation reserves and similar purposes in 76 localities. The areas reserved at 30th June, 1951, were as follows:—For travelling stock, 5,333,926 acres; pending classification and survey, 4,183,957 acres; forest reserves, 2,295,835 acres; water and camping reserves, 817,698 acres; mining reserves, 1,211,314 acres; for recreation and parks, 425,452 acres; other reserves, 5,385,739 acres; total 19,653,921 acres.

2. **Victoria.**—(i) *Free Grants.* The Governor may grant, convey or otherwise dispose of Crown lands for public purposes.

(ii) *Reservations.* The Governor may temporarily or permanently reserve from sale, lease or licence any Crown lands required for public purposes.

(iii) *Areas Granted and Reserved.* During 1951 no areas were granted without purchase. The areas both temporarily and permanently reserved at the end of 1951 were as follows:—For roads, 1,794,218 acres; water reserves, 318,545 acres; agricultural colleges, etc., 8,434 acres; forest and timber reserves, 5,347,321 acres; reserves in the mallee, 410,000 acres; other reserves, 550,937 acres; total, 8,429,455 acres.

3. **Queensland.**—(i) *Free Grants.* The Governor may grant in trust any Crown land which is or may be required for public purposes. Under the Irrigation Act, land to be used for the purpose of any undertaking under that Act may be vested in fee simple in the Irrigation Commission.

(ii) *Reservations.* The Governor may reserve from sale or lease, either temporarily or permanently, any Crown land which is or may be required for public purposes. Reserved lands may be placed under the control of trustees who are empowered to lease them with the approval of the Minister for not more than 21 years.

Under the State Forests and National Parks Acts, the Governor may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(iii) *Areas Granted and Reserved.* During 1951 the areas granted in fee simple without payment were nil, the area set apart as reserves 274,729 acres, and reserves cancelled 125,723 acres. The areas reserved, including roads, at the end of 1951 were as follows:—Timber reserves, 3,111,011 acres; for State forests and national parks, 5,082,613 acres; aboriginal reserves, 7,805,715 acres; for streets, surveyed roads and stock routes, 3,593,387 acres; general reserves, 5,649,935 acres; total, 25,242,661 acres.

4. **South Australia.**—(i) *Free Grants.* The Governor may dedicate Crown lands for any public purpose and grant the fee simple of such lands, with the exception of foreshores and land for quays, wharves or landing-places, which are inalienable in fee simple from the Crown.

(ii) *Reservations.* The Governor may reserve Crown lands for the use and benefit of aborigines, military defence, forest reserves, railway stations, park lands or any other purpose that he may think fit.

(iii) *Areas Granted and Reserved.* During 1950–51, free grants were issued for an area of 56 acres, and reserves comprising 8,282 acres were proclaimed. At 30th June, 1951 the total area of surveyed roads, railways and other reserves was 21,248,665 acres, including 18,272,000 acres set apart as aboriginal reserves.

5. **Western Australia.**—(i) *Free Grants.* The Governor may dispose of, in such manner as for the public interest may seem best, any lands vested in the Crown for public purposes, and may grant the fee simple of any reserve to secure the use thereof for the purpose for which such reserve was made.

(ii) *Reservations.* The Governor may reserve any lands vested in the Crown for public purposes. Areas not immediately required may be leased by the Governor for periods up to 10 years. Reserves may be placed under the control of a local authority or trustees, with power to lease them for a period not exceeding 21 years, or may be leased for 99 years. Temporary reserves may also be proclaimed.

(iii) *Areas Granted or Reserved.* During the year ended 30th June, 1951 approximately 189,611 acres were reserved for various purposes. At 30th June, 1951 the total area reserved was 51,998,428 acres, comprising State forests, 3,426,450 acres, timber reserves 1,799,658 acres and other reserves 46,772,320 acres.

6. **Tasmania.**—(i) *Free Grants.* No mention is made in the Crown Lands Act respecting free grants of land, and it is expressly stated that no lands may be disposed of as sites for religious purposes except by way of sale under the Act. Under the Returned Soldiers' Settlement Act 1916, returned soldiers who applied prior to 31st March, 1922 were eligible to receive free grants of Crown land not exceeding £100 each in value, but these grants were conditional on the land being adequately improved.

(ii) *Reservations.* The Governor in Council may except from sale or lease, and reserve to Her Majesty any Crown land for public purposes, and vest for such term as he thinks fit any land so reserved in any person or corporate body. Any breach or non-fulfilment of the conditions upon which such land is reserved renders it liable to forfeiture. A school allotment, not exceeding 5 acres in area, may also be reserved.

(iii) *Areas Granted or Reserved.* The total area reserved at 30th June, 1951 was 4,042,810 acres, excluding 21,775 acres of land occupied by Commonwealth and State Departments.

7. *Northern Territory.*—(i) *Reservations.* The Governor-General may resume for public purposes any Crown lands not subject to any right of, or contract for, purchase, and may reserve, for the purpose for which they are resumed, the whole or any portion of the lands so resumed.

(ii) *Areas Reserved.* The total area of reserves at 30th June, 1951 was 71,325 square miles.

8. *Summary.*—The following table shows the total areas reserved in each State, and the grand totals, for the years 1947 to 1951 :—

**AREAS RESERVED.**  
(’000 Acres.)

Year.	N.S.W. (a)	Victoria. (b)	Q’ld. (b)	S. Aust. (a)	W. Aust. (a)	Tas. (b)	Nor. Terr. (a)	Total.
1947 ..	18,022	8,179	23,017	20,263	50,429	2,938	44,374	167,122
1948 ..	18,023	8,179	23,51 <sup>f</sup>	20,273	50,410	3,969	45,452	169,822

(a) At 30th June.

(b) At 31st December.

(c) At 30th June, 1950.

### § 3. Unconditional Purchases of Freehold.

1. *New South Wales.*—(i) *Auction Purchases.* Crown lands, not exceeding in the aggregate 200,000 acres in any one year, may be sold by public auction in areas not exceeding half-an-acre for town lands, 20 acres for suburban lands, and 640 acres for country lands, at the minimum upset price of £8, £2 10s., and 15s. per acre respectively. At least 10 per cent. of the purchase-money must be paid at the time of sale, and the balance within three months, or the Minister may allow the payment of such balance to be deferred for a period not exceeding ten years, 4 per cent. interest being charged. Town blocks in irrigation areas may also be sold by auction.

(ii) *After-Auction Purchases.* In certain cases, land offered at auction and not sold may be purchased at the upset price. A deposit in accordance with the terms and conditions under which the land was previously offered must be lodged, and, if the application be approved by the Minister, the balance of purchase money is payable as required by the specified terms and conditions.

(iii) *Special Purchases.* Under certain circumstances, land may be sold in fee simple, the purchaser paying the cost of survey and of reports thereon, in addition to the purchase-money. The minimum upset price per acre is the same as in the case of land sold by auction. Areas not exceeding 5 acres in extent may be sold to recognized religious bodies and public authorities at prices determined by the local Land Board.

(iv) *Improvement Purchases.* The owner of improvements in land in authorized occupation by residence under any Mining or Western Lands Act of land within a gold-field or mineral field may purchase such land without competition at a price determined by the local Land Board, but at not less than £8 per acre for town lands or £2 10s. per acre for other lands. The area must not exceed  $\frac{1}{2}$  acre within a town or village, or 2 acres elsewhere, and no person may purchase more than one such area within 3 miles of a similar prior purchase by him.

(v) *Areas Sold.* During the year ended 30th June, 1951 the total area sold was 334 acres of which 23 acres were sold by auction and 26 acres as after-auction purchases, while 21 acres were sold as improvement purchases and 26 acres as special purchases. The amount realized for the sale of the whole area was £17,559.

2. **Victoria.**—(i) *General.* Lands, not exceeding 100,000 acres in any one year, specially classed for sale by auction, may be sold by auction in fee simple at an upset price not less than £1 per acre. The purchaser must pay the survey fee at the time of the sale, together with a deposit of  $12\frac{1}{2}$  per cent. of the whole price; the residue is payable in equal half-yearly instalments with interest. Any unsold land in a city, town or borough area, areas specially classed for sale, isolated pieces of land not exceeding 150 acres in area, and sites for churches or charitable purposes, if not more than 3 acres in extent, may be sold by auction on the same terms. Swamp or reclaimed lands may also be sold by auction, subject to the condition that the owner keeps open all drains, etc., thereon.

(ii) *Areas Sold at Auction and by Special Sales.* During 1951 a total of 2,244 acres was disposed of under this tenure, 1,591 acres being country lands and 653 acres town and suburban lands.

3. **Queensland.**—(i) *General.* From 1917 to 1929 the law precluded land being made available for any class of selection which gave the selector the right to acquire the freehold title. Amending legislation giving power to make land available under freehold tenures was passed in 1929, but this provision was repealed by the Act of 1932.

(ii) *Areas Sold, etc.* During 1947 unconditional selections made freehold totalled 125 acres. No unconditional selections have since (to 1951) been made freehold.

4. **South Australia.**—(i) *Sales by Auction.* The following lands may be sold by auction for cash :—(a) special blocks; (b) Crown lands which have been offered for lease and not taken up within two years; (c) town lands; and (d) suburban lands which the Governor excepts from the operations of the Land Board. A purchaser must pay 20 per cent. of the purchase money in cash, and the balance within one month or within such extended time as the Commissioner of Crown Lands may allow. Town lands may be sold subject to the condition that they cannot be transferred or mortgaged within six years without the consent of the Commissioner. If the Commissioner of Crown Lands so determines, town lands may also be offered at auction on terms that the buyer may at his option purchase the lands for cash or on agreement for sale and purchase.

(ii) *Areas Sold, etc.* During the year ended 30th June, 1951 the area of town lands and special blocks sold by auction was 35 acres. In addition, 133,343 acres were sold at fixed prices, and purchases of 87,007 acres on credit were completed, making a total of 220,385 acres.

5. **Western Australia.**—(i) *Sales by Auction.* Town, suburban and village lands must be sold by auction after being surveyed into lots and notified in the *Gazette*. Ten per cent. of the purchase-money must be paid in cash together with the value of any improvements, and the balance in four equal quarterly instalments. Suburban land must be fenced within two years, and no Crown grant may be issued until the land is fenced.

(ii) *Areas Sold.* During the years ended 30th June, 1951 the area of town and suburban allotments sold by auction was 1,391 acres in 680 allotments.

6. **Tasmania.**—(i) *Sales by Auction.* Town lands may be sold by auction.

(ii) *After-auction Sales.* Town lands, not within 5 miles of any city, which, after having been offered at auction, have not been sold, may be sold at the upset price by private contract.

(iii) *Sales of Land in Mining Towns.* Any person being the holder of a residence licence or business licence who shall be in lawful occupation of any residence area or business area, and who shall be the owner of buildings and permanent improvements upon such land of a value equal to or greater than the upset price of such area, shall be entitled to purchase such area at the upset price at any time prior to the day on which such area is to be offered for sale as advertised. The upset price for such area shall not

be less than £10, excluding the value of improvements, cost of survey, and of grant deed. The area which may be so purchased may, with the consent of the Commissioner, exceed one-quarter of an acre, but shall not in any case exceed one-half of an acre.

#### § 4. Conditional Purchases of Freehold.

1. **General.**—The various methods of obtaining Crown lands by conditional purchase in the several States are given in some detail in preceding issues of the Official Year Book (*see* No. 22, pp. 141–9).

2. **New South Wales.**—At 30th June, 1951 the total number of incomplete conditional purchases in existence was 38,524, covering an area of 12,405,284 acres. During 1950–51 47 applications were received for conditional purchases; 34 were confirmed with an area of 1,979 acres; deeds were issued during the year for 389,370 acres; at the end of the year deeds had been issued for 33,343,406 acres. These figures exclude conversions from other tenures—671 comprising 164,487 acres.

3. **Victoria.**—Excluding selections in the Mallee country, the total area purchased conditionally in 1951 was 9,027 acres, all with residence. The number of selectors was 53. There were no selections in the Mallee in 1951.

In addition, final payments were made during 1951 on conditional purchases comprising 21 acres of Mallee lands.

4. **Queensland.**—The following selections were made freehold during 1951:—Agricultural farms 125,434 acres, prickly pear selections 181,743 acres, and prickly pear development selections 6,294 acres.

5. **South Australia.**—During 1950–51, 15,075 acres were allotted under agreements to purchase, comprising Eyre Peninsula railway lands 2,081 acres, closer settlement lands 6,463 acres, soldiers' acquired lands 643 acres, surplus lands 1,142 acres, and other Crown lands 4,746 acres.

6. **Western Australia.**—During the year ended 30th June, 1951 the number of holdings conditionally alienated was 1,142, the total area involved being 1,358,083 acres, comprising conditional purchases by deferred payments with residence 1,342,240 acres and free homestead farms 15,843 acres. Under the heading “deferred payments with residence” are included conditional purchases of grazing lands.

In addition, Crown grants were issued during 1950–51 for the following selections, the prescribed conditions having been complied with:—Free homestead farms 16,623 acres and conditional purchases 222,987 acres.

7. **Tasmania.**—During 1950–51 Crown grants were issued for 24,594 acres. The total area sold conditionally was 4,214 acres, comprising selections for purchase 4,030 acres, and town and suburban allotments 174 acres. The numbers of applications received and confirmed were 47 and 122 respectively.

#### § 5. Leases and Licences under Land Acts.

1. **General.**—Information regarding the methods of obtaining leases and licences of Crown lands in the several States and Territories is given in preceding issues of the Official Year Book (*see* No. 22, pp. 149–63).

2. **New South Wales.**—The following table shows the areas held under various descriptions of leases and licences under the control of the Department of Lands, the Water Conservation and Irrigation Commission and the Western Lands Commission at the end of 1950–51.

**AREAS OCCUPIED UNDER LEASE OR LICENCE AT 30th JUNE, 1951 : NEW SOUTH WALES.(a)**  
(**'000 Acres.**)

Suburban holdings .. ..	52	Total .. ..	113,918

(a) Excludes mining leases and permits; forest leases and occupation permits; and leases outside irrigation areas, controlled by the Water Conservation and Irrigation Commission—94,016 acres.

3. **Victoria.**—The area of Crown lands occupied under leases and licences in the year 1951 was as follows:—Grazing licences—other than Mallee, 5,514,425 acres, Mallee, 3,053,046 acres; auriferous lands licences, 15,888 acres; perpetual leases—other than Mallee, 17,819 acres, Mallee, 61,043 acres; swamp lands leases, 4,020 acres; agricultural college lands, 42,524 acres; total, 8,708,765 acres.

4. **Queensland.**—The total area occupied under lease or licence, excluding mining leases, at the end of 1951 was as follows:—Pastoral leases, 243,540,400 acres; occupation licences, 17,881,520 acres; grazing selections and settlement farm leases, 87,197,446 acres; special purpose leases—Crown land, 577,849 acres, reserves, 1,218,002 acres; perpetual lease (including prickly pear) selections, 6,531,982 acres; auction perpetual leases, 514,171 acres; forest grazing leases (reserves), 1,682,620 acres; total, 359,143,990 acres.

5. **South Australia.**—The total area, including repurchased lands held under lease or licence except mining lease and licence, at 30th June, 1951, was 137,514,310 acres, of which pastoral leases, 115,382,699 acres, constituted the major proportion.

6. **Western Australia.**—At 30th June, 1951 the total area held under lease or licence issued by the Lands Department amounted to 199,302,847 acres, of which 196,821,454 acres were under pastoral lease.

7. **Tasmania.**—Crown lands leased at 30th June, 1951 for other than mining purposes amounted to 2,638,536 acres, of which 2,008,324 acres were leased for pastoral purposes.

8. **Northern Territory.**—At 30th June, 1951 the total area under lease, etc., was 171,841,055 acres, of which pastoral leases accounted for 129,266,284 acres and other leases, licences and mission stations 42,574,771 acres.

9. **Australian Capital Territory.**—The number of leases granted under the City Area Leases Ordinance 1936—1951 to 30th June, 1951 (excluding leases surrendered and determined) was 918. The total area held under grazing, etc., lease and licence (including Jervis Bay area) amounted to 330,582 acres.

Seventeen leases have been granted under the Church Lands and Special Purposes Ordinances for church and scholastic purposes. In addition, a lease in perpetuity has been granted under the Church of England Land Ordinance 1926 for church purposes.

10. **Summary.**—The following table shows particulars of the land held in each State under lease or licence for purposes other than mining and forestry, the total leased or licensed land in the Territories, and the grand totals, for the years 1947 to 1951 :—

**AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING AND FORESTRY.**  
(’000 Acres.)

Year.	N.S.W. (a)	Vic. (b)	Q’land. (b)	S. Aust. (a)	W. Aust. (a)	Tas. (b)	N.T. (a) (c)	A.C.T. (b)(c)(d)	Total.

(a) At 30th June. (b) At 31st December. (c) Leases and licences for all purposes.  
(d) Includes Jervis Bay area. (e) At 30th June, 1950.

**§ 6. Leases and Licences under Mining Acts.**

1. **General.**—Information regarding the various forms of leases and licences under Mining Acts in the several States and the Northern Territory is given in preceding issues of the Official Year Book (see No. 22, pp. 170-7). The following paragraphs contain particulars of operations during the year 1950-51 or 1951, and of areas occupied at the end of the year, under the various forms of lease, licence, etc. issued for mining purposes.

2. **New South Wales.**—During the year ended 30th June, 1951, 1,944,539 acres were taken up under Mining Acts, authorities to prospect comprising 1,920,811 acres and mining for minerals other than gold, 22,696 acres thereof. At the end of the year total areas occupied were as follows :—Gold-mining, 4,765 acres ; mining for other minerals, 173,657 acres ; authorities to prospect, 178,210 acres ; other purposes, 8,359 acres ; total, 364,991 acres.

3. **Victoria.**—During 1951 there were 155 leases and licences granted under Mining Acts, including 48 for gold-mining. Areas occupied at the end of 1951 were as follows :—Gold-mining, 21,267 acres ; petroleum prospecting, 1,056,752 acres ; coal, 12,109 acres ; other purposes, 6,367 acres ; total, 1,096,495 acres.

4. **Queensland.**—During 1951 there were 3,575 miners’ rights issued and two business licences. Areas taken up during the year totalled 175,163 acres, of which petroleum prospecting comprised 128,000 acres and mining for minerals other than gold, 40,183 acres. Total areas occupied at the end of 1951 were as follows :—Gold-mining, 3,356 acres ; mining for other minerals, 61,437 acres ; miners’ homestead leases, 422,837 acres ; petroleum prospecting, 794,240 acres ; coal prospecting, 3,870 acres ; total, 1,285,740 acres. In addition, an area estimated at 25,000 acres was held under miners’ rights and dredging claims. The area of land held under lease only was 487,630 acres.

5. **South Australia.**—Areas taken up under Mining Acts during 1950-51 totalled 4,520 acres, including claims, 3,014 acres, and mineral and miscellaneous leases, 1,506 acres. Total areas occupied at the end of 1950-51 were as follows :—Gold-mining, 647 acres ; other mineral and miscellaneous leases, 73,620 acres ; claims, 11,158 acres ; oil licences, 36,576,000 acres ; other purposes, 7,955 acres ; total, 36,669,380 acres.

6. **Western Australia.**—Areas taken up during 1951 under Mining Acts totalled 30,759 acres, including gold-mining, 9,902 acres and mining for other minerals, 19,636 acres. Total areas occupied at the end of 1951 were as follows :—Gold-mining, 33,068 acres ; mining for other minerals, 69,490 acres ; other purposes, 34,965 acres ; total, 137,523 acres.

7. **Tasmania.**—During 1951 the number of leases issued covered 3,023 acres, including licences to search for coal or oil, 1,200 acres; coal-mining, 719 acres; and tin-mining, 368 acres. Total areas occupied at the end of 1951 were as follows :—Gold-mining, 598 acres; coal-mining, 6,962 acres; mining for other minerals, 19,424 acres; licences to search for coal or oil, 1,200 acres; other purposes, 4,560 acres; total, 32,744 acres.

8. **Northern Territory.**—At 30th June, 1951 the number and acreage of holdings under mining leases and tenements were as follows :—Gold-mining leases, 268—4,141 acres; other mineral leases, 228—5,381 acres; gold and other mineral claims, 5—171 acres; gold and other mineral prospecting areas, 52—846 acres; business and residence areas, 192—56 acres; other purposes, 64—263 acres; total, 809—10,858 acres.

9. **Summary.**—The following table shows the total areas occupied under Mining Acts in each State at the end of the years 1947 to 1951 :—

#### AREAS OCCUPIED UNDER MINING ACTS.

(Acres.)

Year.	N.S.W. (a)	Victoria.	Q'land. (b)	S. Aust. (a) (b)	W. Aust. (c)	Tasmania. (b)	Total. (d)
1947 ..	241,257	563,652	991,698	36,049,318	126,032	25,700	37,997,657
1948 ..	1,334,002	989,641	944,969	36,077,751	130,073	22,681	39,499,117
1949 ..	5,674,449	1,173,573	942,326	36,068,450	137,362	28,101	44,024,261
1950 ..	455,778	1,095,637	1,267,012	36,672,566	145,847	30,462	39,667,302
1951 ..	364,991	1,096,495	1,285,740	36,669,380	137,523	32,744	39,586,873

(a) Year ended 30th June. (b) Excludes lands held under miners' rights and dredging claims.  
(c) Excludes holdings under miners' rights and mineral oil licences. (d) Excludes Northern Territory.

### § 7. Closer Settlement.

1. **General.**—Particulars regarding the methods of acquisition and disposal of land for closer settlement in the several States are given in preceding issues of the Official Year Book (see No. 22, pp. 163-9) and considerable detail of the results of the operations of the several schemes has appeared in subsequent issues. In more recent years, however, the amalgamation, in some States, of closer settlement records with those of other authorities has made it impossible to obtain up-to-date figures for those States and for Australia as a whole, although aggregations of State totals as at the latest dates available have been published as rough approximations intended to convey some idea of the extent of the schemes throughout Australia. Particulars in this issue are restricted to a summary only of the position in each State at the latest date available.

2. **New South Wales.**—Since the inception of closer settlement in 1905 to 30th June, 1951, 2,257 estates totalling 6,182,652 acres have been purchased by the Crown at a cost of £25,536,339 for purposes of closer settlement of civilians and returned service personnel. Particulars of the total areas acquired to 30th June, 1951, are as follows :—Estates purchased, 2,257; farms allotted, 10,733; area, 6,182,652 acres; purchase price, £25,536,339.

Closer settlement is now being effected entirely under perpetual leasehold tenure (closer settlement leases).

3. **Victoria.**—The Closer Settlement Commission was abolished as from 31st December, 1938, and land settlement was placed under the control of the Department of Lands and Survey. On 31st March, 1939 all Closer Settlement and Discharged Soldiers' accounts were amalgamated, the settlers' accounts adjusted and the new debt made payable over an extended period. Particulars of the operations under the provisions of the Closer Settlement Acts to 30th June, 1938, the latest date for which separate details are available, show that 1,402,568 acres were acquired at a cost, including the value of Crown lands taken over, of £10,244,023, and that 8,722 allotments were

made, farm allotments comprising 1,162,676 acres, workmen's homes allotments 790 acres, agricultural labourers' allotments 3,484 acres and town allotments 86,599 acres. The figures for area and cost of land acquired for closer settlement purposes include, in addition to 133,128 acres purchased for £1,246,722 and transferred subsequently to discharged soldiers, a total area of 512,757 acres costing £4,125,822 which was purchased originally for the settlement of discharged soldiers.

4. **Queensland.**—Separate records relating to the closer settlement of re-purchased land are no longer kept by the Land Administration Board, and the operations under this heading are now included with "Leases and Licences under Land Acts." The total area acquired to 31st December, 1934 was 970,778 acres, costing £2,292,881. At the same date the area allotted amounted to 915,690 acres distributed over 3,048 selections, consisting of 2,155 agricultural farms, 257 unconditional selections, 544 perpetual lease selections, 9 prickly pear selections, 6 perpetual lease prickly pear selections and 77 settlement farm leases. An area of 13,038 acres was sold by auction.

5. **South Australia.**—The total area re-purchased for closer settlement at 30th June, 1951 was 944,625 acres, at a cost of £2,854,424. Included in these figures are 51,872 acres purchased for £185,285, and afterwards set apart for returned service personnel, 3,214 acres reserved for forest and waterworks purposes, the purchase-money being £16,185, and also 26,563 acres of swamp and other lands, which were purchased for £111,580, in connexion with reclamation of swamp-lands on the River Murray. Of the total area, 817,108 acres have been allotted to 2,771 persons.

6. **Western Australia.**—The total area acquired for closer settlement up to 30th June, 1951 was 2,122,165 acres, costing £4,237,001. Of this area, 20,972 acres have been set aside for roads, reserves, etc., leaving a balance of 2,101,193 acres available for selection. Particulars of operations under the Act for the year ended 30th June, 1951, are as follows:—Area selected during the year, 179,624 acres; number of farms, etc., allotted to date, 2,157; total area occupied to date, 1,568,420 acres; balance available for selection, 532,773 acres.

7. **Tasmania.**—Up to 30th June, 1951, 38 areas had been opened up for closer settlement, the total purchase-money paid by the Government being £371,486 and the total area acquired amounting to 104,294 acres, including 12,149 acres of Crown lands. The number of farms occupied at 30th June, 1951 was 140.

## § 8. Settlement of Returned Soldiers and Sailors: 1914-18 War.

1. **General.**—Information regarding the methods adopted in each State following the commencement of the 1914-18 War for providing land for the settlement of returned soldiers and sailors, together with the conditions under which such land could be acquired, is given in earlier issues of the Official Year Book (see No. 13, pp. 1016-23, and No. 18, pp. 187-9). Later modifications were made with a view to simplifying procedure and liberalizing the conditions under which holdings may be acquired.

Information on soldier settlement in this section suffers from the same defect, i.e. amalgamation of records, as does that on closer settlement in the foregoing section. Consequently, particulars of the position of soldier settlement in each State at the latest available dates only are given in the following paragraphs, and no aggregations for Australia are shown.

2. **New South Wales.**—At 30th June, 1951 farms had been allotted to 9,943 returned soldiers of the 1914-18 War. These farms included 4,009 provided from 1,710,272 acres of land acquired at a cost of £8,113,956. Five thousand eight hundred and eight soldiers have either transferred or abandoned their farms, leaving 4,135 in occupation of 5,128,119 acres. Of this area 3,973,094 acres were Crown lands, including 2,025,115 acres in Western Division taken up under the Western Lands Act, 997,226 acres acquired lands and 57,799 acres within Irrigation Areas. These totals exclude 703 discharged soldiers who purchased privately-owned land with their own capital and were granted advances for the purchase of stock and plant or for effecting improvements.

3. **Victoria.**—At 30th June, 1938 the area acquired or set apart for soldier settlement in respect of the 1914-18 War was 2,482,286 acres, consisting of 1,763,241 acres of private land purchased at a cost of £13,361,266, plus 133,128 acres costing £1,246,722 taken from Closer Settlement, and 585,917 acres of Crown lands valued at £447,622. Subsequently 512,757 acres valued at £4,125,822 were transferred to Closer Settlement. Up to 30th June, 1938 the number of settlers to whom farms, etc., had been allotted was 12,126, and the number of farms, etc., allotted was 9,784 (including 955 farms originally purchased for closer settlement purposes) containing 2,365,518 acres. In addition, 802 share farmers and holders of leasing agreements and private land had received assistance. The number of farms, etc., occupied at 30th June, 1938 was 8,426 (including 1,001 originally purchased for closer settlement) containing 1,734,379 acres. Later particulars cannot be given, as separate details are not available.

4. **Queensland.**—At 30th June, 1929 the area acquired or set apart for soldier settlement (1914-18 War) was 577,633 acres, of which 41,101 acres comprised private land, purchased at a cost of £270,480. The number of farms occupied was 1,148, containing 440,992 acres. Some of these selections were acquired under the ordinary provisions of the Land Act, and do not include areas specially set apart for soldiers.

As special records are not now kept respecting the areas held by discharged soldier settlers, later information cannot be given.

5. **South Australia.**—At 30th June, 1951 the area of land acquired or set apart for soldier settlement (1914-18 War) was 1,336,612 acres, of which 1,202,653 acres comprised private land purchased at a cost of £3,863,572. These figures exclude mortgages discharged, £494,770, on 360,493 acres, representing 300 farms, etc., and 314 settlers. The number of soldiers to whom assistance had been granted under the Discharged Soldiers' Settlement Acts up to 30th June, 1951 was 4,165, and the area of farms, etc. (including mortgages discharged) on which assistance had been granted was 2,746,744 acres. At 30th June, 1951 farms, etc., occupied numbered 1,057 containing 539,156 acres.

6. **Western Australia.**—At 30th June, 1947 the area of private land acquired for soldier settlement (1914-18 War) was 345,110 acres purchased at a cost of £605,076. To that date, assistance had been given to 5,213 returned soldiers, and the number of farms, etc., occupied was 1,145. No further land has been purchased for returned soldiers of the 1914-18 War.

Owing to the amalgamation of records in the Rural and Industries Bank, information regarding assistance to returned soldiers is no longer available, but at 30th June, 1944 the area of land acquired or set apart for soldier settlement was 14,287,643 acres.

7. **Tasmania.**—At 30th June, 1951 the area acquired or set apart for soldier settlement (1914-18 War) was 367,430 acres, of which 280,300 acres comprised private land purchased at a cost of £2,113,157. Up to 30th June, 1951 the number of settlers to whom farms, etc., had been allotted was 2,392, and the number of farms, etc., allotted was 2,215 containing 347,993 acres. The number of farms, etc., occupied at 30th June, 1951 was 639 containing 122,736 acres.

8. **Losses on Soldier Settlements.**—For information regarding the financing arrangements for soldier settlement after the 1914-18 War, and the losses which occurred in connexion with it, see earlier issues of the Official Year Book, in particular, No. 28, pp. 131-2.

## § 9. Settlement of Returned Service Personnel : 1939-45 War.

1. **War Service Land Settlement Scheme.**—(i) *General.* The War Service Land Settlement Agreements Act 1945 authorized the execution by or on behalf of the Commonwealth of agreements between the Commonwealth and the States for proposals to settle discharged members of the Forces and other eligible persons on land in the States. The proposals were subsequently ratified by the States, and the agreements were signed in November, 1945.

For more detailed information about the agreements and the methods of operation and administration of the scheme see Official Year Book No. 37, pp. 113-8, and issue No. 39 contains a brief general description of the scheme.

(ii) *Summary of Operations to 30th June, 1952.* The tables hereunder show the operations of the War Service Land Settlement Scheme in each State up to 30th June, 1952.

Loss on advances ..	..	14	884	..	959	..	1,857
<b>Total .. ..</b>	<b>698,594</b>	<b>395,820</b>	<b>171,727</b>	<b>8,103,143</b>	<b>12,269,681</b>	<b>3,578,022</b>	<b>25,216,987</b>

Repayments of expenditure to 30th June, 1952 on the acquisition, development and improvement of land amounted to £1,602,763, on the provision of credit facilities to settlers to £1,971,699, and on the payment of living allowances to settlers to £3,000, so that the total expenditure was reduced by £3,577,462 to £21,639,525. In addition, miscellaneous receipts in South Australia, Western Australia and Tasmania to 30th June, 1952 amounted to £413,620.

2. *Loans and Allowances (Agricultural Occupations) Scheme.*—(i) *General.* Full details of the measures taken to provide for the re-establishment of ex-servicemen in rural occupations are contained in Official Year Book No. 37, pp. 117-8.

(ii) *Loans (Agricultural Occupations).* The following table shows particulars for each State and certain Territories to 30th June, 1952 :—

**LOANS (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 30th JUNE, 1952.**

(a) After deduction of loans declined after approval—£1,215,803.

(b) Includes advances from principal repaid by borrowers.

These loans are made to eligible ex-servicemen for the purchase of land, effecting improvements on land, the acquisition of tools of trade, live-stock, plant or equipment, the establishment of a co-operative business with other persons, reduction or discharge of a mortgage, bill of sale, etc.

(iii) *Allowances (Agricultural Occupations).* The following table shows details for each State and New Guinea to 30th June, 1952:—

**ALLOWANCES (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 30th JUNE, 1952.**

State.	Applications.			Advanced by Commonwealth Treasury to Bank.	Allowances Paid.
	Received.	Approved.	Rejected, Withdrawn or Not Yet Approved.		
				£	£
New South Wales ..	4,056	3,609	447	582,000	575,574
Victoria ..	3,062	2,309	753	296,000	295,334

Tasmania ..	623	513	110	112,000	111,458
New Guinea ..	3	2	1	551	551
Total ..	15,992	13,260	2,732	2,255,051	2,244,458

(a) Includes allowances paid to four ex-servicemen in Northern Territory.

These allowances are payable only in respect of the period during which the income derived from the occupation by the ex-serviceman concerned is considered inadequate.

3. **War Service Land Settlement Division—Total Expenditure.**—The following table shows details, by States and Territories, of the total expenditure of the War Service Land Settlement Division for the years 1945-46 to 1951-52, and the aggregate to 30th June, 1952. The aggregate, £35,780,683, includes—War Service land settlement, £25,216,987; agricultural loans, £6,200,145; agricultural allowances, £2,255,051; administrative expenses, £725,487; rural training, £1,383,013.

**COMMONWEALTH WAR SERVICE LAND SETTLEMENT DIVISION : EXPENDITURE.**

Total to 30th June, 1952 ..	4,585,965	2,323,183	1,407,478	9,116,897	14,216,205	4,115,660	10,748	4,547	35,780,683

After deducting repayments of expenditure to 30th June, 1952 which amounted to £3,577,462 and miscellaneous receipts (£1,972,521), the net expenditure to 30th June 1952 was £30,230,700.

**§ 10. Advances to Settlers.**

1. **General.**—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory appears in preceding issues of the Official Year Book (*see* No. 22, pp. 179-186).

The summaries of loans and advances in the following paragraphs are compiled from returns supplied by the various State government lending agencies in the several States. They include the transactions in lands acquired under closer and soldier settlement schemes, but exclude the balances owing on former Crown lands sold on the conditional purchase, etc., system.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of reappraisements of land values and the writing down of debts. In general, they include both principal and interest outstanding.

A summary for Western Australia is not included, as practically the only Governmental funds being made available are Commonwealth (see § 9 above).

In New South Wales and Victoria expenditure on the acquisition, development and improvement of land for war service land settlement is provided for by the States, and particulars thereof are included in the respective summaries. In Queensland no money is paid for the value of the land acquired, most land being occupied on lease from the Government, but advances in respect of improvements are included. In the other States, this expenditure is provided for by the Commonwealth and particulars are included in § 9 above.

Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945 and certain advances for the purchase of wire-netting and for other purposes made from finance provided by the Commonwealth are included in the summaries following.

2. New South Wales.—The following table shows particulars respecting advances, etc., under State Authorities to 30th June, 1951 :—

#### ADVANCES TO SETTLERS, ETC. : NEW SOUTH WALES.

(a) Reductions in figures due to adjustment of cancelled and re-allotted holdings.

6. Western Australia.—The operations prior to 1945 covered in this section related to moneys made available through, or by, the old Agricultural Bank and other Government Departments for the purpose of agricultural development. On 1st October, 1945, however, the Agricultural Bank was reconstituted as the Rural and Industries Bank of Western Australia, and was given authority to operate similarly to the associated banks. Certain securities in the books of the old bank were taken over by the general banking division of the new bank, and the clients concerned then operated with privileges and obligations similar to those provided by other banking institutions. The majority of the remaining securities, also, were eventually transferred.

At present, very limited funds are being made available by the State Government for advances for agricultural development, the bulk of the moneys for this purpose being provided by the Commonwealth Government under the War Service Land Settlement and Commonwealth Re-establishment and Employment Acts. Particulars of this expenditure are shown in § 9 above.

7. Tasmania.—The following table shows particulars of advances under State Authorities to 30th June, 1951. Although not regarded as outstanding advances by the Department of Agriculture the figures in connexion with closer and soldier land settlement have been included in the table for comparative purposes; the areas so purchased have been leased on 99-year terms having an option of purchase which the leaseholder may exercise at any time.

(a) Excludes £11,161 forfeited properties. (b) Excludes £202,406 advances capitalized, £79,114 advances written off to bad debts, and £40,789 written off to revaluation. (c) Not regarded as outstanding advances by the Department. (d) Number of leaseholders, including those to whom advances have been made.

8. Northern Territory.—During the financial year 1950-51 one advance totalling £600 was made. The total amount advanced to 30th June, 1951, was approximately £27,570. At 30th June, 1951 the balance outstanding from 7 settlers, including interest, was £1,214.

9. Summary of Advances.—The following table is a summary for each State (except Western Australia) and the Northern Territory to the 30th June, 1951. The particulars, so far as they are available, represent the total sums advanced to settlers, including amounts spent by the various Governments in the purchase and improvement of estates disposed of by closer and soldier land settlement, while the amounts outstanding reveal the present indebtedness of settlers to the Governments, including arrears of principal and interest but excluding amounts written off debts and adjustments for land revaluations. Particulars of Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945 and of certain advances for wire-netting and other purposes provided from Commonwealth funds are included.

ADVANCES TO SETTLERS, ETC. : SUMMARY.

State.	Advances, etc., made during 1950-51.	Total Advances, etc., at 30th June, 1951.	Balance outstanding at 30th June, 1951.

(a) Includes expenditure on acquisition, development and improvement of land for war service land settlement (see p. 86). (b) Incomplete. (c) Number of accounts.

### § 11. Alienation and Occupation of Crown Lands.

1. **General.**—The figures shown in the previous parts of this chapter show separately the areas alienated, in process of alienation, or occupied under various tenures. The following tables set out the position in regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during the latest year for which information is available—1951 in all cases. A summary for each State and Territory and for Australia as a whole is also supplied. Particulars for each year from 1940 to 1950 appear in *Primary Industries Bulletin* No. 45, Part 1.—Rural Industries, page 7. The area occupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases and licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of New South Wales is 198,037,120 acres, of which 25.8 per cent. had been alienated at 30th June, 1951; 7.3 per cent. was in process of alienation; 58.8 per cent. was held under leases and licences; and the remaining 8.1 per cent. was unoccupied, or held by the Crown.

The following table shows particulars as at 30th June, 1951 :—

#### ALIENATION AND OCCUPATION OF CROWN LANDS : NEW SOUTH WALES. 30th JUNE, 1951.

(Acres.)

Particulars.	Area.	Particulars.	Area.
<b>1. Alienated.</b>		<b>3. Held under Leases and Licences.</b>

<b>Total</b> .. ..	<b>14,429,900</b>	<b>5. Total Area of State</b> .. ..	<b>198,037,120</b>

(a) At 31st December, 1950.

(b) Excludes lands held by virtue of miners' rights and business licences; also lease areas applied for, and in occupation, under the Mining Act 1906, but not yet confirmed.

3. **Victoria.**—The total area of Victoria is 56,245,760 acres, of which 53.7 per cent. had been alienated up to the end of 1951; 4.8 per cent. was in process of alienation under deferred payments and closer settlement schemes; 17.4 per cent. was occupied under leases and licences; and 24.1 per cent. was unoccupied or held by the Crown.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : VICTORIA,  
31st DECEMBER, 1951.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. <i>Alienated</i> .. .. .	30,179,235	3. <i>Leases and Licences held—</i> Under Lands Department—	
		Perpetual Leases .. .. .	78,862
		Agricultural College Leases .. .. .	42,524
		Other Leases and Licences .. .. .	19,908
		Temporary (Yearly) Grazing Licences .. .. .	8,567,461
		Under Mines Department(a) .. .. .	1,096,495
		Total .. .. .	9,805,250
2. <i>In Process of Alienation—</i> Exclusive of Mallee and Closer Settlement Lands .. .. .	375,470	4. <i>Occupied by the Crown or Un-</i> <i>occupied</i> .. .. .	13,565,416
Mallee Lands (exclusive of Closer Settlement Lands) .. .. .	1,788,672		
Closer Settlement Lands .. .. .	531,684	5. <i>Total Area of State</i> .. .. .	56,245,760
Village Settlement .. .. .	33		
Total .. .. .	2,695,859		

(a) Includes State Coal Mine area, 7,575 acres and State Electricity Commission area, 2,800 acres.

4. *Queensland.*—The total area of this State is 429,120,000 acres, of which, on 31st December, 1951, 5.6 per cent. was alienated; 0.9 per cent. was in process of alienation; and 83.8 per cent. was occupied under leases and licences. The remainder, 9.7 per cent., was either unoccupied or held as reserves or for roads.

The distribution is shown in the following table :—

ALIENATION AND OCCUPATION OF CROWN LANDS : QUEENSLAND,  
31st DECEMBER, 1951.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. <i>Alienated—</i>		3. <i>Occupied under Leases and</i> <i>Licences—</i>	
By Purchase .. .. .	23,706,878	Pastoral Leases .. .. .	243,540,400
Without Payment .. .. .	92,116	Occupation Licences .. .. .	17,881,520
		Grazing Selections and Settle- ment Farm Leases .. .. .	87,197,446
		Leases—Special Purposes .. .. .	(a) 1,795,851
		Mining Leases .. .. .	499,833
		Perpetual Leases—Selections and Perpetual Lease Prickly Pear Selections .. .. .	6,531,982
		Auction Perpetual Leases, etc. Forest Grazing Leases (of Reserves) .. .. .	(b) 514,171
		Total .. .. .	359,643,823
Total .. .. .	23,798,994	4. <i>Reserves (net, not leased), Surveyed</i> <i>Roads and Surveyed Stock</i> <i>Routes</i> .. .. .	22,342,039
2. <i>In Process of Alienation</i> .. .. .	3,951,220	5. <i>Unoccupied</i> .. .. .	19,383,924
		6. <i>Total Area of State</i> .. .. .	429,120,000

(a) Special leases of Crown Land, 577,849 acres; special leases of reserves, 1,218,002 acres.  
(b) Includes 481,157 acres over which perpetual country leases were granted to Queensland-British Food Corporation.

5. **South Australia.**—The area of South Australia is 243,244,800 acres and at 30th June, 1951, 5.7 per cent. was alienated, 0.2 per cent. in process of alienation; 71.4 per cent. occupied under leases and licences; and 22.7 per cent. occupied by the Crown or unoccupied.

The following table shows the distribution :—

**ALIENATION AND OCCUPATION OF CROWN LANDS : SOUTH AUSTRALIA,  
30th JUNE, 1951.  
(Acres.)**

Particulars.	Area.	Particulars.	Area.
1. <i>Alienated</i> —		3. <i>Held under Lease and Licence</i> —	
Sold .. .. .	13,774,929	Perpetual Leases, including Ir-	
Granted for Public Purposes .. .	135,419	rigation Leases .. .. .	18,632,080
		Pastoral Leases .. .. .	115,382,699
		Other Leases and Licences .. .	2,868,328
		Mining Leases and Licences .. .	36,669,380
Total .. .. .	13,910,348	Total .. .. .	173,553,087
		4. <i>Area Unoccupied (a)</i> .. .. .	55,276,041
2. <i>In Process of Alienation</i> .. .. .	505,324	5. <i>Total Area of State</i> .. .. .	243,244,800

(a) Includes surveyed roads, railways and other reserves, salt water lakes, lagoons, and fresh water lakes.

6. **Western Australia.**—The total area of Western Australia is 624,588,800 acres, of which, at 31st December, 1951, 3.6 per cent. was alienated; 1.9 per cent. was in process of alienation; and 32.8 per cent. was occupied under leases and licences issued either by the Lands, Mines or Forests Departments. The balance of 61.7 per cent. was unoccupied.

The following table shows the distribution :—

**ALIENATION AND OCCUPATION OF CROWN LANDS : WESTERN AUSTRALIA,  
31st DECEMBER, 1951.  
(Acres.)**

Particulars.	Area.	Particulars.	Area.

(a) Includes reservations for roads and various other public purposes, 4,042,810 acres, lands occupied by Commonwealth or State Departments, 21,775 acres and land acquired for Soldier and Closer Settlement but not leased, 163,482 acres.

8. **Northern Territory.**—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1951, only 0.1 per cent. was alienated; 51.3 per cent. was held under leases and licences; 13.6 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 35.0 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1951 :—Alienated, 455,322 acres; leased—pastoral leases, 129,266,284 acres, other leases, licences and mission stations, 42,574,771 acres, total leased, 171,841,055 acres; reserved for aboriginal, defence and public requirements, 45,647,537 acres; unoccupied and unreserved, 117,172,886 acres: total, 335,116,800 acres.

9. **Australian Capital Territory.**—Alienated land of the Territory (excluding the Jervis Bay area) at the end of 1951 comprised 10.9 per cent. of the total area; land in process of alienation 7.0 per cent.; land held under lease and licence 54.5 per cent.; land otherwise occupied, including city tenures, 11.4 per cent.; and unoccupied 16.2 per cent.

The following are the particulars of land areas in the Australian Capital Territory at the end of 1951 :—Alienated, 63,635 acres; in process of alienation, 41,053 acres; leased—grazing, agricultural, etc., leases, 310,620 acres, grazing licences, 7,174 acres, total leased, 317,794 acres; otherwise occupied, 66,190 acres; unoccupied, 94,128 acres; total, 582,800 acres. Including the Jervis Bay area of 18,000 acres—12,788 acres leased and 5,212 acres otherwise occupied—the grand total for the whole Territory is 600,800 acres.

10. Summary.—The following table provides a summary for each State and Territory, and for Australia as a whole, of the alienation and occupation of Crown lands in 1951 :—

(a) At 30th June.

(b) At 31st December.

The diagram on page 89 shows in graphical form the areas alienated from the State, those in process of alienation under the various systems of deferred payments, the areas held under leases or licences and the areas left unoccupied.

## CHAPTER V. TRANSPORT AND COMMUNICATION.

### A. SHIPPING.

#### § 1. System of Record.

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and, therefore, only one entry and one clearance is counted for each voyage, without regard to the number of States visited (*see also* Section 5 following, paragraph 1).

On the arrival at, or departure from, a port in Australia, whether from or for an oversea country or from another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month the information so obtained is forwarded to this Bureau. This arrangement has been in operation since 1st July, 1924.

The volume of the vessel, as distinct from the cargo it carries, is recorded in net tons, i.e., the gross tonnage or internal cubic capacity less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo. It is thus a rough measure of the capacity of the vessel for cargo or passengers. The unit of measurement is the *ton register* of 100 cubic feet.

Cargo is recorded in *tons weight* or in *tons measurement* (40 cubic feet).

From 1st July, 1914 the Trade and Shipping of Australia have been recorded for the fiscal years ending 30th June.

Particulars of vessels exclusively engaged in transporting troops and war materials during the 1939-45 War years are excluded from the following tables of "oversea" and "interstate" shipping movement which, therefore, relate only to vessels engaged in normal trade (i.e., carrying part or full cargo for civil purposes), and are strictly comparable with pre-war and post-war figures.

#### § 2. Oversea Shipping.

1. **Total Movement.**—The following table shows the number of entrances and clearances combined of oversea vessels at Australian ports, and the aggregate net tonnage, during each of the years 1921-22 to 1950-51:—

#### OVERSEA SHIPPING : ENTRANCES AND CLEARANCES (COMBINED) OF VESSELS DIRECT, AUSTRALIA.

Year.	Vessels.	Net Tons.	Year.	Vessels.	Net Tons.	Year.	Vessels.	Net Tons.
		'000.			'000.			'000.
1921-22	3,111	9,081	1931-32	3,057	11,396	1941-42	2,554	10,768
1922-23	2,935	9,241	1932-33	3,114	11,842	1942-43	2,025	8,113
1923-24	3,122	9,923	1933-34	2,774	10,764	1943-44	2,380	9,687
1924-25	3,449	11,201	1934-35	3,139	11,889	1944-45	2,147	9,133
1925-26	3,156	10,669	1935-36	3,260	12,545	1945-46	2,371	10,693
1926-27	3,261	11,164	1936-37	3,297	12,612	1946-47	2,489	10,406
1927-28	3,167	10,925	1937-38	3,809	14,221	1947-48	2,949	11,928
1928-29	3,175	11,097	1938-39	3,814	13,546	1948-49	3,486	15,013
1929-30	3,061	10,944	1939-40	3,362	13,076	1949-50	3,907	17,378
1930-31	3,107	11,250	1940-41	2,669	11,268	1950-51	3,903	17,307

The average tonnage per vessel has risen from 2,919 tons per vessel in 1921-22 to 4,449 tons in 1949-50 and 4,434 tons in 1950-51.

Particulars of the total oversea movement of shipping for each year from 1822 to 1920-21 will be found in Official Year Book No. 15, p. 507.

2. **Total Oversea Shipping, States.**—The following table shows, for each State, the number of entrances and clearances of vessels direct from and to oversea countries, and the aggregate net tonnage, during the year 1950-51 :—

**OVERSEA SHIPPING : ENTRANCES AND CLEARANCES OF VESSELS DIRECT,  
STATES, 1950-51.**

3. **Shipping Communication with various Countries.**—Records of the number and tonnage of vessels arriving from and departing to particular countries, as they are invariably made, may be misleading for the reason that the tonnage of a vessel can be recorded against one country only, notwithstanding that the same vessel on the same voyage may carry cargo or passengers to or from Australia from or to several countries. For instance, a mail steamer on a voyage from the United Kingdom to Australia, through the Suez Canal, may call at Marseilles, Genoa, Port Said, Aden and Colombo, yet can be credited only to the United Kingdom, the country where the voyage commenced, to the exclusion of all of the others from the records. Also a number of vessels touch at New Zealand ports on their voyages to and from the United States of America and Canada, but their tonnages are not included in the records of Australian shipping trade with New Zealand. Similarly, the record of shipping engaged in trade between Australia and the United Kingdom via South African ports does not show tonnage to and from South Africa, the whole of it being included in the figures for United Kingdom. In view of this defect, statistics relating to the direction of the shipping to and from Australia are restricted to the following tables in which countries situated on the main trade

routes are grouped together. This grouping into larger geographical divisions to some extent avoids the limitations referred to, except, as already pointed out, in the case of Africa and New Zealand.

**OVERSEA SHIPPING : COUNTRY GROUPS FROM WHICH ENTERED OR TO WHICH CLEARED, AUSTRALIA.**

(a) See explanation above.

4. Nationality of Oversea Shipping.—Owing to war conditions, the proportion of shipping of British nationality progressively declined from 72.82 per cent. of the total tonnage entered in 1938-39 to 43.40 per cent. in 1943-44. On the other hand, the proportion of United States of America shipping visiting Australia during the same period advanced from 2.61 per cent. in 1938-39 to 33.07 per cent. in 1943-44. Thereafter the trend was reversed, and in 1950-51 the proportion of British shipping entered was 70.83 per cent. and of American 2.34 per cent.

Particulars of the nationality of overseas shipping which entered Australia during the five years ended 30th June, 1951 and the year 1938-39 are given in the following table:—

**OVERSEA SHIPPING : ENTRANCES ACCORDING TO NATIONALITY OF VESSELS, AUSTRALIA.**

The Australian tonnage which entered Australia from overseas during the year 1950-51 represented 2.49 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Island trade.

The proportion of overseas shipping tonnage which entered Australia in cargo ranged, in the years shown, between about 80 per cent. and 95 per cent., the lowest percentage being 79.37 in 1947-48 and the highest 95.35 in 1950-51. The proportion of shipping which cleared in cargo, however, declined from 87.64 per cent. in 1938-39 to 70.85 per cent. in 1950-51, the trend over the period being generally downward.

### § 3. Shipping at Principal Ports.

1. Total Shipping, Australia.—The following table shows the total volume of shipping—oversea, interstate and coastwise—which entered the principal ports of Australia during the years 1947-48 to 1950-51 compared with 1938-39. Warships are excluded from the table.

**§ 4. Vessels Built and Registered.**

1. **Vessels Built.**—The following table shows the number and tonnage of vessels built in Australia during each of the calendar years 1938 and 1947 to 1951, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, does not, however, make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

3. World Shipping Tonnage.—Issues of the Official Year Book prior to No. 39 contained tables, compiled from *Lloyd's Register of Shipping*, showing the number and gross tonnage of steam, motor and sailing vessels owned by the various maritime countries of the world. The tables are not repeated in this issue, but the following information is derived from the same source. At 1st July, 1951, the total steamers, motorships and sailing vessels of 100 gross tons and upwards throughout the world amounted to 32,112 with a gross tonnage of 87,961,000. Of these totals, steamers numbered 18,873 for 63,809,000 gross tons, motorships, 12,353 for 23,436,000 gross tons and sailing vessels and barges 886 for 716,000 gross tons. In addition, there were 2,271 oil tankers of 1,000 gross tons and upwards with a gross tonnage of 18,210,000. Australian steamers, motorships and sailing vessels, 357 for 557,000 gross tons, constituted 1.11 per cent. and 0.63 per cent. respectively of the total numbers and tonnage. There were no Australian oil tankers of 1,000 gross tons and upwards registered.

### § 5. Interstate Shipping.

1. **System of Record.**—*Interstate Shipping* comprises two elements: (a) Vessels engaged solely in interstate trade; and (b) Vessels trading between Australia and oversea countries and in the course of their voyage proceeding from one State to another. (It should be mentioned that these vessels, except under special circumstances, do not engage in interstate carrying.) No complexity enters into the record of those in category (a), but with regard to the method of recording the movements of the oversea vessels (b) some explanation is necessary. Each State desires that its shipping statistics (which are prepared in this Bureau) should show in full its shipping communication with oversea countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an oversea country—say United Kingdom—*via* another State, is recorded in the second State as from United Kingdom *via States*, thus distinguishing the movement from a direct oversea entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from United Kingdom *via* other States. On an inward voyage the *clearance* from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movement, must for the individual States be recorded as “Oversea *via* other States” or “Interstate” according to the direction of the movement. The significance of the record of these movements will be more clearly seen from the following tabular presentation of the inward and outward voyages to and from Australia of a mail steamer which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—*via* South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, and retrace its inward track.

#### ITINERARY OF AN OVERSEA VESSEL ON AUSTRALIAN COAST.

Particulars.	Recorded as—	
	For the State and for Australia.	For the States.
<b>Inward Voyage—</b>		
Enters Fremantle from United Kingdom	Oversea direct	
Clears Fremantle for Adelaide . . . . .	.. ..	Interstate direct
Enters Adelaide from United Kingdom	.. ..	.. .. Oversea <i>via</i> States
<i>via</i> Fremantle . . . . .	.. ..	.. .. Interstate direct
Clears Adelaide for Melbourne . . . . .	.. ..	.. .. Oversea <i>via</i> States
Enters Melbourne from United Kingdom	.. ..	.. .. Interstate direct
<i>via</i> Adelaide . . . . .	.. ..	.. .. Oversea <i>via</i> States
Clears Melbourne for Sydney . . . . .	.. ..	.. .. Interstate direct
Enters Sydney from United Kingdom <i>via</i>	.. ..	.. .. Oversea <i>via</i> States
Melbourne . . . . .	.. ..	.. ..
<b>Outward Voyage—</b>		
Clears Sydney for United Kingdom <i>via</i>	.. ..	.. .. Oversea <i>via</i> States
Melbourne . . . . .	.. ..	.. .. Interstate direct
Enters Melbourne from Sydney . . . . .	.. ..	.. .. Oversea <i>via</i> States
Clears Melbourne for United Kingdom <i>via</i>	.. ..	.. .. Interstate direct
Adelaide . . . . .	.. ..	.. .. Oversea <i>via</i> States
Enters Adelaide from Melbourne . . . . .	.. ..	.. .. Interstate direct
Clears Adelaide for United Kingdom <i>via</i>	.. ..	.. .. Oversea <i>via</i> States
Fremantle . . . . .	.. ..	.. .. Interstate direct
Enters Fremantle from Adelaide . . . . .	.. ..	.. .. Oversea <i>via</i> States
Clears Fremantle for United Kingdom . .	Oversea direct	

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (a) The aggregate of all ships recorded for each State as “Oversea *direct*” gives the oversea shipping for Australia as a whole;

(b) the aggregate for all ships recorded in any State as "Oversea direct" plus those recorded as "Oversea via States" gives the total *oversea shipping* for that State; and (c) the aggregate for all ships recorded as "Oversea via States" may also be used, together with those recorded as "Interstate direct", to furnish figures showing the total *interstate movement of shipping*.

It should be remembered, however, that all oversea vessels do not follow the same itinerary as the vessel in the table above.

2. Interstate Movement.—(i) *Interstate direct*. The following table shows the number of entrances and the net tonnage of vessels recorded into each State from any other State (including oversea vessels on interstate direct voyages) during each of the years 1946-47 to 1950-51 compared with the year 1938-39. The shipping of the Murray River, between the States of New South Wales, Victoria and South Australia, is excluded :—

**INTERSTATE MOVEMENT OF SHIPPING : ENTRANCES OF VESSELS INTERSTATE DIRECT.**

<b>Australia .. ..</b>	<b>19,900</b>	<b>10,140</b>	<b>10,409</b>	<b>13,066</b>	<b>13,438</b>	<b>13,933</b>

From 1938-39 the total net tonnage of interstate shipping declined steadily each year up to 1942-43, when it represented only 38 per cent. of the total for the pre-war year. It remained practically unchanged during the next three years, but increased by over 29 per cent. in 1946-47. There was little change in 1947-48, the tonnage for that year being about 52 per cent. of the 1938-39 total. By 1950-51 the total had risen to 70 per cent. of the 1938-39 total.

(ii) *Oversea via States*. To ascertain the aggregate movement of shipping between the States, including the total interstate movements of oversea vessels, the figures in the following table, which show the number of entrances and clearances of vessels to and from oversea countries via other Australian States and the aggregate tonnage, must be added to those in the preceding table.

**INTERSTATE MOVEMENT OF SHIPPING : ENTRANCES AND CLEARANCES OF VESSELS OVERSEA VIA OTHER AUSTRALIAN STATES, 1950-51.**

(a) Includes Netherlands East Indies.

Owing to war conditions the proportion of cargo carried in British vessels decreased from 72.43 per cent. in 1938-39 to 41.37 in 1943-44, but increased to 77.51 per cent. in 1946-47. It has since declined again to 69.32 per cent. in 1950-51.

### § 7. Control of Shipping.

1. **War-time Control.**—An account of the action taken by the Commonwealth Government to control and regulate shipping throughout Australian waters during the 1939-45 War is given in Official Year Book No. 36, pp. 121-130.

2. **Post-war Control and Developments.**—A brief account of the post-war control of shipping and the establishment of the Australian Stevedoring Industry Board and the Australian Shipping Board will be found in Official Year Book No. 39, pp. 147-8.

As at 1st November, 1952, the Australian Shipping Board operated 38 vessels totalling 156,344 gross tons, of which seven vessels totalling 47,030 gross tons were operated on time charter from private owners. The Government-owned tonnage, totalling 114,534 gross tons (of which three vessels totalling 4,203 gross tons were on charter to private companies or other shipping organizations), comprised thirteen "A" or River Class vessels of an average of 5,150 gross tons, two "B" Class vessels of an average of 3,952 gross tons, nine "D" Class vessels of an average of 2,326 gross tons, five "G" Class vessels of an average of 584 gross tons, all of which were built in Australian yards, plus five vessels, totalling approximately 16,000 gross tons, which were built overseas.

In the international sphere, ratification is still being awaited from 21 ship-owning nations of a Convention establishing an Inter-Governmental Maritime Consultative Organization within the framework of the United Nations. The major objectives of this Organization are to provide machinery for co-operation among Governments with shipping engaged in international trade, and to encourage the removal by Governments of discriminatory action and unnecessary restrictions regarding such shipping.

This Organization is designed to replace the United Maritime Consultative Council which was established on a tentative basis after the expiry of the war-time United Maritime Authority and Combined Adjustment Board.

### § 8. Miscellaneous.

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars were available was published in *Transport and Communication Bulletin* No. 14.

2. **Distances by Sea.**—The distances by sea between the ports of the capital cities of Australia and the most important ports in other countries which trade with Australia are shown in *Transport and Communication Bulletin* No. 43.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* shows a list of the ruling freight rates for general merchandise in respect of both oversea and interstate shipments. At 31st December, 1952, the rate for general merchandise from Australia to the United Kingdom and Continent was 155s. od. per ton weight or measurement while the rates for wheat (bagged) and wool (greasy) were respectively 110s. od. per ton weight and 2.57d. less 7 per cent. per lb. These rates, which are expressed in sterling, are subject to an adjustment of 25½ per cent. when freight is prepaid in Australia.

4. **Depth of Water at Main Ports.**—A table, compiled from information supplied by the Director of Navigation, showing the depth of water available and tides at principal ports of Australia at 1st January, 1953, is included in *Transport and Communication Bulletin* No. 43.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a Magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping casualties reported on or near the coast during the years 1947 to 1951 are shown in the table below. This information also was furnished by the Director of Navigation :—

#### TOTAL SHIPPING CASUALTIES AND LOSSES : AUSTRALIA.

Year.	Total Losses of Vessels.			Total Casualties to Vessels.		
	Number.	Net Tons.	Lives Lost.	Number.	Net Tons.	Lives Lost.
1947 ..	2	396	..	151	442,685	10
1948 ..	1	113	..	206	652,047	..
1949 ..	3	3,795	12	155	435,935	12
1950 ..	4	9,735	20	191	611,084	22
1951 ..	5	2,908	5	205	650,718	5

6. **Commonwealth Navigation and Shipping Legislation.**—By Section 51 (i) of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws in respect of trade and commerce with other countries and among the States. By Section 98 the power in this particular respect is further defined as extending to navigation and shipping.

The first essay in the way of legislation in this direction was made in March, 1904, when a Bill for a Navigation and Shipping Act was introduced in the Senate by the Attorney-General of the first Deakin Administration. This Bill was withdrawn at an early stage for further consideration and redrafting. The Deakin Ministry resigned in April, 1904, and the succeeding Watson Government, in view of the far-reaching and important character of the matters comprehended in the measure, decided to refer the Bill for consideration and report to a Royal Commission. In 1905 the Commission presented a Draft Bill, the main principles of which, insofar as they affected oversea shipping, were then, at the invitation of the Imperial Government, considered at an Imperial Shipping Conference held in London in 1907, at which representatives of Great Britain, Australia, and New Zealand were present. The Conference considered, *inter alia*, the following recommendation of the Royal Commission:—"That the coastal trade of the Commonwealth be reserved for ships on the Australian Register, or ships conforming to Australian conditions, and licensed to trade on the Australian coast": and recommended:—"That the vessels to which the conditions imposed by the law of Australia or New Zealand are applicable should be (i) vessels registered in the colony, while trading therein, and (ii) vessels wherever registered, while trading on the coast of the colony". Further modifications were made in the draft (by the Royal Commission) to conform to the resolutions of the Conference, and the resultant Bill was re-introduced in the Senate in September, 1907, by the second Deakin Administration. Owing to pressure of other business, however, it lapsed. The Bill was again introduced in the Senate in September, 1908, but again it lapsed; proceedings were resumed in 1909, but again the Bill lapsed. It was brought in again in 1910 by the second Fisher Administration, revived in 1911, lapsed again, and finally became, under the last-mentioned Government, the Navigation Act of 1912. While preparations were being made to bring it into operation, the war broke out, and it was postponed.

In 1919 another Bill was introduced by the Australian National War Government to give the power to proclaim different portions of the Act to commence at different times. This Act (No. 32 of 1919) also extended the operation of the Act to the Territories under the authority of the Commonwealth, and those governed under a Mandate. But in 1925 it was found necessary in the interest of the development of the Territories to issue an Order in Council directing that trade with and in the Territories of Papua and New Guinea should not be deemed to be engaging in the coasting trade. Another amending Act was passed by the same Government in 1920, enabling the Commonwealth to fulfil its obligations under the International Convention for the Safety of Life at Sea, and to grant permits to British ships to trade on the coast in special circumstances. A 1934 amendment brought the Act into line with a new International Convention on Safety of Life at Sea (1929) and with an International Load Line Convention (1930). Further amendments were made in 1942 and by the Statute Law Revision Act (1950). The citation of the Act is now therefore "the Navigation Act, 1912-1950". Still another International Safety of Life at Sea Convention was adopted in 1948 and legislation is being prepared to enable the Commonwealth to ratify it.

The British Merchant Shipping Act 1894 requires that any legislation by the Parliament of a British Possession, repealing wholly or in part any provisions of that Act, shall not take effect until the approval of the Sovereign has been proclaimed in that Possession. All the early Navigation Bills, therefore, had been drawn to commence on dates to be fixed by proclamation after Royal Assent thereto had been proclaimed in the Commonwealth. But as a consequence of the adoption of the Statute of Westminster in 1942, Navigation Bills will no longer be reserved in this manner.

At the conclusion of the 1914-18 War, the proclamation of the 1912 Act could no longer be delayed. In order to make the change as gradual as possible, groups of sections have (under the power granted by the 1919 Act) been brought into operation from time to time. The first group—the Coasting Trade provisions—commenced on 1st July, 1921. Others commenced on the first day of October, 1921, March, 1922, February, 1923, March, 1923, and October, 1923, and the only important sections not yet in operation are those relating to the inspection and testing of anchors, chain cables and gear, and to pilotage.

Soon after the coasting trade provisions commenced, the owners of a number of intra-state ships took steps to have tested the validity of the application to their ships of the manning and accommodation provisions of the Act. The judgment of the High Court was to the effect that those provisions did not apply to vessels engaged *solely* in the domestic trade of a State. In consequence of this judgment, the Government decided not to enforce the provisions of the Act then in force on any intra-state ship, and similarly other sections since brought into force have not been applied to these ships.

Notwithstanding the fact that a considerable amount of shipping has thereby been left to the control of the various State Governments, for all ships trading beyond one State there is uniform procedure in regard to (i) the engagement and discharge of seamen; (ii) the inspection of accommodation provided for crews; (iii) scales of medicines; (iv) the survey of hulls, machinery and gear; (v) the carriage and stowage of cargo; (vi) loadlines; (vii) the adjustment of compasses; (viii) the examination of masters, mates, and engineers for certificates of competency, etc. A system of "sectional" surveys has been introduced, by means of which a ship may have portions of the annual survey carried out at different ports, thereby minimizing interference with the regular time-table.

The Act is in many respects flexible, provision being made for granting relief from some of its most stringent provisions. The provision that the coastal trade of the Commonwealth shall be reserved to Australian ships, or ships conforming to Australian conditions, is contained in Section 288 of the Act, but by Section 286 the Minister has power to grant permits to British ships which do not conform to those conditions, in circumstances where he is satisfied that the licensed service provided is inadequate. Such power is frequently made use of, and, in addition, foreign ships have occasionally been permitted to trade under exemptions granted under Section 422A of the Act.

Another direction in which the provisions of the Act may be varied is in regard to the manning scales, which are contained in Schedules appended to the Act. These scales may be varied by regulation, and Committees of Advice may be appointed to deal with individual cases. The scales in regard to many ships have, under these provisions, been increased or reduced according to the recommendations received by the Department.

The Act is administered by the Marine Branch of the Department of Shipping and Transport, there being, under the Assistant Secretary (Marine), a Director of Navigation and a staff of technical and clerical officers attached to the head office, with a Deputy Director of Navigation and technical and clerical staffs in each State. The Department, when necessary, seeks the advice of a body called the "Marine Council", consisting of six members, representing ship-owners, underwriters, deck and engineer officers, and seamen, with the Director of Navigation, *ex officio*, as Chairman. Any question regarding administration, or the making of regulations, etc., may be referred to the Council for advice, but it is obligatory on the Minister to seek the Council's advice upon all proposed regulations with respect to the scales of officers, crew and provisions.

During the 1939-45 War, a Maritime Industry Commission was established under National Security Regulations to deal with a limited number of industrial questions, and many of its Orders extended or modified provisions of the Navigation Act in regard to officers and seamen.

Other shipping Acts under the Trade and Commerce power of the Commonwealth are the Sea Carriage of Goods Act 1924, the Seamen's Compensation Act 1911-1949, and the Seamen's War Pensions and Allowances Act 1940-1952.

7. **Ports and Harbours.**—A report on "The Turn-round of Ships in Australian Ports" was submitted to the Commonwealth Government by Henry Basten, C.M.G., on 4th January, 1952. The report, which is divided into three sections, deals with all factors affecting the turn-round of ships and congestion in Australian ports and the measures that might be taken to effect improvement on both short-term and long-term bases.

**B. GOVERNMENT RAILWAYS.**

1. **General.**—The policy of Government ownership and control of railways has been adopted in each State and at 30th June, 1951, 24,753 route-miles were owned by the State Governments and 2,201 route-miles by the Commonwealth Government. In the following tables details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line are shown in the *Transport and Communication Bulletin* issued by this Bureau.

In some States, there are comparatively small privately-owned railway systems offering passenger and freight services to the public. Details of these private railways were included in Official Year Book No. 39 and previous issues, but owing to their relative unimportance and the incomplete nature of the statistics available the series has been discontinued.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 will be found in Official Year Books No. 6, p. 681 and No. 22, p. 259. The main ports on the mainland are connected by lines running approximately parallel to the coast and are the focal points of lines which radiate inland to the agricultural, mining and pastoral areas of the continent to a distance which reaches 600 miles at some points. However, Darwin in the Northern Territory is not connected by rail to any other port in Australia. A 3 ft. 6 in. railway extends southward from Darwin to Birdum, a distance of 317 miles, and from Port Augusta in South Australia northwards to Alice Springs in Central Australia, a distance of 771 miles. The report by the late Sir Harold Clapp to the Commonwealth Government, details of which appear in Official Year Book No. 37, p. 146, did not recommend the linking of the termini at Alice Springs and Birdum.\* An all-weather road was built to cover the intervening distance and much goods traffic now passes along this road. The travelling times of trains on the main lines of Australia are being lessened and the haulage capacity increased by the introduction of diesel and diesel-electric locomotives, which in the near future will be the only source of power on the Trans-Australian Railway between Port Pirie and Kalgoorlie.

3. **Standardization of Railway Gauges.**—A summary of the report and recommendations relating to the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge, made in March, 1945 at the request of the Commonwealth Government by the late Sir Harold Clapp, then Director-General of Land Transport, Commonwealth Department of Transport, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States is contained in Official Year Book No. 37 (Chapter V.—Transport and Communication, pp. 146–9). The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had failed to ratify the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949 by each Government concerned. Action was also taken to invite the Victorian Government to discuss the subject of a separate agreement, but to date there has been no legislative action. The Commonwealth–South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth–Three States Agreement, and that over a period of years the Commonwealth should contribute 70 per cent. and South Australia be responsible for the remaining 30 per cent. of the estimated cost of £24,000,000.

4. **Government Railways: Lines under Construction and Lines Authorized, 1950–51.**—  
(i) *Lines under Construction.* In spite of the great extensions of State railways since 1875 and also the construction of various railways by the Commonwealth Government, there are still, in some States, immense areas of country which are as yet practically

\* This is, however, provided for in the Commonwealth–South Australia Agreement referred to in par. 3.

undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States was to extend the existing lines inland in the form of light railways as settlement increased, and while it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting was kept in view.

(a) *New South Wales.* Work continued on the eastern suburbs electric railway and steady progress was made on the St. James to Wynyard section whilst the tunnelling from Haymarket to Town Hall and Central stations was commenced. Plans were prepared for the location of tracks between Town Hall, Martin Place, King's Cross and Bondi Junction together with surveys, boring and tunnelling operations on the preparatory works in other suburbs. The duplication and deviation of the main northern line between Branxton and Muswellbrook and the quadruplication of the Lidcombe to Penrith line, various sections of which were brought into service, continued, and considerable progress was made on the new double-line bridge on the upstream side of the existing bridge over the Parramatta River at Meadowbank. On the Sydney to Newcastle line strengthening and improvement works were carried out. The new goods yard at Cook's River on the Sydney to Botany line was 80 per cent. completed.

(b) *Victoria.* The work on the duplication and electrification of sections of the Gippsland line continued throughout the year. A new section of line between Drouin and Warragul and a section of single track from Darnum to Yarragon were brought into service.

(c) *Queensland.* Duplication of small sections of suburban line were completed and placed in service whilst work continued on the quadruplicate of the Roma Street to Corinda suburban line. Work continued throughout the year on the deviation designed to eliminate the rack service between Moonmerra and Moongan on the Mount Morgan line and this undertaking was completed early in 1952. Reconditioning work was carried out between Almaden and Mount Surprise and contracts were let for the concrete and earthworks on the Callide Coalfield Railway. Drawings for the new high level bridge over the Haughton River at Giru were sufficiently advanced to enable pier construction to be commenced. Plans were made for the layout of new railway workshops at Redbank, the civil engineer's workshop at Banyo and the goods depot at Normanby.

(d) *South Australia.* Work on converting the Naracoorte to Mount Gambier line from 3 ft. 6 in. to 5 ft. 3 in. gauge was continued and by June, 1951, the 5 ft. 3 in. gauge stretched from Adelaide to a point 10 miles south of Naracoorte. Earthworks on this section were completed to within 5 miles of Mount Gambier.

(e) *Other.* At 30th June, 1951, there was no railway construction work in progress in Western Australia or Tasmania or for the Commonwealth Government.

(ii) *Lines Authorized for Construction.* In the States of New South Wales, Victoria, Queensland, South Australia and Western Australia at 30th June, 1951 there were certain lines authorized for construction but not commenced. These lines were authorized many years ago, some as early as 1910 and none later than 1933. Particulars may be found in Official Year Book No. 36, p. 133. There have been no later authorizations.

5. *Grafton-South Brisbane (Uniform Gauge) Line.*—For particulars of the construction of the Grafton-South Brisbane (Uniform Gauge) Line completed in 1930, which constituted the first step towards uniform gauge railway communication between the capitals of the mainland States, see Official Year Books No. 31, p. 122 and No. 38, p. 165.

6. *Mileage Open for Traffic, all Lines.*—Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the conveyance of passengers or the public conveyance of goods.

The following table shows the route-mileage of Commonwealth and State lines open in each State, at different periods since the inauguration of railways in Australia in 1854 up to the year 1950-51:—

**GOVERNMENT RAILWAYS : ROUTE-MILEAGE OPEN.**

<b>Australia ..</b>	<b>6,103</b>	<b>7,293</b>	<b>13,413</b>	<b>115</b>	<b>30</b>	<b>26,954</b>

NOTE.—The table above includes 2,201 miles of Commonwealth Government railways as follows:—4 ft. 8½ in. gauge—South Australia 654 miles, Western Australia 454 miles and Australian Capital Territory 5 miles; 3 ft. 6 in. gauge—South Australia 598 miles and Northern Territory 490 miles.

8. **Summary of Operations, 1950-51.**—In the following table a summary is shown of the working of Government railways open in Australia during the year ended 30th June, 1951 :—

**GOVERNMENT RAILWAYS : SUMMARY OF OPERATIONS, 1950-51.**

Particulars.		Common-wealth Railways.	State Railways.	Total.
Mileage open (route) 30th June, 1951	.. miles	2,201	24,753	26,954
Gross revenue	.. £'000	2,153	103,491	105,644
"    "    per train-mile	.. pence	280.69	286.04	285.93
Working expenses	.. £'000	(a) 2,434	110,338	112,772
"    "    per train-mile	.. pence	317.29	304.94	305.21
Net revenue	.. £'000	— 281	— 6,847	— 7,128
"    "    per train-mile	.. pence	—36.60	—18.93	—19.29
Train-miles run	.. miles '000	1,841	86,835	88,676
Passenger-journeys	.. No. '000	186	475,927	476,113
Tons of goods, etc., carried	.. tons '000	591	40,733	41,324
Average number of employees(b)	.. No.	2,472	125,387	127,859
"    earnings per employee	.. £	581	595	594

(a) Excludes amounts paid for Commissioner's salary (£3,500), Government contributions under the Superannuation Act (£31,005), Accident and Insurance Fund (£11,236) and proportion of salaries of Auditor-General's staff (£1,600). (b) Excludes construction staff.

9. **Summary, States, 1950-51.**—The following table shows particulars of the mileage open, passengers and goods carried, and train-miles run, for Government railways in Australia during 1950-51. Owing to differences in the composition of the figures for the several States, the details of cost of construction and equipment which were given in previous issues of the Official Year Book have been omitted.

**GOVERNMENT RAILWAYS : SUMMARY, 1950-51.**

System.	Mileage Open.(a)		Passenger-journeys.	Goods and Live Stock Carried.	Train-miles Run.(b)
	Route.	Track.			
	Miles.	Miles.	'000.	'000 tons.	'000.
New South Wales	6,113	8,409	268,567	18,324	38,112
Victoria	4,686	6,072	141,313	7,539	14,575
Queensland	6,560	7,484	34,145	7,182	18,562
South Australia	2,553	3,157	17,177	3,794	6,379
Western Australia	4,228	4,789	11,543	3,033	7,136
Tasmania	613	707	3,182	861	2,071
Commonwealth	2,201	2,360	186	591	1,841
Australia	26,954	32,978	476,113	41,324	88,676

(a) At 30th June, 1951.

(b) Excludes assistant and light miles.

10. **Gross Revenue.**—(i) *General.* The gross revenue is composed of (a) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) receipts from the carriage of goods and live stock; and (c) rents and miscellaneous items. The following have been excluded :—State Government grants of £300,000 for the working of country developmental lines in New South Wales; £9,000 towards reduction in outer suburban fares and £1,795,000 to limit interest payments to 1 per cent. on loan liability in Victoria; £1,800,000 towards working expenses and £300,000 towards interest payments in South Australia; and £10,000 for sick leave funds in Tasmania.

(ii) *Coaching, Goods and Miscellaneous Receipts. (a) Summary.* In the following table the gross revenue is shown for the year 1950-51, classified according to the main three sources of receipts, together with the revenue per average mile worked and the revenue per train-mile run :—

**GOVERNMENT RAILWAYS : GROSS REVENUE(a), 1950-51.**

System.	Coaching.	Goods and Live Stock.	Miscellaneous.	Total.	Per Route-mile.	Per Train-mile.
	£'000.	£'000.	£'000.	£'000.	£	d.
New South Wales	15,089	28,351	6,008	49,448	8,089	311
Victoria ..	7,225	9,992	1,434	18,651	3,979	307
Queensland ..	3,973	15,168	631	19,772	3,014	256
South Australia..	1,406	5,305	604	7,315	2,865	275

Tasmania ..	201	1,108	27	1,336	2,180	155
Commonwealth ..	570	1,408	175	2,153	978	281
<b>Australia ..</b>	<b>29,615</b>	<b>66,694</b>	<b>9,335</b>	<b>105,644</b>	<b>3,919</b>	<b>286</b>

(a) Excludes Governmental Grants, see para. 10 (i) above.

(b) *Proportions to Total.* The following table shows for the year 1950-51 the proportion of each class of receipts to the total gross revenue :—

**GOVERNMENT RAILWAYS : PROPORTION OF EACH CLASS OF RECEIPTS TO TOTAL RECEIPTS, 1950-51.**  
(Per Cent.)

System.	Coaching.	Goods and Live Stock.	Miscellaneous.
New South Wales .. .. .	30.52	57.33	12.15
Victoria .. .. .	38.74	53.57	7.69
Queensland .. .. .	20.09	76.72	3.19
South Australia .. .. .	19.22	72.52	8.26
Western Australia .. .. .	16.52	76.94	6.54
Tasmania .. .. .	15.05	82.93	2.02
Commonwealth .. .. .	26.47	65.40	8.13
<b>Australia .. .. .</b>	<b>28.03</b>	<b>63.13</b>	<b>8.84</b>

(iii) *Totals, 1938-39 and 1946-47 to 1950-51.* The following table shows the gross revenues for State and Commonwealth railways for the years 1946-47 to 1950-51 in comparison with the year 1938-39 :—

**GOVERNMENT RAILWAYS : GROSS REVENUE.**  
(£'000.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.	Australia.
1938-39 ..	19,146	9,274	7,798	3,119	3,599	487	547	43,970
1946-47 ..	30,353	13,528	11,033	4,593	4,046	893	1,099	65,545
1947-48 ..	36,906	16,304	11,532	5,079	4,549	958	1,237	76,565
1948-49 ..	39,663	17,259	15,392	5,849	5,090	1,050	1,673	85,976
1949-50 ..	40,121	20,355	15,088	6,512	6,292	1,049	1,875	92,192
1950-51 ..	49,448	18,651	19,772	7,315	6,969	1,336	2,153	105,644

NOTE.—Details of gross revenue classified according to coaching, goods (including live stock) and miscellaneous receipts for the years 1941-42 to 1950-51 are shown in *Transport and Communication Bulletin* No. 42.

11. Working Expenses.—(i) *General*. In order to make an adequate comparison of the working expenses as between the several States and Territories, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same systems. When traffic is light, the proportion of working expenses to revenue is naturally greater than when traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading.

Working expenses, wherever represented in the Railways section of this chapter, exclude interest, sinking fund, exchange and certain other payments (see para. 13 following).

During the war years large amounts were set aside by the Railways as reserves, mainly to provide for depreciation and accrued leave, to be expended as circumstances permit. Particulars of these amounts, which were included in Working Expenses and which in the year 1942-43 aggregated nearly £10,000,000 and over the whole period about £30,000,000, are given in previous issues of the Official Year Book.

(ii) *Working Expenses, Summary, 1950-51*. The following table shows, for the year 1950-51, total working expenses classified according to the main four expenditure headings, together with the working expenses per route-mile and per train-mile and the proportion of working expenses to gross revenue:—

**GOVERNMENT RAILWAYS : WORKING EXPENSES, 1950-51.**

System.	Mainten- ance of Way and Works.	Rolling Stock.	Trans- portation and Traffic.	Other.	Total.	Per Route- mile.	Per Train- mile.	Proportion of Working Expenses to Gross Revenue.
	£'000.	£'000.	£'000.	£'000.	£'000.	£	d.	%
New South Wales	8,353	18,901	11,359	10,555	49,168	8,043	310	99.43
Victoria	3,752	7,031	5,417	4,610	20,810	4,440	343	111.58
Queensland	4,154	9,303	4,756	1,214	19,427	2,961	251	98.26
South Australia	1,530	4,915	2,479	1,068	9,992	3,914	376	136.60
Western Australia	1,430	4,306	1,846	1,350	8,932	2,112	300	128.17
Tasmania	352	879	418	360	2,009	3,278	233	150.35
Commonwealth(a)	557	1,349	379	149	2,434	1,106	317	113.04
Australia	20,128	46,684	26,654	19,306	112,772	4,184	305	106.75

(a) See para. 8, note (a) ante.

(iii) *Totals*. In the following table the total working expenses are shown for the years 1938-39 and 1946-47 to 1950-51:—

**GOVERNMENT RAILWAYS : TOTAL WORKING EXPENSES.**

(£'000.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth. (a)	Australia.
1938-39 ..	14,543	8,060	6,193	2,931	2,911	678	642	35,958
1946-47 ..	25,886	12,916	10,191	5,045	4,424	1,253	1,224	60,939
1947-48 ..	31,015	15,225	10,640	5,947	5,526	1,455	1,439	71,247
1948-49 ..	35,738	17,815	14,164	7,237	6,612	1,613	1,777	84,956
1949-50 ..	39,280	19,983	15,857	8,440	7,387	1,728	1,979	94,654
1950-51 ..	49,168	20,810	19,427	9,992	8,932	2,009	2,434	112,772

(a) See para. 8, note (a) ante.

NOTE.—Details of working expenses under the main four headings are shown for the years 1941-42 to 1950-51 in *Transport and Communication Bulletin* No. 42.

12. **Net Revenue.**—The following table shows, for the year 1950-51, the net revenue, i.e., the excess of gross revenue over working expenses, the amount of such net revenue per route-mile open and per train-mile run, the interest on railway loan expenditure and the profit or loss after paying interest:—

**GOVERNMENT RAILWAYS : NET REVENUE, INTEREST, AND PROFIT OR LOSS, 1950-51.**

System.	Net Revenue.			Interest.	Profit or Loss.
	Total.	Per Route-mile.	Per Train-mile.		
	£'000.	£	d.		
New South Wales ..	280	46	1.76	5,620	-5,340
Victoria ..	-2,159	461	35.56	2,069	-4,228
Queensland ..	345	53	4.46	1,586	-1,241
South Australia ..	-2,677	-1,049	100.71	1,028	-3,705
Western Australia ..	-1,963	464	66.03	717	-2,680
Tasmania ..	673	-1,098	77.97	162	835
Commonwealth ..	(a) - 281	(a) - 128	(a) - 36.60	295	(a) - 576
<b>Australia ..</b>	<b>-7,128</b>	<b>- 264</b>	<b>- 19.29</b>	<b>(b) 11,559</b>	<b>-18,687</b>

(a) See para. 8, note (a) ante. (b) Includes Commonwealth Government share of interest on Uniform Gauge Railway 1950-51. £82,375.

In the graphs accompanying this Chapter the gross and net revenue and working expenses are shown from 1870 to 1951.

13. **Exchange.**—Exchange on interest payments abroad and certain other charges are not included in the table above. These items are not charged against the railways in Queensland and Western Australia and have been excluded for the purposes of comparison. In the remaining States the amounts paid on account of exchange were:—New South Wales, £591,000; Victoria, £157,292; South Australia, £69,612; and Tasmania, £6,070.

14. **Profit or Loss.**—The following table shows, for the years 1938-39 and 1946-47 to 1950-51, the actual profit or loss after deducting working expenses and interest, but excluding exchange, from the gross revenue:—

**GOVERNMENT RAILWAYS : PROFIT OR LOSS AFTER PAYMENT OF WORKING EXPENSES AND INTEREST.**  
(£'000.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth. (a)	Australia.
1938-39 ..	43	- 636	- 37	- 886	- 313	-272	-490	- 2,718
1946-47 ..	- 659	-1,228	- 598	-1,465	-1,411	-460	-463	- 6,366
1947-48 ..	746	- 783	- 539	-1,869	-2,023	-609	-519	- 5,678
1948-49 ..	-1,113	-2,437	- 191	-2,394	-2,585	-676	-413	- 9,892
1949-50 ..	-4,509	-1,563	-1,322	-2,951	-2,188	-800	-402	-13,817
1950-51 ..	-5,340	-4,228	-1,241	-3,705	-2,680	-835	-576	-18,687

(a) See para. 8, note (a) ante.

15. **Traffic.**—(i) *General.* Reference has already been made to the difference in the traffic conditions on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern

and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to seaborne competition. In recent years competition from road and air transport has become an important factor.

The following table shows particulars for the years 1946-47 to 1950-51 in comparison with 1938-39 :—

**GOVERNMENT RAILWAYS : TRAFFIC.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.	Australia.

(a) In Victoria, Queensland and Western Australia a considerable amount of construction work is carried out by private contractors and the staff engaged are therefore not under the control of the Railways Commissioners.

### C. TRAMWAYS.

1. Systems in Operation.—(i) *General.* Tramway systems are in operation in all the capital cities and in a number of the larger towns of Australia.

Since 1st April, 1947, when the last private company system to operate (the Kalgoorlie-Boulder electric tramway system in Western Australia) was taken over by the Eastern Goldfields Transport Board, all systems have been operated by governmental or municipal authorities. From 1941-42 all systems have been electric.

In many parts of Australia private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

In recent years there has been considerable replacement of tramway services by omnibus services, one of the more recent of importance affecting the Newcastle system in New South Wales where the change was made on 11th June, 1950. Information on omnibus services is contained in Division D. of this chapter.

(ii) *Total Mileage Open and Classification of Lines.* The following tables show, for each State, the total mileage of tramway lines open for general passenger traffic at 30th June, 1951, classified (a) according to the controlling authority; (b) according to gauge:—

**ELECTRIC TRAMWAYS: ROUTE-MILEAGE OPEN AT 30th JUNE, 1951.**

## D. MOTOR OMNIBUS SERVICES.

1. **General.**—Motor omnibus services have been in operation for some years in the capital cities and some of the larger towns of the States of Australia, and in the Australian Capital Territory.

Governmental and municipal authorities operate certain services and the others are run by private operators; in the States the former are run in conjunction with the existing electric tramway systems.

2. Government and Municipal Services.—(i) *Summary of Operations, 1950-51.* The following table is a summary of the operations during the year ended 30th June, 1951 of omnibus systems controlled by governmental and municipal authorities.

MOTOR OMNIBUS SERVICES : GOVERNMENT AND MUNICIPAL, 1950-51.

Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	A.C.T.	Aust.
Length of route .. miles	435	67	333	23 <sup>1</sup>	2,533	592	11	3,994
Buses .. No.	1,031	317	221	93	168	84	67	1,981

(a) Excludes Hobart Municipal Council Service. (b) See relevant notes to table above.

3. Private Services.—(i) *General.* Particulars of motor omnibus services under the control of private operators are recorded in the States of New South Wales, Victoria, South Australia and Western Australia only.

In New South Wales, particulars are compiled for the Metropolitan and Newcastle Transport districts only, and in Victoria for the Metropolitan district only, but in South Australia and in Western Australia all operators throughout the State are represented.

(ii) *Summary of Operations.* The following table shows the operations of motor omnibus services under the control of private operators in New South Wales, South Australia and Western Australia during the five years ended June, 1951 and in Victoria during the years 1949, 1950 and 1950-51 :—

**MOTOR OMNIBUS SERVICES : PRIVATE.**

(c) Year ended 31st December.

(b) Metropolitan area only.

(d) Not available.

**E. FERRY (PASSENGER) SERVICES.**

1. *General.*—Ferry services to transport passengers are operated in Sydney and Newcastle, New South Wales, on the Swan River at Perth in Western Australia, and on the Derwent River at Hobart and in Devonport, Tasmania. Control is exercised both by Governmental authorities and by private operators. In Victoria and Queensland the services operated are not extensive, and there are no ferry services in South Australia.

2. *Summary of Operations.*—The operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1946-47 to 1950-51 are summarized in the following table. For New South Wales and Western Australia details are also shown for the year 1938-39. Particulars of passengers carried on vehicular ferries are not included.

(b) Particulars are not available for 1938-39.

## F. MOTOR VEHICLES.

1. **Motor Industry.**—Chapter XXIV.—Manufacturing Industry of this Year Book contains summarized information on the motor industry of Australia and includes therein some data on the imports of motor bodies and chassis. Chapter VI.—Trade contains further data on imports, including those of petroleum products.

2. **Registration.**—(i) *General.* The arrangements for the registration of motor vehicles and the licensing of drivers and riders are not uniform throughout Australia. The following statement indicates the procedure followed at 30th June, 1952 in each of the States and Territories, and the fees for registration and licensing and the amount of motor tax payable where such tax is not incorporated in the registration fees. Complete or partial exemption from the payment of registration fees or motor tax is usually granted for certain vehicles, such as ambulances, fire-brigade vehicles, those owned by farmers and used solely for carting the produce of, or requisites for, their farms, Government-owned vehicles, etc.

Before a licence to drive a motor vehicle or ride a motor cycle is issued the applicant must, by passing the prescribed test, satisfy the competent authority that he is capable of driving or riding the vehicle concerned. All vehicles, before being registered, must be tested for road-worthiness.

(ii) *New South Wales.* The registration of vehicles, licensing of drivers, and collection of various taxes, fees and charges are functions of the Superintendent of Motor Transport. By arrangement with the Superintendent of Motor Transport, the police effect the registrations and collect the taxes and fees in certain areas. The normal term of registrations and licences and renewals thereof is a year, but quarterly registrations of motor vehicles are permitted under certain conditions.

A driver's licence costs 15s. per annum for a motor vehicle and a rider's licence 10s. per annum for a motor cycle. A learner's permit, which has a currency of two months, costs 5s.

Annual registration fees are as follows :—Motor cycles, 10s. ; motor cars, lorries, trailers and tractors, £1 5s. ; taxi-cabs and hire cars, metropolitan and Newcastle, £2, country, £1 10s. ; motor omnibuses, metropolitan area and Newcastle, £3, country, £2 ; traders' plates, motor cycles, £2, other vehicles, £8. An additional fee of 5s. per annum is payable in respect of any vehicle used in trade or business.

A motor tax is payable in addition to the registration fee. For motor cycles the tax is :—without side-car, £1 7s. ; with side-car or box, £2 7s. 6d. For vehicles other than motor cycles, the tax is payable on the unladen weight of the vehicle. The taxes payable for different classes of vehicles are as follows :—

(a) *Motor Cars (including taxi-cabs, etc.)*. The rate commences at 3s. 6d. per  $\frac{1}{2}$  cwt. but decreases slightly as the weight of the vehicle increases.

(b) *Motor Lorries and Trailers*. The tax payable commences at £1 15s. for a vehicle of 5 cwt. or less, and rises by a proportionately greater amount for each increase of 5 cwt., so that the average amount payable per cwt. increases with the weight of the vehicle.

(c) *Tractors*. The rates of tax are the same as for motor lorries, subject to a maximum of £31 14s. 6d.

(d) *Motor Omnibuses*. The rate commences at 5s. per  $\frac{1}{2}$  cwt., but decreases slightly as the weight of the vehicle increases.

In the case of vehicles with solid rubber tyres, the rates shown above are increased by 25 per cent. Double the ordinary rates of tax are payable in respect of vehicles powered by a diesel engine.

(iii) *Victoria*. The registration of motor vehicles and the licensing of drivers and riders is controlled by the Chief Commissioner of Police under provisions of the Motor Car Act 1951. The fees payable per annum for the registration of motor vehicles and licensing of drivers and riders are as follows :—

Motor cycles (without trailer, fore-car or side-car attached)	£1
Motor cycles (with trailer, etc.)	£1 10s.
Motor cars (private use)	3s. for each power-weight unit. (The number of power-weight units equals the sum of the horse-power and the weight in cwt. of a motor car unladen and ready for use.)
Trailers attached to motor cars	£1 to £4, according to the unladen weight and type of tyres.
Motor omnibuses (operating on specified routes in the metropolitan area)	£5 plus additional fees for each passenger seat.
Motor cars used for carrying passengers or goods for hire or in the course of trade	From 3s. 9d. to 8s. 9d. for each power-weight unit according to the unladen weight and type of tyres. Rates are 10 per cent. less where the vehicle is wholly of British or Australian manufacture or part British, part Australian.
Motor cars (constructed for the carriage of goods) owned by primary producers and used solely in connexion with their business	From 2s. to 5s. 3d. for each power-weight unit according to the number of wheels and type of tyres.
Drivers' and riders' licences	10s.

Where a vehicle is powered by a diesel engine the registration fee is double that charged for a vehicle of the same power-weight units fitted with a petrol engine.

(iv) *Queensland*. The Main Roads Department controls the registration of motor vehicles within the State. The rates operating from 8th February, 1952, are as follows :—Annual registration fees for pneumatic-tyred vehicles are determined by adding the horse-power to the weight in cwt. of the vehicle ready for use, and charging 6s. per unit. For solid-tyred vehicles the sum of the horse-power, weight of the vehicle, and maximum

permissible load (in cwt.) is charged at 5s. per unit if the capacity is not over 2 tons, and 9s. per unit if over 2 tons. Vehicles fitted with compression ignition (diesel) engines are charged at double the foregoing rates, with the exception of vehicles whose capacity does not exceed 2 tons, where the rate is 9s. 9d. per unit. Registration fees for trailers are determined at the rate of 6s. per cwt., and for caravan trailers at the rate of 9s. per cwt. Traction engines are registered at the fixed rate of £3 3s. per year. The fees payable according to these rates on motor cars range from £4 16s. to approximately £25. On pneumatic-tyred trucks and utilities, the fees are from about £12 12s. to over £15 for a truck with a capacity of 1 ton, and up to £30 for 5-ton trucks. Fees for motor cycles are £2 5s., or £3 8s. with a side-car. With the above-mentioned fees, an annual driving fee of 7s. 6d. for a private motor vehicle or motor cycle or 12s. 6d. for a commercial vehicle must be paid to the Main Roads Department.

The driver of any motor vehicle or the rider of any motor cycle must hold a licence from the Commissioner of Police. Licences are endorsed according to the types of vehicles in the operation of which the holder has shown proficiency and which he or she is permitted to operate. The period of currency of a licence varies according to the age of the applicant, viz. :—Aged under 41 years, 10 years; 41 years and under 46 years, until 51st birthday; 46 years and under 62 years, 5 years; 62 and under 66 years, until 67th birthday; 66 years and over, 1 year.

(v) *South Australia.* Under the provisions of the Road Traffic Act 1934-1951, the Registrar of Motor Vehicles controls the registration of all motor vehicles and the granting of licences. The fee prescribed for a motor vehicle propelled by a compression ignition (diesel) engine is double that for a vehicle of the same horse-power and weight propelled by a petrol engine. The power-weight unit is the basis for the calculation of registration fees. The period of registration is for six or twelve months, commencing with the date of registration. Commercial vehicles of declared British origin are registered at a discount of 10 per cent., whilst primary producers' vehicles are registered at 50 per cent. of the ordinary fee. The ordinary fees payable for yearly registration of motor vehicles, other than motor cycles and trailers, extend from a minimum of £4 for 25 power-weight units or less to £38 for 160 power-weight units. The ordinary fees for motor cycles are:—solo, up to 1 cwt., £1, over 1 cwt., £1 10s.; with side-car attached, £2. Fees for trailers vary according to the weight of the vehicle and range from £1 10s. for 1 ton or less to £3 for 2 tons or more. An extra 50 per cent. is charged for trailers with solid rubber tyres and 100 per cent. for those with metal tyres. Fees for drivers' and riders' licences are:—for any motor vehicle, 10s.; for motor cycle only, 5s.

(vi) *Western Australia.* The Traffic Act 1919-1951 provides for the registration of motor vehicles by (i) the Commissioner of Police for the Metropolitan Traffic District and (ii) individual Local Government Authorities (Municipalities and Road Boards) throughout the remainder of the State. Ministerial supervision is exercised by the Minister for Local Government.

Annual registration fees are calculated on a power-weight basis for passenger vehicles (cars, buses, etc.), and for vehicles designed for the carriage of goods, according to the power-load-weight of the vehicle. Fees in the power-weights scale range from £2 10s. not exceeding 20 power-weight units, to £13 for 70 units with each additional unit at 7s. 6d. The power-load-weight scale commences at £3 10s. not exceeding 25 units, and rises to £22 for 150 units; additional thereafter and not exceeding 200, 7s. 6d. per unit; up to 300, 10s. per unit; and every additional unit, 12s. 6d. The power-weight or power-load-weight of vehicles is the sum of the weight in cwt. of the vehicle ready for use plus rated horse-power (power-weight), plus declared maximum load in cwt. (power-load-weight). Where a fraction is contained in the result the next higher integral figure shall apply. In Western Australia the Dendy Marshall formula<sup>2</sup> for calculating horse-power is prescribed.

\* Where cylinder and stroke measurements are expressed in inches:—

$$\text{Horse-power} = \frac{(\text{Diameter of cylinder})^2 \times \text{number of cylinders} \times \text{stroke}}{12}$$

and where measurements are expressed in millimetres:—

$$\text{Horse-power} = \frac{(\text{Diameter of cylinder})^2 \times \text{number of cylinders} \times \text{stroke}}{200,000}$$

The annual fee payable for the registration of a solo motor cycle is £1 and for combination outfits 10s. per wheel irrespective of the power-weight.

Vehicles used in the carriage of either passengers or goods for hire or reward are further subject to the additional licence fee of 10s. per wheel. Where dual wheels are fitted, the fee payable is, in effect, £1 per axle.

The issue of drivers', riders' and conductors' licences, at an annual fee of 5s., is the sole prerogative of the Commissioner of Police.

The maximum period of a licence is twelve months, although short-term renewals may be effected at quarterly intervals. Date-to-date licensing periods operate in the metropolitan traffic area only. The licensing year in other areas ends on 30th June.

(vii) *Tasmania.* By the Transport Act 1938 the Transport Commission assumed control of the registration and taxation of motor vehicles, the licensing of drivers and the regulation of commercial transport. Annual registration fees are as follows:—Motor vehicle, £1 10s.; motor cycle or trailer, £1. Charges for transfer of registration and duplicate certificates are 5s. and 1s. respectively. A licence to drive or ride any motor vehicle costs 10s. per annum.

Motor tax is calculated on a power-weight basis—i.e., unladen weight units and horse-power. Separate rates are provided for lorries, for trailers and for other motor vehicles. For lorries and trailers, every  $\frac{1}{2}$  cwt., and for other motor vehicles every cwt., constitutes a weight unit. The rate of tax for lorries is 2s. per unit and for motor vehicles other than lorries and trailers, 3s. 3d. per unit. In the case of a trailer, if the number of weight units does not exceed ten, no tax is payable, but for every unit exceeding ten the rate is 2s. The rate on motor vehicles propelled otherwise than by any volatile spirit by means of an internal combustion engine (steam, electric, diesel, or petrol-electric engines) is 4s. 9d. per weight unit.

(viii) *Australian Capital Territory.* The registration of motor vehicles and the licensing of drivers and riders in the Australian Capital Territory is controlled by the Services Branch of the Department of the Interior under the provisions of the Motor Traffic Ordinance 1936–1951 and the Traffic Ordinance 1937.

The rates charged for the annual registration of motor vehicles, except motor cycles, are calculated at 2s. 3d. per  $\frac{1}{2}$  cwt. of the tare weight of the vehicle for British vehicles and 2s. 9d. per  $\frac{1}{2}$  cwt. for foreign vehicles. Motor cycle rates are:—British, £1 1s. solo, £1 18s. with side-car attached; foreign, £1 2s. 6d. solo, £2 with side-car attached. The registration fee for a motor omnibus is 8s. 6d. per cwt. Increased registration fees are not charged for diesel-powered motor vehicles.

The annual fee for a licence to drive a car, lorry or motor cycle is 10s. and for a motor omnibus, hire car or licensed goods vehicle the fee is 12s. 6d. There are no road taxes imposed for the carriage of goods.

(ix) *Northern Territory.* In the Northern Territory the Registrar of Motor Vehicles controls the licensing of drivers and the registration of motor vehicles. Annual licence fees are:—motor cycles, 5s.; motor vehicles for hire, £1; any other motor vehicle, 10s. Under the Motor Vehicles Ordinance 1930–1940 the following registration fees are payable:—motor cycle (with or without side-car), £1; motor car for private use (including utility truck), £2; motor car for hire, £10; lorry, £3; tractor, £3; trailer (four-wheeled), £3; and trader's plate, £1.

3. **Taxi-cabs and Other Hire Vehicles.**—In all the capital cities of the States and in many of the provincial centres taxi-cabs and other vehicles ply for hire under licence granted by either the Commissioner of Police or the local government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. **Motor Omnibuses.**—In both urban and provincial centres motor omnibus traffic has assumed considerable proportions during recent years and in some States the railway and tramway systems run motor services complementary to their main services. There has been a considerable replacement also, during the last few years, of existing tramway services by trolley-bus and motor-bus services. (See Divisions C. and D. of this Chapter.)

5. Motor Vehicles on the Register, etc.--(i) States and Territories, 1950-51. Particulars of the registration of motor vehicles, licences issued and revenue received for 1950-51 are contained in the following table. A graph showing for all motor vehicles other than motor cycles the registrations in force at 30th June of each year from 1920 to 1952 may be found on p. 126.

Victoria.

(b) Includes vehicles registered as primary producers' vehicles.

7. **World Motor Vehicle Statistics, 1951.**—Particulars of motor vehicle registrations throughout the world were included in issues of the Official Year Book prior to No. 39. This information was derived from the results of the World Motor Census, conducted by the *American Automobile* magazine. Detailed information is not repeated in this issue, but the following particulars from the same source show that there were 73,148,436 motor cars, trucks and buses registered in various countries of the world at 1st January, 1952. This was an increase of 6.5 per cent. on the figure for the previous year, 68,695,200,

and was the highest figure attained to that date. Of these vehicles, 51,425,647 or 70.3 per cent. of the world total were in the United States of America, and Australian registrations amounted to 2.0 per cent.

8. Survey of Motor Vehicles, 1947-48.—A survey of motor vehicles on the roads (excluding motor cycles) during 1947-48 was carried out by the Commonwealth Statistician in collaboration with the Government Statisticians and Road Transport authorities in the States. Results were published in a series of bulletins dealing with each State separately and with the Commonwealth as a whole, and summarized particulars were included in *Transport and Communication Bulletin* No. 40—1948-49 published by this Bureau. Similar surveys, but of modified scope, have been carried out for later periods in respect of new vehicles only. The results have been published by this Bureau in the *Transport and Communication Bulletin* and, since July, 1951, in the *Monthly Bulletin of Registrations of New Motor Vehicles*. Information contained in the latter includes the make, type and horse-power of new motor vehicles registered in each State and the Australian Capital Territory.

**G. TRAFFIC ACCIDENTS.**

1. General.—Prior to the year 1949-50 it was not possible to make proper comparisons between States of the number of accidents recorded, because of the differences in legislation regarding the reporting of accidents and the degree to which the legislation could be enforced. However, arrangements were made, in co-operation with the Australian Road Safety Council and the various police and transport authorities concerned, to obtain the numbers of road traffic accidents on a comparable basis from all States in respect of the year ended 30th June, 1950 and subsequent years. This has been achieved by restricting the statistics so as to relate only to those accidents which result in death or bodily injury to any person, or in damage in excess of £10 to property. It should be noted, however, that the comparability of the statistics between States even on this basis still depends on the degree to which accidents so defined are in fact recorded by the police. Except in the case of Western Australia, where statistics shown relate to all accidents which occurred in the metropolitan area and to those which involved fatal or "near-fatal" injury only in the remainder of the State, it is considered that there is little difference in the recording of accidents as between States.

For further particulars of traffic accidents see *Transport and Communication Bulletins* issued by this Bureau.

2. Total Accidents Reported, 1950-51.—(i) Summary. The following table shows, for each State and the Australian Capital Territory during the year 1950-51, the total accidents reported to the police, the number of accidents involving casualties, and the number of persons killed or injured—totals and per 100,000 of mean population and per 10,000 motor vehicles registered.

**ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES: ACCIDENTS RECORDED AND CASUALTIES, 1950-51.**

State or Territory.	Total Accidents Reported. (a)	Accidents Involving Casualties.	Persons Killed.			Persons Injured.(b)		
			Number.	Per 100,000 of Mean Population.	Per 10,000 Motor Vehicles Registered.	Number.	Per 100,000 of Mean Population.	Per 10,000 Motor Vehicles Registered.

Total, 1949-50	46,959	(d)25,965	1,643	20	12	(e)31,447	391	224

(a) Total accidents causing death or injury to persons or damage exceeding £10 to property.  
 (b) Persons injured to an extent requiring surgical or medical treatment. (c) Includes for the Metropolitan Area all accidents causing death or injury to persons or damage exceeding £10 to property, and, for the remainder of the State, only those accidents causing fatal or "near-fatal" injuries.  
 (d) Accidents involving persons killed, and persons injured to an extent requiring surgical or medical treatment, except in Western Australia where only persons injured and detained in hospital are included.  
 (e) As defined in note (d).

(ii) *Riders, Drivers, Pedestrians, etc., Killed or Injured.* The following table shows the number of persons killed and the number injured during 1950-51 in each State and the Australian Capital Territory, classified into riders, drivers, pedestrians, etc.

**ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : RIDERS, DRIVERS, PEDESTRIANS, ETC., KILLED OR INJURED, 1950-51.**

Riders, Drivers, Pedestrians, etc.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

<b>Total</b>	<b>11,817</b>	<b>11,364</b>	<b>5,512</b>	<b>2,332</b>	<b>2,686</b>	<b>1,212</b>	<b>172</b>	<b>35,095</b>

(a) Persons injured to an extent requiring surgical or medical treatment. (b) Includes all persons injured (i.e., requiring surgical or medical treatment) in the Metropolitan area but only those suffering "near-fatal" injuries in the remainder of the State.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for Australia during 1950-51, the number of accidents in which each of several classes of vehicles, road users, etc., were involved. The accidents involving casualties and persons killed and injured are similarly classified.

**ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : ACCIDENTS RECORDED AND CASUALTIES, CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED, AUSTRALIA, 1950-51.(a)**

Particulars.	Motor Vehicle.	Motor Cycle.	Pedal Cycle.	Tram.	Animal and Animal-drawn Vehicle.	Pedestrian.	Other Vehicle.
Total Accidents Reported(b)	50,808	10,243	4,471	1,968	1,725	7,172	360
Accidents Involving Casualties	22,861	8,378	4,278	1,023	642	7,155	217
Persons Killed	1,556	534	146	74	34	535	68
Persons Injured(c)	28,377	9,640	4,476	1,178	733	7,168	271

(a) It should be noted that, as accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals. The table excludes 46 accidents reported for which no cause was stated, of which 40 involved casualties—6 persons killed and 34 persons injured. (b) Total accidents causing death or injury to persons or damage exceeding £20 to property. (c) Persons injured to an extent requiring surgical or medical treatment.

It will be seen, therefore, that motor vehicles were involved in 50,808 accidents, of which 22,861 involved casualties (1,556 persons killed and 28,377 persons injured). The 50,808 accidents in which motor vehicles were involved comprised 21,040 collisions with other motor vehicles, 5,725 with motor cycles, 3,059 with pedal cycles, 1,141 with trams, 1,223 with animals and animal-drawn vehicles, 5,709 with pedestrians, 5,653 with fixed objects, 293 with vehicles other than those mentioned, 6,303 instances of overturning or leaving the roadway, and 662 accidents to passengers only. The particulars of accidents in which motor cycles, pedal cycles, etc., were involved with motor vehicles are also included under their respective headings in the table above. Consequently, since the figures in each column refer to the total accidents in which the particular type of vehicle, etc., was involved, any aggregation across would result, through duplication, in considerable overstatement of the actual totals.

3. **Persons Killed or Injured in Traffic Accidents, 1938-39 and 1946-47 to 1950-51.**—The following table shows the numbers of persons killed or injured in traffic accidents in each State and the Australian Capital Territory during the years 1938-39 and 1946-47 to 1950-51 :—

**ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : PERSONS KILLED OR INJURED.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.	Per 10,000 Motor Vehicles Registered.
<b>PERSONS KILLED.</b>									
1938-39	552	418	173	118	126	43	3	1,483	16
1946-47	508	386	188	101	101	61	1	1,346	13

(a) Persons injured to an extent requiring surgical or medical treatment. (b) Figures shown for years prior to 1948-49 include all persons injured whether surgical or medical treatment was required or not. (c) Figures shown for years prior to 1949-50 include persons injured and detained in hospital only. Includes all persons injured, (i.e., requiring surgical or medical treatment), in the metropolitan area but only those suffering "near-fatal" injuries in the remainder of the State.

## H. AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration appears in Official Year Book No. 16, pp. 334-5.

2. **Foundation and Administration of Civil Aviation.**—A brief account of the foundation and objects of this Administration will be found in Official Year Book No. 19, p. 299. Official Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

A recent change in the administration of the Department is its regional organization based on State boundaries, except that one region embraces Victoria and Tasmania.

The work of the Department is divided into two main sections. Administrative and Technical. The three Administrative Divisions are:—(i) the Division of Air Transport and External Relations; (ii) the Division of Administration and Personnel; and (iii) the Division of Finance and Stores. The three Technical Divisions are:—(i) the Division of Air Navigation; (ii) the Division of Airways; and (iii) the Division of Airports.

The Accident Investigation Branch is an independent section of Head Office, concerned mainly with major accidents, and directly responsible to the Director-General.

Full details of the functions of the three Administrative Divisions and the three Technical Divisions may be found in Official Year Book No. 38.

3. **International Activity.**—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appears in Official Year Book No. 37 and particulars of subsequent activity in the international field were included in issue No. 38. Further ratifications of the Chicago Convention raised the membership of the International Civil Aviation Organization to 57 States as at 30th June, 1951. In accordance with the ICAO policy of broadening Council representation by enabling the views of non-Council member States to be presented, Australia and New Zealand agreed that the representative of Australia on the Council will keep the New Zealand authorities informed on all matters before the Council or Committees under its control which are of particular interest to New Zealand, and will also on request present any views which the New Zealand Government would wish to have submitted. An account of the establishment of the Air Navigation Commission will be found in Official Year Book No. 39, p. 183.

The Air Transport Committee has been established with a full membership of twelve members nominated by the Council from among its members.

Australia has been represented at various Annual Assemblies of, and meetings convened by, ICAO, and also at meetings of the South Pacific Air Transport Council. Further details will be found in Official Year Book No. 39 and earlier issues.

The 4th Session of the Communications Division, ICAO, was held in Montreal during April and May, 1951. A representative attended the conference to present the Australian viewpoint on matters relating to communications procedures, frequency planning and communications systems.

(ii) *International Air Services.* Events which have transpired in connexion with international air services since the developments referred to in Official Year Book No. 39 are outlined in the following paragraphs.

Changes have been made in the operation of the Qantas Empire Airways—British Overseas Airways Corporation freighter services. On 6th September, 1950, B.O.A.C. suspended its weekly Lancastrian freighter service which operated right through to Australia and introduced in its place a York service between London and Singapore. Q.E.A. has provided a connecting service between Singapore and Sydney with Lancastrian aircraft which were replaced in October, 1950, by DC.4's.

Changes have also occurred in the intermediate stops served by the Kangaroo services. Following arrangements made with the Indonesian authorities, Q.E.A. has included, since August, 1950, calls at Djakarta on both its Constellation service to the

United Kingdom and the Skymaster service to Singapore. Djakarta had been served by B.O.A.C. for some time before Q.E.A. introduced the stop. Both Q.E.A. and B.O.A.C. introduced Beirut in Lebanon as a stopping place at the end of January, 1952.

Q.E.A. increased the frequency of the fortnightly Sydney–Noumea–Suva service to once weekly in April, 1951, and the fortnightly Sydney–Noumea–Espiritu Santo and Vila service to once weekly in June, 1951, thus providing New Caledonia with a twice-weekly service.

Tasman Empire Airways Limited introduced a service between Sydney and Wellington with Solent aircraft on 3rd October, 1950. Another route across the Tasman was opened on 28th June, 1951, when Qantas Empire Airways, under charter to Tasman Empire Airways, commenced a weekly Melbourne–Christchurch service with DC.4 aircraft. With the opening of this service, Melbourne was used for the first time as an international airport. Altogether there are now ten frequencies a week being operated between Australia and New Zealand.

On 8th March, 1951 a twice-weekly Stratocruiser service was inaugurated between San Francisco and Sydney.

During June, 1949 Qantas Empire Airways Ltd. inaugurated a fortnightly Australia–Hong Kong service based on Sydney and operating via Darwin and Labuan (British North Borneo). With the agreement of the United Kingdom authorities and the authority of the Supreme Commander, Allied Powers, Japan, this service was extended in October, 1950, to Iwakuni (and later to Tokyo) and the frequency increased to once weekly.

4. **Regular Air Services within Australia.**—As a result of negotiations conducted between major airline operators unprofitable duplication of services on some routes has been largely eliminated without detriment to the convenience of air travellers generally.

During April, 1952, approval was given for an increase of between 10 and 20 per cent. in fares on the main trunk services.

5. **Air Ambulance Services.**—A brief statement of the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pp. 145 and 146.

During the year 1950–51 the Air Ambulance and Flying Doctor Services continued to provide medical aid for the outback regions of Australia. The Commonwealth Department of Health operates the Northern Territory Aerial Medical Service with two DH84 aircraft based at Darwin, and the Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, maintains one DH84 aircraft based at Ceduna, and one DH83 at Wudinna, South Australia.

6. **Training of Air Pilots.**—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, p. 146.

Payment to the Clubs, under a revised scheme for financial assistance from July, 1951 to June, 1952, has been made as follows :—(i) a maintenance grant (for each aircraft-hour flown) at the following rates per hour subject to certain limitations—(a) at home base, £1 13s. 9d., (b) away from home base, £2 7s. 6d. ; (ii) an issue bonus (for each pupil trained *ab initio* to “A” licence standard)—(a) at home base, £84, (b) away from home base, £107 10s. ; (iii) a renewal bonus (for each licence renewed on club aircraft)—(a) at home base, £11, (b) away from home base, £15. In addition, the Commonwealth has accepted a contingent liability to contribute at the rate of 10s. per flying hour towards each club’s replacement reserve. This amount is intended to supplement the club’s reserve for the purchase of aircraft and spares specifically approved by the Department of Civil Aviation.

During the year 1950–51, 225 issue bonuses and 579 renewal bonuses were earned. Hours flown by subsidized Aero Clubs totalled 39,770 and a total subsidy of £93,399 was earned by the nine clubs.

7. **Gliding Clubs.**—For the year 1950–51 a total subsidy of £1,499 was distributed among the controlling gliding authorities in each State. Distribution was on an active membership basis.

8. **Airways Engineering.**—During the year 1950–51 the Airways Communications System both within Australia and with overseas countries was improved and developed. This work includes the fixed, or point-to-point communication service, and the service between the ground and aircraft.

A start was made in 1949-50 with the V.H.F. communication service, installations being completed at Williamstown and Guildford, and on 17th May, 1951 the manual radio telegraph circuit between Melbourne and Honolulu was replaced by a radio teletype circuit between Sydney and Honolulu.

New 75-megacycle marker beacon equipment has been installed at points along airways. An approach control radar system, which operates on a frequency of 3,000 megacycles, has been installed at Essendon. The Department of Civil Aviation has undertaken installation of a chain of fifteen radar stations throughout Australia for radar tracking of balloons, wind finding purposes and for detecting radio-sonde balloon flights.

The lighting of airways and airports has been closely studied by the Departmental Lighting Committee, consisting of representatives of the Department of Civil Aviation and two members from the Airline Pilots' Association.

9. **Air Traffic Control.**—The period 1950-52 has been characterized by procedural development and consolidation, and by general acceptance for the first time of the need for inter-departmental co-ordination in the use of air space. Civil aircraft movements have increased and military flying programmes have been greatly expanded. In consequence, the traffic patterns at major airports and along the lanes leading to them have reached a high degree of complexity. Efficient control has been maintained largely by continuous attention to, and modification of, procedures.

10. **Meteorological Aids to Civil Aviation.**—Professional meteorological officers of the Department of the Interior are on duty at many of Australia's aeradio stations. At the remainder, communications personnel make local weather observations and take barometer and thermometer readings for transmission to Area Meteorological Offices.

11. **Construction and Development of Airports.**—During 1950-52 the scarcity of suitable material, labour and plant slowed the rate of airport construction throughout Australia. Effort was concentrated mainly on the provision of buildings, housing and safety equipment, and facilities were provided where the need was greatest.

*Kingsford-Smith Airport.* Work progressed steadily on the construction of an international airport at Mascot. Cook's River was diverted to flow into Botany Bay west of the new airport, and the old river bed was filled to form the base of the first of the new runways. At the same time work was carried out on the diversion of sewer lines and a main highway (General Holmes Drive). The 64° runway was completed.

*Essendon Airport.* The section of taxiway "N" east of the 168° runway and portion of taxiway "M" were completed. Work continued on the erection of oil company depots on a new site in the building area and the erection of two large Igloo hangars was commenced.

*Moorabbin Airport.* Work continued on this secondary landing ground, which accommodates all non-radio equipment aircraft and so relieves the hazard created at Essendon.

*Adelaide Airport.* The 6,850 feet Class "C" runway was completed, including the concrete ends. The large drain constructed for the diversion of Keswick and Brownhill Creeks was completed downstream from Brownhill Creek, leaving only the lined section between Brownhill Creek and Keswick Creek to be constructed.

Work on other runways, taxiways, aprons and hangars proceeded favorably during 1952, some sections being completed. The complete changeover of operations from Parafield is dependent upon the construction of the combined terminal and operations building.

*Hobart Airport.* To replace the Cambridge Airport, which does not meet international standards and cannot be improved, plans have been developed for the construction of a Class "D" ICAO airport for Hobart at Llanherne, and during the period good progress was made in the construction of this new airport. When completed, it will provide one sealed runway 5,800 feet long and 200 feet wide, with good approaches and associated taxiways, aprons, buildings and roads. Work also continued on earth-works for associated runways.

12. **Aircraft Parts and Materials.**—The number of firms and organizations approved by the Department of Civil Aviation to trade in the aircraft industry now totals 349, and extensions of approval have been granted to 186 firms to cover the extensive increase in their operations.

13. **Aircraft Maintenance Certificates of Repair.**—Aircraft maintenance repair and overhaul is carried out under the supervision of a works inspection section or licensed ground engineer in workshops approved by the Department of Civil Aviation. Workshops are authorized to issue certificates of repair which serve as evidence to the licensed ground engineer responsible for the fitment of the part that the work so covered has been done in an authorized workshop by competent tradesmen and has been subjected to proper inspection. Such specialized work as the overhaul of instruments, electrical equipment, aeronautical pumps and carburettors is carried out by these approved workshops.

14. **Test and Examination of Aircraft Parts and Materials.**—A number of laboratories are approved by the Department of Civil Aviation and authorized to issue laboratory reports covering the physical test, chemical analysis, radiological and metallurgical examination of materials and parts used in connexion with the civil aircraft industry.

15. **Statistical Summaries.**—(i) *Registrations, Licences, Accidents, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June of each of the years 1939 and 1947 to 1951, and also of the numbers of persons killed and injured in civil flying accidents during the years 1938-39 and 1946-47 to 1950-51.

(a) Incomplete. (b) Not available.

16. *Papua-New Guinea Activities.*—(i) *General.* Issues of the Official Year Book up to and including No. 34, 1941 showed particulars of the development of civil aviation in New Guinea and of the companies operating at the outbreak of war with Japan, while issues Nos. 35 to 37 carried the accompanying statistical summary of operations up to the end of September, 1941. Similar statistics of post-war operations, however, are not at present available.

(ii) *Territory of Papua and New Guinea.* At 30th June, 1952 there were 100 fully operational aerodromes in the Territory of Papua and New Guinea and a further 52 in the course of development. Of these, 32 were controlled by the Department of Civil Aviation, 56 by the Civil Administration and the remainder were privately owned by missions and commercial interests. In addition, there were 30 seadromes.

Aerial activity within the Territory is intensive, and several companies conduct regular services to the major aerodromes while charter flights can be arranged to almost any locality.

During 1951 Qantas Empire Airways reduced their DC3 services between Australia and New Guinea to two services per week and introduced an additional freighter service between Sydney and Lae. Q.E.A. also operated a DC3 service between Townsville and Momele for the R.A.A.F. on a weekly basis.

At the beginning of 1951 Mount Lamington erupted and, in the subsequent action, approximately 900 tons of stores and equipment were flown to the stricken area.

The accident rate increased as compared with the previous year. There were four fatal accidents, in which 12 people lost their lives.

## I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS.

NOTE.—In all the tables in this Division returns for the Australian Capital Territory are included with those for New South Wales, while the South Australian returns include particulars for the Northern Territory.

## § 1. General.

1. The Postmaster-General's Department.—Under the provisions of the Post and Telegraph Act 1901, the Department was placed under the control of the Postmaster-General, being a responsible Minister. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Deputy-Director of Posts and Telegraphs.

2. Postal Facilities.—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices) and the number of inhabitants to each 100 square miles in each State and in Australia at 30th June, 1951. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office as well as the number of inhabitants per office should be taken into account.

POSTAL FACILITIES : RELATION TO AREA AND POPULATION,  
AT 30th JUNE, 1951.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices (a) ..	2,560	2,430	1,293	876	635	521	8,315
Number of square miles of territory per office .. .. .	121	36	519	1,032	1,537	50	358
Number of inhabitants per office ..	1,305	934	937	841	916	558	1,014
Number of inhabitants per 100 square miles .. .. .	1,077	2,582	181	81	60	1,109	283

(a) Includes "official," "semi-official," and "non-official" offices.

The foregoing table does not include "telephone" offices at which there is no postal business.

(ii) *Number of Offices.* The following table shows the number of post offices (exclusive of telephone offices) in each State for the years 1921, 1931, 1941 and 1951.

## NUMBER OF POST OFFICES AT 30th JUNE.

(a) The figures in this table relate to revenue actually collected during the year as recorded for Treasury purposes.

The gross revenue (actual collections) from the various branches in each State for the years 1945–46 to 1949–50 are shown in comparison with the year 1938–39 in Official Year Book No. 39. For the years 1938–39, 1946–47, 1947–48, 1948–49 and 1949–50 the gross revenue for Australia was £17,350,000, £29,802,000, £31,390,000, £33,307,000 and £38,348,000 respectively.

Compared with the corresponding figures for the previous year an increase of 16.8 per cent. was shown in the gross revenue earned for the year 1950–51. Increases in the several branches were as follows :—Postal 14.5 per cent., Telephone 18.3 per cent., and Telegraph 18.3 per cent.

The gross revenue in 1950–51 was 158.1 per cent. higher than in the last complete pre-war year, 1938–39, the corresponding percentage increases for the several branches being as follows :—Postal, 138.1, Telegraph 223.8, and Telephone 181.9.

4. **Expenditure, Postmaster-General's Department.**—(i) *Distribution, 1950–51.* The following table shows, as far as possible, the distribution of expenditure (actual payments) on various items in each State during the year ended 30th June, 1951, as shown by records

kept for Treasury purposes. The table must not be regarded as a statement of the working expenses of the Department, since items relating to new works, interest, etc., are included therein.

**POSTMASTER-GENERAL'S DEPARTMENT : DISTRIBUTION OF EXPENDITURE.**

(a) Includes registered, c.o.d. and duty parcels. (b) Packets were included with letters.

2. **Cash on Delivery Parcels Post.**—(i) *General*. The Postal Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcel post within Australia, or between Lord Howe Island, Norfolk Island, Nauru, Territory of Papua and New Guinea, or Fiji and Australia, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and of traders and others who do not wish their goods to be delivered except on payment.

(ii) *States, 1950-51*. The next table shows particulars regarding the cash on delivery parcels posted in each State for the year 1950-51.

**CASH ON DELIVERY PARCELS POST : STATES, 1950-51.**

Revenue(a) ..	£'000	86	126	138	157	188	212

(a) From commission and postage.

3. **Total Cost of Carriage of Mails.**—During 1950-51 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows:—Inland mails—Road £1,490,581. Railway £763,832. Air £815,576; Coastwise mails—£34,453; Oversea mails—Sea £454,445. Air £1,135,180; Grand Total—£4,694,067.

4. **Transactions of the Dead Letter Offices.**—During the year 1950-51 there were, in the several States of Australia, 1,669,849 letters, post cards, and lettercards returned to writers or delivered, 209,866 destroyed in accordance with the Act, and 137,961 returned to other States or countries as unclaimed—a total of 2,017,676. Corresponding particulars for packets and circulars were—434,382, 230,370, 31,258 and 696,010. There were 2,713,686 articles handled in all, containing money and valuables amounting to £605,899.

5. **Money Orders and Postal Notes.**—(i) *General*. The issue of money orders and postal notes is regulated by Sections 74-79 of the Post and Telegraph Act 1901. The maximum amount for which a single money order payable within Australia may be obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the sterling area is £8 per month but varying conditions apply for remittance to countries outside the sterling area. A postal note, which is payable only within Australia and in Papua, cannot be issued for a larger sum than twenty shillings.

(ii) *States, 1950-51*. Particulars regarding the business transactions in each State for 1950-51 are shown hereunder:—

(iv) *Classification of Money Orders Issued and Paid.* Of the total money orders issued in Australia during 1950-51, 5,018,496 valued at £43,513,517 were payable in Australia, 10,330 (£29,425) in New Zealand, 101,286 (£378,814) in the United Kingdom and 35,960 (£188,485) in other countries. Of the total money orders paid in Australia during 1950-51, 4,998,249 (£43,279,573) were issued in Australia, 29,383 (£83,848) in New Zealand, 69,640 (£352,062) in the United Kingdom and 37,979 (£274,546) in other countries.

Money orders payable or issued in foreign countries, which have been sent from or to Australia through the General Post Office in London, are included in those payable or issued in the United Kingdom.

(v) *Postal Notes Paid.* The following table shows the number and value of postal notes paid in each State during 1950-51. Particulars regarding the number and value of postal notes issued and paid in each of the last five years have been given in the previous table.

## POSTAL NOTES PAID : STATE OF ISSUE, 1950-51.

## § 3. Telegraphs.

1. *General.*—A review of the development of telegraph services in Australia up to 1921 appears in Official Year Book No. 15, p. 625, and subsequent developments of importance have been dealt with in later issues. During the past few years substantial improvements in both the speed and grade of telegraph service throughout Australia have been effected, the entire system being subjected to intensive reorganization. The external circulation system of the Australian telegraph service has been considerably modified, and direct communication has been established between cities and towns which formerly were served through intermediate repeating centres.

Telephone subscribers may telephone telegrams for onward transmission, or have messages telephoned to them. The fee for the service is small, and the system means, in effect, that the telegraph system is brought into the home of every telephone subscriber. The number of telegrams lodged by telephone during the year ended 30th June, 1951 was 9,264,799 or 27 per cent. of the total lodgments.

A radiogram service is provided to certain isolated places throughout Australia and a number of privately operated wireless transceiver stations have been established at various centres throughout the Commonwealth, enabling telegrams to be exchanged with departmental telegraph offices. Stations sponsored by the Flying Doctor Service of Australia can communicate by wireless with base stations.

The picturegram service between Melbourne and Sydney, which was established in 1929, but which was suspended during 1942, was restored and extended to Brisbane and Adelaide in 1949, to Perth in 1950 and to Hobart and Newcastle in 1951. The equipment installed at these points also permits the direct transmission and reception of overseas photo-telegrams. Portable picture-transmitting apparatus has been provided for use at country centres in New South Wales and Victoria and was first used for the opening of the 19th Federal Parliament at Canberra on 21st February, 1950.

Teletypewriter services (i.e., typewriting over electrical circuits), affording the great advantage of direct and instantaneous communication between points within the same building or separated by distances up to thousands of miles, and printergram services, connecting any business premises with the local telegraph office for the transmission and reception of telegrams, are available.

A direct radiotelegraph service was established between Australia and Portuguese Timor on 15th August, 1950, providing for the transmission of ordinary and urgent rate telegrams, letter telegrams and press telegrams between these countries.

2. Telegraph and Telephone Mileages.—The following table shows the combined single wire mileage for both telegraph and telephone purposes in each State as at 30th June, 1951. The lengths of conduits and pole routes are also shown.

TELEGRAPHS AND TELEPHONES : MILEAGE, 30th JUNE, 1951.

(a) At 30th June.

(ii) *Australia.* The numbers of telegraph offices, and of telegrams dispatched to destinations within Australia and to adjacent islands and to ships at sea, for each of the years 1938-39 and 1946-47 to 1950-51 respectively, were:—Telegraph offices—9,389, 9,458, 9,599, 9,701, 9,863 and 9,935; Telegrams dispatched—17,252,000, 33,729,000, 34,692,000, 35,647,000, 35,486,000 and 34,467,000

During the years 1938-39 to 1949-50 the volume of telegraph business more than doubled, but in 1950-51 a decrease of 3 per cent. was recorded on the figures for the previous year.

### § 4. Telephones.

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. A table showing the total single wire mileage used for telephone, trunk and/or telegraph purposes is shown in § 3 on page 156.

During 1950-51 the total number of telephones added to the post office system was 99,422, compared with 81,850 in 1949-50. With an average at 1st January, 1951, of 139 telephones per 1,000 of population, Australia continues to hold a high place amongst the countries of the world in respect of telephone density.

Seventy carrier wave telephone systems were installed during 1950-51 on trunk line routes serving capital cities and important provincial centres. The number of carrier systems now in service totals 569, representing a channel mileage of 317,720.

Seventeen automatic exchanges were brought into operation in metropolitan areas during the year, together with 6 country and 74 rural automatic exchanges. At 30th

June, 1951 there were 191 automatic exchanges in the metropolitan area and 323 in country districts to which 764,944 telephones were connected, representing 63 per cent. of the total number in use in Australia.

2. **Summary for States.**—Particulars relating to the telephone service in each State for the year ended 30th June, 1951 compared with 1939 will be found in the following table :—

**TELEPHONE SERVICES : SUMMARY.**  
(Number.)

Particulars.	Year (30th June).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Exchanges ..	1939	2,010	1,680	1,053	579	653	358	6,333
	1951	2,182	1,728	1,217	642	701	381	6,851
Telephone Offices (in- cluding Exchanges)	1939	3,040	2,358	1,517	829	907	509	9,160
	1951	3,248	2,450	1,763	975	956	536	9,928
Lines connected ..	1939	189,915	150,570	61,650	45,224	26,032	14,144	487,535
	1951	330,368	269,826	116,314	74,457	47,743	25,380	864,088
Instruments con- nected	1939	257,246	208,230	82,226	60,451	35,830	18,013	661,996
	1951	465,893	381,809	157,212	103,609	66,841	34,042	1,209,406
(i) Subscribers' in- struments	1939	250,511	203,668	79,293	58,512	34,380	17,098	643,462
1951	455,190	373,205	152,282	100,455	64,549	32,730	1,178,411	
(ii) Public tele- phones	1939	4,223	2,573	1,775	1,017	926	562	11,076
1951	5,833	3,900	2,431	1,438	962	669	15,233	
(iii) Other local in- struments ..	1939	2,512	1,989	1,158	922	524	353	7,458
1951	4,870	4,704	2,499	1,716	1,330	643	15,762	
Instruments per 100 of population	1939	9.32	11.09	8.08	10.03	7.62	7.59	9.50
	1951	13.94	16.83	12.98	14.07	11.49	11.70	14.34

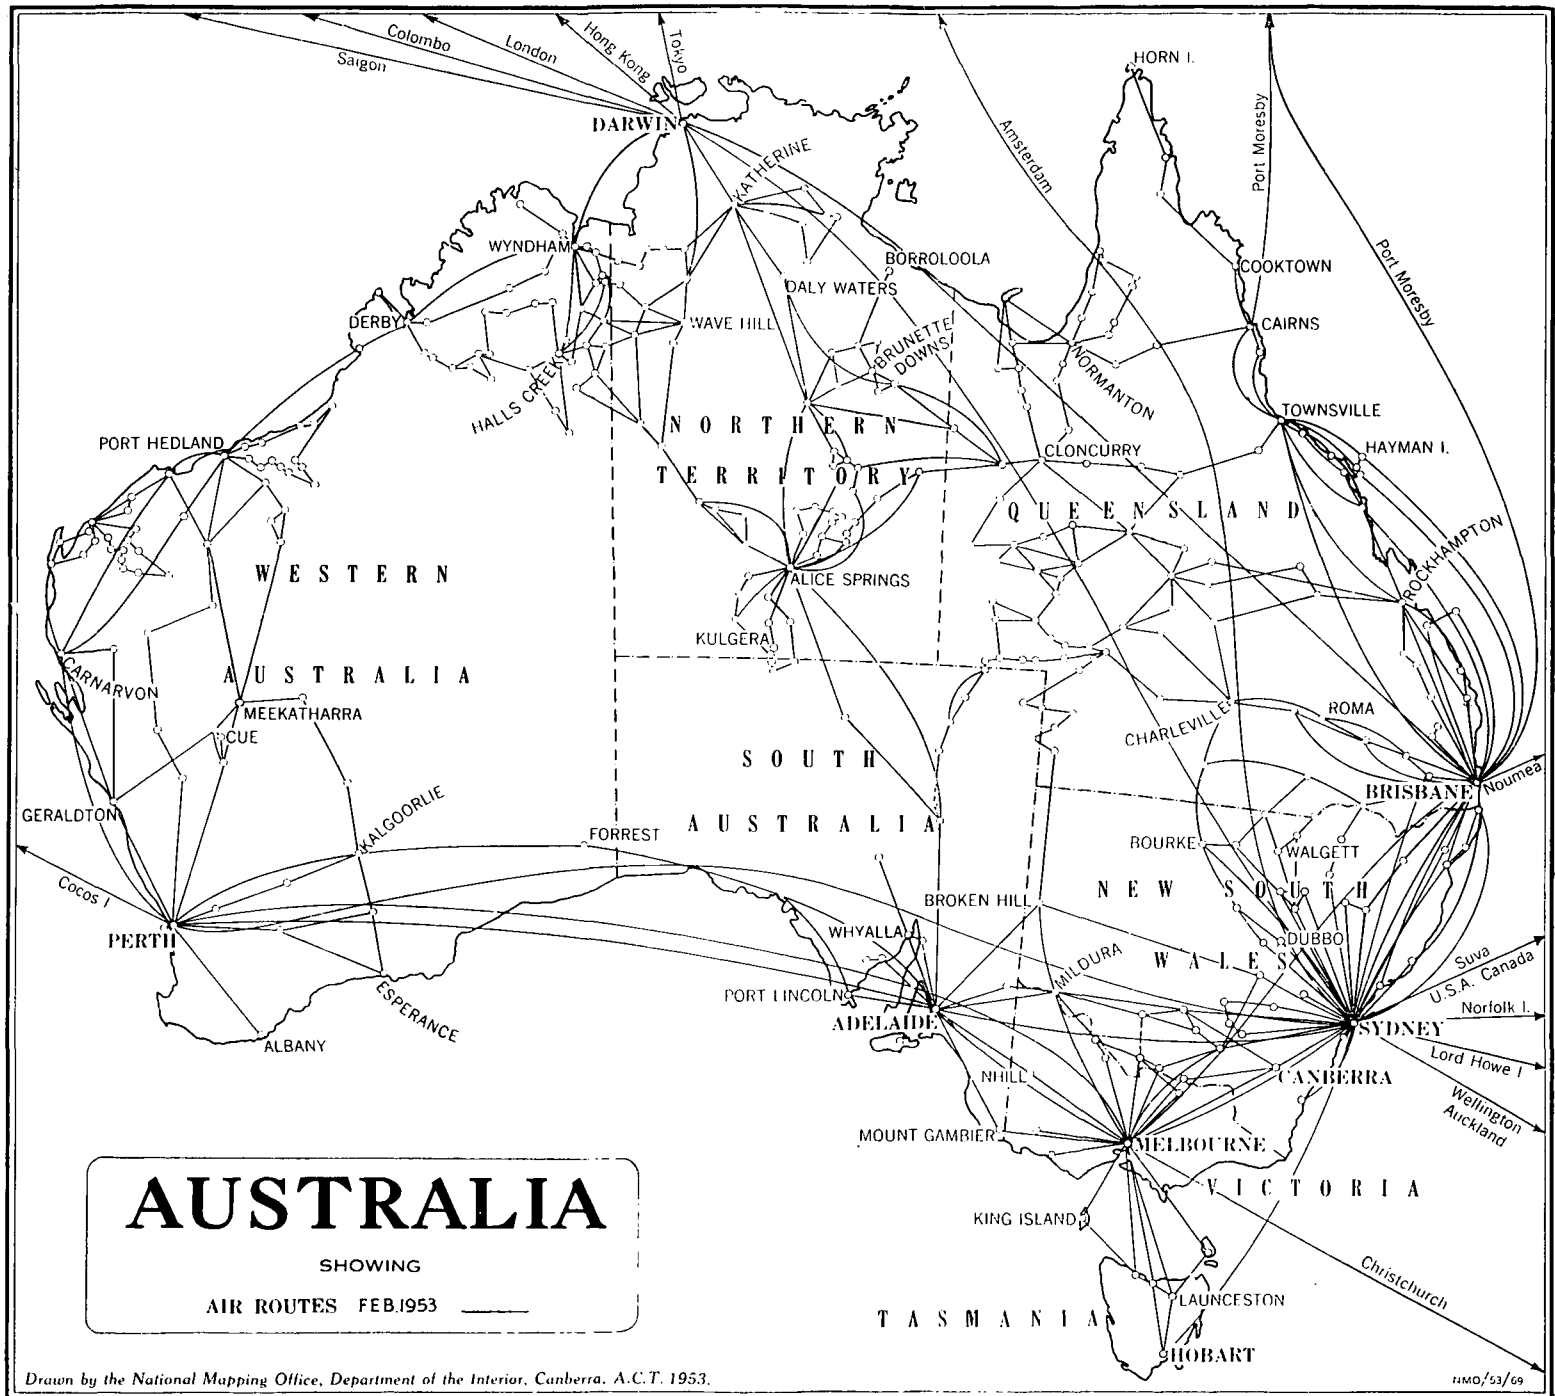

Of the total telephones (1,209,406) in service on 30th June, 1951, 448,849 or 37.11 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks.

3. **Subscribers' Lines and Calling-rates.**—The next table shows the number of subscribers' lines and the daily calling-rates at central, suburban and country telephone exchanges in the several States for 1950-51 :—

**TELEPHONES : SUBSCRIBERS' LINES AND DAILY CALLING-RATES, 1950-51.**

State.	Central Exchanges.		Suburban Exchanges.		Country Exchanges.	
	Sub- scribers' Lines Connected.	Average Outward Calls Daily per line.	Sub- scribers' Lines Connected.	Average Outward Calls Daily per line.	Sub- scribers' Lines Connected.	Average Outward Calls Daily per line.
New South Wales ..	29,513	11.09	186,199	3.90	119,060	1.80
Victoria ..	19,041	12.21	146,534	4.02	88,781	1.50
Queensland ..	9,420	12.67	44,430	3.27	53,713	2.21
South Australia ..	4,943	14.77	38,225	2.85	28,776	1.30
Western Australia ..	8,829	7.92	18,253	3.72	15,534	1.46
Tasmania ..	4,931	5.15	3,944	2.57	14,620	1.79

A comparison of the average daily calling-rates for each class of exchange shows that South Australia registered the greatest number of calls per line at central exchanges, Victoria at suburban exchanges and Queensland at country exchanges.

4. **Effective Paid Local Calls.**—The numbers of effective paid local calls from subscribers and public telephones in the various States during the years ended 30th June, 1950 and 1951 appear hereunder.

**TELEPHONES : NUMBER OF EFFECTIVE PAID LOCAL CALLS.**  
(‘000.)

In 1938-39 subscribers' calls numbered 551,511,000, calls from public telephones 44,683,000, and total local calls 596,194,000.

5. **Trunk Line Calls and Revenue.**—In the next table the number of telephone trunk line calls recorded, the amount of revenue received, and the average revenue per call are shown for each of the States for the year 1950-51 compared with 1938-39

**TELEPHONES : TRUNK LINE CALLS AND REVENUE.**

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
<b>Total Calls ('000)—</b>							
1938-39 ..	14,401	11,198	7,306	4,166	2,311	1,770	41,152
1950-51 ..	24,978	20,262	12,305	7,664	3,881	3,412	72,502
<b>Total Revenue (£)—</b>							
1938-39 ..	739,472	529,190	412,811	196,780	126,141	73,634	2,078,028
1950-51 ..	2,827,546	2,066,906	1,464,630	834,211	461,371	293,505	7,948,169
<b>Average Revenue per Call (pence)—</b>							
1938-39 ..	12.32	11.34	13.56	11.34	13.09	9.58	12.12
1950-51 ..	27.17	24.48	28.57	26.12	28.54	20.64	26.31

The number of trunk line calls during 1950-51 increased by more than 4 million, or 6 per cent., compared with the figures for the previous year, whilst the average revenue per call increased by 14.2 per cent.

6. **Oversea Telephone Services.**—During the year 1950-51 radio-telephone services were established or re-opened between Australia and Hong Kong, Malaya, Manus Island, the Philippine Islands and Venezuela, bringing the number of countries with which radio-telephone communication is available to 61. Service is also provided to certain trans-Atlantic liners, ships off the Australian coast, H.M.A.S. ships, and H.M.N.Z. ships when cruising in Australian waters.

The amount of traffic handled over the radio-telephone services continued to increase rapidly. During 1950-51 the number of calls connected was 39,080, comprising 20,669 originating in Australia and 18,411 incoming calls.

7. **Revenue from Telephones.**—Particulars regarding the revenue from telephone services are included in tables in § 1.

8. **World Telephone Statistics, 1952.**—Information derived, in the main, from statistics compiled by the American Telephone and Telegraph Company shows that at 1st January, 1952 there were more than 80,000,000 telephones in use throughout the world. The United States of America, with almost 46,000,000, possessed by far the greatest proportion of these (58 per cent.). The United States of America also had the highest recorded number of instruments per 100 of population (*viz.* 29). Figures for other leading countries were as follows:—Sweden 25, Canada 22, Switzerland 20, New Zealand 20, Denmark 17. By June, 1952 the number of telephones in Australia per 100 persons had risen to 15.0.

### § 5. Cable and Radio Communication.

1. **First Cable Communication with the Old World.**—In earlier issues of the Official Year Book will be found a detailed account of the connexion of Australia with the Old World by means of submarine cables. (*See* No. 6, p. 770.)

2. **General Cable Service.**—Descriptions of the various cable services between Australia and other countries are given in Official Year Book No. 22, pp. 335-6.

3. **Merging of Cable and Wireless Interests.**—Following upon the recommendations of the Imperial Wireless and Cable Conference in London in 1928 which examined the situation that had arisen as the result of the competition of the beam wireless with the cable services, the Imperial and International Communications Limited (since renamed Cable and Wireless Ltd.) was formed and took over the operations of the Pacific Cable Board and the control of the Eastern Extension Cable Company and the Marconi Wireless Company. For further developments, leading eventually to the establishment of the Overseas Telecommunications Commission, *see* Official Year Book No. 37, pp. 220-4.

4. **Oversea Cable and Radio Traffic.**—(i) *States.* The number of telegrams received from and dispatched overseas in each State during 1950-51 is shown hereunder:—

#### INTERNATIONAL TELEGRAMS, 1950-51.

(a) Includes code telegrams.

Words transmitted to "Other places" included 3,542,328 to the United States of America and 6,248,162 to New Zealand and the Pacific Islands. Words received from "Other places" included 3,434,184 from the United States of America and 4,596,041 from New Zealand and the Pacific Islands.

5. **Coast Stations.**—There are 26 wireless stations established at points around the Australian coast and 7 about the coast of Papua and New Guinea. During 1950-51 these stations handled 500,188 messages (379,686 paying, 16,274 service and 104,228 weather) with a total of 7,950,511 paying words. For further information see *Transport and Communication Bulletin* No. 42, 1950-51.

6. **Radio-communication Stations Authorized.**—(i) *States and Territories, 30th June, 1951.* The following table shows particulars of the different classes of radio-communication stations authorized at 30th June, 1951 in each State and Territory of the Commonwealth. Figures relate to radio-communication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners' are shown in § 6, para. 3 and 4, following.

See notes to previous table.

## § 6. Broadcasting and Television.

1. **The Australian Broadcasting Control Board.**—The Australian Broadcasting Act, 1942–1946 was amended in 1948 to provide for the establishment of the Australian Broadcasting Control Board. The amending Act was assented to on 6th December, 1948, and subsequently proclaimed to commence on 15th March, 1949.

The Board operates under the Ministerial jurisdiction of the Postmaster-General, and its principal functions, as set out in Section 6K of the Act, are to ensure:—(a) the provision of services by broadcasting stations, television stations and facsimile stations, and services of a like kind, in accordance with plans from time to time prepared by the Board and approved by the Minister; (b) that the technical equipment and operation of such stations are in accordance with such standards and practices as the Board considers to be appropriate; and (c) that adequate and comprehensive programmes are provided by such stations to serve the best interests of the general public.

In addition, the Board may exercise such other functions as are prescribed by regulation in relation to broadcasting stations, television stations and facsimile stations.

In the exercise of its functions in respect of programmes, the Board is required—(a) to consult the Australian Broadcasting Commission and representatives of licensees of commercial broadcasting stations in relation respectively to the programmes of the national and commercial broadcasting services; and (b) in particular to—(i) ensure reasonable variety of programmes; (ii) ensure that divine worship or other matter of a religious nature is broadcast for adequate periods and at appropriate times, and that no matter which is not of a religious nature is broadcast by a station during any period during which divine worship or other matter of a religious nature is broadcast by that station; (iii) ensure that facilities are provided on an equitable basis for the broadcasting of political or controversial matter; (iv) determine the extent to which advertisements may be broadcast in the programme of any commercial broadcasting station; and (v) fix the hours of service of broadcasting stations, television stations and facsimile stations.

The Board is empowered to make recommendations to the Minister as to the exercise by him of any power under Division 1 of Part III. of the Act, which prescribes the conditions under which licences are granted to commercial broadcasting stations.

Under the Television Act (assented to on 20th March, 1953) the Minister is required to take into consideration any recommendations made by the Board as to the exercise of his power to grant licences for commercial television stations.

The Board also has power, subject to the directions of the Minister—(a) to determine the situation and operating power of any broadcasting station, television station or facsimile station; (b) to determine the frequency of each broadcasting station, television station or facsimile station, within bands of frequencies notified to the Board by the Postmaster-General as being available for such stations; (c) after consultation with the Commission to determine the conditions upon which a commercial broadcasting station may broadcast a programme of the National Broadcasting Service; and (d) to regulate the establishment of networks of broadcasting stations and the making of agreements or arrangements by licensees of commercial broadcasting stations for the provision of programmes or the broadcasting of advertisements.

Subject to the approval of the Minister and of the Treasurer, the Board may provide financial and other assistance to commercial broadcasting stations for the purpose of ensuring that programmes of adequate extent, standard and variety are provided in the areas served by these stations.

In addition to prescribing the functions of the Board as set out in section 61 of the Act, the amending Act of 1948 also transferred to the Board certain powers which had previously been exercised by the Minister in connexion with the general control of the broadcasting service, particularly in relation to the operations and programmes of commercial stations.

Section 61 of the Act provides that the Board shall consist of three members appointed by the Governor-General, one of whom shall be chairman. The Board was constituted on 15th March, 1949.

Section 61 of the Act provides that no person shall be appointed as a member of the Board who—(a) has any financial interest, whether direct or indirect, in any company which is the licensee of a commercial broadcasting station or manufactures or deals in equipment for the transmission or reception of broadcasting, television or facsimile programmes; (b) is a member of the governing body of any company or other association of persons which is the licensee of a commercial broadcasting station; or (c) is the licensee of a commercial broadcasting station.

2. **The Australian Broadcasting Commission.**—(i) *General.* The Australian Broadcasting Commission was established under the Australian Broadcasting Commission Act 1932 to take over control of national broadcasting with the object of raising the standards of broadcasting in Australia. Control of the Australian Broadcasting Commission is vested in seven Commissioners (originally five), one of whom is an officer of the Treasury and one an officer of the Postmaster-General's Department, and its income is derived from an annual government grant. (For information about the original method of finance see earlier issues of the Official Year Book.) Technical services are provided by the Postmaster-General's Department.

Broadcasting in Australia is a compromise between the system in operation in Great Britain and that in the United States of America. The Australian Broadcasting Commission aims to provide the best possible majority entertainment and also to cater for the needs of important minorities. The programmes of the Australian Broadcasting Commission cover a wide range of activities which are indicated briefly in the following paragraphs. The proportion of broadcasting time allocated to the various types of programmes during 1951-52 was as follows:—Music—Classical and light classical, 21.8 per cent., light music, 18.5 per cent., total music, 40.3 per cent.; Variety, 16.3 per cent.; Drama and Features, 4.4 per cent.; Children's Session, 2.0 per cent.; Youth Education, 3.2 per cent.; Talks, 6.7 per cent.; Parliament, 4.0 per cent.; Religious Broadcasts, 3.7 per cent.; News, 7.7 per cent.; Sport, 5.0 per cent.; Rural Broadcasts, 1.8 per cent.; Non-departmental, 4.9 per cent.

(ii) *Music.* The Australian Broadcasting Commission is to-day the biggest concert-giving organization in the Commonwealth, and the immense growth of interest in music in this country is illustrated by the fact that Australian listeners in increasing numbers now welcome the opportunity of hearing fine music on the air and in the concert hall, and have magnificently supported the presentation of orchestral concerts and of recitals by the best musicians from their own country and from overseas. In 1936 small regular

orchestras were formed by the Australian Broadcasting Commission in Sydney, Melbourne, Brisbane, Adelaide, Perth and Hobart, and from these foundations have grown our present orchestras. Those in Sydney and Melbourne measure up to first-class orchestras overseas, whilst those in the other capital cities are showing rapid improvement and are now the equal of those in many places of comparable size in Europe or America. Until 1946 the cost of these orchestras was met solely by the Australian Broadcasting Commission, but since then State Governments and major municipal bodies in all States have agreed to contribute towards the expense.

The close co-operation between a broadcasting organization, city authorities and State Governments to establish and maintain symphony orchestras is unique in the world.

In 1952, the Australian Broadcasting Commission organized 504 public orchestral concerts (including 130 free concerts for school children and 50 free concerts for adults) and 200 public recitals by famous artists throughout the Commonwealth. Of these concerts, 136 were given outside the capital cities, including 68 free orchestral concerts for school children.

The policy of the Australian Broadcasting Commission so far as individual artists are concerned has always been to develop local talent and at the same time give its audiences the opportunity of hearing famous international musicians.

(iii) *Drama and Features.* Drama programmes are designed to give listeners opportunities, which they might not otherwise have, of hearing the great plays of all nations as well as adaptations of the best modern stage plays and also those written specially for broadcasting. The main regular drama programmes are broadcast on Saturday and Monday evenings, and special series of longer plays are also given at various times during the year.

In recent years the technique of the feature programme has also been developed in this country. The feature is a form of entertainment which is unique to radio, consisting of specially written programmes designed to present information in an interesting way, and it may deal with a very wide variety of subjects ranging from history and current events to science and the arts. A number of Australian writers have become interested in this form of entertainment and about 97 per cent. of the features broadcast are written by Australians. Local writers also contribute a large proportion of the plays broadcast and every effort is made to assist and encourage their work.

(iv) *Youth Education.* The Australian Broadcasting Commission provides a regular series of broadcasts to schools as an addition to normal class-room education. The total number of listening schools at the end of 1952 was 7,682 or nearly 73 per cent. of all schools, State and private, throughout the Commonwealth. Many of the school broadcasts are presented in dramatized form, as this method makes the material more vivid and interesting to the young listener. For the very young children, the Commission broadcasts every week-day the "Kindergarten of the Air", a type of broadcast which originated in Australia. (See also Chapter XI.—Education, on this subject.)

(v) *Talks.* The aim of the Talks Department is to provide programmes which will keep the listener well informed on current affairs and on general topics. Many of the talks in the first category are now presented in a magazine type of session consisting of a number of short items linked by a narrator. The most complete of these built-up programmes is the documentary, in which radio goes into the field to analyse or to describe, using the actual sounds and voices recorded on location.

Controversial topics are covered in two sessions—the weekly discussion broadcast, in which the main conflicting points of view on a current topic are discussed by competent authorities, and the "Nation's Forum of the Air", using the debating technique with questions in person from the studio audience and telephoned from listeners. Another outstanding session is "News Review", containing at least five comments on the news of the day recorded over landline from all States of the Commonwealth and, in the case of significant world events, from overseas by radio-telephone.

(vi) *Rural Broadcasts.* The Rural Broadcasts Department was commenced in 1945 to serve the needs of country listeners. It has proved to be of great value to men and women on the land throughout Australia, by giving them the latest market reports and information on general conditions, and by keeping them informed on rural development overseas. The interstate market report is the only Australia-wide market service available to the Australian rural population. Programmes are exchanged with radio organizations in England, Canada, the United States of America and elsewhere, and several visits to Australia by well-known farm radio personalities have also been arranged. The department has encouraged the work of Junior Farmers' Clubs in Australia, and has sponsored competitions for members in connexion with the Royal Agricultural Shows in Sydney and Melbourne.

(vii) *News.* On 1st June, 1947, the Australian Broadcasting Commission's independent News Service came into full operation. Since that date the Commission has collected the news for its bulletins independently of the press and it now has, in addition to a large staff throughout Australia, a London news room for the selection and transmission of overseas news secured from the great news agencies. Nine national news bulletins are broadcast daily, and are followed by State bulletins of news of State interest. In addition, two or more regional bulletins are broadcast by local stations in country areas on most days of the week, and for remote country districts special bulletins are broadcast on shortwave. For overseas listeners 19 bulletins daily are broadcast through the Radio Australia transmitters. These bulletins, which are given in English, French and Malay, are directed to every continent, but concentrate on the Pacific and Asian areas. The Australian Broadcasting Commission also rebroadcasts for Australian listeners, by arrangement with the British Broadcasting Corporation, two British Broadcasting Corporation news bulletins each day.

(viii) *Other Activities.* The broadcasting of the proceedings of Federal Parliament commenced as a regular service in July, 1946, and Australian listeners are now able to hear debates from the House of Representatives and from the Senate. At present these broadcasts are confined to one of the two transmitters in each capital city, but it is hoped that eventually country listeners will also be able to hear them.

The National Children's Session, presented seven days a week, is composed of over 30 programme items, including stories, music, games, and items about art, literature and natural history. There is a children's newsreel and a Brain's Trust, discussing, through children, more than 100 topics each year. The Argonauts' Club is an important part of the session and encourages children between the ages of 7 and 17 in self-expression and the appreciation of cultural subjects, although fun and the future are not overlooked.

In co-operation with the various religious denominations, the Australian Broadcasting Commission broadcasts several religious sessions each week day in addition to those given on Sundays. These religious broadcasts include relays of normal church services and a variety of special programmes of talks and sacred music. The modern trend towards the use of religious drama is also followed.

The Australian Broadcasting Commission's variety and sporting programmes provide the lighter side of the service. In its variety sessions the Australian Broadcasting Commission does everything possible to assist local artists in order to increase the amount of first-class talent in this country, and encouragement is also given to Australian composers of light music. The Australian Broadcasting Commission's dance bands in Sydney and Melbourne are regarded as being two of the most outstanding bands in Australia.

The Australian Broadcasting Commission's coverage of sport at home and abroad is comprehensive. On Saturday afternoons the sporting panel provides listeners with the progress results and scores, and also descriptions from half a dozen or more fields of sport. Events of international interest such as Test Matches, the Davis Cup, etc., are covered by simultaneous descriptions from Australian Broadcasting Commission commentators. In covering events overseas, the Australian Broadcasting Commission is indebted to the British Broadcasting Corporation for its collaboration in Great Britain, and to the New Zealand Broadcasting Service for events in New Zealand.

(ix) *Transmission Services.* In July, 1953, the Australian Broadcasting Commission's home programmes for Australian listeners were transmitted by 44 medium-wave and 8 short-wave stations, and its overseas programmes were transmitted by 4 short-wave stations, two of which are of 100 kW. power and one of 50 kW. The 56 stations in operation at 1st July, 1953 are shown on page 169. The domestic short-wave stations are used for giving service to listeners in the sparsely populated parts of Australia, and in New Guinea and adjacent islands, while the other short-wave stations are directed to listeners overseas. Thirty of the medium-wave stations are situated outside the capital cities, and further regional stations are to be constructed. When these additions have been made, the medium-wave and short-wave stations together will provide for clear reception of the Commission's programmes in practically every part of Australia.

3. *Broadcast Licences Issued.*—(i) *States and Territories, 30th June, 1951.* The following table shows the number of broadcast licences issued in each State and Territory of the Commonwealth at 30th June, 1951.

#### BROADCAST LICENCES ISSUED, 30th JUNE, 1951.

State or Territory in which Issued.	Broadcasting.		Broadcast Listeners.		Experimental.
	National Stations. (a)	Commercial Stations.	One Receiver.	More than one Receiver.	
New South Wales .. .. .	12	35	674,576	74,195	1,004
Victoria .. .. .	7	19	522,502	63,891	931
Queensland .. .. .	12	20	270,587	17,432	314
South Australia .. .. .	4	8	203,473	39,546	313
Western Australia .. .. .	7	12	139,669	19,767	184
Tasmania .. .. .	3	8	68,149	9,594	94
Northern Territory .. .. .	2	..	1,222	70	14
Australian Capital Territory .. .. .	1	1	4,656	331	12
Total .. .. .	(b)50	103	1,884,834	224,826	(c)2,897

(a) Includes Short-wave Stations: New South Wales 1; Victoria, 3; Queensland 2; Western Australia 2. (b) Includes 1 medium-wave and 1 short-wave station in Papua. (c) Includes 31 stations operated in Papua-New Guinea.

Of broadcast listeners' licences in respect of one receiver, 1,039,287 or 55.14 per cent. were held by persons situated in metropolitan areas and 845,547 or 44.86 per cent. by persons in country areas.

(ii) *Broadcast Listeners' Licences, 30th June, 1925 to 1951.* The following table shows the number of broadcast listeners' licences issued at 30th June, 1925, 1930, 1935, 1939, 1940 and 1946 to 1951:—

#### BROADCAST LISTENERS' LICENCES ISSUED.

At 30th June—	N.S.W. (a)	Victoria.	Q'land. (b)	S. Aust. (c)	W. Aust.	Tasmania.	Australia. (b)
1925 .. .. .	33,719	19,243	1,061	3,118	3,417	501	61,059
1930 .. .. .	111,080	139,887	23,263	25,671	5,715	6,032	311,648
1935 .. .. .	278,648	236,886	67,369	76,365	41,176	20,088	720,532
1939 .. .. .	433,029	327,579	133,217	117,307	79,262	39,392	1,129,786
1940 .. .. .	458,155	348,158	151,110	124,891	87,764	42,182	1,212,260
1946(d) .. .. .	575,864	415,785	191,186	164,724	106,529	51,992	1,506,080
1947 .. .. .	679,505	499,944	228,066	180,909	121,149	61,674	1,771,247
1948 .. .. .	699,250	505,106	239,342	197,326	128,703	63,080	1,832,816
1949 .. .. .	706,452	531,722	261,054	212,416	139,290	68,088	1,919,022
1950 .. .. .	748,268	557,556	274,279	227,911	149,328	72,286	2,029,628
1951 .. .. .	753,758	586,393	288,019	244,311	159,436	77,743	2,109,660

(a) Includes Australian Capital Territory. (b) Includes Papua. (c) Includes Northern Territory. (d) Commencing in July, 1942. Licences for receivers in excess of one are included.

4. **Broadcasting.**—(i) *The National Broadcasting Service.* (a) *Transmitting Stations.* The technical services for the National Broadcasting System are provided by the Postmaster-General's Department, and the programmes by the Australian Broadcasting Commission (see page 165).

At 1st July, 1953, the National Broadcasting System of Australia comprised 53 transmitting stations as follows:—

*Medium-wave Stations—*

2CN and 2CY Canberra, 2BL and 2FC Sydney, 2CO Corowa, 2CR Cummoek, 2LG Lithgow, 2NA and 2NC Newcastle, 2NB Broken Hill, 2NR Grafton, 2NU Manilla, 2TR Taree, 3AR and 3LO Melbourne, 3GI Sale, 3WV Dooen, 4QG and 4QR Brisbane, 4AT Atherton, 4QB Pialba, 4QL Longreach, 4QN Townsville, 4QA Mackay, 4GM Gympie, 4QS Dalby, 4QY Cairns, 4RK Rockhampton, 4SO Southport, 5AN and 5CL Adelaide, 5CK Crystal Brook, 5LN Port Lincoln, 5AL Alice Springs, 5DR Darwin, 6WF and 6WN Perth, 6GF Kalgoorlie, 6GN Geraldton, 6WA Wagin, 7ZL and 7ZR Hobart, 7NT Kelso, 9PA Port Moresby, Papua.

*Short-wave Stations—*

VLI Sydney, New South Wales, VLG, VLH and VLR Lyndhurst, Victoria. VLQ and VLM Brisbane, Queensland, VLW and VLX Perth, Western Australia, VLT Port Moresby, Papua.

With the exception of the short-wave stations, all transmitters operate in the medium frequency broadcast band 540 to 1,600 kilocycles per second. From the short-wave stations, using frequencies within the band 3 to 30 megacycles per second, service is given to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, Northern Territory, and Northern and Central Queensland.

In addition to the short-wave stations under the National Broadcasting System there are also three short-wave stations at Shepparton, Victoria (VLA, VLB, VLC) for oversea services only.

Programmes for country regional stations are normally relayed from the central studio of the nearest capital city, high quality programme transmission lines being used for the purpose. A number of programme channels is utilized to link national broadcasting stations in the capital cities of Australia, and frequently this system is extended to connect both the national and commercial broadcasting stations.

(b) *Broadcast Listeners' Licences.* (1) Consequent upon an amendment to the Broadcasting Act which was proclaimed to take effect from 1st January, 1952, the fee payable for a broadcast listener's licence or renewal thereof is:—Zone 1, £2; Zone 2, £1 8s. That portion of the Act relating to the payment of additional fees for radio receivers in excess of one was repealed, and the licence now applies to every broadcast receiver which is in possession of the holder of the licence or of a member of his family at the address specified in the licence and/or ordinarily kept at that address or installed in a vehicle which is ordinarily kept at that address while not in use.

(2) Free licences are granted to blind persons and to schools. Invalid and age pensioners who live alone or with another such pensioner are required to pay only one-quarter the ordinary fee.

Zone 1 is the area within 250 miles of a National Broadcasting Station. Zone 2 is the remainder of the Commonwealth.

(c) *Financial Operations.* Since the amendment to the Australian Broadcasting Act, assented to on 6th December, 1948, the Australian Broadcasting Commission prepares estimates of its receipts and expenditure for each financial year and submits these estimates to the Minister. Appropriations are made by Parliament for the purposes of the Commission and these, together with all other moneys received by the Commission, are paid into an account in the Commonwealth Bank of Australia. From this account all costs, charges, expenses, etc., incurred by the Commission in the exercise of its powers and functions under the Act are defrayed. For particulars of the financial operations of the Commission see Chapter XVII.—Public Finance.

(ii) *Commercial Broadcasting Stations.* The services of other broadcasting stations are conducted by private enterprise under licence from the Postmaster-General. Licences are granted on conditions which ensure satisfactory alternative programmes for listeners. The fee for a broadcasting station licence is £25 per annum, plus one-half of one per cent. of the gross earnings from the operations of a station which has made a profit in the year preceding. The maximum initial period of a licence is three years, and it is renewed for a period of one year at the discretion of the Postmaster-General. Licensees of these stations rely for their income on revenue received from the broadcasting of advertisements and other publicity. The number of these stations in operation at 30th June, 1952, was 103 and there are other stations in prospect.

(iii) *Radio Inductive Interference.* The Postmaster-General's Department takes active measures to suppress, so far as possible, interference with broadcast reception resulting from the radiations of energy from electrical machinery and appliances. During the year 1950-51, 7,577 instances of interfering noises were eliminated with the co-operation of the owners of the offending equipment.

(iv) *Prosecutions under the Wireless Telegraphy Act.* During the year 1950-51, 2,991 persons were convicted for using unlicensed broadcast receiving equipment. The total fines and costs amounted to £7,608.

5. **Television.**—Under the Television Act 1953, the Postmaster-General may establish television stations or may grant licences for commercial television stations. No television stations have yet been established. Further reference to television appears in para. 1 above.

## CHAPTER VI. TRADE.

### § 1. Introductory.

**Constitutional Powers of the Commonwealth in regard to Commerce.**—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution with respect to oversea trade and commerce will be found in Sub-section 51 (i) and Sections 86 to 95 thereof (*see* Official Year Book No. 39, pp. 15 and 21–22).

### § 2. Commonwealth Legislation affecting Oversea Trade.

1. **General.**—In previous issues of the Official Year Book brief particulars of the various Commonwealth Acts and amendments thereof affecting oversea trade are given in chronological order. The Customs Acts represent the administrative or machinery Acts under which the Department of Trade and Customs operates, while the Customs Tariff provides the statutory authority for imposing the actual rates of duties operative from time to time.

The Acts at present in force are :—The Customs Act 1901–1952 ; Customs Tariff 1933–1952 ; Customs Tariff (Canadian Preference) 1931 and Customs Tariff (Canadian Preference) 1934–1952 ; Customs Tariff (Industries Preservation) Act 1921–1936 ; Customs Tariff (New Zealand Preference) 1933–1952 ; Customs Tariff (Papua and New Guinea Preference) 1936–1950 ; Customs Tariff (Southern Rhodesian Preference) 1941–1948 ; Customs Tariff (Primage Duties) 1934–1950 ; Trading with the Enemy Act 1939–1947.

2. **Customs Tariffs.**—(i) *General.* The Customs Tariff 1921–1930 provided a British Preferential Tariff, an Intermediate Tariff and a General Tariff. The Intermediate Tariff was omitted from the Customs Tariff 1933 but was restored by the Customs Tariff 1936.

(ii) *British Preference.* “British Preferential Tariff” rates of duty apply to goods the produce or manufacture of the United Kingdom, provided such goods comply with the laws and statutory regulations for the time being in force affecting the grant of British preference, and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. Preferential Tariff rates were provided for in the Commonwealth Tariff 1908. Subsequent legislation has extended the list of articles to which these rates apply. For the purpose of preferential treatment the following goods are deemed by Section 151A of the Customs Act 1901–1952 to be the produce or manufacture of the United Kingdom, provided the final process of their production or manufacture was performed in that country :—

- (a) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes—
  - (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia ;
  - (ii) Imported unmanufactured raw materials ;
  - (iii) Imported manufactured raw materials as determined by the Minister.
- (b) Goods of the factory or works, cost of which not less than seventy-five per cent. is represented—
  - (i) by labour or material of the United Kingdom ; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.
- (c) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works, cost of which not less than twenty-five per cent. or fifty per cent., if the Minister so determines, is represented—
  - (i) by labour or material of the United Kingdom ; or
  - (ii) by labour or material of the United Kingdom and labour or material of Australia.

The benefits of the British Preferential Tariff have also been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and by separate Tariff legislation to the Territories of Papua and New Guinea, and the above-mentioned conditions apply *mutatis mutandis* to each. They may be extended wholly or in part to any non-self-governing colony, including British Protectorates and certain British Trust Territories.

The Customs Tariff (Papua and New Guinea Preference) 1936-1950 which repealed the Act of 1934 provides for Customs Preference on goods the produce of the Territory of Papua and on goods the produce of the Territory of New Guinea. Imports into Australia from the Territory of Papua or the Territory of New Guinea of such of the goods specified in the schedule to the Act as were produced in the Territory from which they were imported, are, for the most part, free of duty. Other imports from Papua and New Guinea are subject to British Preferential Tariff rates of duty under the Customs Tariff 1933-1952. The goods specified in the schedule to the Customs Tariff (Papua and New Guinea Preference) 1936-1950 are coffee, dried lychee nuts, bananas, various native fresh fruits, edible fungi, green and dry ginger, coco-nuts, Rangoon beans, kapok and sesame seeds, arcaea nuts, cocoa beans, massoi oil, nuts (edible), sago, tapioca, spices, vanilla beans, gums, pyrites, denatured spirit and tea.

At the Imperial Economic Conference held at Ottawa, Canada, during July and August, 1932, a trade agreement providing for special preferential trade conditions was made between the Governments of the United Kingdom and the Commonwealth of Australia. A summary of the provisions of this agreement appears in Official Year Book No. 26, pp. 868-873, and further references have been made in subsequent issues.

The five years' currency of the agreement terminated on 19th August, 1937, but, in view of the negotiations then in progress between the Governments of the United Kingdom and the United States of America for a trade agreement, a review of the terms of the Ottawa Agreement became a matter of urgency. The United Kingdom Government at the time sought the concurrence of the Dominions in the modification of certain preferences granted under the Ottawa Agreement in order to facilitate the satisfactory conclusion of an agreement with the United States of America. As a consequence, a conference of United Kingdom and Australian Ministers was held in London early in 1938, and a joint statement setting out the result of the conference was issued by the two Governments in the form of a Memorandum of Conclusions which was published by the United Kingdom Government on 20th July, 1938. Details of the Memorandum have been published in previous issues of the Official Year Book. The full text may be found on pages 479-482 of Official Year Book No. 32.

The future of the agreement and of Empire preferences generally has been discussed in connexion with the proposals for the establishment of an International Trade Organization which are referred to in paragraph 6.

(iii) *Intermediate Tariff.* In submitting tariff schedules to Parliament on 20th March, 1936, the Minister for Trade and Customs said: "Another new feature of the schedules is the Intermediate Tariff. It has been re-introduced to provide a convenient avenue for expressing the level of duties which the Government proposes should form the basis for trade treaties. The rates proposed under the protective items of the Intermediate Tariff express, in every case, a protective level for Australian industry as well as preserving the margins required under the Ottawa Agreement." The Customs Tariff 1933-1952 provides that the Governor-General may from time to time by proclamation declare that the Intermediate Tariff shall apply from a date and time specified to goods specified in the proclamation which are the produce or manufacture of the British or foreign country specified in the proclamation. The Intermediate Tariff came into operation on 1st January, 1937, in respect of a selected list of items. This list has been substantially extended from time to time, but many rates have not yet been proclaimed to come into operation. Those items which have been proclaimed apply to goods from countries with which specific most-favoured-nation arrangements exist, including goods from all members of the British Commonwealth of Nations not receiving

preferential Tariff treatment. They apply also to goods from certain other Foreign countries in respect of which Australia has no formal obligation to accord Intermediate Tariff treatment.

(iv) *General Tariff.* The "General Tariff" applies to such importations as are not :—

(a) Goods the produce or manufacture of the United Kingdom, shipped in the United Kingdom :

(b) Goods the produce or manufacture of the following countries when admissible under the British Preferential Tariff or at a special rate of duty : Canada, New Zealand, Norfolk Island, Papua and New Guinea, Southern Rhodesia, and British non-self-governing Colonies.

(c) Goods admitted under the provisions of the Intermediate Tariff.

(v) *Deferred Duties.* The Customs Tariff 1933-1952 provides for duties on certain goods to be deferred. Where a deferred duty on any goods is provided for in the Schedule, the Minister shall refer to the Tariff Board for inquiry and report on the question whether the deferred duty should or should not operate on and after the date to which it has been deferred. The Board shall report whether the goods in respect of which the deferred duty is provided are being made or produced in Australia or will be so made or produced on, or immediately after, the date to which the duty has been deferred—(a) in reasonable quantities ; (b) of satisfactory quality ; and (c) at a reasonable price having regard, among other things, to the probable economic effect of the imposition of the deferred duty upon other industries concerned, and upon the community in general. Upon receipt of a report from the Tariff Board, the Minister may defer the duty further by notice published in the *Commonwealth Gazette*.

3. **Exchange Adjustment.**—The Customs Tariff (Exchange Adjustment) Act 1933-1939 provided for adjustments in Duties of Customs consequent upon depreciation in the value of Australian currency relative to sterling. This Act came into operation on 5th October, 1933 and ceased to operate on 15th November, 1947, as a result of the Customs Tariff (Exchange Adjustment) Act Repeal Act 1948.

A summary of the provisions of the Customs Tariff (Exchange Adjustment) Act 1933-1939 is contained in previous issues of the Official Year Book.

4. **Primage Duty.**—An account of the imposition of primage duty since its introduction on 10th July, 1930 is contained in Official Year Book No. 39 (pp. 456-7).

In addition to duties imposed by the Customs Tariff 1933-1952, ad valorem primage duties at rates of 4 per cent., 5 per cent., or 10 per cent., are charged according to the type of goods and origin thereof. Goods the produce or manufacture of New Zealand, Norfolk Island, Fiji, Papua and New Guinea, are exempt from primage duty. A large proportion of goods admissible under the British Preferential Tariff is also exempt from primage duty and a number of specified goods used by primary producers and many machines, tools of trade and raw materials not manufactured in Australia are free of primage duty regardless of their country of origin.

Primage duties at the rates applicable to the British Preferential Tariff are accorded to Canadian goods admissible under the British Preferential Tariff, and also to proclaimed commodities from Ceylon and various British non-self-governing Colonies, Protectorates, and Trust Territories. Primage duties at concessional rates (in most cases at the rate equivalent to the British Preferential Tariff rate) are payable on a limited number of goods the product of proclaimed countries.

5. **Trade Agreements.** (See also para. 6 following)—(i) *United Kingdom.* A reciprocal trade agreement between the United Kingdom and Australia came into force on 14th October, 1932, and is referred to briefly in paragraph 2 above. Broadly speaking, Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities and in return Australia incurred obligations to the United Kingdom in respect of Tariff rates and the grant of preferences to United Kingdom goods.

(ii) *Dominion of Canada.* A reciprocal trade agreement between Canada and Australia which came into force on 1st October, 1925, was superseded by a new agreement operating from 3rd August, 1931. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The exceptions to this general rule are listed in the schedules to the agreement.

Certain administrative provisions, including a special concession to Canada in respect of the inland freight charges to be included in the dutiable value of Canadian goods on importation into Australia, were incorporated in the agreement.

The Customs Tariff (Canadian Preference) 1931 and the Customs Tariff (Canadian Preference) 1934-1952 give effect to the agreement so far as Australia is concerned.

(iii) *Dominion of New Zealand.* A reciprocal trade agreement between New Zealand and Australia came into force on 1st December, 1933, superseding an earlier agreement of 1922. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The exceptions to this general rule are listed in the schedules to the agreement.

The Customs Tariff (New Zealand Preference) 1933, giving effect to the agreement, repealed earlier Acts and provides that duties on all goods specified in the schedule to the Act shall be at the rates indicated therein, and that all goods other than those provided for in the schedule shall be subject to the rates in force under the British Preferential Tariff. An amendment to this Act in 1934 provides that, where the rate of duty upon any class of goods under the New Zealand British Preferential Tariff is less than that operating in Australia under the British Preferential rate, upon request by the New Zealand Government such goods may, after proclamation, be admitted at the lower rate. The rates of duty on goods re-exported from New Zealand (not being goods the produce or manufacture of New Zealand) and which are imported into Australia, and which if they had been imported into Australia direct from the country of origin would have been subject to the rates of duty under the British Preferential Tariff, shall be the rates of duty in force under that tariff.

The Act provides also that films produced in New Zealand by or for the Government of New Zealand for publicity purposes shall be admitted free of duty, also that cocoa beans the produce of Western Samoa shall not be subject to any higher duties than those paid on cocoa beans the produce of any British non-self-governing Colony or Protectorate or any Territory under British mandate. The provisions of the Act do not, however, apply to goods the produce of Cook Islands.

Goods the produce or manufacture of the Dominion of New Zealand are exempt from primage duty.

The conditions of preference in the Act provide that goods shall be deemed to be the produce or manufacture of New Zealand if they conform to the laws and regulations in force in Australia which apply to such goods when imported under the British Preferential Tariff (*vide* section 151A of the Customs Act 1901-1952), except that special conditions apply to goods not wholly produced or manufactured in New Zealand.

(iv) *Southern Rhodesia.* An agreement between Southern Rhodesia and Australia came into operation on 9th April, 1941.

Under the agreement the principal undertakings by the Commonwealth Government were—(a) to accord a preferential rate of ninepence per lb. lower than the British Preferential Tariff on unmanufactured tobacco from Southern Rhodesia; and (b) to admit raw asbestos and chrome at rates of duty not higher than those applicable to these products from other countries, and to admit them free of primage duty.

The Southern Rhodesian Government on its part agreed—(a) to admit free of duty a schedule of Australian goods comprising 33 items; (b) to accord specified preferential rebates ranging from 10 per cent. to 50 per cent. from the duties applicable to United Kingdom goods on a schedule of Australian goods comprising 19 items; (c) to accord British Preferential Tariff rates to a schedule of Australian goods comprising 14 items and (d) to accord similar tariff treatment to Australian wheat and wheat flour, in the event of permits being issued for importation from any other country at rates of duty lower than those accorded to Australia under the agreement.

The Trade Agreement (Southern Rhodesia) Act 1941 approved the agreement, which was given effect to, so far as Australia is concerned, by the Customs Tariff (Southern Rhodesian Preference) 1941.

(v) *Union of South Africa.* A trade agreement between Australia and the Union of South Africa came into force as from 1st July, 1935.

This agreement provides that the products of the Union of South Africa or of the mandated territory of South-West Africa entering Australia and the products of Australia entering the Union of South Africa or the mandated territory of South-West Africa shall be subject to customs duties not higher than those imposed by the importing country on like products from the most favoured foreign nation. A reciprocal tariff arrangement under which products of Mozambique are admitted duty free to the Union of South Africa is exempt from the agreement.

The Trade Agreement (South Africa) Act 1936 approves the terms of this agreement.

(vi) *Foreign Countries.* Trade agreements between the Commonwealth Government and the Governments of Belgium, Czechoslovakia and France were in operation prior to the outbreak of war in September, 1939, but were inoperative during the war, owing to the provisions of the Trading with the Enemy Act 1939-1940. These agreements are again in force.

The trade agreement concluded in 1938 between Australia and Switzerland continued in limited operation during the war period.

Between December, 1939 and April, 1944 the Commonwealth Government also entered into trade agreements with Brazil and Greece.

Summaries of the texts of these agreements appear in previous issues of the Official Year Book.

**6. The Charter for an International Trade Organization and the General Agreement on Tariffs and Trade.**—(i) *The Charter for an International Trade Organization.* Details of the passage of events leading up to the drafting of the Havana Charter for an International Trade Organization and of the scope of the Charter itself may be found in Official Year Book No. 38, p. 466.

In accordance with the decisions reached at the conclusion of the United Nations Conference on Trade and Employment in March, 1948, the Havana Charter was submitted to Governments of the countries represented at the Conference. Because of the predominant influence of the United States of America in world trade, most other countries waited for a decision from that country before determining their own attitudes to the Charter.

On 6th December, 1950, the United States Government announced that it did not propose to resubmit the Havana Charter to Congress for approval, but would ask Congress to consider legislation to make American participation in the General Agreement on Tariffs and Trade more effective. It now seems unlikely that the Charter will come into force in its present form.

(ii) *The General Agreement on Tariffs and Trade.* On 10th April, 1947 (about a month prior to the resumption of the Charter discussions) the member nations of the Preparatory Committee engaged in negotiations with the object of arriving at a satisfactory basis on which the reduction of tariff barriers could be effected.

The Tariff negotiations were kept quite distinct from the Charter discussions, as the aim was to bring the results into effect without necessarily awaiting the establishment of the International Trade Organization.

The results of the negotiations were incorporated in a draft General Agreement on Tariffs and Trade which was tabled in the House of Representatives on 18th November, 1947, together with the tariff schedules implementing the tariff reductions which Australia had undertaken to afford.

A Protocol of Provisional Application provided that, upon signature by Australia, Belgium, Canada, France, Luxembourg, the Netherlands, the United Kingdom and the United States of America not later than 15th November, 1947, those countries should undertake to apply provisionally on and after 1st January, 1948—

(1) Parts I. and III. of the Agreement,

(2) Part II. of the Agreement to the fullest extent not inconsistent with existing legislation in their respective countries.

These conditions were satisfied and the Agreement is provisionally in force. Tariff reductions undertaken by Australia operated from 19th November, 1947. The General Agreement is now being provisionally operated by Australia, Austria, Belgium, Brazil,

Burma, Canada, Ceylon, Chile, Cuba, Czechoslovakia, Denmark, Dominican Republic, Federal Republic of Germany, Finland, France, Greece, Haiti, India, Indonesia, Italy, Liberia, Luxembourg, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Peru, Southern Rhodesia, Sweden, Turkey, Union of South Africa, United Kingdom and the United States of America. China, Lebanon and Syria have withdrawn from the General Agreement.

The agreement does not come definitively into force until 30 days after instruments of acceptance have been lodged by countries accounting for 85 per cent. of the total external trade of the countries signatory to the Final Act. The percentage is to be calculated in accordance with a table set out in Annexe H to the Agreement. No country has yet definitively accepted the agreement, but as in the case of the Charter, Parliament has approved Australia lodging an instrument of acceptance when the United Kingdom and United States of America have done likewise.

Many of the articles of the General Agreement are identical with articles in the Charter and were only incorporated in the Agreement to prevent tariff concessions being circumvented by other measures pending the coming into force of the Charter. Had the Charter come into force, Part II. of the General Agreement which contains such articles would have been suspended.

The three component parts of the Agreement contain briefly—

Part I. Schedules of negotiated tariff reductions and an undertaking to extend most-favoured-nation treatment to other participating countries except where existing preferences are deemed valid.

Part II. Undertakings regarding commercial policy to prevent tariff concessions being offset by other protective measures.

Rights are preserved, however, to—

- (1) Impose new duties for protective purposes except in respect of commodities where rates of duty have been bound under the general agreement ;
- (2) impose import restrictions to protect the balance of payments ;
- (3) take emergency action where any industry is endangered by any negotiated tariff or preference reduction.

Part III. Main/ machinery provisions.

Under the tariff negotiations associated with the Agreement, concessions were offered to Australia on almost all the principal products of which Australia is an actual or potential exporter to the individual countries concerned. Generally the offers were made directly to Australia, but in some cases benefits will arise indirectly from concessions granted to third countries which are more important suppliers of the particular product. These latter benefits occur through the operation of the most-favoured-nation principle.

In April, 1949 a second series of tariff negotiations commenced at Annecy, in France, between the 23 Contracting Parties which were then operating the General Agreement on Tariffs and Trade and eleven additional countries which had expressed a desire to accede to the General Agreement. Nine of these countries—Denmark, Dominican Republic, Finland, Greece, Haiti, Italy, Liberia, Nicaragua and Sweden subsequently acceded to the Agreement.

In addition, Ceylon, which, for domestic reasons, had been unable to operate concessions it negotiated at Geneva in 1947, took the opportunity of re-negotiating with certain countries including Australia.

The tariff concessions exchanged by Australia at Annecy were put into effect from 12th May, 1950.

A third series of tariff negotiations was conducted at Torquay, England, from September, 1950 to April, 1951, and was attended by representatives of all contracting parties except Burma, Liberia, Nicaragua and Syria, and by representatives of seven new countries—Austria, Federal Republic of Germany, Korea, Peru, Philippines Republic, Turkey and Uruguay. Australia completed agreements with Austria, Denmark, Federal Republic of Germany, Philippines, Turkey and Sweden. These tariff concessions exchanged by Australia were put into force on 27th September, 1951.

Questions concerning the application of the Agreement arise from time to time. The Contracting Parties have held seven sessions to deal with such matters: the first at Havana in March, 1948; the second at Geneva in August, 1948; the third at Annecy during 1949; the fourth at Geneva in February–April, 1950; the fifth at Torquay in November–December, 1950; the sixth at Geneva in September–October, 1951; and the seventh at Geneva in September–October, 1952.

7. *Import Controls.*—(i) *Customs (Import Licensing) Regulations.* The Customs (Import Licensing) Regulations No. 163 were first promulgated in December, 1939, and were made pursuant to the Customs Act 1901–1936, Sections 52 (g) and 56. These regulations provide, *inter alia*, that the importation into the Commonwealth of any goods shall be prohibited, unless:—

- (a) a licence to import the goods is in force and the terms and conditions (if any) to which the licence is subject are complied with; or
- (b) the goods are excepted from the application of the regulations.

The regulations were at first applied only to imports from non-sterling sources with the object of conserving non-sterling exchange and enabling priority in shipping space to be given to essential imports. However, with a subsequent decline in Australia's sterling balances in London and changes in the general war situation the restrictions were extended to cover a wide range of imports from sterling countries in December, 1941. The position remained basically the same during the remainder of the war and in the immediate post-war period.

As Australia's external financial position improved, the restrictions were progressively relaxed until, by November, 1950, imports from most countries had been exempted from the application of the regulations and, with minor exceptions, the restrictions applied only to imports from the Dollar Area and Japan. This position obtained until March, 1952.

During the financial year 1951–52, following a fall in the price of wool and a large increase in the volume of imports (the product, in turn, of the wool boom of 1950–51), Australia incurred a substantial deficit in overall payments on current account. Oversea reserves fell rapidly in the latter part of 1951 and early 1952, endangering Australia's external financial position to such a degree that it became necessary on 8th March, 1952 to apply the Customs (Import Licensing) Regulations to imports from all sources, with the exception of goods originating in Papua, New Guinea and Norfolk Island. As from that date no goods (with minor exceptions) may be imported from any country, except Papua, New Guinea and Norfolk Island, unless the importer holds a licence issued under the Customs (Import Licensing) Regulations authorizing the importation of the particular goods.

In order to conserve resources of foreign exchange and to ensure that the requirements of essential industry are satisfied, imports from all sources other than the Dollar Area countries and Japan are licensed on the basis of their relative essentiality. The Dollar Area countries and Japan are regarded as hard currency countries by all members of the Sterling Area, including Australia. Imports from these sources are limited to goods of an essential nature, due consideration being given to the question of the availability of similar goods from sources other than these countries.

(ii) *Customs (Prohibited Imports) Regulations.* In addition to the Import Licensing Regulations which are imposed for balance of payments reasons, Section 52 of the Customs Act provides for the prohibition of the importation of specified types of commodities and also provides for the making of regulations prohibiting the importation of other types of commodities.

Prohibition by regulation may be exercised by—(a) prohibiting the importation of goods completely; (b) prohibiting the importation of goods except with the consent of the Minister; (c) prohibiting the importation of goods except subject to conditions. Lists of products subject to prohibition are set out in the Customs (Prohibited Imports) Regulations. Commodities the importation of which has been prohibited under the regulations include dangerous drugs, firearms, undesirable publications and articles deleterious to public health.

8. **Export Control.**—(i) *Commodity Control.* Section 112 of the Customs Act provides that the Governor-General may by regulation prohibit the exportation of goods from Australia and that this power may be exercised by—(a) prohibiting the exportation of goods absolutely; (b) prohibiting the exportation of goods to a specified place; and (c) prohibiting the exportation of goods unless prescribed conditions or restrictions are complied with. Goods subject to export control are listed in the Customs (Prohibited Exports) Regulations.

(ii) *Monetary Control—Banking Act 1945.* As an integral part of the framework of Exchange Control, a control over goods exported from Australia is maintained under the provisions of Part III. of the Banking (Foreign Exchange) Regulations to ensure that the full proceeds of such goods are received into the Australian banking system and that these proceeds are received in the currency and in the manner prescribed by the Commonwealth Bank of Australia. This action is complementary to that taken under other parts of the Banking (Foreign Exchange) Regulations to control the movement out of Australia of capital in the form of securities, gold and currency.

Provision is made in the regulations for the grant of export licences subject to such terms and conditions as are imposed. On the receipt in Australia by the Commonwealth Bank, or by a bank acting as agent for that Bank, of advice that the foreign currency has been paid to the Commonwealth Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank, or an agent of the Bank, pays the licensee, or such other person as is entitled to receive it, an amount in Australian currency equivalent to the foreign currency received. In addition to commercial transactions, exports by private individuals are controlled. Persons leaving Australia for overseas are required to obtain licences to cover their bona fide baggage, personal effects and household effects in any individual case where the gold content thereof exceeds £A50, or where jewellery and other articles of high intrinsic worth either exceed £A250 in value or have not been the personal property of the passenger for at least twelve months.

9. **Industries Preservation.**—The Customs Tariff (Industries Preservation) Act 1921–1936 provides that, after inquiry and report by the Tariff Board, special duties shall be collected in the following cases when the importation of the goods referred to might be detrimental to an Australian industry. In the case of goods sold for export to Australia at a price less than the fair market value for home consumption or at a price which is less than a reasonable price, a special dumping duty shall be collected equal to the difference between the price at which the goods were sold and the fair market value, or the difference between the price at which the goods were sold and a reasonable price. Similar provision is made for goods consigned to Australia for sale. With regard to goods exported to Australia at rates of freight less than the normal rate of freight the dumping freight duty shall be—on goods carried free—the amount payable as freight at the normal rate; and in the case of any other goods—an amount equal to the difference between the freight paid and the freight which would have been payable at the normal rate. Special duties are also imposed in the case of goods imported from countries whose currency is depreciated. Provision is also made for the protection of the trade of the United Kingdom in the Australian market from depreciated foreign currency.

The Act provides that the Minister for Trade and Customs, after inquiry and report by the Tariff Board, may publish a notice in the *Commonwealth Gazette* specifying the goods upon which the special rates of duty under this Act shall thereupon be charged and collected.

10. **Imperial Preference in the United Kingdom.**—(i) *Preferential Tariff of the United Kingdom.* Prior to 1919 the United Kingdom levied duties on a limited number of items for revenue purposes and did not extend preferential treatment to any of the Empire countries. The majority of imported goods entered the United Kingdom free of duty and, in fact, there was no scope for preferential treatment. In 1919, however, the range of revenue duties was extended and preferential rates of duty were established on some eighteen items. Of these, the preferential rate on twelve items was to be equivalent to five-sixths of the full rate, on four to two-thirds of the full rate and on another (wine) to 50–70 per cent. of the full rate. The items so affected of interest to Australia at that time were currants, dried and preserved fruit, sugar, molasses and wine.

The extension of preferential treatment was conditional on the goods being consigned from, and grown, produced or manufactured in, the British Empire. In the case of manufactured articles, preference applied only where a prescribed proportion of their value was the result of labour within the British Empire. The conditions have been embodied in all subsequent preference arrangements in substantially the same form.

During the period from 1919 to 1932 it became increasingly obvious that the United Kingdom, for economic reasons, was being forced to depart from the free trade principles which had conditioned trade during the years preceding the 1914-18 War. Every time a new duty was introduced, provision was made for further preferential treatment to Empire products, although, in a great many cases, the preferences were of little or no significance to Australia, because the new duties were on products which were neither grown nor manufactured in Australia. The *Safeguarding of Industries Act 1921* provided for the imposition of duties on imports of key industry goods from foreign countries with free entry or preferential rates on similar goods from Empire countries. The purpose of these duties was to provide protection to vital United Kingdom industries in order to encourage their growth without fear of foreign competition. Similarly the *Dyestuff Import Regulation* of the previous year allowed the unrestricted import of dyestuffs of Empire origin, whereas imports of foreign dyestuffs were subjected to licensing restrictions. In 1925 preferences were accorded or increased on sugar (for ten years), tobacco, dried fruit, wine and several other items. In succeeding years Key Industries Duties were imposed on a further range of industrial goods and in 1927 screening quotas for British films and in 1928 further sugar concessions were introduced.

By 1931, therefore, the United Kingdom imposed duties on a fairly wide range of goods, provision being made in all cases for preferential treatment to Empire goods. The important preferences for Australia which emerged from these enactments were those on sugar, dried fruits, wine and jams and jellies. Even at this time, however, the United Kingdom adhered to the principles of free trade and by far the greater part of imports was free of duty.

In order to counteract the flood of dumping which followed the collapse of world trade in 1929-30 the United Kingdom introduced emergency tariff legislation in 1931. Ad valorem duties were imposed on almost all goods imported into the United Kingdom with the exception of certain raw materials, goods from Empire countries being exempt from these duties. These temporary measures were embodied in the *Import Duties Act of March, 1932*, by the enactment of which the United Kingdom finally abandoned free trade as a policy. This Act provided for the free entry for Empire goods pending the conclusion of some permanent agreement. The *Ottawa Agreements Act of November, 1932* emerged from the Imperial Economic Conference held in Ottawa and embodied agreements concluded between the various Dominions which participated. For the purpose of considering the present preferences enjoyed by Australia in the United Kingdom, it is expedient to regard the *Import Duties Act* and the *Ottawa Agreements Act* as complementary.

The *Import Duties Act* provided for the imposition of a general ad valorem duty of 10 per cent. on all imports with certain exceptions (i.e., those on the Free List and those already dutiable under previous enactments). Additional duties could be imposed and items on the Free List subjected to duty, and in fact, the range of items subject to duties under this Act has been extended from time to time since its enactment.

The freedom of Empire goods from these duties was guaranteed under the *Ottawa Agreements Act*, which also provided for the imposition of new duties on imports from foreign, but not Empire, countries of a number of products of special interest to the Empire countries concerned. Whilst free entry was guaranteed to Empire producers on a wide range of products, the margins of preference thereby applicable were not bound, and the duties could be varied up or down by the United Kingdom Government without the consent of Empire countries. On a selected range of items, however, which are specified in the schedules to the *Ottawa Agreements Act*, the duties may not be varied by the United Kingdom without the consent of the other party to the respective agreement.

(ii) *The Australia-United Kingdom Trade Agreement.* This Agreement is a unit of the Ottawa Agreements and through it preferences in the United Kingdom were established on a number of export items of considerable importance to Australia. The preferences accorded are summarized as follows:—

- (a) Continued free entry was guaranteed for three years for Australian eggs, poultry, butter, cheese and other milk products. (This freedom of entry still continues). Similar foreign goods were subjected to duty, thus giving Australia a preference of 1s. to 1s. 9d. per great hundred eggs; 10 per cent. ad val. on poultry; 15s. per cwt. on butter; 15 per cent. ad val. on cheese; 5s. per cwt. on sweetened whole condensed milk; and 6s. per cwt. on unsweetened whole condensed milk and milk powder and other unsweetened preserved milk.
- (b) Preferences were created on the following products by imposing a duty on like foreign articles whilst guaranteeing free entry to Australian produce: wheat (2s. per quarter); apples and pears (4s. 6d. per cwt.); canned apples (3s. 6d. per cwt.); other canned fruits (15 per cent. ad val.); certain dried fruits, raisins, etc. (10s. 6d. per cwt.); honey (7s. per cwt.); oranges (3s. 6d. per cwt. in season); raw grapefruit (5s. per cwt. in season); and grapes (1½d. per lb. in season).
- (c) The preferential margins on the commodities mentioned in (a) and (b) above were not to be reduced without the consent of the Australian Government and this provision also applied to the 10 per cent. preference on leather, tallow, canned meats, barley, wheat flour, macaroni, dried peas, casein, eucalyptus oil, meat extracts and essences, copra, sugar of milk, sausage casings, wattle bark, asbestos and certain dried fruits.
- (d) The Agreement also provided for a preference of 2d. per lb. on unwrought copper, but this was never implemented as Empire producers could not demonstrate their ability to continue offering their copper on first sale to the United Kingdom at prices not exceeding the world price, which was a condition of the preference. A similar condition applied to wheat, zinc and lead. In the case of zinc and lead the duty was changed at an early stage in the life of the Agreement from an ad valorem rate of 10 per cent. to a specific rate.
- (e) Australia, although not securing in the Agreement with the United Kingdom a commitment on the amount and duration of the preference margin applying to a number of commodities of some importance to Australia (e.g., rice), had its interests safeguarded by the fact that such items were usually covered by the United Kingdom's agreement with another Empire country. Such benefits were generalized to Australia.
- (f) The United Kingdom agreed to regulate meat imports and stated that its policy was to give the Dominions an expanding share of United Kingdom meat imports.
- (g) Preferential tariff advantages were also obtained in the British non-self-governing colonies and protectorates.

The preferences operating before, and not increased by, the Ottawa Agreement were continued. Thus the preferential margins on heavy wines, sugar, the sugar content of goods containing added sweetening matter, currants, etc., remained in operation.

(iii) *Developments since the Ottawa Agreement.* The Australia-United Kingdom Agreement operated with virtually no alteration until the beginning of 1939. Since then three major factors have been responsible for altering its terms or significance:—

- (a) *The United Kingdom-United States of America Trade Agreement, 1938.* This Agreement became effective from 1st January, 1939, and, to enable the United Kingdom to secure concessions from the United States of America, Australia agreed to the following reductions in the preferences which her products were enjoying in the United Kingdom:—

Wheat (preference eliminated); apples and pears (1s. 6d. per cwt. in Northern Hemisphere season); honey (2s. per cwt.); canned apples (1s. 3d. per cwt.); canned grapefruit (preference eliminated). The ad valorem duty of 15 per cent. was replaced by specific duties of 5s. 6d. per cwt. on canned fruit salad, 5s. per cwt. on canned pineapples and 4s. per cwt. on canned loganberries.

- (b) *Long-term Contracts with United Kingdom.* During and since the war Australia has made contracts under which the United Kingdom is obligated to purchase the whole or a substantial part of the exportable surplus of several important Australian products normally entitled to preferential treatment. Meat, sugar, dried fruits, apples and pears, butter, cheese and eggs are notable examples. The tariff preference is not significant whilst these contracts are operative and is further depreciated in importance since Australia would experience no difficulty in selling primary products in a wide range of markets if supplies were available.
- (c) *The General Agreement on Tariffs and Trade.* Australia has participated in the three rounds of tariff negotiations under this agreement held at Geneva, 1947, Annecy, 1949, and Torquay, 1950-51. In order to reach agreements with the various countries participating in these tariff negotiations, Australia consented to a number of reductions in preference margins guaranteed to her under the Ottawa Agreements, in return for more favourable tariff treatment in some twenty-seven countries with which agreements have been made. The reductions are summarized below :—

Apples (margin eliminated during Northern Hemisphere season); raisins (2s. per cwt.); canned peaches, pears and apricots (3 per cent. ad val.); non-tropical canned fruit salad (margin eliminated); dried apricots (2s. 6d. per cwt.); dried prunes, apples, peaches and nectarines (margin eliminated); honey (nil to 1s. 6d. per cwt. according to value for duty.) The preference margin was also modified on a number of items in which Australia was interested but on which her consent to reduction was not required under the Ottawa Agreement. Examples are fruit pulp, pig iron, rice, hard soap, glue, gelatine and size. The preference on heavy wine was increased from 4s. per gallon to 10s. per gallon.

11. **Tariff Board.**—The Tariff Board Act 1921-1947 provides for the appointment of a Tariff Board consisting of four members, one of whom shall be an administrative officer of the Department of Trade and Customs. This member may be appointed Chairman of the Board. Members of the Board are appointed for a term of not less than one year nor more than three years, and two members may be appointed as a Committee for making special inquiries. The purpose of the Tariff Board is to assist the Minister in the administration of matters relating to trade and customs. The more important matters which the Minister shall refer to the Board for inquiry and report include disputes arising out of the interpretation of any Customs or Excise Tariff; the necessity for new, increased or reduced duties; the necessity for granting bonuses; any proposal for the application of the British Preferential Tariff to any part of the British Dominions or any foreign country; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff by charging unnecessarily high prices for his goods or acting in restraint of trade. The Minister may refer to the Board for inquiry and report the following matters :—the classification of goods under items of the Tariff that provide for admission under By-laws; the determination of the value of goods for duty; the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws of the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and any other matter affecting the encouragement of primary and secondary industries in relation to the Tariff.

Inquiries conducted by the Board relating to any revision of the Tariff, any proposal for a bounty, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff shall be held in public, and evidence in such inquiries shall be taken in public on oath, unless any witness objects to giving any evidence in public which the Board is satisfied is of a confidential nature, when the Board may take such evidence in private. Evidence taken by the Board in connexion with any inquiry under the Customs Tariff (Industries Preservation) Act 1921-1936 shall be taken in public on oath.

12. **Trade Descriptions.**—The Commerce (Trade Descriptions) Act 1905 as amended by the Acts of 1926, 1930 and 1933 gives power to compel the placing of a proper

description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth. The goods to which a trade description must be applied are :—(a) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man ; (b) medicines or medicinal preparations for internal or external use ; (c) manures ; (d) apparel (including boots and shoes) and the materials from which apparel is manufactured ; (e) jewellery ; (f) seeds and plants ; and (g) brushware.

### § 3. Trade Commissioner Service.

Empire and foreign countries have deemed it necessary in their trade interests to establish generous oversea representation and have for many years maintained extensive oversea trade services.

Prior to 1929, Australian representation abroad was limited to the High Commissioner's Office in London, with a subsidiary agent in Paris, and the Office of the Commissioner-General for Australia in New York. Apart from the facilities afforded by those offices, the only form of oversea trade representation available to Australia was that of the British Oversea Trade Service, a service whose activities are naturally more particularly devoted to the development of United Kingdom rather than Dominion trade.

The growing importance of Australia's trade with Canada led to the appointment in 1929 of an Australian Trade Commissioner in that country. The part played by that official in the subsequent negotiations of the Trade Agreement with Canada, in the cultivation of close and cordial relations with the Canadian authorities, and in general in focussing interest on Australia and Australian products, amply demonstrated the value of such appointments both to the Commonwealth Government and the Australian trading community.

The general advantages to be derived from the appointment of Trade Commissioners may be briefly stated as follows :—(a) fostering of goodwill, (b) correction and avoidance of misunderstandings, and (c) dissemination of knowledge concerning the respective countries. Particular facilities which they are able to afford to the trading community are (a) information as to present and prospective demand for goods, (b) information as to foreign and local competition, (c) advice as to best selling methods, (d) reports as to the standing of foreign buyers, (e) specification of articles in demand, (f) dealing with trade inquiries, (g) advice and assistance to commercial visitors regarding trade matters, (h) settlement of difficulties between exporters in Australia and buyers abroad, and (i) furnishing of information as to foreign import requirements, customs duties, trade regulations, etc.

In addition to the foregoing particular trading functions, it is the duty of a Trade Commissioner to watch and advise the Government regarding any developments in his Territory affecting not only trade and commerce, but any other matters of concern to his home Government.

Trade Commissioners are drawn either from the commercial world or from the ranks of the Public Service, as circumstances dictate. With each Trade Commissioner, however, it is customary to provide an Assistant Trade Commissioner, who is selected to undergo training in the service and qualify at a later stage for appointment as a Trade Commissioner. The staffing arrangements are in this way designed to enable the Government to avail itself of the best procurable executives of either the Public Service or the commercial world and at the same time to build up a first class personnel to carry out a vigorous policy of expansion in connexion with Australia's oversea trade.

The oversea trade representation is shown in Chapter XXIIX.—Miscellaneous.

### § 4. Method of Recording Imports and Exports.

1. **Source of Statistics.**—Oversea trade statistics are compiled from documents obtained under the Customs Act and supplied to this Bureau by the Department of Trade and Customs.

2. **Customs Area.**—The Customs Area, to which all oversea trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including the Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory.

Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

3. **The Trade System.**—There are two generally accepted systems of recording oversea trade statistics, namely, (a) special trade and (b) general trade, and statistics of both are published by the Bureau, although greater emphasis is placed on general trade. Special exports can be readily identified in the general export tabulations, while special imports are obtained from separate tabulations. The United Nations Statistical Office defines the two systems as follows:—

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported).

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

Except for those appearing in § 14, para. 2, the tables which follow refer to general trade.

4. **Statistical Classification of Imports and Exports.**—Statistics of oversea imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to the revised classification which came into operation on 1st July, 1945. This classification is designed to allow for the inclusion of items which become significant with varying trade conditions, and in 1951–52 provided for 2,858 separate import items and 1,495 export items.

5. **The Trade Year.**—From 1st July, 1914 the statistics relating to Oversea Trade have been shown according to the financial year (July to June). Prior to that date the figures related to the calendar year. A table is included in § 15 showing the total value of imports and exports in the calendar years 1939 and 1948 to 1952 inclusive.

6. **Valuation.**—(i) *Imports.* The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged ad valorem. By Act No. 54 of 1947, which operated from 15th November, 1947, the Customs Act was amended to provide that the value for duty of goods imported into Australia should be the f.o.b. value in Australian currency instead of the British currency f.o.b. value plus 10 per cent.

Section 154 (1) of the Customs Act 1901–1947 provides that “when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or
- (ii) the current domestic value of the goods, whichever is the higher;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export.”

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.” All import values shown throughout this and other chapters of this issue of the Official Year Book are therefore uniform f.o.b. values at port of shipment in Australian currency.

(ii) *Exports.* Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally:—

- (1) Goods sold to oversea buyers before export— the f.o.b. port of shipment equivalent of the price at which the goods were sold (e.g. as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).

- (2) Goods shipped on consignment—the Australian f.o.b. port of shipment equivalent of the current price offering for similar goods of Australian origin in the principle markets of the country to which the goods were despatched for sale (as regards wool, the f.o.b. port of shipment equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. port of shipment equivalent of the price ultimately received).

Exporters are required to show all values in terms of Australian currency, and to include cost of containers.

An account of the bases of valuation in operation prior to 1st July, 1937 was given on page 469 of Official Year Book No. 39.

**7. Inclusions and Exclusions.**—(i) *Ships' Stores.* Prior to 1906, goods shipped in Australian ports on oversea vessels as ships' stores were included as exports. From 1906, ships' stores have been specially recorded as such, and omitted from the tabulation of exports. A table showing the value of these stores (including bunker coal and oil) shipped each year since 1943-44, compared with 1938-39, is shown in § 10, page 207.

(ii) *Outside Packages.* Outside packages (containers, crates, etc.) have always been included as a separate item in the tabulation of imports, but apart from those received from United Kingdom a classification according to country of origin has been available only since 1950-51. For exports, however, the value recorded for each item includes the value of the outside package.

(iii) *Trade on Government Account.* Imports and exports on Government account are treated as normal transactions and are an integral part of oversea trade transactions.

(iv) *Currency and Coinage.* Currency notes and coins of base metal are included in the oversea trade statistics at their commodity value only.

(v) *Gold Content of Ores and Concentrates.* The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold.

(vi) *Personal Effects.* Migrants' effects are included in imports and exports.

**8. Countries to which Trade is Credited.**—From 1st January, 1905, in addition to the record of the countries whence goods directly arrived in Australia, a record of the countries of their origin was kept, as it was considered that classification of imports according to country of origin was of greater interest and value than classification according to country of shipment. Up to and including the year 1920-21, imports continued to be classified both according to country of shipment and according to country of origin, but the former tabulation was discontinued as from the year 1921-22.

**9. Pre-Federation Records.**—In the years preceding Federation, each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports and exports were not on uniform lines. The figures in the following tables for years prior to Federation have been carefully compiled and may be taken as representative of the oversea trade of Australia as a whole. On the introduction of the Customs Act 1901 the methods of recording values were made uniform throughout the States.

## § 5. Total Oversea Trade.

**1. Including Gold.**—The following table shows the total trade (including gold) of Australia with oversea countries from the earliest date for which records are available. To save space, the period 1826 to 1945-46 has been divided into five-yearly periods, and the figures shown represent the annual averages for the periods specified. Figures for individual years were published in earlier issues of the Official Year Book, but it should be borne in mind that the figures for imports in issues prior to No. 38 are in British currency. (See note to following table.)

In this chapter the values in all tables of imports and exports are shown in Australian currency f.o.b. at port of shipment.

**TOTAL OVERSEA TRADE : AUSTRALIA.**  
(INCLUDING GOLD.)

Period.(a)	Value (£'000.)			Excess of Exports (+) or Imports (-)	Ratio of Exports to Imports	Value per Head of Population.		
	Imports.	Exports.	Total.			Imports.	Exports.	Total.

(a) The figures shown for the years 1826 to 1945-46 represent the annual averages for the periods covered. The trade of the individual years will be found in Official Year Book No. 37 and earlier issues, but it should be noted that imports are shown in British currency. From 1914-15 onwards the particulars relate to financial years. (b) Prior to 1906, ships' stores were included in exports. For value of such goods shipped on overseas vessels during each of the years 1938-39 and 1943-44 to 1951-52 see later table, § 10.

In issues of the Official Year Book prior to No. 23 fluctuations in the value of the overseas trade of Australia for earlier years were treated in some detail. The enhanced prices ruling for commodities and the peculiar conditions affecting Australian trade were responsible for the high value of imports in the years following the 1914-18 War and these factors should be taken into consideration in making comparisons with earlier years.

In 1924-25 the total value of overseas trade exceeded £300 million for the first time. Of the total value of trade, amounting to £318,454,000, imports represented £157,143,000 and exports £161,311,000. Imports in 1924-25, however, included an exceptionally large quantity of bullion and specie valued at £10,543,000. In the three years ended 1928-29 imports fell while exports were well maintained, but in 1929-30 both imports and exports declined substantially. The full effects of the economic depression are reflected in the greatly diminished trade figures for the period 1931-32 to 1935-36 and some years thereafter. The lowest level was recorded in 1931-32 when the total trade amounted to £137,538,000.

The outbreak of war in the Pacific in 1941 resulted in a substantial increase in the value of imports during the years 1941-42 to 1945-46. Since the end of the war the annual values of imports and exports have increased considerably, largely because of higher prices.

2. **Excluding Gold.**—The fluctuations in merchandise trade (including silver as merchandise) are shown more clearly in the following table, from which *all* gold movements have been excluded:—

**TOTAL OVERSEA TRADE : AUSTRALIA.**

(a) Outside packages distributed according to country of origin.

Imports from the United Kingdom were 44.35 per cent. of the total value of imports during 1951-52, compared with 40.67 per cent. during 1938-39. Imports from the United States of America have diminished during recent years to 8.21 per cent. in 1950-51, compared with 14.74 per cent. during the year 1938-39. However, a rise to 10.39 per cent. occurred in 1951-52.

2. **Exports according to Destination.**—(i) *Values.* The following table shows the value of commodity exports to the principal countries during the years 1938-39 and 1947-48 to 1951-52.

**EXPORTS FROM AUSTRALIA TO VARIOUS COUNTRIES.**

## § 7. Trade with the United Kingdom.

1. Imports.—The following table shows, according to statistical classes, the value of imports into Australia of United Kingdom origin during the years 1947-48 to 1951-52 compared with the year 1938-39.

**IMPORTS INTO AUSTRALIA OF UNITED KINGDOM ORIGIN : CLASSES.**  
(£'000.)

Class.	1938-39.	1947-48.	1948-49.	1949-50.	1950-51.	1951-52.
I. Animal foodstuffs, etc. . . . .	342	698	762	891	1,366	1,883
II. Vegetable foodstuffs; non-alcoholic beverages, etc. . . . .	214	760	1,130	1,400	1,772	2,061
III. Alcoholic liquors, etc. . . . .	700	573	677	973	1,127	1,676
IV. Tobacco, etc. . . . .	22	1,907	3,808	4,949	5,458	6,949
V. Live animals . . . . .	55	173	311	281	285	217
VI. Animal substances, etc. . . . .	41	170	91	147	220	393
VII. Vegetable substances, etc. . . . .	241	892	1,411	1,361	2,718	3,658
VIII. Apparel, textiles, etc. . . . .	11,438	44,122	70,778	65,785	83,705	109,268
IX. Oils, fats and waxes . . . . .	154	203	366	433	645	1,837
X. Paints and varnishes . . . . .	137	895	944	934	1,058	1,537
XI. Stones and minerals, etc. . . . .	317	140	693	569	234	309
XII. Metals, metal manufactures and machinery . . . . .	20,801	52,681	92,403	158,057	189,771	225,918
XIII. Rubber and leather, etc. . . . .	282	1,635	3,009	5,965	6,726	12,182
XIV. Wood and wicker, etc. . . . .	97	240	354	437	487	647
XV. Earthenware, etc. . . . .	1,079	1,939	5,993	6,803	7,311	11,010
XVI. Paper and stationery . . . . .	3,358	8,088	8,185	9,893	14,617	22,359
XVII. Jewellery, etc. . . . .	314	2,478	2,837	3,469	4,329	3,939
XVIII. Optical, surgical and scientific instruments . . . . .	597	2,872	4,396	4,117	4,976	6,683
XIX. Drugs, chemicals, etc. . . . .	2,609	5,086	5,885	5,971	9,846	13,834
XX. Miscellaneous (a) . . . . .	2,980	3,684	5,279	6,312	20,229	38,978
XXI. Gold and silver; bronze specie . . . . .	16	2	1	1	1	367
<b>Total</b> . . . . .	<b>46,094</b>	<b>132,238</b>	<b>209,313</b>	<b>278,748</b>	<b>356,881</b>	<b>465,705</b>

(a) Includes Arms, Ammunition and Explosives.

2. Exports.—In the following table the exports from Australia to the United Kingdom are shown in classes according to the same classification as for imports.

**EXPORTS FROM AUSTRALIA TO THE UNITED KINGDOM : CLASSES.**  
(£'000.)

Class.	1938-39.	1947-48.	1948-49.	1949-50.	1950-51.	1951-52.
I. Animal foodstuffs, etc. . . . .	24,484	43,679	51,898	57,372	41,424	31,395
II. Vegetable foodstuffs; non-alcoholic beverages, etc. . . . .	14,369	33,949	64,769	33,161	46,077	45,064
III. Alcoholic liquors, etc. . . . .	906	1,313	840	232	313	253
IV. Tobacco, etc. . . . .	1	1	3	..	1	1

5. **Proportion of Trade from United Kingdom and Competing Countries.**—Since 1908, permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of Customs Duties on certain goods the produce or manufacture of the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this Chapter.

# EXPORT PRICE INDEX - NUMBERS: AUSTRALIA, 1928 TO 1952

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS  
(BASE: AVERAGE OF THREE YEARS ENDED JUNE, 1939 = 1,000)

# EXPORTS OF AUSTRALIAN PRODUCTS ACCORDING TO INDUSTRIES

## 1910 TO 1951-52

\* Australian production of gold substituted for exports of gold each year (see page 209).

# OVERSEAS TRADE : AUSTRALIA, 1910 TO 1952

## IMPORTS

## EXPORTS

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufactured in the United Kingdom. The imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom could not supply. These items, in addition to others not available from that country, have therefore been omitted from the computation following.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, Germany, Japan and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for the years 1913, 1938-39, 1950-51 and 1951-52 are shown in the following table.

**IMPORTS FROM THE UNITED KINGDOM AND ITS MAIN COMPETITORS.**

	1951-52	52.40	2.60	3.71	5.10	8.52	100.00
Total imports (less bullion and specie)	1913 ..	52.37	2.84	8.99	1.22	13.95	100.00
	1938-39	40.70	1.03	4.16	4.12	14.75	100.00
	1950-51	48.14	2.21	1.09	2.08	8.21	100.00
	1951-52	44.33	2.13	3.16	4.14	10.36	100.00

The total value of the commodities included in the competitive classes increased from £50,135,000 in 1913 to £77,655,000 in 1938-39 and to £767,348,000 in 1951-52. The principal classes of competitive imports are metals, metal manufactures and machinery (value £392,911,000 in 1951-52) and apparel, textiles and manufactured fibres (value £203,569,000 in 1951-52). The value of goods included in these two groups represented 77.7 per cent. of the total value of competitive commodities during 1951-52.

In 1938-39 the United Kingdom supplied 52.69 per cent. of the total value of competitive goods. In 1913 the corresponding figure was 58.38 per cent. and in 1951-52 52.40 per cent.

Japan's share in the competitive trade increased in proportion to other countries from 1.24 per cent. in 1913 to 5.02 per cent. in 1938-39. Owing to the effects of war it was reduced to 0.06 per cent. in 1946-47. In 1951-52 it was 5.10 per cent.

The proportion supplied by the United States of America improved from 10.86 per cent. in 1913 to 13.42 per cent. in 1938-39 and to 20.28 per cent. in 1947-48, but had fallen to 8.52 per cent. in 1951-52.

The proportion of imports of French origin declined from 3.61 per cent. in 1913 to 1.21 per cent. in 1938-39, but in 1951-52 had risen to 2.60 per cent.

The proportion supplied by Germany was 10.68 per cent. in 1913, and 4.66 per cent. in 1938-39. In consequence of the war, the proportion of imports from Germany fell to 0.52 per cent. during 1948-49, but it has since risen and in 1951-52 was 3.71 per cent.

### § 8. Trade with Eastern Countries.

1. **Imports of Merchandise from Eastern Countries.**—The values of imports into Australia from Eastern countries during the year 1938-39 and the years 1947-48 to 1951-52 are shown in the following table. The principal commodities imported in 1951-52 according to countries of origin were :—Ceylon—Tea, £9,958,000 ; India—Bags and Sacks, £27,982,000, Cotton and Linen Piecegoods, £3,888,000, Hessian, £4,934,000, Linseed Oil, £2,098,000 ; Malaya—Crude Rubber, £14,604,000 ; Singapore—Crude Rubber, £2,207,000, Petroleum Spirit, £3,114,000, Solar and Residual Oil, £2,205,000 ; Indonesia—Crude Rubber, £1,981,000, Kerosene, £3,172,000, Petroleum Spirit, £11,183,000, Residual and Solar Oil, £5,685,000 ; Japan—Cotton and Linen Piecegoods, £7,084,000, Iron and Steel, £21,808,000, Timber, £1,880,000, Wire, £1,989,000.

The balance of trade with Eastern countries, which can be ascertained by comparison with the table on page 199, shows an excess of imports into Australia during the years 1938-39, 1950-51 and 1951-52, and an excess of exports during the years 1947-48 to 1949-50.

§ 9. Classified Summary of Australian Oversea Trade.

r. Imports.—The following table shows, according to statistical classes, the value of imports into Australia during each of the years 1947-48 to 1951-52 compared with the year 1938-39.

IMPORTS INTO AUSTRALIA : CLASSES.  
(£'000.)

Class.	1938-39.	1947-48.	1948-49.	1949-50.	1950-51.	1951-52.
I. Animal foodstuffs, etc.	1,824	3,696	3,961	3,745	4,970	6,724
II. Vegetable foodstuffs; non-alcoholic beverages, etc.	4,512	16,521	13,933	20,694	24,796	24,978
III. Alcoholic liquors, etc.	821	762	985	1,169	1,464	2,355
IV. Tobacco, etc.	2,125	7,721	9,183	12,395	16,437	18,820
V. Live animals	208	385	487	492	464	616
VI. Animal substances, etc.	2,214	3,440	2,926	2,817	3,789	4,817
VII. Vegetable substances, etc.	2,961	11,470	13,150	13,776	24,908	30,269
VIII. Apparel, textiles, etc.	20,242	96,065	109,198	99,761	138,669	203,569
IX. Oils, fats and waxes	9,915	34,757	43,179	52,382	69,825	87,460
X. Paints and varnishes	662	1,639	1,909	1,812	2,453	3,953
XI. Stones and minerals, etc.	1,027	2,837	3,637	6,573	8,970	5,950
XII. Metals, metal manufactures and machinery	35,653	85,379	128,036	227,343	289,833	392,911
XIII. Rubber and leather, etc.	1,926	5,352	6,695	11,259	30,448	35,083
XIV. Wood and wicker, etc.	2,371	4,877	8,137	8,822	15,795	28,029
XV. Earthenware, etc.	2,123	7,250	7,841	9,074	11,120	19,667
XVI. Paper and stationery	7,051	23,383	21,061	18,883	30,595	68,759
XVII. Jewellery, etc.	1,632	4,131	4,915	6,514	8,913	9,281
XVIII. Optical, surgical and scientific instruments	1,825	4,410	5,849	6,089	7,552	10,416
XIX. Drugs, chemicals, etc.	6,382	11,036	11,878	12,091	18,693	28,999
XX. Miscellaneous (a)	7,743	12,974	17,096	20,433	31,685	67,380
XXI. Gold and silver; bronze specie	3,537	1,661	1,138	1,945	2,492	3,672
Total	116,754	339,746	415,194	538,069	743,871	1,053,423

(a) Includes Arms, Ammunition and Explosives.

2. Exports.—In the following table the exports from Australia are shown according to the same classification as for imports, distinguishing (A) Australian produce; (B) Other produce (re-exports); and (C) Total exports.

EXPORTS FROM AUSTRALIA : CLASSES.  
(£'000.)

7. Imports in Tariff Divisions.—In the following table the imports into Australia during the years 1947-48 to 1951-52 compared with the year 1938-39 have been classified in accordance with the sixteen divisions of the Customs Tariff.

## IMPORTS CLASSIFIED ACCORDING TO DIVISIONS OF THE TARIFF : AUSTRALIA.

(£'000.)

Tariff Division.	1938-39.	1947-48.	1948-49.	1949-50.	1950-51.	1951-52.
I. Ale, Spirits, and Beverages ..	1,042	1,087	1,327	1,591	2,184	3,283
II. Tobacco and Preparations thereof ..	2,125	7,726	9,186	12,405	16,370	18,640
III. Sugar ..	46	49	41	54	83	208
IV. Agricultural Products and Groceries ..	7,218	22,884	21,499	28,020	33,281	35,837
V. Textiles, Felts and Furs, and Manufactures thereof and Attire ..	18,150	81,430	94,889	99,056	121,169	179,826

VII. Oils, Paints and Varnishes ..	10,898	34,277	44,903	53,715	71,843	91,290
VIII. Earthenware, Cement, China, Glass and Stone ..	2,632	7,510	7,957	9,440	11,630	20,998
IX. Drugs and Chemicals ..	4,600	7,534	8,114	10,526	17,900	24,463
X. Wood, Wicker and Cane ..	2,411	4,480	8,251	9,692	19,068	33,538
XI. Jewellery and Fancy Goods ..	2,332	4,910	6,671	10,229	13,818	16,075
XII. Hides, Leather and Rubber ..	2,138	5,912	7,853	12,883	27,576	33,707
XIII. Paper and Stationery ..	7,370	20,117	20,072	17,749	28,577	68,514
XIV. Vehicles ..	10,560	23,760	41,817	79,611	84,838	96,884
XV. Musical Instruments ..	326	421	655	672	900	1,082
XVI. Miscellaneous ..	16,088	71,119	60,720	60,927	95,794	138,095
Total, Merchandise ..	113,217	338,085	414,056	536,124	741,378	1,049,751
Total, Specie and Bullion ..	3,537	1,661	1,138	1,945	2,493	3,672
Grand Total ..	116,754	339,746	415,194	538,069	743,871	1,053,423

8. Imports and Net Customs Revenue.—The percentage of net Customs revenue, omitting Primage, collected on the total value of all merchandise imported in each year was as follows :—1938-39, 21.9 per cent. ; 1947-48, 14.9 per cent. ; 1948-49, 14.0 per cent. ; 1949-50, 13.4 per cent. ; 1950-51, 11.3 per cent. ; and 1951-52, 10.0 per cent. Primage duty was in force during these years and if this is added to net Customs revenue the percentages become :—1938-39, 25.0 per cent. ; 1947-48, 17.0 per cent. ; 1948-49, 15.3 per cent. ; 1949-50, 14.5 per cent. ; 1950-51, 12.4 per cent. ; and 1951-52, 10.9 per cent. The percentages of net Customs revenue, omitting primage, on the total value of dutiable goods only were—1938-39, 37.1 per cent. ; 1947-48, 26.0 per cent. ; 1948-49, 24.7 per cent. ; 1949-50, 24.6 per cent. ; 1950-51, 22.4 per cent. ; and 1951-52, 21.1 per cent. The calculations are based on Australian currency values and on the assumption that the value of clearances approximated to the value of imports during the same period.

9. Protective and Revenue Customs Duties.—The value of goods cleared for Australian consumption classified under protective and revenue duties and the gross duty collected are shown in respect of the United Kingdom and other countries for each of the years 1937-38 to 1939-40 in Official Year Book No. 37, page 418. Information for later years is not available.

### § 10. Ships' Stores.

Prior to 1906, goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and have been omitted from the export figures. The value of these stores shipped each year during the period 1943-44 to 1951-52 compared with 1938-39, with fuel oils separate, is shown in the following table :—

VALUE OF STORES SHIPPED ON OVERSEA VESSELS : AUSTRALIA.  
(£.)

Period.	Fuel Oils.	All Stores (including Fuel Oils).	Period.	Fuel Oils.	All Stores (including Fuel Oils).
1938-39..	606,515	2,105,619	1947-48 ..	2,551,736	5,599,945
1943-44 ..	6,078,800	8,478,714	1948-49 ..	3,839,986	7,814,722
1944-45 ..	8,229,307	11,373,252	1949-50 ..	3,169,374	7,580,959
1945-46 ..	2,849,156	6,331,657	1950-51 ..	4,635,486	9,358,022
1946-47 ..	1,684,502	4,506,599	1951-52 ..	5,532,415	10,477,911

In addition to fuel oils, the principal items of ships' stores supplied to oversea vessels in 1951-52 were :—Meats, £1,596,690 ; Fruit and Vegetables, £567,716 ; Bunker Coal, £246,258 ; Eggs, £176,825 ; Fish, £170,801 ; Oils, other than Fuel, £133,388 ; Butter, £128,785 ; Milk and Cream, £113,540 ; Rice, £109,125 ; and Flour (Wheaten), £100,091.

### § 11. Movement of Specie and Bullion.

1. Imports and Exports.—The following tables show the values of gold and silver specie and bullion, and of bronze specie imported into and exported from Australia during the years 1938-39 and 1947-48 to 1951-52.

IMPORTS AND EXPORTS. SPECIE AND BULLION : AUSTRALIA.

### § 12. Exports according to Industries.

1. **Classification.**—The following table provides an analysis of the exports of Australian produce, according to the main classes of industry in which the goods were produced, for the years 1950-51 and 1951-52 in comparison with those for the years 1913 and 1938-39. The index-numbers based on the year 1913 show the variations in the

total recorded value only of exports in each industrial group, and have not been adjusted either for price changes or in accordance with the variation of the Australian £ in relation to sterling.

A graph is published on page 194 of this chapter which shows the value of exports of Australian produce according to industrial groups from 1910 onward.

**EXPORTS OF AUSTRALIAN PRODUCE ACCORDING TO INDUSTRIAL ORIGIN: VALUE.**

Industrial Group.	1913.(a)		1938-39.		1950-51.		1951-52.

Total ..	82,352	100	135,094	164	989,181	1,201	673,958	818

(a) Base Year. (b) Australian production of gold substituted for exports of gold each year.

2. **Relative Importance of Industrial Groups.**—In the previous table the value of commodities in each industrial group of exports of Australian produce is that recorded at the date of shipment from Australia, with the exception that the value of the production of gold in Australia in each year has been substituted in the Mines and Quarries group for actual shipments of gold in each year. This has been done to eliminate the exports of gold for monetary purposes. In order of importance the pastoral group occupied the highest place, representing, in 1913, 51.1 per cent. of the total exports, as compared with 43.7 per cent. in 1938-39, 69.8 per cent. in 1950-51 and 55.6 per cent. in 1951-52.

Exports of agricultural produce rank next in importance. From 13.0 per cent. of the total exports in 1913, agricultural produce increased to 19.5 per cent. in 1938-39. It represented 16.3 per cent. and 21.6 per cent. in 1950-51 and 1951-52 respectively.

According to value, exports of dairy and farmyard produce increased from 4.7 per cent. in 1913 to 11.6 per cent. in 1938-39, but declined to 3.6 per cent. in 1950-51 and to 3.8 per cent. in 1951-52. Though the products of mines and quarries declined seriously subsequently to the year 1913, a recovery was made in later years, the figures for 1938-39 representing 17.7 per cent., but in 1950-51 and 1951-52 the percentages were only 5.0 and 9.7 respectively. The manufacturing group of exports, which represented 2.8 per cent. in 1913, had increased to 6.4 per cent. in 1938-39 and to 15.7 per cent. in 1945-46. In 1950-51 this group represented 4.9 per cent. and in 1951-52 8.6 per cent.

**§ 13. Australian Index of Export Prices.**

1. **General.**—Over the past fifty years the exports of Australia have become increasingly diversified, but, although the proportion of highly manufactured exports has increased, it is still small in relation to total exports. Most of these exports still consist of basic products, such as wool, wheat, butter, etc.

2. **Historical.**—An annual index of export prices has been published by this Bureau since its inception.

The first index was compiled annually for the years 1901 to 1916-17. The method of computation was to select all those articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the base year). The total value so obtained was divided into the total actual (recorded) value of these exports for that year. The quotient (multiplied by 1,000) thus obtained was the export price index-number for that year.

The method was changed in 1918. A weight for all principal exports was calculated on the average quantities of exports for the nineteen and a half years from 1st January, 1897 to 30th June, 1916. To these weights were applied the "average unit export values" of each export in successive years, and a weighted aggregative index of "price" variations was derived. It was published for the years 1897 to 1929-30, and particulars of this index were last published in Official Year Book No. 24, 1931, on page 147.

After the 1914-18 War, however, the relative importance of different exports changed considerably. In addition, the pattern of exports had become liable to vary considerably from year to year.

3. **Present Indexes.**—For the reasons just mentioned, two new series of monthly export price indexes—one using fixed weights, the other changing weights—were published in 1937, computed back to 1928. These are the only export price indexes now published.

The data on which both series are based differ from those utilized in the old series of annual index-numbers. The most important change was the use of actual (or calculated) export parities, based on actual price quotations, in place of the "unit-values" declared at the Customs.

The old index took no account of gold exports. The omission is natural and reasonable for countries which produce little or no gold. For gold-producing countries, although some exports of gold would be irrelevant (e.g., the Australian shipments of gold reserves during the depression), the exports of newly-produced gold should be taken into account. In the new series, therefore, gold is included, but the weight given to it is not the quantity exported but the quantity produced.

The two series are compiled monthly, and both relate to commodities which normally constitute about 80 per cent. of the total value of exports of merchandise and silver and gold production.

4. **Monthly Index (Fixed Weights).**—This is a weighted aggregative index of price variations. It was computed back to 1928, with that year taken as base. It is now usually published on the base—average of three years ended June, 1939 = 100.

The purpose of this index is to provide comparisons, over a limited number of years, of the level of prices of those commodities normally exported from Australia, making no allowance for any benefit or disadvantage accruing from variations during the period in the relative proportions of the different kinds of exports.

(a) *Weights.* The original weights (used for the period 1928 to 1936) were, in round figures, the average annual exports (or production, in the case of gold) during the five years 1928-29 to 1932-33.

From July, 1936 the weights were revised, and are now based on the average annual exports (production in the case of gold) during the three years 1933-34 to 1935-36. The break of continuity has been bridged by the usual method of splicing. Consideration is being given to adopting weights for a post-war period.

The weight adopted for wheat takes into account the wheat equivalent of flour exported, the weight allotted to greasy wool takes account of the greasy equivalent of scoured wool, tops, and wool on skins, whilst for some metals allowance is made for the metallic content of ores and concentrates exported.

The twenty items, together with the units of quantity and the weights or "quantity multipliers", are given in the following table.

EXPORT PRICE INDEX : COMMODITIES AND WEIGHTING SYSTEM.  
(FROM 1ST JULY, 1936.)

Item.	Unit of Quantity.	"Quantity Multipliers".	Percentage Distribution of Aggregative Value.

(a) Includes "wheat equivalent" of flour.

The percentage distributions of the "Aggregative Values" shown in the foregoing table are of importance, firstly, as showing their variations from time to time as the result of differential price movements as between the various commodities, and secondly, as regards the effect on the indexes as a whole of the percentage price variations in each commodity.

(b) *Prices.* The adoption of current market prices (as distinct from the former average unit export values) in the present indexes permitted the use of standards for each commodity. All export parities are calculated from price quotations from the most reliable and representative sources available. In most cases, the prices used are those at which current sales are being effected. In recent years, however, great difficulty has been experienced in obtaining appropriate current market price data for some commodities. It has become impossible to adhere to a common principle. Actual (or calculated) export parities currently prevailing, priced at f.o.b. Australian ports, are still used whenever possible. However, since dual or multiple price systems have become operative for some exports, the prices used in the index for wheat (from July, 1945 to September, 1951) and for certain metals represent average actual realizations for current *shipments*. From October, 1951 the prices used for wheat are the estimated average realizations after weighting prices of quota and non-quota wheat. Notes on earlier prices used for wheat were given on pages 508 and 509 of Official Year Book No. 38-1951. Current market prices used for the main commodities are:—

- (i) the price for wool is a weighted average (based on clean scoured prices) of representative types at Sydney auctions, expressed in terms of pence per lb., greasy;

(ii) where contracts exist between the Australian and the United Kingdom Governments for certain commodities and when most of the exports of such items are sold at these rates, contract prices are used (e.g., meats, butter, dried fruits, tallow); and

(iii) for those metals which are at present not actually exported, Australian export parities are estimated on the basis of the prices ruling in London.

(c) *Index-numbers.* The following table shows export price index-numbers for Australia for individual commodities, groups of commodities, and all groups combined for each financial year from 1936-37 to 1951-52 and monthly for the year 1951-52.

### EXPORT PRICE INDEXES : AUSTRALIA.

SIMPLE AGGREGATIVE INDEX ; FIXED WEIGHTS.

June	566	432	291	641	273	501	300	483	343	186	483	463

(a) Non-Ferrous—silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton, pork. (c) Sultanas, lexias, currants. (d) Cattle hides, calf skins. (e) The price used in the index since 14th December, 1951 is the price of Australian gold on overseas premium markets. (f) For "All Groups (including Gold)"—applicable from 1936-37. (g) For "All Groups (excluding Gold)"—applicable from 1936-37. (h) Nominal.

Reference to the group indexes in the table above will show the great increases and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool in recent years. Similar, but less marked, movements have occurred in prices of metals and hides. Since wool is a predominant export (with 46 per cent. of the Base Aggregate of the index) fluctuations in wool prices obscure the movements affecting the other components in the All Groups index. For purposes of comparison they are shown separately below.

**RECENT TRENDS—EXPORT PRICE INDEX : WOOL AND "OTHER GROUPS".**

(a) Nominal.

5. **Monthly Index (Changing Weights).**—This series was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. It is compiled in such a way as to take closer account of the actual quantities of each article exported at current prices; and hence to indicate with rather greater accuracy the extent to which price movements have affected the actual value of our current exports.

For any given month, the procedure is to multiply the price of each commodity in that month, and its price in the corresponding month of the previous year, by the quantity exported during the given month. A comparison of the resulting aggregates gives one possible measure of the change in prices over the period; i.e., the change assuming that the proportions of the different kinds of exports whose prices are to be measured were the same as their proportions in the given month. Another possible measure is given by assuming that the proportions of the different kinds of exports in the given month had been the same as their proportions in the corresponding month of the previous year. Accordingly the first step in the procedure is repeated, substituting the quantities exported during the corresponding month of the previous year.

The index-numbers so obtained have been proved over a period of years to lie very close together. As it is convenient for practical reasons to have one single figure rather than two close alternatives the two index-numbers are multiplied together and the square root of the product extracted. This is taken to be the index-number for the month, the prices of the corresponding month of the previous year being taken as base.

The index-numbers for two or more months of one year, as compared with the corresponding period of the previous year, are computed in very much the same way. The process involves merely the cumulative addition of the aggregates computed for the individual months, and extraction of the index-numbers as explained above.

Index numbers computed on this basis are shown in the following table for the years 1950-51 and 1951-52 :—

**MONTHLY EXPORT PRICE INDEX (CHANGING WEIGHTS) : AUSTRALIA.**

*(Base : Weighted Average Price Level in corresponding months of preceding year = 100.)*

June ..	114	119	95	84	114	178	106	66

Monthly export price index-numbers are issued in the mimeographed publication *Monthly Index of Australian Export Prices*, in the *Monthly Review of Business Statistics* and in the *Quarterly Summary of Australian Statistics*.

### § 14. External Trade of Australia and other Countries.

1. **Essentials of Comparisons.**—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in one may be declared by merchants, whereas in another they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial difference in the value of imports would rise from the different methods of converting the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total trade.

2. **"Special Trade" of Various Countries.**—In the following table the figures, which represent Australian currency values, relate as nearly as possible to imports entered for consumption in the various countries specified, and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The latest figures relating to foreign countries have been extracted from the publications of the United Nations and converted to Australian currency.

#### IMPORTS FOR HOME CONSUMPTION, AND EXPORTS OF DOMESTIC PRODUCTS (MERCHANDISE ONLY): VARIOUS COUNTRIES, 1951.

## § 16. Excise.

Although excise goods have no immediate bearing on oversea trade, the rates of excise duty are in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Trade and Customs, it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise Revenue are shown in Chapter XVII.—Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1947-48 to 1951-52 compared with the year 1938-39.

**QUANTITIES OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID : AUSTRALIA.**

## § 17. The Australian Balance of Payments.\*

1. **General.**—Information regarding the Australian balance of payments has always been of peculiar importance in view of the marked effect which fluctuations in world trade tend to exercise on the level of activity of the Australian economy.

Comprehensive estimates of Australia's balance of payments will be found in *The Australian Balance of Payments 1928-29 to 1949-50*, which contains a full explanation of the principles on which the estimates are based and the techniques employed in their compilation. Continuous investigations are being conducted with a view to improving the methods of estimation employed, and further revisions to current estimates may be necessary as more refined techniques are adopted in the future.

\* See Appendix to this volume for more recent figures.

2. *Australia's Balance of Payments on Current Account, 1949-50 to 1951-52.*—The table on page 218 shows estimates of Australia's balance of payments on current account from 1949-50 to 1951-52.

In the immediate post-war years the balance of payments on current account, after recording a deficit of £48.3 million in 1946-47, improved to a small favourable balance of £3.6 million in 1947-48 and this was increased to a favourable balance of £31.3 million in 1948-49, due mainly to a favourable trade balance of £106.6 million in that year. In 1949-50 Australia's favourable trade balance fell to £55.0 million; freight and insurance payable on imports and investment income payable overseas increased by £22.7 million and £12.2 million respectively and, after allowing for minor fluctuations in other invisibles, the net result was an unfavourable balance on current account of £44.9 million.

In 1950-51 the favourable trade balance rose to £233.4 million, the highest figure ever recorded. The main movement in invisible credits was an increase of £4.3 million in expenditure by oversea ships in Australian ports. On the debit side there were increases of £28.7 million, £11.7 million and £8.0 million respectively in freight and insurance payable on imports, investment income payable overseas and government expenditure overseas on services. The value of debits in respect of donations and reparations fell by £9.9 million, owing mainly to the gift of £10.0 million to the United Kingdom in 1949-50. As a result of these movements and minor fluctuations in other items, a favourable balance on current account of £101.1 million was achieved in 1950-51.

In 1951-52 Australia's unfavourable balance of payments on current account was £589.0 million—a deterioration of £690.1 million compared with 1950-51.

The unfavourable balance on current account in the first half of 1951-52 was £316.7 million and, after further deterioration in January and February, the Commonwealth Government re-introduced import licensing for imports from all sources early in March, 1952. At that stage, licences were already necessary for purchases from the Dollar Area, Japan and a few other non-sterling countries, but all outstanding licences for imports from those countries were recalled during March, and some licences were subsequently cancelled. By June, 1952 the level of imports had fallen to £55.7 million compared with the peak of £114.4 million in January, 1952.

The sharp adverse movement in Australia's balance of payments on current account between 1950-51 and 1951-52 can be accounted for almost entirely by the decrease in exports and the increase in imports (including freight and insurance charges).

The value of exports in 1951-52 fell by £310.6 million or nearly one-third, compared with 1950-51.

The value of imports f.o.b. increased by £309.6 million in 1951-52 to the record level of £1,051.5 million—almost double the total in 1949-50. Freight and insurance charges on imports amounted to £152.9 million, or £55.6 million more than in 1950-51, and these charges accounted for most of the increase in the invisible deficit from £132.3 million in 1950-51 to £202.2 million in 1951-52. Increases of £8.7 million in government expenditure overseas on services and £7.4 million in debits in respect of donations and reparations also contributed to the increased invisible deficit between 1950-51 and 1951-52.

The value of exports increased by £282.2 million between 1949-50 and 1950-51 and then decreased by £310.6 million between 1950-51 and 1951-52. Both movements were mainly the result of variations in the level of wool exports, the recorded value of which rose by £320.2 million between 1949-50 and 1950-51 and then fell by £309.0 million to a value of £323.4 million in 1951-52.

Exports of most other commodities experienced moderate increases in value between 1949-50 and 1951-52. Exports of butter, however, fell from £24.7 million in 1949-50 to £4.4 million in 1951-52 and exports of wheat and flour, after rising from £88.5 million in 1949-50 to £107.0 million in 1950-51, fell to £88.3 million in 1951-52.

The Commonwealth Statistician's Export Price Index (excluding gold) which stood at 399 (wool 473) in 1949-50 rose to 690 (wool 999) in 1950-51 and fell to 495 (wool 564) in 1951-52. These movements in the overall index correspond quite closely with movements in the value of exports, indicating that there was very little significant variation in the volume of exports during the period.

There was a steady increase in the value of invisible credits over the period 1949-50 to 1951-52. The value of these items, which was £80.1 million in 1949-50, increased to £89.1 million in 1950-51 and to £96.1 million in 1951-52. Almost all items of invisible credits were affected by these increases.

The value of Australia's imports f.o.b. increased by £203.8 million between 1949-50 and 1950-51 and by £309.6 million between 1950-51 and 1951-52. The increases affected most classes of imports. The Australian import price index prepared by the Commonwealth Bank showed much smaller increases during this period (8 per cent. in 1949-50, 21 per cent. in 1950-51 and 11 per cent. in 1951-52), and it is evident that an increased volume of imports was responsible for most of the rise in the value of imports between 1949-50 and 1951-52.

(a) Includes gold sold on the premium market valued at the price obtained.

Almost all invisible debits showed increases over the period 1949-50 to 1951-52. The largest increases were recorded in freight and insurance payable on imports, investment income payable overseas, and government transactions.

The value of freight and insurance payable on imports, which was £68.6 million in 1949-50, rose to £97.3 million in 1950-51 and increased further to £152.9 million in 1951-52. These increases were due in part to increases in the tonnage of oversea cargo discharged, but were attributable mainly to increases in the level of freight rates.

Investment income payable overseas rose from £54.5 million in 1949-50 to £69.1 million in 1951-52. The major element in this increase was the increase of Undistributed Income accruing to Oversea Parent Companies from £16.3 million in 1949-50 to a tentative total of £25.0 million in 1951-52.

The value of Government expenditure overseas on services (excluding public authority interest payments and some other items of expenditure included in Items 15 and 16 in the table on page 220) rose from £12.7 million in 1949-50 to £28.4 million in 1951-52.

3. Australia's Balance of Payments on Capital Account, 1949-50 to 1951-52.—The table on page 220 sets out estimates of Australia's balance of payments on capital account from 1949-50 to 1951-52.

The balance of payments on capital account records the net changes in Australia's international assets and liabilities in each year. Theoretically, the balance of payments on current account and the balance of payments on capital account together constitute a complete system of accounts, on the double-entry principle, recording Australia's international transactions in each year, and the favourable (unfavourable) balance on current account should coincide with the net increase (decrease) in assets shown in capital account.

In practice, because of various imperfections in the estimates, it is necessary to introduce a "Balancing Item" (see item 22, table on page 220) in the capital account in order to make that account balance at the same figure as the current account.

This "Balancing Item" consists of errors in estimating the balance on current account, errors in estimating the other items in capital account and various capital account transactions which cannot yet be accurately measured. This last group is considered to be the most important component of the "Balancing Item", and in recent years is believed to consist mainly of various types of private capital movements.

The individual items in the table may be conveniently examined in groups.

Items 6 and 17 record transactions on capital account between Australia and the Joint Organization (Wool). The assets item consists of the share of Joint Organization profits on the sale of Australian wool accruing to Australia each year (less any disbursements of profits to Australia) and the liabilities item is the change in Joint Organization investments in Australia each year.

Items 7 and 19 record the payment of the increased Australian currency equivalent of the subscriptions to the International Monetary Fund and the International Bank for Reconstruction and Development following the devaluation of the Australian pound in September, 1949. Item 18 shows Australia's liability in respect of \$20 million purchased from the International Monetary Fund in 1949-50 and drawings of \$9 million in 1950-51 and \$56 million in 1951-52 under the \$100 million loan from the International Bank.

Item 13 shows the repayments of public authority debt overseas from 1949-50 to 1951-52. These repayments were substantial in 1949-50 and 1950-51, but fell to a much lower level in 1951-52.

Australia's international reserves increased by £391.3 million during 1949-50 and 1950-51 (see items 10, 11 in table on page 220) to reach the record level of £843.0 million at 30th June, 1951. A sharp decline occurred in 1951-52 and at 30th June, 1952 the level of international reserves had fallen to £361.9 million.

The main reason for the increase in international reserves in 1949-50 and 1950-51 may be found in a group of items (items 3, 4, 16, 20 (a) (ii), 20 (b) (ii), 21 and 22 in the table on page 220) which may be conveniently grouped as "private capital movements and balancing items". As mentioned above, the "balancing item" is believed to consist predominantly of private capital movements which cannot yet be measured.

The transactions included in this group of items resulted in net inflows of funds of £229.2 million in 1949-50 and £83.7 million in 1950-51. In 1951-52 a further net inflow of £32.8 million in respect of these transactions was recorded, offsetting to some extent the fall in international reserves from other causes.

Items 3, 4, 20 (a) (ii), 20 (b) (ii) and 21 are based on the results of a *Survey of Companies with Oversea Affiliations* which has been conducted annually by the Commonwealth Statistician since 1947-48. Only preliminary results are available as yet for 1951-52, but from the information available at present it seems likely that the net capital inflow located by the Survey for the three years 1949-50 to 1951-52 will be about £150 million.

The remaining items in capital account are of minor importance only.

(a) Excludes movements due to revaluation of holdings following devaluation of the Australian pound in September, 1949 and to adjustments of an accounting nature during 1951-52 which were not related to balance of payments transactions. (b) Provisional estimates only.

NOTE.—Minus sign (—) denotes decrease.

4. Australia's Balance of Payments on Current Account—Various Countries and Monetary Areas, 1949-50 to 1951-52.—The overall improvement in Australia's balance of payments on current account between 1949-50 and 1950-51 was £146.0 million. The table below shows that this improvement was concentrated mainly in the balance of payments with the dollar area and with those countries which are members of the Organization for European Economic Co-operation. In addition, there was a less important improvement in the balance with "other" Other Non-sterling countries, but an increased deficit was recorded in the balance with the sterling area.

Between 1950-51 and 1951-52 there was a substantial deterioration in the balance of payments on current account and from the table below it will be seen that this adverse movement affected the balances on current account with all the countries and areas shown in the table.

Of the total deterioration in the current balance of £690.1 million between 1950-51 and 1951-52, £249.6 million was in respect of sterling area countries, £155.2 million in respect of dollar area countries, £190.2 million in respect of member countries of the Organization for European Economic Co-operation and £96.1 million in respect of "other" Other Non-sterling countries. However, there was an increase of £1.0 million in the value of current gold production between the two years.

5. *Australia's Balance of Payments with the Dollar Area, 1949-50 to 1951-52.*—The estimates of the balance of payments with the dollar area included in the previous table are on a purely geographic basis. The more detailed estimates shown in the table on page 223 include the trade statistics and invisible items included in the former table, but also included in "Other Items (net)" (see item 16 in the table on page 223) are several items which make allowance for the fact that not all Australian transactions with the dollar area involve dollar receipts or payments, and that some dollar receipts and payments are involved in Australian transactions with countries outside the dollar area and with international bodies.

Principal among these transactions are receipts of dollars for exports to non-dollar countries (e.g., sales of gold on premium markets); imports of dollar area origin for which payment in dollars is not required (these are included in item 2 and an offset is necessary); interest payments to sterling area holders of Australian dollar bonds (included in total dollar interest payments in item 13); dollar payments to international bodies; and the difference between the estimated dollar component of Australia's imports of petroleum products from all sources and the estimated c.i.f. value of her direct imports of petroleum products from the dollar area.

The statistics in the table are presented in United States dollars.

Australia's estimated net drawings from the Sterling Area Dollar Pool were only \$2 million in 1949-50 and in 1950-51 a net contribution of \$97 million was made to the Pool. In 1951-52, however, Australia's estimated net drawings from the Pool amounted to \$133 million.

The main reason for the sharp deterioration in the dollar balance of payments between 1950-51 and 1951-52 was the adverse movement in the balance of trade with the dollar area from \$205 million in 1950-51 to *minus* \$102 million in 1951-52. This adverse movement of \$307 million was offset to some extent by a small reduction in the negative invisible balance, increased receipts in 1951-52 under the \$100 million loan from the International Bank for Reconstruction and Development, and the halting in 1951-52 of the apparent net outflow of private capital which occurred in the previous year.

The value of exports to the United States and Canada decreased by \$178 million between 1950-51 and 1951-52. This decrease was mainly attributable to a decrease of \$182 million in the value of wool exports to those countries.

The value of imports from the United States of America and Canada rose from \$176 million f.o.b. in 1950-51 to \$298 million f.o.b. in 1951-52. Imports of goods purchased under the \$100 million loan from the International Bank for Reconstruction and Development increased from \$12 million in 1950-51 to \$35 million in 1951-52.

The negative invisible balance with the dollar area fell from *minus* \$96 million in 1950-51 to *minus* \$83 million in 1951-52. An increase of \$38.1 million in freight charges on imports was more than offset by an improvement of \$52.6 million in "Other Items (net)" (item 16). The composition of item 16 has been commented on above.

Private capital movements between Australia and the dollar area are included in "Investment Account" in the table (see items 21 and 22). After an apparent net private capital inflow of \$67 million in 1949-50, an outflow of \$54 million was recorded in 1950-51. In 1951-52 net private capital movements were nil.

The final section of the table shows how Australia's dollar surplus or deficit in each year was financed. After taking into account dollars received from international financial institutions, sales of gold to the United Kingdom and movements in Australia's dollar

balances, Australia's transactions with the Sterling Area Dollar Pool showed an estimated improvement of \$99 million between 1949-50 and 1950-51, followed, however, by an estimated deterioration of \$230 million between 1950-51 and 1951-52.

### § 18. Interstate Trade.

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (Section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the latest published statements were for the year 1909. Later, the Governments of Western Australia and Tasmania revived the records, and relevant statistics are available again for those States.

At the Conference of Statisticians held in January, 1928 it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

The Government Statist for South Australia publishes some figures for that State, made up from the records of Western Australia and Tasmania and from various other sources. Since February, 1940 statistics in some detail have been collected by the Government Statistician of Queensland. The statistics of interstate trade for New South Wales and Victoria are very meagre. The Melbourne Harbour Trust publishes, in its annual report, the quantities of various commodities of interstate trade loaded and discharged in the Port of Melbourne. The trade with individual States is not disclosed.

## CHAPTER VII.

## THE TERRITORIES OF AUSTRALIA.

NOTE.—The Territories under the control of Australia are : The Northern Territory ; the Australian Capital Territory ; Norfolk Island ; Papua (formerly British New Guinea) ; the Territory of New Guinea (under Trusteeship Agreement with the United Nations) ; Nauru (under Trusteeship Agreement with the United Nations) ; Heard and McDonald Islands and Macquarie Island ; the Australian Antarctic Territory ; and the Territory of Ashmore and Cartier Islands. Information on all except the Australian Antarctic Territory and Ashmore and Cartier Islands is contained in the following pages, and details of the acquisition of all the Territories will be found on pp. 5-7 of this issue.

## THE NORTHERN TERRITORY.

## § 1. Area and Population.

1. **Area.**—Upon the extension of New South Wales westward to the 129th meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles, or 335,116,800 acres—about six times as large as Victoria.

2. **Population.**—(i) *Population excluding Full-blood Aborigines.* The white population of the Northern Territory increased slowly from 670 at the Census of 1881 to 3,767 in 1918. By 1921 it had decreased to 2,459, and in 1933 was only 3,306. At the Census of 1947 it had risen to 9,116, an increase of 176 per cent. on the 1933 figures.

Although at one time there were more than 4,000 Chinese in the Territory, at 30th June, 1947 there were only 250, these comprising the major proportion of the 388 full-blood non-European population, excluding Australian aborigines, at that date.

The half-caste population recorded at the Census of 1947 numbered 1,364, of whom 1,247 were half-caste Australian aborigines. Corresponding figures at the 1933 Census were, respectively, 800 and 743.

The total population at the Census of 30th June, 1947, excluding full-blood aborigines, was 7,378 males and 3,490 females, 10,868 persons.

The estimated population at 31st December in each of the years 1939 and 1948 to 1952 is shown in the following table:—

## NORTHERN TERRITORY : ESTIMATED POPULATION (EXCLUDING FULL-BLOOD ABORIGINES).

Particulars.	At 31st December—					
	1939.	1948.	1949.	1950.	1951.	1952.
Males .. ..	5,136	8,065	8,728	9,520	9,507	9,642
Females .. ..	2,151	4,429	5,122	5,611	6,020	6,242
Persons .. ..	7,287	12,494	13,850	15,131	15,527	15,884

(ii) *The Aborigines.* The total number of full-blood aborigines at 30th June, 1952 was estimated at 12,314, of whom approximately 3,080 (2,475 males and 605 females) were in regular employment. Part-aborigines who are subject to the Aborigines Ordinance numbered about 2,000. There are sixteen "aboriginal" reserves, comprising an area of approximately 67,733 square miles. (See also Chapter IX.—Population.)

## § 2. Legislation and Administration.

On 1st January, 1911 the Territory was transferred by South Australia to the Commonwealth. The terms are outlined in Official Year Book No. 15, p. 940. For particulars of the administration up to the Northern Territory (Administration) Act 1931, when it was placed in the hands of an Administrator, residing at Darwin, see Official Year Book No. 38 and earlier issues.

The Northern Territory (Administration) Act 1947 enabled the Northern Territory to set up a Legislative Council. The Council consists of the Administrator and seven official and six elected members who make ordinances for the Territory, which must be submitted to the Administrator for assent. The Administrator may, or may not, assent to them, or he may reserve them for the Governor-General. The Governor-General may also disallow any ordinance assented to by the Administrator within six months from the date of assent, and the operation of ordinances relating to certain land or pecuniary transactions or to aboriginal affairs are dependent on his approval. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who was granted the right to take part in debates but not to vote, except on a motion for the disallowance of any ordinance of the Northern Territory or on any amendment of any such motion. However, the power of the Federal Parliament to disallow ordinances was repealed by the Northern Territory (Administration) Act 1947 referred to above.

## § 3. Physiography.

1. *Tropical Nature of the Country.*—The Territory is within the torrid zone, with the exception of a strip  $2\frac{1}{2}$  degrees wide which lies south of the Tropic of Capricorn.

2. *Contour and Physical Characteristics.*—The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

The principal features of the coast-line are enumerated in Official Year Book No. 1, p. 66; the rivers in No. 2, p. 76; the mountains in No. 3, p. 67; the lakes in No. 4, pp. 77, 78; the islands in No. 5, pp. 71, 72; and the mineral springs in No. 6, p. 65.

Inland, the country generally is destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

#### § 4. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions—the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Fuller particulars appear in Official Year Book No. 6, p. 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous) and frogs abound. There are many varieties of fresh-water fish and littoral mollusca. Butterflies and beetles are strongly represented. The white ant is a pest, anthills in the Territory sometimes attaining great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Native fauna are in some cases protected. Buffalo formerly existed in large herds, but their number has been greatly reduced by indiscriminate shooting. Buffalo shooting is now controlled.

3. **Flora.**—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. In the north, cypress pine, bloodwood and paperbark timbers are now cut and milled for local building purposes. These three timbers are resistant to termites. On the wide expanses of plain country in the interior there is little vegetation, the principal orders represented being:—*Euphorbiaceae*, *Compositae*, *Convolvulaceae*, *Rubiaceae*, *Godeniaceae*, *Leguminosae*, *Utricaceae*.

Fuller particulars regarding fauna and flora are given in Official Year Book No. 6, pp. 1116-7.

#### § 5. Production.

1. **Agriculture.**—Up to the present, agriculture has made little progress in the Territory, although it has been proved that rice, tobacco, coco-nuts, mangoes, bananas, cotton, various fodder plants, and peanuts can be successfully grown. Expense of harvesting is, at present, an obstacle to the economic production of rice, and until labour-saving machinery is procured it cannot be produced with profit. There is a large stretch of first-class coco-nut land on the coast, but hitherto planting has not been attempted on a commercial scale. For the encouragement of primary production a Primary Producers' Board was established in 1931. After the end of the 1939-45 War, returned servicemen and others began to grow, with some initial success, vegetables, fruit and other crops in the Darwin environs and as far south as Katherine. Vegetables grown were of consistently good quality and found ready local markets. In 1949 a group of Queensland farmers began an experiment in large-scale sorghum growing near Newcastle Waters, but the experiment has been unsuccessful in its early seasons.

During 1952 a Growers' Co-operative Market was established in Darwin, providing a regular supply of local fruit and vegetables. This venture is at present prospering. Bananas and beans in season have been supplied regularly to southern markets within the limits of aircraft backloading space. The 1952 peanut harvest was very profitable to most Daly River farmers but gave poor returns in the Katherine area. In June, 1952 field work began on Government experimental plots in the Darwin area and in January, 1953 an experimental base at Katherine was established. Pineapples, tobacco, rice, peanuts and grain sorghum are the main crops under trial. It has already been established that these crops can be grown successfully. The experiments aim at widening the soil range and investigating the possibilities of economic production.

2. **Pastoral Industry.**—The pastoral possibilities of certain parts of the Northern Territory were recognized at an early date, and in 1866 stock was brought into the Macdonnell Range country from South Australia. Six years later cattle were moved from Queensland to the northern parts of the Territory, and in 1879 Giles reached the Katherine River with 2,000 head of cattle and 12,000 sheep from South Australia. For various reasons sheep-raising did not succeed. The cattle industry, however, progressed steadily and development of stock routes and other plans for the expansion of the industry are continuing.

Cattle exported during 1951-52 numbered 84,108—40,459 to Queensland, 37,649 to South Australia, and 6,000 to Western Australia. Importations of live stock were :— bulls, 466; other cattle, 1,309; stallions, 10; other horses, 498; rams, 98; other sheep, 814; pigs, 30.

The estimated number of live stock in the Territory at the end of the years 1939 and 1947 to 1951 is given in the table hereunder :—

**NORTHERN TERRITORY : LIVE STOCK.**

31st December—	Horses.	Cattle.	Sheep.	Pigs.	Goats.	Camels.	Donkeys.	Mules.
1939 .. ..	32,721	922,581	38,587	483	20,335	331	1,443	366
1947 .. ..	32,318	991,429	19,058	680	15,260	193	1,232	632
1948 .. ..	33,197	1,052,811	25,791	384	14,045	173	1,192	609
1949 .. ..	32,904	1,048,875	25,725	419	12,102	165	935	466
1950 .. ..	29,366	1,019,149	28,888	1,122	12,329	94	918	603
1951 .. ..	32,519	1,057,906	30,935	794	10,520	98	1,180	603

3. **Hides and Skins.**—The number of hides and skins exported from the Northern Territory during 1951-52 was as follows :—buffalo, 13,333; sheep, 776; crocodile, 4,224; goat, 25; snake, 24; and horse, 218. In addition, a considerable number of kangaroo skins were exported, but details are not available.

4. **Mining.**—Alluvial gold digging in the Northern Territory commenced in 1869 and in 1881 maximum production was achieved when the yearly return was valued at £111,945. All of this production was confined to the northern part of the Territory. At present, Tennant Creek is the principal producer of gold. Three batteries are operated by companies. The Government-owned battery closed down at the end of 1951. This area is noted for its rich patches of ore. The Harts Range Mica Field continues to produce the bulk of the Australian high grade mica. Wolfram mining has increased since considerable rises in the price of wolfram concentrates occurred during late 1950 and early 1951. A Government-owned treatment plant is in operation at Hatches Creek. Tin concentrates were produced from the Maranboy Field, where a Government-owned battery is in operation.

The following table shows the value of mineral production for the years 1947 to 1951 compared with 1939 :—

**NORTHERN TERRITORY : MINERAL PRODUCTION.**

( £ )

Year.	Gold.	Tin Concentrates.	Ochre.	Copper Ore.	Mica.	Wolfram.	Tantalite.	Silver-lead.	Total Value all Minerals.
1939 .. ..	163,414	4,487	607	2,248	15,539	58,183	..	..	244,478
1947 .. ..	118,563	4,698	2,504	..	62,547	41,020	45	..	229,437
1948 .. ..	163,482	12,055	2,374	7,370	75,796	30,780	814	1,407	294,078
1949 .. ..	369,027	10,138	501	145,839	52,014	20,321	240	973	599,253
1950 .. ..	543,121	15,139	4,199	56,741	61,813	25,647	520	883	708,063
1951 .. ..	603,313	22,446	797	44,409	59,084	257,164	260	..	987,473

5. **Pearl and Other Fisheries.**—In 1884, mother-of-pearl-shell was discovered in the harbour of Port Darwin. Since that time the areas fished have extended to the various banks to seaward and coastwise along the Northern Territory coast. Production of shell has varied considerably, year by year, since the war, but since 1950 has shown a decided increase :—1948—49 tons, value, £19,400; 1949—40 tons, value, £18,000; 1950—40 tons, value, £20,000; 1951—86 tons, value, £60,200; 1952—116 tons, value, £63,800.

The 1953 season will be fished by eleven vessels against eight for 1952. The price of shell still remains high, £700 a ton for good grade shell being the average for 1952.

Darwin continues to provide a firm and ready market for fish, but supplies are somewhat irregular.

## § 6. Land Tenure.

1. **General.**—A description of the system of land tenure in force in the Territory in 1928 given in Chapter V.—Land Tenure and Settlement, Official Year Book No. 22 was revised in this section of the previous Year Book, pp. 329–30, and Chapter IV.—Land Tenure and Settlement of this issue contains statistical information on the subject.

Almost half the land in the Northern Territory is reserved, or unoccupied and unreserved, the remainder, apart from a very small proportion alienated, being held under various forms of lease and licence, which are described briefly below and in more detail in Official Year Book No. 39, pages 329–30.

2. **Pastoral, Agricultural, etc., Leases.**—*Pastoral Leases*—granted for periods not exceeding 42 years.

*Agricultural Leases*—granted in perpetuity, with area for any one lease limited according to type of farm (Cultivation Farms, Class 1, 1,280 acres, Class 2, 2,560 acres; Mixed Farming and Grazing, Class 1, 12,800 acres, Class 2, 38,400 acres).

*Leases of Town Lands*—except in Darwin, granted in perpetuity (in Darwin granted for periods up to 99 years).

*Miscellaneous Leases*—granted for any prescribed or approved purpose, for periods not exceeding 21 years.

*Grazing Licences*—granted to graze stock on Crown lands for periods not exceeding one year.

*Occupation Licences*—granted for manufacturing, industrial or any prescribed purposes, for periods not exceeding 5 years.

*Miscellaneous Licences*—granted for periods not exceeding 12 months.

*Leases to Aborigines*—granted for areas not exceeding 160 acres each for any period of years upon such terms and conditions as thought fit.

The foregoing leases and licences are granted at specified rentals or rentals fixed by the Administrator and subject to re-appraisal, and under various prescribed or specified conditions.

3. **Mining Leases, etc.**—*Holdings under Miners' Rights*—entitling holder, for a fee of 5s. for 12 months from date of issue, to occupy Crown lands for mining and to carry out works thereon.

*Gold-mining Leases*—granted for a period of 21 years, renewable for a further 21 years, for areas not exceeding 20 acres each, at an annual rent of 2s. per acre and with payment of a royalty of 3d. in the £1.

*Mineral Leases*—granted in blocks not exceeding 40 acres each, at an annual rent of 1s. per acre, with term and renewal and royalty as for gold-mining leases (payment of royalty temporarily suspended).

*Dredging Claims*—granted for gold or minerals claims, the area not exceeding 300 acres each, at an annual rent of 2s. per acre.

*Mineral Oil and Coal Licences*—granted to search for mineral oil and/or coal over an area not exceeding 1,000 square miles for a period of 5 years, at an annual fee of £10, with preferential rights to lease if payable quantities are discovered and a reward area also in respect of oil.

*Mineral Oil and Coal Leases*—granted for a period of 21 years, renewable for a further 21 years, for mining areas not exceeding 160 acres each for mineral oil and 640 acres for coal, at an annual rent of 1s. per acre, and royalty of 5 per cent. for oil and fixed by regulation in the case of coal.

*Business and Residence Areas*—granted at the prescribed fee, authorizing the holder to occupy on a gold or mineral field an area not exceeding one acre for residence and carrying on business (one-quarter of an acre if for residence only).

*Garden Areas*—granted under prescribed conditions, on a gold or mineral field for growing fruit or other garden produce, the area of each garden not exceeding 5 acres.

There are various conditions regarding working, employment and value of machinery used, which apply to the foregoing leases and licences.

### § 7. Trade, Transport and Communication.

1. **Trade.**—No record is kept of the trade between the States and the Territory. Direct oversea imports amounted to £34,000 in 1938-39. In the post-war years 1945-46 to 1948-49 they averaged about £200,000 a year, but in the three years 1949-50 to 1951-52 they have averaged about £700,000 a year. Direct oversea exports amounted to £13,000 in 1938-39 and are still relatively small—£35,000 in 1951-52.

2. **Shipping.**—The Territory is dependent for its shipping facilities on a visit every two months by a ship of the Australian Shipping Board from the eastern States and a monthly service from Western Australia by ships of the Western Australian State Shipping Service. An oversea tanker visits Darwin quarterly with supplies of aircraft fuel and other petroleum products. During the post-war years up to 1951-52 oversea and interstate shipping averaged about 30 entrances and 50,000 net tons a year. Figures for pre-war years were between two and three times greater.

3. **Air Services.**—Darwin, a first class international airport, is the first port of arrival in Australia for virtually all aircraft from Europe and Asia. Qantas Empire Airways Ltd. (under contract to the Commonwealth Government) operates, through Darwin, a Sydney-Singapore-London passenger and freight service; a Sydney-Hong Kong-Japan service; and a Sydney-Manila-Japan service. British Overseas Airways Corporation operates a London-Singapore-Sydney service, and Australian National Airways, in conjunction with Air-Ceylon, operates a service to London. Both these services call at Darwin. Regular inland services calling at Darwin are Trans-Australia Airlines (Adelaide-Darwin and Brisbane-Darwin), MacRobertson-Miller Aviation, which runs regular services between Darwin and Perth, and Darwin and Wyndham, and Connellan Airways, which operates services between Alice Springs, Wyndham, Borroloola, Katherine and the Queensland border. From Darwin the Aerial Medical Service operates two aircraft and the North Australian Airways local charter flights. An aero club with headquarters at the airport also operates.

4. **Railways.**—Under the agreement made between the Commonwealth and the State of South Australia for the transfer of the Northern Territory, which was ratified by the Northern Territory Acceptance Act 1910, the Commonwealth was to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin via Port Augusta).

The northern line from Adelaide terminates at Alice Springs, about 192 miles north of the southern boundary of the Territory. The Commonwealth Government acquired, on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta (478 miles), and on 1st January, 1926 the control thereof was transferred to the Commonwealth Railways Commissioner. The extension to Alice Springs (293 miles) was opened for traffic in 1929. The line from Darwin to Pine Creek, about 146 miles, was extended to Katherine River (200 miles from Darwin) in 1917, and as far as Birdum (316 miles from Darwin) in 1929.

The Clapp plan for the standardization of Australian railways recommended, *inter alia*, the construction of a standard gauge (4 ft. 8½ in.) strategic and developmental railway between Dajarra (Queensland) and Birdum, and the conversion to standard gauge of the Birdum-Darwin line, but not the conversion of the Port Augusta-Alice Springs line nor the construction of a 4 ft. 8½ in. line between Alice Springs and Birdum. Provision for both of the last two projects, however, was included in an agreement with South Australia enacted in 1949.

It was agreed by the Governments of the Commonwealth and South Australia in 1950 that a standard gauge railway from Stirling North to Leigh Creek coalfields (157 miles) should be constructed. This is now under construction and is regarded as the first step in the ultimate provision of a standard gauge railway between Port Augusta and Alice Springs.

5. **Roads.**—During the war, roads were built connecting Alice Springs with Darwin, and Mount Isa (Queensland) with Tennant Creek. The first of these roads, known as the North-South Road or Stuart Highway, is 954 miles long, and runs via Larrimah and Tennant Creek. The Mount Isa-Tennant Creek Road (Barkly Highway) is 403 miles long. Both were used extensively during the war, the Stuart Highway, in particular, experiencing very heavy and continuous traffic. Since the war, the Stuart Highway has been used continually as a means of transporting foodstuffs and other supplies to Darwin and northern centres, and is now the main route for overland tourists and travellers from the southern States to Darwin. Both roads have good water bores and communications.

6. **Posts, Telegraphs, Telephones and Wireless.**—Postal communication is maintained by road and rail transport between Darwin and the capital cities of Australia. In addition, the vessels belonging to the Western Australian State Shipping Service give a regular service between Fremantle and Darwin. Mail is also carried between the capital cities of Australia and Darwin by the airway companies operating in each State. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

The transcontinental telegraph line, covering a length of 2,230 miles, runs in a northerly direction from Adelaide to Darwin, and provides telegraphic communication between Darwin and other parts of the world.

Long-distance telephone communication is established between Darwin and the other capital cities of Australia, and oversea telephone communication through Sydney is also available.

Regional national broadcasting stations are situated at Darwin and Alice Springs. The majority of homesteads on pastoral leases are equipped with pedal wireless sets operated under licence from the Postmaster-General's Department. These stations are in daily communication with Flying Doctor Bases situated at Alice Springs (Northern Territory), Wyndham (Western Australia) and Cloncurry (Queensland), and are used for transmission of radio-telegrams and other communications.

## § 8. Education.

1. **General.**—The South Australian Education Department provides teachers and determines the curriculum for all schools in the Northern Territory with the exception of pre-school kindergartens and schools for full-blood aboriginal children. An officer of the South Australian Education Department is on loan to the Northern Territory Administration. This officer, designated the Assistant Supervisor of Education, Northern Territory Schools, works in close co-operation with the Administration.

The number of teachers at 30th June, 1952 in schools catering for white and part-aboriginal children was 42, all officers of the South Australian Education Department.

The number of pupils under instruction in departmental schools on 30th June, 1952 was 1,250, of whom 1,118 were in the primary section, while the number of children in convent schools at 30th June, 1952 was 381, including 23 post-primary pupils.

Facilities have been provided in schools at Alice Springs and Darwin for instruction to Leaving (Matriculation) standard in general and commercial courses. Students sit for the examinations (Intermediate and Leaving) of the Public Examination Board, University of Adelaide. Six exhibitions are offered annually on the results of the Intermediate examinations. These exhibitions carry a subsistence allowance of £50 a year, £5 for books, and return fares between home and school once a year, and are tenable for two years at any approved secondary school in Australia.

New schools are under construction at Darwin and Alice Springs. The school in Darwin has been planned on tropical lines and will cater for 330 primary children. The total enrolment in the Darwin school on 30th June, 1952, was 640, including 90 secondary students. Consideration is being given to building a separate technical high school in Darwin, and a site has been set aside in the town plan for this purpose. Because of the scattered nature of Darwin, transport is provided for school children and more than 500 children are conveyed to school every day in government buses. At Alice Springs, 120 children are conveyed to and from school each day.

Alice Springs has established itself as the educational centre for a large part of the Northern Territory. One hundred and sixty children from outback areas are accommodated at hostels provided by Methodist, Church of England and Roman Catholic organizations. A boarding allowance of £40 a year for each child is paid by the Commonwealth Government to assist parents to keep their children at school, and the Government also makes a contribution towards children's return fares between home and school each term.

The construction of the new school at Alice Springs was commenced in August, 1952, and it is expected that the building will be ready for occupation by February, 1954.

The secondary block in this school will have practical rooms, including woodwork, sheet metalwork, domestic arts and a science laboratory. A fine library will also be provided.

For the year ended 30th June, 1952, 103 primary and 6 secondary pupils received instruction from the Correspondence School of South Australia.

A pre-school kindergarten is functioning at Alice Springs, and there are three centres in Darwin. Each kindergarten is paid a government subsidy of £350 per annum.

2. **School of the Air.**—The "School of the Air" was officially opened by the Administrator on 8th June, 1951. The school has an enrolment of 53 pupils, some of whom live 400 miles from Alice Springs. Five half-hour lessons are given each week from the studio in the Alice Springs school. A unique feature of this service is that children are able to converse with their teacher.

The programme of lessons includes stories and songs for the younger children; number, spelling and language lessons; health talks; appreciation of music and literature; social studies and a "Question and Answer" session.

3. **Native Education.**—At 30th June, 1952, there were 18 special schools for full-blood aboriginal children. These consisted of six Government schools, eleven mission schools and one private school. Eleven hundred and fifty children, or approximately one half of children of school age, were enrolled at these schools, and of this number about 70 per cent. attended the non-governmental schools.

The Commonwealth Government opened special schools at Bagot and Delissaville (near Darwin), Phillip Creek, Areyonga, Yuendumu and Alice Springs. Nine teachers were employed. The staff, curriculum and supervision of these schools are under the control of the Commonwealth Office of Education. The office has a Senior Education Officer in the Northern Territory who works in close association with the Native Affairs Branch as, at this stage, the education of full-bloods is linked more closely with the overall native welfare programme than with the normal school service.

In addition to child endowment the Commonwealth makes other direct payments to assist missions with their educational work. The advisory services of the Commonwealth Office of Education are now available to missions, and readers and other teaching aids produced especially for native children will be supplied to mission schools.

4. **Theoretical Training of Apprentices.**—The recognition that technical school training is an extension of workshop training has led to the introduction of day-time classes which apprentices attend without loss of pay. Apprentices are directed by the Apprentices Board to undertake correspondence courses conducted by the Technical Correspondence School of the South Australian Education Department and the Sydney Technical School, these courses covering the work prescribed for the various trades in South Australia and New South Wales.

### § 9. Finance.

Details of revenue and expenditure of the Territory for the year 1951-52 are shown below :—

#### NORTHERN TERRITORY : REVENUE AND EXPENDITURE, 1951-52.

(a) Includes railways operating in the Northern Territory, included with "Other".

(b) Excludes electricity supply,

### AUSTRALIAN CAPITAL TERRITORY.

1. **Introductory.**—Information regarding the selection and establishment of Canberra as the Australian capital city, the physiography of the Territory and its early history will be found in previous issues of the Official Year Book—See List of Special Articles, etc., at the end of this volume under Canberra and Federal Capital City.

On 12th March, 1913 the official ceremony to mark the initiation of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony the selection of "Canberra" as the name of the capital city was announced.

On 9th May, 1927 Parliament House at Canberra was officially opened by His Royal Highness Albert, Duke of York—afterwards His Majesty King George VI.—the occasion being the 26th anniversary of the opening of the first Parliament of the Commonwealth at Melbourne by His Royal Highness George, Duke of Cornwall and York—afterwards His Majesty King George V.—on 9th May, 1901. (For particulars of the opening ceremony see Official Year Book No. 21, p. 604.)

The development of the Territory administration prior to the taking over of control by the Federal Capital Commission on 1st January, 1925 is described in summarized form in Official Year Book No. 18, and in Official Year Book No. 22 a summary is given of the administrative activities of the Federal Capital Commission. The administration of the Territory by this authority was continued until 30th April, 1930, when the Seat of Government (Administration) Act 1924-1929 was repealed, and the powers and functions of the Commission reverted to the Government.

Since April, 1932 the general control of the Territory has been exercised by the Minister for the Interior, certain specific services, however, being undertaken by the Department of Health, the Department of Works and Housing (title changed in 1952 to Department of Works), and the Attorney-General's Department.

An amendment to the Seat of Government Acceptance Act in 1938 provides that the Territory shall be known as the Australian Capital Territory.

2. **Progress of Work.**—(i) *General.* Since the resumption of general development in Canberra after interruption by the war when defence works only were carried out, the succeeding works programmes have been designed to overtake the lag and keep abreast of the current requirements, the demands of which have been abnormally enlarged by the expansion in Government business generally and the continuous implementation of the policy of gradual centralization of departmental head offices in the national capital. To accommodate the influx of personnel, expediency has necessitated erecting temporary houses, guest houses and offices while permanent buildings are being built.

During 1951–52 the total cost of the works programme amounted to approximately £5,625,000. Throughout this period a continual increase was experienced in costs of building operations caused by rising wages and costs of materials, and this was followed by curtailment of Canberra's works programme. A change in methods of contracting has eventuated, costs plus fixed fee contracts giving place to lump sum contracts.

The average combined labour forces of the Department of Works and contractors working for the Department during 1951–52 numbered 2,888 men.

(ii) *Works Programme.* (a) *Housing.* During 1951–52, 635 dwelling units were completed (532 built by contract and 103 by day labour), including 113 brick, 100 brick flats, 136 timber, and 281 prefabricated (203 Riley Newsum, 57 Monocrete, 21 Econo-Steel). Of the total units, 181 and 46, respectively, were built in the newly developed suburbs of O'Connor and Narrabundah, 150 in the longer established but recently extended suburbs of Ainslie (85) and Yarralumla (65), 50 each in the suburbs of Reid and Turner adjacent to Civic Centre, and the bulk of the remainder in the outlying suburbs of Harman (50), the R.A.N. station area, Duntroon (32), the Royal Military College area, and Fairbairn (23), the R.A.A.F. Station area. Four hundred and seventy-eight were built for the Department of the Interior, 119 for the Defence Forces, 19 for War Service Homes, 17 for the Australian National University and 2 for the Department of Works. At 30th June, 1952 there were 825 houses under construction in various projects.

(b) *Other Building.* Amongst major architectural projects completed during 1951–52 was a high tension laboratory for the Research School of Physical Sciences of the Australian National University. Major projects under construction for this institution included University House, a building designed to provide living quarters for staff and students, a workshop for medical research, a temporary library building and a permanent stores building. The Research School of Physical Sciences was nearing completion at the end of the year, and progress was made on the central Administrative Block for C.S.I.R.O. Foundations were laid for an annexe for the Australian National Library designed to provide further storage space for archives and records.

At 30th June, 1952 an infants' school at Narrabundah, commenced during November, 1951, was almost complete, and in February, 1952 work was begun at Turner on an infants' school which will have prefabricated aluminium classrooms.

Further progress was made on the permanent Administrative Building, where the basement and sub-basement of the whole building and about a third of "A" block had been completed at 30th June, 1952. During the year it was decided that work should be concentrated on completing "A" block and that work on "B" and "C" blocks would be temporarily suspended.

Extensions and additions to various hostels and to accommodation at the R.A.A.F. Station, Fairbairn, were carried out during 1951–52.

(c) *Engineering Works and Services.* During 1951-52, 15½ miles of subdivisional roads were constructed to serve newly built areas, bringing the length of city roads at 30th June, 1952 to 161 miles, comprising 3 miles of concrete, 83 miles bitumen paved and 75 miles of gravel. At the same date the length of city footpaths was 96 miles. Road maintenance work during 1951-52 included the resealing of country roads and of the taxiways and runways at the R.A.A.F. aerodrome, Fairbairn.

During 1951-52, 72,500 feet of water mains were laid to reticulate water services to new houses. At 30th June, 1952, 5,541 houses and buildings had been connected to the water supply system. The consumption rate for 1951-52 was 1,692 million gallons with an average daily consumption of about 4½ million gallons.

During the same period 72,000 feet of sewer mains were laid to connect newly built houses to the sewerage system and 5,260 houses and buildings had been connected to the sewerage system by 30th June, 1952.

Extensions to electricity low tension supply lines to service newly built houses in various areas were completed. Other electrical work included installations to the Research School of Physical Sciences, the conversion of sections of the city system to carry 11,000 volts, and extensiors connecting rural properties to the city power supply.

The maximum electricity demand at 30th June, 1952 was 10,650 kVA., 2,175 kVA. greater than at 30th June, 1951.

3. *Forestry.*—A considerable amount of reforestation work has been undertaken and plantations (mainly *Pinus radiata*) have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have been established in the Brindabella mountains and soil conservation areas at various locations throughout the Territory.

The total area of softwood plantations at 30th June, 1952 was 15,000 acres, of which 13,000 acres were *Pinus radiata*, the balance consisting of other softwood species, chiefly *Pinus ponderosa* and *Pinus laricio*.

Forestry operations were begun on Mount Stromlo in 1915. Plantings up to 1925 were chiefly on aesthetic lines, but since then a much wider programme has been undertaken. Sawmill timber is now being obtained from the logs resulting from thinning operations and clear felling of mature plantations. The yearly output of sawmill logs has increased from 30,000 super. feet of softwood in 1930-31 to 13,200,000 super. feet log measure during 1951-52. This was made up of 8,900,000 super. feet from clear felling of mature pines and 4,300,000 super. feet from thinning operations on mature stands. Of the total production, 8,400,000 super. feet consisted of saw log timber, the balance of 4,800,000 super. feet consisting of case-making material. This was a record output, which was brought about partly by the necessity to convert fire-killed timber at Mount Stromlo, where about 600 acres were burnt by bush fires in February, 1952.

In 1926 a comprehensive review was undertaken of the Territory's potentialities for forest development. A system of forest management was instituted in the existing forest area, and a considerable amount of survey and assessment work has been completed, resulting in the extension of operations, including fire protection, to 100,000 acres of hardwood forests in the Cotter Catchment Area. Hardwood timber produced during the year ended June, 1952 amounted to 3,100,000 super. feet log measure (6,600,000 super. feet in 1950-51), all of which was used in building operations in Canberra.

4. *Lands.*—(i) *General.* Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Australian Capital Territory and to the area of alienated and leased land and Chapter IV.—Land Tenure and Settlement of this issue contains statistical information on the subject.

Under the Seat of Government (Administration) Act 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act. Leases of land in the City Area are granted under the City Area Leases Ordinance 1936-1951, and leases of other lands under the Leases Ordinance 1918-1937. Land is also leased for various purposes in the City Area under the Church Lands Leases Ordinance 1924-1932 and the Leases (Special Purposes) Ordinance 1925-1943, and one lease under the Church of England Lands Ordinance 1926 has been granted for church purposes.

As considerable portions of the Territory lands are not required in connexion with the establishment of the city, large areas have been leased under special improvement conditions in regard to the extermination of noxious weeds and the destruction of rabbits and other pests. The lands are classified into three grades of agricultural and three grades of grazing land. Leases may be granted for grazing, fruitgrowing, horticulture, agriculture, residential, business, or other purposes for a period not exceeding 25 years. The annual rental is 4 per cent. of the assessed value of the land, including improvements which are the property of the Crown, plus the amount of rates payable. No person may hold under lease land of a greater value than £10,000, exclusive of the value of buildings and fences thereon.

Under the City Area Leases Ordinance 1936-1951 the Government may grant leases in the city area of any Crown land for business or residential purposes. Such leases may be issued for a period not exceeding 99 years at a rental equal to 5 per cent. of the unimproved value of the land, which value is subject to re-appraisal at the expiration of 20 years, and thereafter every 20 years. A suitable building must be commenced within 6 months and completed within 12 months unless an extension of time is allowed.

(ii) *Jervis Bay Territory.* The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital. The Royal Australian Naval College was established in this area on a site known as Captain's Point, but was removed in 1930 to Flinders Naval Base, Victoria. Leases have been granted over an area of about 13,000 acres in the Jervis Bay Territory.

5. **Transport and Communication.**—Canberra is connected with the railway system of New South Wales at Queanbeyan by a line  $4\frac{3}{4}$  miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. The railway terminus is situated in the suburb of Kingston. A daily passenger service operates each way between Canberra and Sydney and Canberra and Melbourne.

Two airline operators provide several services daily each way on the Sydney-Canberra-Melbourne route.

Regular motor-coach services link Canberra with towns in New South Wales, Victoria and South Australia.

There are three radio broadcasting stations in the Australian Capital Territory, 2CY and 2CN of the national broadcasting system and 2CA, a commercial station.

6. **Population.**—From 1911 until 1921 the population of the Australian Capital Territory remained at about 2,000 persons. In 1922 it commenced to rise, and by 1927 was nearing 6,000. The following year, with the transfer of departments from Melbourne, it passed 8,000. Since then the general trend has been upward, if, until recently, only gradually.

The census return of population on 30th June, 1938, was 11,290 in the Australian Capital Territory and 272 in the Jervis Bay Territory, or a total of 11,562 persons. The population at the Census of 30th June, 1947, was 16,905 persons—15,156 in the city area, 1,389 in the rural districts and 360 in the Jervis Bay area. A census was taken of the

city area on 14th–16th September, 1951, the population then being 23,617 persons. At that time the estimated population of the Australian Capital Territory was 25,400 persons. The estimated population of the Territory at 31st December, 1952 was 28,481 persons, and of Canberra, 26,732 persons.

7. **Production.**—During 1951–52 the production of the more important items of the agricultural and pastoral industry was—Wheat, 14,556 bushels; wool, 1,765,000 lb.; whole milk, 720,000 gallons; butter, 5 tons; meat (bone-in weight, fresh), 3,104 tons. The numbers of live stock depastured at 31st March, 1952, were—Horses, 923; cattle, 10,293; sheep, 243,959; and pigs, 249.

8. **Education.**—Arrangements exist with the New South Wales Education Department for the administration of education up to and including the secondary level in the Territory, the expenditure involved being refunded to the State.

There are ten public schools in the Australian Capital Territory. The largest is situated at Telopea Park, Barton, with accommodation for 1,200 scholars. Secondary education is provided at the Canberra High School, Acton, and the Telopea Park Central School has a secondary department. The High School has accommodation for 450 scholars, and its curriculum provides a standard of education comparable in range of subjects with that provided at the Government High Schools in New South Wales. The High School also provides for commercial and junior technical classes, and has an evening continuation college attached, with commercial, matriculation and other classes.

In addition, there are four private schools in the Territory. These are the Canberra Grammar School, the Canberra Church of England Girls' Grammar School, St. Christopher's Convent School and St. Patrick's Convent School. St. Patrick's School provides infants' and primary education, while the other three provide infants', primary and secondary education.

The Australian Capital Territory Education Ordinance 1937–1952 provides for bursaries, registration of private schools and compulsory attendance. Four bursaries were awarded in 1952.

During 1952 classes in English for new comers to the country were conducted to assist in their assimilation into the local community.

The Canberra Technical College at Kingston, which is controlled and staffed in a manner similar to that of the public schools, is provided with modern equipment for supplementary courses for apprentices and journeymen desirous of improving their trade qualifications. In addition, tuition is also given in a wide range of professional and vocational courses for students of building, surveying, accountancy and commercial subjects, engineering and printing. Special facilities have been established for recreational as well as instructional purposes in the fields of art, pottery, women's handicrafts, woodwork and the like. Provision is also made for the training of ex-service personnel under the Commonwealth Reconstruction Training Scheme.

The Canberra Nursery School, Acton, established in 1944, provides pre-school education for children between the ages of 3 and 5 years. It is staffed and supervised by teachers of the New South Wales Department of Education.

Nine neighbourhood pre-school centres, together with a mobile unit, provide modified nursery school facilities for children between the ages of 3 and 5 years. Additional centres of this type are being established.

An area of about 250 acres has been set aside at Acton at the foot of Black Mountain, a short distance from the City, for the Australian National University. Provision has been made for the University to establish such research schools as may be thought desirable, including a School of Medical Research, and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. Further reference to this University appears in § 8 of Chapter XI.—Education.

9. Finance.—Details of revenue and expenditure for the year 1951-52 are given in the following table :—

AUSTRALIAN CAPITAL TERRITORY : REVENUE AND EXPENDITURE, 1951-52.

(£.)

(a) Includes Commonwealth Railways operating in the Australian Capital Territory.

The following table, which was prepared by the Department of the Interior, shows the total receipts and expenditure of the Australian Capital Territory from 1901-2 to 30th June, 1952 :—

**AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE TO 30th JUNE, 1952.**

Receipts.	£	Expenditure.	£
Commonwealth Treasury—		Lands .. .. .	919,802
Parliamentary Appropriations—		Engineering works .. .. .	8,103,236
Revenue .. .. .	21,603,738	Architectural works .. .. .	10,731,097
Loan .. .. .	5,725,508	Other capital expenditure, sundry debtors, etc. .. .. .	2,252,904
			22,007,039
		Seat of Government Establishment Account, being maintenance and administration less revenue; expenditure of a capital nature for which assets no longer exist; profit and loss accounts of trading activities, etc. .. .. .	45,322,207
<b>Total Receipts .. .. .</b>	<b>27,329,246</b>	<b>Net Expenditure .. .. .</b>	<b>27,329,246</b>

(a) Excludes interest £5,474,683 net.

The foregoing figures exclude part cost of national buildings (Parliament House, the secretariats, etc.), federal highways within the Territory, the Queenbeyan-Canberra Railway, the housing loan, etc., and loans for housing.

## NORFOLK ISLAND.

1. *Area, Location, etc.*—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude  $29^{\circ} 03' 30''$  South, longitude  $167^{\circ} 57' 05''$  East. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney it is distant 930 miles, and from Auckland, 630 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side and the landing place at Cascade on the northern side, almost inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between  $49^{\circ}$  and  $85^{\circ}$  F. with a mean of  $68^{\circ}$  F. The average annual rainfall is 53 inches. It has been said that the salubrious climate, coupled with the beauty of its landscapes and seascapes, should render Norfolk Island "the Madeira of the Pacific". The island, both pre-war and post-war, has been visited annually by a number of tourists. Pre-war the only means of transport to the island was by ship. However, with the inauguration of direct air services from Australia and New Zealand the majority of tourists now take advantage of these services. The tourist traffic is rapidly increasing.

2. *Settlement and Population.*—The first colonization, in 1788, was by Lieutenant King, who in H.M.S. *Supply* established a small penal station as a branch settlement of that at Port Jackson. The settlement was abandoned in 1813, and for 13 years thereafter its chief use was a whaling station and place of call for British warships.

From 1826 to 1855 it was again made a penal station. In 1844 it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed thence to Norfolk Island in 1856. The new community numbering 94 males and 100 females were the descendants of British sailors and Tahitian women. The last of those transferred died at Norfolk Island on 1st March, 1943. The population of the island as disclosed by the Census of 30th June, 1947, was 938, consisting of 505 males and 433 females. The population at 30th June, 1952 was 1,176.

3. *Administration.*—In 1856 the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896 it was made a dependency under the Governor of that Colony, and finally by the passage of the Norfolk Island Act 1913 it was accepted by the Federal Parliament as a territory of Australia. From July, 1914 until 1st January, 1929, Norfolk Island was administered by the Department of Home and Territories, and then, until 25th June, 1941, by the Territories Branch of the Prime Minister's Department, but is now administered by the Minister for Territories through an Administrator. An amending measure, the Norfolk Island Act 1935, provided for the establishment of an Advisory Council of eight elected members to advise the Administrator.

4. *Economic Activity.*—The major economic activities of the island are primary production, tourism and employment in Government instrumentalities.

(i) *Primary Industries.* The soil on the island is particularly fertile, the climate equable, and the rainfall fairly evenly distributed except for a pronounced dry period in November. This enables a wide range of temperate and semi-tropical products to be cultivated. However, the island's comparative isolation and trading difficulties with New Zealand has hampered production in the past. Recent negotiations with New Zealand, however, have led to a relaxation of some restrictions and should enable the island to air freight out-of-season produce to Auckland.

Pre-war the principal primary product was passion fruit pulp. However, the introduction of disease together with the high cost of trellising and land reclamation has led to the curtailment of this industry. The production of bean seed has now become the main industry. The island's isolation from many plant diseases found on the mainland, plus the fairly reliable dry period (which is conducive to the setting and maturing of seed), together with recent high prices, have induced a rapid expansion of production. In 1951-52, 2,013 bushels were exported and prices ranged from £8 to £9 per bushel. These conditions also favour the production of other types of seed. Lord Howe Island Palm, Wild Lemon and Norfolk Island Pine seeds are the most important.

Island conditions are also conducive to good pasture growth but for a number of reasons meat production is insufficient to satisfy the demands of both the tourists and the local inhabitants. However, as a joint product to pastoral pursuits appreciable quantities of hides and wool are exported.

Fish and (in certain months) whales abound off the island. In the past a number of ventures have been formed to exploit these resources. They have been short-lived owing, for the most part, to the lack of a sheltered harbour.

(ii) *Tourists.* The unique history and unusual beauty of the island had always attracted a number of tourists in pre-war days. The building of the airstrip during the war has made the island far more accessible and a considerable tourist industry has developed, particularly with visitors from New Zealand. The industry is at present limited only by the accommodation available. Approximately 120 can now be catered for and accommodation is being continually expanded.

(iii) *Government Instrumentalities.* A large proportion of the population is employed by Commonwealth Government instrumentalities which are:—Department of Civil Aviation, Norfolk Island Administration, Department of Works, Overseas Telecommunications Commission and Department of the Interior (Meteorological Branch). The bulk of the finance for operation of these instrumentalities is supplied by the Commonwealth Government and this greatly increases the income of the island.

**5. Trade, Transport and Communication.**—Imports to Norfolk Island in 1938–39 amounted to £27,590, mainly from Australia. Since the 1939–45 War they have risen from £32,402 in 1945–46 to £225,040 in 1951–52, the major proportion (£170,894 or 76 per cent.) still coming from Australia, although New Zealand supplied about 23 per cent. in that year. Exports were valued at £16,970 in 1938–39, and have risen from £9,024 in 1945–46 to £46,694 in 1951–52. Australia again is the principal country concerned (£34,510), with New Zealand's proportion of the trade showing a steady increase from negligible amounts pre-war and early post-war to one-quarter or one-third of the total exports in recent years.

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are (a) the produce or manufacture of Norfolk Island; (b) shipped direct to Australia; and (c) not goods which if manufactured or produced in Australia would be subject to excise duty.

A shipping service to the Territory is maintained at approximately seven-weekly intervals by vessels of Burns Philp & Co. Ltd., Sydney. The journey from Sydney to Norfolk Island occupies about four days.

The construction of an aerodrome on the island was completed during 1943. A fortnightly passenger and air freight service between Sydney and Norfolk Island is maintained by Qantas Empire Airways Ltd. There is also a weekly air service from New Zealand.

There are approximately 50 miles of usable road on Norfolk Island. As a substantial section of the population possesses private motor cars and taxi-cab services are available, transport is almost exclusively by motor vehicle.

The "all-red" cable from Great Britain via Vancouver, Fanning Island and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane. Until 10th June, 1947, the post office at Norfolk Island was part of the Commonwealth postal system, but as from that date Norfolk Island was established as a separate postal administration with its own issue of stamps.

**6. Social Condition.**—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry

and hat-making. The headmaster and assistant teachers are lent by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30th June, 1952 was 135. Dental examination and free dental service are provided to school children.

The Court of Norfolk Island is a court of record with dual jurisdiction. Sitting in its Limited Jurisdiction the Court has power to hear and determine actions of claims not exceeding £30 and to punish summarily all crimes and offences involving a pecuniary penalty or a sentence of imprisonment not exceeding six months. In its Full Jurisdiction the Court can hear and determine all actions, punish all crimes and offences, grant probate and letters of administration, hear and determine appeals from any conviction of the Court sitting in its Limited Jurisdiction, and has authority in all other matters. An appeal lies to the High Court of Australia from any judgment, order, decree or sentence of the Court sitting in its Full Jurisdiction when constituted by a Judge or the Chief Magistrate.

7. **Finance.**—The revenue of the Territory, together with an annual grant from the Commonwealth Government in aid of administrative expenses, is paid to the credit of the Norfolk Island Trust Fund, and advances for administrative and developmental expenses are drawn from the account. The principal sources of revenue in 1951–52 were:—Sale of liquor, £20,432; Commonwealth subsidy, £15,000; customs duties, £8,332. The total revenue was £60,945. Major items of expenditure in 1951–52 were:—Salaries, £16,975; purchase of liquor, £15,706; public works, £12,227. Total expenditure amounted to £67,355. In 1938–39 revenue amounted to £11,784 and expenditure to £13,565.

## PAPUA AND NEW GUINEA.

### § 1. Administration.

Following the outbreak of the Pacific War civil administration in Papua and New Guinea was suspended on 11th February, 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied Forces when the Japanese surrendered in August, 1945. Information relating to the transfer back from military to civil control under the Papua-New Guinea Provisional Administration Act 1945–1946 may be found in Official Year Book No. 39 and earlier issues.

The Papua-New Guinea Provisional Administration Act 1945–1946 was repealed by the Papua and New Guinea Act 1949 which came into force on 1st July, 1949. The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for an Administrative Union, one Administrator, one Supreme Court and one Public Service.

Provision is made for an Executive Council of not less than nine officers of the Territory, who shall be appointed by the Governor-General, and a Legislative Council consisting of twenty-nine members, namely:—(a) the Administrator; (b) sixteen officers of the Territory (who shall be known as official members); (c) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory; (d) three non-official members representing the interests of the Christian missions in the Territory; (e) three non-official native members; and (f) three other non-official members.

The Legislative Council was inaugurated on 26th November, 1951 by His Excellency Sir John Northcott, while Administrator of Australia.

Subject to the Act, provision may be made by Ordinance for the establishment of Advisory Councils for Native Matters and Native Village Councils.

The Act also makes provision for the continuance of the existing laws of the Territory of Papua and the Territory of New Guinea.

### § 2. Finance.

The following table shows particulars of the financial operations of the Papua and New Guinea Administration since its inception in July, 1949, together with particulars of the earlier provisional administration, and of the combined Territories in 1938–39. See pp. 252 and 259 for some information on each Territory.

(b) Trust Territory of New Guinea only.

### § 3. Agriculture and Animal Industry.

1. **Soils.**—Although a large proportion of Papua and New Guinea is covered by skeletal soils unsuitable for agriculture, there are extensive areas in all parts where fertile soils occur, suitable for growing a wide range of crops. Most of the agriculture of the Territory up to the present has been on soils of the coastal plains, which, apart from the swamp soils, consist mainly of alluvium and podsolized alluvium. So far, these have been mostly under coco-nut plantations, although other crops such as rubber have also been grown. The swamp soils, of which there are extensive areas in the Delta plains and other parts of the Gulf of Papua, and in smaller areas, are found intermittently around the coasts and along the lower reaches of the rivers, and are in general quite unsuited to any form of agricultural development.

Volcanic soils probably offer the greatest prospects for development. They are found mostly on the Central Plateau and southern foothills of the main island, but there are also areas in New Britain (particularly in the Gazelle and Willaumez Peninsulas),

Bougainville and New Ireland, as well as in numbers of smaller islands. Other rich soils are the alluvials of the river valleys. The largest single area of this type is in the trough occupied by the Ramu and Markham Rivers.

2. **Climate.**—The climate, particularly the rainfall, over so wide an area as Papua and New Guinea, with its numerous islands and varying elevations, naturally presents many variations. Generally speaking, the climate is moist and tropical, except at high altitudes. There are only small differences in both daily and seasonal extremes. The Territory has no winter and summer, and thus no great variation in day-length over the year. The two seasons which are experienced are generally described as the "south-east" and the "north-west", corresponding with the periods of the year when the south-east trade winds and the north-west monsoons direct the main Territory air-flow. The south-east season prevails approximately from May to October, the trade winds attaining maximum velocities during July and August. The north-west monsoon operates over a considerably shorter period, between the end of December and about March. During the periods between these seasons, November and early December, and about March to April, there are two short spells of calm weather.

Rainfall varies considerably from an average annual rainfall of 245 in. at Gasmata in New Britain and 231 in. at Kikori in Papua, to about 88 in. at Wewak in New Guinea and 40 in. at Port Moresby.

Although the Territory has no summer and winter, it has an extreme temperature range, due to altitude differences, varying from an absolute highest temperature of about 100° F. along the coast, to freezing point on its highest peak, Mt. William (15,400 ft.).

Humidity in the Territory is very high throughout the year. Some coastal stations register an average relative humidity of more than 90 per cent. Humidities below 60 per cent. are rare at coastal stations, average figures varying from 80 per cent. at 9 a.m. to 65 per cent. at noon and 75 per cent. at 3 p.m. Humidity in mid-mountain forests appears to be higher than in the lowlands, while in the mossy forests there are periods when the whole belt is saturated.

3. **Suitable Crops.**—The crops which can be grown in Papua and New Guinea include copra, rubber, tea, coffee, cocoa, jute, kenaf, manila hemp, sisal, rice, pepper, tobacco, peanuts, kapok, cassava, ginger, cinchona, nutmeg, vanilla, tropical fruits and vegetables, sago and tung oil.

The agricultural commodities which, because of their marketing prospects, and suitability for production in the Territory, are considered to have the best possibility for development are copra, rubber, cocoa, coffee, tea, kenaf, sisal, manila hemp, and peanuts for export; and rice, fresh meat, dairy products, fresh vegetables and fresh fruit (e.g. bananas, paw-paws, citrus and pineapples) for local consumption.

4. **Plantation Agriculture.**—The principal plantation crops cultivated are coco-nuts, rubber, cocoa and coffee.

*Coco-nuts.* Territory coco-nut plantations suffered severely from damage and neglect during the last war, but rehabilitation has been rapid and about 490 plantations together with native coco-nut stands produced 76,904 tons of copra in 1951–52, valued at £4,547,492. The area (excluding native stands) planted with coco-nut palms in March, 1952, was 228,000 acres, of which 8,600 acres were not yet bearing. In addition, 1,469 tons of desiccated coco-nut, valued at £235,778, were exported.

A contract with the United Kingdom commenced on 1st March, 1949, for a period of nine years, for the sale of Territory copra in excess of Territory and Australian requirements. The price of copra sold for the first contract year, 1949, was £60 per ton f.o.b. Territory ports, and the contract provides that the price for each subsequent year is to be not more than 10 per cent. higher or lower than the preceding year's and is to be negotiated before the end of the preceding year. Early in 1952 the termination date of the contract was varied to 31st December, 1957, and prices are now negotiated on the basis of calendar years. The price for the calendar year 1953 is £81 5s. per ton f.o.b. Territory ports for sun dried copra with small price differentials for the other grades.

*Rubber.* Rubber exports have more than doubled since before the Japanese invasion, increasing from an average of 1,352 tons per year during the three years 1937-38 to 1939-40 to 2,849 tons in 1951-52, valued at £1,244,259. Of a total area of 26,600 acres planted with rubber trees in March, 1952, 6,000 acres were not bearing.

*Cocoa.* Exports of cocoa beans increased from 207 tons in 1949-50 and 317 tons in 1950-51 to 477 tons in 1951-52, valued at £148,091. The area (including native stands) planted with cocoa trees in March, 1952 was 9,125 acres, of which 4,968 acres were not yet bearing.

*Coffee.* Exports of coffee beans increased from 21 tons in 1949-50 and 33 tons in 1950-51 to 35 tons in 1951-52, valued at £10,511. The area planted with coffee trees in March, 1952 was 603 acres, of which 373 acres were not yet bearing.

5. **Native Agriculture.**—Most of the native inhabitants of Papua and New Guinea are agriculturists producing fruit and vegetables for their own consumption. The crops grown vary according to environment and altitude, and include yams, taro and sweet potatoes, coco-nuts, bananas, paw-paws, maize, sugar-cane, cassava, beans, peanuts, rice, cucurbits and tobacco. Sago is the staple food in the extensive semi-inundated areas which occur along the lower valleys of the major rivers. In these areas it is usually cut largely from naturally occurring stands. In other parts of the country small areas of sago are grown along stream banks and in swampy patches and are regarded as a reserve in times of poor harvest. Natives also produce a large amount of copra (about 11,200 tons in 1951-52) and in some areas (e.g. the Gazelle Peninsula in New Britain) are taking an increasing interest in producing cocoa beans for export.

In many localities the natives follow a farming system known as "Bush Fallowing Rotation". The inhabitants of each village have, at any one time, a number of distinct and separate cleared garden areas in the land surrounding the village. The garden clearings may be located some miles from the village and are not usually contiguous. Each garden area may be made up of a number of distinct plots owned by individual natives or families. Communal ownership of gardens is rare. The number of garden clearings (and their area) attached to each village depends on the size of the village and the fertility of the land.

The method of cultivation followed is for the jungle trees to be felled and undergrowth cleared, with axes and knives, the larger trees being usually left standing. The timber and foliage is allowed to dry out and then burnt. In some localities there is a little cultivation before the crops are planted, and root vegetables are placed in holes dug with a stick. In other places, however, there is careful preparation of the soil. Some weeding is done while the crops are growing. After harvesting, a second crop is rarely planted immediately in that garden area, but a new area of land is selected, cleared, burnt and planted. The natives return to the first area to harvest fruit from trees, such as paw-paw and banana, that may have been planted in the garden, but these are soon submerged in the new growth which quickly appears. The plot is allowed to lie fallow for a number of years, the period varying from 7 to 10 years or even longer, depending upon the local population pressure. During this time high secondary jungle has probably grown. Ultimately the natives return to the original plot, and clear, burn and plant again. The cycle continues year by year throughout the agricultural land belonging to the village. The foregoing is a broad generalization of the method followed. However, there are many variations.

The business of growing food is done by both the men and women. The division of work is usually clearly defined within the village itself but this division is not necessarily the same in all areas. Generally it is found that felling the forests is always done by the men, and carrying the harvested food home to the village is nearly always done by the women. However, other work such as cultivating, planting, weeding, may be done by either men or women according to the customs of the particular village or area.

6. **Animal Industry.**—At 31st March, 1952, the live-stock in the Territory consisted of 3,722 cattle, 2,099 sheep, 2,986 goats, 3,088 pigs, besides horses, mules and poultry. These figures exclude native-owned livestock. The introduction of rabbits, foxes, hares and monkeys is prohibited.

A number of British breeds of cattle are represented in Territory herds. For dairying Jersey and Australian Illawarra Shorthorns are most popular, while Black Poll, Polled and Horned Shorthorns are represented for meat production. These breeds have done well in the Territory under good management.

Most of the sheep now in the Territory are Romney Marsh sheep located at Nondugl in the highlands of New Guinea. This breed has been tried in various parts of the Territory. It produces a good carcass, and in drier parts a useful sheep. There are also some Asiatic sheep, and crossed with Romney Marsh they produce good carcasses and are hardy. Current investigations on sheep raising include tests and observations to determine the most suitable breeds and areas for grazing for both mutton and wool.

## PAPUA.

### § 1. General Description.

1. **Early Administration.**—Particulars of the early administration of Papua are given in Official Year Book No. 19, p. 576.

2. **Administration by Commonwealth of Australia.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the Commonwealth by the Papua Act 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is now under the control of the Commonwealth, but not included within it, and is divided into six magisterial districts, viz. :—Southern Highlands, Western, Gulf, Central, Milne Bay and Northern.

3. **Area, etc.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude ; its southernmost portion, comprising Sudest and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 920 miles ; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,540 square miles, of which 87,786 are on the mainland, and 2,754 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (*see* No. 18, p. 633).

### § 2. Population.

1. **Non-Indigenous Population.**—The European population of Papua has increased slowly, and with some reversals in trend, from less than 700 in 1906, the year in which the Territory came under Commonwealth control, to 1,343 at the Census of 1921. At the 1933 Census, however, it numbered only 1,148, but amounted to 2,542 at the 1947 Census (1,700 males and 842 females), and at 30th June, 1952 it was estimated at 4,242 persons.

The non-European section of the non-indigenous population at 30th June, 1947 was 697, of whom 194 were full-bloods and 503 were half-castes with one of the parents a European. Comparable figures as at the 1933 and 1921 Censuses, respectively, were :—full-bloods—786 and 577 ; half-castes—227 and 158.

The total non-indigenous population at the Censuses of 1921, 1933 and 1947, respectively, was 2,078, 2,173 and 3,239.

2. **Native Population.**—It is not possible to give exact data regarding the number of natives, because part of the interior has not as yet been under complete Government control. However, the enumerated (based on the results of the census up to 30th June, 1952 which at that date was still proceeding) and estimated population of the Territory of Papua at 30th June, 1952 numbered 369,975 persons. This comprised 271,335 enumerated persons (144,605 males and 126,730 females) and 98,640 estimated. The total number was distributed through districts as follows :—Southern Highlands, 79,946 persons ; Western, 32,023 ; Gulf (including the former Delta district), 50,000 ; Central, 80,532 ; Milne Bay, 82,646 ; Northern, 44,828.

### § 3. Native Labour, Taxation, Health, etc.

1. **Native Labour.**—The laws relating to the employment of natives are uniform in Papua and New Guinea, and may be found in the Native Labour Ordinances 1951–1952. These provide for the engagement of natives under a permit. Permits are issued by a District Officer, and authorize the holder to engage natives for employment on his own behalf, or on behalf of a registered employer who has authorized him to act on his behalf. Under this Ordinance a native may be issued with a Native Assistant's Permit, which authorizes him to solicit natives to work for his employer, or for other employers who have authorized him to act on their behalf.

Natives are employed under written agreements which have been sanctioned and attested by a District Officer. The period of the agreement must not exceed two years, but one further agreement, for a period not exceeding one year, may be drawn up, if both parties desire it. The period, in both cases, begins on the day on which the agreement is sanctioned and attested. Both parties may, by mutual consent, and with the approval of a District Officer, cancel an agreement. On the termination of an agreement, employers are required to repatriate workers to their own villages.

Natives under the age of sixteen years may not be employed. Employers must provide native employees with housing, medical attention, food and clothing free of charge. A minimum monthly wage of fifteen shillings and a working week of 44 hours are prescribed by Ordinance. Provision is also made for compensation in the case of injury or death.

2. **Native Taxes.**—Under the Native Taxes Ordinance 1917–1936, a tax not exceeding £1 per annum may be imposed on natives, except native constables, mission teachers and mission students, natives unfit for work, and those who have four living children. The proceeds of the tax must be expended on native education, or devoted to purposes directly benefiting the natives.

No direct taxes have been levied on natives since the war. Native Village Councils (which are formed voluntarily by the natives) are, however, empowered to levy rates on villagers for the purpose of providing for local services carried out by the Councils.

3. **Health.**—The Department of Health has the general oversight of all medical and dental services. It maintains a large number of hospitals, which are staffed by fully-trained European medical personnel and trained native assistants, for both European and native patients. The Department has adequate facilities for research in tropical medicine.

At 30th June, 1952, there were three European hospitals (one privately controlled); 31 native hospitals (one private and 14 mission); 186 village aid posts (69 mission); 39 welfare clinics (35 mission); and two Hansenié colonies in the Territory. The Missions employ their own doctors and nurses in their medical establishments. A training school has been established for the purpose of training natives in first aid, elementary physics, chemistry, anatomy, physiology and pathology in preparation for their employment as Native Medical Assistants. Natives are also attending the Central Medical School at Suva, Fiji, to be trained as Native Medical Practitioners. The chief complaints treated in hospital are malaria, yaws, tropical ulcers, respiratory infections, hookworm, venereal and skin diseases.

### § 4. Land Tenure.

The basic principle of the land laws of Papua is that all land not specifically alienated by due process from the natives is native land. On 30th June, 1952, of the total estimated area of Papua, approximately 58,000,000 acres, only 1,836,860 acres had been alienated. The distribution of all land in Papua at 30th June, 1952, according to tenure, was as follows:—Alienated: Held by private non-indigenous inhabitants—Freehold, 24,284 acres, leasehold, 252,819 acres; Held by Administration, 1,498,850 acres; Native Reserves, 60,907 acres; Total Alienated, 1,836,860 acres; Held by Natives, 56,163,140 acres.

Although, as the figures above show, a small amount of freehold land exists in Papua, no further estates in fee-simple or other estate in freehold can be granted under the provisions of the Land Ordinance 1911-1952 of Papua. Leases of various kinds may be granted by the Administration. The principal types of lease available are agricultural leases, pastoral leases, leases of town allotments, business leases and residence leases of other than town allotments, and various forms of special leases and licences over land. Leasehold terms are liberal and, in general, leases may be granted for periods of up to 99 years. Rent is based on the unimproved value of the land. For agricultural leases the rental rate per annum is 5 per cent. of the unimproved value and for pastoral leases the rate is  $2\frac{1}{2}$  per cent. Concessions regarding freedom from, or reduced, rents apply during the early developmental periods of agricultural and pastoral leases. All leases are subject to improvement conditions which may be varied or relaxed under certain circumstances. The following classes of leases were in force in Papua on 30th June, 1952:—Agricultural, 598—221,491 acres; pastoral, 25—29,549 acres; residence, 139—166 acres; special, 123—512 acres; mission, 308—798 acres; business, 76—155 acres; town allotment, 409—148 acres; total, 1,678—252,819 acres.

Leases of Crown land may be obtained from the Administration. Dealings in privately-owned land are a matter for private treaty. Native-owned land, however, cannot be acquired or leased from the native owners by private individuals. If a lease of land which is native-owned is desired, application must be made to the Administration. If the native owners are willing to sell the land, and the Administrator is satisfied that the land over which the lease is applied for is not required or likely to be required by the native owners, and if otherwise satisfied that the lease should be granted, the Administration itself purchases the land and grants an appropriate form of lease to the applicant.

The registration of titles, interests and dealings in land is provided for under the Real Property Ordinance 1913-1951 modelled on the Torrens system of land registration.

## § 5. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, fishing and mining industries. The only manufacturing industry of importance is that of desiccated coco-nut, although a factory for the extraction of cutch from mangrove bark is being established at Kikori in the Gulf District. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, bananas and paw-paw. Non-indigenous enterprise produces most of the commodities exported. Natives, however, do produce copra for export and native enterprise in other fields of agricultural production for export purposes is being encouraged. The principal agricultural products of Papua for the export trade are copra and rubber. Most of the timber milled during 1951-52 was absorbed by local building requirements; exports of timber being less than three per cent. of total production. The main products of fisheries exported from Papua are trochus and green snail shell. Gold and manganese, zinc-lead and copper ores have been mined in commercial quantities.

Agricultural and pastoral conditions in Papua and New Guinea have been dealt with, for the sake of convenience, as a whole, and reference should be made to pp. 244-7 for information on the soils, climate, crops, methods of cultivation, etc., throughout both Territories. The following paragraphs relate to forestry, mining and water power resources in Papua.

2. **Forestry.**—(i) *Timbers.* Mixed species tropical rain forest covers most of Papua, although behind Port Moresby there is an area of monsoonal savannah country. On account of the mixed nature of the timbers in any one area, their utilization on an economical basis is somewhat difficult. Kwila, the only hardwood found in millable quantities in Papua and New Guinea occurs in important stands east of Port Moresby. Mangroves occur in large areas fringing the Gulf of Papua and are cut for the preparation of cutch from the bark.

(ii) *Survey Work.* Forestry field work is actively being carried out in Papua with a view to assessing the forest resources available and to survey areas that will be thrown open for cutting.

(iii) *Permits.* Three timber permits were granted during the year ended 30th June, 1952. This brings the total of emergency permits granted to eleven, and there is still one licence continuing under the previous timber Ordinance. The total area of forest involved is 72,645 acres.

3. *Mining.*—(i) *Variety of Minerals.* A wide variety of minerals has been found in Papua including, platinum, gold, silver, copper, tin, lead, zinc, cinnabar, iron, osmiridium, manganese, sulphur, chromite, gypsum and lignite, but for the most part in too small quantities or too difficult country for their economic extraction.

Gold was discovered in 1888 and has been found in many parts of Papua. Before the war gold was an important item in the Territory's production and in 1938-39 (valued at more than £150,000) was the major export, but since the war gold production has dwindled to insignificance. The average annual estimated quantity of gold yielded for the five years ended 1951-52 was less than 300 fine oz. compared with almost 28,000 fine oz., the average for the last three pre-war years. The total value of gold won to 30th June, 1952 was £3,293,000.

Of precious stones, only the topaz and beryl have been obtained. Large beds of apparently good coal also exist.

Manganese ore valued at £1,689 and zinc-lead ore valued at £900 were exported from Papua during the year ended 30th June, 1952. Large quantities of copper ore were mined and exported, prior to the 1939-45 War. Good samples of galena (sulphide of lead) have been obtained, while cinnabar (sulphide of mercury), graphite, zinc-blende, and native sulphur are known to exist, but not in commercial quantities.

(ii) *Oil Search.* Since oil search began in Papua and New Guinea after the 1914-18 War nearly £10,000,000 has been spent, mainly in Papua. The existence of petroleum has been traced at scattered intervals over a large area. Two companies hold permits under the provisions of the Petroleum (Prospecting and Mining) Ordinances 1951 and oil prospecting has been carried on in the Western, Delta, Gulf and Central Divisions.

4. *Water Power.*—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10,000,000 h.p. available for this purpose.

## § 6. Trade, Transport and Communication.

1. *Customs Tariff.*—As from 1st July, 1950, a new customs tariff came into force. This provides high revenue rates on ale, spirits, wines, timepieces, cigarette papers, fancy goods, jewellery and certain apparel and piece goods made of silk. Of 74 items now mentioned in the import schedule, 58 are on the free list and two are partially free. The new tariff allows duty-free treatment of necessities, but increases rates on non-necessities. The purpose of the revision is to relieve both general industrial costs and the basic costs of living with a view to encouraging further development of the Territory. The rate of duty on items not specified in the schedule is 10 per cent. ad valorem. No preferential rates are specified in the schedule. A surcharge equal to ten per cent. of duty payable was imposed as from 17th January, 1952. Export duties are imposed on copra, rubber, mother-of-pearl shell and gold.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced and imported direct from Papua (see Chapter VI.—Trade), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

2. Imports and Exports.—A table of imports during the years 1938-39 and 1949-50 to 1951-52 appears below. The classification for the two later years differs from that for the earlier years.

TERRITORY OF PAPUA : IMPORTS.  
(£.)

Particulars.	1938-39.	1949-50.	Particulars.	1950-51.	1951-52.
Ale, spirits and beverages ..	14,813	101,844	Foodstuffs of animal origin, excluding living animals	563,799	643,452
Tobacco and manufactures ..	27,466	214,427	Foodstuffs of vegetable origin, non-alcoholic beverages and substances used in the making ..	713,034	1,026,712
Agricultural products and groceries	138,551	1,134,129	Spirituous and alcoholic liquors ..	110,395	117,899
Textiles, felts, furs, attire, etc. ..	37,712	267,500	Tobacco and preparations thereof ..	160,151	170,292
Metals and machinery ..	76,068	1,605,347	Live animals ..	679	1,020
Oils, paints and varnishes ..	33,331	358,247	Animal substances (mainly un-manufactured, not foodstuffs) ..	55	38
Earthenware, cement, glass, etc. ..	5,585	57,509	Vegetable substances and fibres ..	8,894	14,479
Drugs and chemicals ..	12,828	47,902	Apparel, textiles and manufactured fibres ..	521,431	497,081
Wood, wicker and cane ..	13,076	115,157	Oils, fats and waxes ..	151,984	238,666
Jewellery and fancy goods ..	7,756	39,047	Paints and varnishes ..	43,807	60,185
Leather and rubber ..	8,076	87,026	Stones and minerals, including ores and concentrates ..	18,030	8,952
Paper and stationery ..	8,521	53,866	Metals, metal manufactures and machinery ..	1,437,253	1,849,726
Miscellaneous ..	94,273	602,027	Rubber and leather and manufactures thereof, and substitutes therefor ..	98,369	76,340
Government stores ..	36,747		Wood and wicker, raw and manufactured ..	127,764	165,349
			Earthenware, cement, china, glass and stoneware ..	62,474	92,211
			Paper and stationery ..	77,612	154,162
			Jewellery, timepieces and fancy goods ..	49,438	60,050
			Optical, surgical and scientific instruments ..	135,845	190,878
			Drugs, chemicals and fertilizers ..	126,522	166,260
			Miscellaneous ..	235,452	324,471
Total .. ..	514,808	4,684,028	Total .. ..	4,642,988	5,858,223

Exports during these years were valued (Australian currency) at £490,158, £1,202,694, £1,923,289 and £2,789,157, 1938-39 and 1949-50 to 1951-52 respectively. The major components in 1938-39 were :—gold, £152,103 ; rubber, £114,949 ; copra, £57,999 ; and desiccated coco-nut, £48,140. In recent years copra and rubber have been the most prominent exports, constituting about three-quarters of the value of total exports. Major exports during 1951-52 were as follows :—rubber, £1,244,259 ; copra, £958,109 ; desiccated coco-nut, £124,934. Corresponding particulars for 1950-51 were, respectively, £802,177, £644,532 and £105,509.

Surplus war stores, trochus shell, gold and coffee beans comprised the bulk of the remaining exports.

In the years immediately preceding the 1939-45 War, the value of imports into Papua from Australia comprised almost half the total value of goods imported, the United Kingdom and the United States of America supplying the next highest values of imports, contributing about 14 per cent. each. In recent years the Australian proportion has increased to about two-thirds, and that of the United Kingdom, after declining, has now risen to about pre-war proportions, while that of the United States of America has declined. In 1951-52 major countries in the Papuan import trade were

as follows :—Australia, £3,897,992 ; United Kingdom, £765,760 ; United States of America, £370,401 ; Indonesia, £148,327. In the export trade of Papua during the same period Australia has predominated to an increasing extent, and in 1951–52 received £2,582,567 or 93 per cent. of the total value of exports, the United Kingdom being next in importance with £188,430 or nearly 7 per cent.

3. **Shipping.**—Prior to the war in the Pacific the aggregated entrances and clearances of oversea vessels at Papuan ports each year amounted to well over 200 and the net tonnage to as much as 490,000 tons, 70 or 80 per cent. thereof in each instance being British. Early post-war years showed a considerable reduction in tonnages although not in numbers, but the figures for 1949–50 and 1950–51 were somewhat higher than those for pre-war years. In 1951–52 they declined, however, to 196 entrances and clearances, with a net tonnage of 400,344 tons (entrances, 102—200,319 net tons ; clearances, 94—200,025 net tons). British vessels in 1951–52 constituted 182 of the combined entrances and clearances (93 per cent.) and 342,660 of the aggregate tonnage (85 per cent.).

A regular passenger and freight service operates between Australia and the Territory of Papua. Vessels trading between Australia and the East also call at Territory ports. Coastal and inter-island shipping services are maintained by vessels operating from the two principal ports of Port Moresby and Samarai.

4. **Other Forms of Transport and Communication.**—Air services link Papua with Australia, and there are also internal air services linking Port Moresby with Daru to the west, with Samarai and Bwagaioia to the east, with Kokoda, Popondetta, Goroka, Madang and Wewak in the highlands and north coast of the Territory of New Guinea, and with Rabaul in New Britain. Mail is carried on these services.

There are nearly 780 miles of roads in Papua, about three quarters being suitable for medium and heavy traffic, and the greater proportion located in the Central and Northern Districts, which are north-east of Port Moresby.

Radio stations at Port Moresby for both transmission and reception are jointly shared by the Overseas Telecommunications Service and the Administration.

The former provides a service between Papua, Australia and the Territory of New Guinea by radio and radio-telephone, while the latter is responsible for radio communications within the Territory.

### § 7. Finance.

The principal source of revenue for the Territory of Papua is the annual grant received from the Commonwealth Government, which in 1951–52 amounted to £2,159,500. Customs duties, £586,399 in 1951–52, are next in importance. The total revenue during 1951–52 was £3,063,992, compared with £2,645,091 in 1950–51 and £165,823 in 1938–39. Of a total expenditure in 1951–52 of £3,083,823, £1,286,386 was spent on public works, £481,559 on medical services, £331,240 on native affairs and £984,638 on ordinary votes. In 1950–51 expenditure amounted to £2,810,691 and in 1938–39 to £166,330.

For particulars of the finances of the combined Territory administration *see* p. 244.

## TRUST TERRITORY OF NEW GUINEA.

### § 1. General Description.

The land area of the Territory of New Guinea is about 93,000 square miles and the area including the sea within the lines drawn through its extreme outer points is more than 1,000,000 square miles. As the coast of the Territory has not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands together with the small islands adjacent thereto are as follows :—North-East New Guinea (also called “ The Mainland ”), 69,700 sq. miles ; Bismarck Archipelago—New Britain, 14,600 sq. miles, New Ireland, 3,340 sq. miles, Lavongai, 460 sq. miles, Admiralty Islands, 800 sq. miles, total Bismarck Archipelago, 19,200 sq. miles ; Solomon Islands—Bougainville, 3,880 sq. miles, Buka, 220 sq. miles, total Solomon Islands, 4,100 sq. miles ; grand total, 93,000 sq. miles.

Information regarding physiography and climate will be found in Official Year Book No. 22, p. 613, and in the *Official Handbook of the Territory*.

## § 2. Government.

1. **The Military Occupation (1914-18) War.**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government on 9th May, 1921.

2. **Mandate (1920).**—In 1919 it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted under Mandate from the League of Nations to the Government of the Commonwealth. The issuing of the Mandate was, however, delayed, and it was not until 17th December, 1920 that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (*see p. 264.*)

3. **1939-45 War.**—For the events following the outbreak of the Pacific War and the formation of the Papua-New Guinea Provisional Administration in 1945, *see p. 243 ante* and earlier Year Books.

4. **Trusteeship (1946).**—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are shown in Official Year Book No. 39, pp. 355-7.

5. **Administration.**—For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration *see* Official Year Book No. 36 and earlier issues.

For administrative purposes the Territory is divided into the following nine districts:—New Britain, comprising New Britain and adjacent islands; Morobe, Madang, Eastern Highlands, Western Highlands, and Sepik on the mainland; New Ireland, comprising New Ireland, Lavongai and adjacent islands; Manus, comprising the Admiralty Group; and Bougainville in the Solomon Islands. Each district is under a District Officer, assisted by a small staff.

## § 3. Population.

1. **Non-indigenous Population.**—The European population of the Territory of New Guinea increased from 64 in 1885 to 1,288 at the Census of 1921, at the 1933 Census it had risen to 3,191, and it reached its pre-war peak of 4,608 in 1939. At the 1947 Census the European population numbered 3,412 (2,604 males and 808 females).

Malays seem to have been the first Asiatics brought by the Germans to German New Guinea; 37 of them were recorded on the mainland in 1885. About 1889 the New Guinea Company began to bring Chinese, Malays and Javanese in growing numbers from Singapore and Java to work on the plantations; in the year 1892 there were about 1,800 Asiatics on the mainland. By 1898 the number had decreased to 300 or 400, but it had risen to 1,830 at the time of the 1933 Census, and at 30th June, 1941 numbered 2,228, mostly Chinese. At the census of 30th June, 1947, non-Europeans numbered 2,215, of whom Chinese (1,769) and Filipinos (276) constituted the major proportion. At the same date half-castes with one of the parents a European numbered 573.

The total non-indigenous population at the Censuses of 1921, 1933 and 1947 was, respectively, 3,173, 5,216 and 6,200, and the estimated figure at 30th June, 1952 was 9,926 persons.

2. **Native Population.**—The enumerated and estimated native population of the Territory of New Guinea as at 30th June, 1952, numbered 1,090,332 persons, comprising enumerated, 864,372 (458,008 males, 404,164 females and 2,200, details of sex not available), and estimated, 225,960. The total population was distributed throughout the several districts as follows:—Eastern Highlands, 262,551 persons; Western Highlands, 157,181; Sepik, 194,603; Madang, 123,564; Morobe, 174,825; New Britain, 85,115; New Ireland, 33,930; Bougainville, 44,143; Manus, 14,420.

## § 4. The Natives.

1. **General.**—The natives are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Odd tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (See Official Year Book No. 16, p. 670, and *Official Handbook of the Territory*, Pt. V.)

2. **Land Tenure.**—Native customs in regard to the ownership and use of land may be briefly outlined as follows. The ownership and use of the land are generally individual, although, in some rare cases, particularly in North Bougainville, the communal system exists. In districts where a great many coco-nut palms are growing on native lands it is often found that the land is the property of a chief or of one of the old men of the tribe, and that the coco-nut palms growing thereon are divided into small groves, and are the property of several members of the tribe. Customs with regard to the use of unoccupied forest lands vary. Right of inheritance to land is almost invariably through the maternal branch. (See Official Year Book No. 17, p. 634, and *Official Handbook of the Territory*.)

3. **Research Work.**—During the German occupation of the Territory a certain amount of research work was carried out, partly by scientific expeditions, and partly by missionaries and by a local resident. For many years an anthropologist was engaged consolidating the work already done, and extending it throughout the Territory. The results of his work appear in special reports.

4. **Education.**—Education in the Territory is provided by the Administration and various mission organizations. Schools for natives have also been established by Native Village Councils. The Education Ordinance 1952 enables the Administrator to establish an education advisory board, district education committees, European and native schools and to grant financial aid for educational purposes. European teachers are recruited from Australia, and native teachers are trained in the Territory by the Administration and the missions. During the year ended 30th June, 1952, 69 schools were maintained by the Administration for 3,757 children, of whom 272 were Europeans, 370 were part-native and Malay, and 3,115 were natives. The total number of pupils in the various grades of mission schools was 91,389, of whom 488 were Europeans and part-native. To assist the educational work of the missions the Administration provides expert advice, educational equipment and text-books. In addition, the sum of £55,879 was distributed among the missions as grants-in-aid during the year ended 30th June, 1952.

5. **Health of Natives.**—The main diseases affecting the natives are malaria, yaws, respiratory diseases, dysentery, framboesia, tropical ulcers, hookworm, filariasis and beri-beri. The Department of Health is engaged in combating these diseases with a staff of fully-trained medical officers, medical assistants and orderlies in native hospitals at Administration stations and sub-stations (its staff also supervises hospitals on plantations). It has adequate facilities for research in tropical medicine, and a training scheme for natives as medical orderlies. The Department also provides the missions with much of their medical stores and supplies, and maintains two Hansenide colonies for the treatment of natives suffering from Hansen's Disease. The Department also undertakes the general oversight of sanitary conditions in the Territory.

6. **Missions.**—A number of mission societies operate in the Territory.

The Society of the Sacred Heart of Jesus works in the Bismarck Archipelago, the Society of the Holy Ghost, the Franciscan Order and the Society of the Divine Word along the coast of north-east New Guinea from Sek to the Dutch border and in the Central Highlands, and the Marists in Buka and Bougainville. These are Roman Catholic Missions. The Protestant Missions are the Australian Methodist Mission in New Britain and New Ireland, the New Zealand Methodist Mission in Bougainville,

the Lutheran Mission (supported and staffed by the Lutheran Churches in Australia and America) which works in Morobe, Madang, the Central Highlands, New Britain and Manus, the Melanesian Mission (Anglican) in New Britain, the Seventh Day Adventist Mission in Bougainville, New Britain, the mainland of New Guinea and Manus, the East and West Indies Bible Mission and the Baptist Mission in the Central Highlands. The South Seas Evangelical Mission (Undenominational) and the Assemblies of God Mission are also working in the Sepik area. All these societies include teaching with their missionary work.

### § 5. Land Tenure.

The principles governing the acquisition and ownership of land and types of tenure available in New Guinea are in general similar to those which obtain in Papua. In New Guinea, although under the Land Ordinance 1922-1951 grants of freehold estates may be made, as a matter of policy freehold estates are no longer granted by the Administration, all grants now being restricted to leaseholds. However, in New Guinea the amount of freehold land of earlier origin held by private non-indigenous owners amounts to more than half a million acres. Freehold titles to this land, which includes a good deal of plantation land, may be transferred by purchase subject only to the general provision in New Guinea that dealings in land are subject to the approval of the Administrator.

The area of the Territory of New Guinea is estimated at 59,520,000 acres, of which, at 30th June, 1952, 1.70 per cent. was alienated. The following was the distribution according to tenure on 30th June, 1952:—Alienated: Held by private non-indigenous inhabitants—Freehold, 519,380 acres, Leasehold, 175,817 acres; Held by Administration, 291,875 acres; Native Reserves, 26,611 acres; Total Alienated, 1,013,683 acres; Held by Natives, 58,506,317 acres.

Leases in force at 30th June, 1952 were as follows:—Agricultural, 509-154,031 acres; dairying, 9-1,900 acres; pastoral, 4-11,296 acres; residential and business, 581-724 acres; special, 71-1,511 acres; mission, 495-1,775 acres; leases granted to Chinese in towns, 219-62 acres; long period leases from German regime, 105-4,518 acres; total, 1,993-175,817 acres.

Under German law there was a system of registration of titles in a "Ground Book," but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in an Ordinance entitled the Lands Registration Ordinance 1924-1951.

### § 6. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, fishing, forestry and mining industries. The only important manufacturing industry at present in existence is that of desiccated coco-nut. However, a company (Commonwealth New Guinea Timbers Ltd.), in which the Commonwealth Government has a controlling interest, is erecting a modern factory at Bulolo for the manufacture of plywood and veneer, and the export of these products is expected to commence by the end of 1953. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, bananas and paw-paw. Non-indigenous enterprise produces most of the commodities exported. Natives, however, do produce copra for export and native enterprise in other fields of agricultural production for export purposes is being encouraged. The principal agricultural products of New Guinea for the export trade are copra and cocoa. Most of the timber milled during 1951-52 was absorbed by local building requirements, exports of timber absorbing approximately 10 per cent. of production. The main products of fisheries exported from New Guinea are trochus and green snail shell. Gold is the principal mineral mined.

For information on the agricultural and pastoral industries, which for the sake of convenience is related to the Territory of Papua and New Guinea as a whole, see pp. 244-7. The following paragraphs relate to the timber, fishing and mining industries in the Territory of New Guinea.

2. **Timber.**—Surveys of the timber resources of the Morobe District indicate that there are approximately 500 million super. feet of timber in the pine forests of the Bulolo Valley. This is supporting sawmills cutting for local use and export, and fitches are also being exported to Australia for the manufacture of battery separator veneer. It is proposed that Commonwealth New Guinea Timbers Ltd. will harvest this forest, the area being progressively reforested as it is cut. Sawmills controlled by the Administration are established at Yalli and Keravat, and are supplying local requirements. The log export trade has not yet returned to the pre-war volume, but in 1951–52 shipments of some 1,882,169 super. feet of timber in the log were made.

The Forestry Ordinance 1936–1951 provides for the issue of permits and licences to cut timber. Present policy calls for the orderly development of the timber industry on sound forestry principles; the grant of emergency timber permits to provide timber for Territory requirements; the disposal by public tender of timber areas designated by forest officials of the Territory; and the development of the pine stand in the Bulolo Valley by a joint company in which the Commonwealth Government has a majority shareholding. Timber growing on native lands cannot be acquired by private purchasers direct from the natives but must be obtained through the Administration. A royalty is payable on all forest produce taken under permit or licence. Nineteen timber permits, covering an area of 223,000 acres, were in operation during the year.

3. **Fisheries.**—The wealth of the waters of the Territory has been little exploited. Fish are caught at many places along the coast to supply the small local demand of the natives and of the few resident Europeans. Trochus shell to the value of £44,294 and green snail shell to the value of £32,996 were exported during 1951–52.

4. **Mining.**—The production of gold and silver is the most important mining activity in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold deposits were discovered in the Morobe District in 1926; the field is situated about 90 miles (40 by air) inland from Lae, the nearest coastal port. Communication is established with the coast by a regular aeroplane service and by road transport. Silver is usually found associated with the gold in these deposits. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kabenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron occurs as magnetite and hæmatite in the Baining District, apparently in large quantities. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland. Except for gold and silver, costs of extraction, treatment and transport have rendered production uneconomical.

The granting of rights, leases and claims for mining purposes are provided for in the Mining Ordinance 1928–1947 and Regulations thereunder. Copies of the Ordinance and Regulations may be obtained from the Secretary, Department of Territories, Canberra.

The production of gold in New Guinea during the last three pre-war years averaged about 228,000 fine oz. a year, at an average value of £2,000,000. In 1940–41 it amounted to 263,113 fine oz., valued at £2,808,835. Although the market price of gold has been fixed at a much higher level than in 1938–39, mining costs have risen to a much larger extent, and, as a consequence production since the war has been on a much smaller scale, averaging 91,000 fine oz., at a value of £1,200,000 a year over the five years ended 1951–52. Production in 1951–52 amounted to 110,214 fine oz., value, £1,707,401, and in 1950–51 to 87,593 fine oz., value, £1,356,962.

The Petroleum Ordinance 1936 has been superseded by the Petroleum (Prospecting and Mining) Ordinances 1951, which has facilitated the carrying out of geological surveys and prospecting activities generally. A search for petroleum is no longer being actively conducted, however, and no permits to search for petroleum were in force at 30th June, 1952.

## § 7. Trade, Transport and Communication.

1. **Customs Tariff.**—As from 1st July, 1950, a new customs tariff came into force. This provides high revenue rates on ale, spirits, wines, timepieces, cigarette papers, fancy goods, jewellery and certain apparel and piece goods made of silk. Of 74 items

now mentioned in the import schedule, 58 are on the free list and two are partially free. The new tariff allows duty-free treatment of necessities, but increases rates on non-necessities. The purpose of the revision is to relieve both general industrial costs and the basic costs of living with a view to encouraging further development of the Territory. The rate of duty on items not specified in the schedule is 10 per cent. ad valorem. No preferential rates are specified in the schedule. A surcharge equal to 10 per cent. of duty payable was imposed as from 17th January, 1952.

Export duties are imposed on copra, trepang, tortoise shell, mother-of-pearl shell, feathers, sulphur and sulphur-bearing substances.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) for the free entry into Australia of certain goods produced and imported direct from the Territory of New Guinea (see Chapter VI.—Trade), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

2. Imports and Exports.—Values of the principal classes of imports for the years 1938–39 and 1948–49 to 1951–52 are shown below.

## TERRITORY OF NEW GUINEA : IMPORTS.

(£.)

Particulars.	1938–39.	1948–49.	1949–50.	1950–51.	1951–52.
Foodstuffs of animal origin ..	152,023	546,683	722,518	813,701	1,177,614
Foodstuffs of vegetable origin ..	158,895	767,728	692,387	966,090	1,218,081
Spirituos and alcoholic liquors ..	54,969	154,724	182,039	176,597	252,016
Tobacco and preparations thereof	63,122	154,029	269,029	263,195	240,960
Live animals ..	1,328	10,553	13,349	20,720	53,864
Animal substances ..	1,124	..	392	25	24
Vegetable substances and fibres ..	3,307	6,611	5,599	8,993	14,480
Apparel, textiles and manufac- tured fibres ..	138,077	562,418	565,497	847,268	993,729
Oils, fats and waxes ..	65,901	453,387	288,965	514,890	579,478
Paints and varnishes ..	10,934	30,350	43,439	61,228	68,190
Stones and minerals ..	8,164	2,801	9,456	12,495	12,070
Metals, manufactures and mach- inery ..	470,781	1,044,340	1,164,363	1,350,608	2,094,821
Rubber and leather and manu- factures thereof ..	16,365	42,867	62,444	85,072	161,728
Wood and wicker ..	29,195	78,814	141,879	139,706	121,370
Earthenware, cement, glass, etc.	13,215	40,492	64,464	99,679	123,630
Paper and stationery ..	22,829	57,279	65,337	87,792	121,450
Jewellery and fancy goods ..	14,133	76,145	81,844	104,625	137,986
Optical and scientific instruments	22,318	57,003	75,251	131,977	192,014
Drugs, chemicals and fertilizers ..	46,163	99,889	104,926	159,466	234,437
Miscellaneous ..	47,992	207,760	238,621	342,542	356,160
Total ..	1,340,835	4,393,873	4,791,799	6,186,669	8,154,102

Exports from New Guinea during these years were valued at £2,973,895, £3,202,257, £4,234,978, £5,436,617 and £6,517,881, 1938–39 to 1951–52 respectively. In 1938–39 gold exported was valued at £2,129,263, and copra at £727,949, comprising the bulk of the exports in that year. These two commodities still predominate in the value of exports, but with gold falling into second place instead of copra. Major commodities exported during 1951–52 (1950–51 in parenthesis) were as follows :—Copra, £3,589,383 (£3,200,715); gold, £1,707,401 (£1,356,962); cocoa beans, £147,503 (£92,181); timber, £127,621 (£24,332); desiccated coco-nut, £110,844 (£218,166); shell (trochus, green snail, etc.), £77,302 (£127,913). Surplus war stores exported by the purchasers comprised the bulk of the remaining exports.

Imports into New Guinea in the years just before the 1939-45 War came in the main from Australia (about 40 per cent.), United States of America (20 per cent.), and the United Kingdom (10 per cent.), with China, Japan and Germany contributing about 5 per cent. each. In recent years Australia's proportion has advanced to about 60 per cent., the United States of America and the United Kingdom between them sharing a further 15 to 20 per cent. In 1951-52 major countries in the New Guinea import trade were:—Australia, £4,920,231; the United Kingdom, £592,885; United States of America, £565,513; Hong Kong, £367,910; India, £144,455.

About three-quarters of the New Guinea exports in the immediate pre-war years went to Australia; of the balance most went to the United Kingdom. Australia still predominates in the New Guinea export trade, but in the last three years has averaged less than 60 per cent. of the total, and the United Kingdom about 40 per cent. In 1951-52 the value of exports to Australia amounted to £3,746,451, to the United Kingdom, £2,503,723, and to Sweden, £235,446.

3. **Shipping.**—A regular passenger and freight service operates between Australia and the Territory of New Guinea. Vessels trading between Australia and the East also call at Territory ports. Coastal and inter-island shipping services are maintained by vessels operating from the principal ports of the Territory. Some of these vessels are provided by the Commonwealth Government. Shipping within the Territory is regulated by the Shipping Ordinances 1951 and the Coastal Shipping, Ports and Harbours Regulations.

Main ports of call for oversea vessels are established at Lae, Madang and Finschhafen (mainland), Rabaul (New Britain), Kavieng (New Ireland) and Lorengau (Manus). Ports proclaimed under the Coastal Shipping Ports and Harbour Regulations for the service of local vessels are, in addition to the main ports above-mentioned, Salamaua, Wewak, Aitape and Wanimo (mainland), Gasmata and Talasea (New Britain), Namatanai (New Ireland), and Kieta and Buka Passage (Bougainville).

There are no prepared inland waterways. The natural river system is not generally suitable for vessels except those of small tonnage.

Prior to the 1939-45 War the annual average entrances and clearances of oversea vessels at ports of New Guinea amounted to about 240, and the aggregate net tonnage to 660,000 tons, about 80 per cent. being of British nationality. Oversea shipping in post-war years has not reached these figures, either in numbers or in tonnage, and in 1951-52 entrances numbered 91 with a net tonnage of 232,402 tons, and clearances 88; 228,721 net tons—total 179; 461,123 net tons, of which 77 per cent. was British.

4. **Other Forms of Transport and Communication.**—Means of communication on land are scanty. There are no railways. Roads lead from Rabaul to places within 30 or 40 miles, and there is a road 200 miles long in New Ireland and also a road 90 miles long from Lae to Wau in the Morobe District. The total mileage of roads in the Territory of New Guinea at 30th June, 1952 was 2,346, of which 770 were suitable for heavy traffic.

The discovery of gold in New Guinea resulted in great aviation activity in the vicinity of the gold-fields. On account of the mountainous country and dense undergrowth between the coast and the goldfields the task of transporting food and stores to the fields and of bringing the gold to the seaboard by land was an irksome and costly process. The fields are situated about 90 miles (40 by air) inland from Lae. Qantas Empire Airways Ltd. operates a regular service from Australia to Lae, Madang, Rabaul, Bulolo and Wau with extensions to Finschhafen, Torokina, Kavieng and Manus Island. Commercial aircraft operators located at Lae also maintain passenger and freight-carrying services to Wau, Bulolo, Mount Hagen, Kainantu, Goroka, Finschhafen, Madang, Wewak, Aitape, Maprik and Angorum. Charters are undertaken to other parts of the Territory as occasion arises. Further reference to New Guinea air activities is contained in Chapter V.—Transport and Communication.

A radio telephone trunk service has been installed linking Lae, Rabaul, Madang, Port Moresby and Samarai. Arrangements are being made to bring these stations into the oversea radio telephone circuit. Three zone or group centres for radio telephone communication have been established with the following associated stations:—Lae—12

associated stations; Madang—33; Rabaul—52. There were a total of 134 teleradio stations licensed in the Territory of New Guinea at 30th June, 1952, of which 22 were not operating.

### § 8. Revenue and Expenditure.

The principal sources of revenue for the Territory of New Guinea are the grant by the Commonwealth Government and customs duties. Total expenditure in 1951–52 amounted to £4,612,434, towards which the grant contributed £3,126,059 and customs duties, £1,000,284. The major groupings into which the various items of expenditure may be classed were in 1951–52 as follows:—Health, £987,465; district services and native affairs, £861,405; education, £300,155; justice, £301,757; agriculture, etc., £203,069; customs and marine, £148,558; forestry, £107,003; capital works and services, £871,473; maintenance, £447,742. Total expenditure in 1950–51 was £3,575,721. In 1938–39 revenue and expenditure each amounted to about £500,000, customs duties and royalty on gold constituting the major items of revenue and district services and native affairs the major items of expenditure.

For information on the finances of the combined Territory administration see Papua and New Guinea, § 2, p. 244.

### TRUST TERRITORY OF NAURU.

1. **General.**—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in latitude 0° 32' south of the Equator and longitude 166° 55' east of Greenwich. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that most of the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners and the Missions, the whole of the island is owned by individual natives. The temperature range is from 76° F. at night to 94° F. during the day and the average humidity about 80 per cent. Normally the rainfall is comparatively low for islands of the Pacific, the average for twenty years from 1920 to 1940 being 80.5 inches. However, falls as high as 181.76 inches during 1940 and as low as 12.29 inches during 1950 have been recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator, who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the Nauru Island Agreement Act 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, communications with Nauru ceased, and the island was occupied by Japanese forces. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947 the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This

Agreement designates the Governments of Australia, New Zealand and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement were given in Official Year Book No. 39, pp. 370-1.

4. **Administration.**—The administration of the island is vested in the Administrator, who is obliged to conform to instructions issued by the Government which appointed him. Until the Government of Australia ceases to exercise full powers of legislation, administration and jurisdiction in and over the Territory on behalf of the Administering Authority in pursuance of Article 4 of the Trusteeship Agreement, all ordinances made by the Administrator are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue and phosphate royalties. Native industries such as canoe-building, fishing, mat-making, etc., are encouraged by the provision of prizes at annual competitions. An agency of the Commonwealth Savings Bank has been established. There is a co-operative store managed to a large extent by the natives. The store books, however, are audited by Government officers. Natives are not allowed to carry or be in possession of firearms, and the use by them of intoxicating liquors and deleterious drugs is prohibited.

5. **Population.**—The Nauruan component of the population of Nauru numbered about 1,100 in 1921, but had grown to more than 1,800 before the Japanese invasion in August, 1942. In 1946 it numbered less than 1,400 but by 30th June, 1952 it had risen again to 1,672. Chinese have for many years formed a considerable part of the population of Nauru; their numbers increased, with some reversals of trend, from about 600 in 1921 to more than 1,500 before the 1939-45 War. After the war they increased from about 800 in 1946 to 1,491 in 1950, but in 1952 numbered only 759. Other Pacific islanders in the early 1920's numbered almost 300 persons, but not until recent years have they since numbered more than 40. The 1952 figure was 560. The European population after 1921 fluctuated, but with a generally upward trend, between one and two hundred persons, and in 1940 numbered 192. In 1948 it numbered 247 and in 1952 it was 253. The total population of Nauru at 30th June, 1952 was 3,244.

6. **Health.**—Cases of the usual diseases known in the Pacific occur. Venereal disease is rare, but elephantiasis is occasionally met with. An area has been set apart for the segregation of lepers, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30th June, 1952, was 50 of whom 9 were in segregation at the Leper Hospital. Two hospitals are maintained on the island, one by the Administration for Nauruans, and one by the British Phosphate Commissioners for their employees. In common with other natives, the Nauruans are very susceptible to tuberculosis and influenza, and in 1921 an influenza epidemic caused the deaths of 230 islanders. Dysentery, both amebic and bacillary, is endemic. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo a medical examination at intervals of three months. Baby clinics have been established to give help and advice to Nauruan mothers in regard to infant nurture.

7. **Education.**—Formerly the education of native children was undertaken by the missions, which were subsidized by the Administration, but the Administration assumed full responsibility for education on 1st October, 1923. There are eight primary schools and one secondary school for natives, together with one primary school for Europeans. At 30th June, 1952, 411 natives and 34 Europeans were enrolled in the primary schools, and 42 at the secondary school. A teacher, who is on loan from the Victorian Education Department, is in charge of the European school, but education is controlled by a Director of Education.

The curriculum is based on that used in Australian schools, and the teaching is generally in English. Education is compulsory for native children from six to sixteen years. At 30th June, 1952, 19 Nauruans were attending secondary schools in Australia, many as scholarship holders under the Nauru Royalty Trust Fund Scheme; 10 were

studying to be teachers, 2 to be doctors, 3 to be accountants and one each to be a chemist, a nurse, a native affairs officer and a home science teacher. In addition to these, there were two students at the Central Medical School, Suva, and two theological students in Australia. Altogether, 17 students were sponsored by the Administration, 2 by the missions and 4 by their own families.

8. **Judiciary.**—The judicial power is vested in the Administrator in a Central Court and a District Court. The right of appeal is provided.

9. **Religion.**—The London Missionary Society (Protestant) and the Sacred Heart of Jesus Mission (Roman Catholic) operate in Nauru.

10. **Phosphate Deposits.**—(i) *General.* From 1906 to 1919 the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island (about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity remaining on Nauru has been estimated at about 70,000,000 tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments in 1919 for £3,500,000, the purchase money being contributed in the proportions of 42, 42 and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by three British Phosphate Commissioners, one appointed by each Government; and the three countries are entitled to receive the output in the same proportions of 42, 42, and 16 per cent.

(ii) *Royalty on Phosphate.* Under a revised agreement between the British Phosphate Commissioners and the Nauruan landowners, an increased royalty of 1s. 4d. per ton of phosphate exported has been payable from 1st July, 1950, as follows:—

- (a) 6d. per ton to be paid to the Nauruan landowner concerned;
- (b) 3d. per ton to the Administrator for the benefit of the Nauruan people;
- (c) 2d. per ton to the Administrator to be held in trust for the Nauruan landowner concerned and invested at compound interest for a period of 20 years. The capital will then remain invested and the interest thereon will be paid to the landowner.
- (d) 5d. per ton to the Administrator to be held in trust for the Nauruan community and invested until the year 2000 at compound interest.

From 1st July, 1947 the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £45 per acre, with a minimum payment of £7 10s. for areas less than an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* Exports of phosphate from Nauru and Ocean Island in 1939-40 amounted to 1,243,428 tons, of which Australia received 54 per cent. and New Zealand 32 per cent. Following the interruption to production by the war in the Pacific, this figure was not exceeded until 1949-50 when 1,285,998 tons were exported (76 per cent. to Australia, 24 per cent. to New Zealand). Figures for 1951-52 are:—1,328,950 tons exported, 57 per cent. Australia, 43 per cent. New Zealand.

Receipts from sales of phosphate in 1939-40 amounted to £1,041,418, and the f.o.b. cost, including interest on capital sinking fund, etc., amounted to £1,037,208. In 1946-47 sales and costs each amounted to about £500,000, but they have since increased to more than £2,300,000. In 1951-52 receipts from sales, etc., amounted to £2,360,996, and costs, etc., to £2,338,320.

During the period of the Japanese occupation from August, 1942 to September, 1945, while waiting to resume activities at Nauru and Ocean Island, the Commissioners were engaged in meeting the phosphate requirements of Australia and New Zealand from other available sources. Reconstruction of equipment destroyed during the Japanese occupation is now completed and a programme of improvements and additions has been commenced.

The amount due by the British Phosphate Commissioners to the partner Governments for purchase-money and other capital sums was £3,666,457 on 30th June, 1921, and at 30th June, 1942, this had been reduced to £3,024,373. The partner Governments agreed

to a suspension of interest and sinking fund payments from 1st July, 1942, while operations at Nauru and Ocean Island were curtailed. Modified payments were resumed in 1946-47, pending a review of the position.

The review was carried out in 1950, as a result of which the revised capital indebtedness of the Commissioners to the partner Governments at 30th June, 1950 was determined at £3,881,711. Interest and sinking fund payments were resumed with effect from 1st July, 1950 on the basis of repayment of the revised capital indebtedness in 35 years.

(iv) *Employees.* Apart from a limited number of Europeans, the employees are Chinese and Pacific Islanders engaged under a one year's contract. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

(v) *Christmas Island Phosphates.* It may not be inappropriate to refer here to the phosphate deposits on Christmas Island in which the Australian Government is interested. The concession to work phosphate at Christmas Island, situated in the Indian Ocean near Java, had been held since 1897 by the Christmas Island Phosphate Company Limited, a private company incorporated in England.

The Australian and New Zealand Governments, jointly, have acquired the Company's interests and assets at Christmas Island as at 31st December, 1948.

The undertaking is controlled by a Board of Commissioners appointed by the Australian and New Zealand Governments. Phosphate is distributed by the British Phosphate Commissioners who have been appointed by the Board as its managing agents.

11. *Trade.*—The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider, and perry, and cylinder blocks for motor cycle engines. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt. The tariff rates apply to all countries alike. Imports into Nauru were valued at £192,749 in 1940, and exports (808,400 tons of phosphate) at £541,168. In 1951-52 imports were valued at £544,001, and exports (1,061,797 tons of phosphate) at £1,725,420. Of the total imports in 1951-52 Australia supplied £388,065 or 71 per cent.; the balance came mainly from the United Kingdom, New Zealand and China in that order.

In 1951-52, 592,675 tons of phosphate were exported to Australia, and 469,122 tons to New Zealand.

12. *Revenue and Expenditure.*—The revenue of the Administration has risen from £33,084 in 1939 to £90,414 in 1951-52, and expenditure from £29,391 to £146,742.

Of the revenue for the year ended 30th June, 1952, royalty on phosphate amounted to £56,701, post office and radio receipts, £4,967 and customs duties, £1,803. Main items of expenditure were salaries, £67,305, works and services, £45,426, and stores and materials, £24,140.

#### HEARD AND McDONALD ISLANDS AND MACQUARIE ISLAND.

On 26th December, 1947, by an exchange of notes with the United Kingdom Government, the United Kingdom sovereignty over the Heard and McDonald Islands was transferred to the Commonwealth of Australia. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard and McDonald Islands by the Heard and McDonald Islands Act passed 18th March, 1953.

At the end of 1947 an Australian scientific post was established on Heard Island and has been maintained as a scientific base since that date. The island party is relieved annually.

Heard Island lies 2,500 miles south-west of Fremantle in the South Indian Ocean, and is about 27 miles long and 13 miles wide. The McDonald Islands are 26 miles to the west of Heard. They are small, rocky and precipitous.

Macquarie Island, together with a few rocky islets nearby, has constituted a dependency of Tasmania since early in the 19th century.

In December, 1911, five members of the Australian National Antarctic Expedition landed on the island and remained there until 1915. On 3rd March, 1948, another party was landed to man a new base and this has been maintained as a scientific base since that date.

The island is 1,000 miles south-east of Hobart, and is 21 miles long and 2 miles wide.

## CHAPTER VIII.

### LABOUR, WAGES AND PRICES.

NOTE.—References in this chapter to the basic wage relate to the position prior to the announcement by the Commonwealth Court of Conciliation and Arbitration on 12th September, 1953, of its decision in the Basic Wage Inquiry, reference to which will be found in the Appendix to this volume.

#### A. RETAIL PRICES AND PRICE INDEXES.

##### § 1. General.

The information on retail prices and price indexes presented in this chapter is extracted from the annual *Labour Report* of the Commonwealth Bureau of Census and Statistics. For a full explanation of methods adopted and an analysis of problems involved see the detailed reference in Chapter I. of *Labour Report* No. 40, 1951.

The retail prices of the extensive range of commodities and services in common demand (generally referred to as the "regimen") used in compiling the "C" Series Retail Price Index have been ascertained at frequent and regular intervals since 1923 for each of the six capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year 1914 to 1922 for each of the six capital cities. The complete list of items covered by the retail price regimen is published in the annual *Labour Report*.

Retail prices of food and groceries and average rentals of houses for earlier years extending back to 1901 were collected by this Bureau, and in some cases have been recorded by the Statisticians of various States as far back as 1864.

##### § 2. Retail Price Indexes.

Two main series of retail price index-numbers are compiled and shown in some detail in the following pages, namely:—

- (i) the "B" Series Index relating only to food, groceries and housing, continuously available from 1907;
- (ii) the "C" Series Index relating to food, groceries, housing, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure, continuously available from 1914.

The "B" Series Index comprises only the food, groceries and housing sections of the "C" Series Index.

The "C" Series Index in total provides a reliable measure of aggregate variations in retail prices (as well as of group indexes for component sections) of a high percentage of goods and services used in wage-earner households. This index is compiled for—

- (a) the capital city of each of the six States,
- (b) four other principal towns in each of the six States,
- (c) weighted average of five towns (including the capital city) in each of the six States,
- (d) weighted average for the six capital cities combined,
- (e) weighted average for the thirty towns (including capital cities),
- (f) separate indexes for Warwick, Port Augusta, Whyalla and Canberra.

The "C" Series Index forms the basis of the "Court" Series Index used by the Commonwealth Court of Conciliation and Arbitration for the "cost of living" adjustments of wages prescribed by awards made by the Court. (See § 7, p. 273.)

### § 3. Retail Price Levels ("C" Series Index) 1914-1953.

The aggregate indexes for November, 1914, 1921 and the years 1929, 1939 and 1947 to 1952 for the Thirty Towns are published in summary form on page 270 of this chapter, while the following table furnishes the relevant index-numbers for the Six Capital Cities as a whole for certain significant dates since November, 1914—the earliest date for which this index is available.

#### "C" SERIES RETAIL PRICE INDEX-NUMBERS.

##### WEIGHTED AVERAGE OF SIX CAPITAL CITIES.

(Base : *Weighted Average of Six Capital Cities, 1923-27 = 1,000.*)

1914, November	..	..	..	687 (Beginning of War I.)
1918, November	..	..	..	905 (End of War I.)
1920, November	..	..	..	1,166 (Post-War peak)
1922, November	..	..	..	975 (Post-War trough)
1929, Year	..	..	..	1,033 (Pre-Depression peak)
1933, Year	..	..	..	804 (Depression trough)
1939, September Quarter	..	..	..	916 (Pre-War II.)
1943, March Quarter	..	..	..	1,123 (Pre-Price Stabilization)
1943, June Quarter	..	..	..	1,143 (War II. peak)
1945, September Quarter	..	..	..	1,126 (End of War II.)
1948, September Quarter	..	..	..	1,311
1950, September Quarter	..	..	..	1,572
1952, September Quarter	..	..	..	2,238
1953, June Quarter	..	..	..	2,293

The index reveals a rise of approximately 32 per cent. during the first world war, followed by a further rise of 29 per cent. in the two post-war years (November, 1918, to November, 1920). From November, 1920 to November, 1922, there was a fall of 16 per cent. and the index remained relatively stable until the onset of the depression in 1929. During the four years of the depression 1929 to 1933 the index fell by 22 per cent., rising thereafter steadily until 1939 when it was nearly 14 per cent. above the level of 1933, and approximately at the level it had occupied at the date of the Armistice of 1918. Between the outbreak of war (September, 1939) and March, 1943 (pre-price stabilization) the index rose by approximately 23 per cent. to a level slightly below that reached at the height of the post-war boom in 1920. Compared with the March Quarter, 1943, the index-number at the close of the war was practically unchanged.

Immediately after the outbreak of the war price control was established by the Government under Regulations dated 28th September, 1939, and a national policy of price stabilization was applied as from 12th April, 1943, backed by more stringent price control and price subsidies. The retail price level, as measured by the index, remained relatively steady throughout 1944 and 1945 at the level of March, 1943. This stabilized level was approximately 23 per cent. above that of 1939 and 63 per cent. above the level prevailing at the beginning of the first world war in 1914. After June Quarter, 1946, war-time controls, subsidies, etc., were progressively modified and by the end of 1948 and early 1949 had been virtually eliminated. Price control was transferred from Commonwealth to State Authorities in September, 1948. In the latter part of 1950 export prices (especially for wool) rose very substantially and have remained relatively

very high. In December, 1950, the Commonwealth Court of Conciliation and Arbitration raised the basic wage by approximately 14 per cent. Concurrently, public works expenditure and private investment rose to very high levels.

The movement in the various groups of the index and in the index as a whole for each year for which it has been compiled is shown in the following table for the six capital cities combined :—

**"C" SERIES RETAIL PRICE INDEX AND ITS "GROUP" INDEX-NUMBERS(a)**  
**FOR THE SIX CAPITAL CITIES COMBINED, 1914 TO 1952.**

(Base of Each Group : Weighted Average of Six Capital Cities, 1923-27 = 1,000.)

Period.	Food and Groceries.	Rent (4 and 5-Rooms). (b)	Food, Groceries and Rent (4 and 5-Rooms) ("B" Series).	Clothing.	Miscellaneous.	Total "C" Series Index.
1914 (c)	641	649	644	754	749	687
1915 (c)	842	659	777	792	786	782

1951..	2,041	1,009	1,634	2,749	1,679	1,883
1952..	2,526	1,057	1,947	3,096	1,958	2,196
1952—March Quarter	2,404	1,023	1,860	2,992	1,828	2,098
June "	2,567	1,041	1,966	3,099	1,949	2,206
September "	2,592	1,070	1,992	3,115	2,018	2,238
December "	2,542	1,094	1,971	3,177	2,035	2,243

(a) "Group" or "Sectional" index-numbers in the various tables in this chapter cannot be compared with each other in order to show the relative cost of Food and Groceries, Housing, Clothing or Miscellaneous requirements, since each "Group" or "Section" (or combination thereof) has its own Base = 1000, viz.—the weighted average cost for the Six Capital Cities as a whole during the five-yearly period 1923-27 for that "Group" or "Section". (b) Rent.—The rent index-numbers shown in the tables in this publication measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. They are "price" indexes in the strict sense, i.e., they are designed to measure only the "price" element in rent fluctuations. Similarly, "average rents" where shown are indexes of "price" changes in rentals expressed in terms of pence. They are not the average of rents actually paid by all tenants of 4 and 5-roomed houses. It would be inappropriate to include the average of rents actually paid in an index price designed to measure price changes only. The average of rents actually paid is ascertained periodically by Census methods—see also pages 32 and 33 of Labour Report, No. 40. Rentals of new tenanted houses completed since the end of the war are not taken into account. (c) November.

### § 4. Increases in Retail Prices in Recent Years.

1. **Australia.**—The following statement shows, for the six capital cities combined, the percentage increases which have taken place between specified dates in respective groups included in the "C" Series Retail Price Index.

#### "C" SERIES RETAIL PRICE INDEX : WEIGHTED AVERAGE FOR SIX CAPITAL CITIES.

##### A. PERCENTAGE INCREASES IN GROUP INDEXES, AND IN INDEX AS A WHOLE.

The following table shows, for the six capital cities combined, the percentage increases in the "C" Series Retail Price Index as a whole, and in the prices of items in each group considered as a group, between the dates specified :—

Period.	Aggregate "C" Series Index.	Food and Groceries Group.	Rent Group.	Clothing Group.	Miscel- laneous Group.
	%	%	%	%	%
Sept. Qtr. 1939 to Sept. Qtr. 1945	22.9	13.0	0.8	69.3	20.8
Sept. Qtr. 1945 to Sept. Qtr. 1948	16.5	22.5	0.4	25.6	9.4

Sept. Qtr. 1950 to Sept. Qtr. 1952	42.4	63.8	8.4	34.5	40.9
Sept. Qtr. 1952 to June Qtr. 1953	2.5	0.5	6.1	4.2	1.6
Sept. Qtr. 1939 to June Qtr. 1953	150.3	183.2	17.4	288.3	113.4

##### B. CONTRIBUTION OF EACH GROUP TO THE PERCENTAGE INCREASE OF THE TOTAL INDEX.

The following table dissects the percentage increases in the aggregate "C" Series Retail Price Index in such a way as to show the component parts of such increases due to the rise in each of the four main groups of the index :—

Group.	Sept. Qtr. 1939 to Sept. Qtr. 1945.	Sept. Qtr. 1945 to Sept. Qtr. 1948.	Sept. Qtr. 1948 to Sept. Qtr. 1950.	Sept. Qtr. 1950 to Sept. Qtr. 1952.	Sept. Qtr. 1952 to June Qtr. 1953.	Sept. Qtr. 1939 to June Qtr. 1953.
	%	%	%	%	%	%
Food and Groceries ..	4.7	7.5	8.5	23.1	0.2	66.3
Rent ..	0.2	0.1	0.1	1.2	0.7	4.2
Clothing ..	13.9	7.1	9.0	11.2	1.3	57.8
Miscellaneous ..	4.1	1.8	2.3	6.9	0.3	22.0
Total ("C" Series Index) ..	22.9	16.5	19.9	42.4	2.5	150.3

This table shows that rises in prices of clothing caused the aggregate of the index to rise by 13.9 per cent. in the six years September Quarter, 1939 to September Quarter, 1945. Increased prices of food and groceries caused the aggregate "C" Series Index to rise by 4.7 per cent. For other groups, the corresponding contributory increases were :— in the miscellaneous group 4.1 per cent. and in the rent group 0.2 per cent., making a total increase of 22.9 per cent. in the aggregate "C" Series Index. Following the corresponding lines across the table it is evident that the rise in prices of food and groceries has become the major cause of the rise in the aggregate "C" Series Retail Price Index since September Quarter, 1950.

2. *International Comparisons.*—The following table shows the increase in recent years in Australia and certain other countries.

**RETAIL PRICE INDEX-NUMBERS.**

(a) Food, Rent and Miscellaneous Expenditure. (b) Quarterly indexes appear in preceding issues. (c) War-time Index linked to former series. (d) New series (Base : 17th June, 1947 = 100), commencing from September Quarter, 1947. (e) Consumers' Retail Price Index from March Quarter, 1949, onwards. Index-numbers for earlier periods (shown for purposes of comparison) are obtained by linking the movement in the Retail Price Index (base 1926-30) with the new index.

During the second world war most of these countries introduced price control measures at an early stage and these became more stringent as the war progressed, culminating in a policy of price stabilization.

Immediately after the outbreak of war in September, 1939, the Commonwealth Government took steps to control prices, and, by proclamations issued from day to day, pegged prices of various commodities at those ruling on 31st August, 1939. The National Security (Prices) Regulations, proclaimed on 28th September, 1939, under the authority of the National Security Act, established the basic principles of war-time price control, provided for the appointment of a Commonwealth Prices Commissioner and conferred upon him extensive powers to control the price of goods declared for that purpose by the Minister for Trade and Customs. Further reference to this control appears on page 279.

### § 5. Relative "Aggregate Expenditure" of Items and Groups.

In the *base period* of the index (the years 1923 to 1927) the relative importance of each of the four main groups expressed as a percentage of the weighted average "aggregate expenditure" in the six capital cities (from which all relative index-numbers are derived) was as shown in the third column of the following table. Although the "weights" of each item in the regimen are kept virtually constant the relative "aggregate expenditure" of the various items and groups varies from time to time as relative prices change.

The percentage distribution of the weighted average "aggregate expenditure" in the six capital cities for December Quarter, 1952, is shown in the fourth column of the table for comparison with that of the *base period*.

Group.	Section.	Proportion of "Aggregate Expenditure".

### § 6. Tabular Statements of Retail Price Index-Numbers.

1. **General.**—The results of inquiries into price movements are available as follows :—

(i) *Monthly.* The *Monthly Review of Business Statistics* contains annual, quarterly and monthly index-numbers to the latest available date.

(ii) *Quarterly.* A statement is issued about three weeks after the end of each quarter giving the "C" Series index-numbers for that quarter and immediately preceding quarters in respect of each of the 30 cities and towns originally adopted and for certain other towns, e.g., Canberra, for which the "C" Series index-numbers are now compiled. The *Quarterly Summary of Australian Statistics* contains annual, quarterly and monthly index-numbers to the latest available date. This publication also contains the average prices of the items of food and groceries for each month of the last available quarter, in the 30 towns covered by the investigation. Particulars of movements in certain average rents of 4 and 5-roomed houses in these towns are also shown therein.

(iii) *Annual.* The *Labour Report* contains index-numbers for past years, and the monthly and quarterly results for recent years. The average prices for the last year of the items of food and groceries and house rents are also published in this report.

2. **"C" Series Retail Price Index.**—On page 265 is published a table of "C" Series index-numbers for the weighted average of the six capital cities combined, together with index-numbers for each of the four main groups of items in the "C" Series Index for each year 1914 to 1952 and quarterly for the year 1952.

In the pages immediately following are published :—

- (i) the "C" Series index-number for the last quarter of each year 1939 and 1948 to 1952 (page 269) for each capital city and for the six capital cities combined, and showing also separate indexes for each of the four main groups of items; and
- (ii) the "C" Series index-number for November, 1914 and 1921 and the years 1929, 1939 and 1947 to 1952 (page 270) for each of the 30 towns, with the weighted averages for each State, the six capital cities and 30 towns, and index-numbers for the same periods for four additional towns for which this index is tabulated.

(e) Zeehan. (f) Beaconsfield. (g) Not included in weighted averages above.

3. "B" Series Retail Price Index: Food, Groceries and Rent.—This index measures the prices of food and groceries and the rent of 4 and 5-roomed houses. It was first compiled for the year 1925, and retrospectively for several earlier years. It was designed to replace the "A" Series Index (food, groceries and rent of all houses), which was the original index compiled in 1912. The first of the two tables following is split up into the various sections of the regimen, and covers only the six capital cities, while the second

represents the whole regimen and covers the 30 towns included in the tabulation of the "B" Series Index, with the weighted averages for the 5 towns in each State, the six capital cities and the 30 towns.

**RETAIL PRICE INDEX-NUMBERS(a) : CAPITAL CITIES—"B" SERIES.**

## § 7. Retail Price Indexes and Basic Wage Variations.

Two distinct procedures are adopted by the Commonwealth Court of Conciliation and Arbitration in fixing and varying basic or living wages as follows:—

- (i) The Court periodically fixes the amount of wage in the light of evidence submitted by parties appearing before it. Such evidence usually covers a wide range of facts as to economic conditions

- (ii) Having determined the amount of basic wage the Court further determines whether or not it shall be subject to automatic adjustment for changes in price level and, if so, by what method such *variation* shall be made. This again is decided in the light of evidence and of representations by the parties concerned.

The "C" Series Index is used by the Court to derive the "Court" series of retail price index-numbers upon which the basic portion\* of the wages prescribed in awards is *varied* automatically for changes in price levels quarterly, half-yearly or yearly. These are commonly referred to as "cost of living adjustments" although in fact they relate only to that part of the *change in cost of living* which is due to variations in prices. The Court itself determines from time to time at public sittings the amount of the basic wage, having regard to evidence submitted in relation to other aspects of "cost of living" and other relevant considerations. In fixing the amount of the basic wage the Court does not have regard to either the regimen used in compiling the retail price index or the cost of such regimen. The regimen of the index would not be suited to such a purpose.

The considerations upon which the basic wage is fixed are set out in successive judgments of the Court and briefly summarized in Chapter III. (§ 4) of the *Labour Report*. On this matter, reference should be made to the Basic Wage Judgments of the Court, particularly those of 1934, 1937, 1941 and 1950, and to the general statement of principles set out in the judgment on the "Munition Workers' Case" of 1943. Certain State industrial tribunals use the index-numbers directly for automatic or quasi-automatic adjustments of the rates of wages determined by them as tribunals, while some State tribunals have regard to the index-numbers and other factors in considering what "cost of living" variations they should make in rates of wages.

The use of indexes by industrial authorities for purposes of adjusting rates of wages for changes in price level is a practice of long standing, dating in the case of the Commonwealth Court of Conciliation and Arbitration, for example, back to the year 1913. The tribunals form their own judgment as to relevance of the indexes to their purposes, and periodically hear the representatives of employers and employees on the issues involved, including questions as to whether the index is satisfactory for the purposes to which it is applied by the tribunal. In such proceedings the Statistician or his officers are called at times as witnesses on questions of fact and technical matters relating to the indexes.

The automatic adjustments in wages prescribed in awards of the Court on the basis of retail price index-numbers are sometimes referred to as "cost of living" adjustments and the index is popularly referred to as a "cost of living index". This at times creates misconceptions as to the nature of the retail price index since the term "cost of living" connotes not only change in cost of living due to changes in prices, but also changes in cost of living due to changes in standard of living. Beyond that, use of the term "cost of living index" sometimes creates the erroneous impression that the retail price index purports to embrace all that should be included in a desirable standard of living. The "C" Series Index is a retail price index of specific meaning. The regimen or list of items, on which the index is based, is representative of a high proportion of the expenditure of wage-earner households. While this statement remains broadly true, it relates (in the circumstances of 1951 and 1952) more specifically to what may be termed the basic wage portion of wage-earner expenditures. The index has hitherto been used by industrial tribunals to provide automatic adjustments in the basic wage itself and, until December, 1950, in a basic wage which did not vary very much in real terms of purchasing power in relation to "C" Series units. In 1950 and especially in 1951 various factors produced both a steep rise in prices and an increasingly wide dispersion of price movements as affecting consumer expenditures on items within and without the index. Although the

\* The "needs" portion only was adjustable from July, 1937, to December, 1950.

rise in some prices became less accentuated in 1952, disparate price movements continued. There arose concurrently a tendency to assume, without inquiry, that the index (constructed primarily to measure the incidence of price changes on expenditures from incomes at or about basic wage level) is equally applicable to such diverse matters as measuring the changing incidence of price variations on secondary or marginal portions of wages, on total wages or on total incomes in groups considerably higher than the basic wage, and even on money settlements in some business transactions. While such assumptions may be reasonably reliable during periods in which all prices tend to move together, they should not be made at any time without due inquiry and particularly not in periods when price movements are very marked and are subject to wide dispersion.

Reference should be made to *Labour Report* No. 40 for the actual Automatic Adjustment Scales used for the adjustment of the Commonwealth basic wage.\*

## B. WHOLESALE PRICES AND PRICE INDEXES.

### § 1. General.

Two indexes of wholesale prices have been compiled by the Commonwealth Bureau of Census and Statistics. These are :—

- (i) The Melbourne Wholesale Price Index ;
- (ii) The Wholesale Price (Basic Materials and Foodstuffs) Index.

Particulars of the Melbourne Wholesale Price Index, which is now obsolescent, are given in § 3 commencing on page 276 of this chapter.

After reviewing the regimen and weighting of this index the 1930 Conference of Statisticians resolved that a new index of wholesale prices of basic materials and foodstuffs should be compiled. This index—the Wholesale Price (Basic Materials and Foodstuffs) Index—which extends back to the year 1928 and is compiled monthly, is a special purpose index and one of a series of Wholesale Price Indexes designed for special purposes.

### § 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

1. *Price Quotations.*—The prices used in the index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and in respect of imported materials as nearly as may be at the point where they first make effective impact on the local price structure. Thus the price of imported goods is not taken at the time of import, but rather on an ex-bond (or into factory) basis.

\* See footnote on p. 273.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX. 275

Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950-51 wool for local manufacture was subsidized, and the home-consumption price for wool was used to calculate the index-numbers shown in the table in paragraph 4.

2. **Commodities and Grouping.**—For purposes of this index "basic" materials (as opposed to certain of the Foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The regimen comprises 80 commodities, divided into seven main groups. Each group is sub-divided into goods which are mainly imported, and goods which are mainly home-produced. The percentage of the "aggregate expenditure" in 1950 contributed by each group is shown in the following table :—

Group.	Percentage Value-Weight, 1950.		
	Principally Imported.	Principally Home Produced.	Total.
Metals and Coal .. .. .	0.05	15.51	15.56
Oils, Fats and Waxes .. .. .	10.90	0.24	11.14
Textiles .. .. .	1.10	5.11	6.21
Chemicals .. .. .	1.18	2.77	3.95
Rubber and Hides .. .. .	1.17	0.68	1.85
Building Materials .. .. .	5.07	4.31	9.38
Foodstuffs and Tobacco .. .. .	12.31	39.60	51.91
All Groups .. .. .	31.78	68.22	100.00

A full list of the commodities in the regimen, showing the quantity-multipliers (weights) for each commodity and the percentage of the total aggregate value in 1950 contributed by each commodity and group, is set out on page 395 of Official Year Book No. 38.

3. **Method of Construction.**—The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928-29 to 1934-35 inclusive. Changes in usage, changes of category as between "imported" and "home-produced" as affecting some commodities, and changes in the industrial structure have affected the validity of some of the weights in the index. These and other problems (e.g., dual prices for some commodities) are being examined with a view to revision of the regimen, its grouping and weighting, when conditions are more stable.

4. **Index-numbers.**—Index-numbers for each group of commodities and for all groups combined for the index of wholesale prices of basic materials and foodstuffs are given in the following table. Current index-numbers, on the base: Average of three years ended June, 1939 = 100, are published in the *Monthly Review of Business Statistics*, and a table showing index-numbers computed to the base 1928 = 100 was published on page 47 of *Labour Report* No. 40, 1951.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX-NUMBERS.

(a) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally.

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

### § 3. Melbourne Wholesale Price Index.

1. **General.**—An index of Melbourne wholesale prices was first computed in 1912. It relates chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the component items of the regimen, nor the weighting have been varied. Consequently, the index is outmoded for current use and is a measure of variations in wholesale prices based on the weighting originally determined. It has some historic significance as a measure of changes in the prices of its component items combined in the proportions in which they were in common use about the year 1910. It is now published only on an annual basis and is mainly used as an approximate indication of long term trends since the year 1861, for which it was first compiled. A description of the index and a list of the commodities included in it were published on pages 43 to 45 of *Labour Report* No. 38 for 1949.

## WHOLESALE AND RETAIL PRICES, NOMINAL, AND EFFECTIVE OR REAL WAGES - INDEX-NUMBERS AUSTRALIA, 1911 to 1952

(BASE OF EACH SERIES: YEAR 1911 = 1,000)

EXPLANATION.—The index-numbers in the graph above are for the Six Capital Cities as a whole, with the exception of those for Wholesale Prices up to the fourth quarter of 1927, which are for Melbourne. The wholesale prices graph shows the trend of prices according to the "old" Melbourne Index up to the fourth quarter of 1927, but thereafter, this index having been "spliced" with the Basic Materials and Foodstuffs Index, the curve line moves in accordance with the variations of the latter. The price quotations for this index are, in the main, obtained from Melbourne sources, but their movements may be taken as representative of fluctuations in most Australian markets. For the period 1911-1914 the "C" Series index-numbers are taken back from the true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of All Houses). Real wages are computed on the basis of the "C" Series Retail Price Index.

2. Index-numbers.—Index-numbers for each group of commodities as well as for all groups combined are shown in the following table :—

### MELBOURNE WHOLESALE PRICE INDEX-NUMBERS.

(Base of each Group : Year 1911 = 1,000.)

Year.	I. Metals and Coal.	II. Wool, Cotton, Leather, etc.	III. Agri- cultural Produce, etc.	IV. Dairy Produce.	V. Gro- ceries.	VI. Meat.	VII. Building Ma- terials.	VIII. Chemicals.	All Groups.
1861..	1,438	1,381	1,583	1,008	1,963	..	1,070	2,030	1,538
1871..	1,096	1,257	1,236	864	1,586	..	1,044	1,409	1,229

1931..	1,826	1,040	1,121	1,398	1,794	1,512	2,025	2,166	1,420
1941..	1,960	1,402	1,721	1,554	1,883	1,776	3,138	2,527	1,796
1948..	2,829	3,619	2,383	2,104	2,435	2,976	4,631	3,180	2,824
1949..	3,502	3,066	2,876	2,300	2,558	3,356	4,611	3,221	3,191
1950..	3,902	3,464	3,155	2,459	2,829	4,616	(a) 5,567	3,263	3,816
1951..	3,080	7,943	4,512	2,930	2,850	6,438	(a) 7,074	3,294	5,098
1952..	6,481	7,365	5,038	4,024	3,455	6,289	(a) 9,338	3,723	5,647

(a) The regimen and weighting of the original Building Materials group of this index have become unreal. The movement shown here for this group between 1949 and 1952 has been calculated in accordance with the movement occurring in the Building Materials group of the Basic Materials and Foodstuffs Index.

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

### C. CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR.

1. General.—An account of the measures taken by the Commonwealth Government to control prices from September, 1939 (immediately after the outbreak of war), until 29th May, 1948 (the date of the Prices Referendum), is given in Official Year Book No. 37, pp. 458-464.

2. Transfer of Price Control to the States.—Consequent upon the rejection of the proposal embodied in the Prices Referendum held on 29th May, 1948, that permanent power to control rents and prices (including charges) be conferred on the Commonwealth Government, responsibility for price fixation was assumed by the State Governments and steps were taken to pass State Prices Acts. These acts were proclaimed to operate simultaneously on 20th September, 1948. Except in the case of Queensland, each Act was to remain in force for a specific period, but the period varied from State to State.

An amendment of the National Security (Prices) Regulations on 15th September, 1948, provided that the Minister may, by declaration published in the *Gazette*, declare that from and including a date specified prices for the sale of goods and rates for the supply of services in a State or Territory of the Commonwealth specified in the declaration shall cease to be controlled under the Regulations. In pursuance of this power, the Minister for Trade and Customs issued declarations on 17th September, 1948, providing for the relinquishment of price control by the Commonwealth in the States as from 20th September, 1948.

On 20th September, 1948, each State Government issued declarations covering uniform lists of goods and services, which were brought under price control. Existing Commonwealth Prices Regulation Orders continued to apply to these goods and services until specially varied in accordance with the terms of the State legislation. At the same time, the Commonwealth Government issued an identical list of declared items to operate in the Australian Capital Territory and other Territories of the Commonwealth.

In the operation of State price control, the State Prices Commissioners closely collaborate. Conferences of Commissioners are held at intervals of approximately two months. The Commissioners are vested with certain powers of price control under the Prices Acts, and it is the usual procedure after the administrative conference for State Prices Ministers to meet to discuss matters of policy and any specific questions referred to them for determination. Thus a large degree of uniformity is attained in controlling and decontrolling items and in the fixation of margins and prices of major items.

3. **Price Stabilization.**—Expenditure by the Commonwealth Government on Price Stabilization Subsidies reached a peak in 1947-48 and since then the Commonwealth Government has progressively reduced the range of commodities eligible for subsidy.

In addition to those subsidies which had been an integral part of the Price Stabilization Plan, the Commonwealth Government paid bounties and subsidies for assistance to primary production, and these payments also had a stabilizing influence on prices.

For details of expenditure by the Commonwealth Government on Price Stabilization and other Subsidies and Bounties, see Chapter XVII.—Public Finance.

## D. WAGES.

### § 1. Arbitration and Wages Board Acts and Associated Legislation.

1. **General.**—Particulars regarding the operation of Commonwealth and State Laws for the regulation of wages, hours and conditions of labour were first compiled for the year 1913, and reviews to the end of each annual period appear in issues of the *Labour Report* up to and including No. 36 and of the *Quarterly Summary of Australian Statistics* up to and including No. 190 and in previous issues of the Official Year Book (see No. 37, p. 465).

2. **The Commonwealth Conciliation and Arbitration Tribunal.**—Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to "conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State". The Parliament has made such a law, namely, the Conciliation and Arbitration Act.

This Act defines "an industrial dispute" as a "dispute (including a threatened, impending or probable dispute) as to industrial matters, which extends beyond the limits of any one State and a situation which is likely to give rise to a dispute as to industrial matters which so extends". Such disputes are dealt with, in part, by a Court constituted under the Act, and otherwise by Conciliation Commissioners appointed under the Act. At the present time, the Court comprises a Chief Judge and six other Judges, whilst there is a Chief Conciliation Commissioner and fifteen other Conciliation Commissioners.

The Court deals with industrial disputes insofar as they concern the standard hours of work in an industry, the basic wage for both adult males and adult females and questions relating to long service leave with pay, but all other matters in dispute are dealt with by a Conciliation Commissioner. There is, however, provision for a Conciliation Commissioner to refer any dispute or any part of a dispute to the Court for determination, but a Conciliation Commissioner is only entitled to so refer a matter if he is of the opinion, and if the Chief Judge concurs in that opinion, that the matter is one of such importance that, in the public interest, it should be dealt with by the Court.

In addition to the functions outlined above, the Act empowers the Court to make orders concerning the interpretation, and relating to the enforcement, of orders and awards. The Act also makes provision for the registration of associations of employees and employers, and certain powers in connexion therewith are, by the Act, given to the Court.

Although, in certain circumstances, there is a right of approach to the High Court with respect to decisions of the Court, the circumstances are very limited, and, for practical purposes, it can be said that decisions given by the Court are final. Decisions given by a Conciliation Commissioner, however, may be made the subject of appeal to the Court (i.e., the Court of Conciliation and Arbitration) provided the party desiring to appeal can satisfy the Chief Judge, by way of application for leave to appeal, that the order or award the subject of the application deals with a matter of such importance that leave to appeal should, in the public interest, be granted.

Whilst many of the minor powers of the Court may be exercised by a Court constituted by one Judge, in all major matters, e.g., questions relating to the basic wage, standard hours of work, long service leave, applications concerning registered organizations and also appeals from orders or awards made by Conciliation Commissioners, the Court must be constituted by at least three Judges one of whom may be the Chief Judge.

Prior to 1947, there was no division of work as between the Court and Conciliation Commissioners, a dispute being dealt with by either one or other part of the Tribunal, with the exception that questions relating to the basic wage and standard hours could only be dealt with by at least three Judges of the Court sitting together. There was also, at that time, a right of appeal to the Court against a decision of a Conciliation Commissioner. The amending Act of 1947 brought about the division of work between the two parts of the Tribunal, and, at the same time, made decisions of Conciliation Commissioners final. However, a further amending Act passed in 1952 altered the position regarding finality of decisions of Conciliation Commissioners, and provided a right of appeal, in the circumstances set out above, to the Court against any such decision.

3. **State Industrial Tribunals.**—In each State, Industrial Tribunals have been established to regulate and arbitrate in industrial matters. The chief of these are the Industrial Commission of New South Wales, the Industrial Courts of Queensland and South Australia, and the Western Australian Court of Arbitration, together with Wages Boards for specific industries or occupations which operate in Victoria, South Australia and Tasmania. Further details concerning the functions and powers of these authorities may be found in *Labour Report* No. 40, page 54.

## § 2. Rates of Wage and Hours of Labour.

1. **General.**—The collection of information respecting the current rates of wage payable in different callings and in occupations in various industries was first undertaken by this Bureau in the early part of 1913. The particulars are obtained primarily from awards, determinations and agreements under Commonwealth and State Industrial Acts, and are therefore the minimum rates prescribed. They refer generally to the capital city in each State, but in industries which are not carried on in the capital cities, e.g., mining, agriculture, etc., the rates in the more important centres are taken. In cases where no award, determination, or agreement is in force, particulars are taken of the ruling union or predominant rate. During recent years the number of predominant rates of wage included in the tabulations has been reduced considerably, as most of the industries and occupations are now covered by awards, determinations, or industrial agreements. The statistics of nominal wages and hours of labour are in course of revision to meet changes in industrial structure. The amounts should not be regarded as actual current average, but as an index of changes expressed in money and hour terms.

The index-numbers for male adult workers are computed with the weighted average wage in 1911 as base (= 1,000). In the case of females, however, it has not been possible to secure information for the years prior to 1914, and the index-numbers are therefore computed with the weighted average rate of wage payable to adult female workers in Australia at 30th April, 1914 as base (= 1,000).

An extensive tabular presentation of the minimum rates of wage for adult male and female workers in the main occupations in the capital city of each State is given each year in the Appendix to the *Labour Report*.

2. *Weekly Rates of Wage, 1939 and 1947 to 1952.*—(i) *General.* The average rate of wage for each industrial group is computed by taking the arithmetic average of the rates of wage payable for all classified occupations within that group. These averages are weighted to give the average for the States and for Australia.

(ii) *Adult Males—States.* The following table gives the weighted average nominal weekly rates of wage payable to adult male workers at the dates specified:—

### WEEKLY WAGE RATES : ADULT MALES, STATES.

31st December, 1952 ..	5,555	5,354	5,224	5,356	5,553	5,388	5,428

(a) The statistics of nominal wages and hours of labour are in course of revision to meet changes in industrial structure. The amounts shown should not be regarded as actual current averages but as an index of changes expressed in money and hour terms.

(b) As at 31st December, 1952.

During the early war years nominal weekly wages advanced annually in each State, the greatest increase occurring in 1942 (11 per cent. for Australia), followed by an increase of 3 per cent. in the following year, after which they remained comparatively stable until the fourth quarter of 1946 when they advanced 5.4 per cent. mainly as a result of the increase in the "needs" wage granted by the Commonwealth Court of Conciliation and Arbitration in its judgment of 13th December, 1946. With the relaxation of the Wage Pegging Regulations and the end of Price Stabilization wages rose rapidly during 1947 and subsequent years. At the end of 1950 the upward movement was accelerated as a result of the Basic Wage increases which followed the 1949-50 Basic Wage Inquiry (see page 292).

Male wages at 31st December, 1952, were 192.0 per cent. higher than in December, 1939, and 53.1 per cent. higher than in September, 1950.

(iii) *Adult Males—Industrial Groups.* The following table shows for Australia the average weekly rates of wage and index-numbers in each industrial group and for all groups at the dates specified.

WEEKLY WAGE RATES : ADULT MALES, INDUSTRIAL GROUPS.

WEIGHTED AVERAGE NOMINAL WEEKLY RATES FOR A FULL WEEK'S WORK (EXCLUDING OVERTIME) AND INDEX-NUMBERS OF WAGE RATES IN EACH INDUSTRIAL GROUP.(a)

NOTE.—Index-numbers for each industrial group and for all industrial groups are based on the average wage for all groups in 1911 (51s. 3d.) = 1,000. The index-numbers in this table are comparable throughout:—

(a) See note (a) on page 282. (b) Includes the value of victualling and accommodation, where supplied. (c) Includes the value of board and lodging, where supplied.

The foregoing table shows that the highest average weekly wage at 31st December, 1952, was recorded in Group V. (Books, Printing, etc.), 305s. 5d. per week, followed by Groups XI. (Shipping, etc.), 303s. 1d., XII. (Agriculture, etc.), 300s. 11d., VII. (Building), 293s. 11d., VIII. (Mining, etc.), 281s. 8d., IV. (Clothing, Textiles, etc.), 273s. 6d. and III. (Food, Drink, etc.), 271s. 5d. The lowest average rate was recorded in Group XIII. (Domestic, etc.), 255s. 8d. Compared with those prevailing at 31st December, 1951, rates of wage increased in all industrial groups during 1952.

(iv) *Adult Females—States.* The following table shows the weighted average nominal weekly rates of wage payable to adult female workers for a full week's work, in each State and Australia at the dates specified.

(a) See note (a) to table on page 282.

(b) As at 31st December, 1952.

It should be noted that the base of these index-numbers is 1914 and not 1911 as in the foregoing tables for adult males. This is because there is no tabulation for adult female rates prior to 1914.

As with the rates for males, increases were recorded in all States during the war years and after, especially after September, 1946 when female rates were increased under the National Security (Female Minimum Wage) Regulations. The weighted average rate for Australia at 31st December, 1946, had advanced by 37s. 4d. per week over that ruling on 31st December, 1933. Female rates have risen rapidly since September, 1950, partly because of the increase in marginal rates but mainly because of the increase in the female basic wage rates. The weighted average rate for Australia at 31st December, 1952 (193s. 5d.) was the highest recorded to that date and was 267.2 per cent. above the average at 31st December, 1939, and 64.2 per cent. above the average at 30th September, 1950.

(v) *Adult Females—Industrial Groups.* The following table shows the weighted average weekly rates of wage payable in Australia to adult female workers in the industrial groups in which they are mainly employed, and in all groups combined.

(a) See note (a) to table on page 282.

(b) Includes the value of board and lodging, where supplied.

During 1952 the rate of wage per week for female employees in each industrial group increased as follows:—III. (Food, etc.), 22s. 6d.; IV. (Clothing, etc.), 22s. 11d.; I, II, V. and VI. (all other manufacturing), 23s. 8d.; XIII. (Domestic, etc.), 22s. 8d. and XIV. (Miscellaneous), 24s. 0d. The weighted average for all groups increased by 23s. 1d. per week.

3. Weekly and Hourly Rates of Wage and Weekly Hours of Labour, 1939 and 1947 to 1952.—(i) *General.* The rates of wage referred to in preceding paragraphs are the minima payable for a full week's work. The number of hours constituting a full week's work differs, however, in some instances between various trades and occupations in each State, and between the same trades and occupations in the several States. To secure what may be for some purposes a better comparison, the results in the preceding paragraphs are reduced to a common basis, namely, the rate of wage per hour. The particulars given in the following table relate to (a) the weighted average nominal weekly wage; (b) the weighted average number of working hours constituting a full week's work; and (c) the weighted average hourly wage. The weighted average weekly wage relates to all industrial groups combined and includes the value of board and lodging where supplied in land occupations, and the value of victualling and accommodation where supplied in marine occupations, whereas the number of working hours and the hourly wage relate to all industrial groups other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Some of the occupations included in these groups are of a casual or seasonal nature, and the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or otherwise, hence the necessary definite particulars for the computation of the average number of working hours are not available.

The downward tendency in hours of labour for Australia commenced in the December quarter of 1924, when the weighted averages were 46.66 for males and 46.02 for females, and, except for slight increases in 1929 and 1930, the reduction has continued. During the second half of 1947 hours for males and females in New South Wales were reduced owing to the introduction of the forty-hour week in occupations under the jurisdiction of State arbitration. In Australia generally, the forty-hour week operated from 1st January, 1948 and was responsible for substantial reductions in hours in that year. The weighted averages for Australia at 31st December, 1952 were 39.95 hours for males and 40.00 hours for females. More detailed information relating to the progressive reduction in working hours may be found in *Labour Report* No. 40, page 71.

(ii) *Adult Males and Females.* Particulars of the weekly and hourly wages and hours of labour for adult males and females at the close of the years 1947 to 1952 compared with 1939 are given in the table hereunder.

(a) See note (a) to table on page 282. (b) Weighted average weekly rate for all industrial groups combined. (c) Weighted average working hours per week (excluding overtime), and computed hourly rates of wage for all industrial groups excepting Groups XI. (Shipping, etc.), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for some of the occupations classified in industrial groups XI. and XII.

(iii) *Index Numbers.* The effect of changes in hours of labour on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers for all classes combined given in the following table. It should be noted that these comparative index-numbers for males and females are on the 1914 base as against the 1911 base of the earlier tables for adult males. This is because there was no tabulation for adult female rates prior to 1914:—

INDEX-NUMBERS OF WEEKLY AND HOURLY WAGE RATES AND WEEKLY HOURS OF LABOUR : ADULT WORKERS.(a)

(Base : Weighted Average for Australia, 30th April, 1914\* = 1,000.)

\* Approximate Weekly Rates—M = 55s. 1d.; F = 27s. 2d. Hourly Rates—M = 1s. 2d.; F = 6½d. Weekly Hours of Labour—M = 48.93; F = 49.08.

4. **Nominal and Effective Wages.**—(i) *General.* Index-numbers of wage rates are said to be *nominal* when they represent changes in the wage rates themselves but are described as *effective* or *real* when they represent changes in equivalent purchasing power, that is, the purchasing power of the corresponding wages in terms of some definite composite unit or *regimen* the cost of which can be ascertained at different times. The relation between *nominal* and *effective* or *real* wages was discussed at some length in *Labour Report* No. 6, and was also referred to in *Labour Report* No. 11.

Since it is possible to measure purchasing power over more than one composite unit or regimen it is equally possible to convert any given nominal wage series into more than one series of effective or real wages. Prior to 1936 it was the practice of this Bureau to compute effective wage index-numbers by dividing the nominal wage index-numbers by the corresponding retail price index-numbers for food, groceries and rent of all houses ("A" series). While wage rates were generally varied on the basis of the "A" series index-numbers there was a good deal to be said for this procedure. When the Commonwealth Court abandoned the "A" series, the merits of the "C" series for "deflating" nominal wage rates were strengthened and real wages to the end of 1937 were measured in terms of their purchasing power over both regimens. Since 1938 when computations of the "A" series was discontinued, real wages have been measured in terms of their purchasing power over the "C" series only. The "C" series covers food, groceries, rent of four and five-roomed houses, clothing and miscellaneous household requirements.

(ii) *Nominal Weekly Wage Index-numbers—Adult Males, States, 1911 to 1952.* The following table shows for the period 1911 to 1952 the weighted average nominal weekly rates of wage payable for adult males in each State, the weighted average rate for Australia in 1911 being taken as the base (= 1,000). These results are based generally upon rates of wage prevailing in the capital city of each State, but in certain industries, such as mining, rates are necessarily taken for places other than the capital cities. The index-numbers for 1911 are based on rates current at the end of December, annual averages not being available. For 1914 and subsequent years, however, the index-numbers are based on the average rates current at the end of the four quarters of each year:—

#### NOMINAL WAGE(a) INDEX-NUMBERS : ADULT MALES.

(a) For a full week's work (excluding overtime).

(iii) *Effective or Real Wage Index-numbers—Adult Males, States, 1911 to 1952.* In obtaining the effective wage index-numbers in the following table, the nominal wage index-numbers shown above have been divided by the corresponding retail price index-numbers for the capital city and multiplied by 1,000. Since the "C" series index-numbers were not compiled for periods prior to November, 1914, it has been assumed that fluctuations between 1911 (the base of the table) and 1914 in the "C" series would have been similar to the fluctuations observed in the "A" series. A table showing effective or real wage index-numbers from 1901 to 1937 measured in terms of purchasing power over the "A" series regimen appeared in earlier issues of the *Official Year Book* (see No. 37, page 473).

**EFFECTIVE OR REAL WAGE(a) INDEX-NUMBERS : ADULT MALES.**

Measured in terms of purchasing power over the "C" series regimen.

(Base : Weighted Average Real Wage(a) in Australia in 1911 = 1,000.)

(a) For a full week's work (excluding overtime).

In the table above, the effective wage index-numbers are computed to the one base, that of Australia for 1911. As the index-numbers are comparable in all respects, comparisons may be made as to the increase or decrease in the effective wage index-number for any State over any period of years.

(iv) *Effective or Real Wage Index-numbers—Adult Males, Australia, 1901 to 1950.* In previous issues of the Official Year Book (see No. 39, page 410) a table was included showing similar index-numbers for Australia as a whole under both the "A" and "C" series at intervals from 1901 to 1950.

### § 3. Basic Wages in Australia.

1. **General.**—Basic wages in Australia are fixed by various industrial tribunals operating under Commonwealth and State industrial legislation, and are varied from time to time according to changes in cost of living, etc. In the industrial legislation of Queensland and Western Australia, provision is made for the tribunals appointed under the Acts to determine the basic rates of wage to be paid to adult unskilled workers. In Tasmania provision for the declaration of a basic rate of wage is not included in the industrial Acts in force. The Wages Board system operates in this State, and each Wages Board determines the rate of wage to be paid to the unskilled worker when the determination for an industry or calling is under review. In Victoria, however, while a similar Wages Board system exists, the Factories and Shops Acts oblige Wages Boards to adopt Commonwealth Award rates and conditions "which such Boards are under the Factories and Shops Acts empowered to include in their determinations." In New South Wales and South Australia, in general, tribunals are required to adopt the prevailing Commonwealth basic wage. As the power of the Commonwealth Court of Conciliation and Arbitration is limited by the Constitution to the settlement, by conciliation and arbitration, of industrial disputes extending beyond the limits of any one State, no similar provision respecting the determination of a basic wage is to be found in the Conciliation and Arbitration Act. In practice, the Court does declare a Commonwealth basic wage, and uses the wage so declared as a basis for all awards made by it in the exercise of its jurisdiction, except in the case of awards made for Whyalla and Iron Knob where the basis of awards has, since 1947, been the South Australian "living" wage plus 5s. That is, upon a new basic wage being declared, the awards made in the settlement of all interstate industrial disputes are re-opened and amended accordingly. In addition to the "basic" wage, these tribunals also determine what is known as the "secondary" wage—"the extra payment to be made for trained skill or other exceptional qualities necessary for an employee exercising the functions required."\* The term "minimum" wage, as distinct from the "basic" wage, is used to express the lowest rate payable in a particular industry or occupation, and is either equal to, or greater than, the "basic" wage.

2. **The Commonwealth Basic Wage.**—(i) *Early Judgments.* The doctrine of a basic wage was propounded as far back as 1890 but it was not until 1907 that the first basic wage, as such, was declared by a Court in Australia. This was declared by Mr. Justice

\* Mr. Justice Higgins—*A New Province of Law and Order.*

Higgins, President of the Commonwealth Court of Conciliation and Arbitration, and was defined as the lowest wage which could be paid to an unskilled labourer on the basis of "the normal needs of an average employee regarded as a human being living in a civilized community."\* This declaration was made by way of an order in terms of Section 2 (d) of the Excess Tariff 1906 in the matter of an application by H. V. McKay, of the Sunshine Harvester Works, Victoria, from which was derived the title of the "Harvester Wage" by which it is popularly known. The rate of wage declared in this case was 7s. per day or £2 2s. per week for Melbourne, the amount considered reasonable for "a family of about five."†

The "Harvester" basic rate was adopted by the Commonwealth Court of Conciliation and Arbitration for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of the retail price index-numbers, covering food and groceries and rent of all houses ("A" series), for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. The basic rates for towns were thereafter fixed largely on their respective index-numbers, taking the index-number 875 for Melbourne for the year 1907 as being equivalent to the "Harvester" rate of 42s. per week, or the base of the index (1,000) as being equivalent to 48s. per week. Exceptions were made in the case of many country towns, where certain "loadings" were applied to counter-balance their lower index-numbers due to cheaper rentals.

In 1922 an amount known as the "Powers' 3s."‡ was added as a general "loading" to the weekly wage for the purpose of securing to the worker during a period of rising prices the full equivalent of the "Harvester" standard. In the same year the system was instituted of making regular quarterly adjustments of the basic wage to accord with variations in purchasing power as disclosed by the "A" Series retail price index-numbers, and of basing the adjustments on the index-number for the quarter in place of that for the previous calendar year or the year ended the preceding quarter.

The Conciliation and Arbitration Act provides that the "basic" wage, or any alteration thereof including the principles on which it is computed, together with any variation or interpretation of any award involving any such alteration, shall be considered by a Court constituted by the Chief Judge and not less than two other Judges, and must be approved by a majority of the members of that Court. By a judgment of the High Court on 21st April, 1933, the "basic" wage is taken to mean, for the foregoing purpose, not only the "Harvester" wage but any "loadings" forming part of the primary wage of an unskilled labourer. A "loading" is defined as an addition to the "basic" wage as compensation for some peculiar condition of labour or environment, and not by way of "margin for skill". The wage payable for skilled labour is assessed on the basis of the "basic" wage, including "loadings".

A Royal Commission was appointed in 1919 to assess a basic wage, but its recommendations were not carried out and no change was made in the method of fixation and adjustment of the basic wage until the onset of the depression which began to be felt severely during 1930. Applications were then made to the Court by employers for some greater measure of reduction of wages than that afforded by the automatic adjustments to falling retail prices. An account of the proceedings which resulted in the Court reducing all wages under its jurisdiction by 10 per cent. from 1st February, 1931, is given in *Labour Report* No. 23, page 74.

(ii) *Basic Wage Inquiry*, 1934. The "Harvester" standard, adjusted to retail price variations, continued as the theoretical basis of the wage of the Commonwealth Court until 30th April, 1934, when it was superseded by a judgment delivered on 17th April, 1934, full particulars of which appear in *Official Year Book* No. 29, 1936, page 545. The basic wage declared on this occasion for the six capital cities ranged from 61s. for Brisbane to 67s. for Sydney and Hobart, the average wage for the six capital cities being 65s.

A comparison for the capital cities of the basic rates granted by the judgment and those ruling under previous practices of the Court is given in *Official Year Book* No. 38, p. 426.

The 10 per cent. special reduction in wages referred to above ceased to operate upon the introduction of the new rates, and the basis of the periodical adjustments to retail

\* *Ibid.*

† See page 291 for Court's interpretation in 1940 *Basic Wage Inquiry* of the "family unit".

‡ Awarded by Mr. Justice Powers in the *Gas Workers' Case*.

price variations was transferred from the "A" and the "D" Series to the "C" Series of index-numbers. The base of the index (1,000) was taken by the Court as equal to 81s. per week. This gave the above rates for the capital cities on the basis of their respective index-numbers. In effect, the new rate for the six capital cities was the same as that previously paid under the "A" Series, without the "Powers' 3s." and without the 10 per cent. reduction.

(iii) *Basic Wage Inquiry, 1937.* In May, 1937, the Commonwealth Court heard an application by the combined unions for an increase in the basic wage. The unions asked that the equivalent of the base (1,000) of the "C" Series Index be increased from 81s. to 93s. which on current index-numbers would have represented an average increase of about 10s. per week. The hearing extended from 10th May to 4th June, 1937, and the Court delivered judgment on 23rd June. The chief features of the judgment were:—

(a) Various amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" on the rates payable under the 1934 judgment which were referred to in the judgment as the "needs" portion of the total resultant basic wages. The loadings, commonly referred to as "Prosperity" loadings, ranged, for capital cities, from 4s. to 6s., that for the "Six Capitals" being 5s.

(b) The basis of the adjustment of wages in accordance with the variations shown by retail price index-numbers was transferred from the "C" series to a special "Court" series based upon the "C" series (see page 273).

(c) Female and junior rates were left for adjustment by individual Judges when dealing with specific awards.

The main parts of the judgment are reprinted in Official Year Book No. 30, and in *Labour Report* No. 28, p. 77.

(iv) *Basic Wage Inquiry, 1940.* On 5th August, 1940 the Full Court commenced the hearing of an application by the combined unions for an increase in the existing basic wage by raising the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series are based) from 81s. to 100s. per week, and the abolition of the existing "Prosperity" loadings, which would be regarded as incorporated in the new rate mentioned. Judgment was delivered on 7th February, 1941, the Court unanimously refusing to grant any increase, and deciding that the application should not be dismissed but stood over for further consideration after 30th June, 1941. The application was refused mainly owing to the uncertainty of the economic outlook under existing war conditions (see (v) following). Extracts from the judgment were published in earlier issues of the Official Year Book (see No. 38, p. 428) and the *Labour Report*.

In regard to the popular idea that the basic wage of the Commonwealth Court of Conciliation and Arbitration was identified with a specific family unit, the Chief Judge made the following statements to clarify the position: "The Court has always conceded the 'needs' of an average family should be kept in mind in fixing a basic wage. But it has never as the result of its own inquiry specifically declared what is an average family or what is the cost of a regimen of food, clothing, shelter and miscellaneous items necessary to maintain it in frugal comfort, or that a basic wage should give effect to any such finding. In the end economic possibilities have always been the determining factor

. . . . . What should be sought is the independent ascertainment and prescription of the highest basic wage that can be sustained by the total of industry in all its primary, secondary and ancillary forms . . . . . More than ever before wage fixation is controlled by the economic outlook".

The Chief Judge also suggested that the more logical system would be to grade the basic wage according to family responsibilities by means of a comprehensive system of child endowment, and that if a scheme of this nature were established,\* future fixations of the basic wage would be greatly simplified.

(v) "*Interim*" *Basic Wage Inquiry, 1946.* As the result of (a) an application made by the Commonwealth Attorney-General for the restoration to the Full Court List of certain adjourned 1940 basic wage applications (see (iv) above), (b) a number of fresh cases which had come to the Court since 1941, and (c) an application by the combined unions for an "interim" basic wage declaration, the Court, on 25th November, 1946, commenced the hearing of this case. Judgment was delivered on 13th December, 1946 whereby an increase of 7s. per week was granted in the "needs" portion of the basic

\* Legislation covering a scheme to become operative on 1st July, 1941, was passed by the Commonwealth Parliament on 3rd April, 1941—see Chapter XIV.—Welfare Services for details.

wage then current and based on the weighted average "Court" index-number for the Six Capital Cities (as a whole) for the September quarter, 1946. This had the effect of raising the base (1923-27) index-number of the "Court" Series Index from 81.0 to 87.0, the corresponding "needs" basic wage from 81s. to 87s. per week, and the current rate for the Six Capital Cities as a whole from 93s. to 100s. per week. All "loadings" on the basic wage were retained at their existing amounts until otherwise ordered by the Court. Further details of this judgment may be obtained from *Labour Report* No. 38, page 79.

(vi) *Basic Wage Inquiry, 1949-50.* This case really finalized the case begun in 1940 and continued in 1946 (see above). In 1946 the Chief Judge ruled that the claim for an increase in the basic wage should be heard concurrently with the "40-Hour Week" claims then before the Court. The unions, however, objected to this course being followed, and, on appeal to the High Court, that Court in March, 1947, gave a decision which obliged the Commonwealth Court of Conciliation and Arbitration to proceed with the "Hours" case to its conclusion without the interpolation of the contemporaneous hearing of the Basic Wage case.\*

Evidence was completed on 22nd August, 1950, and the three judges (Kelly, *C.J.*, Foster and Dunphy, *J.J.*) delivered separate judgments on 12th October, 1950. In these judgments, which were in the nature of general declarations, a majority of the Court (Foster and Dunphy, *J.J.*) was of the opinion that the basic wage for adult males should be increased by £1 per week, and that for adult females should be 75 per cent. of the adult male rate. Kelly, *C.J.*, dissenting, considered that no increase in either the male or female wage was justified.

On 24th October, 1950, and 23rd November, 1950, the Court made further declarations regarding the "Prosperity" loading of 1937 (see page 291) which was being paid at rates between 3s. and 6s. per week according to localities, etc., and the future basis of quarterly adjustments. The "Prosperity" loading was standardized at a uniform rate of 5s. per week for all towns and was declared to be an adjustable part of the basic wage. The Court also declared that the "War" loadings were not part of the basic wage.

With regard to other "loadings" the Court on 17th November, 1950 proceeded to examine the individual awards in the claims before it, for the purpose of determining to what extent such "loadings" formed part of the basic wage. It should be noted that any "loading" declared to be part of the basic wage ceased to be paid as a separate entity, but apart from the special case of the Australian Capital Territory there were very few "loadings" which fell within this category.

The first payment of the new rates was expressed to operate from the beginning of the first pay-period in December, 1950, by way of a flat-rate addition of £1 5s. in all cases to the "needs" rate (2nd Series) on the indexes of September quarter, 1950, inclusive of the standardized "Prosperity" loading of 5s. (see above).

The basic wage rate for the Six Capital Cities (Weighted Average) arrived at by the Court after applying the foregoing declarations was £8 2s., comprising £6 17s. "needs" (2nd Series) plus 5s. uniform "Prosperity" loading plus the £1 addition. For the purpose of determining the corresponding rates to be paid in respect of individual cities and towns, and combinations thereof, and their future automatic adjustment, this new rate of £8 2s. was equated to the "C" Series retail price index-number 1572 for the Six Capital Cities (Weighted Average) for September quarter, 1950. From this was derived a new "Court" Series Index—in future to be known as the "Court" Index (Third Series)—for automatic variation of the new basic wage in accordance with future variations in retail prices, with 103.0 equated to 1,000 in the "C" Series Index. The first automatic quarterly adjustment of the new basic wage on this basis became operative from the beginning of the first pay-period commencing in February, 1951, on the basis of the index numbers for the December quarter, 1950.

\* Printing Industry Employees Union of Australia v. Victorian Chamber of Manufactures, 73 C.L.R. 259.

The basic wage rates operative in November, 1950, are shown below in comparison with those operative from the beginning of the first pay-period commencing in December, 1950 :—

Date of Operation.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capitals.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
November, 1950 ..	146 0	143 0	135 0	137 0	139 0	139 0	142 0
December, 1950 ..	165 0	162 0	154 0	158 0	160 0	160 0	162 0

Further details of this judgment are given in *Labour Report* No. 40, page 81.

(vii) *Rates Operative, Principal Towns.* The basic wage rates of the Commonwealth Court of Conciliation and Arbitration for adult males and females, operative as from the beginning of the first pay-period commencing in May, 1953, were as shown in the following table :—

COMMONWEALTH BASIC WAGE : WEEKLY RATES.(a)

City or Town.	Rate of Wage.		City or Town.	Rate of Wage.

(a) Rates include "prosperity" loadings where applicable. (b) Generally from the beginning of the first pay-period commencing in the month indicated.

3. **Australian Territories.**—A full account of the bases upon which the basic wages are determined in the Australian Capital Territory and in the Northern Territory (both north and south of the 20th parallel of South Latitude) may be found on pages 89 to 96 of *Labour Report* No. 40 for 1951.

In the Australian Capital Territory the rates payable as from the beginning of the first pay-period in May, 1953, were £11 15s. for adult males and £8 16s. for adult females.

In the Northern Territory there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the "Darwin" rate and the other in respect of areas south of that parallel and extending down to the 26th parallel (the "Port Augusta" rate).

The basic wage rates payable as from the beginning of the first pay-period in May, 1953, were:—"Darwin" rate, adult males, £12 13s., adult females, £9 9s. 6d.; "Port Augusta" rate, adult males, £11 19s., and adult females, £8 19s.

In addition to the above rates special loadings were prescribed in Northern Territory awards following the fixation of the new basic wage rates operative from November, 1951.

4. **Basic Wage Rates for Females.**—Reference should be made to *Labour Report* No. 40, 1951 (page 86) for a statement of the general principles followed by the Commonwealth Court of Conciliation and Arbitration in fixing basic wage rates for females in relation to those of males. At the end of the 1949-50 basic Wage Inquiry (see page 292) the Commonwealth Court of Conciliation and Arbitration by a majority decision fixed a new basic weekly wage for adult females at 75 per cent. of the corresponding male rate from the beginning of the first pay-period commencing in December, 1950.

5. **State Basic Wages.**—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, by the Court of Industrial Arbitration.

A Board of Trade established in 1918 with power to determine the "living" wage for adult male and female employees in the State made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act 1926 transferred its powers to the Industrial Commission of New South Wales as from 15th April, 1926.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife and one child in 1929, with family allowances for other dependent children. With the adoption in 1937 of the Commonwealth basic wage referred to below, however, the identification of a specified family unit with the basic wage disappeared.

A table showing the variations in the living wages determined by the industrial tribunals of New South Wales up to 27th April, 1937 was published in previous issues of the Official Year Book (*see* No. 37, page 481). Employees in rural industries are not covered by the rates in this table. Since 27th April, 1937, changes have been made automatically in accordance with the procedure outlined in the next paragraph, and the latest current rate payable will be found in the table in sub-par. vi., page 299.

Following on the judgment of the Commonwealth Court of Conciliation and Arbitration referred to on page 291, the Government of New South Wales decided to make the State Basic Wage accord with the Commonwealth rates ruling in the State, and secured an amendment of the Industrial Arbitration Act to give effect thereto which came into operation from the commencement of the first pay-period in October, 1937. The general principles laid down by the Commonwealth Court were followed as closely as practicable, and provision was made for the automatic adjustment of wages in conformity with variations in retail prices as shown by the Commonwealth Court's "All Items" Retail Price Index-numbers, shortly known as the "Court" Series of Index-numbers. The Commonwealth Court's principle of treating the "prosperity" loadings as a separate and non-adjustable part of the total basic wage was adopted. The basic rate for adult females was fixed at 54 per cent. of the adult male rate to the nearest sixpence. The provisions of the main Acts for the periodic declaration of the living wage by the Industrial Commission were repealed, but the amending Act placed on the Commission the responsibility for altering all awards and agreements in conformity with the intentions of the new Act; for defining boundaries within which the various rates are to operate; and for specifying the appropriate "Court" Series retail price index-numbers to which they are to be related.

The judgment of the Commonwealth Court of Conciliation and Arbitration on 12th October, 1950 necessitated attention by the legislature to the clauses of the Industrial Arbitration Act providing for the automatic adjustment of rates of pay based on the Commonwealth Basic Wage Judgment of 23rd June, 1937.

An amendment to the Industrial Arbitration Act was assented to on 23rd November, 1950 which empowered the Industrial Commission to vary the terms of awards and industrial agreements affecting male rates of pay, to the extent to which the Commission thought fit, to give effect to the alteration in the basic wage for adult males made by the Commonwealth judgment. In the case of female rates of pay the Commission was empowered to review the terms of awards and industrial agreements and to vary such terms as in the circumstances the Commission decided proper, but no variation was to fix rates of pay for female employees lower than the Commonwealth basic wage for adult females. Further details of this amendment and recent judgments of the Commission may be found in *Labour Report* No. 40, *see* page 98.

By an amendment of the Industrial Arbitration Act in June, 1951, the differentiation in rates for the basic wage in different districts and for employees under Crown awards was eliminated as a general rule, making the basic wage throughout the State equal to that paid in Sydney, with the main exception of the Broken Hill district where a different basic rate still prevails.

The basic wage rates applicable in the metropolitan area from the beginning of the first pay-period commencing in May, 1953, were £12 1s. per week for adult males and £9 0s. 6d. for adult females.

The principle of supplementing wages by a payment in respect of dependent children under fourteen years of age was operative in New South Wales from July, 1927 until

superseded by the Commonwealth Government Scheme operative from 1st July, 1941, and a brief account of the main features of the system appears in Official Year Book No. 37, pp. 485-6.

(ii) *Victoria and Tasmania.* A State basic rate of wage is not declared in Victoria and Tasmania. In these States the Wages Board system of wage fixation is in operation, and each Board determines the minimum rate of wage to be paid in the industry or calling under review. In the majority of cases the practice of the Commonwealth Court of Conciliation and Arbitration of adjusting wages in accordance with variations in retail prices has been followed in the past by these bodies. In the case of Victoria, by amendments of the Factories and Shops Act No. 4275 of 1934 and No. 4461 of 1936, it is obligatory on all Wages Boards to adopt provisions of Commonwealth Awards "which such Boards are empowered under the Factory and Shops Acts to include in their determinations". The Secretary of Labour is also empowered under this Act to make adjustments of wages according to variations in retail price index-numbers without calling the Board together.

In accordance with the decisions of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950 (*see* page 292) the Wages Boards in both States met and incorporated the new Commonwealth rates in their determinations. The Commonwealth weekly adult male rate operative from the beginning of the first pay-period commencing in May, 1953, was £11 12s. for Melbourne and £11 19s. for Hobart. Female basic wages were 75 per cent. of these rates.

(iii) *Queensland.* The first formal declaration of a basic wage by the Queensland Court of Industrial Arbitration was gazetted on 24th February, 1921. Prior to this declaration the rate of £3 17s. per week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The basic wage is nominally intended to provide for the needs of a man, his wife and three children. The variations in the adult basic wages determined by the Court up to 1st April, 1937, were published in previous issues of the Official Year Book (*see* No. 37, page 482). Variations since that date are shown below:—

**BASIC WAGE VARIATIONS IN QUEENSLAND. (State Jurisdiction.)**

Date of Operation.	Adult Basic Wage.	
	Male.	Female.
	£ s. d.	£ s. d.
1st April, 1938 .. .. .	4 1 0	2 3 0
7th August, 1939 .. .. .	4 4 0	2 5 0
31st March, 1941 .. .. .	4 9 0	2 8 0
4th May, 1942(a) .. .. .	4 11 0	2 9 6
23rd December, 1946(b) .. .. .	5 5 0	3 0 6
7th December, 1950(b) .. .. .	7 14 0	5 2 6

(a) Quarterly adjustments provided by judgment of 21st April, 1942—*see* below.

(b) Consequent upon basic wage increases granted by the Commonwealth Court of Conciliation and Arbitration.

The rates shown above are applicable throughout the Southern Division (Eastern District), which includes the metropolitan area; allowances are added for the following divisions—Northern (Eastern District), 10s.; Northern (Western District), 17s. 4d.; Mackay, 5s. 6d.; and Southern (Western District), 7s. 4d. Half of these allowances are granted to females.

On 15th April, 1942, the Court declared the rates operative from 31st March, 1941 as adequately meeting the requirements of Section 9 of the Industrial Conciliation and Arbitration Act 1932, having regard to the level of the "C" Series Retail Price Index for Brisbane for the December quarter, 1941 and decided to make a quarterly declaration of the basic wage on the basis of the variations in the "cost of living" as disclosed by the "C" Series Index for Brisbane, commencing with the figures for the March quarter, 1942. This declaration was duly made by the Court on 21st April, 1942, at the rates

of £4 11s. for adult males, and £2 9s. 6d. for adult females. Since then, quarterly adjustments have been made to the basic wage in accordance with changes in the "C" Series Index.

In view of the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration in December, 1946 (*see page 291*) the Queensland Industrial Court granted increases of 7s. and 5s. in the basic wages for adult males and adult females respectively to operate from 23rd December, 1946.

Following the decision of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950 (*see page 292*) the Queensland Industrial Court conducted an inquiry as to what change should be made to the State basic wage for Queensland. By a majority decision on 30th November, 1950, the Industrial Court granted an increase of 15s. weekly to both adult males and adult females, the new male rate of £7 14s. corresponding to the Commonwealth basic wage for the Brisbane metropolitan area. The basic wage payable to adult females is now approximately 66 per cent. of the male rate. The judgment of the Queensland Industrial Court may be found in the supplement to the *Queensland Industrial Gazette* Vol. 35, No. 4, page 1253.

The rates payable in the Southern Division (Eastern District) in accordance with regular quarterly variations from 4th May, 1953, were £10 18s. for adult males and £7 6s. for adult females.

(iv) *South Australia.* The Industrial Code 1920-1951 provides that the Board of Industry shall after public inquiry declare the living wages to be paid to adult male and female employees. The Board has power also to fix different rates to be paid in different defined areas.

The family unit is not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage is to be declared is a man with a wife and three children.

The first declaration by the Board of Industry was made on 15th July, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. per week.

Following on the declaration of an "interim" increase in its "needs" basic wage by the Commonwealth Court of Conciliation and Arbitration on 13th December, 1946 (*see p. 291*) the South Australian Parliament provided for the "daily living wage" for adult males in the metropolitan area to be declared as one-sixth of the Commonwealth weekly basic wage for this area. The Act mentioned also provided for similar declarations in respect of any adjustment of such wage, but the powers of the Board of Industry to declare a "living wage" were retained, and any such wage so declared will supersede that declared by proclamation.

The variation in the living wages determined by the Board of Industry up to 25th November, 1937, were published in previous issues of the Official Year Book (*see No. 37, page 483*). Variations since that date are shown below:—

LIVING WAGE VARIATIONS IN SOUTH AUSTRALIA. (*State Jurisdiction.*)

19th May, 1949 .. .. .	6	5 0	3	8 6

(a) Commonwealth rate for metropolitan area adopted.

The Industrial Code Amendment Act No. 65 of 1949 made provision for the quarterly adjustment of the "living wage" in accordance with the variations in the Commonwealth basic wage consequent on the changes in the "Court" Series index of retail prices for Adelaide. In effect this resulted in parity between the State living wage and the Commonwealth basic wage from the beginning of the first pay-period commencing in February, 1950. The prescribed adjustment to the female "living wage" was seven-twelfths of the same adjustment to the Commonwealth male basic wage. The Board of Industry retained power to amend the "living wage" but any new "living wage" was to be adjusted quarterly as above.

Following the decisions of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry (*see* page 292), the South Australian legislation was amended to enable, *inter alia*, the "living wage" to be altered by proclamation, and by proclamation dated 30th November, 1950, the South Australian Living Wage in the metropolitan area was fixed at increased rates identical with the December rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia. The female basic wage, which had been approximately 54 per cent. of the male basic wage, was increased to 75 per cent. of the corresponding male rate.

The rates payable in accordance with the quarterly adjustments notified by the President of the Board of Industry, operating from the beginning of the first pay-period commencing in May, 1953, were £11 8s. per week for adult males, and £8 11s. for adult females.

(v) *Western Australia.* The Industrial Arbitration Act 1912-1952 provides that the Court of Arbitration may determine and declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination shall be made within twelve months of the last preceding inquiry.

The term "basic wage" is defined in the Act as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies". In determining what is just and reasonable the Court must take into account not only the "needs of an average worker" but also the "economic capacity of industry" and any other matters the Court deems relevant.

Provision is also made in the Act for quarterly adjustments of the "basic wage" by the Court of Arbitration when an official statement supplied to the Court by the State Government Statistician relating to the cost of living shows that a variation of 1s. or more per week has occurred, compared with the preceding quarter. These adjustments apply from the dates of declaration by the Court.

The first declaration of the basic wage by the Court of Arbitration, since the authority to fix one was vested in the Court in 1925, was made on 11th June, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. The variations in the annual declarations of the Court of Arbitration up to 1937 were published in previous issues of the Official Year Book (*see* No. 37, page 484). Annual and special declarations since 1937 are shown in the following table.

BASIC WAGE VARIATIONS IN WESTERN AUSTRALIA. (State Jurisdiction.)

Date of Operation.	Metropolitan Area.		South-West Land Division (excluding Metropolitan Area).		Other Parts of State.

(a) Applicable from 24th April, 1939. (b) Applicable from 28th April, 1941. (c) Special declarations following basic wage increases granted by the Commonwealth Court of Conciliation and Arbitration.

The increased basic wage of 26th February, 1947 was granted after an inquiry by the Western Australian Court of Arbitration consequent upon the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration in December, 1946 (see page 291).

Following the judgment of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry (see page 292) the Western Australian Court of Arbitration resumed an inquiry which had been adjourned, to ascertain what change should be made in the State basic wage rates. In its judgment of 7th December, 1950 the Court decided that the basic wage should be increased by £1 per week for adult males and by 15s. per week for adult females. As the result of a subsequent inquiry the basic wage for adult females was increased to 65 per cent. of the corresponding male rate, operative from 1st December, 1951. This was subject to the condition that the increase should be offset by the reduction in or deletion of existing margins between the basic wage and the total wage as specified by the appropriate award or determination.

The judgment of the Court of 7th December, 1950, may be found on page 336 of the *Western Australia Industrial Gazette*, Volume 30, Nos. 3-4.

The rates payable in the metropolitan area in accordance with the quarterly adjustments declared by the Court, operative from 27th April, 1953, are £12 1s. 10d. for adult males and £7 17s. 2d. for adult females.

(vi) *State Basic Wage Rates.* The "basic" wage rates of State industrial tribunals operative in May, 1952 and May, 1953 are summarized in the following table:—

STATE BASIC WAGE—WEEKLY RATES.

State.	May, 1952.			May, 1953.

(a) Operative from beginning of first pay-period commencing in month shown. (b) None declared but rates (capital city) shown are those of Commonwealth Court of Conciliation and Arbitration which are followed to a large extent. (c) Allowances added for other areas:—Males—Southern Division (Western District), 7s. 4d.; Mackay Division, 5s. 6d.; Northern Division (Eastern District), 7s.; Northern Division (Western District), 17s. 4d.; Females—half of these allowances.

6. **Royal Commission on the Basic Wage, 1920.**—Only one comprehensive attempt has been made by the Commonwealth authorities to ascertain specifically what the actual requirements were in the various States according to reasonable standards of comfort, including all matters comprised in the ordinary expenditure of a household, in respect of a family consisting of a man, wife and three children under fourteen years of age. This was made by a Royal Commission which in its report, in 1920, made recommendations for the various capital cities which were not carried out owing largely to the marked advance of the amounts suggested over ruling rates and the grave doubts expressed as to the ability of industry to pay such rates. Further details of these recommendations are given in *Labour Report* No. 40 (see page 106).

#### § 4. Child Endowment in Australia.

1. **General.**—The principle of supplementing wages by a payment in respect of dependent children under sixteen years of age became prominent in Australia following the recommendations of the Royal Commission on the Basic Wage of 1920, and was implemented in Australia as described in the following paragraphs. The system has been in force in various forms in England and on the Continent as far back as 1795, the first instance occurring in England in that year.

2. **National Scheme.**—Details of the appointment of another Royal Commission in 1927 and a brief summary of its findings and of consequent Government decisions were given in previous issues of the *Official Year Book* (see No. 39, page 425).

In 1941, the Commonwealth Government introduced a scheme of child endowment throughout Australia. The main features of the scheme and a summary of the operations under the scheme from 1st July, 1947 to 30th June, 1952, are given in Chapter XIV.—Welfare Services.

3. **Earlier Schemes.**—Consequent upon the operation of the Commonwealth Child Endowment Scheme, appropriate steps were taken for the termination of the schemes operating in the Commonwealth Public Service and in New South Wales. The Commonwealth Public Service Scheme was the first system instituted in Australia and came into operation on 1st November, 1920. In New South Wales an abortive attempt to institute the system was made in 1919 and a scheme was adopted under the Family Endowment Act 1927 which operated from 23rd July, 1927. For further details of these schemes reference may be made to *Official Year Book* No. 37, pages 485 and 486.

### E. EMPLOYMENT AND UNEMPLOYMENT.

#### § 1. Employment.

1. **Total Occupied Persons.**—(i) *General.* The following estimates of the total numbers of occupied males and females are based principally on data from the 1933 Census (June), the National Register (July, 1939), the Civilian Register (June, 1943), the Occupation Survey (June, 1945) and the 1947 Census (June). These sources of information have been supplemented by Pay-roll Tax returns, which commenced in July, 1941. Owing to some difference in coverage, 1947 figures in the following tables differ slightly from Census figures as shown in Chapter IX.—Population. The 1947 figures are subject to revision.

(ii) *Australia.* The estimates in the table below are divided into three categories (a) Defence Forces; (b) all persons fully occupied as employers, or as self-employed in businesses or on farms; and (c) wage or salary earners fully employed, or occupied as casual, part-time, intermittent or seasonal workers. Wage earners unemployed, in the sense that they are incapacitated or have no work to go to, are excluded, as also are persons engaged on Government relief works.

All unpaid "helpers" in non-rural industry have been included with wage and salary earners. Male unpaid "helpers" in rural industry have been included with employers and self-employed persons, as it is considered that the majority of these are sons or other close relatives of farmers working in an unofficial partnership, or as learners with the farm owner. Unpaid female "helpers" on farms are very numerous, but their exact number is not known. Generally, they combine part-time dairy or other farm work with part-time duties in the home. Together with women occupied in unpaid home duties they have been excluded from the category of occupied persons.

Statistics of net enlistments in the Defence Forces shown in the table below represent total enlistments for full-time duty less deaths and discharges. Prior to December, 1941, men in certain age-groups were called-up for short training courses but these men are excluded from the figures. In July, 1941, the number of such men was approximately 50,000.

1947—June ..	54.0	292.7	342.6	635.3	156.3	2,309.3d	2,465.6d	3,100.9d	3,154.9d

(a) Includes those serving outside Australia. (b) Excludes approximately 50,000 men called up for short training courses. (c) Occupation Survey, 1st June, 1945. (d) Subject to revision. (e) Includes females, in thousands, in private domestic service as follows:—106.7 in June, 1933; 124.5 in July, 1939; 100.0 in July, 1941; 41.5 in June, 1943; 47.6 in June, 1945; and 40.3 in June, 1947.

From June, 1933 to July, 1939, the number of occupied persons of both sexes increased by 488,900, due to the increase of 223,700 in the number of available breadwinners and to the decrease of 265,200 in the number unemployed from 563,200 to 298,000. During the war years from July, 1939 to June, 1943, the number of males occupied as civilians decreased by 288,000, while females occupied as civilians increased by nearly 113,000, representing a net decrease of 175,000 persons. This decrease, together with decrease of unemployment (272,000), normal increase of breadwinners (91,000) and an abnormal war-time increase of 178,000 bread winners (persons who would not otherwise have been working), balanced the net intake into the Defence Forces at June, 1943 (716,000). The estimate of 659,000 female wage and salary earners employed in non-rural industries as at June, 1947, includes 40,300 private domestics (the Census figure). The remaining 619,600 females in the estimate include females working part-time. The 1947 Census figure for the same industries (i.e., excluding rural and private domestic) was 579,200. Persons working regularly but for considerably less than normal working hours were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

(iii) *States.* The following table shows total occupied males and females in each State in July, 1939, and June, 1947, divided into Defence Forces, Employers and Self-employed, and Wage and Salary Earners.

**TOTAL OCCUPIED PERSONS : STATES.**

(a) Includes those serving outside Australia.

(b) Subject to revision.

(c) Includes Australian Capital Territory and Northern Territory.

Between July, 1939 and June, 1947, the occupied population of Australia (including Defence Forces but excluding unemployed, pensioners, retired persons of independent means and dependants) increased by approximately 14.7 per cent. The proportionate increase in each State was as follows: New South Wales, 16.1; Victoria, 14.8; Queensland, 13.8; South Australia, 12.7; Western Australia, 8.3; Tasmania, 14.3.

2. *Wage and Salary Earners in Civilian Employment.*—(i) *Australia and States.* Estimates are made monthly of wage and salary earners in employment (excluding employees in rural industry and female domestics in private homes), based on Pay-roll Tax returns and supplementary returns of Government employment. Pay-roll Tax returns cover only a small proportion of wage earners on rural holdings, and practically no private domestic servants. It is not possible to obtain actual numbers of farm employees and private domestic servants except when a Census or quasi-Census such as

Occupation Survey (1st June, 1945) is taken, but estimates have been made from time to time using available data. The next table shows for each State and for Australia as a whole the trend in that section of wage and salary earning employment which it is possible to estimate monthly. Figures are shown as at June, 1933 (Census) and July, 1939 (based on National Register). From July, 1941 (commencement of Pay-roll Tax returns) the estimates are available for each month, and the table shows the level in June of the years 1947 and 1948, in May, 1949, and in June, 1950, 1951 and 1952.

### WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT.

(Excluding Rural Wage Earners, Female Domestics in Private Homes, Persons on Paid Strength of Defence Forces and National Service Trainees in Camp.)

(a) Includes Australian Capital Territory and Northern Territory. (b) Subject to revision. (c) Figures for May, 1949 have been used for purposes of annual comparison because of the effects of the coal dispute in June, 1949.

Estimates for recent months for Australia, corresponding to the foregoing, together with details for certain industrial groups, are published regularly in the *Monthly Review of Business Statistics* and the *Monthly Bulletin of Employment Statistics*.

(ii) *Industrial Groups*. The following table shows the total male and female wage and salary earners in civilian employment (excluding employees in rural industry, female private domestics, persons on the paid strength of the Defence Forces and National Service Trainees in camp) subdivided to show the extent of employment provided by Governmental authorities and by private employers respectively. Some principal industrial groups included in the total are shown separately and include both Governmental and private employees, except in the case of retail trade, where there are no Governmental employees.

### WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT : INDUSTRIAL GROUPS, AUSTRALIA.

(Excluding Rural Wage Earners, Female Domestics in Private Homes, Persons on Paid Strength of Defence Forces and National Service Trainees in Camp.)

(a) Subject to revision. (b) Figures for May, 1949, have been used for purposes of annual comparison because of the effects of the coal dispute in June, 1949. (c) Estimates (subject to revision) based on Pay-roll Tax returns, etc., of employees predominantly engaged in secondary production. The figures include a considerable number of employees outside the scope of the factory employment figures as defined and published in Chapter XXIV.—Manufacturing Industry. (d) Includes employees of Commonwealth, State and Local Government Authorities.

A graph showing wage and salary earners in civilian employment by main industrial groups appears on page 311.

(iii) *Factories.* Actual mid-monthly factory employment derived from the results of annual factory censuses is published in the *Secondary Industries Bulletin* issued by this Bureau.

Additional tables regarding employment in factories may be found in Chapter XXIV. "Manufacturing Industry".

An index of factory employment in Australia, published in the *Monthly Review of Business Statistics*, shows that in 1951-52 factory employment was 70 per cent. higher than the average employment for the three years ended June, 1939.

3. Government Employees.—(i) *Australia, 1939 and 1948 to 1952.* The following table shows at June in each of the years 1948 to 1952, in comparison with 1939, the number of civilian employees of Commonwealth, State, Semi-Governmental and Local Government authorities. These include all employees of Governmental authorities on services such as railways, tramways, banks, post office, air transport, education, broadcasting, police, public works, factories and munitions establishments, migrant hostels, etc., as well as administrative employees, within Australia.

**GOVERNMENT EMPLOYEES(a) : AUSTRALIA.**

(a) See explanation in para. 3 (i) above.

**§ 2. Unemployment.**

1. **Total Persons Unemployed.**—The total number of persons unemployed has been recorded only at the dates of the various censuses. The Census records include all persons who state that they are unemployed, and distinguish between unemployment on account of sickness, accident, scarcity of work, industrial dispute, and all other causes combined.

The following table sets out the number of unemployed at the Censuses of 1911, 1927, 1933 and 1947, the National Register, 1939, and the Occupation Survey, 1945. The percentage which the unemployed bore at each date to all wage and salary earners of the same sex, comprising those estimated to be in employment and those unemployed, is also shown.

UNEMPLOYMENT (ALL CAUSES) : AUSTRALIA.

Year and Month.	Wage and Salary Earners Unemployed.			Proportion of Wage and Salary Earners Unemployed.		
	Males.	Females.	Total.	Males.	Females.	Total.
	'000.	'000.	'000.	%	%	%
1911—April (Census) ..	48.0	8.3	56.3	4.3	2.7	4.0
1921—April ..	139.4	21.5	160.9	10.7	5.7	9.6
1933—June(a) ..	460.2	103.1	563.3	27.9	19.1	25.8
1939—July(b) ..	264.0	34.0	298.0	15.0	5.7	12.6
1945—June(c) ..	39.9	16.2	56.1	2.7	2.3	2.6
1947—June (Census)(d)	66.6	16.9	83.5	3.6	2.5	3.3

(a) The figures shown for 1933 are in excess of those actually recorded at the Census, through an allowance having been made for a number of youths and girls who would normally have been wage and salary earners, but who, on account of the economic depression, having never been employed, were not classed as wage and salary earners. (b) Derived from National Register, 1939. (c) Derived from Occupation Survey, 1945. (d) Persons in the work force who were not at work at the time of the Census.

The estimates and percentages of unemployment given above for periods subsequent to the Census of 1933 should be interpreted in conjunction with the notes below.

The estimates for 1939 were based on the National Register, which covered males aged 18–64 years, and data available from other sources. The proportion of wage earners unemployed in July, 1939, immediately prior to the 1939–45 War, was estimated at approximately 12½ per cent. In July, 1941, it was about 4 per cent. and by June, 1943, under conditions of intensive mobilization of manpower for war purposes, involuntary unemployment was practically nil. Owing to the use on the Occupation Survey (1945) card of the definition “a person normally working for wages but without a job on 1st June”, it appears that the 1945 figures exclude some persons who were temporarily absent from their jobs at the date of the survey.

Of the numbers at the 1947 Census shown above 25.6 per cent. were not at work owing to sickness or accident and 26.6 per cent. stated that they were resting. Of the latter, approximately half said they expected to resume their former jobs.

2. **Unemployment in Reporting Trade Unions.**—(i) *General.* The particulars given in the following tables are based upon information furnished by the secretaries of trade unions. The percentages of unemployment derived from trade union returns are an indication of the trend of unemployment among trade unionists as estimated or recorded by secretaries of trade unions which supply returns. The membership of the reporting unions consists predominantly of males and represents at present about 55 per cent. of the total trade union membership, and between 25 and 30 per cent. of all wage and salary earners. Unemployment returns are not collected from unions whose members are predominantly in permanent employment (Governmental, etc.) or casual employment (wharf labourers, etc.). Very few of the unions pay unemployment benefit, but the majority of the larger organizations have permanent secretaries and organizers who are in touch with the members and with the state of trade within their particular industries. In some cases unemployment registers are kept, and provision is made in the rules for payment of reduced subscriptions by members out of work. Seasonal fluctuations in unemployment have been provided for by collecting returns quarterly since 1st January, 1913. The quarterly figures relate to persons who were out of work for three days or more during a specified week in each quarter: they include persons out of work through sickness but exclude persons out of work through strikes and lock-outs, except those outside the industry who are indirectly affected. The yearly figures quoted represent the average of the four quarters.

(ii) *Summary for Australia, 1939 to 1952.* The following table gives a summary for Australia for the years 1939 and 1948 to 1952 and quarterly for the year 1952. Particulars of unemployment percentages at intervals since 1911 will be found on page 324 :—

**UNEMPLOYMENT IN REPORTING TRADE UNIONS : AUSTRALIA.**

Period.	Unions Reporting.	Number of Members.	Members Unemployed.	
			Number.	Proportion of Membership.
1939 (Average for year)	396	476,918	45,967	9.7
1948	380	761,104	6,533	0.9
1949	377	790,630	(a) 15,342	(a) 2.0
1950	375	827,256	6,659	0.8
1951	374	860,525	5,776	0.7
1952	366	856,126	24,247	2.9
1952 March Quarter	366	862,607	9,078	1.1
June	366	857,126	19,023	2.2
September	366	844,848	33,907	4.0
December	366	859,925	34,920	4.1

(a) Includes all members of reporting unions indirectly affected by the dispute in the coal-mining industry ; those directly affected are, however, excluded.

NOTE.—Similar figures for each of the four quarters of the years since 1912 will be found in the *Labour Report*.

The highest percentage of unemployed (30.0) was recorded in the quarter ended June, 1932.

(iii) *Australia, Industrial Groups, 1951 and 1952.* Below are shown the percentages unemployed in industrial groups. Industries or occupations in which employment is stable, such as railways, and those which are subject to exceptional fluctuations, such as wharf labour, agricultural, pastoral, etc., are not included. Other occupations—domestic, hotel employees, etc.—are included in the "Other and Miscellaneous" group, as their returns are not sufficiently representative. The figures are averages of four quarters for the years stated :—

**UNEMPLOYMENT IN REPORTING TRADE UNIONS IN INDUSTRIAL GROUPS : AUSTRALIA.**

(iv) *States, 1951 and 1952.* In making interstate comparisons of unemployment percentages, allowance must be made for the circumstances that the industries included in the returns from trade unions are not quite identical in the various States, and that for some States the returns are more representative than for others. The State percentages shown below, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of the trend of unemployment within each State as estimated or recorded by secretaries of those trade unions which supply returns.

#### UNEMPLOYMENT IN REPORTING TRADE UNIONS.

3. **Commonwealth Unemployment and Sickness Benefits.**—Details of conditions governing the payment of unemployment and sickness benefits under the Social Services Consolidation Act 1947-1952, and tables showing numbers on benefit and payments made, may be found in Chapter XIV.—Welfare Services.

### § 3. Commonwealth Employment Service.

The Commonwealth Employment Service was established under Section 47 of the Re-establishment and Employment Act 1945, and under the Social Services Legislation Declaratory Act 1947.

The principal function of this Service, as set out in Section 48 of the first-mentioned Act, is to provide services and facilities in relation to employment for the benefit of persons seeking to change employment, or to engage labour, and to provide facilities

to assist in bringing about and maintaining a high and stable level of employment throughout the Commonwealth. The Act also gives the Service a number of specific functions in relation to the re-establishment of ex-servicemen.

The Service also assists in the administration of the Unemployment and Sickness Benefits, provided under the Social Services Consolidation Act 1947-1952, as well as the Re-employment Allowance, provided under the Re-establishment and Employment Act for certain classes of discharged members of the Forces. All persons who wish to claim unemployment benefits or re-employment allowances must register with their residential Employment Office which is responsible for checking their claim and for certifying whether or not suitable employment can be offered to them.

In addition to giving advice on employment problems through a network of District Employment Offices, the Service provides free vocational guidance in each State other than New South Wales by means of a staff of qualified psychologists. (In New South Wales a similar service is provided by officers of the New South Wales Department of Labour and Industry and Social Welfare who act as agents for the Service in this regard.) While vocational guidance is available to any individual, it is provided particularly for juveniles entering employment for the first time, for ex-servicemen and for physically and mentally handicapped persons. Invalid pensioners being considered by the Department of Social Services for training under the provisions of the Social Services Consolidation Act 1947-1952 are examined by the Vocational Guidance Branch before training is provided. During the twelve months ended June, 1952, the Service provided vocational guidance for 9,840 individuals.

Under the scheme operated by the International Refugee Organization for the resettlement of Displaced Persons from Europe following the 1939-45 War, the Commonwealth Employment Service is responsible for placing the workers amongst these people in employment where their services will be of most use in increasing production. Up to 30th June, 1952, a total of 101,913 Displaced Persons had been so placed.

Towards the middle of 1950 the Service assumed a new responsibility, that of placing migrants from Great Britain under the Commonwealth-Nominated Migration Scheme. Following the agreements entered into with the Dutch, West German and Italian Governments for the entry of selected European workers into the country, the Commonwealth Employment Service has undertaken the initial placement of such persons.

Since early in 1951, the Commonwealth Employment Service has been responsible for the registration, medical examination, interview and call-up of young men for training in the Armed Forces under the National Service Acts 1951, which are administered by the Department of Labour and National Service. The Service is also responsible for administering the provisions of the Act relating to the protection of the rights of National Service trainees in relation to their civil employment.

In association with its placement activities, the Commonwealth Employment Service carries out regular surveys of the labour market in all areas and supplies detailed information on the employment situation to Government Departments and instrumentalities and to the public. In order to assist in making effective placements, job analysis studies of Australian occupations are also made.

The Service operates within the Employment Division of the Department of Labour and National Service, and is under the control of the Permanent Head of that Department. It functions on a decentralized basis. The Central Office is in Melbourne, and there is a Head Office in the capital city of each State, with 118 District Employment Offices and Branches in suburban and the larger provincial centres, and with 246 agents in the smaller country centres who are responsible to the various District Employment Offices. The District Offices and Branches are distributed as follows:—New South Wales, 46; Victoria, 29; Queensland, 19; South Australia, 9 (including Darwin); Western Australia, 11; Tasmania, 4.

The Service completed its sixth year of operation in May, 1952, and statistics of the principal items of business transacted during the year ended June, 1952, were as follows:—applicants for employment—new registrations 500,178, referred to employers 381,991, placed in employment 271,125; vacancies—new notifications 387,888, unfilled at end of year 37,930; persons receiving advice or information 567,017.

With the setting up of the Commonwealth Employment Service most of the State Labour Exchange Organizations existing previously were superseded. Details of the organization and administration of these exchanges in the several States were given in *Labour Report* No. 30, page 133.

### § 4. Industrial Disputes.

1. **General.**—Information with regard to the collection of particulars and the methods of tabulation of industrial disputes involving stoppage of work are given in previous issues of the Official Year Book, and also in the annual *Labour Report*.

In annual tabulations particulars are included of all disputes which either commenced or were current during the year under review. As regards "number of disputes", "establishments involved", and "workpeople involved", therefore, duplication will take place in respect of those disputes which started in and were unsettled at the end of a preceding year; the number involved will, however, be indicated in a footnote, to permit of due allowance being made in any calculations made from the tables.

2. **Industrial Disputes involving Stoppage of Work, Classified in Industrial Groups, 1951 and 1952.**—The following table gives for Australia as a whole particulars of industrial disputes which either commenced or were current during 1951 and 1952, classified according to industrial groups. Figures for States and Territories on a comparable basis may be found in the issues of the *Labour Report* for these years.

#### INDUSTRIAL DISPUTES IN INDUSTRIAL GROUPS: AUSTRALIA, 1951 AND 1952.

Class.	Industrial Group.	Number.	Establishments Involved.	Workpeople Involved.			Working Days Lost.	Estimated Loss in Wages (£.)
				Directly.	In-directly. (a)	Total		
1951.(b)								
I.	Wood, Furniture, etc.	1	2	105	..	105	420	800

XIV.	Miscellaneous	7	7	3,094	..	3,094	3,575	10,320
	<b>Total (c)</b>	<b>1,627</b>	<b>7,371</b>	<b>488,178</b>	<b>17,556</b>	<b>503,734</b>	<b>1,163,504</b>	<b>3,439,850</b>

(a) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (b) Three disputes in Queensland and one in Tasmania involving respectively five and one establishments and 357 and twenty workpeople commenced in 1950 and were uncompleted in that year. Particulars of these disputes have been included in statistics of disputes for both 1950 and 1951. Particulars of three disputes involving three establishments and 271 workpeople (directly), have been included in the statistics of both 1951 and 1952. These disputes occurred in New South Wales. (c) These figures exclude approximately 85,000 working days lost in all States as a result of the ban on overtime in the stevedoring industry during April, May and June, 1952.

3. **Industrial Disputes, States and Territories, 1939 and 1948 to 1952.**—The following table gives particulars of the number of industrial disputes in each State and Territory,

# WAGE AND SALARY EARNERS IN CIVILIAN EMPLOYMENT: AUSTRALIA 1939 AND 1943 TO 1953

BY MAIN INDUSTRIAL GROUPS

(EXCLUDING RURAL AND PRIVATE DOMESTIC WORKERS)

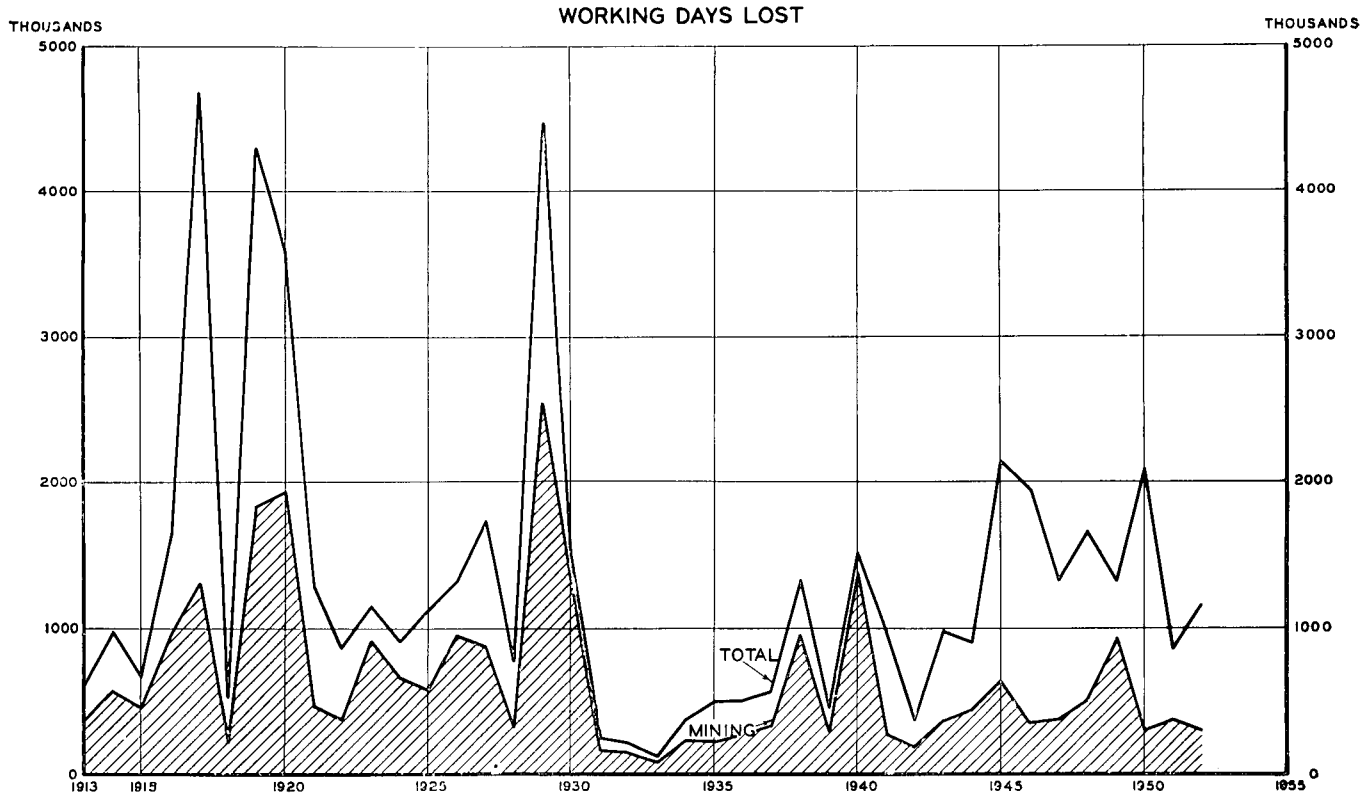

# INDUSTRIAL DISPUTES: AUSTRALIA, 1939 to 1952

## WORKING DAYS LOST - INDUSTRIAL GROUPS

# INDUSTRIAL DISPUTES: AUSTRALIA, 1913 TO 1952

together with the number of workpeople involved, and the losses in working days and wages caused by disputes which either commenced or were current during each of the years 1939 and 1948 to 1952.

## INDUSTRIAL DISPUTES : STATES AND TERRITORIES.

State or Territory.	Year.	Number.	Establishments Involved.	Workpeople Involved.			Working Days Lost.	Estimated Loss in Wages. (£.)
				Directly.	Indirectly. (a)	Total.

1952b	1,627	7,371	488,178	17,556	505,734	1,163,504	3,439,850	

(a) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute. (b) See note (c) on page 310.

Detailed information in regard to the disputes during the above-mentioned and previous years is given in the *Labour Report*.

4. Duration of Industrial Disputes, 1952.—The following table gives particulars of industrial disputes during 1952 according to certain adopted limits of duration. A table giving details for 1951 may be found in *Labour Report*, 1951, No. 40, page 134.

## DURATION OF INDUSTRIAL DISPUTES : AUSTRALIA, 1952.

Limits of Duration.	Number.	Workpeople Involved.			Working Days Lost.	Estimated Loss in Wages. (£.)
		Directly.	Indirectly. (a)	Total.		
1 day and less .. .. .	1,064	345,076	4,369	349,445	330,392	966,835
2 days and more than 1 day	242	78,735	1,665	80,400	125,510	393,737
3 " " " 2 days	100	20,289	377	20,666	55,177	168,541
Over 3 days and less than 1 week .. .. .	54	13,124	1,855	14,979	53,470	178,187
1 week and less than 2 weeks	86	16,979	3,455	20,434	124,761	357,836
2 weeks " " 4 weeks	46	6,362	3,844	10,206	123,475	329,810
4 " " " 8 weeks	18	2,290	1,637	3,927	91,805	290,768
8 weeks and over .. .. .	17	5,323	354	5,677	258,914	754,136
Total .. .. .	1,627	488,178	17,556	505,734	1,163,504	3,439,850

(a) Persons thrown out of work at the establishments where the stoppages occurred but not themselves parties to the dispute.

5. Causes of Industrial Disputes.—(i) *General*. In previous issues of the Official Year Book the causes of industrial disputes were classified in some detail for all industries combined. Commencing with this issue a new classification has been introduced and stoppages in industries other than "coal-mining" and "stevedoring" have been analysed separately. This segregation has been made because in these two industries the pattern of the disputes differs significantly from that in other industries.

Under the new classification, causes are grouped under four main headings:—(1) Wages, Hours and Leave; (2) Physical Working Conditions and Questions of Managerial Policy; (3) Trade Unionism; (4) Other Causes. The first group is restricted to disputes involving general principles relating to wages, hours and leave, minor questions regarding the claims to pay or leave by individual employees being included under managerial policy. The second group comprises disputes regarding physical working conditions and general questions of managerial policy, which term covers those arising from disciplinary action, the promotion of employees, the employment of particular individuals, personal disagreements between employees and supervisory staff and disputes arising from the computations of wages, leave, etc., in individual cases. The third group, Trade Unionism, includes only stoppages against employment of non-unionists, inter-union and intra-union disputes, and sympathy stoppages in support of employees in another industry. The last group comprises disputes by way of protest against situations not arising from the usual relationship of employer and employee, e.g., political matters, and cases (mainly occurring in the coal-mining industry) where the cause of the stoppage is not officially made known to the management.

As the items included under these headings differ somewhat from those included under the similar headings used for classifying causes of disputes in years prior to 1950 the figures for the years 1950 to 1952 are not strictly comparable with those for earlier years.

(ii) *Causes of Disputes, Australia*. The following table gives particulars of industrial disputes according to causes for the years 1939 and 1948 to 1952.

## CAUSES OF INDUSTRIAL DISPUTES : AUSTRALIA.

(a) Owing to the use of a new classification, figures for 1950 to 1952 are not strictly comparable with those for earlier years.

The following table shows the causes of industrial disputes during 1951 and 1952 in two broad groups of industries:—(i) Coal-mining and stevedoring, (ii) all other industries. These figures are not available for earlier years.

6. Results of Industrial Disputes.—In previous issues of the Official Year Book, tables were included showing analyses of the results of industrial disputes over a period of years. Under a new method of collection of the basic data, the information on which these analyses were based is no longer available for the majority of disputes and the compilation has therefore been discontinued.

7. Methods of Settlement.—In the following table industrial disputes for the years 1939, 1951 and 1952 have been classified according to method of settlement. As disputes occurring in the coal-mining and stevedoring industries constitute the majority of all disputes, separate tabulations have been made for such disputes for the years 1951 and 1952 and these are shown in the table:—

INDUSTRIAL DISPUTES : METHODS OF SETTLEMENT, AUSTRALIA.(a)

Method of Settlement.	1939.	1951.			1952.		
		Coal-mining and Stevedoring.	Other Industries.	All Industries.	Coal-mining and Stevedoring.	Other Industries.	All Industries.

Total	459,154	470,453	382,072	852,525	443,021	712,621	1,155,642

(a) As there are usually unfinalized disputes at the end of each year, totals in the above table will not necessarily agree with those shown in preceding tables.

Prior to 1947 the majority of disputes were settled by private negotiation, the proportion so settled since 1913 ranging between 59 per cent. in 1942 and 81 per cent. in 1937. In 1947 and subsequent years, however, the majority of disputes have been settled by "other methods". The percentage settled by private negotiation was 20 in 1951 and 22 in 1952. The proportion of dislocations settled under State or Commonwealth industrial legislation has varied considerably during the period under review, ranging between 3 per cent. in 1915 and 22 per cent. in 1913. The proportion was 17 per cent. in 1951 and 13 per cent. in 1952. In connexion with the comparatively large number of disputes which are classified as having been settled by "other methods", many stoppages of work occur each year, principally at collieries, the cause of which is not officially known to the employers or their representatives. Such stoppages usually last for one day, and work is resumed without negotiations for a settlement of the trouble. In 1951 the percentage of disputes settled by "other methods" rose to 63 while the percentage in 1952 was 65.

## F. LABOUR ORGANIZATIONS.

### § 1. Labour Organizations in Australia.

1. **Registration.**—(i) *Under Trade Union Acts.* In previous issues of the Official Year Book (see No. 39, page 448) reference was made to the registration of trade unions under the Trade Union Acts. In general the available information under this heading is regarded as inadequate for statistical purposes.

(ii) *Under State Industrial Legislation.* Information with regard to registrations of employers' associations and trade unions under the various State Industrial Arbitration Acts will be found in previous issues of the Official Year Book (see No. 39, page 448).

(iii) *Under the (Commonwealth) Conciliation and Arbitration Act.* Under Part VI. of the Conciliation and Arbitration Act any employer or association of employers in any industry who has employed not less than 100 employees during the six months preceding application for registration, or any association of not less than 100 employees in any industry may be registered.\* Registered unions include both interstate associations and associations operating within one State only. Registration under Commonwealth legislation began in 1906. In that and the four years following, there was but one union of employers; another was registered in 1911. The unions of employees registered in 1906 were 20, with 41,413 members. At the end of 1952 the number of employers' organizations registered under the provisions of the Commonwealth Conciliation and Arbitration Act was 53. The number of unions of employees registered at the end of 1952 was 151, with a membership of approximately 1,344,950 representing 82 per cent. of the total membership of all trade unions in Australia.

2. **Particulars regarding Trade Unions.**—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organizations:—(i) the local independent; (ii) the State; (iii) the interstate; and (iv) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organization of interstate or federated unions vary greatly in character. In some unions the State organizations are bound together under a system of unification with centralized control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. The leading characteristics of each of these types were briefly outlined in *Labour Report* No. 2 (pp. 7-9) issued by this Bureau.

\* Under the Arbitration (Public Service) Act an association of less than 100 employees may be registered as an organization, provided that its members comprise at least three-fifths of all persons engaged in that industry in the Service. Such organizations are included in the figures shown below.

(ii) *Number and Membership.* As already stated, the figures for trade unions registered under the Acts do not represent the position of unionism in Australia. In 1912 the Labour and Industrial Branch of the Commonwealth Bureau of Census and Statistics was established and with the cordial co-operation of the officials of the labour organizations comprehensive figures relating to the development of organized labour are now available. The following table shows the position at the end of 1939, 1951 and 1952 :—

**TRADE UNIONS : NUMBER AND MEMBERSHIP.**

State or Territory.	Number of Separate Unions.			Number of Members.			Percentage Increase in Membership.(a)		
	1939.	1951.	1952.	1939.	1951.	1952.	1939.	1951.	1952.
New South Wales	200	225	223	358,391	678,338	649,163	3.4	5.6	- 4.3
Victoria ..	149	156	159	216,803	433,407	416,349	0.8	6.7	- 3.9
Queensland ..	114	128	129	180,653	277,037	274,908	6.5	5.5	- 0.8
South Australia ..	117	137	139	67,282	140,067	137,495	8.7	1.9	- 1.8
Western Australia	141	152	151	67,833	105,507	105,462	0.1	1.9	- 0.0
Tasmania ..	79	101	98	22,062	47,413	46,948	4.8	5.3	- 1.0
Northern Territory	4	17	15	761	2,764	2,340	5.6	13.4	-15.3
Australian Capital Territory ..	15	29	31	1,685	5,738	4,877	9.6	0.2	-15.0
Australia ..	(b) 380	(b) 359	(b) 360	915,470	1,690,271	1,637,542	3.4	5.3	- 3.1

(a) On preceding year. (b) Without interstate duplication. See letterpress below.

NOTE.—Minus sign (—) denotes decrease.

In the table just given, under the heading "Number of Separate Unions", a union with members in a State is counted as one union within that State. The figures by States do not add to the Australian total (shown in the last line) because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

Because of the difficulties involved, the collection of statistics relating to the "Number of Branches" of Trade Unions appearing in issues of the Official Year Book prior to No. 39 has now been discontinued.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members thereof in Australia at the end of each of the years 1939, 1951 and 1952. Compared with 1939, membership in 1952 had increased by 79 per cent.

**TRADE UNIONS : INDUSTRIAL GROUPS, AUSTRALIA.**

Industrial Group.	1939.		1951.		1952.	
	No. of Unions.(a)	No. of Members.	No. of Unions.(a)	No. of Members.	No. of Unions.(a)	No. of Members.

<b>Total ..</b>	<b>380</b>	<b>915,470</b>	<b>359</b>	<b>1,690,271</b>	<b>360</b>	<b>1,637,542</b>

(a) Without interstate duplication. See letterpress above.

(iv) *Trade Unions : Numbers of Male and Female Members and Ratio to Wage and Salary Earners, Australia.* The following table shows the estimated percentages of wage and salary earners in employment who are members of trade unions. As current estimates of wage and salary earners in employment do not include employees engaged in rural industry or females in private domestic service the percentages have been calculated on figures obtained by adding to the end of year estimates (see page 303 above) the number of employees in rural industry and females in private domestic service recorded at the Census of June, 1947. For this reason, and also because the membership of trade unions includes some persons not in employment, the percentages shown in the table must be regarded as approximations.

**TRADE UNIONS : NUMBER OF MALE AND FEMALE MEMBERS AND RATIO TO TOTAL WAGE AND SALARY EARNERS(a), AUSTRALIA.**

Particulars.	1939.	1948.	1949.	1950.	1951.	1952.
<b>MALES.</b>						
Number of Members of Unions ..	778,336	1,172,676	1,226,818	1,301,868	1,368,694	1,354,248

<b>FEMALES.</b>						
Number of Members of Unions ..	137,134	283,132	294,096	303,476	321,577	283,294
Estimated ratio of Members to Number of Wage and Salary Earners in Employment .. .. %	24	40	41	40	42	40
<b>PERSONS.</b>						
Number of Members of Unions ..	915,470	1,455,808	1,520,914	1,605,344	1,690,271	1,637,542
Estimated ratio of Members to Number of Wage and Salary Earners in Employment .. .. %	44	56	57	58	60	60

(a) Includes allowance for unemployed.

(v) *Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated unions in 1952 :-

**INTERSTATE OR FEDERATED TRADE UNIONS : AUSTRALIA(a), 1952.**

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States.	
Number of Unions ..	14	14	17	38	59	142
„ „ Members ..	34,878	46,061	121,121	420,240	827,331	1,449,631

(a) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory and in the Australian Capital Territory.

The number of organizations operating in two or more States increased from 72 in 1912 to 142 in 1952, and the ratio of the membership of such organizations to the total membership of all organizations rose from 65 to 89 per cent. during the same period.

3. **Central Labour Organizations.**—In each of the capital cities and in a number of industrial centres elsewhere, delegate organizations, consisting of representatives from a group of trade unions, have been established. Their revenue is raised by means of a per capita tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council, or the Labour Federation. In Western Australia a unified system of organization extends over the industrial centres throughout the State. In this State there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, to which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are, as a matter of fact, independent bodies.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith in each State at the end of the year 1952 :—

**CENTRAL LABOUR ORGANIZATIONS : NUMBER, AND UNIONS AND BRANCH UNIONS AFFILIATED, 1952.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Total.
Number of Councils . .	11	9	12	6	10	5	1	1	55
Number of Unions and Branch Unions affiliated . . . . .	272	283	141	130	395	104	3	19	1,347

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

A Central Labour Organization, called the Australasian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the Trade Unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The Australasian Council is based on the Metropolitan Trades and Labour Councils in each State, such bodies having the right to appoint two representatives to act on the Executive of the Council. The Metropolitan Trades and Labour Councils are the branches of the Australasian Council. In addition to the representatives

from the Metropolitan Councils, the Executive consists of four officers—the President, two Vice-Presidents, and a Secretary, who are elected by and from the All-Australian Trade Union Congress.

The objective of the Council is the socialization of industry, i.e., production, distribution and exchange. The methods to be adopted are:—(a) The closer organization of the workers by the transformation of the Australasian Trade Union Movement from the craft to an industrial basis by the establishment of one Union in each industry; (b) the consolidation of the Australasian Labour Movement with the object of unified control, administration and action; (c) the centralized control of industrial disputes; and (d) educational propaganda among unions. The Australasian Council of Trade Unions is the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the Trade Union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the Annual International Labour Conference.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

## § 2. International Labour Organization.

The International Labour Organization originated in the Peace Treaty of 1919 which made provision for the holding of International Labour Conferences and the institution of the International Labour Office. In the inter-war period, the International Labour Organization was an autonomous associate of the League of Nations, and in 1946 became the first of the specialized agencies of the United Nations. Under the terms of agreement, the United Nations recognizes the International Labour Organization as a specialized agency having responsibility in the field defined by its Constitution which embraces labour conditions, industrial relations, employment organization, social security, and other aspects of social policy. The Organization has three basic parts. These are the International Labour Conference, its highest authority, which, as a rule, meets annually; the Governing Body, its executive council which usually meets four times a year; and the International Labour Office which provides the secretariat of the Organization. The Conference is composed of national delegations comprising two government delegates and one delegate each of employers and workers, together with their advisers. The Governing Body comprises the representatives of sixteen governments, eight worker members and eight employer members. Particulars are given in the *Labour Report* of the proceedings at International Labour Conferences up to the 35th Session, which opened in Geneva on 4th June, 1952.

### G. COMPARATIVE INDEX-NUMBERS.

In order to show the relative movements of certain price and related data, the following table of annual and quarterly index-numbers for the six capital cities combined has been compiled with a common base 1911 = 1,000.

## COMPARATIVE INDEX-NUMBERS FOR THE SIX CAPITAL CITIES COMBINED.

(Base of each Group : Weighted Average of Six Capital Cities 1911 = 1,000 (a).)

Period.	Retail Price Index-numbers.						Nominal Wages, Adult Males.	Real Wages. (c)	Proportion of Trade Unionists Unemployed.
	Food and Groceries.	Housing (4 and 5 Rooms). (b)	Food, Housing (4 and 5 Rooms) ("B" Series).	Clothing.	Miscellaneous.	Total "C" Series Index.

1911 ..	1,000	1,000	1,000	(d)1,000	(d)1,000	(d)1,000	1,000	1,000	4.7
1914 ..	1,144	1,082	1,121	1,140	1,140	1,140	1,081	948	8.3
1921 ..	1,902	1,410	1,717	1,883	1,537	1,680	1,826	1,087	11.2
1928 ..	1,761	1,743	1,755	1,507	1,537	1,675	1,963	1,172	10.8
1932 ..	1,425	1,336	1,390	1,215	1,458	1,377	1,639	1,190	29.0
1938 ..	1,584	1,540	1,568	1,253	1,463	1,488	1,799	1,209	8.7
1939 ..	1,657	1,577	1,626	1,271	1,465	1,526	1,846	1,210	9.7
1945 ..	1,849	1,595	1,746	2,155	1,767	1,868	2,339	1,252	1.2
1946 ..	1,852	1,596	1,748	2,276	1,776	1,900	2,400	1,263	1.4
1947 ..	1,967	1,597	1,816	2,367	1,825	1,971	2,598	1,318	1.2
1948 ..	2,245	1,601	1,982	2,637	1,913	2,148	2,914	1,357	0.9
1949 ..	2,492	1,605	2,128	3,019	2,037	2,349	3,210	1,367	(e) 2.0
1950 ..	2,800	1,613	2,313	3,455	2,184	2,589	3,596	1,389	0.8
1951 ..	3,649	1,649	2,827	4,156	2,555	3,124	4,495	1,439	0.7
1952 ..	4,516	1,728	3,370	4,657	2,980	3,645	5,241	1,438	2.9
Quarter—									
1952.									
March ..	4,298	1,672	3,219	4,523	2,783	3,481	5,036	1,447	1.1
June ..	4,589	1,702	3,402	4,685	2,967	3,661	5,156	1,408	2.2
September ..	4,633	1,750	3,448	4,709	3,072	3,714	5,345	1,439	4.0
December ..	4,544	1,789	3,411	4,712	3,098	3,722	5,428	1,458	4.1

(a) The index-numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing and food and groceries, since the cost in 1911 in each group or combination of groups is made equal to 1,000. (b) See footnote (b) on page 265.

(c) Index of nominal weekly wage rates for adult males divided by "C" Series Retail Prices Index-number.

(d) Taken back from true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of all Houses).

(e) Includes all members of reporting unions indirectly affected by the industrial disturbance in the coal-mining industry; those directly affected are, however, excluded.

## CHAPTER IX. POPULATION.

### § 1. Population Statistics.

Population statistics relating to Australia or to the component States and Territories as at specific dates are of two types—

- (i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.
- (ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date :
  - (a) Original estimates for dates subsequent to a census made before another census is taken.
  - (b) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-monthly period such mean is calculated as described in § 4. As populations at specific dates are used in these calculations consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy all population statistics shown in this Year Book for dates up to 30th June, 1947, and all mean populations for calendar years up to 1946 and financial years up to 1946-47 are final. Population statistics for dates or years subsequent to these are subject to revision when another census is taken.

Since the establishment of the Commonwealth Bureau of Census and Statistics the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic demographic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration records, both oversea and interstate, and efforts were directed towards their improvement. The 1911 Census disclosed an error in the precensal estimates equivalent to a proportion of 14.5 per cent. and 10.0 per cent., respectively, of recorded male and female oversea departures from Australia. These proportions were used as adjusting factors to recorded oversea departures during the intercensal period 1911-21. These adjusting factors were reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were discontinued altogether after the 1933 Census. From the results of the 1947 Census it would again appear that the accuracy of the records of oversea migration is such that in future little adjustment to recorded figures will be necessary for Australia as a whole.

It is improbable that the same degree of accuracy as has been attained in the record of oversea migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, rail and air, but it is impracticable, with occasional important exceptions, to record the movements by road.

### § 2. The Census.

1. *Census-taking.*—Although "musters" of the population were carried out at least annually from 1788 to 1825, the first regular Census in Australia was not taken until 1828 when a count of the population of the Colony of New South Wales was made. Subsequent Censuses were taken sporadically in the various colonies until 1881, when a Census was taken on the same date throughout Australia.

In 1891 and 1901 Census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first Census

for the Commonwealth of Australia. The second was taken in 1921 and the third should have been taken in 1931, but, because of restrictions on Governmental expenditure at that time, was deferred until 30th June, 1933.

Owing to the 1939-45 War, the fourth Commonwealth Census, due to be taken in 1941, was deferred until June, 1947, the Census for the whole of Australia being taken as on the night between 29th and 30th June, 1947. The next Commonwealth Census will be taken in 1954.

2. Population recorded at Censuses.—State and Territorial totals recorded at the Censuses taken over the period 1828 to 1947 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) as they existed at the date of each Census except that Northern Territory has been shown separately from South Australia for three censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter I, § 3. and § 4.

The results of the 1947 Census of the Australian External Territories will be found in § 12 of this chapter.

The population of each sex enumerated in Australia as a whole at each Census since 1881 was as follows :—

**POPULATION OF AUSTRALIA AT EACH CENSUS, 1881 TO 1947.**

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Date.	Males.	Females.	Persons.
3rd April, 1881 ..	1,214,913	1,035,281	2,250,194
5th April, 1891 ..	1,705,835	1,471,988	3,177,823
31st March, 1901 ..	1,977,928	1,795,873	3,773,801
3rd April, 1911 ..	2,313,035	2,141,970	4,455,005
4th April, 1921 ..	2,762,870	2,672,864	5,435,734
30th June, 1933 ..	3,367,111	3,262,728	6,629,839
30th June, 1947 ..	3,797,370	3,781,988	7,579,358

3. Increase since 1881 Census.—The increases in the populations of the several States and Territories and of Australia as a whole during the last six intercensal periods were as shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

## POPULATION : INTERCENSAL INCREASES.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	1881-1891 (10 years).	1891-1901 (10 years).	1901-1911 (10 years).	1911-1921 (10 years).	1921-1933 (12½ years).	1933-1947 (14 years).
NUMERICAL INCREASE.						
New South Wales ..	(a)377,312	(a)227,709	(a)293,602	453,637	500,476	383,991

## PROPORTIONAL INCREASE—PER CENT.

New South Wales ..	50.32	20.20	21.67	27.55	23.83	14.76
Victoria ..	32.33	5.35	9.53	16.40	18.87	12.88
Queensland ..	84.39	26.52	21.62	24.79	25.34	16.77
South Australia ..	14.15	13.57	14.01	21.20	17.33	11.21
Western Australia ..	67.57	269.86	53.22	17.94	31.89	14.50
Tasmania ..	26.76	17.60	10.86	11.80	6.46	12.95
Northern Territory ..	41.93	-1.78	-31.20	16.83	25.42	124.08
Aust. Cap. Territory ..	(b)	(b)	(b)	50.06	247.86	88.95
Australia ..	41.22	18.75	18.05	22.01	21.97	14.32

## AVERAGE ANNUAL RATE OF INCREASE—PER CENT.

New South Wales ..	4.16	1.86	1.97	2.46	1.76	0.99
Victoria ..	2.84	0.52	0.91	1.53	1.42	0.87
Queensland ..	6.31	2.38	1.98	2.24	1.86	1.11
South Australia ..	1.33	1.28	1.32	1.94	1.31	0.76
Western Australia ..	5.30	13.97	4.36	1.66	2.29	0.97
Tasmania ..	2.40	1.63	1.04	1.12	0.51	0.87
Northern Territory ..	3.56	-0.18	-3.67	1.57	1.87	5.93
Aust. Cap. Territory ..	(b)	(b)	(b)	4.14	10.71	4.65
Australia ..	3.51	1.73	1.67	2.01	1.63	0.96

(a) Includes Australian Capital Territory. (b) Part of New South Wales prior to 1911.  
NOTE.—Minus sign (-) denotes decrease.

The numerical increase during the period 1933-47 (14 years) was less by 244,586 than that for the period 1921-33 (12½ years) and the proportional increase declined from 21.97 per cent. for 1921-33 to 14.32 per cent. for 1933-47. During the earlier period the increase corresponds to 1.63 per cent. per annum, and in the latter to 0.96 per cent. per annum.

## § 3. Growth and Distribution of Population.

1. Growth of Population.—The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population

at 31st December in 1788 and thereafter at decennial intervals from 1790 to 1950. Each year from 1947 to 1952 is included in order to show recent fluctuations in greater detail.

## ESTIMATED POPULATION : 1788 TO 1952.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

(a) Previously included with New South Wales. (b) Previously included with South Australia in which Northern Territory was incorporated prior to 1911. (c) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment. (d) Revised estimates based on the results of the Census of Canberra on 14th-16th September, 1951, are as follows:—1947, 17,588; 1948, 19,312; 1949, 22,113; and 1950, 23,629.

Estimates of population for intercensal years are obtained in the manner outlined in § 1. Figures for interstate migration are liable to error owing to the impracticability of tracing movements of motor traffic. The estimates of populations of the Australian Capital Territory and the Northern Territory are particularly affected by this difficulty. In view of the uncertainty of war-time records of interstate migration, the populations of the States subsequent to 30th June, 1943, and until the 1947 Census, were estimated on the basis of natural increase, deaths of defence personnel and overseas migration.

The estimated population as at 31st December each year from 1788 to 1951 on the same basis as in the last table is shown in Demography Bulletin No. 69, 1951. A graph illustrating the growth of the population of Australia and of each State and Territory thereof appears on page 347.

2. Present Numbers.—The population of Australia on 31st December, 1952, was estimated at 8,752,819 persons of whom 4,433,811, or 50.66 per cent., were males and 4,319,008, or 49.34 per cent., were females. The increase during 1952 was 214,085, equal to 2.51 per cent., males having increased by 116,109 or 2.69 per cent., and females by 97,976 or 2.32 per cent. This increase was due to an excess of births over deaths, of 120,053, together with a net gain by migration of 94,032 persons.

3. Proportion of Area and Population, Density and Masculinity.—A previous table shows the estimated number of persons in each of the States and Territories on 31st December, 1952. In the following table the proportions of the total area and of the total population represented by each State or Territory are given, together with the density and the masculinity of population :—

## DENSITY AND MASCULINITY OF POPULATION, 1952.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Proportion of Total Area.	Proportion of Estimated Population, 31st December, 1952.			Density. (a)	Masculinity.(b)

(a) Average number of persons per square mile.

(b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

4. Urban and Rural Distribution.—Particulars of the distribution of the population amongst metropolitan, provincial urban and rural areas in each State and Territory at the 1947 Census were shown in Official Year Book No. 39, pages 521-524.

For Australia, the number of persons and the proportion of the total population in each division were :—metropolitan 3,843,959, 50.72 per cent. ; provincial 1,362,548, 17.98 per cent. ; rural 2,354,248, 31.06 per cent. Migratory population (18,603) accounted for the remaining 0.24 per cent.

At 31st December, 1952, the Metropolitan Divisions contained 50.11 per cent. of the total population of Australia. South Australia had the largest proportion of population residing in the metropolitan area (61.07 per cent.) but was closely followed in this respect by Victoria (59.10 per cent.). Percentages for the other States were :—New South Wales, 47.37 ; Queensland, 37.58 ; Western Australia, 56.31 ; and Tasmania, 30.18.

A feature of the metropolitan population is its high femininity. In 1933, 52.5 per cent. of the metropolitan population was composed of females; in 1947, the proportion had fallen slightly to 51.9 per cent., being highest in Tasmania at 52.3 per cent.

5. **Metropolitan Population : Australia and Other Countries.**—In Australia there is an abnormal concentration of population in the capital cities, which are the only cities of outstanding importance in the various States. A comparison with the capitals of the more important countries is given in the following table :—

**METROPOLITAN POPULATION : AUSTRALIA AND OTHER COUNTRIES.**

State or Country.	Metropolis.	Year.	Metropolitan Population.
New South Wales .. ..	Sydney .. ..	1952	(a) 1,621,040

(a) All figures are as at 31st December except those for cities and towns in Queensland (other than Brisbane), Tasmania and Western Australia (other than Perth) which are as at 30th June. (b) Comprises municipalities of Geelong, Geelong West, and Newtown and Chilwell. (c) Comprises municipalities of Ballaarat and Sebastopol. (d) Comprises municipalities of Bendigo and Eaglehawk. (e) Not available. (f) Includes Fremantle and suburbs. (g) Area enlarged since 1947 Census.

7. Provincial Urban Areas.—The proportion of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Censuses is shown in Official Year Book No. 39, pages 522-3. The following table shows the aggregate population at the 1947 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more inhabitants, irrespective of whether such centres are incorporated separately or not. In addition, the proportion of the aggregate population of these cities and towns to the total population of the State is shown.

**AGGREGATE POPULATION OF CITIES AND TOWNS OF SPECIFIED SIZE :  
1947 CENSUS.**

§ 4. Mean Population.

1. **General.**—Mean populations are calculated for twelve-monthly periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods.

2. **Method of Calculation.**—From 1901 onwards the mean population for any year has been calculated by the formula :—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where *a*, *b*, *c*, *d* and *e*, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters, e.g., in the case of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values *a*, *b*, *c*, *d*, *e*. Section V. of Population and Vital Statistics Bulletin No. 1, 1907 sets out in some detail the principles underlying the adoption of the formula.

3. **Results.**—(i) *Calendar Years.* The following table shows the mean population of each State and Territory for the calendar years 1942 to 1952 :—

(a) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment. (b) Revised estimates based on the results of the Census of Canberra on 14th–16th September, 1951 are as follows :—Year ended 30th June—1948, 18,105; 1949, 19,988; 1950, 22,607; and 1951, 24,063.

## § 5. Elements of Increase.

1. *Natural Increase.*—(i) *General.* The two factors which contribute to the growth of a population are the “natural increase,” i.e., the excess of births over deaths, and the “net migration,” i.e., the excess of arrivals over departures. In earlier issues of the Official Year Book particulars of the natural increase from 1861 are given for each sex and for each State and Territory (*see* No. 22, page 899).

During the present century the rate of natural increase grew until it reached the maximum rate of 17.44 per thousand of population in 1914, but it steadily declined after that year to 7.07 in 1934. There was little change until 1939, but during the war and in the post-war period the rate rose sharply, reaching the level of 14.37 in 1947, and has since remained at between 13 and 14 per 1,000 of population.

In the following table particulars of the natural increase in each State and Territory are given for each sex for each quinquennium from 1901 to 1950 and for the six years 1947 to 1952. For the purposes of this analysis the natural increase for the period from September, 1939 until June, 1947 has been taken as excess of births over civilian deaths, i.e., no account is taken of deaths of defence personnel.

## POPULATION : NATURAL INCREASE (EXCESS OF BIRTHS OVER DEATHS).

(a) Excess of births over deaths per 1,000 of mean population. (b) Part of New South Wales prior to 1911. (c) Excess of births over civilian deaths per 1,000 of mean population from September, 1939 to June, 1947.

NOTE.—Minus sign (-) denotes excess of deaths over births.

The table above shows the decline which has taken place in the rate of natural increase since the beginning of the century. The decline is evident notwithstanding the stepping-up of the rate occasioned by increased births since the commencement of the 1939-45 War and the overstatement due to the omission of deaths of defence personnel. During the first five years of the present century the average increment to the population of Australia by this means was 56,886 persons per annum. The increment rose to 81,695 persons per annum in 1921-25, but thereafter fell to 52,650 persons per annum in the quinquennium 1931-35, increasing during 1936-40 to 54,489. During 1941-45 the average annual excess of births over civilian deaths was 74,750, while during 1946-50 the annual excess of births over deaths was a record high average of 106,035. In the year 1952 the excess was 120,053.

(ii) *Comparison with other Countries.* Notwithstanding its low birth-rate, Australia has a higher rate of natural increase than most European countries, owing to the fact that its death-rate is very low. The following table gives a comparison between the rates of natural increase in 1950 and 1951 for the several States of Australia and for the Dominion of New Zealand, and those of some of the principal countries for which such information is available. Corresponding average annual rates for the period 1909-13 have also been appended.

(a) Excludes full-blood aboriginals. (b) Excludes Maoris. (c) 1911-13. (d) Not available.

2. Net Migration.\*—The other factor of increase in the population, namely, the excess of arrivals over departures, known as "net migration," is, from its nature, much more subject to variation than is "natural increase".

Particulars of the increase by net migration are given below for quinquennial periods from 1901 to 1950 and annually for the six years 1947-52. Disturbances in war-time migration records were caused by interstate troop movements, which prevented accurate count of civilians travelling interstate. Interstate passenger traffic was, for this reason, excluded from migration records from 30th June, 1943 to the date of the Census, 30th June, 1947.

(a) Part of New South Wales prior to 1911. (b) Excludes troop movements from September, 1939 to June, 1947. (c) Excludes interstate migration from July, 1943 to June, 1947. (d) From 1st July, 1947 to 31st December, 1950, no allowance was made for a large unrecorded net inward movement by road into the Australian Capital Territory. From 1st January, 1951, allowance has been made for this movement and the net migration for the year ended 31st December, 1951, includes an adjustment retrospective to 1st July, 1947.

NOTE.—Minus sign (-) indicates excess of departures over arrivals.

There was a loss of population by migration in the first five years of the present century; in the next five quinquennial periods there were varying gains which averaged about 115,000 per quinquennium.

In the five years ended 1935 there was a net emigration of 10,886 and in the five years ended 1940 a net immigration of 43,128. During the war period 1941-45 net immigration fell to 7,809 persons. In 1946 there was a net loss by migration of 15,148

persons due mainly to the departure of refugees and evacuees, and also fiancées, wives and children of British and Allied servicemen but, with increasing transport facilities and the resumption of assisted migration, there was a net gain of 10,611 in 1947, increasing rapidly to 55,115 in 1948, 150,001 in 1949 and 152,505 in 1950. This large net gain was due in great measure to the arrival of successive contingents from Australia's quota of 176,000 former European displaced persons, of whom 156,491 had arrived by the end of 1950. As this flow diminished it was partly offset by new schemes for assisted migrants but nevertheless the total net gain from all sources in 1951 was lower at 111,433 and in 1952 again lower at 94,032. The net gains in each of the last four years were the highest recorded for individual years with the exception of 1919 which included troops returning from the 1914-18 War.

3. **Total Increase.**—The total increase of the population is obtained by combining the natural increase with the increase by net migration. For the period September, 1939 to June, 1947, deaths of defence personnel have been deducted from the total increase so derived. The results of the 1947 Census disclosed some unrecorded movement of population during the intercensal period July, 1933 to June, 1947, and particulars of total increase, after taking into account deaths of defence personnel, have been adjusted for this discrepancy. No separate adjustment has, however, been applied to individual elements of increase during this period, although intercensal discrepancies disclosed by previous Censuses were adjusted on recorded overseas departures.

The annual increments to the population for the last six years are shown below, together with quinquennial figures from 1901 to 1950. For the reasons stated in the previous paragraph, the figures for the period 1933 to 1947 differ from the totals of figures for natural increase and net migration shown in preceding tables by an amount equal to the net total of deaths of defence personnel and unrecorded movement of population.

(a) Part of New South Wales prior to 1911. (b) Includes recorded deaths of defence personnel, whether inside or outside Australia, from September, 1930 to June, 1947. (c) Excludes interstate migration from July, 1943 to June, 1947. (d) From 1st July, 1947, to 31st December, 1950, no allowance was made for a large unrecorded net inward movement by road into the Australian Capital Territory. From 1st January, 1951, allowance has been made for this movement and the net migration for the year ended 31st December, 1951, includes an adjustment retrospective to 1st July, 1947.

NOTE.—Minus sign (-) denotes decrease.

4. Rates of Increase.—(i) *Australia.* The annual rates of increase per cent. of population in Australia during each of the years 1942 to 1952 were as follows:—1942, 0.80; 1943, 0.95; 1944, 1.06; 1945, 1.13; 1946, 1.18; 1947, 1.61; 1948, 2.05; 1949, 3.28; 1950, 3.29; 1951, 2.68; and 1952, 2.51.

The annual rate of increase of the population during the present century has averaged 1.64 per cent., but the results from year to year have deviated widely from this figure. In the following table the period 31st December, 1900 to 31st December, 1952 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population :—

## POPULATION : PERIODICAL RATES OF INCREASE.

Period.	Interval. (Years.)	Total Increase. ('000.)	Average Annual Numerical Increase. ('000.)	Average Annual Rate of Increase. (Per cent.)		
				Natural Increase.	Net Migration.	Total.
1901 to 1913 ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 ..	10	862	86	1.50	0.15	1.64
1924 to 1929 ..	6	630	113	1.28	0.64	1.88
1930 to 1939(a) ..	10	569	57	0.82	0.03	0.85
1940 to 1946(a) ..	7	513	73	0.98	0.03	1.01
1947 to 1952(a) ..	6	1,235	206	1.41	1.23	2.57

(a) Population figures include Australian defence forces overseas from September, 1939 to June, 1947.

Up to 1913 the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914-18 War was a dominating influence in the decade 1914-23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. In the next span, 1924-29, a more settled and prosperous era was experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth-rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression, and immigration ceased—in fact Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the rate of growth of the population receded to 0.85 per cent. per annum. With the outbreak of war in 1939, Australia entered a new phase in her demographic history, the full effects of which will not be seen for some time to come. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The post-war period 1947 to 1952 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in record net gains in each of the four years 1949 to 1952. The annual rate of growth for the period was 2.57 per cent.

Rates of increase from 1881 to 1951 may be found for each State and Territory of Australia in *Demography Bulletin* No. 69, 1951.

(ii) *Various Countries.* The table hereunder gives approximate rates of increase of the population of Australia and its component States, in comparison with those for other countries :—

armed forces overseas at 31st December, 1941.

(d) Not available.

(e) Excludes war losses.

(f) Territory defined by 1947 peace treaty.

NOTE.—Minus sign (—) denotes decrease.

## § 6. Density.

1. **General.**—From certain aspects population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,974,581 square miles, and an estimated population on 31st December, 1952 of 8,752,819, excluding about 47,000 full-blood aboriginals, has a density of only 2.94 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continents the densities are approximately as follows :—Europe (excluding U.S.S.R.), 206; Asia (excluding U.S.S.R.), 123; U.S.S.R., 22; Africa, 17; North and Central America, 23; and South America, 16. The population of Australia has thus about one-sixth of the density of South America and of Africa; about one-eighth of that of U.S.S.R. and of North and Central America; about one-forty-second of that of Asia (excluding U.S.S.R.); and about one-seventieth of that of Europe (excluding U.S.S.R.).

On account of the very large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 2.94 in 1952. Victoria's density, however, has grown from 13.77 to 26.82 and that of New South Wales from 4.43 to 11.06 in the same period.

A map showing the density of population throughout Australia at the 1947 Census appears on pages 349–50. When comparing the density of population of the several States consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The

area of Australia receiving less than 10 inches of rainfall is 38 per cent.; that of the various States is:—New South Wales, 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; and Tasmania, nil.

2. Main Countries of the World.—Number and density of population of the most important countries of the world at 30th June, 1950, are shown in the following table. In some instances, more particularly in the cases of Asia and Africa, the numbers must be considered as rough approximations only.

POPULATION OF THE MAIN COUNTRIES OF THE WORLD :

(a) Number of persons per square mile.

(b) Includes European Territory.

(c) Includes 47,000 full-blood aboriginals.

(d) Population 1949.

(e) Not available.

(f) Population 1946.

The populations shown in the above table are, in the main, in accordance with figures published in the *Demographic Year Book*, 1951, published by the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

## § 7. General Characteristics.

1. Sex Distribution.—(i) *States.* The number of males to each hundred females has been adopted as a measure of the "masculinity" of the population. On pp. 163-5 in the second issue of the Official Year Book a table was included showing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on p. 123, the figures in this table for the years 1901 to 1907 were modified in accordance with the results of the 1911 Census.

With the exception of some dislocation arising from the two World Wars, there has been a continuous diminution of the masculinity of the population. In 1900 the masculinity was 110.55; in 1910, 107.87 and in 1920, 103.47. After 1921, however, the masculinity tended to rise until 1927 (104.54), gradually fell to 100.36 in 1945 but rose again to 102.66 in 1952.

The general reduction in masculinity has resulted from the increasing proportion of the population in the higher age groups, in which females preponderate owing to their greater longevity, and the general long-term fall in the birth-rate. At the 1947 Census the numbers of the sexes were practically equal, but there has since been an increase in masculinity owing to the higher birth rate and to the increase in the number of immigrants, the majority of whom are males.

The following table shows the masculinity of the population at quinquennial intervals from 1901 to 1945 and for each of the years 1947 to 1952:—

## POPULATION : MASCULINITY, 1901 TO 1952.

**DISTRIBUTION OF POPULATION  
IN AUSTRALIA  
CENSUS 1947**

2. Age Distribution.—At each Census the age distribution of the population is recorded by enumeration of individuals. An examination of these recorded age statistics will be found in the *Statistician's Report* on each Census. The numbers recorded in each five-yearly age group (adjusted for ages not stated) at the Censuses of 1933 and 1947 will be found in Official Year Book No. 38, page 547. For each year subsequent to a Census estimates are made to show the population at each age as at 30th June. The current series of estimates is based on the adjusted age distribution at the Census of 30th June, 1947, and on births, recorded ages at death and recorded ages of migrants from 1st July, 1947 to 30th June, 1952.

Particulars of the estimates for single years of age are published in the annual *Demography Bulletin*. Summarized in five-yearly age groups the estimates for the years 1951 and 1952 are as follows:—

**POPULATION : AGE DISTRIBUTION, AUSTRALIA, 1951 AND 1952.**  
(EXCLUDING FULL-BLOOD ABORIGINALS.)

The next table shows the change which has been taking place in the age composition of the population of Australia since 1871. Each successive Census except 1921 has revealed a larger proportion of the population 15 years of age and over than was recorded at the previous Census. Since the 1947 Census, however, available information on which estimates of the age distribution are based indicates that there has been a reversal of this tendency.

**POPULATION : PROPORTIONAL AGE DISTRIBUTION, AUSTRALIA, 1871 TO 1952.**

(a) Latest estimate, 30th June.

3. **Conjugal Condition.**—Of the total population of Australia at the 1947 Census, 47.3 per cent. had never married; 46.4 per cent. were married; 5.6 per cent. were widowed; and 0.7 per cent. were divorced. Of all persons 15 years of age and over, who stated their conjugal condition, 62.0 per cent. were married.

The number of widowed females recorded in Australia in 1947 was 309,383, or nearly three times as many as the number of widowed males. This disparity is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage; and the second is that a larger proportion of males cancel their widowhood by remarriage.

The numbers of divorced males and females at 30th June, 1933 and 1947 in the following table differ slightly from those shown in § 4 of Chapter XII.—Public Justice where the conjugal conditions of those for whom particulars were not given at the Census have been distributed proportionately among the various groups.

(a) Includes persons permanently separated (legally or otherwise).

4. **Dependent Children under 16 years of Age.**—At the 1947 Census 927,453 males and 66,418 females stated they had children under 16 years of age dependent on them at 30th June, 1947, the total number of dependent children under age 16 claimed being 1,962,791, of whom 1,853,314 or 94.4 per cent. were dependent on males and 109,477 or 5.6 per cent. were dependent on females. This represented an average of 2.00 for each male with dependent children and 1.65 for each female with dependent children.

Further information concerning dependent children may be found in Official Year Book No. 38, page 549.

5. **Birthplace.**—At 30th June, 1947, the number of Australian-born was 6,835,171 persons, representing 90.2 per cent. of the population, and the number of oversea-born was 744,187. Of the latter, 56 per cent. were males and 44 per cent. females. Australian residents born in England, Wales, Scotland and Ireland numbered 541,267 while those born in other European countries numbered 110,339, and there were 43,610 of New Zealand birth.

The numbers of persons of Asiatic, African or American birthplace at 30th June, 1947 were respectively 24,096 (British India and Ceylon, 8,160, China 6,404), 7,537 (Union of South Africa, 5,866), and 11,630 (Canada, 4,009, United States of America, 6,232).

For a table showing the number of persons in Australia at each of the last two census dates, classified according to birthplace, reference should be made to Official Year Book No. 38, page 550.

6. **Period of Residence in Australia.**—At the 1947 Census, of persons born outside Australia who stated their period of residence, 5.7 per cent. had resided in Australia for a period of less than 5 years, 11.2 per cent. for less than 10 years, and 14.8 per cent. for less than 15 years. A table showing, for each of the last two Census dates, the number of completed years of residence of persons born outside Australia may be found on page 551 of Official Year Book No. 38.

7. **Nationality.**—At the 1947 Census, 7,540,705 persons, or 99.5 per cent. of the population, were of British nationality. The number of persons in Australia who were born in countries outside the British Commonwealth totalled approximately 128,000, and of this number 38,653, or 30 per cent., were of foreign nationality at 30th June, 1947, the remainder being British subjects mainly by naturalization. The principal foreign nationals in Australia were Italian, 7,172; Chinese, 4,858; Greek, 4,504; United States of America, 3,351; German, 2,361; Yugoslav, 2,096; and Dutch, 2,001. A table showing the nationality of Australian residents at 30th June, 1933 and 30th June, 1947 may be found in Official Year Book No. 38, page 552.

8. **Race.**—The people of Australia may be classified into two groups with respect to racial characteristics, namely, non-indigenous and indigenous. The former group comprises the European and other races who have migrated to Australia and their descendants born in Australia, while the latter group consists of the full-blood aboriginal natives of Australia, whose estimated number at 30th June, 1947, was about 47,000, but who are not included in the general population figures of Australia. The non-indigenous population of Australia is fundamentally British in race and nationality.

At 30th June, 1947, 7,524,129 persons or 99.3 per cent. of the population were of full-blood European race and 0.7 per cent. of non-European and half-caste. Full-blood non-Europeans numbered 21,495 and half-castes 33,734. The principal full-blood non-Europeans in Australia were Chinese, 9,144; Polynesian, 5,332; Natives of India, 2,480; and Syrian, 1,675. There were 27,179 half-caste Australian aboriginals, representing 80.6 per cent. of the total half-caste population. A table showing the comparative numbers of each sex at each of the last two Census dates, classified according to race, may be found in Official Year Book No. 38, page 553.

9. **Religion.**—At the 1947 Census, when the public was informed there was no legal obligation to answer this question, 824,824 or 10.9 per cent. gave no reply. Of males 11.7 per cent. and of females 10.0 per cent. did not state their religion. The number of stated adherents at 30th June, 1947 was greatest for the Church of England, at 2,957,032; then followed Roman Catholic and Catholic combined (1,569,726), Methodist (871,425), Presbyterian (743,540), and Baptist (113,527). In all, 6,672,936, or 99 per cent., professed the Christian faith, 36,562 stated they were of non-Christian religion, 18,708 were classified as indefinite, while 26,328 professed no religion. Further information relative to the religions of the population may be found in a table on page 554 of Official Year Book No. 38.

10. **Industry.**—In the following table the male and female populations of Australia are classified according to the industry in which they are usually engaged. At the Census of 30th June, 1947, 124,439 persons failed to answer the question relating to industry, and the replies of 108,095 persons did not give an entirely satisfactory description of their industry. For practically all of these persons occupation particulars were recorded, and in the table below it has been possible to allocate them to their appropriate industries on the basis of occupational representation in those industries which were adequately described on the Census schedules.

The term "in the work force" includes persons of all ages who are employers, self-employed or working on their own account, wage and salary earners, unpaid helpers engaged in industry, and those who usually work for their living but who have lost their jobs. Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners, and permanent inmates of institutions, are regarded as not being in the work force. Also persons working regularly but for considerably less than normal working hours were instructed to exclude themselves from the work force unless they looked to their earnings from such work for their main livelihood. On the average, 65 in every 100 males and 19 in every 100 females were in the work force, equivalent to 3½ males to every female in the work force.

**POPULATION CLASSIFIED ACCORDING TO INDUSTRY(a) : AUSTRALIA, 1947.**

(a) The numbers of persons whose industry was either not specified or inadequately described have been distributed (see letterpress above). (b) Excludes approximately 40,000 female part-time workers believed to be unrecorded in the work force at the Census.

11. **Occupational Status.**—The term “occupational status” has been substituted for “grade of occupation” formerly in use, and it relates to the capacity in which persons

are engaged in the various branches of industry. At the Census of 30th June, 1947, 29,013 persons gave no answer to the question regarding occupational status, but subsequent tabulations disclosed that all of these persons belonged to the work force.

In 1933, wage-earners who were employed part-time were asked to indicate that fact on the Census Schedule in answer to the question regarding occupational status, and all those who so described themselves are included in the work force for that year. In 1947, however, persons working regularly, but for considerably less than normal working hours, were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

**POPULATION : OCCUPATIONAL STATUS, AUSTRALIA, 1933 AND 1947.**

(a) Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; or (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason. (b) Excludes approximately 40,000 female part-time workers believed to be unrecorded in the work force at the Census. (c) See last preceding paragraph.

12. **Persons not at Work.**—The number of persons who were usually engaged in industry, business, trade or service but were out of a job on 30th June, 1947 was 82,774, consisting of 66,009 males and 16,765 females, or 3.5 per cent. of the males and 2.6 per cent. of the females in the wage-earning group, including those not at work. Only 41 per cent. of unemployment was due to scarcity of work. The balance consisted of those who stated that they were not actively seeking work at the time of the Census, and these in turn consisted almost entirely, and in approximately equal proportions, of those who were indisposed through sickness or accident, and those who were resting between jobs.

Tables showing persons not at work at 30th June, 1947, classified according to cause and duration, may be found in Official Year Book No. 38 (see pp. 1303 and 1304).

13. **Other General Characteristics.**—Questions regarding orphanhood, and the ability to read and write a foreign language (of persons who could not read and write English), were not asked on the schedules of the 1947 Census. Consequently, the latest Census data available concerning these questions are those of the 1933 Census, as published in previous issues of the Official Year Book (see No. 36, pp. 482 and 487).

## § 8. Dwellings.

1. **General.**—In addition to the questions relating to the personal particulars of the individual members of the household there were a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the Census. From the replies to these questions much valuable information was tabulated concerning housing conditions and a comprehensive summary was published in Official Year Book No. 38, pp. 557 to 571. For

the purpose of a Census a "dwelling" is defined as a room or a collection of rooms occupied by a household group living together as a "family unit" whether comprising the whole or only part of a house or other building (including temporary structures). Included in this definition are private houses, flats, tenements, hotels, boarding houses, hospitals, institutions, and any other structure used for the purpose of human habitation.

2. **Number of Dwellings.**—The number of dwellings enumerated at the Census in 1947 is shown in the following table.

**DWELLINGS : STATES, CENSUS, 30th JUNE, 1947.**

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Particulars relating to houses and flats constructed in Australia since the Census in 1947 will be found in Chapter XXIX.—Miscellaneous.

3. **Class of Occupied Dwelling, etc., and Inmates.**—As previously indicated, the dwellings in which the people are housed comprise private houses, tenements, flats, hotels, boarding-houses, charitable institutions, etc. It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate mainly to private dwellings only, i.e., private houses, shares of private houses, tenements and flats.

For Census purposes a "flat" is defined as part of a house or other building ordinarily intended for occupation by a separate family group, and is a self-contained dwelling unit with both cooking and bathing facilities. A "tenement" is part of a house or other building ordinarily intended for occupation by a separate family group but is not a self-contained unit, and consists in the main of a room or rooms with cooking facilities.

Owing to the shortage of houses in Australia in 1947, information was sought at the Census as to the extent of house-sharing, and particulars as recorded are shown separately for 1947 in the following tables. In a number of cases where private houses were shared by more than one family unit, however, only one Householder's Schedule was returned for the whole of the house, instead of separate schedules for each portion occupied separately. These are shown in the tables as "Private Houses (Shared by Two or More Families)" and represent not "occupied dwellings" as defined for Census purposes, but "houses" occupied by more than one family.

In the case of the remaining private houses shared by more than one family, separate schedules were furnished for each portion occupied separately and these portions are shown in the tables as separate dwellings under the heading "Share of Private House".

In the next table, occupied dwellings are distributed according to class and the total numbers of persons in Australia are distributed according to the dwellings in which they were recorded on Census night.

CLASS OF OCCUPIED DWELLING, ETC. AND INMATES : AUSTRALIA, CENSUS, 30th JUNE, 1947.

(EXCLUDING FULL-BLOOD ABORIGINALS AND DWELLINGS OCCUPIED SOLELY BY THEM.)

(a) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (b) Portions of shared private houses in respect of which portions separate Householders' Schedules were furnished.

(v) *Rent per Week of Private Houses of Three to Six Rooms.* Special tabulations of rents were undertaken for tenanted private houses of three to six rooms with walls of wood or of brick or stone. The particulars for this group of private dwellings, which represented about 80 per cent. of all tenanted private houses in Australia, provide a very convenient summary of average rents ruling at the time of the Census.

Rents were summarized for 468,536 tenanted private houses (occupied by one family) in this group. Forty-nine per cent. had walls of brick or stone and 51 per cent. of wood, compared with proportions of 46 and 54 per cent. respectively for all rented private houses in a similar tabulation in 1933. During the intercensal period there was little variation in the numbers of rented houses of three, four and six rooms, but the number of rented houses of five rooms increased by nearly 13 per cent. Brick dwellings were largely responsible for this increase.

The average rent of 25s. per week for all private houses, three to six rooms, of wood, brick or stone in the metropolitan areas at the 1947 Census was 6s. 7d. or 35.7 per cent., higher than the corresponding average in 1933. In the urban provincial sections the average rent was 21s. 3d. per week, or 36.4 per cent. higher than in 1933, while in the rural areas the average rent of 15s. 7d. was 35.5 per cent. higher than that at the 1933 Census.

The following table shows, for metropolitan, urban provincial and rural areas, the average weekly rent (unfurnished) of tenanted private houses of three to six rooms with walls of wood, brick or stone, at the Censuses of 1933 and 1947.

**AVERAGE WEEKLY RENT (UNFURNISHED)(a) OF TENANTED PRIVATE HOUSES (ONE FAMILY), THREE TO SIX ROOMS, WITH WALLS OF WOOD, BRICK OR STONE : AUSTRALIA, 1933 AND 1947.**

(a) Rents relate to all tenanted private houses in 1933 and to tenanted private houses (one family) in 1947.

(vi) *Facilities.* At the 1947 Census, householders were asked for the first time to state whether their dwellings were supplied with electricity, gas and running water, and whether they had such facilities as a bathroom, flush toilet, laundry and cooking facilities. In addition they were asked to indicate the means of cooking mostly used. Statistics of these facilities are given on page 571 of Official Year Book No. 38.

## § 9. Oversea Migration.

1. *Oversea Migration during Present Century.*—Earlier issues of the Official Year Book contain in summary form tables showing the increase of population by net migration from 1861 to the latest date, while the *Demography Bulletin* issued by this Bureau gives this information for individual years. The following table shows, for Australia, arrivals and departures and net migration since 1901. A graph showing oversea migration from 1921 to 1952 appears on p. 348.

## OVERSEA MIGRATION : AUSTRALIA.

Period.	Arrivals.			Departures.			Net Migration.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.

(a) Includes movements of defence personnel. (b) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (-) indicates excess of departures over arrivals.

As the encouragement of immigration by Governmental assistance has been a feature of Australian immigration policy, a clear indication of the significance of migration movements is obtained when "assisted" and "unassisted" movements are distinguished. This has been done, broadly, in the following table.

## "ASSISTED" AND "UNASSISTED" MIGRATION : AUSTRALIA.

Period.	Arrivals.			Departures.	Excess of "Un-assisted" Arrivals over All Departures.		
	Nominated and Selected ("Assisted").	Other ("Un-assisted").	Total.				
1901-05..	..	..	3,867	277,293	281,160	297,953	- 20,660

(a) Includes movements of defence personnel. (b) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (-) indicates excess of departures over "unassisted" arrivals.

It is not possible in the statistics of departures to distinguish the return movement of persons who came to Australia as "assisted" migrants and consequently the separate net migration of "assisted" and "non-assisted" persons cannot be ascertained. Nevertheless the basis on which the above table has been compiled is sufficient to throw into relief the major trends in Australian migration statistics.

During the 1914-18 War, 331,781 members of the Australian Imperial Forces embarked for service overseas and have been included in the departures. The arrivals likewise include the surviving members who returned, so that the net migration of the years affected by such movements understates the true position by the equivalent of war losses (approximately 60,000 all told). During the 1939-45 War and up to 30th June, 1947, Australian defence personnel overseas were included as Australian population irrespective of their whereabouts, and their movements have not been recorded in the migration statistics.

In the fifty-two years 1901-1952 a gross number of 825,656 persons entered Australia in four distinct phases of its encouraged migration programme. The number of these who returned overseas is not known precisely but indications are that it would be relatively small. In the same period the excess of non-assisted arrivals over all departures was only 333,973. Thus it may be seen that during this period the net number of "assisted" migrants was about twice the number of "unassisted", making allowance for war losses and those assisted migrants who did not, in the end, remain in Australia.

As the depression years with which the century opened gave way to a period of more stable economic conditions assisted migration was resumed about 1906. Immigration gained impetus during the years 1910 to 1912, but this movement was interrupted by war in 1914. After the war the resumption of assisted migration was accompanied by a flow of unassisted migrants greater than for many decades, but this movement was interrupted by depression and when encouraged migration was resumed in 1939 it was almost immediately stopped by the outbreak of war in September. In the immediate post-war years encouraged migration was again resumed and the numbers brought to Australia by such means were far greater than for any other comparable period. Included in this number were 170,254 persons from Australia's quota in the re-settlement of former European displaced persons. This special intake invalidates any long-term comparison of the ratio between "assisted" and "unassisted" migrants but, if it is excluded, it is evident that the net gain of "unassisted" migrants in the six years 1947 to 1952 has been higher relative to "assisted" migrants than for any time in the last thirty years.

A detailed review of assisted migration into Australia in recent years is given in § 10.

2. **Classes of Arrivals and Departures.**—(i) *General.* Since 1st July, 1924, all oversea travellers have been classified according to their declared intention in regard to residence made at the time of arrival or departure. For various reasons the intentions of travellers are subject to subsequent modification and the classification headings used must therefore be accepted as indicating intention only. The numbers so classified since 1st January, 1926 are as follows.

MIGRANTS CLASSIFIED ACCORDING TO INTENDED RESIDENCE : AUSTRALIA.  
ARRIVALS.

Period.	Permanent New Arrivals.	Australian Residents Returning from Abroad.	Temporary Visitors.	Total.
1926-30 .. .. .	224,010	121,395	125,029	(a) 470,480
1931-35 .. .. .	54,444	84,554	100,325	239,323
1936-40 .. .. .	(b) 88,712	104,870	127,730	321,312
1941-45 .. .. .	(b) 32,624	11,150	20,151	63,925

1949 .. .. .	18,457	(c) 25,351	39,326	(c) 83,134
1950 .. .. .	20,855	(c) 31,413	45,631	(c) 97,899
1951 .. .. .	22,180	(c) 34,532	45,495	(c) 102,207
1952 .. .. .	30,370	(c) 40,619	50,818	(c) 121,807

(a) Includes 46 arrivals whose period of intended residence was not stated. (b) Includes evacuees arriving in Australia during the war years as follows:—1936-40, 4,543; 1941-45, 12,586. (c) Includes defence personnel from July, 1947 onwards. (d) Includes 78 departures whose length of intended stay abroad was not stated. (e) Includes 5 departures whose length of intended stay abroad was not stated.

(ii) *Permanent Movement.* In the table above "permanent" residence means residence for a year or longer, in Australia in the case of arrivals or overseas in the case of departures.

Although the number of permanent new arrivals increased during each of the eight years prior to 1939 the number in the latter year was considerably below the annual average for the quinquennium 1926-1930. The war caused a large drop from 1940, but after the war the number rose progressively, reaching 174,540 in 1950, the highest on record.

Permanent departures were far more numerous in the years 1928 to 1931 than in earlier years but they declined during each of the six years ended 1937, the number in the latter year being the lowest recorded until the outbreak of war in 1939. As in the case of arrivals, although not to the same extent, the number of Australian residents departing permanently rose rapidly after the war.

Up to and including 1929 there was a considerable net gain of permanent residents, but during 1930 and 1931 there was a heavy net loss. The loss was very much reduced in 1932, 1933 and 1934, whilst during the five years up to and including 1939 there was a net gain in permanent residents of more than 28,000. Except for the arrival of evacuees,

little movement took place during the war period, but in 1946 a net permanent loss of 11,589 persons occurred, owing in large measure to the departure for the United States of America of Australian wives and children of American servicemen, and, when conditions permitted after the war, the departure of Australians to Papua and New Guinea and of large numbers of war evacuees who were returned to their home countries. Subsequently large net gains were recorded, amounting to 48,468 in 1948, 149,270 in 1949, 153,685 in 1950, 110,362 in 1951, and 97,454 in 1952.

(iii) *Temporary Movement.* Temporary movement refers to persons intending residence for periods shorter than one year and includes Australian residents and visitors from overseas. Since 1st July, 1947, it also includes Australian defence personnel irrespective of length of intended residence. Although considerable in number, the temporary movement is of little significance from the point of view of population growth, as it represents principally the movement of business people and tourists.

3. *Extent of Journey.*—(i) *General.* Since 1st January, 1945, the journeys undertaken by passengers have been recorded for Australian overseas migration statistics in two ways: (a) according to country of embarkation or disembarkation and (b) according to country of last or future permanent residence. In the case of a complete journey in a single stage to or from Australia there is no difference in result between the two methods. With multiple-stage journeys to or from an Australian port, however, one method distinguishes only the first stage of outward journeys or the last stage of inward journeys, whilst the second method records the complete journey.

Detailed statistics of overseas journeys are published in the annual *Demography Bulletin* (see Bulletins No. 68, 1950 and No. 69, 1951). In addition, from January, 1951 onwards, statistics distinguishing State of residence have been compiled for special purposes. The following brief explanations indicate the principles followed in the compilation of migration statistics generally.

(ii) *Arrivals.* (a) *Country of Embarkation*—refers to the country in which the passenger embarked on the particular ship or aircraft which brought the passenger to Australia. Therefore in multiple-stage journeys to Australia these statistics refer only to the last booked stage.

(b) *State of Disembarkation*—refers to the State in which the passenger actually disembarked, irrespective of the State to which originally booked or of State of ultimate destination. Passengers embarking on fresh journeys from one Australian port to another State are recorded as interstate migration.

(c) *Country of Last Permanent Residence*—This is taken from the passenger's own statement and is not necessarily the country from which the single-stage or multiple-stage journey to Australia commenced. Permanent residence means residence for one year or longer.

(d) *State of Intended Future Permanent Residence*—In the administration of the encouraged migration schemes large numbers of migrants are disembarked in States other than the State for which they are destined, and their subsequent movements in Australia to State of ultimate destination are recorded as interstate migration in which distinction between individuals is not practicable. The classification by State of intended future permanent residence was introduced to permit compilation of statistics which show the true effect of overseas arrivals on the populations of individual States.

(iii) *Departures.* (a) *State of Embarkation*—refers to the State in which the passenger actually embarked on the ship or aircraft to leave Australia. The interstate travel of any such passengers prior to embarking is recorded as interstate migration.

(b) *Country of Disembarkation*—refers to the intended country of disembarkation from the particular ship or aircraft which takes the passenger from Australia. In multiple-stage journeys from Australia these statistics refer only to the first booked stage and changes in this, subsequent to departure, are not recorded.

(c) *Country of Intended Future Permanent Residence*—refers to the ultimate destination, after a complete single-stage or multiple-stage journey, of the passenger, as intended at the time of embarkation.

(d) *State of Last Permanent Residence*—refers to the State in which the passenger was last resident for a period of 12 months or longer, irrespective of the State in which actual embarkation on an overseas ship or aircraft took place. In the case of temporary visitors leaving Australia who have not resided for at least twelve months in any one State, the State of embarkation is regarded as the State of last permanent residence.

4. **Racial Origin.**—Up to 30th June, 1948, the system of classifying racial origin was a compromise based partly on nationality and partly on racial origin (see para. 5). From 1st July, 1948, this system was superseded by one in which the passenger's statement as to race is restricted to either "European", "Asian", "African" or "Polynesian", only. Statistics based on this system are shown for the years 1950 to 1952 in the following table. Under this system nationality is recorded independently, as indicated in the next paragraph.

#### RACIAL ORIGIN OF ARRIVALS AND DEPARTURES : AUSTRALIA.

Racial Origin.	Arrivals.			Departures.			Net Migration.		
	1950.	1951.	1952.	1950.	1951.	1952.	1950.	1951.	1952.
European ..	247,321	209,533	210,559	95,995	100,170	117,870	151,326	109,363	92,689
Asian ..	2,922	3,889	4,699	1,735	1,944	3,332	1,187	1,945	1,367
African ..	12	13	49	20	5	47	-8	8	2
Polynesian ..	149	205	532	149	88	558	..	117	-26
<b>Total ..</b>	<b>250,404</b>	<b>213,640</b>	<b>215,839</b>	<b>97,899</b>	<b>102,207</b>	<b>121,807</b>	<b>152,505</b>	<b>111,433</b>	<b>94,032</b>

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

5. **Nationality.**—From 1st July, 1924 to 30th June, 1948, nationality of oversea passengers was recorded as "British" or "Alien" only. Racial origin was also recorded and as the particulars of racial origin stated by passengers closely reflected their nationalities and made it possible to present much more detail of "nationality" than was possible on the total "Alien" basis, published statistics were mostly confined to those compiled on the detailed basis according to a composite classification of "nationality or race".

This method was superseded on 1st July, 1948, by one in which each passenger's race was recorded as indicated in paragraph 4 above, and nationality, as shown on each passenger's passport, was recorded independently of race. The principal nationalities recorded on this basis for the years 1950 to 1952 are as follows :—

#### NATIONALITY OF ARRIVALS AND DEPARTURES : AUSTRALIA.

Nationality.	Arrivals.			Departures.			Net Migration.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

6. **Age Distribution.**—The annual *Demography Bulletin* shows particulars of total arrivals and departures of oversea travellers classified according to intention as to

residence (*see para. 2 above*) and dissected into five-yearly age groups (*see Demography Bulletin No. 69 for 1951 figures*). A summary of the age distribution of permanent arrivals and departures during 1951 and 1952 is as follows:—

**AGE DISTRIBUTION OF PERMANENT ARRIVALS AND DEPARTURES : AUSTRALIA, 1951 AND 1952.**

## § 10. Immigration.

### (A) Assisted Migration into Australia.

1. **Joint Commonwealth and States' Scheme.**—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments which operated from 1920 to 1939 may be found in previous issues of the Official Year Book (*see* No. 38, page 576).

2. **Suspension of Assisted Passage Scheme during the 1939-45 War.**—After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

3. **United Kingdom Free and Assisted Passage Agreement, March, 1946.**—(i) *General.* Resumption of migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945, and an agreement was signed in March, 1946, for free and assisted passages for British residents desirous of settling in Australia. This agreement, which came into operation on 31st March, 1947, continued until 31st March, 1949, when it was renewed for a further two years. It was revived from 1st April, 1951, for a term of three years, but under changed financial arrangements. For the year ended 31st March, 1952, the United Kingdom Government contributed £500,000 sterling towards the scheme, and for the two following years agreed to pay a maximum amount of £150,000 sterling per annum.

The Free and Assisted Passage Agreement has covered three main groups of migrants, *viz.*, *Personal nominees*, who are migrants sponsored by residents of Australia able to provide suitable accommodation for them; *Group nominees*, who are recruited on a trade-qualification basis to meet applications lodged by employers, who guarantee to provide employment and accommodation for those selected; *Commonwealth nominees*,

who comprise workers selected against known and assessed employment demands in Australia, and their families. Migrants in the latter group live in hostels established by the Commonwealth Government until such time as they are able to obtain private accommodation. The Commonwealth nominee scheme was introduced in 1950 in order to reinforce the personal and group nomination schemes, but towards the end of 1952 it was greatly curtailed and selection now is confined to workers in a limited group of essential skilled trades.

Any adult resident of Australia may nominate friends or relatives in the United Kingdom who are eligible to be considered for free or assisted passages under this agreement.

(ii) *Free Passages.* This part of the scheme is financed by the United Kingdom Government as part of its resettlement programme. Persons eligible for consideration are British ex-service men and women, together with their dependants, provided they were resident in the British Isles or were in the United Kingdom forces overseas on 1st September, 1938, and subsequently served in a full-time capacity in the armed forces or the merchant navy of the United Kingdom during any period after 25th May, 1939.

Applications for passages had to be lodged within certain time limits and the final closing date was 31st December, 1950. Those received prior to that date are still valid, and the persons concerned, if otherwise eligible, are entitled to receive free passages.

(iii) *Assisted Passages.* Assisted passages are granted under the Empire Settlement Acts of the United Kingdom to suitable British subjects normally resident in the United Kingdom who do not come within the scope of (ii) above. Although the Commonwealth is not generally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing, the parents or close relatives of intending migrants or of persons established in Australia may, if otherwise acceptable under the scheme, be granted passages irrespective of age. Each migrant of 19 years of age and over is required to contribute £10 sterling towards the cost of his or her passage, while juveniles of 14 years and up to the eve of their 19th birthday have to pay £5 sterling. Children under 14 years travel free. Apart from these contributions and that made annually by the United Kingdom Government, the cost of the passages is borne by the Commonwealth Government.

(iv) *Numbers Arrived.* The numbers of British migrants who came to Australia under the Free and Assisted Passage Agreement during the years 1947 to 1952 are given in the following table :—

UNITED KINGDOM FREE AND ASSISTED PASSAGE AGREEMENT : NUMBER OF MIGRANTS.

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	C'wealth Nominees.	Total.
1947-49 ..	19,100	16,071	7,470	5,417	7,626	2,434	1,358	..	59,476
1950 ..	8,884	11,591	5,505	3,047	3,480	1,397	363	4,062	38,329
1951 ..	6,386	10,727	4,097	1,617	2,691	1,176	255	17,058	44,007
1952 ..	7,386	10,596	4,104	2,326	2,804	1,235	382	6,247	35,080
Total, 1947-52	41,756	48,985	21,176	12,407	16,601	6,242	2,358	27,367	176,892

4. *Child Migration from the United Kingdom.*—(i) *General.* Since the commencement of the assisted passage schemes in 1947, the immigration of unaccompanied children and youths from the United Kingdom has been encouraged under the auspices of approved voluntary organizations. The organizations at present introducing child migrants include the Fairbridge Farm Schools of New South Wales and Western Australia, Dr. Barnardo's Homes, the Big Brother Movements of New South Wales and Tasmania, and the Northcote Children's Emigration Fund. All the principal religious denominations are also participating in the scheme. At the present time 46 institutions are caring for child migrants.

(ii) *Financial Assistance.* The United Kingdom Government contributes 12s. 6d., and the Commonwealth Government 10s. per week to approved organizations in respect of each child under 16 years of age, while the State Government concerned pays a minimum of 4s. 3d. per week for each child up to the age of 14. In addition, the Commonwealth Government and the State Government concerned each contribute one-third of the approved capital expenditure on accommodation for child migrants brought in by these organizations.

(iii) *Numbers Arrived.* From the beginning of 1947 to the end of 1952, a total of 2,793 British children and youths arrived under the sponsorship of voluntary organizations, and of this number 519 came in 1951 and 628 came in 1952. New South Wales took 1,408, Western Australia 706, Victoria 314, and the other three States 268. These children were brought to Australia under the United Kingdom Free and Assisted Passage Scheme and are included in the figures shown in the table on page 368.

5. *Assisted Passage Scheme, Eire.*—In November, 1948, the Commonwealth Government decided to grant limited financial assistance to natural-born citizens of Eire normally residing in the British Isles, and to natural-born British citizens residing in Eire, who wish to emigrate to Australia and who are duly selected. This scheme applies only to prospective settlers and their dependants who are not eligible for free or assisted passages under the agreement with the United Kingdom Government (*see* para. 3 above). The maximum amount granted towards an adult passage is £30 sterling, with varying amounts for children according to age.

It is not essential for an applicant for a passage to be nominated by a friend or relative in Australia before the question of granting financial assistance is considered. Single men or women who are eligible under the scheme are readily accepted. Families, on the other hand, are accepted only if they can produce evidence of having secured accommodation in Australia, or, in the case of nominated migrants, a guarantee of accommodation by their sponsors. Up to the end of 1952, 1,565 migrants had arrived under this scheme (*see* table on p. 371).

6. *Maltese Migration.*—On 31st May, 1948, the Commonwealth Government and the Government of Malta entered into an agreement under which the two governments jointly grant financial assistance towards the cost of the passages of Maltese selected to migrate to Australia. In the case of an adult the maximum contribution of the Commonwealth is £30 sterling, and the payment of this is subject to the Government of Malta contributing not less than a like amount.

Any person already established in Australia may nominate individual Maltese under the scheme, while an employer or firm or a voluntary or other organization may nominate a group. In all cases the nominator must undertake to provide accommodation and, so far as groups of migrants are concerned, employment. The Commonwealth retains the right of final selection of both personal and group nominees. The Government of Malta attends to their after-care in Australia.

At 31st December, 1952, a total of 12,229 Maltese had arrived under this scheme since its inception (*see* table on p. 371). The arrivals in 1951 and 1952 were largely dependants of those who had earlier migrated to Australia. To the end of 1952, 65 Maltese children had been brought out to approved institutions in Western Australia. These are included in the number shown above.

7. *Empire and Allied Ex-Servicemen's Scheme.*—With the object principally of giving ex-servicemen of Empire and Allied countries who had served in Australia during the 1939–45 War an opportunity to return for permanent settlement, the Commonwealth Government, on 26th May, 1947, initiated a scheme of financial assistance towards the cost of the passages of eligible Empire ex-servicemen not covered by the Free and Assisted Passage Agreement with the United Kingdom (*see* para. 3 above) and of ex-servicemen of the United States of America, and their dependants. This was later extended to cover ex-servicemen and former members of the resistance movements of

the Netherlands, Norway, Belgium, France and Denmark, and their dependants. The maximum amount granted towards an adult passage is £30 sterling, with varying amounts for children according to age.

Since its inception, 17,877 migrants have come to Australia under this scheme (see table on p. 371), the number of each nationality being: Dutch, 13,321; American, 2,868; French, 948; British, 499; Belgian, 111; Danish, 58; Norwegian, 71; Polish, 1.

8. **Displaced Persons Scheme.**—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization to resettle in Australia European displaced persons who were under the protection of that body. In the first two years, limitation of shipping restricted the departure of these migrants, with the result that only 840 arrived in 1947 and 9,953 in 1948, but in the next two years the numbers rose to 75,486 and 70,212 respectively. When the International Refugee Organization wound up its activities in 1951, the Commonwealth agreed to receive those displaced persons already accepted for migration whose passages had still to be arranged. During that year 11,708 reached Australia and in 1952 another 2,055, bringing the total number of arrivals under the scheme to 170,254.

9. **Netherlands Migration.**—A migration agreement concluded between the Commonwealth and the Netherlands Governments in February, 1951, came into operation on 1st April of that year. This superseded an earlier agreement between the Commonwealth Government and the Netherlands Emigration Foundation which was made in December, 1946 (see Official Year Book No. 39, p. 567). The initial selection of the migrants is carried out by the Netherlands authorities in accordance with requisitions furnished from time to time by the Commonwealth, the responsibility for final selection resting with Australian migration officers stationed in that country.

The migrant contributes the maximum amount he can afford towards the cost of his passage, but in no case is this less than £10 sterling. The balance of the fare is made up by the Netherlands Government, which is later reimbursed by the Commonwealth to the extent of £37 10s. sterling or half the amount contributed by the Netherlands Government, whichever is the less, in respect of every Dutch adult arriving in Australia under the agreement, with *pro rata* rates for children.

The provision of the shipping is the responsibility of the Netherlands Government. The Commonwealth undertakes the arrangements for the reception of the migrants and their after-care, and assists in the securing of employment. Those unable to secure private accommodation in advance of their arrival are housed in "reception" centres controlled by the Department of Immigration, and if, when he obtains employment, the worker of the family cannot find accommodation for his dependants, they are moved to one of the department's "holding" centres. Here they remain until the family is able to arrange to live together privately again.

Under the 1946 agreement 584 persons arrived between 1948 and May, 1951 and, up to the end of 1952, 8,552 migrants had come to Australia under the 1951 agreement.

10. **Italian Migration.**—On 29th March, 1951, the Commonwealth and Italian Governments entered into a migration agreement on lines similar to those of the Commonwealth-Netherlands agreement. Under the terms of this agreement, which came into force on 1st August, 1951, the maximum amount payable by the Commonwealth towards the fares of selected Italian migrants is £25 sterling for each adult, with amounts in proportion for children according to the passage rates. During 1951 and 1952, 9,970 migrants arrived under this scheme.

11. **German Migration.**—On 29th August, 1952, a migration agreement was signed by representatives of Australia and the Federal Republic of Germany. Except in regard to financial and shipping arrangements, this agreement operates in a manner similar to those concluded with the Netherlands and Italy.

On the financial side, the Commonwealth and the West German Governments each contribute a sum up to a maximum of \$60 towards the fare of each adult selected, the payment of the balance being a matter of arrangement between the migrant and the Inter-Governmental Committee for European Migration. The ships to carry the migrants are provided by the Committee.

The number of Germans who had arrived under this scheme to the end of 1952 was 1,007.

12. **Austrian and Greek Migration.**—Late in 1952 agreement was reached between the Inter-Governmental Committee for European Migration and the Commonwealth for the migration to Australia of a limited number of selected rural workers and their families from Austria and Greece. The passages of these migrants will be arranged by the Inter-Governmental Committee for European Migration which also will bear the cost of the fares, while the Commonwealth has agreed to attend to their reception, temporary accommodation on arrival, and after-care, and to assist in the placing of the workers in suitable employment.

13. **Summary of Arrivals of Assisted Migrants.**—The following table shows, for each of the years 1947 to 1952, the number of assisted migrants who arrived in Australia under the various schemes introduced since 1946. The first assisted migrants in this post-war period arrived in 1947.

ASSISTED MIGRATION SCHEMES : NUMBER OF MIGRANTS.

Assisted Migration Scheme.	1947.	1948.	1949.	1950.	1951.	1952.	Total, 1947-52

Polish Migrants from United Kingdom	447	1,010	..	..	..	..	1,457
Maltese Assisted Migration Agreement, 1948	..	527	3,260	3,226	3,313	1,903	12,229
Eire Assisted Migration Agreement, 1948	..	..	109	457	426	573	1,565
Netherlands Foundation Agreement, 1946	..	40	87	441	16	..	584
Netherlands Agreement, 1951	..	..	..	..	1,588	6,964	8,552
Italian Assisted Migration Agreement, 1951	..	..	..	..	59	9,911	9,970
German Assisted Migration Agreement, 1952	..	..	..	..	..	1,007	1,007
I.C.E.M. Agreement, 1952—	..	..	..	..	..	..	..
Austrians	..	..	..	..	..	13	13
Greeks	..	..	..	..	..	..	..
Total Assisted Migrants	6,303	28,943	118,840	119,109	66,674	60,531	400,100

From the earliest years of assisted migration to the end of 1952 a total of 1,468,670 assisted migrants arrived in Australia. Up to the end of 1940, 1,068,311 had arrived of whom 347,705 were destined for New South Wales, 256,090 for Victoria, 236,413 for Queensland, 115,994 for South Australia, 87,015 for Western Australia, 25,022 for Tasmania and 72 for the Australian Capital Territory. None arrived in the years 1941 to 1946. Under the schemes which have operated since 1947 it is not possible to show for each year the number of arrivals destined for the various States because of the system of accommodating certain categories of migrants in Immigrant Reception and Holding Camps and subsequently allocating them to another State or Territory.

**(B) The Regulation of Immigration into Australia.**

1. **Powers and Legislation of the Commonwealth.**—(i) *Constitutional.* Under Section 51, xxvii. and xxviii. of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals.

(ii) *Legislation.* Immigration into the Commonwealth is regulated by the Immigration Act 1901–1949, which specifies the persons whose immigration is prohibited and provides for their deportation if they enter contrary to the Act. Provision is also made for the deportation of persons who have entered lawfully but who contravene the provisions of the Act after they have entered. Power is given to the Minister for Immigration to admit prohibited immigrants for a specified period under Certificate of Exemption from the provisions of the Act relating to entry or stay in the Commonwealth.

The amending Act of 1948 provided for the registration of immigration agents, and made it unlawful for unregistered persons to charge fees in respect of applications by intending immigrants for admission to Australia, or to arrange or secure passages to Australia for such immigrants. In addition, the Minister for Immigration has power to fix the fees which registered agents may charge for these services.

The Aliens Deportation Act 1948 repealed the Aliens Deportation Act 1946 and empowers the Minister for Immigration to order the deportation of an alien who after investigation by a Commissioner is reported as not being a fit and proper person to be allowed to remain in Australia.

The War-time Refugees Removal Act 1949 enables the Minister for Immigration to effect the repatriation to their own countries of persons given refuge in Australia during the 1939–45 War. Deportation is limited to persons in respect of whom orders for deportation were issued prior to 12th July, 1950.

The Immigration (Guardianship of Children) Act 1946–1952 provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who enters Australia other than in the charge of, or for the purpose of living in the care of, a parent or adult relative. It is primarily administered through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each "immigrant child".

The Aliens Act 1947–1952 provides that a register of aliens shall be maintained for every State and Territory of the Commonwealth. Unless exempted, aliens 16 years of age and over are required to register with the Department of Immigration, and to notify the department of any change of address, occupation or employment, and of their marriage. The Act also provides that consent must be obtained before an alien may change his surname.

2. **Conditions of Immigration into Australia.**—(i) *Immigration of Non-Europeans.* In pursuance of the established policy, the general practice is not to permit Asiatics or other coloured persons to enter Australia for the purpose of settling permanently.

Special arrangements were made with India, China, and other Eastern countries under which facilities are afforded for their nationals who are bona fide merchants, students, or tourists to enter and remain in Australia under exemption while they retain their status. Permission is also given for the entry of nationals of these countries as assistants or substitutes for local traders domiciled in Australia. Such persons are allowed to remain so long as they retain their status.

(ii) *Immigration of White Aliens.* White aliens desiring to settle permanently in Australia are required to obtain authority for admission from the Department of Immigration. Their admission under the present policy is subject to their compliance with the Commonwealth's requirements in regard to health, character, freedom from security risk, and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers:—

- (a) In Australia—The Secretary, Department of Immigration, Canberra, A.C.T., and Commonwealth Migration Officers in the capital cities of the various States; (b) in Great Britain—the Chief Migration Officer, High Commissioner's Office, Australia House, Strand, London; (c) in other British Dominions—the High Commissioner for Australia; (d) in other countries where Australia is represented—the Secretary, Australian Embassy, Legation or Consulate.

For details of the Australian representatives in the British Dominions and other countries, see the section entitled "Diplomatic and other Representatives Overseas and in Australia" in Chapter XXIX.

3. *Nationality and Race of Persons Arriving.*—For details of the nationality and racial origin of persons who arrived in Australia during the years 1950 to 1952 see § 9, paras. 4 and 5.

### (C) Passports.

Provision is made in the Immigration Act 1901–1949 for the production of a passport by each immigrant over 16 years of age who desires to enter Australia. Under the Passports Act 1920, it was compulsory also for each person over 16 years of age to be in possession of a passport or other document authorizing his departure. This Act has now been superseded by the Passports Act 1938, which repealed the compulsory provisions. The Act also applies to the Territories of Australia, including Papua, Norfolk Island and the Trust Territory of New Guinea.

Although it is not compulsory for Australians to obtain a passport when leaving Australia, it is desirable in their own interests that they should have one in order to establish their identity and nationality overseas. A passport is necessary for admission into most countries, and the holder of an Australian passport also has no difficulty in landing on return to Australia. The charge for an Australian passport is £1.

As a result of the Nationality and Citizenship Act 1948 (see § 11 below) and the enactment of similar citizenship legislation in other British Commonwealth countries it is now the general rule that Australian passports are issued only to Australian citizens. Citizens of other British Commonwealth countries secure passports from their own High Commissioners in Australia. Australian citizens abroad may secure passports only from Australian representatives.

Diplomatic and official passports are issued to members of the Australian diplomatic service and other Government officials proceeding abroad on official business.

Applicants for passports are required to produce evidence of their identity and nationality (e.g., birth certificates).

## § 11. Citizenship and Naturalization.

1. *Commonwealth Legislation.*—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are declared to be British subjects. Australian citizenship was automatically acquired as from 26th January, 1949, by persons who were British

subjects at that date and who either (a) were born in Australia or New Guinea; or (b) were naturalized in Australia; or (c) had been residing in Australia during the five years immediately preceding 26th January, 1949; or (d) were born outside Australia of fathers to whom (a) or (b) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (e) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction). For the purposes of the Act, "Australia" includes Norfolk Island and the Territory of Papua, and by an amendment of the Act in 1950 it was further provided that Nauru shall be treated in the same manner as New Guinea.

After the Act's commencement citizenship may be acquired in the following ways :— (a) by birth in Australia; (b) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (c) by registration—Certificates of Registration as Australian citizens may be granted by the Minister to British subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (d) by naturalization—Certificates of Naturalization as Australian citizens may be granted by the Minister to aliens who make application and can comply with requirements somewhat similar to those previously required under the Nationality Act 1920–1946. New requirements for naturalization are—(i) a Declaration of Intention to apply must be lodged usually at least two years before the final application, but the Minister may waive this requirement in special circumstances; (ii) as a rule five years residence in Australia is required, but residence in other British countries or service under a British government may be accepted (special concessions in the matter of residence qualifications in respect of persons who have voluntarily enlisted in the armed forces were made by an amending Act of 1952); (iii) the applicants must have an adequate knowledge of the responsibilities and privileges of citizenship; (iv) Certificates do not take effect until the applicant takes the Oath of Allegiance. The Oath is now taken in open Court, where the Judge or Magistrate addresses the applicant upon the responsibilities and privileges of citizenship before the Oath is administered and the Certificate of Naturalization delivered to the applicant.

Under the Act, the independence of married women in nationality matters is recognized, and British nationality is restored to those women who had lost it through marriage to aliens. In future, marriage will not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalized under somewhat easier conditions than those which apply to other aliens.

2. *Certificates Granted.*—(i) *Australia.* The following figures relate to certificates issued under the Nationality and Citizenship Act 1948–1952 during the years 1951 and 1952 :—

**NATURALIZATION : CERTIFICATES GRANTED, AUSTRALIA.**

(ii) *States*. The certificates of naturalization granted in 1952 (1951 figures in parentheses) were issued in respect of residents of the various States and Territories as follows:—New South Wales, 568 (502); Victoria, 672 (554); Queensland, 176 (238); South Australia, 85 (131); Western Australia, 101 (196); Tasmania, 23 (23); Northern Territory, 4 (19); Australian Capital Territory, 6 (10); and New Guinea, 46 (24); Total, 1,681 (1,697).

## § 12. Population of Territories.

At the Census of 30th June, 1947, arrangements were made to obtain complete information concerning not only the two internal territories of Australia—Northern Territory and Australian Capital Territory—but also the external territories under the control of Australia, namely:—Norfolk Island; Papua; Trust Territory of New Guinea; and Trust Territory of Nauru. Figures respecting population and number of dwellings in each Territory at the Census of 1947 are summarized in the following table:—

POPULATION AND DWELLINGS : TERRITORIES, CENSUS, 30th JUNE, 1947.  
(EXCLUDING INDIGENOUS POPULATION.)

Territory.	Population.			Dwellings.			Total.
	Males.	Females.	Persons.	Occu- pied.	Unoccu- pied.	Being BUILT.	
Northern Territory ..	7,378	3,490	10,868	2,697	34	22	2,753
Australian Capital Territory ..	9,092	7,813	16,905	3,615	52	316	3,983
Norfolk Island ..	505	433	938	279	43	5	327
Papua ..	2,057	1,182	3,239	(a) 769	(b)	(b)	(b)
Trust Territory of New Guinea ..	4,369	1,831	6,200	(a) 1,391	(b)	(b)	(b)
Trust Territory of Nauru ..	1,413	63	1,476	54	9	10	73

(a) Includes temporary dwellings constructed of iron, sisalcraft, native materials, canvas, etc., in war-devastated areas. (b) Not available.

The population of the internal and external territories at 31st December, 1952 and 30th June, 1952, respectively, will be found in Chapter VII.—The Territories of Australia. Particulars concerning the indigenous populations of these territories are also included therein.

### § 13. The Aboriginal Population of Australia.

In Official Year Book No. 17, pp. 951-61, a brief account is given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pp. 914-6 of Official Year Book No. 22, particulars are shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appears on pp. 687-96 of Official Year Book No. 23.

The aboriginals are scattered over the whole of the mainland but the majority are concentrated in Western Australia, Queensland and the Northern Territory. Details of the number in each State at the June, 1947 Census are shown in the following table. Full-blood aboriginals in employment or living in proximity to settlements were enumerated at the Census, while estimates of the total numbers, including those living in the wild state, were furnished by the Protectors of Aboriginals. Half-caste aboriginals are included in the numbers of the population and are of course enumerated at the Census. The figures shown for Queensland are exclusive of 5,000 Torres Strait Islanders.

ABORIGINAL POPULATION, 30th JUNE, 1947.

State or Territory.	Full-blood.			Estimate of Total Numbers.(b)	Half-caste. (Enumerated at the Census.)			Total, Full-blood and Half-caste.	
	In Employment or Living in Proximity to Settlements.(a)				Persons.	Males.	Females.		Persons.
	Males.	Females.	Persons.						
New South Wales ..	546	407	953	(c) 953	5,498	5,109	10,607	11,560	
Victoria ..	100	108	208	(c) 208	537	532	1,069	1,277	
Queensland ..	3,504	2,822	6,326	9,100	3,684	3,527	7,211	16,311	
South Australia ..	259	205	464	2,139	1,103	1,054	(d)2,157	d 4,296	
Western Australia ..	2,664	2,269	4,933	20,338	2,359	2,215	(d)4,574	d 24,912

Aust. Capital Territory ..	..	..	..	..	58	42	100	100	
<b>Total ..</b>	<b>12,688</b>	<b>11,181</b>	<b>23,869</b>	<b>46,638</b>	<b>14,026</b>	<b>13,153</b>	<b>27,179</b>	<b>73,817</b>	

(a) Enumerated at the Census. (b) Furnished by the Protectors of Aboriginals. (c) Census totals. (d) In addition to these totals, the Protectors of Aboriginals estimated that there were 826 half-caste and mixed bloods in South Australia and 1,322 in Western Australia, presumably living in the nomadic state.

According to the Annual Reports of the Protectors of Aboriginals, there has been little change in the numbers of aboriginals in most States since 1947. In Western Australia, however, the estimate for the total number of full-blood and half-caste aboriginals at 30th June, 1952 was 21,051.

## CHAPTER X. VITAL STATISTICS.

NOTE.—1. In the Vital Statistics chapter of Official Year Book No. 38, tables covered 1948 and, where possible, 1947. In issue No. 39 these tables covered 1950 and where possible, 1949. In the present issue totals and rates have been shown for births, deaths, marriages and infant deaths for the year 1952, but in most cases an analysis of the figures has not been carried beyond 1951. More detailed figures will be found in *Demography Bulletin* No. 69 unless otherwise specifically indicated.

2. Figures for Australia throughout are exclusive of full-blood aboriginals.

### § 1. Marriages.

1. Number of Marriages.—The number of marriages registered in Australia during the year ended 31st December, 1952 was 74,172 giving a rate of 8.58 per 1,000 of the mean population for the year. A summary of the number of marriages registered in each State and Territory since 1901 is given in the following table. Annual averages for each five-yearly period from 1861 will be found in Official Year Book No. 39, page 575.

1936-1940 ..	9.29	9.52	8.80	9.65	9.49	9.25	13.28	7.22	9.35
1941-1945 ..	9.97	9.86	10.04	10.61	9.74	8.61	7.18	7.57	9.94
1946-1950 ..	9.86	9.73	9.45	9.93	10.00	9.51	9.20	10.00(c)	9.77

(a) Number of marriages per 1,000 of mean population. (b) Part of New South Wales prior to 1911.

(c) Rate based on revised mean population estimates shown on p. 335 is 9.35.

## CRUDE MARRIAGE-RATES—continued.

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
YEARLY RATES.									
1947 .. ..	10.11	9.95	9.95	10.32	10.50	10.02	11.39	(a) 11.30	10.09
1948 .. ..	9.96	9.59	9.01	10.18	10.07	9.18	9.03	8.25	9.71
1949 .. ..	9.23	9.38	8.92	9.27	9.29	8.88	9.65	10.05	9.23
1950 .. ..	9.31	9.22	8.74	9.40	9.73	9.07	9.65	10.53	9.24
1951 .. ..	9.14	9.31	8.96	9.23	9.27	8.90	8.94	9.84	9.17
1952 .. ..	8.66	8.66	8.14	8.44	8.95	8.39	8.51	8.33	8.58

(a) Rates based on revised mean population estimates shown on p. 335 are as follows:—1947, 11.21; 1948, 7.81; 1949, 9.06; 1950, 9.16.

3. **Marriage-rates based on Marriageable Population.**—As the marriage-rates in some international tabulations are based on the unmarried population aged 15 years and over, the corresponding rates have been calculated for Australia for the last seven census periods. The period in each case comprises the census year with the year immediately preceding and the year immediately following, and the figures are as follows:—

## PERSONS MARRYING PER 1,000 OF UNMARRIED POPULATION: AUSTRALIA.

Period.	Rate.(a)	Period.	Rate.(a)
1880-82 .. ..	48.98	1920-22 .. ..	56.22
1890-92 .. ..	45.74	1932-34 .. ..	42.88
1900-02 .. ..	42.14	1946-48 .. ..	71.24
1910-12 .. ..	50.44		

(a) Average annual number of persons who married per 1,000 unmarried persons, including widowed and divorced, aged 15 years and over.

4. **Crude Marriage-rates of Various Countries.**—The following table gives the crude marriage-rates for Australia in comparison with the rates for various other countries.

## CRUDE MARRIAGE-RATES(a) : VARIOUS COUNTRIES.

(a) Number of marriages per 1,000 of mean population. (b) Not available. (c) White population only. (d) 1950. (e) Excludes full-blood aboriginals. (f) Excludes Maoris.

5. *Age and Conjugal Condition at Marriage.*—(i) *General.* Age at marriage in single years of age and previous conjugal condition of bridegrooms and brides in 1951 will be found in *Demography Bulletin* No. 69. A summary in age groups is given hereunder. There were 5,268 males aged less than twenty-one years married during 1951 while the corresponding number of females was 22,262. At the other extreme there were 83 bachelors and 50 spinsters in the age group 65 years and over.

(iv) *Average Ages of Bridegrooms and Brides.* The age at marriage of brides has remained fairly constant during recent years at an average of about 25½ years, although in the period 1937-39 the average rose to almost 26 years. The average ages, in years, of brides for the past six years were:—1946, 25.51; 1947, 25.60; 1948, 25.57; 1949, 25.65; 1950, 25.73; and 1951, 25.71. For the following five-yearly periods the average ages in years were:—1911-15, 25.76; 1916-20, 26.05; 1921-25, 25.76; 1926-30, 25.57; 1931-35, 25.50; 1936-40, 25.72; 1941-45, 25.68; and 1946-50, 25.61. The average ages, in years, of bridegrooms were 28.73 in 1946, 28.93 in 1947, 28.88 in 1948, 28.91 in 1949, 28.99 in 1950 and 28.92 in 1951. It follows, therefore, that brides are, generally speaking, a little more than three years younger than bridegrooms. The average age of brides and bridegrooms for the years 1940-46 showed the effects of war-time conditions. The proportion of young persons marrying during those years increased, thereby causing decreases in the average ages of both brides and bridegrooms. The difference in age between brides and bridegrooms was 3.22 years in 1946, 3.33 in 1947, 3.31 in 1948, 3.26 in 1949, 3.26 in 1950 and 3.21 in 1951.

6. *Previous Conjugal Condition.*—The number of bachelors and spinsters, widowed and divorced persons who married during 1951 is shown in the table on page 379. The following table shows the relative conjugal condition of the contracting parties.

## CONJUGAL CONDITION OF BRIDEGROOMS AND BRIDES : AUSTRALIA, 1951.

Conjugal Condition of Bridegrooms.	Total Bridegrooms.	Conjugal Condition of Brides.		
		Spinsters.	Widows.	Divorced.
Bachelors .. .. .	68,403	63,215	1,839	3,349
Widowers .. .. .	3,597	1,581	1,330	686
Divorced .. .. .	5,298	3,184	670	1,444
Total Brides	77,298	67,980	3,839	5,479

7. *Birthplace of Persons Marrying.*—A table showing the relative birthplaces of bridegrooms and brides married in each year will be found in the *Demography Bulletin*.

8. *Occupation of Bridegrooms.*—The distribution of the 77,298 bridegrooms for 1951 amongst classes of occupations was as follows:—Craftsmen, 20,417; Operatives, 14,096; Commercial and Clerical, 13,345; Rural, Fishing and Hunting, 9,382; Labourers, 7,073; Domestic and Protective Service, 4,581; Professional and Semi-Professional, 3,659; Administrative, 2,612; and Not Gainfully Occupied and Not Stated, 2,133.

9. *Celebration of Marriages.*—In all the States marriages may be celebrated either by ministers of religion who are registered for that purpose with the Registrar-General, or by certain civil officers—in most cases district registrars—but most of the marriages are celebrated by ministers of religion. The registered ministers in 1951 belonged to

more than forty different denominations, some of which, however, have only very few adherents. A number of these have been bracketed under the heading "Other Christian". The figures for 1951 are shown in the following table.

MARRIAGES IN EACH DENOMINATION, 1951.

10. Divorces.—Chapter XII.—Public Justice shows details of the number of marriages dissolved annually by divorce, nullity of marriage and judicial separation. The number dissolved by decrees for divorce and nullity of marriage made absolute and by judicial separation in 1951 was 7,327 or 9.5 per cent. of the number of marriages celebrated during the year. Detailed tables relating to divorce statistics for 1951 and summary tables for earlier years are shown also in *Demography Bulletin* No. 69, 1951.

In 1952, 7,106 or 9.6 per cent. of the marriages celebrated during the year were dissolved by decrees for divorce and nullity of marriage made absolute and by judicial separation.

§ 2. Fertility and Reproduction.

1. Introductory.—Of the two elements of increase in the population, namely, natural increase and net migration, the former has been by far the more important over the past few decades. The level of natural increase depends on the excess of births over deaths and the relation between fertility and mortality determines the rate of reproduction or replacement of the population.

2. Number of Live Births.—(i) Year 1951. There are various methods of measuring the fertility of the population by relating the number of births to the numbers in the population. In each the basic data are, of course, the numbers of live births.

The number of live births registered in Australia during 1951 is shown in the table below. The table shows also the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only.

## LIVE BIRTHS AND CONFINEMENTS, 1951.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W.A.	Tas.	N.T.	A.C.T.	Australia.
<b>LIVE BIRTHS.</b>									
Single births	70,445	49,342	29,069	17,085	14,425	7,165	404	972	188,907

Females ..	35,070	24,534	14,445	8,499	7,110	3,553	197	488	93,897
Total ..	72,069	50,553	29,652	17,463	14,794	7,357	407	1,003	193,298
<b>STILLBIRTHS ASSOCIATED WITH MULTIPLE BIRTHS INCLUDED ABOVE.</b>									
Twins ..	62	20	18	..	13	8	1	1	123
Triplets ..	..	..	..	..	1	..	..	..	1
<b>CONFINEMENTS RESULTING IN ABOVE BIRTHS.</b>									
Nuptial ..	68,321	48,297	27,948	16,772	14,009	6,999	364	962	183,672
Ex-nuptial ..	2,964	1,657	1,420	502	606	266	42	26	7,483
Total ..	71,285	49,954	29,368	17,274	14,615	7,265	406	988	191,155

NOTE.—In Victoria, Queensland and Tasmania the registration of stillbirths is not compulsory and it is possible that in some cases where one child only of a multiple pregnancy is live-born the confinement has been treated as a single birth. This applies particularly to South Australia; where registration practice for twins, when one is live-born and one still-born, is to treat each child as a single birth, and for triplets with one still-born, to treat the two live-born as twins, and so on.

(ii) *Years 1901 to 1952.* The average annual number of live births in each State and Territory for each five-yearly period from 1901 to 1950 and the total number of live births in each State and Territory for each year 1947 to 1952 are given in the following table. Corresponding figures for each five-yearly period from 1861 will be found in Official Year Book No. 39, page 583.

(a) Part of New South Wales prior to 1911.

3. **Crude Birth-rates.**—The oldest and most popular method of measuring fertility is to relate the number of births to the total population, thus obtaining the crude birth-rate. The crude birth-rate measures the rate per thousand persons (irrespective of age or sex) at which the population had added to its numbers by way of births during a given period.

# BIRTHS, DEATHS, AND MARRIAGES: AUSTRALIA, 1860 to 1952

# RATES OF BIRTHS, DEATHS, AND NATURAL INCREASE: AUSTRALIA, 1860 TO 1952

# INFANT MORTALITY RATES: AUSTRALIA, 1907 to 1952

(INFANT DEATHS PER 1000 LIVE BIRTHS)

**EXPLANATION.**—This graph shows the marked improvement in infantile mortality rates over the past 45 years. The improvement has been confined mainly to children over one month, considerably less having occurred in the first month of life (see page 404).

Crude birth-rates for each five-yearly period from 1901 to 1950 and for each year from 1947 to 1952 for each State and Territory are set out below:—

CRUDE BIRTH-RATES.(a)

(a) Number of births per 1,000 of mean population. (b) Part of New South Wales prior to 1911. (c) Rates based on revised mean population estimates shown on p. 335 are as follows:—1946-50, 37.89; 1947, 38.46; 1948, 37.77; 1949, 38.65; 1950, 40.44.

NOTE.—The birth-rates in the table above are based on live births registered in the respective States and Territories. Some years ago a large proportion of births in respect of which the mother's usual residence was the Australian Capital Territory took place in Queanbeyan, just over the New South Wales border, but with improved hospital facilities in the Territory the movement to outside hospitals rapidly diminished and has been reversed since 1939. The following rates, based on births in respect of which the mother's usual residence is the Australian Capital Territory and on revised population figures, are a truer measure of birth-rates in the Australian Capital Territory:—

Annual Average.		Year.	
1926-1930 .. ..	.. ..	1948 .. ..	.. 25.99
1931-1935 .. ..	.. ..	1949 .. ..	.. 27.28
1936-1940 .. ..	.. ..	1950 .. ..	.. 29.63
1941-1945 .. ..	.. ..	1951 .. ..	.. 28.47
1946-1950 .. ..	.. ..	1952 .. ..	.. 30.60

The variations similarly caused in the birth-rates for the States and Northern Territory by referring the birth registrations to the State or Territory in which the mother was usually resident are shown by the following corrected rates for 1952:—New South Wales, 21.90; Victoria, 23.08, Queensland, 25.74; South Australia, 24.13; Western Australia, 25.64; Tasmania, 26.06; and Northern Territory, 27.32.

In the earlier years of the present century the crude birth-rate fluctuated somewhat but from 1912, when 28.60 was recorded, there was an almost continuous decline to the very low figure of 16.39 in 1934. The decline in the depression years was to some extent occasioned by the postponement of marriages, and with subsequent improvement in economic conditions the rate rose. Since 1940 the rate has increased quite appreciably owing to a continued improvement in the economic welfare of the community and the war-time boom in marriages. The latter resulted in an abnormal number of first births but investigation indicates that rates for births other than first were generally slightly higher than might have been expected from pre-war experience. The improvement in the birth-rate has been maintained since the end of the war despite some falling off in marriage rates.

4. Crude Birth-rates of Various Countries.—The following table gives the crude birth-rates for Australia in comparison with the rates for various other countries.

CRUDE BIRTH-RATES<sup>(a)</sup> : VARIOUS COUNTRIES.

Country.	1908-13.	1921-25.	1926-30.	1931-35.	1951.

(a) Number of births per 1,000 of mean population. (b) 1950. (c) Not available.  
 (d) 1922-25. (e) 1911-13. (f) 1949. (g) White population only. (h) 1915.  
 (i) 1933-35. (j) Excludes Maoris. (k) Excludes full-blood aborigines.

5. Fertility-rates.—The principal demographic factors affecting the level of crude birth-rates are the proportion of women of child-bearing age in the population and the proportion of such women who are married. These factors may vary considerably at different periods and for different countries, and a population with a high proportion of married women of child-bearing age will have a much higher crude birth-rate than one with a low proportion, although the fertilities of the two populations may be identical.

In order to compare fertilities, births are sometimes related to the number of women of child-bearing age or, alternatively, nuptial births are related to the number of married women of child-bearing age. Thus births are related to potential mothers, giving the fertility-rate.

The following table sets out for certain periods, commencing with 1880-82, the number of births per thousand of mean population, the number of births per thousand women of child-bearing age and the number of nuptial births per thousand married women of child-bearing age. For purposes of this table the child-bearing age has been taken to be 15-44 years inclusive, but births to mothers who were stated to be under 15 or over 44 years have been included in the compilations.

CRUDE BIRTH-RATES AND FERTILITY-RATES : AUSTRALIA.

Period.	Average Annual Rates.			Index Nos. (Base : 1880-82 = 100).		
	Crude Birth-rate.(a)	Fertility-rates.		Crude Birth-rate.(a)	Fertility-rates.	
		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.		Births per 1,000 Women aged 15-44 Years.	Nuptial Births per 1,000 Married Women aged 15-44 Years.
1880-82 ..	35.3	170	321	100	100	100
1890-92 ..	34.5	159	332	98	94	103
1900-02 ..	27.2	117	235	77	69	73
1910-12 ..	27.2	117	236	77	69	74
1920-22 ..	25.0	107	197	71	63	61
1932-34 ..	16.7	71	131	47	42	41
1946-48 ..	23.6	104	167	67	61	52

(a) Number of births per 1,000 of mean population.

The table above shows how increasing proportions both of women of child-bearing age and of married women of child-bearing age inflate the crude birth-rate. Thus while the nuptial birth-rate for married women increased by only 27 per cent. over the period 1932-34 to 1946-48 the crude birth-rate rose by 41 per cent. owing principally to the greatly increased number of marriages during that period.

6. Age-specific Fertility-rates for Females.—So long as customary ages at marriage do not change drastically, the main demographic factor affecting the number of births is the age composition of the potential mothers in the population. Within the child-bearing group the fertility of women of different ages varies considerably and a clearer view of the fertility of the population can be obtained from an examination of what are known as its age-specific fertility-rates, that is, the number of births to women of specified ages per thousand women of those particular ages.

Age-specific fertility-rates are frequently expressed in age groups as well as in single ages. The following table sets out age-specific fertility-rates for Australia over the period 1921 to 1952 in five-yearly age groups.

AGE-SPECIFIC FERTILITY-RATES(a) : AUSTRALIA.

Age Group (Years).	1921.	1926.	1931.	1936.	1941.	1946.	1949.	1950.	1951.	1952.
15-19..	12.83	14.02	13.08	12.18	11.90	12.63	17.41	18.11	18.59	19.07
20-24..	65.45	60.23	53.08	50.33	59.42	73.52	82.11	84.32	85.84	90.93
25-29..	82.24	76.82	62.47	62.02	70.78	89.51	88.13	90.53	90.24	94.52
30-34..	68.50	61.90	51.25	46.33	49.72	65.03	59.30	60.34	59.16	61.51
35-39..	49.48	43.55	33.23	28.89	28.69	37.43	33.32	33.89	32.29	32.61
40-44..	21.66	17.03	13.61	10.19	9.52	11.87	10.24	10.35	9.97	9.95
45-49..	2.10	1.90	1.45	1.11	0.80	1.03	0.80	0.73	0.80	0.84

(a) Number of female births per 1,000 women in each age group.

The table above indicates that the most fertile age group is 25-29 years. The decline in fertility between 1921 and 1936 was general but was more pronounced in the older age groups. During the period 1936 to 1952 a rise in fertility occurred in all age groups below 40.

7. Gross and Net Reproduction Rates for Females.—A single measure of reproduction known as the gross reproduction rate is obtained by adding together the specific fertility-rates for each age in the child-bearing group. This measure indicates the number of female children who would be born on the average to women living right through the child-bearing period, if the conditions on which the rate is based continue. The rate is unaffected by the age composition of the potential mothers, and consequently it shows more clearly than the crude birth rate the reproductive propensity of the population. It is, however, an imperfect measure of reproduction because it does not take into account the females who fail to live from birth to the end of the reproductive period. A more accurate measure of this nature is obtained by multiplying the specific fertility-rates by the number of females in the corresponding age group of the stationary or life table population and summing the products. Allowance is thus made for the effect of mortality

and the result is known as the net reproduction rate. The net reproduction rate indicates the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based. A constant net reproduction rate of unity indicates that the population will ultimately become stationary. If it continues greater than unity, the population will ultimately increase; if less than unity, it will ultimately decrease. The following table should be read in the light of the comment which follows it and of the index of fertility in paragraph 9 hereof.

**GROSS AND NET REPRODUCTION RATES : AUSTRALIA.**

Year.	Gross Reproduction Rate.	Net Reproduction Rate.	Year.	Gross Reproduction Rate.	Net Reproduction Rate.	
					(f)	(g)
1881 (a)	2.65	(b) 1.88	1945	1.337	1.220	1.267
1891 (a)	2.30	(b) 1.73	1946	1.455	1.328	1.379
1901 (a)	1.74	(c) 1.39	1947	1.493	1.364	1.416
1911 ..	1.705	(d) 1.421	1948	1.451	..	1.376
1921 ..	1.511	(e) 1.313	1949	1.457	..	1.382
1931 ..	1.141	(f) 1.039	1950	1.491	..	1.415
1941 ..	1.154	(f) 1.053	1951	1.485	..	1.409

(a) Approximate only. (b) 1881-1890 mortality experience used. (c) 1891-1900 mortality experience used. (d) 1901-1910 mortality experience used. (e) 1920-1922 mortality experience used. (f) 1932-1934 mortality experience used. (g) 1946-48 mortality experience used.

NOTE.—It is not strictly correct to assume, as above, that a particular age-specific fertility rate can be applied to a hypothetical group of women reaching that age, without taking account of previous fertility and marriage experiences. Reproduction rates are, therefore, somewhat unreliable when birth and marriage rates have been changing. The indexes of marriage fertility shown on the next page are also of doubtful reliability in similar circumstances.

Since 1881 there has been a substantial downward trend in both rates, but the gross rate has fallen considerably more than the net, showing that the decline in fertility has been offset to some extent by a decline in mortality. The net reproduction rate was below unity over the period 1932 to 1939, and if the low level of those years were to continue, ultimate population decline would be certain. The progressive rise in both gross and net reproduction rates from 1939 to 1947 was due largely to higher marriage rates during the war and early post-war years than had been experienced in the immediate pre-war years. Such fluctuations in marriage rates affect both gross and net reproduction rates substantially. When fluctuations in marriage rates are transient, reproduction rates calculated as above are not valid as indicators of relative fertility nor of the extent to which population will replace itself. Owing to various influences the number of marriages in each year since 1948 has remained at a relatively high level and the net reproduction rates have been steady at about 1.4. The fertility of marriages is measured in paragraph 9 below.

8. **Gross and Net Reproduction Rates of Various Countries.**—In the following table a comparison is given of the gross and net reproduction rates recorded for various countries in the period 1947 to 1949. These have been taken mainly from the United Nations *Demographic Year Book*, 1949-50 and represent the latest available international comparison. More recent Australian rates are shown in the table above.

**GROSS AND NET REPRODUCTION RATES : VARIOUS COUNTRIES.**

Country.	Period.	Reproduction Rate.		Country.	Period.	Reproduction Rate.	
		Gross.	Net.			Gross.	Net.
Canada	1948	1.67	(a)	France	1947	1.46	1.31
New Zealand(b)	1949	1.62	1.51	Denmark	1947	1.40	1.27
United States of America(c)	1948	1.54	1.46	Switzerland	1946	1.29	1.16
Netherlands	1949	1.56	1.43	Sweden	1947	1.21	1.13
Finland	1948	1.67	1.40	Portugal	1949	1.55	1.13
Ireland, Republic of	1945-47	1.63	1.38	Norway	1948	1.23	1.13
Australia(d)	1949	1.46	1.38	England and Wales	1948	1.16	1.07
Scotland	1947	1.50	1.35	Belgium	1948	1.19	1.00

(a) Not available full-blood aboriginal.

(b) Excludes Maoris.

(c) White population only.

(d) Excludes

In comparing the reproduction rates of the countries shown above allowance should be made for any differences in years as the rates for any one country from year to year are affected by variations in the incidence of marriage.

9. **Fertility of Marriages.**—In issues of the Official Year Book prior to No. 36 estimates of the fertility of marriages were published. These were calculated by relating the births of one five-yearly period to the marriages in the preceding five years (see Official Year Book No. 35, p. 329). Since the publication of that issue, an improved method has been formulated for measuring current marriage fertility by relating nuptial confinements in each year to the marriages from which they could have resulted. Confinements of women of a certain number of years duration of marriage are related to the number of marriages taking place that number of years previously. The table below sets out this index of current fertility per marriage in respect of confinements in the individual years shown.

FERTILITY OF MARRIAGES : AUSTRALIA.

Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.	Year.	Nuptial Confinements per Marriage.
1936 .. ..	2.28	1941 .. ..	2.19	1946 .. ..	2.55
1937 .. ..	2.27	1942 .. ..	2.12	1947 .. ..	2.55
1938 .. ..	2.22	1943 .. ..	2.21	1948 .. ..	2.44
1939 .. ..	2.20	1944 .. ..	2.28	1949 .. ..	2.45
1940 .. ..	2.18	1945 .. ..	2.36	1950 .. ..	2.56
				1951 .. ..	2.55

NOTE.—See NOTE to table at top of p. 390.

The figure for a particular year gives the estimated number of children which a marriage would produce according to the fertility conditions of that year. It will be noted that there was an almost continuous decline to 1942, but a pronounced increase from 1943 to 1946. Comparing this index with the net reproduction rate it is evident that the rise in the latter since 1935 has been caused by a rise in the marriage rate, due firstly to the postponed depression marriages, and secondly to war-time marriages, and only in the last six years to any increase in the fertility of marriages. The figures for 1949 and subsequent years present a somewhat inflated index as many of the births which have been used to calculate the index relate to marriages of immigrants which took place overseas and are consequently not included in Australian marriage records. Partial investigation suggests that this factor may overstate the 1951 index by as much as 6 per cent. and that a truer figure based on births from marriages contracted in Australia would be about 2.40.

10. **Masculinity of Live Births.**—The masculinity of live births, i.e., the number of males born for every 100 female births, has remained fairly stable for Australia at about 105. But when the number of births for which masculinity is being calculated is small (for example, State totals), considerable variation is shown. For 1952 the figures ranged from 97.36 in the Northern Territory to 108.87 in Tasmania. The averages for the ten years 1941-50 were as follows:—New South Wales, 105.49; Victoria, 105.47; Queensland, 105.49; South Australia, 105.78; Western Australia, 104.27; Tasmania, 104.45; Australia, 105.38. The following table shows the figures for Australia for each ten-yearly period from 1901 to 1950 and for each year 1949 to 1952:—

MASCULINITY(a) OF LIVE BIRTHS REGISTERED : AUSTRALIA.

Particulars.	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.	1949.	1950.	1951.	1952.
Total Births .. ..	105.22	105.27	105.55	105.12	105.38	104.78	105.46	105.86	105.20
Ex-nuptial Births ..	104.08	105.25	105.16	105.36	105.34	101.20	105.38	105.30	99.57

(a) Number of males born for every 100 female births.

11. **Ex-nuptial Live Births.**—(i) *General.* Since 1901 the highest proportion of ex-nuptial births recorded in any one year was in 1905 when there were 6,545 ex-nuptial births representing 6.24 per cent. of total births. Since then the proportion has declined

steadily. The largest number of ex-nuptial births was recorded in 1946 when 7,613 were registered, but this number represented only 4.32 per cent. of total births. The lowest proportion was 3.78 per cent. in 1940.

The variations in the proportions of ex-nuptial births as between the individual States and Territories for 1952 are shown below. Corresponding figures for 1951 may be obtained from *Demography Bulletin* No. 69.

#### EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, 1952.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N.T.	A.C.T.	Aust.
Number ..	2,959	1,808	1,580	498	634	289	55	19	7,842
Proportion of Total Births%	3.99	3.36	5.10	2.78	4.11	3.65	12.28	1.72	3.89

The number and proportion of ex-nuptial births at intervals from 1901 to 1952 are as follows :—

#### EX-NUPTIAL LIVE BIRTHS : NUMBER AND PROPORTION, AUSTRALIA.

Particulars.	Annual Average.					1949.	1950.	1951.	1952.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.				
Number ..	6,498	6,836	6,238	5,133	6,780	7,372	7,324	7,555	7,842
Proportion of Total Births .. %	6.05	5.22	4.66	4.40	4.13	4.07	3.84	3.91	3.89

It is, of course, possible that the number of ex-nuptial births is somewhat understated owing to diffidence in proclaiming the fact of ex-nuptiality.

(ii) *Rate of Ex-nuptiality.* A further comparison is obtained by calculating the number of ex-nuptial births per thousand of the single, widowed and divorced female population between the ages of 15 and 45 years. On this basis the number of ex-nuptial births per 1,000 unmarried women of ages 15 to 45 has been found to be as follows :— 1880-82, 14.49; 1890-92, 15.93; 1900-02, 13.30; 1910-12, 12.53; 1920-22, 10.50; 1932-34, 6.91; and 1946-48, 11.45.

(iii) *Comparison of Rates.* The following table, showing the relative proportions of ex-nuptial and nuptial births to the total population, discloses a much greater proportional reduction in the ex-nuptial birth-rate than in the nuptial rate :—

#### CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH-RATES(a) : AUSTRALIA.

Birth-rate.	Annual Average.					1949.	1950.	1951.	1952.
	1901-10.	1911-20.	1921-30.	1931-40.	1941-50.				
Ex-nuptial	1.60	1.39	1.04	0.76	0.90	0.93	0.90	0.90	0.91
Nuptial ..	24.91	25.18	21.40	16.47	20.98	21.98	22.39	22.03	22.41
Total ..	26.51	26.57	22.44	17.23	21.88	22.91	23.29	22.93	23.32

(a) Number of births per 1,000 of mean population.

12. *Legitimations.*—In the several States Acts have been passed to legitimize children born before the marriage of their parents, provided that no legal impediment to the marriage existed at the time of birth. On registration in accordance with the provisions of the Legitimation Acts, any child who comes within the scope of their purposes, born before or after the passing thereof, is deemed to be legitimate from birth by the post-natal union of its parents, and entitled to the status of offspring born in wedlock. During 1951 and 1952 the numbers of children legitimized in Australia were 1,014 and 998 respectively, compared with 883 in 1939.

13. **Multiple Births.**—Because the current Australian birth statistics are based only on those confinements which resulted in a live-born child the number of confinements for multiple births for Australia is understated—firstly, because in cases where all children of a multiple birth are still-born the confinement is excluded, and secondly, because of differences in registration practice where still-births are involved, from which it is evident, in recent years, that in Victoria and Queensland, some, and in South Australia, all, cases of multiple births in which only one child was live-born have been registered as single births. It is estimated that the deficiency due to this second cause is about 50 cases per annum. During 1951 multiple births recorded on the above basis comprised 2,230 cases of twins, 17 cases of triplets and one case of quadruplets, the resultant numbers of live-born and still-born children being respectively 4,337 and 123 for twins and 50 and 1 for triplets. The four quadruplet children were live-born. This represents an average of 11.67 recorded cases of twins and 0.09 recorded cases of triplets per 1,000 confinements or, alternatively, mothers of twins represented one in every 86 mothers and mothers of triplets one in every 11,244. Total cases of multiple births represented 11.76 per 1,000 confinements or one in every 85 mothers.

The proportion of mothers of multiple births to total mothers does not vary greatly from year to year on the present basis of compilation.

Detailed statistics of multiple births will be found in the *Demography Bulletin*.

14. **Ages of Parents.**—The relative ages of the parents of children registered in 1951 have been tabulated separately for male and female births, multiple births being distinguished from single births. For total births and for multiple births the relative ages of parents are shown in *Demography Bulletin* No. 69. In the present work the exigencies of space allow only the insertion of a table showing, in respect of all confinements, the relative ages of parents in groups of five years.

15. **Birthplaces of Parents.**—A table showing birthplaces of parents of children whose births were registered during 1951 appears in *Demography Bulletin* No. 69.

16. **Occupation of Fathers.**—A table showing occupations of the fathers of all nuptial children registered in 1951 appears in *Demography Bulletin* No. 69.

17. **Age, Duration of Marriage and Issue of Mothers.**—(i) *General.* The total number of nuptial confinements resulting in live births in 1951 was 183,672, comprising 181,499 single births, 2,157 cases of twins, 15 cases of triplets and 1 case of quadruplets. The tables relating to previous issue exclude the issue of former marriages and still-born children. On the other hand, they include children by the same father which were born to the mother prior to the marriage. Children born at the present confinement are included in the total issue shown.

The tables below are shown in summarized form, more complete details for 1951 being given in *Demography Bulletin* No. 69.

(ii) *Duration of Marriage and Issue of Mothers.* The following table shows that in 1951 the duration of marriage of mothers of nuptial children ranged from less than one year to over 25 years, and that the average family increased fairly regularly with the duration of marriage. The average issue of married mothers who bore children in 1951 was 2.40 compared with 2.39 in 1950, 2.37 in 1949, 2.35 in 1948 and 2.31 in 1947.

#### NUPTIAL CONFINEMENTS : DURATION OF MARRIAGE AND ISSUE OF MOTHERS, AUSTRALIA, 1951.

Duration of Marriage (Years).	Total Married Mothers.	Total Issue.	Average Issue.	Duration of Marriage (Years).	Total Married Mothers.	Total Issue.	Average Issue.
0-1	24,044	24,438	1.02	14-15	2,330	11,064	4.75
1-2	23,593	28,252	1.20	15-16	1,960	9,968	5.09

10-11	6,046	22,111	3.66	24-25	142	1,205	8.49
11-12	4,961	19,559	3.94	25 and over	181	1,550	8.56
12-13	3,547	14,962	4.22				
13-14	2,888	12,996	4.50	Total	183,672	441,396	2.40

(iii) *Age and Average Issue of Mothers.* The following table shows the average number of children born to mothers of different ages. In the younger ages there is, naturally, little difference in the average number of children to each mother from year to year, but with the increase of the age of the mother the number of issue has fallen in comparison with past years. The average issue of mothers of all ages recorded for 1951 (namely, 2.40) is 26.5 per cent. below the average of 3.25 for the years 1911-20.

#### AGE AND AVERAGE ISSUE OF MOTHERS : AUSTRALIA.

Period.	Age of Mother (Years).							All Ages.
	Under 20.	20-24.	25-29.	30-34.	35-39.	40-44.	45 and over.

10 and over	..	..	5	39	240	225	47	556
Total Married Mothers	8,603	52,293	60,217	37,190	19,546	5,465	358	183,672

(v) *Previous Issue of Mothers of Twins, Triplets and Quadruplets.* Figures regarding the previous issue of married mothers of twins in 1951 show that 586 mothers had no previous issue either living or deceased, 646 had one child previously, 405 had two previous issue, 225 three, 136 four, 62 five, 30 six, 22 seven, 16 eight, 10 nine, 2 ten, 4 eleven, 4 twelve, 2 thirteen and 1 seventeen.

Of the 15 cases of nuptial triplets registered during 1951, 2 mothers had no previous issue, 5 had one, 6 had two, 1 had three, and 1 had six previous issue. The mother of quadruplets had one previous child.

18. *Nuptial First Births.*—(i) *Duration of Marriage.* The following table shows the interval between marriage and first birth for 1911-20, 1921-30, 1931-40, 1941-50, 1949, 1950 and 1951. In cases of multiple births, the first live-born child only is enumerated. A more extensive presentation of duration of marriage for the periods, other than 1951, shown in this table is given in Official Year Book No. 39, page 594. Greater detail for each year will be found in the relevant *Demography Bulletin*.

1951 .. .. .	62,078	121,594	183,672	33.80

19. *Stillbirths.*—Registration of stillbirths is not compulsory in all Australian States. It has been compulsory in Western Australia since 14th January, 1908 ; in the Australian Capital Territory since 1st January, 1930 ; in New South Wales since 1st April, 1935 ; in South Australia since 1st May, 1937 ; and in Victoria from 1st January, 1953. In Victoria, independently of compulsory registration, and in Queensland and Tasmania where registration is not enforced, some information is obtained by notification of stillbirths for various purposes. Because registration is not compulsory in all States detailed statistics of stillbirths for Australia as a whole have not been compiled.

The number of stillbirths in each State and Territory, as recorded by the means outlined above since 1936, is shown in the following table :—

**STILLBIRTHS.**

(a) Number of stillbirths per 1,000 of all births (live and still). (b) Not available. (c) Three years 1938-40. (d) Four years 1942-45. (e) Excludes Queensland for 1941. (f) Excludes Northern Territory.

### § 3. Mortality.

1. Number of Deaths.—(i) Year 1952. The following table shows the number of deaths, male and female, registered in each State during the year. Stillbirths, although registered as both births and deaths in some States, are excluded from the death statistics published herein.

#### DEATHS, 1952.

Sex.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
Males ..	18,194	12,590	6,588	3,808	3,077	1,427	72	95	45,851
Females ..	13,844	10,732	4,583	3,242	2,132	1,152	17	44	35,746
Persons ..	32,038	23,322	11,171	7,050	5,209	2,579	89	139	81,597

(ii) Years 1901 to 1952. A summary of the total number of deaths in each State and Territory since 1901 is given in the following table. Annual averages for each five-yearly period from 1861 will be found in Official Year Book No. 39, page 597.

#### DEATHS.

(a) Part of New South Wales prior to 1911. (b) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period September, 1939 to June, 1947.

DEATHS—*continued.*

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
YEARLY TOTALS.									
1947(a) ..	28,449	21,442	10,116	6,215	4,723	2,363	65	95	73,468
1948 ..	30,403	21,825	10,462	6,748	4,685	2,528	73	115	70,839
1949 ..	29,364	21,991	10,161	6,373	4,790	2,389	92	100	75,200
1950 ..	30,965	22,341	10,399	6,740	5,058	2,466	96	122	78,187
1951 ..	31,932	23,446	11,105	7,184	5,288	2,567	117	149	81,788
1952 ..	32,038	23,322	11,171	7,050	5,209	2,579	89	139	81,597

(a) Excludes deaths of defence personnel and of internees and prisoners of war from overseas for the period January to June, 1947.

2. **Crude Death-rates.**—The commonest method of measuring the mortality rate is to relate the number of deaths for a given period to the mean population for that period, thus obtaining the crude death-rate. This rate for a given period measures the numbers per thousand of population by which the population is depleted through deaths during that period. Crude death-rates for each State and Territory from 1901 to 1952 are shown in the following table.

## CRUDE DEATH-RATES.(a)

Period.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
AVERAGE ANNUAL RATES.									
1901-1905	11.25	12.74	11.38	10.96	12.58	10.79	15.69	..	11.76

## YEARLY RATES.

1947(c) ..	9.53	10.44	9.15	9.62	9.39	9.17	5.97	d 5.62	9.69
1948 ..	10.04	10.44	9.31	10.25	9.10	9.55	5.99	d 6.33	9.96
1949 ..	9.43	10.28	8.85	9.45	8.99	8.76	6.83	d 5.23	9.51
1950 ..	9.60	10.14	8.82	9.63	9.05	8.74	6.43	d 5.95	9.55
1951 ..	9.62	10.33	9.20	9.98	9.09	8.76	7.32	6.11	9.70
1952—									
Males ..	10.64	10.68	10.46	10.35	9.91	9.10	7.29	6.19	10.47
Females	8.24	9.29	7.58	8.73	7.31	7.82	2.73	3.78	8.37
Persons	9.45	9.99	9.05	9.53	8.65	8.48	5.53	5.15	9.43

(a) Number of deaths per 1,000 of mean population.

(b) Part of New South Wales prior to 1911.

(c) Excludes deaths of defence personnel from September, 1939 to June, 1947.

(d) Rates based on revised mean population estimates shown on page 335 are as follows:—1946-50, 5.30; 1947, 5.58; 1948, 5.99; 1949, 4.72; 1950, 5.17.

3. **Standardized Death-rates.**—(i) *General.* The death-rates quoted above are crude rates, i.e., they simply show the number of deaths per thousand of mean population without taking into consideration differences in the sex and age composition of the population. Other conditions being equal, however, the crude death-rate of a community will be low if it contains a large percentage of young people (not infants), and conversely it will be relatively high if the population includes a large proportion of elderly people.

The foregoing table of crude death-rates, therefore, does not indicate comparative incidence of mortality either as between States in the same year or in any one State over a period of years. In order to obtain a comparison of mortality rates on a uniform basis as far as sex and age constitution are concerned, "standardized" death-rates may be computed. These are computed by selecting a particular distribution of age and sex as a standard, and then calculating what would have been the general death-rate if the death-rates for each sex and in each age group were as recorded, but the age and sex distribution were the same as in the standard population. For the standardized rates which follow, the standard population compiled by the International Institute of Statistics has been used. This standard is based upon the age distribution according to sex of nineteen European countries at their Censuses nearest to the year 1900. Full details of the "Standard Population" are given in Official Year Book No. 22, p. 962.

(ii) *Death-rates in Age Groups.* An examination of the age distribution of deaths and the resultant age-specific mortality rates is made in paragraph 9.

(iii) *Comparison of Crude and Standardized Death-rates.* The relative incidence of mortality as between individual States and as between the years 1921, 1933, and 1947 is illustrated in the following statement of crude and "standardized" death-rates. These years have been chosen for comparison because the Census data give essential information as to sexes and ages of the State populations. Crude death-rates are shown to indicate the degree to which they disguise the true position.

#### CRUDE AND STANDARDIZED DEATH-RATES.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
<b>Crude Death-rate(a)—</b>							
1921 .. .. .	9.50	10.52	9.37	10.02	10.42	10.30	9.91
1933 .. .. .	8.58	9.59	8.84	8.44	8.64	9.60	8.92
1947 .. .. .	9.53	10.44	9.15	9.62	9.39	9.17	9.69
<b>Standardized Death-rate(b)—</b>							
1921 .. .. .	10.35	10.79	10.24	10.38	11.88	10.83	10.58
1933 .. .. .	8.52	8.74	9.10	7.66	8.74	8.86	8.62
1947 .. .. .	7.44	7.31	7.47	6.77	7.28	7.21	7.34

(a) Total deaths per 1,000 of mean population.  
in para. 3 (l) above.

(b) See explanation of standardized death-rates

The comparisons above relate to individual years in which a census of population was taken and should not be used as the basis for general conclusions as to changes in incidence of mortality for other than those years.

(iv) *Standardized Death rates, Australia, 1947 to 1951.* The standardized death-rates for Australia for 1947 and later years were as follows:—1947, 7.34; 1948, 7.41; 1949, 7.18; 1950, 7.23; and 1951, 7.45.

4. *True Death-rates.*—The main objections to standardized death-rates are that the choice of a standard population is arbitrary and that the standardized rates have little value except for comparative purposes, and even then variation of the standard population may make appreciable differences. A correct measurement of the mortality of the population can be obtained, however, from life tables. A life table represents the number of survivors at each age from a selected group of newly-born children who are subject to given mortality conditions, and from such a table the complete expectation of life at birth can be calculated. The reciprocal of this figure is known as the true death-rate, since, if the complete expectation of life of a person at birth is 50 years, say, then each person will on the average die 50 years after birth, so that in the standard population one person in 50 or 20 per thousand will die each year. The true death-rate for a given period is unaffected by the particular age distribution of that period and is determined solely by the mortality experience of the period as manifested in the rate of survivorship from each year of age to the next. The table below sets out complete expectation of life at birth and true death-rates for the periods covered by Australian life tables.

**COMPLETE EXPECTATION OF LIFE AT BIRTH AND TRUE DEATH-RATES :  
AUSTRALIA.**

Period.	Complete Expectation of Life at Birth (Years).		True Death-rate.	
	Males.	Females.	Males.(a)	Females.(b)
1881-1890.. .. .	47.20	50.84	21.19	19.67
1891-1900.. .. .	51.08	54.76	19.58	18.26
1901-1910.. .. .	55.20	58.84	18.12	17.00
1920-1922.. .. .	59.15	63.31	16.91	15.80
1932-1934.. .. .	63.48	67.14	15.75	14.89
1946-1948.. .. .	66.07	70.63	15.14	14.16

(a) Number of deaths per 1,000 males in life table or stationary population. (b) Number of deaths per 1,000 females in life table or stationary population.

5. Crude Death-rates of Various Countries.—The following table gives the crude death-rates for Australia in comparison with the rates for various other countries.

Union of South Africa(e) ..	1945-47	15.7	14.6	Czechoslovakia	1929-32	19.3	18.1
				Greece ..	1926-30	20.4	19.7

(a) Number of deaths per 1,000 males in life table or stationary population (see explanation on page 400). (b) Number of deaths per 1,000 females in life table or stationary population (see explanation on page 400). (c) Excludes full-blood aboriginals. (d) Excludes Maoris. (e) White population only. (f) Federal Republic (Western Germany).

7. Australian Life Tables.—(i) *Life Tables prior to 1947.* It has been the practice at each Census from 1911 onwards to prepare Life Tables representative of the mortality experience of Australia. In 1911 the mortality of the Australian population for the thirty years from 1881 to 1910 inclusive was investigated by the Commonwealth Statistician. Tables were compiled for each State and for Australia as a whole in respect of each sex for each of the decennial periods 1881-1890, 1891-1900 and 1901-1910. These compilations furnished a comprehensive view of Australian mortality in respect of sex, of time, and of geographical distribution, and practically superseded all Life Tables prepared in Australia prior to 1911. In addition, monetary tables based on the experience for the whole of Australia for the decennium 1901-1910 were prepared and published.

At the Census of 1921 Life Tables were prepared by the Commonwealth Statistician from the population recorded and the deaths in the three years 1920-22. Similarly in 1933 the Life Tables, which were prepared by Mr. F. W. Barford, M.A., A.I.A., were based on the Census population and the deaths in the calendar years 1932-34.

(ii) *Life Tables of Census of 1947.* On the occasion of the 1947 Census, Life Tables representing the sixth in the series were compiled by the Commonwealth Actuary, Mr. W. C. Balmford, O.B.E., F.I.A. These were based on the population recorded, in conjunction with the deaths during 1946, 1947 and 1948, as it was considered undesirable to take into account deaths occurring prior to 1946 owing to the possible effects on the civilian population of conditions arising from the 1939-45 War. Full particulars of the data used, the methods of construction and the tabulations of these Life Tables will be found in the report of the Commonwealth Actuary which was published by the Commonwealth Statistician in 1950. This report also appeared in Volume III. of the Census of the Commonwealth of Australia, 1947. Monetary tables for both single and joint lives have also been prepared by the Commonwealth Actuary and are in the course of printing.

Comparative tables showing the number of survivors ( $l_x$ ) out of 100,000 births, rates of mortality ( $q_x$ ) and probability of surviving ten years ( ${}_{10}p_x$ ), at selected ages, in respect of the Australian Life Tables of 1920-22, 1932-34 and 1946-48, together with

a summary of the main characteristics of the tables, were published in Official Year Book No. 39, pages 602-3. The expectation of life at selected ages taken from these three Life Tables is as follows:—

**AUSTRALIAN LIFE TABLES : COMPLETE EXPECTATION OF LIFE ( $e_x$ ) AT SELECTED AGES.**

Age (x).	Males.			Females.		
	1920-22.	1932-34.	1946-48.	1920-22.	1932-34.	1946-48.

8. Infant Deaths and Death-rates.—(i) *Australia*, 1901 to 1952. The universal experience that during the first few years of life the higher death-rate of male infants tends to counteract the excess of male births is confirmed by the fact that out of 484,669 male infants born from 1948 to 1952, 13,664 (28.19 per 1,000) died during the first year of life, while of 460,107 female infants only 10,206 (22.18 per 1,000) died during the first year. Stillbirths are not included in any of the tables relating to deaths.

(a) Number of deaths of children aged one month and under one year per 1,000 live births registered.

(b) Not available.

(c) Part of New South Wales prior to 1911.

These tables indicate the striking decrease in infant mortality in Australia since the beginning of the century, the mortality rate of children aged under one year per 1,000 live births for 1952 being slightly less than one-fourth of the average rate for 1901-05. The tables above reveal the fact that this improvement was due almost entirely to the decrease in deaths from preventable causes, the mortality rate for children aged one month but under one year declining by 89 per cent. while that for children aged under one month declined by only 50 per cent.

(iii) *Statistical Divisions.* The total numbers of births and of deaths of children under one year of age for 1951 are shown in *Demography Bulletin* No. 69 for each of the sixty-five statistical divisions for which vital statistics have been tabulated.

(iv) *Various Countries and Cities.* Compared with other countries Australia occupies a very favorable position in respect of infant mortality. In 1951 only New Zealand and Sweden recorded a lower rate than Australia.

A study of the respective rates shows that a high birth-rate is often, though not invariably, accompanied by a high infant death-rate.

In 1950 the Australian cities, Melbourne, Hobart, Perth, Sydney and Adelaide were among the ten cities having the lowest rates in the following list. The list is headed by Stockholm (18), Melbourne (19), Christchurch (19), and Oslo (21), the next six cities being Hobart, Auckland, Wellington, Perth, Sydney and Adelaide. Of the cities listed, Cairo had the highest rate, 179.

(v) *Causes of Death: Children under one Year.* Causes of deaths of children under one year of age should be considered in relation to age at death, because the emphasis on various causes changes rapidly as age at death varies. In 1951, 2,867 (97.82 per cent.) of the deaths occurring during the first week of life were caused by congenital malformations (10.64 per cent.) and certain diseases of early infancy (87.18 per cent.). Of the latter, more than three-fifths were associated with immaturity (*see table below*). At ages one week and under four weeks the proportions were 29.05 per cent. and 61.42 per cent. respectively. Of deaths of children over four weeks and under one year of age, 19.32 per cent. were caused by congenital malformations and only 6.55 per cent. by diseases of early infancy, the emphasis having shifted to respiratory and digestive diseases (44.12 per cent.), infective and parasitic diseases (8.69 per cent.), diseases of the nervous system (7.55 per cent.) and accidents and violence (7.22 per cent.). A summary for 1951 of the deaths of children under one year of age, classified according to principal causes of death and age at death, is given in the following table.

Deaths from each cause in the detailed list of titles adopted for publication, classified according to age at death, will be found in *Demography Bulletin* No. 69. Causes of infant deaths in each State and Territory in 1951 will also be found therein.

(a) Age 4 weeks and under 2 months.

(b) For further detail of this group of causes *see* next table.

The individual categories representing the causes of death which come within Class XV.—Certain Diseases of Early Infancy are designed to show the effect of immaturity in such causes of infant death. In 1951, 63 per cent. of deaths during the first week of life and 23 per cent. of those in the next three weeks of life were due, directly or indirectly, to immaturity. The relationship between immaturity and each of the individual categories of Class XV. is shown for the year 1951 in the following table:—

**DEATHS FROM CERTAIN DISEASES OF EARLY INFANCY: AUSTRALIA, 1951.**

Category No.	Cause of Death.	Without Mention of Immaturity.			With Immaturity.			Total.		
		Males.	Fe-males.	Per-sons.	Males.	Fe-males.	Per-sons.	Males.	Fe-males.	Per-sons.

(vi) *Deaths of Ex-nuptial Children under one Year of Age.* Distinction between nuptial and ex-nuptial children in death statistics for Australia as a whole has been made only since 1925. Results show that death-rates during infancy are generally much higher for ex-nuptial children than for nuptial children, but the disparity has become smaller in recent years. The following table shows the number of deaths under one year and the infant mortality rates for nuptial, ex-nuptial children and all children in five-yearly periods since 1926 and for each year from 1946 to 1951.

**DEATHS UNDER ONE YEAR OF AGE: NUPTIAL AND EX-NUPTIAL, AUSTRALIA.**

Period.	Nuptial Children.		Ex-Nuptial Children.			All Children.	
	Number of Deaths.	Infant Mortality Rate.(a)	Number of Deaths.	Infant Mortality Rate.(b)		Number of Deaths.	Infant Mortality Rate.(c)
				Actual.	Ratio to Nuptial Rate. (Per Cent.)		
1926-30 ..	31,367	49.96	2,888	93.38	187	34,255	51.99
1931-35 ..	21,460	40.09	1,713	65.37	163	23,173	41.27
1936-40 ..	21,792	37.59	1,680	66.87	178	23,472	38.81
1941-45 ..	24,053	34.20	1,627	52.39	153	25,680	34.97
1946-50 ..	23,139	26.54	1,373	37.37	141	24,512	26.98
1946 ..	4,814	28.52	302	39.67	139	5,116	29.01
1947 ..	4,874	27.83	328	45.16	162	5,202	28.52
1948 ..	4,674	27.36	268	37.36	137	4,942	27.77
1949 ..	4,333	24.92	254	34.45	138	4,587	25.31
1950 ..	4,444	24.25	221	30.17	124	4,665	24.47
1951 ..	4,687	25.23	191	25.28	100	4,878	25.24

(a) Number of deaths under one year of age per 1,000 nuptial live births registered. (b) Number of deaths under one year of age per 1,000 ex-nuptial live births registered. (c) Number of deaths under one year of age per 1,000 total live births registered.

The ex-nuptial rates are higher at all ages under one year but the difference is greatest several months after birth. For the five years 1947-51 the ratio of the ex-nuptial to the nuptial rate at various ages was as follows:—Under one month, 127 per cent.; one month, 158 per cent.; 2 months, 160 per cent.; 3 months, 136 per cent.; 4 months, 132 per cent.; 5 months, 186 per cent.; under one year, 133 per cent.

Full particulars of the causes of deaths of ex-nuptial children who died in 1951, aged under four weeks and under one year, are given for each State and Territory in *Demography Bulletin* No. 69. Detailed information for Australia as to the age at which ex-nuptial children died from each cause of death will also be found therein. It is difficult to assess the real significance of the differences between the numbers of nuptial and ex-nuptial deaths from each individual cause because of the small number of ex-nuptial deaths involved in each case.

9. Age Distribution.—(i) *Number of Deaths.* Age at death is recorded for statistical purposes in days for the first week of life, in weeks for the first four weeks, in months for the first two years and in completed years of life thereafter. Owing to exigencies of space these ages are usually combined in groups for publication, the most common grouping being in weeks for the first four weeks, in months or groups of months for the first year, in single years of age for the first five years and thereafter in the five-year groups 5-9 years, 10-14 years, etc. A summary in this form for Australia is given in the following table for the year 1951.

## AGE AT DEATH : AUSTRALIA, 1951.

Age at Death.	Males.	Fe- males.	Per- sons.	Age at Death.	Males.	Fe- males.	Per- sons.

The number of deaths in 1951 at each year of life is shown in *Demography Bulletin* No. 69.

There is a differential mortality at various stages of life and the actual number of deaths in any period depends upon the impact of these rates on the numbers living at the respective stages. Changes in the number of deaths from one period to another are caused by changes in the rate of mortality in the various age groups and by the changed proportions of persons living in the different groups.

In Australia during the last fifty years there has been a steady improvement in the rate of mortality at all ages, thus tending to reduce the number of deaths. This has been most pronounced at ages under one year. The increased length of life due to this factor, coupled with the long-term decline in the birth-rate and the effects of past and present migration, has been a significant cause in changing the age distribution of the population and consequently the age distribution of deaths, thus obscuring the effects of improved mortality rates.

The combined effect of these various influences can be seen from the following table, which shows the proportion of deaths in various age groups in periods of ten years from 1901 to 1950 and for the years 1951 and 1952.

PROPORTION OF DEATHS IN EACH AGE GROUP : AUSTRALIA.  
(Per Cent.)

Period.	Age Group (Years).								Total.
	Under 1.	1-4.	5-19.	20-39.	40-59.	60-64.	65 and over.	Unspecified.	
1901-10 ..	20.51	6.45	6.37	14.99	17.99	5.31	28.26	0.12	100.00
1911-20 ..	16.66	6.09	5.49	14.44	20.32	6.19	30.68	0.13	100.00
1921-30 ..	13.10	4.51	4.85	12.12	20.55	8.26	36.53	0.08	100.00
1931-40 ..	7.40	2.56	3.83	9.36	20.54	8.36	47.92	0.03	100.00
1941-50 ..	6.79	1.71	2.26	6.01	19.04	9.33	54.84	0.02	100.00
1951 ..	5.96	1.57	1.89	5.65	17.84	9.85	57.21	0.03	100.00
1952—Males ..	6.05	1.43	2.05	6.19	19.74	11.21	53.30	0.03	100.00
Females ..	5.66	1.53	1.48	4.50	15.70	8.35	62.77	0.01	100.00
Persons ..	5.88	1.47	1.80	5.45	17.97	9.96	57.45	0.02	100.00

A table showing these proportions for males and females separately for the period 1901 to 1950 will be found in Official Year Book No. 39, page 614.

(ii) *Age-specific Death-rates.* In previous issues of the Official Year Book average annual age-specific death-rates were given for each State and for Australia for the years 1932-34 and 1946-48 (see No. 37, p. 778 and No. 39 pp. 615-6). A table showing the rates in the age groups used for calculating the standardized death-rate for each State for the year 1947 appeared in Official Year Book No. 39, p. 599. Estimates of the age distribution of the population in each State are not available to enable a similar comparison to be made for later years.

Estimates of the age distribution of the population of Australia as a whole, shown on page 351, and similar estimates for 1950, have been used to calculate the following age-specific death-rates.

AGE-SPECIFIC DEATH RATES<sup>(a)</sup> : AUSTRALIA.

Age Group (Years).	1950.	1951.	1952.	Age Group (Years).	1950.	1951.	1952.
0-4 ..	6.56	6.62	6.39	50-54 ..	8.89	8.93	8.91

40-44 ..	3.56	3.39	3.34	90 and over ..	336.63	353.50	352.43
45-49 ..	5.52	5.63	5.62				

(a) Average number of deaths per 1,000 of population in each age group.

10. *Birthplaces of Persons who Died.*—A table showing the birthplaces of persons whose deaths were registered in each year will be found in the *Demography Bulletin*. Tabulations were discontinued for the years 1941 to 1945 inclusive, but were revived for 1946. Details for 1951 appear in *Demography Bulletin* No. 69.

11. **Occupation of Males who Died.**—A table showing occupations of males who died during 1951 appears in *Demography Bulletin* No. 69.

12. **Causes of Death.**—The classification of causes of death adopted for Australia by the Commonwealth Bureau of Census and Statistics at the inception of its mortality statistics in 1907 was that introduced by the International Institute of Statistics in 1893, reviewed by that Institute in 1899 and revised by an International Commission in 1900. This classification became known as the International List of Causes of Death and further revisions by International Commissions in 1909 (Second), 1920 (Third), 1929 (Fourth) and 1938 (Fifth) were successively adapted for use in Australian statistics.

Proposals for the Fourth and Fifth revisions were drafted by a "Mixed Commission" of representatives of the International Statistical Institute and the Health Organization of the League of Nations and the final revision was carried out by the International Conference for the Revision of the International List of Causes of Death. Preparatory work in connexion with the Sixth Revision was entrusted by the International Health Conference in 1946 to the Interim Commission of the World Health Organization. As a result of this arrangement the World Health Organization compiled the International Statistical Classification of Diseases, Injuries and Causes of Death, which in its final stages was unanimously approved by the International Conference for the Sixth Revision of the International Lists of Diseases and Causes of Death in April, 1948. This classification was adopted by the First World Health Assembly, which also issued Regulations to guide member states in its application. Australia adopted the classification, together with the rules for using it, for use commencing with the year 1950.

For the first time in connexion with the International List, international rules for a uniform method of selecting the main cause to be tabulated, if more than one cause is stated on the death certificate, have been laid down, as well as the new classifications of causes of death. Prior to 1950 the rules adopted in Australia for the selection of the cause of death to be tabulated were those laid down in the United States Manual of Joint Causes of Death, first published in 1914 and revised to conform with successive revisions of the International List.

The adoption of the new method marked a fundamental change in Australian cause of death statistics, with emphasis now placed on the underlying cause of death as indicated by the certifying practitioner. The introduction of this method required the adoption by all States of a form of medical certificate substantially identical with the International Form of Medical Certificate of Cause of Death as laid down in Article 9 of the World Health Organization Regulations No. 1. By 1950 all States had adopted satisfactory forms of certificate and it was possible to apply the new principles uniformly to all State cause of death records.

This change in principle affects the comparability of the statistics for 1950 and subsequent years with those of earlier years. For convenience in assessing the extent of the change and in accordance with a recommendation of the Sixth Decennial Revision Conference, causes of death for Australia for 1950 were also classified according to the detailed classification of the Fifth Revision, 1938, on the joint cause rules current for that revision. A complete detailed classification according to both the Fifth and Sixth Revisions is shown in *Demography Bulletin* No. 68. Commencing with 1951 the classification is according to the Sixth Revision only and detailed figures on this basis for 1951 are shown in *Demography Bulletin* No. 69.

In order to facilitate the limited presentation of cause of death statistics the present International Classification provides two special lists of causes for tabulation—the Intermediate List of 150 causes and the Abbreviated List of 50 causes. The latter has been used for the cause of death tabulations A to D which follow. Tables A, B and C show deaths of males, females and persons, respectively, for 1951 and Table D shows the numbers of persons who died and the death rates for the years 1950 and 1951. Tables corresponding to Tables A, B and C for the year 1950 in the Intermediate form of the Fifth Revision, and numbers of deaths and death-rates for various periods in the Abridged form, will be found in *Official Year Book* No. 39, pp. 618-625.

13. **Deaths from Principal Causes.**—(i) *General.* In the preceding tables particulars have been given for each of the causes of death comprising the Abbreviated Classification according to the Sixth Revision of the International List. The more important of these causes are treated in detail hereunder. The Abbreviated Classification number used in tables A to D is indicated in parentheses for each cause or group of causes.

(ii) *All Forms of Tuberculosis (B1, B2).* (a) *General.* The total number of deaths classified to all forms of tuberculosis in 1951 in accordance with the methods used in conjunction with the Sixth Revision of the International List was 1,538, consisting of 1,080 males and 458 females, compared with 1,675 (1,172 males and 503 females) classified on the same basis in 1950. In comparing any of the figures for 1950 and 1951 with those for 1949 and earlier years consideration should be given to the effect of the change in basis from the Fifth to the Sixth Revision of the International List. This was discussed in Official Year Book No. 39, p. 626.

(b) *Age at Death.* The following table shows the age groups of males, females and persons who were classified under the Sixth Revision as dying from this disease in 1951, together with figures for 1921, 1931 and 1941, classified under former Revisions.

(e) *Death-rates.* In order to show the relative incidence of tuberculosis in each State and Territory and the improvement which has taken place in recent years, the death-rates from tubercular diseases for 1931, 1941 and 1951 are given in the following table. The rates for 1951 are based on the causes of death compiled according to the Sixth Revision.

## TUBERCULOSIS (ALL FORMS) : DEATH-RATES.(a)

State or Territory.	1931.			1941.			1951.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.
New South Wales	53	37	45	47	24	36	26	12	19
Victoria ..	59	51	55	54	37	45	25	11	18
Queensland ..	45	28	37	40	20	30	29	8	19
South Australia ..	58	56	57	40	34	37	21	10	15
Western Australia	74	40	58	60	25	44	22	6	14
Tasmania ..	61	51	56	48	44	46	21	25	23
Northern Territory	69	..	44	27	35	29	20	33	25
Australian Capital Territory ..	21	25	23	..	15	7	30	37	33
Australia ..	55	42	49	48	29	38	25	11	18

(a) Number of deaths from tuberculosis per 100,000 of mean population.

(f) *Proportion of Total Deaths.* A table showing the number of deaths from tuberculosis per 10,000 deaths from all causes in each State and Territory during 1911-20, 1921-30, 1931-40 and 1941-50 was given in Official Year Book No. 39, p. 627.

(g) *Death-rates, Various Countries.* The following table shows the death-rates from tuberculosis for Australia in comparison with the rates for various other countries. The comparison is made on the latest figures available but as some countries have not yet adopted the Sixth Revision of the International List for their statistics it is not possible to present the figures consistently on that basis. Of the 21 countries shown, 12 use the Sixth Revision of the List, 6 use the Fifth, and one uses the Fourth, while 2 use independent classifications. The table indicates that Australia occupies a very favorable position as regards the death-rate from this disease.

## TUBERCULOSIS : DEATH-RATES(a), VARIOUS COUNTRIES.

Country.	Year.	Respiratory System.	All Forms.	Country.	Year.	Respiratory System.	All Forms.
Denmark ..	1950	12	14	Germany, Federal Republic ..	1950	33	40
Netherlands ..	1951	13	16	Belgium ..	1950	34	43
Australia(b)	1951	17	18	Italy ..	1950	33	43
Sweden ..	1950	19	22	Ceylon ..	1950	49	53
U.S. of America ..	1950	21	22	France ..	1950	47	58
New Zealand(c)	1950	19	23	Ireland, Republic of	1950	62	79
Union of South Africa(d)	1950	19	23	Finland ..	1950	78	92

United Kingdom ..	1950	34	38				

(a) Number of deaths per 100,000 of mean population.

(b) Excludes full-blood aboriginals.

(c) Excludes Maoris.

(d) White population only.

(iii) *Malignant Neoplasms, including Neoplasms of Lymphatic and Haematopoietic Tissues (B18).* (a) *General.* It was shown in Official Year Book No. 39, p. 628 that deaths classified under this heading according to the Sixth Revision of the International List are not directly comparable in total with those on the Fifth Revision basis and

comparability ratios were given to enable comparison on an adjusted basis to be made. This change must be kept in mind in considering the comparisons between 1951, 1941, 1931 and 1921 which are shown in the following pages.

(b) *Type and Seat of Disease.* Tables showing the type and seat of disease, in conjunction with age and conjugal condition of the persons dying from malignant neoplasms in 1951 will be found in *Demography Bulletin* No. 69. A summary regarding type and seat of disease for 1951 (Sixth Revision basis) is given below. It may be pointed out that the significance of the number of deaths shown for the various types of neoplasms enumerated hereunder is doubtful, owing to the fact that, in the absence of a post-mortem, it is impracticable for the certifying doctor in the majority of cases to make an accurate diagnosis as to type in the detail required for the following classification.

**DEATHS FROM MALIGNANT NEOPLASMS AND NEOPLASMS OF LYMPHATIC AND HAEMATOPHOETIC TISSUES: TYPE AND SEAT OF DISEASE, AUSTRALIA, 1951.**

(c) *Age at Death.* The ages of persons who died from malignant neoplasms in 1921, 1931, 1941 and 1951 are given below. Inferences drawn from the great increase in the number of deaths from malignant neoplasms in 1951 compared with 1921 need qualification in view of the altered age constitution of the population since the earlier year. The number of people over 55 years of age, at which level cancer risks are greatest, more than doubled between 1921 and 1951, whilst those in the age-group 75 years and over more than trebled. It is only in this extreme old age-group from 75 onwards that the rate of mortality, as distinct from the number of deaths, has increased. For groups up to age 75 there has been no increase in mortality rates since 1921; indeed, in some age groups the rates have actually declined. It is also probable that a proportion of the increased number of deaths from cancer recorded in recent years has been due to more correct diagnosis and certification on the part of medical practitioners rather than to any actual increase in the disease itself.

(d) *Occupation at Death, Males.* A table showing main groups of occupations of males who died from malignant neoplasms and neoplasms of lymphatic and haemato-poietic tissues during 1951 appears in *Demography Bulletin* No. 69.

(e) *Death-rates.* The following table shows the death-rates per 100,000 of mean population from malignant neoplasms in each State for 1931, 1941 and 1951. These rates are crude death-rates which do not take account of changes in the age constitution of the population, and to a substantial extent reflect the increasing age of the population rather than the true change in mortality from malignant neoplasms (see para. 13 (iii) (c) page 418).

## MALIGNANT NEOPLASMS : DEATH-RATES.(a)

(a) Number of deaths per 100,000 of mean population. (b) Number in parentheses indicates Fourth, Fifth or Sixth Revision of the International List. In Sweden and Switzerland independent classifications are used. (c) European population only. (d) Excludes full-blood aboriginals. (e) Excludes Maoris.

(iv) *Diseases of the Heart (B25 to B28)*. The number of deaths classified to diseases of the heart in 1951 on the basis of the Sixth Revision of the International List of Causes of Death was 26,429 (15,646 males and 10,783 females). Details for each individual category within the group may be obtained from *Demography Bulletin* No. 69. This class is the largest among causes of death, the death-rate having increased from 1,019 per million in 1911-15 to 2,705 in 1939-43 and 3,135 in 1951. The increase in the number of deaths recorded from heart diseases has been particularly pronounced during the past sixteen years. The rapid increase in mortality is partly a reflection of the ageing of the population, but the figures have been influenced mainly by improved diagnosis and certification by medical practitioners. Many deaths of elderly people, formerly attributed to senility or other indefinite causes, are believed to be now more frequently certified as associated with some form of heart disease, usually myocardial degeneration. The improvement in diagnosis has been particularly evident in the case of diseases of the coronary arteries. When first listed in the heart disease group in 1931, there were 1,139 deaths from this cause and angina pectoris, but in 1950 the number on a comparable basis (Fifth Revision) was 9,027. The number of deaths classified under the Sixth Revision as due to diseases of the heart, together with death-rates and proportions per 10,000 deaths in 1951, are given in the following table.

## DISEASES OF THE HEART : DEATHS, DEATH-RATES AND PROPORTION PER 10,000 TOTAL DEATHS, 1951.

State or Territory.	Number of Deaths.			Death-rates.(a)			Proportion per 10,000 Total Deaths.		
	Males.	Females.	Persons.	Males.	Females.	Persons.	Males.	Females.	Persons.

Western Australia	1,071	645	1,716	358	228	295	3,471	2,929	3,245
Tasmania .. ..	419	321	740	279	225	253	2,967	2,779	2,883
Northern Territory	14	4	18	141	66	113	1,505	1,667	1,538
Australian Capital Territory .. ..	31	11	42	230	101	172	3,131	2,200	2,819
<b>Australia .. ..</b>	<b>15,646</b>	<b>10,783</b>	<b>26,429</b>	<b>367</b>	<b>259</b>	<b>314</b>	<b>3,405</b>	<b>3,009</b>	<b>3,231</b>

(a) Number of deaths from diseases of the heart per 100,000 of mean population.

(v) *Diarrhoea and Enteritis (Children under two years of age)*. Figures published in Official Year Book No. 39, p. 634, show that deaths in this category declined from a rate of 22.8 per 1,000 children born for the period 1911-15 to 1.5 for the period 1946-50, from which it is evident that this cause of death is no longer the scourge that it was in earlier years.

Owing to changes in classification it is not possible to continue the tables in the same form for 1951.

(vi) *Puerperal Causes (B40)*. It was shown in Official Year Book No. 39, p. 634, that the changes introduced with the Sixth Revision of the International List did not significantly affect the comparability of the total number of deaths from puerperal causes. The death-rate from these causes (including criminal abortion) has fallen steadily during the past sixteen years and is now at a general level of about one per 1,000 live births as compared with a rate of six per 1,000 in 1936.

The 203 deaths in 1951 correspond to a death rate of 4.87 per 100,000 females, or 1.05 deaths per 1,000 live births. The death-rate may be expressed in other terms by stating that 1 of every 952 women giving birth to a live child in 1951 died from puerperal causes; the corresponding ratios for married women were 1 in every 983 and for single women 1 in every 540. More detailed information will be found in a series of tables in *Demography Bulletin* No. 69.

The following table shows the death-rate per 1,000 live births from puerperal causes in various countries. The rates are not stated uniformly on the basis of the Sixth Revision of the International List but Australian experience, referred to above, is that there is little difference from the former basis. However, for other reasons, care is needed in comparing the Australian rates with the figures for other countries.

#### CHILD-BIRTH : DEATHS PER 1,000 LIVE BIRTHS, VARICUS COUNTRIES.

(c) Excludes full-blood aboriginals.

A tabulation of puerperal causes for Australia according to age at death for married and single women separately will be found in *Demography Bulletin* No. 69.

The total number of children left by the 203 married mothers who died from puerperal causes in 1951 was 470, an average of 2.3 children per mother.

Nine of the mothers who died had been married less than one year, 25 between one and two years, and 13 between two and three years. The duration of marriage ranged up to 25 years. Tabulations distinguishing the ages at marriage and at death will be found in *Demography Bulletin* No. 69, which also includes a table showing in combination the duration of marriage and previous issue.

(vii) *Congenital Malformations and Diseases of Early Infancy (B41-B44)*. This combined group embraces two complete classes of the International List of Causes of death which relate more specifically to infant deaths and they have already been presented in detail in the section devoted to causes of infant death (see pp. 407 and 408).

(viii) *Accidents, Poisonings and Violence (BE 47 to BE 50)*. (a) *General*. Deaths in this class are classified according to external cause and not according to nature of injury. The classification provides sub-groups for accident, including adverse reactions to prophylactic inoculations, therapeutic misadventures and late effects of accidental injury; suicide; homicide and injuries purposely inflicted by other persons; and injury resulting from operations of war, including late effects. The number of deaths in 1951 for each of these sub-groups is shown on pp. 412-414. Full details for each individual category in this class will be found in *Demography Bulletin* No. 69.

The following table, showing the death-rates in the main sub-groups per 100,000 of mean population and the proportion of deaths caused by violence during the period 1921-51, indicates that the death-rate from violence is generally about three times as great for males as for females. It can be seen also that in 1951 the percentage of deaths caused by violence was 7.21, which was higher than in any year since 1939.

The low level of the rates and proportions for the years 1941-45 is attributable mainly to the fact that deaths of defence personnel have been excluded but the rates have been based on total mean population (including defence personnel). A contributing factor is the decrease during this period in the number of automobile accidents which resulted from the war-time restrictions on travel. From 1st July, 1947, deaths of defence personnel have again been included and the rates and proportions have since risen fairly steadily.

#### ACCIDENTS, POISONINGS AND VIOLENCE : DEATH-RATES.(a)

1951 ..	86	31	59	14	5	10	2	1	1	102	37	70	948	429	721

(a) Number of deaths per 100,000 of mean population.  
(c) Includes "war wounds".

(b) Includes "open verdict".

An analysis of special features of the deaths in the main sub-groups of this class is given in the following paragraphs.

(b) *Accident (BE 47, BE 48)*. In 1951 more than half of the accidental deaths were due to transport accidents. Railway accidents caused 2.98 per cent. of the total accidental deaths, motor vehicle traffic accidents 41.49 per cent., motor vehicle non-traffic accidents 1.03 per cent., other road vehicle accidents 3.20 per cent., water transport accidents 1.43 per cent. and aircraft accidents 0.54 per cent., a total of 50.67 per cent. Other important causes were accidental falls, 19.73 per cent. and accidental drowning, 8.66 per cent. A summary of the number of deaths caused by the various types of accident is given in the following table.

## DEATHS FROM ACCIDENT : AUSTRALIA, 1951.

Cause of Death.	Males.	Females.	Persons.
Railway accidents .. .. .	135	13	148
Motor vehicle traffic accidents .. .. .	1,701	360	2,061

Australia ..	608	197	805	14	5	10	132	55	98

(a) Number of deaths from suicide per 100,000 of mean population.

The death-rates from suicide for Australia in five-year periods since 1921 and for each of the years 1946 to 1951 are shown on p. 422.

(iii) *Age at Death.* From the following table which shows the age of persons who committed suicide in 1951 it will be seen that both young and extremely old people took their lives during this year.

**AGE OF PERSONS WHO COMMITTED SUICIDE : AUSTRALIA, 1951.**

Age Group (Years).	Males.	Females.	Persons.	Age Group (Years).	Males.	Females.	Persons.
10-14 ..	3	..	3	55-59 ..	52	26	78

(iv) *Occupation at Death, Males.* A table showing main groups of occupations of males who committed suicide during 1951 appears in *Demography Bulletin* No. 69.

(v) *Death-rates, Various Countries.* The following table shows the death-rate from suicide for Australia in comparison with the rates for various other countries. The table indicates that Australia occupies a fairly favourable position as regards the death-rate from suicide.

**SUICIDE : DEATH-RATES(a), VARIOUS COUNTRIES.**

Country.	Year.	Rate.	Country.	Year.	Rate.
Ireland, Republic of ..	1950	2.5	Portugal ..	1951	10.2
Spain ..	1950	5.4	U.S. of America ..	1950	11.3
Netherlands ..	1951	6.1	Belgium ..	1950	12.9
Italy ..	1950	6.5	Sweden ..	1950	14.8

United Kingdom ..	1950	9.5			

(a) Number of deaths per 100,000 of mean population.  
population only.

(d) Excludes full-blood aboriginals.

(b) Excludes Maoris.

(c) European

(d) *Homicide and Operations of War (BE 50).* In 1951 there were 114 deaths from homicide and injury purposely inflicted by other persons (not in war), of which non-accidental poisoning caused 5 deaths; assault by firearms and explosives, 37; assault by cutting and piercing instruments, 16; assault by other means, 51; injury by intervention of police, 2; and execution, 3. Deaths from injury resulting from the operations of war numbered 7, but all were deaths from late effects of such injuries.

14. *Causes of Deaths in Classes.*—The figures in the preceding sub-sections relate to principal individual causes of death, and are of greater value in medical statistics than a mere grouping under general headings. The classification under seventeen general headings used in the Sixth Revision of the International List of Causes of Death is, however, shown in the following table for 1951, together with the death-rates and proportions of total deaths pertaining to those classes. A similar table showing the death-rates for the eighteen classes used in former classifications and covering the three five-year periods from 1936 to 1950 appears in Official Year Book No. 39, p. 641.

### DEATHS, DEATH-RATES, ETC., IN CLASSES : AUSTRALIA, 1951.

(BASED ON THE SIXTH REVISION OF THE INTERNATIONAL LIST.)

(a) Number of deaths per 100,000 of mean population.

15. *Age at Death of Deceased Married Males and Females, and Issue.*—*Demography Bulletin* No. 69 contains a number of tables showing, in combination with the issue, the age at marriage, age at death and occupation of married persons who died in Australia in 1951. Deaths of married males in 1951 numbered 32,875, and of married females, 27,727. The tabulations which follow deal, however, with only 32,327 males and 27,443

females, the information regarding issue in the remaining 832 cases being incomplete. The total number of children in the families of the 32,327 males was 109,629, and of the 27,443 females, 101,012. The average number of children is shown for various age groups in the following table.

AGE AT DEATH AND AVERAGE ISSUE OF DECEASED MARRIED MALES AND FEMALES : AUSTRALIA.

All Ages ..	5.42	4.97	4.44	3.91	3.39	5.35	5.05	4.72	4.22	3.68

The figures in the preceding table include the issue both living and dead, the proportion between them, taking the issue of deceased males and females together, being about five to one. The totals for 1951 are shown in the following table:—

ISSUE OF DECEASED MARRIED MALES AND FEMALES : AUSTRALIA, 1951.

Issue of Married Males.				Issue of Married Females.			
Issue.	Males.	Females.	Total.	Issue.	Males.	Females.	Total.
Living ..	47,919	46,974	94,893	Living ..	41,099	41,601	82,700
Dead ..	8,619	6,117	14,736	Dead ..	10,680	7,632	18,312
Total ..	56,538	53,091	109,629	Total ..	51,779	49,233	101,012

16. Age at Marriage of Deceased Males and Females, and Issue.—While the table giving the average issue of married males and females naturally shows an increase in the averages with advancing age at death, the following table which gives the average issue of males and females according to the age at marriage of the deceased parent shows a corresponding decrease in the averages as the age at marriage advances.

AGE AT MARRIAGE OF DECEASED MALES AND FEMALES, AND AVERAGE ISSUE : AUSTRALIA.

Age Group (Years).	Average Issue.

17. Occupation of Deceased Married Males, and Issue.—A summary of the main groups of occupations of married males who died during 1951, together with issue, appears in *Demography Bulletin* No. 69.

#### § 4. Registration of Births, Deaths and Marriages in the Australian Capital Territory.

To the end of 1929 the provisions of the Registration of Births, Deaths and Marriages Act 1899 and the Marriage Act 1899 of New South Wales applied to the Australian Capital Territory. Births, deaths and marriages occurring within the Territory were registered by the New South Wales District Registrars at Queanbeyan and Nowra, and were incorporated in the New South Wales registration records but excluded from New South Wales statistics.

In 1929, however, the Registration of Births, Deaths and Marriages Ordinances were enacted, providing for the assumption by the Commonwealth Government of the function of registration within the Territory as from 1st January, 1930. All registrations are made at the Registrar's Office, Civic Centre, Canberra.

Marriages within the Territory are celebrated in accordance with the provisions of the Marriage Ordinance 1929-1938. This Ordinance, which closely follows the provisions of the Marriage Act of New South Wales, which it supersedes as regards the Australian Capital Territory, came into operation on 1st January, 1930.

## CHAPTER XI.

### EDUCATION.

#### § 1. Introduction.

1. **General.**—The development of Australian educational systems was last dealt with in some detail in the Year Book in issue No. 22, 1929. Changes have occurred since that year, however, and in the following pages is presented a reasonably complete account of these changes and of the systems as they exist at the present time. This information has been obtained, in the main, from the Commonwealth Office of Education, but it has been found necessary, for publication in the Year Book, to abridge the material originally supplied. This regretted but unavoidable condensing does not, it is hoped, seriously impair the very comprehensive account supplied by the Commonwealth Office of Education.

2. **Evolution of Educational Systems in Australia.**—(i) *General.* An account of the development of the Australian schools up to 1929 is to be found in Year Books Nos. 1, 2, 17 and 22. Since that date there have been marked changes in the educational programme although the general pattern has not altered in any fundamental way. By 1929 free, compulsory and secular primary education had long been established in every State. Secondary schools had been set up and the foundations of technical education had been laid. Correspondence schools for outback children had been recently formed, and some special schools existed for physically and mentally handicapped children. School medical and dental services were in operation, and guidance and psychological services were in the process of being developed in three States.

One of the major features of Australian education during the past twenty years has been the extension of facilities to provide for an increasing number of pupils in an increasing variety of ways. This has brought about many changes in policy and practice, such as the preparation of suitable courses of study adapted to the needs of certain groups of children, the institution of the most efficient administrative structure to carry out the policy decided upon, and the evolution of adequate selection and examination techniques to ensure that the individual pupil is guided appropriately to that form of education most suitable for him. In fact, practically no child in Australia is beyond the reach of the education system.

(ii) *From 1929 to 1939.* The early years of this decade were marked by an acute economic crisis. During the most severe period the effect on education was that building programmes were restricted severely, teacher training was restricted, the numbers of teachers (and their salaries) were reduced, but the numbers of pupils increased.

During the last half of the decade school buses began to be used extensively to transport pupils to schools, thus making possible the closure of a number of small schools. Often the curriculum offered in the "consolidated" school took into account the needs of the particular locality, and courses with an agricultural bias made their appearance.

The crisis in primary production led to a policy of industrial expansion, which stimulated the training of technicians and skilled tradesmen. A technical vocational bias was developed in some post-primary schools, and senior technical education began a rapid and continued expansion. Senior technical class enrolments rose from 58,456 in 1931 to 67,377 in 1935 and to 90,401 in 1939.

(iii) *The War Years.* The immediate effect of the 1939-45 War on education programmes was very similar to the experience of the early 1930's. School building programmes were necessarily reduced because of the diversion of manpower and materials to defence needs and the number of teachers in training fell. In addition many teachers enlisted or undertook other work associated with the war effort.

To cope with the resulting shortage, many teachers deferred their retirement until after the war; others returned from retirement to active work; married women remained in the service or were re-engaged; some small schools were closed and the children were transported to nearby towns. As war factories expanded, the demand for technical training continued to grow, despite the absence of many young men at the war.

(iv) *The Post-war Years.* With the return of ex-servicemen teachers and allocation of large sums of money for educational activities, the post-war years have seen marked developments in Australian education. New curricula have appeared, aimed at increasing development of social skills, with emphasis on oral language, self-direction, health education and those activities generally included among the social studies. The time devoted to some of the more formal aspects of the curriculum has generally been reduced, and the age at which fundamental skills are formally taught has been raised.

A feature of the educational scene in the post-war period has been the steady rise in enrolments due to the rising birth-rate and heavy immigration. The greater number of children at school has demanded more teachers and more schools at a time when manpower and materials have been scarce.

## § 2. Government Schools.

1. *Administration.*—Education is the responsibility of the State Governments. The Commonwealth is, however, empowered to provide financial assistance to students and meets the full cost of education in Commonwealth territories, although this is largely provided by State education authorities.

Although there is a tendency towards regional administration, State educational administration is centralized. The permanent head of the Department of Education or Public Instruction in each State is responsible to the Minister for Education (or Public Instruction). Contact with the schools is maintained principally through Inspectors, called Superintendents in Western Australia and Tasmania. Departments are usually divided into primary, secondary and technical divisions. Some technical colleges are, however, in a large measure autonomous. Universities are independent foundations although much of their income is derived from State and Commonwealth grants.

Examination Boards, representative of the Universities, the Education Departments and non-government schools, control public examinations and syllabuses, and curriculum committees prepare primary and secondary curricula. State Ministers for Education meet periodically as the Australian Education Council, to discuss matters of common interest, and Directors of Education meet annually as a Standing Committee of this Council.

2. *The School System.*—(i) *Compulsion.* In all States, there is legislation for compulsory school attendance. The original Victorian Education Act was passed in 1872, followed by similar Acts in Queensland (1875), South Australia (1878), New South Wales (1880), and Tasmania and Western Australia (1893).

In 1952 the ages between which children were legally required to attend school were as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years (children may not leave school until the end of the term during which they reached the age of 14 years); Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years.

In Victoria, South Australia and Western Australia amendments to the Acts have provided for the raising of the school leaving age to 15 years, but to date, this legislation has not been implemented.

Schooling may be given in government schools (including correspondence and special schools) or non-government schools and in a small minority of cases by private tuition.

The employment of children of school age is prohibited by law.

(ii) *Beyond Compulsion.* Since 1929 especially, the development of large-scale industry and scientific farming has demanded a diversity of skills, and a general raising of the educational level of the population. The raising of the school leaving age in two

States and the tendency everywhere for children to stay longer at school have been expressions of public realization of this. In 1951 less than half of all children left school when they reached the age limit for compulsory attendance. Indeed almost half now proceed to some form of further education beyond secondary school, either as full-time students, as part-time apprentices or trainees released during the day by their employers, or as part-time evening students.

In the early years of government provision of education, the main emphasis was on the primary school, which catered for children under compulsion and offered a course largely confined to the tool subjects, reading, writing and arithmetic. However, a process of extension and differentiation both at the bottom—infants' schools and kindergartens—and at the top—secondary schools—was well under way long before 1929.

3. **The Educational Ladder.**—(i) *Infants' Schools.* It is now customary, although not compulsory, for children to begin school when they are five years old. In larger primary schools they enter the infants' school, and in smaller schools "infants' classes", which occupy two or three years, the first year in some States being called "Kindergarten" or "Preparatory". The emphasis in the infants' classes is very much on general development on play activities and on the informal aspects of the educational processes. In some cases the first two grades of primary education, together with any "Preparatory" or "Kindergarten" classes, are to be found in separate infants' schools or departments. But whether in a separate establishment or as a part of a primary school, there is a gradual move towards formal instruction. At the end of the period most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and can write in pencil. In addition, they have acquired skills with art materials and the like. A good deal of the instruction is carried on through activity methods, involving, for example, dramatic work, puppetry, and school "shops". Children then pass at about the age of 8 or 9 to the more formal primary school, in which they normally spend four or five years.

(ii) *Primary Schools.* The main emphasis in the primary school as distinct from the infants' school still lies, as it always did, on the tool subjects (reading, writing and arithmetic) and, in more recent years, oral language. Since 1929, however, the methods of teaching have undergone considerable changes. Changes in the purpose and outlook of educationists, and the raising of the professional standards of teachers, have made for greater freedom for pupils and teachers, some departure from the methods of mass instruction, and the closer linking of the curriculum with the child's social environment.

In general, it is true to say that in 1951 there was less emphasis on results, and that basic skills are taught at a somewhat later stage. At the same time, the curriculum has been broadened. More individual instruction has led to a reduction of minimum standards of achievement for the less able and a stress on curriculum enrichment for the bright. Retardation, i.e., the repeating of grades, has been considerably reduced, the aim being for each child to remain with his age group. In all States "opportunity classes" exist for backward children, and in one State "opportunity classes" are provided for the especially bright.

(iii) *Secondary Schools.* At the age of 12 or 13 (in Queensland, 14) children transfer to a secondary school course. In the cities and larger country centres this is provided in a separate school, but in less densely populated areas secondary classes share the same buildings as primary classes. In rural areas secondary pupils may share teachers or classrooms with primary pupils, and even in one-teacher schools a few secondary students may carry out correspondence assignments under the supervision of the primary teacher-in-charge.

Secondary curricula have developed from the matriculation requirements of the universities. English grammar and literature, mathematics, including algebra, geometry and trigonometry were the core. Languages, chiefly Latin and French, or science, chiefly physics and chemistry, and history had an important place. Geography and drawing were often taken in the first two or three years.

The academic course for matriculation has undergone some change since 1929. Greater emphasis has been placed on oral language and written expression in the English course; Latin has waned in popularity and modern languages other than French and German are being taught in a few schools. A general science course has been introduced in some States, and social studies, a synthesis of history, geography and civics, is a subject to third-year level. More emphasis has been placed on art, music and physical education. Since 1929 the provision of a secondary type education for all has gained ground rapidly, although the entrance requirements of tertiary institutions are still provided for.

Consequently, alongside the academic course, other courses have grown up. In country areas they may be offered in the same school or the academic course may even be largely abandoned. In the city, it is usual to offer non-academic courses in separate schools. The academic schools and multi-lateral country schools are usually known as High Schools, while the other types are generally distinguished by such names as Junior Technical Schools and Home Science Schools.

Particular mention should be made of the recent development of the all-age consolidated school sometimes with an agricultural bias, found under various names in different States. Tasmania and South Australia adapted the idea of the English village area schools to Australian conditions and established "Area Schools", some of which have farms attached.

The courses followed in the non-academic schools are in general broader than in the academic schools. There is less concentration on establishing an academic discipline and method peculiar to each subject, but more attention to correlation between fields of knowledge, sometimes expressed by projects involving them all. Less time is generally devoted to mathematics and the formal sciences, more time to practical work and to art and musical appreciation. In English, oral language is emphasized rather more and grammar much less than in the academic schools.

(iv) *State Details.* Very brief particulars of the position in each of the States is given in the following paragraphs:—

(a) *New South Wales.* As in other States, a child commences school at the age of about five, spending the first seven years in the primary school and then passing on to some form of secondary education.

The trend in secondary education has been to provide particular types of courses in separate schools such as Academic High Schools, Home Science High Schools, Technical High Schools, Commercial Schools, Junior Technical Schools, Home Science Schools and Agricultural High Schools.

(b) *Victoria.* In Victoria, after six years of primary education, the child passes at the age of about twelve to secondary education. On the basis of head teachers' recommendations and the children's preferences special selection committees allot the children to High Schools, Girls' Secondary Schools or Technical Schools or the corresponding courses of multi-purpose country schools. Changes in secondary curricula in the last fifteen years have been in the direction of broader, less specialized courses.

(c) *Queensland.* In 1930 and 1952 the syllabus was substantially revised and changes were made in the school system. Pupils now complete their primary education (a preparatory grade and eight primary grades) at the age of about 14 and pass on to four years of secondary education. In country areas the secondary classes, known as secondary "tops", are attached to the primary school. Intermediate schools are composed of the two highest primary grades.

(d) *South Australia.* There has been a continuous development towards more liberty for teachers to experiment, both in the seven years' primary schooling and in secondary education. Secondary education is provided in High Schools, Technical Schools, and Area Schools, which, in country districts, provide education with an agricultural bias as well as academic courses leading to matriculation.

(e) *Western Australia.* Children enter primary school at the beginning of the year in which they turn six, and after one year's infants' class and six primary classes pass on to secondary education at the age of about twelve. This is provided through three-year

and five-year High Schools, which provide professional, commercial and technical courses. In country areas without High Schools large primary schools with post-primary classes, called Junior High Schools, provide similar education.

(f) *Tasmania*. Children at the age of six commence six years' primary education and at twelve are selected, on the result of ability and attainment tests, teachers' recommendations and school record, for four years' compulsory education in a High, Technical or Modern School. A fifth year is necessary for matriculation.

Curriculum committees aim to keep the curriculum abreast of modern developments. Modern classes are designed to foster the special aptitudes of children in the 12 to 16 age group who are unsuited to high or technical school education.

4. **Examinations and Accrediting.**—(i) *Examinations*. Before 1929 most States had three examinations for school children. The first came at the end of primary school and was variously known as the "Qualifying Certificate" or "Scholarship". These examinations were regarded as a qualification for secondary education. The third came at the end of the secondary course, at the age of sixteen to seventeen, and was known as the "Leaving" or "Senior Public" Examination, which qualified students for university matriculation. Between these came the "Intermediate Certificate" or "Junior Public Certificate", usually one or two years before the end of the full course of secondary schooling. A pass in this examination was a useful entrance qualification for clerical occupations, nursing, some Public Service positions, and other callings requiring academic training.

The entrance examination for secondary schools, as administered by the Education Departments, although students from private schools also sat for it. The two higher examinations were generally under the control of a board, on which universities, Education Departments and non-government schools were represented.

By 1950 the external examination for secondary school entrance had been abolished in every State except Queensland, where the age of transition is fourteen and the "Scholarship" Examination must be passed to entitle the student to free secondary education and, if necessary, boarding allowances. The external Intermediate Examination had declined in importance, some States substituting internal examinations in some, or all, schools, other States providing a variety of internal certificates from different types of schools. The Leaving Certificate in most States had not been supplanted, but had been modified to provide a greater variety of subjects and, as for example in mathematics, the opportunity of choosing several specialized courses or a broad course.

The length of the secondary course has been increased in two States from two to three years for the Intermediate Certificate and from a further one to a further two for the Leaving. South Australia has a further year beyond the Leaving Certificate for a separate examination known as "Leaving Honours". Only the "Leaving Certificate" is necessary for matriculation, but good results—credits as distinct from passes—in the Leaving Honours Examination may carry exemption from some subjects of the first year university course. In Victoria a similar system had operated, but the optional Leaving Honours year has been replaced by adding a further year after the Leaving Examination for a course leading to a special matriculation examination. Separate matriculation examinations also exist in New South Wales, Western Australia and Tasmania, but successful Leaving candidates are not required to sit.

(ii) *Accrediting*. The system of granting certificates, or credit for subjects passed, without external examination is a major development and now operates in four States. Credit is assessed mainly on the student's record of work for the year, although some internal examinations are generally given. Syllabuses can be less rigidly controlled and can be more freely adapted to local conditions, although standards are maintained by the supervision of the central authority.

(iii) *State Details*. (a) *New South Wales*. The trend in New South Wales over the past twenty years has been for the steady elimination of external competitive examinations. Experiments with the use of intelligence tests as the means of selection for high school entry gradually led to the adoption of this method for all country schools in 1938.

This was replaced in 1943 by small committees, which now make the selection for all schools, giving weight to teachers' estimates of achievement, intelligence test scores and parental wishes.

The Intermediate Certificate used to be an external examination taken after three years' secondary education. Since 1949, however, the Certificate has been awarded on the results of internal examinations in all government and most non-government schools. Children have now to reach a satisfactory standard in at least four subjects.

At the Leaving Certificate level examination is external, although there have been various modifications in the requirements for matriculation. The number of acceptable subjects has been extended, and matriculation is now allowed on four (instead of the usual five) subjects if three of these are at a higher level.

(b) *Victoria*. All public examinations have now been abolished at the primary level. At the secondary level there are now four examinations—the Proficiency, the Intermediate, the Leaving and the Matriculation.

The Proficiency is awarded on the basis of the child's school record during the third year of secondary education. The Intermediate and Leaving Certificates are public examinations conducted by the Schools Board of the University of Melbourne, and are taken after four and five years' secondary education respectively. Matriculation, for which the Leaving is a prerequisite, requires a further year and provides the normal channel of entry into the University.

(c) *Queensland*. The Scholarship Examination, which takes place at the end of primary schooling, has been changed from a competitive examination to a qualifying examination, in which all students are required to obtain 50 per cent. of total marks in English, arithmetic and social studies.

The Junior Public Examination is taken after two years' secondary schooling. Since 1951 each candidate has received a statement showing the subjects passed and the grade of pass in each instead of a Junior Certificate. The Senior Public Examination two years later is accepted by the University for matriculation.

A Board of Post-primary Studies and Examinations was set up in 1941 to advise the Government in these matters.

(d) *South Australia*. Progress Certificates are awarded at the end of primary schooling on the recommendation of the teacher and District Inspector, and this entitles pupils to special allowances for books, board and travelling.

The Intermediate, Leaving and Leaving Honours Certificates are obtained by external examination. Intermediate Technical, Leaving Technical, Area School Intermediate and Area School Leaving Certificates are awarded on school recommendation.

(e) *Western Australia*. The only external examination at the end of primary schooling is the scholarship examination for students wishing to proceed to a five-year high school. A preliminary qualifying examination is held three months earlier to eliminate candidates who have little chance of success.

At the secondary level the Junior Certificate examination (after three years) and Leaving Certificate examination (after five years) are conducted for the University by a Public Examinations Board which includes representatives from the University, the Education Department and non-departmental schools.

(f) *Tasmania*. Accrediting, based on ability and attainment tests, pupils' records and teachers' recommendations, is used to determine the most appropriate secondary education for pupils.

After four years' secondary education a certificate is granted either by accrediting or public examination. A fifth year is required to sit for the University's Matriculation Examination.

5. **Health Services to Schools.**—During the period under review, health services to schools have extended far beyond the routine medical and dental inspections which were the rule in 1929. Information relating to medical and dental school services is given in Chapter XIII.—Public Health and Related Institutions.

6. **Guidance.**—Each of the Australian States has now a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of school record cards. In general, the functions of these services are :—selection and differentiation for secondary education, diagnosis and guidance of atypical children, preliminary vocational guidance, and in some States, research. The weight given to each of these functions varies considerably from State to State, but since the early 1930's there has been a steady and continuous progress towards thorough educational guidance services for all children.

Before 1930 psychologists had been appointed in South Australia and Tasmania but their work was chiefly concerned with atypical children. In the early 1930's the beginnings of comprehensive record card systems arose in two or three other States, there were some attempts to administer psychological tests of ability and achievement with large groups of children, and in New South Wales segregation of the gifted at the primary level was commenced. This general movement progressed fairly slowly in the middle and late thirties, although by the beginning of the war New South Wales and Tasmania had developed the beginnings of comprehensive guidance services with school counsellors, record cards and systematic and regular testing of all children in certain age groups.

During the war the increased opportunities for the training of psychologists in the fighting services provided each State with a pool of trained and experienced guidance workers. Creation of new professorships of psychology and the expansion of existing schools in the universities has maintained a steady flow of new recruits. Mention should also be made here of the supplementary vocational guidance service provided by the Vocational Guidance Division of the Commonwealth Employment Service. This division co-operates with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children.

7. **Research.**—(i) *State Education Departments.* Since 1929 all State Education Departments have set up research branches which function as integral parts of head offices. In several States the officer who directs research is also responsible for the guidance service offered by his Department. The research undertaken is directed towards departmental activities and the findings of research are examined carefully in the determination of policy and procedures ; in addition, many problems of immediate importance are handled. In the majority of States, too, the Research Branch supervises the collation of statistics ; it also plays an important part in curriculum revision and modification of examinations.

The first full-time research officers were appointed in New South Wales in 1935, in Victoria in 1938, in South Australia in 1945, in Queensland in 1948, and in Western Australia in 1951. In Tasmania in 1934 the position of psychologist was changed to Psychologist and Supervisor of Research and in 1936 a Curriculum Officer was appointed. There was, of course, a good deal of research undertaken prior to the advent of these officers.

(ii) *Australian Council for Educational Research.* Research in education is also carried out by a non-governmental body called the Australian Council for Educational Research. It is engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and enquiries, makes grants to approved educational investigators, serves as a centre to disseminate educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this Council is an autonomous body, the Commonwealth and State Governments contribute some financial support to it.

8. **Atypical Children.**—Since 1929 there has been a marked increase both in the range of special provision and in the number of schools or classes for pupils who, for one reason or another, cannot progress to their best advantage in an ordinary school. Among groups given special attention are the mentally backward, the gifted, the physically

handicapped, the blind, deaf and dumb, the epileptic, the cerebral palsied, the partially sighted, the hard of hearing and the delinquent. The number of pupils with certain of these handicaps in some States is so small or spread over so wide an area that special provision does not exist for all of these types of handicapped children in all States. However, the great majority of those listed above are catered for in every State. The provision of special schools and classes has involved the appointment of departmental specialists, special training courses and close liaison with school health services. In some States, special clinics attached to hospitals or functioning as an independent child welfare service handle cases of personality maladjustment; they work in co-operation with the psychological services of the Education Departments.

9. *Education of Migrant Children.*—From 1945 to 1951, the net increase in children at Australian schools through migration was about 75,000, or 6 per cent. of the total school age population, more than half being alien and non-English speaking on arrival. During this period the impact of the increased birth-rate of the Australian population in the mid 1940's also contributed to the heavy burden placed on State education resources.

It was generally considered desirable for migrant children to attend schools with Australian children, although some purely migrant schools were built, with Commonwealth assistance, in hostels, etc., and in some States, schools or classes exclusively for alien migrant children assisted the children until they could take their place in their age group classes in the normal schools. As was to be expected, alien children found little difficulty in learning the English language, which is the language of instruction in all schools in Australia. Non-government schools absorbed a significant proportion of migrant children.

The major problems were those of staffing and accommodation. The Commonwealth assisted by providing school buildings in migrant centres and in some residential hostels. Some States relieved the staffing position by employing suitably qualified English-speaking migrants as teachers in schools exclusively used by migrant children, although the policy of teaching migrant children in schools with Australian children was adhered to wherever possible. Where it was not possible, particularly in large migrant centres, parents were encouraged to move into Australian communities. In almost all cases children of secondary school age were accommodated in existing Australian secondary schools.

10. *Education of Native Children in Australia.*—(i) *General.* The Commonwealth Government is responsible for the education of full-blood native children in the Northern Territory. Each State has responsibility for the welfare and education of native children within its boundaries.

In June, 1951, the Prime Minister invited all State Premiers to a Conference on Native Welfare in Canberra, and the Minister in charge of Native Affairs in New South Wales, Queensland, and Western Australia, together with representatives of the Commonwealth and South Australia attended the inaugural meeting of the Council for Native Welfare in September, 1951. The Council was established on a permanent basis and will meet annually, to consider national policy with respect to the welfare of Australian aborigines.

(ii) *New South Wales.* Native children, excluding those living on stations and reserves, for whom separate facilities are provided, may be admitted to Government schools. In addition, there are 26 special schools on or near aboriginal reserves, nineteen of which are staffed by trained teachers employed by the Department of Education.

There are also eighteen aboriginal stations in New South Wales, maintained by the Aboriginal Welfare Board, which is responsible to the Chief Secretary's Department. Each station has a school, where the educational standard is below that reached by the normal white child in a Government school, and the emphasis is placed on handicrafts. The "teacher-managers", who give instruction and manage the affairs of the station also, are not necessarily trained teachers.

The Board wholly maintains two homes and subsidizes another which provides for the education and training of children admitted to its control.

(iii) *Victoria*. The laws of this State make no differentiation between the aborigines and the other members of the community so far as education is concerned. Aborigines and half-castes who wish to do so may avail themselves of the educational facilities provided at the Lake Tyers Aboriginal Station, where there is a government school staffed and conducted by the Education Department. The curriculum is similar to that in ordinary white schools, with a bias towards handicrafts.

(iv) *Queensland*. In 1939 the Aborigines' Preservation and Protection Act was passed to provide for the welfare of the native population, including education and manual training. To this end the Department of Health and Home Affairs established three aboriginal settlements, each of which has a school staffed by teachers on loan from the Department of Public Instruction. The syllabus comprises English, civics and morals, arithmetic, geography, nature knowledge, drawing, needlework, music and drill. On attaining school leaving age, children are given a constructive course in domestic science or manual training. At the eleven mission schools conducted by various denominations, and subsidized by the Government, the standard of education is similar to that of the government settlements.

(v) *South Australia*. The Aborigines' Protection Board maintains a school on each of its stations at Point McLeay and Point Pearce, staffed by teachers from the Education Department.

Numbers of native children also attend the six schools controlled by the United Aborigines' Mission, the schools at Koonibba Lutheran Mission, Umecwarra Mission and the Ernabella Presbyterian Mission School.

The curriculum at all these schools is similar to that in ordinary government schools, with the emphasis on manual training and handicrafts, such as sewing, dressmaking, basketmaking and woodturning.

(vi) *Western Australia*. Prior to 1936 the authority vested in the Department of Native Affairs for the custody, education and maintenance of the natives was exercised by a Chief Protector of Aborigines, and later by a Commissioner of Native Affairs.

In 1948, the Director of Education advised head teachers of State schools that they must admit native children, unless they could be excluded on hygienic grounds. Three years later the Education Department accepted responsibility for the education of natives and the Department of Native Affairs now acts in close co-operation with the Education Department in all matters relating to native children.

Some mission schools are staffed by teachers from the Education Department, and all may be inspected by officers of the Department to ensure that the standard of education provided is adequate. Missions are graded into Classes A, B and C and are subsidized by the Department of Native Affairs accordingly.

In the South-western Division of the State, native children study the ordinary State curriculum. The question of special curricula for half-castes, and full-bloods who live mainly in pastoral and marginal areas, is being considered.

(vii) *Tasmania*. The few native children in this State are educated at schools for white children.

(viii) *Northern Territory*. There have long been mission schools for aboriginal children operating under the general supervision of the Administration and some provision was made from time to time in several government schools. However, since 1950 a more systematic attempt has been made to provide for coloured children.

In December, 1951, 230 children were enrolled in Commonwealth schools staffed by fully trained teachers operating on aboriginal settlements and catering for children between the ages of five and fifteen years. Plans are under consideration to establish further schools. The education being provided for aboriginal children is designed to equip them to support themselves and their families in the European economic structure of the Northern Territory, to encourage the improvement of their environmental conditions, both domestic and communal, and to provide for the development of their talents and creative abilities. Dressmaking, woodwork and craftwork help to fulfil this aim and to stimulate the constructive use of leisure time.

To meet the special needs of native children, a provisional syllabus has been drawn up and a series of reading primers entitled "The Bush Books", featuring topics and situations familiar to the children, has been compiled.

In March, 1951 a Senior Education Officer was appointed to the Darwin Office of the Commonwealth Office of Education to act as liaison officer between the Administrator of the Northern Territory and the Director of the Office of Education on matters connected with the education of aboriginal children. His supervision of the work being done in native schools will be extended in 1952 to include that of the eighteen mission schools in the Northern Territory. The enrolment figures for the mission schools are as follows :—Roman Catholic Schools, 1,030; Church Missionary Society Schools, 158; Methodist Mission Schools, 271; Lutheran Mission School, 90; Others, 65;—Total, 1,614.

11. Provision for Rural Areas.—(i) *General.* The population of Australia is so scattered that there is a problem in providing primary, and more especially secondary, education for all eligible pupils.

One method of meeting this problem was the establishment of a wide network of one-teacher primary schools, staffed in the main with trained teachers.

The practice of sending itinerant teachers to outlying areas is still in force in the far north of Western Australia, and mobile railway cars are used for technical and agricultural education in New South Wales and domestic science in Queensland. However, in general, it has been the practice to bring the child to the educational facilities rather than vice versa.

(ii) *Subsidized Schools.* Where there is a group of children too few in number to warrant the establishment of a one-teacher school, a "subsidized school" may be opened. The Education Department pays part of the cost, and in some States appoints a teacher.

Some States also administer "provisional schools", which are completely financed by the Government, but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(iii) *Consolidation.* As early as 1904, the policy of transporting pupils to larger and more central schools began to come into operation. Trains, bicycles and horses were first employed, but the use of buses has led to a very great development of school transport systems, particularly since 1935. This policy, known as "consolidation", has been responsible for a substantial reduction in the number of small schools, and is one of the most striking developments of the past twenty years. Organized transport services for children attending country primary and secondary schools is extensive. In 1950 New South Wales had 426 services, Victoria 608 in 1951–52, Queensland 224 in 1949, South Australia 313 in 1951, Western Australia 388 in 1951 and Tasmania 267 in 1951.

The cost of transporting children to school for the last period available was as follows :—New South Wales, £528,121 in 1951; Victoria, £741,393 in 1951–52; Queensland, £122,649 in 1951–52; South Australia, £182,212 in 1951; Western Australia, £374,133 in 1950–51; Tasmania, £180,351 in 1951; and Australian Capital Territory, £26,831 in 1951–52.

The consolidated school is usually not merely a larger primary or secondary school; it generally provides a curriculum specially adapted to the needs of the rural area it serves.

The best known type of consolidated school is the area school, found in Tasmania and South Australia. The idea grew from a need to provide more than a primary education for country children as had been attempted in the British Village Area Schools. In 1936 an Experimental Area School was established in Tasmania. The success of the experiment led to the establishment of other area schools and by 1951 there were 27 such schools, providing for 7,366 pupils.

In South Australia, a "pilot" school established in 1938 proved successful and was followed by a similar development.

The small schools of the area are closed and the pupils are transported to the area school by bus or bicycle. Here, they undertake study based on the needs and interests of rural life. The curriculum, though still including the usual academic subjects, has a practical bias and introduces elements based on the activities of the area in which the school is situated, e.g., dairying, fruitgrowing. Education officers, teachers and parents co-operate in planning courses to fit the locality.

Other States have schools of a somewhat similar type such as Consolidated Schools, Group Schools and Rural Schools. Rural Schools in Queensland are located in country towns. Pupils from surrounding "one-teacher" schools come to the Rural School one day each week to avail themselves of the specialized facilities and specialist teachers at the school in such fields as manual training and domestic science.

The adaptation of courses to rural needs is not, however, confined to "consolidated" schools.

(iv) *Special Assistance.* Another way of bringing children and schools together has been the provision of financial assistance for children who have to live away from home in order to attend school. Most of these board in private homes but there are six government hostels and 56 private ones (excluding private boarding schools) which cater for more than 1,500 children of secondary school age and a small number of primary school children also. Special scholarships for country children, giving allowances for living away from home, and substantial fare concessions for vacation travel are provided by all States.

(v) *Correspondence.* For those who were still unable to attend school, correspondence tuition had been established in every State by 1929. These schools have grown in size and extended in scope since then, and Technical Correspondence Schools, which grew out of the Commonwealth scheme of technical training, were established in each State by 1942, and have grown under State administration since. An interesting development in 1947 was the appointment of a Liaison Officer for Correspondence School pupils in Tasmania. The activities have been made more effective by his personal contact with pupils and parents and his practical aid in supervision.

The number of correspondence pupils attached to correspondence schools in 1951 in each State was as follows:—New South Wales, 5,780; Victoria, 1,465; Queensland, (1950), 4,994; South Australia, 1,322; Western Australia, 1,882; and Tasmania, 239.

12. *School Broadcasting in Australia.*—As early as 1933, teachers were experimenting with the use of radio in the classroom. These experiments were encouraged by Education Departments and eventually led to an arrangement with the Australian Broadcasting Commission for the establishment of a series of broadcasts to children in the classroom, from which has sprung the present extensive school broadcasting system.

The organization of school broadcasting programmes remains a co-operative effort on the part of the A.B.C. and education authorities. Although the School and Youth Education Department of the A.B.C. is responsible for the broadcasting of the programmes, it draws freely on the advice and services of teachers and maintains permanent liaison officers with the Education Departments. The purchase of receivers for schools has been encouraged by Education Department subsidies to parents' organizations and in 1948 the Commonwealth Government waived its claim to listeners' licence fees from schools. More than two-thirds of Australian schools were equipped with radio receivers in 1951.

School broadcasts are presented as part of the regular A.B.C. programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcasts to the actual work in the schools. Booklets are published giving in advance the yearly programme in all subjects; in subjects such as geography, nature study and art, the booklets are accompanied by picture sheets, work books and teacher's notes. In 1951, 300,000 radio booklets were distributed to schools embracing the following subjects:—Health and Hygiene, the World We Live In, French for Schools, Music through Movement, Singing, Literature, Social Studies and/or History/Geography, Nature Study, Music Appreciation.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia. The "Kindergarten of the Air", begun in 1942 as a service to children unable to attend kindergarten, has proved popular in both town and country. Children are encouraged to take part in the programme in response to suggestions made by the broadcaster. Radio lessons have been designed to supplement those being done by means of correspondence. At Alice Springs the efficacy of a "School of the Air" for correspondence pupils in the Northern Territory is being further investigated. Pupils make use of the "pedal-wireless" equipment, installed on outlying stations for the Flying

Doctor Service, to make contact with their teachers. The present range of these broadcasts is 385,000 square miles. It is planned to extend these lessons from 3 to 5 half-hour sessions each week.

13. **Teacher Training and Recruitment.**—(i) *General.* The training of Government school teachers is carried out by the State Education Departments, but in most States persons who wish to train for teaching in private schools may attend government training colleges on payment of a fee. Many non-government school teachers have been drawn from the government teaching services; others have been recruited at the university graduate level. Private training institutions also provide some teachers.

An account of the early development of teacher training systems is to be found in Year Book No. 22. By 1929, the pupil-teacher system was universal except in one State. The student spent one or two years, or even longer, teaching in school under supervision, studying and receiving instruction from the headmaster in the art of teaching. In some States, at the end of that period he passed into a teachers' college. After emerging as a trained teacher, he often continued his studies to obtain a series of graded certificates which were necessary for promotion. The pupil-teacher system has been abandoned as the chief method of training teachers. Teacher students are now recruited at matriculation level and given a professional course of training at colleges controlled by Education Departments or by University Departments of Education. The raising of entrance standards and prolongation of training has led to a close association between the Education Departments and Universities. The trend has been towards placing teacher training on the same basis as other professional training.

The reduction in the teaching force due to economy measures in the depression years did not give rise to any shortage of staff; indeed classes were generally somewhat reduced in size during this period.

However, in 1942, due to the diversion of thousands of teachers into the Armed Services, a grave shortage had to be met by the re-employment of married women and retired ex-teachers. It was soon apparent that even with the return of servicemen from the war there would still be a shortage of teachers.

Measures were taken to meet this shortage. Training courses were made more attractive by increasing allowances for students. The amount of these allowances has been increased by as much as four times and now exceeds £200 per annum in some States. The co-operation of teachers and their organizations was sought to obtain more teachers and publicity drives were launched to attract recruits. Special recruiting officers were appointed in some States. Salaries of teachers too were increased substantially in each State and promotion systems were made more liberal.

In addition to the normal channels of recruitment and training, various methods of obtaining additional teachers were tried. Many more thousands of married trained women teachers and retired men and women teachers were re-employed, and in some cases the conditions of their re-employment were liberalized. Over 2,000 trainees also entered the profession through the Commonwealth Reconstruction Training Scheme. Several States set up emergency training schemes, although these were on a comparatively small scale. Some teachers were recruited in England and their passages to Australia paid, but these schemes have been discontinued. Departments accept suitable young alien migrants for training. In Victoria bursaries are awarded to pupils who undertake to enter the Government teaching service.

Despite increased training facilities and higher teachers' college enrolments in the post-war period, the supply of teachers throughout Australia has done little more than replace wastage, and has not kept pace with the rising enrolments. Difficulty is being experienced in staffing small schools in remote areas, while the shortage of secondary scientific and mathematics teachers is reported to be acute in some States.

(ii) *Training Colleges.* Every State maintains at least one teachers' training college. Most students are trained at colleges in the capital cities, although there has been a movement towards the establishment of colleges in the country. In 1951 there were in Australia fifteen Teachers' Colleges conducted by Departments of Education and professional training for teachers was provided by five universities.

The entrance standard is generally at the Leaving Certificate level at about the age of seventeen. In some States intending teachers can obtain a scholarship at the Intermediate Certificate level to enable them to complete teachers' college entrance requirements. In return they are required to enter a bond of service additional to that normally required of teachers' college trainees.

(iii) *Training of Primary Teachers.* In all States, except Tasmania, where teacher training is conducted by the university, teachers for government primary schools are trained in teachers' training colleges controlled and administered by the State Education Departments.

Colleges are conducted on a co-educational basis, and departmental trainees are given a monetary allowance while in training and are required to enter into a bond to serve for a specified period or to repay all or portion of the cost of training.

In South Australia, the academic side of teacher training courses, except the short course for those preparing for "one-teacher" schools, is provided at the university; students attend lectures in normal degree courses. In addition, they may attend lectures in some subjects of the course for the Diploma in Education. In this way during their full course they obtain credits towards the recently introduced Associateship in Arts and Education in South Australia, which may be completed by part-time study after taking up teaching. In New South Wales, Victoria, Queensland and Western Australia, on the other hand, the course of training for primary teachers does not require attendance at the University. In Tasmania the Education Department co-operates closely with the University in the training of teachers and departmental teachers and schools are used for demonstration work and practice teaching.

In general, the duration of courses is two years for primary teachers, including infants' teachers. Specialization for nursery and for infants' teaching normally occurs in the second year of training. Students are required to attend college for a period varying from 32 to 40 weeks annually. The time allocated for practical work and lectures varies from State to State, but, on the average, from one-quarter to one-third of the student's time is devoted to practice teaching, attendance at demonstration lessons and observation of normal classroom teaching. There is a variety of subject detail in training courses in the different States. The basic subjects taken in the various courses are principles, history and general methods of teaching, special methods of teaching primary school subjects and educational psychology. In addition, students undertake courses in physical education, art, music, school hygiene and handicrafts as well as lectures designed to widen their own cultural background.

(iv) *Training of Secondary Teachers.* Prospective secondary teachers are generally required to undertake a degree course, and then are required to undertake a course of professional training of one year's duration. This normally qualifies trainees for a Diploma in Education.

The year's professional training in education includes lectures and seminars on subjects associated with educational theory and practice, study of methods and techniques appropriate to secondary school subjects, periods of practice teaching and the observation of classroom techniques in the teaching of special subjects.

(v) *Training of Specialist Teachers.* Teachers of specialist subjects such as music, art, manual arts, physical education and domestic science receive from two to five years' training. Physical education courses are generally conducted at teachers' colleges or at a university; use is made of technical colleges and conservatoria of music for other specialist training. Teacher trainees attending the institutions, however, are regarded as being in attendance at a teachers' training college and are normally required to spend a portion of each week at the teachers' college.

(vi) *Training of Technical Teachers.* Teachers of general subjects in technical schools and colleges generally receive their training either as primary or as secondary teachers and after some experience in either or both fields are transferred to a technical institution.

Teachers of specialist subjects in technical schools are in the main recruited from the ranks of qualified tradesmen engaged in either industry or commerce. Upon appointment teachers of technical subjects usually receive instruction in classroom teaching techniques and procedures. A Technical Teachers' Training Centre has been established in Victoria.

(vii) *In-service Training.* As almost all teachers now enter the profession by way of Teachers' Training Colleges, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training. Education Departments have always encouraged practising teachers to pursue university courses, which are free to approved applicants in some States, and facilities have been made available for teachers to obtain the academic qualifications for higher certificates where such exist.

Efforts are also made to keep teachers informed of new ways of meeting classroom problems. District Inspectors are usually responsible for the conduct of meetings where professional topics are discussed and for the arrangement of visits to other schools where special work is being done. Official publications of the Education Departments contain articles dealing with both educational theory and practice. In most States, the teachers' organizations publish magazines containing, among other material, articles dealing with educational theory. These reach the great majority of government teachers.

(viii) *State Details.* (a) *New South Wales.* The tendency in teacher training over the last twenty years has been to increase the number of specialized courses for teachers of various types of subjects, and to provide more teachers' colleges in country areas. In 1932 provision was made for teachers in manual arts to be chosen from Junior Technical School students who passed the Intermediate Certificate, and in 1935 special two-year courses for teachers of agriculture were introduced. Other developments were the provision of graduate courses at Armidale and special courses for prospective teachers of physical education.

In the post-war years several new colleges have been opened to accommodate the large number of new recruits. Country colleges concentrate on primary and lower primary training, and Sydney Teachers' College has become more and more an institution for the training as specialists, such as graduate teachers and teachers of art, music, physical education, etc.

Administration of teacher training is controlled by a board consisting of the principals of teachers' colleges, which, in conjunction with the Director-General or his deputy, co-ordinates all teacher training activities.

(b) *Victoria.* Up to 1951, recruits for primary teaching first served as junior teachers in schools and then received one year's training in a teachers' college. Five teachers' colleges were operating in 1950, and two have been opened since. In 1951 provision was made for direct recruitment of students into colleges at the age of seventeen, and the course was extended to two years.

A Secondary Teachers' Training Centre was set up in 1950 by the Education Department at the University to provide professional and scholastic guidance for students being trained for secondary school work.

(c) *Queensland.* The pupil-teacher recruitment method has now been abolished, and students who have passed the Senior Leaving Examination are selected for a two-year professional course in primary teaching at the Senior Teachers' College. Secondary school teachers are recruited either from graduates teaching in primary schools or from graduate students trained by the Senior Teachers' College in close co-operation with the Faculty of Education at the University.

Junior Teachers' Colleges, attached to high schools, offer preliminary training to intending teachers who have passed the Junior Public Examination.

(d) *South Australia.* Most teachers undergo a two-year course, which may be general or specialized in infant, commercial, art or manual training work. An additional year is provided for highly successful students, and a course leading to university graduation for intending secondary teachers. The Associateship of the University of Adelaide is a further qualification for teachers, involving less academic attainment than a degree and biased towards Education.

Teacher shortage is combated by such measures as increasing teacher training, and salaries, employment of married women, higher retiring ages, and encouragement to the immigration of British teachers.

(e) *Western Australia.* The Teachers' Training College offers a standard two-year course for non-graduates and a one-year course for graduates. Monitorship is no longer a prerequisite of training. There has been no special training course for secondary teachers although four and five year courses are now in operation.

Training is administered by a College Advisory Board comprising the Director of Education as Chairman, the Professor of Education, a Senior Inspector, the Principal of the College and a representative of the Teachers' Union.

(f) *Tasmania.* Since 1948, teacher training has been undertaken by the University, where matriculants undertake a four-year course including a degree and professional training. Holders of a Schools' Board Certificate undertake a three-year course of selected university subjects plus professional training.

A Student Teachers' College, administered by the Education Department, was set up at Launceston in 1948 as an emergency measure to train additional teachers and now provides two-year courses.

(ix) *Sex and Status of Teachers.* Although about one half of the teachers in State schools in Australia are men, the ratio varies considerably from State to State. There has been a continuous increase in the proportion of men since 1929, at first because of a government policy of male preference during the period of severe unemployment, and since then, the difficulty of recruiting females at a rate rapid enough to replace their greater "wastage" rate. Only women teachers are employed in the infant schools and generally in girls' departments. However, men predominate in the senior positions, both because of their greater preponderance amongst those with long service and because the higher promotion positions are generally reserved for men, except for some in infants' schools and girls' schools which are reserved for women.

Most teachers are permanent public servants. This status gives them security of tenure, compulsory contributory superannuation rights, and the right of appeal against being passed over for promotion. On the other hand, they are generally subject to transfer to any part of the State which they serve and are debarred from holding or seeking election to public offices. Female permanent teachers must resign if they wish to marry, although this is no longer the case in New South Wales and Tasmania.

14. *School Buildings and Grounds.*—In 1930, school building programmes were seriously cut because of the financial difficulties of the depression. The 1939-45 War intervened before school building could be resumed on a large scale. During the post-war period the building of schools was given a high official priority in order to obtain labour and materials. Most schools are therefore either quite new or more than 20 years old.

The large school in 1929 was normally of one or two stories, constructed of brick or stone, composed almost entirely of class rooms. Verandahs were usually provided for wet weather play and for cloak accommodation. "Portable" wooden rooms were used extensively as one-teacher country schools and to provide additional accommodation in large schools. Many of the older one-teacher schools were permanent brick or stone buildings. Secondary schools, until the post-war period, were often housed in former primary schools to which laboratory and workshop accommodation had sometimes been added. The shortage of buildings has been such that very few of the pre-1929 schools have been replaced, although many have been altered.

The post-war buildings also fall into two big groups, portable and permanent. In primary schools, in particular, some Education Departments favour a mixture of both kinds of classrooms, thus enabling them to cope with the changing age-composition of different areas. Prefabricated classrooms have been imported or locally produced in very large numbers—the Bristol aluminium dual units being especially popular. Generally, these have been used to extend existing schools, although in a few cases entire schools have been composed of them. To meet the very acute shortage all kinds of emergency

measures have been taken, including the hiring of halls, and the use of cloak-rooms, weather sheds and verandahs for class instruction. However, a considerable number of modern and imposing new secondary schools has been built and equipped with special facilities for the varied activities of the pupils.

The construction and maintenance of school buildings is not generally the direct responsibility of the Education Department. The work is usually done by the State Department responsible for all public buildings, the Education Department maintaining close liaison with the body responsible.

School grounds vary from small asphalted yards in some congested city areas to acres of playing fields and agricultural plots in the best country schools. In some States many country schools have forest plantations attached, while planting of ornamental trees and gardens is everywhere encouraged, a special day being set aside for tree planting.

Some application has been made of the "school base" concept, primary and secondary schools sharing the use of public recreation areas in some places, although the tendency has been to locate schools centrally for the child population rather than to locate them for access to green areas.

15. *Equipment.*—(i) *Text Books and Materials.* All equipment regarded as essential by the Education Department in each State is provided free of charge, except for text books for pupils. The cost of text books in the secondary schools, however, is frequently met by government assistance to some students. Some schools purchase sets of text books, which are paid for by charging the pupils a small fee annually. Text books have been extensively revised since 1929 in accordance with changes in the curriculum. The more widespread application in recent years of activity and play-way methods in the infant schools has been stimulated by the provision of a greater volume of free materials such as blocks, counters, peg-boards and modelling clay.

Equipment for manual training and home arts has long been provided free by the Education Departments. Sometimes a centre has been created to serve a number of schools and children are transported to it free. Other schools, especially the "consolidated" schools in the country, have their own workshops. Generally, manual training for boys consists of woodwork and sheetmetal work and the girls take sewing and home science. Secondary schools are almost always provided with laboratories, but these are not found in primary schools, with the exception of the larger all-age schools in the country.

Many schools still lack physical education equipment beyond common sports material, although this position is gradually being remedied.

(ii) *Furniture.* There has been considerable development since 1929 in this field. Originally most schools were equipped with long desks and benches, seating six to eight pupils. By 1929 nearly all of these had been replaced by the standard dual desk with tip-up seat, and in infant classes by individual chairs and small tables. No important change in furniture took place then until the post-war period, when considerable research was undertaken on posture and the physical measurement of children. The dual desk is now being replaced in some States by the individual table and chair, provided in a range of sizes suitable to each class. In some States tubular steel is used. The new type of furniture is more suitable for flexible arrangements of the class in line with modern educational practice.

(iii) *Visual Aids.* The period since 1929 has seen a remarkable growth in the use of the visual aids in education. There have been two distinct phases in this growth, the first being characterized by the importation of all films and equipment and the second by the efforts made by local producers to meet the requirements of Australian education.

During the first phase the acquirement and use of equipment were left to individuals, and some resourceful pioneering work was done in schools with film-strip projectors. The obvious advantages of this teaching aid were soon apparent to Departments of Education and between 1936 and 1939 they began the appointment of special committees and teacher demonstrators to guide the development of the new educational medium.

With the appointment of these specialists, the second phase of growth began, for they recognized immediately the need to produce film strips suitable for use in their own schools. Consequently five States set up film-strip production units for this purpose and these are now by far the largest producers in Australia. An Australian-produced film-strip projector has also been manufactured.

Since the 1939-45 War, the emphasis has moved from the strip projector to the 16mm. sound machine. In May 1945 the Commonwealth Government set up the National Film Board to promote the use of educational films, and the Government Film Production Unit attached to the Board rapidly became the main producer of educational films. Several film companies also began operations and their most recent interest has been the designing of films primarily for classroom use. Several manufacturers have produced 16mm. sound projectors.

The National Library is the main distributing centre for non-technical films in Australia and it has Advisory Committees to act as its agency in each State. The main borrowers are schools, film societies and parent and citizen organizations. Education Departments have set up their own film libraries to distribute films to schools under their control, while schools are encouraged to purchase projectors through subsidy schemes, and in some States mobile units are organized to cover schools where there is no equipment.

The present extent of the use of films is indicated by the following details:—In June, 1951, the Education Department libraries had 15,412 sound and 4,656 silent 16mm. films covering 5,258 and 1,695 separate titles respectively. There were 2,939 35mm. strip projectors, 509 16mm. silent projectors and 1,346 16mm. sound projectors in the Department's schools, whilst an additional 252 schools were served either fortnightly or monthly by mobile sound projectors. Most schools have their own libraries of film strips. Most Education Departments produce film strips and some also produce their own films. To June, 1951 their production totalled 1,083 film strips, 29 silent films and 66 sound films.

16. **Parent and Citizen Organizations.**—In Australia, where all Government schools are administered by central Departments, there is little opportunity for local administration of education. Public interest is expressed through Parent and Citizen Organizations. Although the names of these bodies differ in the various States they have similar aims which are:—to promote the interests of the school by bringing parents, pupils and teaching staff together; to help provide teaching aids not supplied by the Department; to provide recreational materials; to assist in the regular attendance of children at school; to help find accommodation for teachers.

In all States the Parent and Citizen Organizations have affiliated to become State-wide bodies. These, in turn, are the members of the Australia-wide body, the Australian Council of School Organizations.

17. **Statistics of Government Schools.**—(i) *General.* The Government schools shown in the following tables include primary, secondary, junior technical, correspondence and subsidized schools, but exclude senior technical colleges, evening schools and continuation classes.

Particulars relating to Senior Technical Colleges are given in § 5 following.

(ii) *Returns for Year 1951.* (a) *General.* The following table shows for 1951 the number of Government Schools, together with the teachers employed, teachers in training and the number of individual children enrolled.

## GOVERNMENT SCHOOLS(a), 1951.

State or Territory.	Schools open at end of year.	Teachers Employed (excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
New South Wales(b)	2,525	13,602	2,623	432,747
Victoria	2,035	9,424	1,498	259,644
Queensland	1,565	5,976	566	171,107
South Australia	694	3,524	352	95,523
Western Australia	507	2,568	478	(c) 72,646
Tasmania	316	1,604	235	45,230
Northern Territory(d)	6	42	..	1,250
Australia—1951	7,648	36,740	5,752	1,078,147
1950	7,790	36,085	5,530	1,027,459

(a) Excludes Senior Technical Colleges. (b) Includes Australian Capital Territory. (c) Average weekly enrolment. (d) Year ended 30th June, 1952.

(b) *Average Enrolment and Attendance.* The methods of calculating enrolment are not identical throughout the States. The unit in South Australia is the daily enrolment, while New South Wales, Victoria, Western Australia and Tasmania employ the weekly enrolment. In Queensland no average enrolment is compiled, and the August census enrolment figure has been taken.

As with enrolments, there is not complete uniformity in arriving at the average attendance, but most of the States aggregate the attendances for the year and divide by the number of school sessions. New South Wales and Western Australia, however, employ averages of term averages. The matter of securing uniformity in these respects has been under consideration for some time, and was discussed at a meeting of Directors of Education at a conference held in Sydney in July, 1947. The average enrolment and attendance in each State and Territory during 1951 are shown below :—

## GOVERNMENT SCHOOLS(a) : AVERAGE ENROLMENT AND ATTENDANCE, 1951.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Percentage of Attendance to Enrolment.
New South Wales(b)	398,899	349,766	87.64
Victoria	247,361	219,135	88.60
Queensland	(c) 159,767	142,705	89.30
South Australia	90,747	82,588	91.06
Western Australia	72,646	66,865	92.00
Tasmania	42,224	37,363	88.49
Northern Territory (d)	1,230	1,092	88.78
Australia—1951	1,012,874	899,514	88.80
1950	958,112	844,123	88.10

(a) Excludes Senior Technical Colleges. (b) Includes Australian Capital Territory. (c) Census enrolment at 1st August, 1951. (d) Year ended 30th June, 1952.

Recurring epidemics of contagious diseases, minor illnesses and bad weather are all serious factors which affect the full attendance of pupils at school.

The average attendance at Government Schools in Australia is shown below for the year 1891 and at varying intervals to 1951.

GOVERNMENT SCHOOLS(a) : AVERAGE ATTENDANCE, AUSTRALIA.

Year.	Total Population. (b)	Average Attendance.	Year.	Total Population. (b)	Average Attendance.
	'000.			'000.

1901 .. ..	3,825	450,246	1947 .. ..	7,639	754,799
1911 .. ..	4,574	463,799	1948 .. ..	7,795	770,554
1921 .. ..	5,511	666,498	1949 .. ..	8,051	810,800
1931 .. ..	6,553	817,262	1950 .. ..	8,316	844,123
1933 .. ..	6,657	805,334	1951 .. ..	8,539	899,514
1939 .. ..	7,005	744,095			

(a) Excludes Senior Technical Colleges.

(b) At 31st December.

(c) *Schools in the Australian Capital Territory.* During 1951 nine Government Schools were in operation in the Australian Capital Territory; enrolment numbered 2,811; and average attendance was 2,434. By arrangement with the Commonwealth Government these schools are conducted by the New South Wales Education Department with provision for primary and secondary education, the Department being recouped for expenditure. The cost of the teaching staff in 1951-52 was £101,080, while the cost of general maintenance amounted to £57,319. The figures quoted exclude enrolment, etc., at the Canberra Technical College and the Evening Continuation School. For further particulars of education facilities in the Australian Capital Territory see Chapter VII.—The Territories of Australia, Australian Capital Territory, para. 8.

(iii) *Expenditure.* (a) *Maintenance—All Schools (excepting Senior Technical Colleges).* The net expenditure on maintenance in all grades of schools, excepting senior technical colleges and, in Victoria and (in 1939) Tasmania, junior technical schools, and the cost per head of average attendance for 1939 and the five years ended 1951 are shown in the following table. The figures do not include expenditure on buildings, which is shown separately in a subsequent table. In all expenditure tables the figures for Victoria, Queensland and Western Australia relate to the financial year ended six months later than the calendar year.

GOVERNMENT SCHOOLS(a) : NET EXPENDITURE ON MAINTENANCE.

(a) Excludes Senior Technical Colleges.

(b) Gross figures, receipts not being available.

(c) Excludes Junior Technical Schools. See above.

(b) *Maintenance—Secondary Schools.* The figures shown in the preceding table refer to expenditure on maintenance of all Government primary and secondary schools, excluding senior technical colleges. It has been the practice of the State Education Departments to give separate information in regard to the cost of secondary education. The difficulty of making any satisfactory allocation of the kind, however, will be understood, when it is realized that both elementary and higher education are in some instances given in the same school and by the same teacher. Unfortunately, too, the term "secondary" has not the same meaning in all States. It might be mentioned here that similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted hereunder in regard to cost have been mainly extracted from the Reports of the State Education Departments, and are subject to the above qualifications.

**GOVERNMENT SECONDARY SCHOOLS(a) : EXPENDITURE ON MAINTENANCE.**

State.	1950.		1951.	
	Cost.	Cost per Head of Population.	Cost.	Cost per Head of Population.
	£	£ s. d.	£	£ s. d.
New South Wales .. .. .	3,275,898	1 0 4	3,975,808	1 4 0
Victoria .. .. .	1,930,655	0 17 3	2,515,400	1 1 10
Queensland .. .. .	438,865	0 7 4	513,834	0 8 5
South Australia .. .. .	583,949	0 16 8	740,728	1 0 7
Western Australia .. .. .	506,420	0 17 9	636,973	1 0 2
Tasmania(b) .. .. .	197,054	0 14 0	260,278	0 17 9

(a) Excludes Senior Technical Colleges.

(b) Includes High and Junior Technical Schools.

The figures in all cases exclude the cost of buildings. In Queensland, the figure quoted excludes the cost of the Agricultural High School and College, which amounted in 1950-51 to £126,412, and in 1951-52 to £184,838.

(c) *Buildings.* Expenditure on Government School buildings, excluding senior technical colleges, for the years 1939 and 1947 to 1951 was as follows:—

**GOVERNMENT SCHOOLS(a) : EXPENDITURE ON BUILDINGS.**

(Including Loan Fund Expenditure.)

(£.)

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Total.

(a) Excludes Senior Technical Colleges.

The totals for the various States in 1951 include the following amounts expended from loan and other funds; figures for 1950 are shown in brackets—New South Wales, £2,502,289 (£1,452,607); Victoria, £2,977,015 (£2,200,967); Queensland, £693,522 (£499,282); South Australia, £772,703 (£386,316); Western Australia, £716,858 (£499,521) and Tasmania, £625,888 (£328,061).

(d) *Net Total Cost.* The net total cost of education in Government Schools, including buildings, during the years 1939 and 1947 to 1951 was as follows :—

**GOVERNMENT SCHOOLS(a) : NET TOTAL COST.**

(£.)

Year.	N.S.W. (b)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Total.

(a) Excludes Senior Technical Colleges.

(b) Gross figures, receipts not being available.

(c) Excludes Junior Technical Schools.

The figures in this and the preceding tables refer to all grades of Government Schools with the exception of senior technical colleges, and in Victoria and (in 1939) Tasmania, junior technical schools. Including buildings, the net cost per scholar in average attendance for the whole of the schools in Australia amounted in 1950 to £41 14s., and in 1951 to £50 16s. 8d. as compared with £4 9s. 3d. in 1901.

(e) *School Banking.* Particulars of School Savings Banks are included in Chapter XVI.—Private Finance.

### § 3. Non-Government Schools.

1. **Public Authority and the Non-Government Schools.**—In all States education is compulsory for all children between certain ages. It must be received in a government school, unless the child is under "regular and efficient" instruction elsewhere. This may be at home, or in a non-government school. The provision for control over the regularity and efficiency of instruction in the non-government schools varies considerably from State to State. In Queensland and South Australia it is possible under the present regulations for schools to exist without inspection. In New South Wales and Western Australia provision is made for the initial inspection when a new school starts, and for inspections thereafter as the Minister requires, to ensure efficiency. In Victoria and Tasmania, registers are kept of teachers and schools, and both teachers and schools must satisfy the administering authority that they are efficient before registration is granted. Without such registration, neither a teacher nor a school can operate. Provision is made, too, for inspections at any time by the registering authority.

Public authority over schools or institutions having scholars above the compulsory ages is generally less direct. It is effected directly by the registration procedures in Victoria and Tasmania, and in all States there is a measure of indirect control through provisions governing the awards of State scholarships for secondary education, which can be taken only in government or in approved non-government schools.

The eight State-subsidized grammar schools in Queensland are the only non-government schools of Australia for which an annual inspection is prescribed by statute.

In all States, non-government schools are required, under the authority of either the Education Acts or Statistics Acts, to furnish certain returns. The form of these returns may be prescribed in the Acts or may be subject to alteration by the Minister's consent.

2. Numbers of Non-Government Schools, Teachers and Enrolments, 1951.—The numbers of non-government schools, teachers and enrolments for 1951 are shown in the following table:—

## NON-GOVERNMENT SCHOOLS, 1951.

Denomination.	N.S.W. (a)	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	Total.

1921 .. ..	198,688	164,073	1950 .. ..	309,673	275,562
1931 .. ..	221,387	189,665	1951 .. ..	326,258	293,429
1939 .. ..	247,482	219,171			

4. **The Organization of Roman Catholic Education.**—There is, in each State capital, an official who acts under the Archbishop as a Director of Catholic Education for the area. Each diocese within the area is, however, autonomous and manages its own educational affairs subject to the local episcopal authority. The State Director has, in addition to possible inspectorial functions within his own diocese, the duty of co-ordination of educational matters within his area, and of liaison with other educational authorities, particularly the State Education Department.

The system includes kindergartens, sub-primary, primary, academic secondary, home science, commercial, agricultural and technical schools, juniorates and minor seminaries, schools for the mentally and physically handicapped, orphanages and a variety of special schools of a charitable nature for under-privileged or socially handicapped children.

With the exception of a small number of permanent lay teachers and a number of visiting teachers—usually specialists in such matters as physical education, sport, speech, etc.—teaching is done by members of religious orders.

5. **The Organization of Other Non-Government Education.**—(i) *General.* Within each State, although the other non-Government schools may be organized into loose forms of association for purposes such as sports, conferences, uniform conditions, etc., there is no system corresponding in size, detail or organization with the Roman Catholic Schools.

(ii) *Church of England.* In certain schools under direct church control the appointment of a majority of Council members rests with the Synod. More frequently perhaps the appointment of such Council members lies in the hands of the diocese or even the parish. The ecclesiastical head of the area, the archbishop or bishop, is typically *ex-officio* chairman of the school Council. The church may appoint all members or on the other hand it may appoint a majority or only one or two. The other members are secured in many ways; some may be nominated by parents, some by "old boys" some by the "school association," some by co-option by the existing Council. Many combinations of these forms of membership occur.

(iii) *Other Denominations.* In general the pattern is similar to that described above, with appointments usually controlled by the State authority of the Church concerned, either alone or acting in conjunction with the local congregation. In Queensland there are six schools operated under the joint auspices of the Presbyterian and Methodist Churches.

(iv) *Undenominational.* There are three main groups of such schools; firstly, those partly controlled by State action, such as those Grammar schools for which some members of the controlling body are appointed under Act of Parliament; secondly, those operated under the auspices of corporate bodies, usually in the form of limited liability companies which may be affiliated with particular churches; and, thirdly, a number of privately-owned schools, many of which are small and restricted to kindergarten or primary schooling.

## § 4. Pre-school Education.

1. **Types of Pre-school Centres.**—Nursery-kindergartens under trained teachers provide daily sessions for children aged three to six, while play groups or play centres provide shorter periods for smaller groups. Day nurseries or crèches care for the children of mothers in employment and Lady Gowrie Child Centres are special centres set up in each State capital city by the Commonwealth Government to demonstrate a child development programme. There are also some private and denominational nursery schools which vary considerably in standard.

Free kindergartens were originally established and financed mainly in congested industrial areas, by voluntary effort, but over the years State Governments and some municipal councils have provided an increasing amount of financial assistance.

2. **The Training of Teachers.**—Since the development of this work depends on the availability of trained teachers, nearly all Kindergarten Unions now have teacher training colleges providing three-year courses. The minimum entrance age is seventeen, and the Leaving Certificate is usually required before admission.

The New South Wales Department of Education gives a two-years' course at the Teachers' College, covering such subjects as biology, physiology, child development, psychology, mental hygiene, child welfare, home science, English, world history, current affairs, sociology, art, crafts, physical education, music and early child development (which embraces principles and methods, play activities, children's literature, music for children, art and other creative experiences, and curriculum planning). A considerable amount of time is also spent in all colleges in practice teaching.

Financial help, such as free training, bursaries provided by the Government or voluntary bodies and living allowances, is provided for teachers, but there is a considerable shortage of trained pre-school teachers.

The six Kindergarten Unions in 1938 united to form the "Australian Association for Pre-School Child Development", a federal body whose aim is to promote the continuous advancement of the pre-school movement throughout Australia.

3. **Kindergarten of the Air.**—Daily kindergarten sessions of half an hour are now broadcast in all States by the Australian Broadcasting Commission in collaboration with Kindergarten Unions.

4. **Kindergarten Unions.**—The following information regarding kindergarten unions has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia where the details were furnished by the Education Department. It refers to kindergarten unions or associations, and excludes the kindergarten branches in the Government schools of the various States.

#### KINDERGARTEN UNIONS, 1952.

State.	No. of Schools.	Average Attendance.	Permanent Instructors.	Student Teachers.	Voluntary Assistants.
New South Wales	33	1,447	99	26	1
Victoria..	45	1,595	67	..	35
Queensland	6	226	14	..	..
South Australia(a)	76	2,225	185	..	8
Western Australia	35	938	61	..	..
Tasmania	5	209	17	..	..
Total—1952	200	6,640	443	26	44
1951	209	6,784	463	39	67

(a) Includes affiliated suburban and country centres.

Only 26 of these 200 kindergartens in 1952 were located outside metropolitan areas; these were as follows:—New South Wales—two at Newcastle; Victoria—two each at Geelong and Ballarat, one each at Bairnsdale, Castlemaine, Colac, Euroa, Horsham, Maryborough, Mildura and Red Cliffs; South Australia—one each at Angaston and Nuriootpa; Western Australia—two at Kalgoorlie and one each at Carnarvon, Geraldton, Kojonup, Merredin, Northam and Pearce; Tasmania—two at Launceston. In each capital city except Hobart there is a training college and the number of students in training during 1952 was 88 in Sydney, 123 in Melbourne, 30 in Brisbane, 42 in Adelaide, and 25 in Perth.

### § 5. Technical Education.

1. **General.**—In this section technical education refers to that branch of education which is concerned with the preparation for entry to skilled occupations, including trades and professions. In the main this education is vocational and is chiefly part-time, being carried out by the student while he is engaged in his occupation. The work of technical high schools, junior technical schools and other schools of this nature which provide courses with a bias towards technical handwork has been excluded, as they provide a form of education which is more properly regarded as secondary education.

The chief institutions for vocational training other than the universities are the senior technical colleges. These offer training not only in industrial skills, but also in commercial, agricultural and pastoral occupations, the plastic arts and homecrafts. There are, in addition, agricultural colleges and a substantial number of private business colleges.

Although, as in other branches of education, the main lines of technical education had been determined by 1929, expansion and development since then has, perhaps, been greater in this field than in any other. The following table gives some indication of the growth of technical education in the years 1935 to 1951.

#### TECHNICAL EDUCATION: AUSTRALIA.

Year.					No. of Colleges.	No. of Students.	No. of Teachers.(a)	Total Expenditure.
								£
1935	..	..	..	..	86	67,426	2,471	663,339
1939	..	..	..	..	94	89,215	3,276	1,359,800
1945	..	..	..	..	114	110,841	5,175	1,849,051
1947	..	..	..	..	119	144,882	6,239	2,685,896
1948	..	..	..	..	126	150,482	6,819	3,235,129
1949	..	..	..	..	131	153,602	6,530	4,081,331
1950	..	..	..	..	141	161,564	6,501	5,298,510
1951	..	..	..	..	146	159,310	6,784	6,617,049

(a) Includes both full-time and part-time teachers.

Technical education is the field most sensitive to changing material needs and has expanded to meet the requirements of new industries and techniques. The desire for the comparative economic security of skilled jobs during the period of economic depression and the increasing demand for skilled workers due to the development of more advanced techniques in industry stimulated public interest in all States. For example, consequent upon the Nangle Commission in Western Australia (1928) and the appointment of a commission in New South Wales in 1933, there was a move in both of these States to decentralize facilities and set up advisory councils to maintain better contact with industries served by the colleges. In 1938 a Royal Commission on Youth Employment and Apprenticeship examined in some detail matters related to technical education in Western Australia.

A characteristic feature of technical education since 1929 has been the close co-operation between the Commonwealth and the States. This is understandable as the technical colleges were able to play an important part in meeting two crises with

Australia-wide implications. During the years of the economic depression in the 1930's States sought means to provide technical training for the young unemployed and this led, in 1936, to the Youth Employment Scheme, in which the States and the Commonwealth participated. During the 1939-45 War the Commonwealth and the States worked together in the Commonwealth Technical Training Scheme to meet the wartime need for technicians; after the war this type of training was continued in the technical colleges in the States as a part of the Commonwealth Reconstruction Training Scheme. In addition, during the period 1940 to 1944 technical correspondence schools were founded in each State in conjunction with the Commonwealth and these have become an important part of the system of technical education in the Australian States.

The expansion of technical education in the last two decades has paralleled the growth of secondary production from predominantly scattered small-scale and light industry to more concentrated large-scale heavy industry utilizing advanced techniques. Technical colleges have always been linked with the industries from which they draw staff and students, but whereas formerly they produced skilled craftsmen they now also accept the responsibility of turning out persons capable of adapting themselves to swift technological changes and able to assume responsibilities of management and leadership. Furthermore, rapid changes in industrial methods call for a close connexion between college curricula and workshop practice in order that they may keep in step and so that applied research can make available to industry the results of pure research. The introduction of day training classes for apprentices is an indication of the development of this relationship between technical education and industry.

The history of the development of technical education since 1929 is one of increasing government support and control, increasing financial commitments by both State and Commonwealth Governments as well as considerable financial support and greater participation by industrial undertakings in the work of the colleges, increasing enrolments and facilities and the development of curricula and courses to meet new needs, and the growing realization of the need to recruit and train teaching staff in a systematic way.

2. **Teacher Training.**—Another important feature of technical education since 1929 relates to the training of teachers. Technical colleges at that time were staffed chiefly by men (and a few women) drawn from two sources. They were either trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers. In order to remedy this, there has been a move to develop schemes of training technical college teachers without breaking the important link provided by recruiting specialist tradesmen to teach in the colleges. For example, since the 1939-45 War, New South Wales has extended a system whereby tradesmen-instructors receive a course of teacher training in both general educational theory and teaching method. After appointment a teacher in a large centre attends classes for six hours each week during his first year of service and two hours weekly thereafter until he has completed the training course. Correspondence courses and itinerant teachers care for the newly appointed teacher-instructor in country colleges. Modifications of this aspect are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers' colleges.

3. Colleges, Teachers and Students.—The numbers of colleges, teachers and enrolments of individual students during the years 1939 and 1948 to 1951 are given in the following table :—

TECHNICAL EDUCATION : COLLEGES, TEACHERS AND ENROLMENTS.

State.	Colleges.	Teachers.			Individual Students Enrolled.		
		Full-time.	Part-time.	Total.	Males.	Females.	Total.
<b>New South Wales—</b>

(a) Partly estimated.

4. Expenditure.—The expenditure on technical education in each State for 1951 is shown below :—

TECHNICAL EDUCATION : EXPENDITURE, 1951.

(Including Loan Fund Expenditure.)

(£.)

State.	Salaries and Maintenance.	Equipment.	Buildings.	Total Expenditure.	Receipts—Fees, etc.	Net Expenditure.
New South Wales	1,545,331	324,482	484,717	2,841,602	274,114	2,567,488
Victoria(a)	1,746,372	75,998	403,123	2,342,201	261,638	..
Queensland..	275,371	110,058	64,538	449,967	38,626	411,341
South Australia	311,520	9,194	87,999	409,531	50,284	359,247
Western Australia	363,147	(b)	17,626	442,838	17,724	425,114
Tasmania	81,046	7,923	39,465	130,910	787	130,123
Total 1951	4,322,787	527,655	1,097,468	6,617,049	643,173	..
1950	3,701,316	473,662	884,132	5,298,510	667,678	..

(a) Includes expenditure on Junior Technical Schools.

(b) Included with salaries and maintenance.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is largely financed from loan moneys, the sums provided from this source in 1951 being (the expenditure in 1950 is shown in brackets) :—New South Wales, £417,708 (£229,728); Victoria, £351,986 (£374,691); Queensland, £58,971 (£40,000); South Australia, £74,078 (£64,853); Western Australia, £626 (£1,961); and Tasmania, £35,183 (£20,348).

The expenditure on maintenance (including salaries) for technical education in Australia in 1951 amounted to 13s. 1d. per head of the mean population, as compared with £4 3s. 11d. per head expended on maintenance (including salaries) for primary and secondary education.

### § 6. Commonwealth Activities.

Although the primary responsibility for education rests with the Australian States, the Commonwealth Government is committed to a number of educational activities related to its other functions. For example, it maintains officer training colleges and education services for each of its Defence Services, a School of Pacific Administration for training administrators for Papua-New Guinea and a School of Forestry. In each of the Australian Territories there is an education programme which provides for both the native and white children who live there. References to education in the Territories appear in Chapter VII.—The Territories of Australia.

The Commonwealth Office of Education, established in 1945, acts as the Commonwealth's educational adviser, undertakes research work as Commonwealth activities require, and is the channel for liaison between Commonwealth and State educational authorities. This Office has responsibilities with regard to the education of migrants, the education of natives in the Northern Territory, the provision of scholarships at the tertiary level under the Commonwealth Scholarship Scheme and the Reconstruction Training Scheme, international relations including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization and the provision of scholarships and fellowships for selected students under the Commonwealth Technical Co-operation Scheme, the UNESCO Fellowship Scheme and the South-East Asian Scholarship Scheme.

The Australian Broadcasting Commission features school broadcasts and other educational broadcasts as part of its daily programmes. The Commonwealth Scientific and Industrial Research Organization undertakes research, the results of which are made available to educational institutions. In 1951 the Commonwealth Government introduced a free-milk scheme for school children. This extends a service which some State authorities were already providing for a proportion of the school population. Under the Commonwealth Reconstruction Training Scheme many ex-servicemen and women have received the training which has enabled them to enter many different trades and professions.

The Commonwealth also assists a number of other bodies concerned with education. Besides grants to organizations such as the Australian Council for Educational Research and the National Fitness Council, Australian Universities have received grants for specific purposes through the Universities Commission.

### § 7. Australia and International Relations in Education.

Despite its isolation, Australia has always been responsive to educational developments in oversea countries, particularly those in the United Kingdom, but it is only recently that it has begun to make any considerable impact on educational thought overseas.

In this connexion there have been important developments since the 1939–45 War. For instance there has been a remarkable increase in the volume of information on educational matters exchanged between Australia and South-East Asia, and Australia has participated in the Commonwealth Technical Co-operation Scheme and the United Nations Technical Assistance programme.

Perhaps the most important single factor behind the quickening of Australian interest in international cultural affairs has been membership of the United Nations Educational, Scientific, and Cultural Organization. Australia has been a member since 1946. Some eleven expert Committees in Australia are responsible for a wide and varied programme of activities on behalf of UNESCO. Their advice has helped to make Australia's contribution to UNESCO International Conferences and Seminars highly effective. Other work undertaken by these Committees has included the supervision of studies relating to community attitudes towards international affairs, and to the assimilation of migrants, the conducting of seminars in Australia, arranging for exhibitions and displays in Australia, and the publication of handbooks and brochures to assist teachers and other persons in meeting the problems involved in educating for international understanding.

The Australian National Advisory Committee for UNESCO, on which all the other Committees are represented, advises the Commonwealth Government and co-ordinates the work of the specialist Committees.

## § 8. Universities.

1. **General.**—The last quarter of a century has seen a marked increase in the number of students and staff, the establishment of two new Universities and three new University Colleges, and the provision in the older Universities of additional courses. In spite of difficulties due, in some measure, to the economic depression of the 1930's and a World War, the period since 1929 has been one of significant development.

2. **University Expansion.**—(i) *The Establishment of New Universities.* The two new Universities represent new departures in the Australian University tradition.

(a) *The Australian National University.* By the Australian National University Act 1946, provision was made for the establishment of a University in the Australian Capital Territory. The University is required by the Act to provide facilities for post-graduate research including:—The School of Medical Research to be known as "The John Curtin School of Medical Research"; The Research School of Physical Sciences; The Research School of Social Sciences; and The Research School of Pacific Studies.

The Act also provides for the incorporation of the Canberra University College. In the first instance the Council has decided to concentrate on the establishment of the four Research Schools mentioned in the Act.

The government of the University is vested in a Council consisting of two representatives each of the Senate and the House of Representatives, up to eight nominated by the Governor-General, up to nine elected by Convocation, two elected by the students, and three elected by the academic staff; up to three members may be co-opted and the Vice-Chancellor is an *ex officio* member.

The senior academic body in the University is the Board of Graduate Studies of which all professors are members. The Board deals with questions affecting education, learning and research in the University.

The Act provides for a statutory grant of £325,000 per annum and in addition a supplementary grant is made to meet the running costs. A separate vote is made for capital works.

An area of 204 acres at Acton has been vested in the University. University House, a residential College for single members of the staff and the student body, is to be opened in February, 1954. University House will also act as the social centre for the whole University community.

The laboratories for the Research School of Physical Sciences have been completed and the office block is under construction. The John Curtin School of Medical Research (with the exception of the Department of Medical Chemistry which is at present located in the Wellcome Foundation, London) is housed in temporary laboratories on the University site. The workshop wing of the permanent building has been commenced and it is expected that the laboratory wings will be completed within the next two years. The Research Schools of Social Sciences and Pacific Studies and the Library are housed in existing buildings on the site known as the "Old Hospital Buildings".

Sixteen professors and fifty-four other members of the academic staff have been appointed.

Each department of the Research Schools accepts a small number of graduate students. Each student is assigned to a Supervisor and pursues a course of research. Subject to certain conditions, the following degrees may be awarded by the University :— Master of Arts (M.A.); Master of Science (M.Sc.); Doctor of Philosophy (Ph.D.); Doctor of Letters (Litt.D.); Doctor of Science (D.Sc.); Doctor of Laws (LL.D.). The Right Honourable Viscount Bruce of Melbourne is Chancellor of the University and Mr. L. G. Melville was recently appointed Vice-Chancellor. Mr. R. A. Hohnen is the Registrar.

Each of the Research Schools will eventually be headed by a Director. Professor M. L. Oliphant, F.R.S., is Director of the Research School of Physical Sciences. But until further appointments can be made the following Deans have been appointed to act : Professor A. H. Ennor, Dean of the School of Medical Research; Professor S. F. Nadel, Dean of the School of Pacific Studies, and Professor G. Sawyer, Dean of the Research School of Social Sciences. In 1953 forty students were enrolled in the University (including eighteen new enrolments).

Further information concerning this University appeared in Official Year Book No. 39, pp. 226-7.

(b) *New South Wales University of Technology.* The other University to be established within the period under review was the New South Wales University of Technology, which came into being by Act of the New South Wales Parliament in 1947. This foundation was a new departure not only for Australia but also for the whole British Commonwealth. It attempted to do for Australia the task that has been carried out by institutions such as the well-known Eidgenossische Technische Hochschule in Zurich or the Massachusetts Institute of Technology in the United States. The official handbook of the new University explained its particular function as follows :—

“ In a traditional university the scientist is concerned with the original contributions to principles and conceptions in essentials and pure research ; in the technical university the technologist is concerned with the utilization of scientific knowledge and experience for the solution of immediate problems.”

Three degrees were established, viz., Applied Science (B.Sc.), Engineering (B.E.) and Architecture (B.Arch.) and by 1952 Chairs had been set up in Applied Chemistry, Applied Physics, Chemical Engineering, Electrical Engineering, Mechanical Engineering, Metallurgy, Mining and Applied Geology, Mathematics, Wool Technology, Architecture and Humanities.

Two features are emphasized in the planning of University of Technology undergraduate courses. The first is the incorporation in the syllabus of industrial experience to supplement the laboratory and lecture-room work at the University. In the Faculty of Engineering, for example, this practical work amounts to five months a year and is supervised and organized to suit the stage and syllabus of each course of study. The second is the compulsory study, in all faculties, of general subjects such as language and literature, history, economics and psychology. These courses are designed to broaden the experience and interests of the student.

The University is making use of the buildings and equipment of the Sydney Technical College until its own buildings have been completed in another part of Sydney. Administratively it is at present under the control of the New South Wales Minister for Education and the Public Service Board, although the Act provides that administration shall eventually pass to a Council.

Towards the end of 1951 a branch College of the New South Wales University of Technology was established in Newcastle.

(ii) *University Colleges.* Particulars are given in Official Year Book No. 39, pp. 227-8, concerning the Canberra University College, which was created in 1930 mainly to establish courses of lectures for degrees in co-operation with the University of Melbourne, and the New England University College, which was established in 1937 and is governed by the University of Sydney.

(iii) *Expansion within the Universities.* An important administrative development which occurred in all Universities during the period under review was the appointment of full-time salaried Vice-Chancellors or Principals, a move which gave much greater effectiveness to University administration.

Within the past twenty years the appearance of some of the Universities has altered to a striking extent. New permanent buildings and some temporary ones have been erected and new wings have been added. An impressive expansion has been that taking place in Queensland where, since 1937, building has been proceeding upon a new site at St. Lucia, and, beginning with the transfer of some of the Engineering School in 1947, the University is being gradually moved into its new quarters. The University of Technology is also preparing to move to its new site.

This very considerable building activity has been made necessary primarily by the vast expansion in student numbers that has taken place since 1929. In that year, in all Australian universities, there were some 9,000 students; by 1952 the number had risen to 29,641. This more than twofold increase had the following characteristics:—

- (a) There was a continued increase in University enrolments up to 1940, followed by only a slight recession during the war period. The lowest point reached, in 1942, was still above the 1935 level. In the closing year of the war enrolments had already risen beyond any previous figures, and in the following year (1946) the rapid post-war expansion became strikingly apparent with an increase of 64 per cent. over the 1945 figures. The peak of enrolments was reached in 1948, and thereafter a slow decline has set in, which, it is anticipated, will be checked by the mid-1950's. From that point on, numbers will probably again increase until 1960, by which time it is estimated that some 40,000 may be enrolled in Australian universities.
- (b) Enrolments in every one of the largest eight faculties declined during the war period, and then took a sharp upward trend towards the close of the war, maintaining this increase until 1948, when a slow decline commenced. By 1952 enrolments had fallen by 20 per cent.
- (c) During the war and post-war period, the size of most of the major faculties relative to one another remained approximately the same.

3. *Courses.*—The post-war period has seen a noticeable expansion in the ranges of courses offered, particularly in the younger and smaller Universities. New faculties of Education were established in Western Australia and Queensland. Two new faculties of Dentistry, two of Commerce (Economics), three of Architecture and one each of Medicine, Law, Veterinary Science, Applied Science, and Engineering also came into being.

Within existing faculties, many new departments were set up. In Engineering, specialist departments of Chemical and Aeronautical Engineering, Civil, Electrical, Mechanical, Mining and Metallurgical Engineering and Surveying have been instituted.

In Medicine the most notable development has been the establishment of specialist courses leading to graduate diplomas in Radiology, Anaesthesia, Clinical Pathology, Ophthalmology, Laryngology, Gynaecology, Tropical Medicine, Dermatology and Psychological Medicine at Melbourne and Sydney.

In Science the smaller Universities followed the development of Melbourne and Sydney by breaking up departments such as Biology into Zoology and Botany, etc., and adding new departments such as Bacteriology and Biochemistry. Melbourne and Sydney also introduced some new courses and a new degree in Forestry was introduced in each University.

In Arts the same processes can be observed. New departments in Semitic Studies, Fine Arts, Music and Statistics were opened in various universities, and other departments were divided or sub-divided. The most prominent addition was the rapid development of Psychology departments which, in the post-war period, expanded into one of the biggest of the Arts departments.

In the smaller faculties, similar innovations and expansions, reflecting an increasing demand for specialized study, have taken place. Examples are the development of departments of Physical Education, Social Studies, Town and Country Planning and Criminology.

In addition, however, there were several attempts to provide integrated general education courses within the faculties of Arts and Science.

4. **Research.**—A notable feature of student enrolments in recent years has been the steady increase in the number of higher degree students. It has long been a strong criticism of Australian universities that little provision was made in them for graduate students. Those students who wished to continue beyond their first degree would pursue work for a Master's degree or, more rarely, for a doctorate in tenuous contact with the University staff or would go abroad financed by private means or occasionally by scholarships. Exceptions to this practice were in some science departments which in the 'thirties organized regular fourth year work for a handful of promising graduates.

During the period under review five important factors came into operation which mark the increasing attention paid by universities to research and the training of graduate students.

The first resulted from the Commonwealth Government grant begun in 1936 for the prosecution of research and the training of research workers in Universities on projects that were connected with the Council for Scientific and Industrial Research. The later extension of this grant in 1941 to the Social Sciences gave that field also a welcome stimulus. A great impetus towards research came, secondly, from the work University staffs were called upon to do in the 1939-45 War. This was not confined to the more spectacular services rendered by research workers in Science, Technology and Medicine, but affected also in no small measure the Social Sciences and the Humanities where research into linguistics, teaching methods, psychological testing and social and anthropological problems was pursued at an increased rate. This activity was, in some cases, channelled through newly formed Research Departments. Some of these, such as the Waite Agricultural Research Institute in South Australia, existed before the War, but for the most part they were a development of the post-war period. Notable examples of these pure research schools are the Departments of Experimental Medicine, established in 1944, and Metallurgical Research (1946) in Melbourne. The same trend is shown on a larger scale by the establishment in 1946 of the Australian National University designed specifically for the encouragement of research and the training of graduate students in research. The fourth factor demonstrating an increasing emphasis upon graduate work was the institution in the post-war period of the Ph.D. degree, requiring two years of full-time graduate research. This degree was established in Melbourne (1945), Tasmania (1947), Sydney (1948), Queensland (1949), the New South Wales University of Technology (1949), Adelaide (1950), Western Australia (1950) and the Australian National University (1950). The fifth stimulus to advanced work was the development of four-year honours courses for the degrees of B.A. and B.Sc. Sydney had done this in Science in 1924, and in Arts in 1938, and most of the other universities followed in the post-war period. Almost without exception the additional year's work planned for these honours students includes an examination of the state of current research in the subject and some experience in the use of research techniques.

With the advancing interest in research, the nature of the research work has tended to change. Individual short-term projects undertaken by members of staff because of a special interest and often written up by them in short journal articles still constitute the bulk of the research done. But there appears to be an increasing trend towards long-term and also towards collaborative research.

Greater emphasis upon applied or service research has also become apparent. The problems on which University researchers have recently been working have tended to be those which have arisen from the practical application of their studies to the needs of the community. Attention has also been given more and more to matters characteristically Australian.

5. **Services.**—(i) *General.* The traditional division of the function of Universities into teaching and research seems no longer applicable. A third function has been added

in recent times, that of community service. The University has long been responsible for providing an important service to the community in the form of professional training in many fields and in a number of other intangible ways, but of recent years there has been a noticeable increase in the performance by university departments of direct and deliberate services to the community. This was most apparent in time of war when the Universities whole-heartedly accepted the role given them by the Minister for War Organization of Industry when he said in 1942 to a meeting of the Vice-Chancellors, "the Government requires of the Universities specific services, falling under two heads: (i) investigations and research into particular problems relating to the war effort; (ii) the training of personnel with special qualifications for the armed services, war production and other essential needs". The trend, however, was noticeable before the 1939-45 War and is still continuing. These services, which are of three main kinds, are dealt with hereunder.

(i) *Service Research.* This is a form of applied research in which a University department applies itself to the solution of a problem of immediate practical importance to the community. The development of producer-gas units for use on motor vehicles during the 1939-45 War, research on poliomyelitis, tropical food plants, bovine mastitis, and mosquito control are examples of work of this type recently undertaken in various University departments.

(ii) *Applied Research.* Closely associated with the kind of research just mentioned are the projects which are requested of the University by outside bodies and are usually in the field of applied research. Services of this kind are most frequently rendered by the engineering faculty. Testing work for government departments and private industry is carried out in almost every engineering department. In Melbourne, since 1934, 400 reports on problems associated with ores and concentrates submitted from all over Australia have been issued by the Department of Mining. Research on servomechanisms for the Department of Supply, aerals for the R.A.A.F., the stability of power systems for the Electrical Research Board and studies on the site, materials and design for the Warragamba Dam are some of other tasks that have been undertaken. Services of this kind, however, are by no means confined to the technological field. They have been rendered by almost all University departments and not least by workers in the Social Sciences who have been called upon to investigate matters such as colour-vision tests for the Civil Aviation Department, the teaching of English to foreign-born immigrants and anthropological problems encountered in the administration of New Guinea.

(iii) *Advisory Services.* Consultant and advisory services have come to occupy much of the time of the staff of many departments. There has been a long tradition of service in this field by members of the Departments of Agriculture and Medicine, and almost equally prominent have been the economists whose services were sought by governments and businesses in the depression period of the 1930's. The 1939-45 War saw an increase in demand for expert advice from University faculties and the seconding of personnel to government departments in considerable numbers. In the post-war period much of this demand has continued. Problems of land utilization have called for advice from agriculturalists, geographers and economists. Personnel and training problems in industry have required the services of psychologists and educationists. School broadcasts have been scripted by scientists, and lecturers in English history, modern languages and political science. University physicists, chemists and medical staff have played an important role in recent defence programmes. Developmental schemes have looked for advice to engineers, geologists and architects.

6. *The Commonwealth and the Universities.*—(i) *General.* Commonwealth financial support for university activities may be regarded as developing in three phases. Firstly, in the period up to 1939, Commonwealth interest in research projects carried out by or in collaboration with the Universities led to the granting of increasing sums for this purpose. Secondly, during and after the 1939-45 War the Commonwealth extended assistance to University students, at first with the object of increasing the number of highly qualified

people available for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service of benefit to the community. Thirdly, in 1951, the Commonwealth initiated a policy of making special grants to the States for university purposes.

(ii) *Grants for Research.* The Commonwealth had given some support to research prior to 1926, chiefly through the Institute of Science and Industry, but the amount spent did not exceed £25,000 per annum. The provision of substantial Commonwealth contributions may be said to date from 1926. In that year the Institute was replaced by the Council for Scientific and Industrial Research (known since 1949 as the Commonwealth Scientific and Industrial Research Organization) with an annual appropriation of £250,000. It has ever since worked in close association with the Universities. Both kinds of research, fundamental and applied, have at times occupied the attention of both the Universities and the Commonwealth Scientific and Industrial Research Organization. In general, however, the preliminary training of graduates in research work has been left to the Universities.

In 1936 the Commonwealth Government decided to make a grant of £30,000 per annum for five years to Australian Universities for research in physical and biological sciences. In 1941 this grant was increased to £31,000 per annum for the next five years, and an additional £9,000 per annum was made available for research in Social Sciences. In 1946 the grants were £40,000 and £12,000 respectively. In 1947 the two grants were fused, an amount of £82,000 being provided—£52,000 for training of research workers and £30,000 for specific research projects. The allocations for each of the years 1948 and 1949 were £100,000 and for 1950 £110,000, the additional £10,000 being provided for the New South Wales University of Technology.

In 1951 the grant for research in the physical, biological and social sciences was absorbed in the larger general grant which was then made available by the Commonwealth to the States for Universities.

The research grants mentioned above, together with other Commonwealth payments for research purposes, totalled more than £3½ million in 1950-51, compared with less than £500,000 in 1939-40.

(iii) *Assistance to Students.* (a) *General.* There have been three stages in the provision by the Commonwealth Government of financial assistance to students (other than Commonwealth Reconstruction Training Scheme trainees) attending Universities and other institutions of similar standing.

(b) *Reservation during the 1939-45 War.* To ensure that the flow of trained professional personnel from Universities would be sufficient to meet the needs of the country during the war and post-war periods, the Commonwealth Government in 1942 set up the Universities Commission. This Commission, in co-operation with the Directorate of Manpower, administered a scheme of reservation of University students from the beginning of 1943. All these reserved students were eligible for supplementary assistance, subject to a means test, the maximum living allowance payable being £104 per annum for a student living with his parents, and £143 for a student living away from home.

(c) *The Interim Commonwealth Financial Assistance Scheme.* Financial assistance to students was continued under this Scheme for five years from the end of hostilities. The number of students assisted was fixed on the basis of the number of reserved students in 1945, and a minimum standard was prescribed below which a student would not be eligible for selection. The living allowance was increased by 5s. per week, from 1st July, 1947, and again from 1st January, 1949 to £130 per annum (£169 for a student living away from home). The maximum allowance was then reducible by £4 for every £10 by which the adjusted family income exceeded £150.

(d) *Commonwealth Scholarship Scheme.* This Scheme, which operated from 1st January, 1951, was based on a plan drawn up by the Universities Commission during the period of operation of the Interim Scheme. Under the new Scheme 3,000 scholarships are made available each year to boys and girls who have completed normal secondary courses. The scholarships are allocated to States on a population basis, two per cent. of them being reserved for students over the age of 25 years. The courses available

under the Scholarship Scheme include all first degree courses and certain under-graduate diploma courses at Universities; technical college and school of mines diploma courses at approved standards; and certain other professional courses.

The awards are made entirely on merit and no regard is had to the income of the students or their parents. All scholarship holders have their fees paid. In addition, subject to a means test, they are eligible for a living allowance. The maximum allowance is £169 per annum (£240 10s. for a student living away from home). A mature age scholar who is married may receive, in addition to this personal allowance, £1 11s. per week in respect of his wife, and 9s. per week in respect of the first dependent child under 16 years of age.

In 1951, 10,068 students applied for Commonwealth Scholarships, 7,142 being accepted. This number included 3,610 who had commenced courses before the Scheme came into operation, and 973 who continued from the Interim Scheme.

(e) *Commonwealth Reconstruction Training Scheme.* In addition to the above Schemes for assistance to civilian students, eligible ex-service personnel received training at Universities and similar institutions at Commonwealth expense under the Reconstruction Training Scheme. A general description of the Scheme is to be found on page 240 of Official Year Book No. 39.

A total of 53,466 ex-members of the Services applied to the Universities Commission for assistance under the Scheme, and 24,992 full-time and 19,237 part-time students have been selected for training. By the end of 1951 more than 18,000 of these had successfully completed their courses and only 4,662 remained in training.

In connexion with this Scheme the Commonwealth Government, in agreement with the States, made available to the training institutions concerned finance to the extent of approximately £1 million for buildings and £500,000 for equipment, and also paid all tuition fees and subsidies designed to meet the cost to the Universities of the Reconstruction Trainees.

(iv) *Direct Grants for General Purposes.* The Commonwealth Government in 1950, with the consent of the States, appointed a committee of inquiry with the following terms of reference:—“(1) To examine and report upon the finances of the Universities having regard to their facilities for teaching and research including staff, buildings and equipment; (2) To examine and report upon the requirements of Universities in relation to the work at present undertaken and to the need for their future development; and (3) To make recommendations as to whether any, and, if so, what, action should be taken.” Following a report submitted by that committee and with the agreement of the States, the States Grants (Universities) Act, No. 81 of 1951, was passed by the Commonwealth Parliament, enabling grants to be made to the States for their Universities.

The following grants were payable to the States for University purposes and for current expenditure only: (a) A special grant covering the six months' period ending 31st December, 1950 (payable to all States participating in the scheme); (b) A basic grant in each of the years 1951, 1952 and 1953 payable on condition that, for the University concerned, the total of State grants and fees received by the University in the year in question was at least equal to a stipulated “qualifying amount”; (c) An additional grant up to a stated maximum in each of the years 1951, 1952 and 1953 payable at the rate of £1 for every £3 by which, for the University concerned, the total of State grants and fees received by the University in that year exceeded the “qualifying amount”.

In each of the years 1951, 1952 and 1953 a further grant was also payable to the States to be applied towards the teaching and administrative costs of residential colleges, provided that the University concerned qualified for the basic grant referred to in (b) above. The following table indicates the size of the various Commonwealth grants for which the Universities could qualify.

## COMMONWEALTH GRANTS TO THE STATES FOR UNIVERSITY PURPOSES, 1951 TO 1953.

(£.)

University or College.	Special Grant for Six Months ended 31st December, 1950.	Basic Grant for each of the years 1951, 1952 and 1953.	"Qualifying Amount" of State Grants and Fees Necessary to Qualify for Basic Grant.	Second Level Grant for each of the years 1951, 1952 and 1953.	Annual Grant for Residential Colleges (Included in Basic Grant).

(a) Adjustment made for students enrolled for more than one course. (b) Includes 10 students enrolled but attending Canberra University College.

Of the total students in 1952, 23,798 were males and 5,843 females. Included in those enrolled for degrees were 96 enrolled for higher degree courses in Sydney, 201 in Melbourne, 57 in Queensland, 156 in Adelaide, 52 in Western Australia, 17 in Tasmania, 89 at the New South Wales University of Technology, and 13 at the Canberra University College.

(ii) *Commonwealth Reconstruction Training Scheme Students.* The number of Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities and University Colleges during 1950 to 1952 is shown in the following table:—

**UNIVERSITIES : COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1952.**

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total.(a)
		Post-Graduate.	Sub-Graduate.

1951 .. .. .	3,691	71	588	161	152	4,662
1950 .. .. .	5,941	129	643	265	259	7,236

(a) Adjustment made for students enrolled for more than one course. (b) Includes 2 students enrolled but attending Canberra University College.

Of the total Commonwealth Reconstruction Training Scheme students in 1952, 2,287 were males and 29 females. Included in those enrolled for degrees were ten enrolled for higher degrees in Melbourne, one in Queensland, three in Adelaide, four in Western Australia and one at the Canberra University College.

(iii) *New Students Enrolled.* The number of new students, including Commonwealth Reconstruction Training Scheme students, enrolled for courses at the Universities and University Colleges during the years 1950 to 1952 is shown in the following table:—

**UNIVERSITIES : NEW STUDENTS ENROLLED, 1952.**

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total.(a)
		Post-Graduate.	Sub-Graduate.			
Sydney .. .. .	1,939	..	388	..	17	2,326

1951 .. .	5,127	5	1,344	103	1,061	7,601
1950 .. .	5,228	2	806	81	949	7,034

(a) Adjustment made for students enrolled for more than one course.

(b) Includes 2 students enrolled but attending Canberra University College.

Of the total new students enrolled in 1952, 5,607 were males and 1,877 females. Included in those enrolled for degrees were sixteen enrolled for higher degree courses in Melbourne, nine in Queensland, five in Adelaide, two in Western Australia, three in Tasmania, 59 at the New South Wales University of Technology and seven at the Canberra University College.

(iv) *New Commonwealth Reconstruction Training Scheme Students.* The number of new Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities and University Colleges during the years 1950 to 1952 is shown in the following table:—

**UNIVERSITIES : NEW COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1952.**

University or College.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total.
		Post-Graduate.	Sub-Graduate.

1951 .. .	129	..	35	9	12	185
1950 .. .	341	..	87	3	43	474

Of the 61 new Commonwealth Reconstruction Training Scheme students 60 were males, including one male enrolled at the Canberra University College for a higher degree.

9. **University Receipts (or Income).**—The receipts (or income) of the Universities and University Colleges are derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations, etc. From all sources other than new bequests the receipts during 1950 and 1951 for general university functions were as shown in the table below. In South Australia, Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute.

UNIVERSITIES : RECEIPTS (OR INCOME), GENERAL ACTIVITIES, 1951.  
(£.)

University or College.	Government Grants.(a)	Students' Fees.	Interest, Rent Dividends and Donations.	Other.	Total.
Sydney .. .. .	698,058	406,692	46,057	22,590	1,173,397
Melbourne .. .. .	832,197	259,663	60,025	44,753	1,196,638
Queensland (Brisbane) .. .. .	435,877	126,726	14,786	19,031	596,420

New England University College (Armidale, N.S.W.) .. .. .	124,917	5,331	246	21,178	151,672
Canberra University College .. .. .	49,934	4,877	77	498	55,386
Total 1951 .. .. .	3,539,109	918,863	172,680	155,247	4,785,899
1950 .. .. .	1,967,625	696,546	144,923	135,356	2,944,450

(a) Includes income in respect of previous years.

The figures in the foregoing table do not include the value of new foundations received by the Universities, which, in 1951, were as follows:—Sydney, £52,894; Melbourne, £56,741; Queensland, £7,148; Adelaide, £57,651; Tasmania, £60,751; New South Wales University of Technology, £192,231; and New England University College, £21,488.

10. **Principal University Benefactions.**—In previous issues of the Official Year Book information is given in some detail in regard to the extent to which the Universities have benefited from private munificence. Space will permit of reference herein to the more important benefactions only.

The endowments to the Sydney University include the Challis Fund, £374,680; the G. H. Bosch Fund, £268,929; the P. N. Russell Fund, £100,457; the Oswald Watt Fund, £115,744; and the Fisher Estate, £43,386. In addition, the University receives a large annual revenue from the trustees of the McCaughey bequest. Excluding the principal of the latter, the credit balances of the private foundations amounted to £1,884,240 at 31st December, 1952.

The main benefactors to the Melbourne University for the endowment of trust funds or for the erection of buildings have been: Mr. Sidney Myer, £60,000; The Supreme Court Library Fund, £55,000; late Dr. F. Haley, £51,798; late Miss Helen Mackie, £50,000; Sir Russell Grimwade, £50,000; late Mr. E. E. Truby Williams, £48,137; late Sir Samuel Gillott, £38,569; W. L. Ballieu Trust, £30,322, (income of £20,444 has also been received, the total receipts are expected to be about £100,000); late Sir Samuel Wilson, £30,000; Mr. R. B. Ritchie, £30,000; The Melbourne Herald and Weekly Times Ltd., £30,000; Messrs. N., M. H., and M. L. Ballieu, £30,000; an anonymous donor, £30,000; late Sir John Higgins, £25,910; late Dr. James Stewart, £25,624; late Mr. W. P. Greene, £25,308; late Dr. Georgina Sweet, £22,500; late Mr. C. D. Lloyd, £22,407; late Miss Mary A. M. Lockie, £22,500, (the receipts are expected to reach £75,000); late Hon. Francis Ormond, £20,000; Edward Wilson (the Argus) Trust, £20,000; late Sir Thomas Lyle, £20,000; and Nicholas Pty. Ltd., £20,000.

Queensland University to 30th April, 1953 had received £289,411 from the McCaughey estate and £50,210 from the Walter and Eliza Hall Trust, while the Hon. T. C. Beirne gave £20,000 in 1935 for the endowment of a Chair of Law in Queensland. The permanent site for the University and other land valued at £62,000 were presented by Dr. and Miss Mayne. In 1937 the trustees of Mr. W. Robertson donated £19,400 for the Chair of Agriculture.

The chief benefactors to the Adelaide University have been Sir George Murray, and his sister Miss M. T. Murray, £134,000; Mr. Peter Waite and his daughter, Elizabeth Macmeikan, £120,000; Sir Thomas Elder, £100,000; Sir Langdon Bonython, £72,000; Mrs. R. F. Mortlock and her son, Mr. J. T. Mortlock, £71,600; Dr. F. Lucas Benham, £51,000; Mr. T. E. Barr Smith, £44,000; Mr. Hugh Hughes, £35,000; Mrs. A. M. Simpson and Miss A. F. Keith Sheridan, £31,000; Mrs. Jane Marks, £30,000; The Broken Hill Proprietary Co. Ltd., £30,000; Mr. Edward Neale, £28,000; family of Mr. John Darling, £25,000; Sir William Mitchell, £25,000; Sir Walter Hughes, £20,000; and Mr. R. Barr Smith and family, £20,000.

Under the will of Sir Winthrop Hackett the University of Western Australia received £425,000 for the erection and maintenance of University buildings and for studentships, scholarships, bursaries and other financial help for deserving students. In addition, an endowment of £18,000 was made in 1913 for the Hackett Chair of Agriculture. The late Robert Gledden bequeathed an estate valued at £60,000, particularly to provide travelling scholarships, and numbers of bequests, aggregating about £55,000, have been made to the University, mainly for the establishment of a medical school or research in connexion therewith.

The Tasmanian University in 1951 received a donation of £50,000 from the Electrolytic Zinc Co. of Australasia Ltd. and £10,000 from an anonymous donor towards the cost of erection of a Hall of Residence for students.

11. **University Payments (or Expenditure).**—The principal item of disbursements under the general University activities consists of the maintenance of the teaching and research staff, representing 67.4 per cent. of the total in 1951 compared with 69.4 per cent. in 1950.

The following table shows the payments (or expenditure) excluding capital expenditure on buildings, during the years 1950 and 1951:—

**UNIVERSITIES : PAYMENTS (OR EXPENDITURE), GENERAL ACTIVITIES, 1951.**

12. **Extra-University Activities.**—(i) *General.* The tables shown in paragraphs 9 and 11 relate to the general University activities while those following show the financial position of all extra-University activities. The heterogeneous character of the items in

the statements for these activities varies to such extent between the Universities and University Colleges that comparisons of the totals are misleading, but they include all items excluded from the general statement and give useful information within limits.

(ii) *Receipts (or Income), Extra-University Activities.* The following table shows the main receipts (or income) for the years 1950 and 1951 :—

### § 9. Further Education.

1. *General.*—Beyond the schools, colleges and universities there are agencies engaged in less direct educational work which cannot be readily assessed and described. Among them are the mass media of communications (press, film and radio) which are powerful educational forces—whether they are used specifically to disseminate information such as new agricultural techniques or preventive health measures, or on the other hand in a much more general way exert a powerful influence on the cultural level of the population. There are also bodies such as Adult Education Authorities, Libraries, Art Galleries and Museums which aim at catering for the educational requirements of particular groups.

2. *Adult Education.*—(i) *New South Wales.* University Department of Tutorial Classes. In 1914 the University Senate established a Department of Tutorial Classes to provide classes and study groups along the lines of similar work in England. The Department is supervised by a Joint Committee of the Senate, on which representation is provided for the Workers' Educational Association, and the Secretary of which is the Director of Tutorial Classes.

The Department has, in addition to the Director, a full-time academic staff of nine, and administrative and typing staff. It has establishments at Newcastle and Armidale as well as Sydney. Its work consists of the following :—

(a) *Tutorial Classes.* Each year the Department conducts tutorial classes in a variety of subjects, grouped under the broad headings of Social, Political and Economic Studies; History and International Affairs; Psychology; Philosophy; Literature and Drama; Foreign Languages; Child Study; Music and Art. Most of the classes in these subjects are organized by the Workers' Educational Association, and the Department supplies tutors from its full-time and part-time staff. In New England, however, the Department organizes its own classes. Courses range from 9 to 28 lectures, and some go on from first to second and sometimes fourth year. In 1952 the Department conducted 129 classes with a total enrolment of 3,581.

- (b) *Discussion Groups*. Since 1938 the Department has conducted a Discussion Group scheme, designed to provide country people in particular with opportunities for group study of the same type of subjects as are studied in its tutorial classes. Groups of five or more people are formed to discuss written lectures with the help of a corresponding tutor. In 1952, 120 groups were operating, taking in all 181 courses. Total enrolments were 1,950. This compares with nine groups and 114 enrolments in this scheme's first year of operation, 1938.
- (c) "*Kits*". In 1946, the Department embarked on a new venture for groups of people who were interested in activities such as play reading and performance, writing, public speaking, painting and music-making, rather than discussion. A number of "*Kits*" has been devised to provide programmes for such activities. In 1946, 16 groups were formed with a total enrolment of 179; by 1952 these figures had grown to 57 groups and 759 enrolments.

It will thus be seen that the Department enrolled 6,290 students for continuous work in classes and groups in 1952.

- (d) *Current Affairs Bulletin*. In November, 1951 the Senate of the University arranged for the Department to take over the fortnightly bulletin from the Commonwealth Office of Education as from the beginning of 1952. A Commonwealth Government grant was made available to assist in meeting costs of publication. Commencing publication in 1942 for the Services, this periodical was re-started as a Service and civilian bulletin in 1947 by the Commonwealth Office of Education, edited from the Department of Tutorial Classes. Twenty-five issues were published in 1952, and just over one million copies were distributed to educational bodies, groups, business organizations and individual subscribers in Australia and overseas.

Finance for the Department's activities comes from a University appropriation (£14,100 in 1952); from the Adult Education Expansion Grant, distributed on the advice of the Adult Education Advisory Board by the New South Wales Government (the Department's share in 1952 being £18,490); and, to a small extent, from Discussion and Kit Group fees. Half the fees for the Department's tutorial classes, except in New England, are allotted to the Workers' Educational Association for organizing purposes.

A library service is provided to all students in classes and groups by the Adult Education Section of the Public Library of New South Wales, a special section which is financed from the Adult Education Expansion Grant.

(ii) *Victoria*. The Council for Adult Education is a statutory body, with a basic annual grant of £25,000. Its expenditure was £74,000 in 1952-53. The Council organizes evening classes, summer and week-end schools, public lectures, sends drama and music to the country-centres through its Travelling Theatre and Music Tours, co-operates with the National Gallery of Victoria in the organization of a Travelling Art Exhibition, operates an extensive system of discussion groups in Victoria and provides service for country dramatic and music societies.

(iii) *Queensland*. The Adult Education service in Queensland has continued to expand. In 1952 a total of 140,709 attendances was recorded at 4,567 meetings held in Brisbane and 125 country centres. Students attending regular courses included 2,800 at the Brisbane centre and approximately 11,000 in the country. Subjects most in demand were English Literature, English Expression, Psychology, Appreciation of Music and Art, Home Handicrafts and Photography. In smaller centres study circles and groups have been formed. There were 127 of these operating in 1952, and many were regularly visited by members of the permanent staff located in five country towns.

The full cost of Adult Education is borne by the State and admission to all courses is free. The expenditure for the year 1951-52 was £31,468.

(iv) *South Australia.* Since 1917 the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided each year in the metropolitan area series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest, for people who have no intention of proceeding to a degree or diploma and are unable to attend the ordinary University courses. The fee is £1 15s. a course and is paid to the Workers' Educational Association, which accepts the responsibility of organizing the classes. The enrolment for these classes in 1953 was 1,238. The Joint Committee extends its activities into the larger country centres by sending art exhibitions and plays on tour, lending boxes of books and arranging lectures and film screenings.

(v) *Western Australia.* In Western Australia the Extension Services of the University are handled by the Adult Education Board, the staff of which consists of a part-time Director and eleven full-time officers.

The objective and the revised policy of the Board in recent years has been defined in the following terms:—"To provide men and women of varying educational attainments in country districts as well as in the metropolitan area with facilities for the constructive use of leisure by use of head or hands and in such a way as to stimulate in the individual a sense of citizenship and to encourage community activities among groups".

Examples of the application of this policy in 1952 and preceding years include:—

*Music, Drama, Films and Ballet.* Artists of outstanding quality are being presented to the metropolitan public in programmes of a classical nature. A notable feature of the work of the Board was the sponsorship of foreign films in the open-air theatre at the university during the summer months, and in a city theatre during the winter. Total attendances at the Board's activities of this nature in metropolitan centres were 32,109.

*Country Drama and Ballet.* The year 1952 has seen a consolidation of the work done in previous years by the Board. The addition of a tutor-organizer to the staff enabled it to extend its activities and give more attention to the demands of the various local repertory clubs. Dramatic and ballet companies have frequently visited country towns, with total attendances of 15,082.

*Summer School.* In 1952 Summer School attracted 282 men and women of whom 115 were in residence. A series of open-air symphony concerts took place in the Somerville Auditorium, as well as screenings of foreign films, while in the Sunken Garden and Somerville Auditorium open-air dramatic productions took place.

*Metropolitan Lecture Classes.* Two series of Metropolitan Lecture Classes, each of ten meetings, are conducted each year. The average annual attendance at these classes totalled 800 in post-war years. With a few suburban exceptions, classes are held in the Adult Education rooms in Perth. The scheme was extended to Fremantle in September, 1951.

*Box Discussion Group Scheme.* The pre-war Box Discussion Group, which has been functioning in very reduced form in post-war years, is being revised and extended for use in country districts in 1953.

(vi) *Tasmania.* Although Tasmania was the last of the Australian States to set up a State Adult Education Organization, some form of Adult Education has existed since the formation in 1913 of a Workers' Education Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the University, which had a Director of Tutorial Classes. Later, the grant

was paid direct to the Association by the Government and the University's Tutorial Department ceased to exist. In 1948 the Adult Education Act was passed providing for the formation of an Adult Education Board whose functions are to plan and develop adult education in Tasmania and to assist other bodies actively engaged in adult education. The definition of Adult Education under the Act is very wide—"cultural or educational pursuits and the encouragement of the arts and sciences".

The executive officer of the Board is the Director of Adult Education, at Hobart, under whose direction three Regional Officers organize Adult Education in areas each covering approximately one-third of the State, and a fourth is organizer for Hobart. Each Regional Officer is responsible, under general direction, for the development of adult education within his region. The system is efficient provided there is constant co-ordination by the Director. In larger centres the Board sets up classes of its own and enrolls students. In smaller centres it encourages voluntary groups to organize themselves, and provides them with study material or instructors. Frequently these groups are formed within existing organizations, such as the Country Women's Association. In several centres Committees have been formed. These occupy themselves with local arrangements and advise Regional Officers of their needs.

Regional Officers circulate among groups and classes and visit each as often as possible. Such visits are very important in maintaining group keenness, but as numbers increase, each officer finds the task increasingly difficult. They report their needs for tutors and instructors, and these are engaged on part-time instruction. The Board also brings to Tasmania as many musicians, actors, and other artists as it can afford to guarantee. Local Arts Committees have been formed in many centres to help the Board with local arrangements. In several cases these committees have developed further into nuclei of Community Centres, with plans to raise funds and erect buildings for community culture and recreation. A sub-committee of the Board, with a panel of architects, town-planners, health and legal experts, gives advice on long-range planning of Community Centres, and their design. The W.E.A. remains one of the voluntary organizations through which the Board will work, and the Board assists it by paying fees to its tutors, and rent of premises.

A link has been made between the University and the Board by the setting up of a Joint Committee to plan courses of serious study of a more academic nature. These are tutorial classes and are confined mostly to the cities.

In 1952 there were 167 courses in all subjects, with nearly 2,000 enrolled students. The State Government grant in 1952-53 was £20,000. Subjects most in demand are women's crafts such as dressmaking, then, in descending order of interest, drama, arts and crafts, public speaking, useful hobbies like photography, languages, psychology, science like marine biology, world affairs, economics, academic subjects.

**3. Workers' Educational Associations.**—In 1913, Workers' Educational Associations were formed in all the States of Australia, and later in New Zealand. The movement has for its object the bringing of the University into closer relationship with the masses of the people, and providing for the higher education of the workers in civic and cultural subjects.

In Victoria the Association has been superseded by the Council for Adult Education, a statutory body appointed by the Government. A Statutory Board has also been appointed in Queensland. Direct grants are made by the Governments of New South Wales and South Australia. Grants in 1952, for classes and discussion groups organized by the Association and serviced by their respective State Universities in these two States, were as follows:—New South Wales, £32,590, 110 tutorial classes, 120 discussion groups (taking 181 separate courses) and 57 Kit groups; South Australia, £5,000, 34 tutorial classes and extension lectures at country centres.

Grants from fees from the Tutorial Classes amounting to £10,850 were made to the Association in New South Wales for both organizing work and a teaching service. The teaching service in 1952 included 25 classes, 5 summer schools (two each of 10 days, one of 7 days, and 2 of 5 days), 24 week-end schools, 37 public lectures (mainly in short courses of 3 lectures), 63 lectures to various organizations, and 35 broadcast talks. In South Australia the Association receives a grant of £812 for general organizing purposes.

In Tasmania the Association received a grant of £1,000 from the Adult Education Board and 108 lectures were organized in 1952, mostly in short series from 3 to 12. The Association's primary interest has been in subjects related to social change such as Industrial History, Economics, Political Science and Sociology. In recent years, however, there has been a substantial increase in the number of classes studying Psychology, History, Literature, Music, Drama and Popular Science.

4. **The New Education Fellowship.**—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State.

One of its principal functions is the organization of periodic conferences, to which leading oversea educators are invited. Sessions are usually held in each of the capitals and in various country centres, thus enabling oversea leaders of educational thought to influence considerable numbers of Australian teachers and others. Conferences of this type were held in 1937, 1946, 1949 and 1951.

## § 10. Libraries.

1. **General.**—The Munn-Pitt Report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries in all States, all of which have now passed legislation to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, its functions now including the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the National Library, Canberra, and the Public Libraries at Sydney and Melbourne.

2. **Commonwealth.**—(i) *Commonwealth National Library.* This library was created as the Commonwealth Parliamentary Library in 1901. The library of Congress was chosen in 1903 as the model upon which its collections and services should be developed and it has therefore assembled a great reference collection with special emphasis on Australian material and rendering services on a national basis.

While the provision of a reference service to members of Parliament and to Government Departments remains a primary responsibility, the National Library now offers research facilities to University institutions in the Australian Capital Territory and to students of Australian history and affairs, publishes basic bibliographies in the field of Australiana and serves as a free public library for residents of the Australian Capital Territory.

In 1952 it contained about 400,000 volumes, together with many tens of thousands of pamphlets, pictures, prints, maps, manuscripts and historical objects, scores of thousands of feet of microfilm, about two and a half million feet of moving picture films and 100,000 cubic feet of archives. It is particularly strong in the social sciences, in its holdings of Government publications, Australiana, and material relating to countries of the Pacific and adjacent regions.

The rapid growth of its Australiana, strengthened by the acquisition of the Petherick collection of 16,500 items in 1911, and the notable collection of Cook manuscripts in 1923, caused the Library Committee in the latter year to adopt the title of "Commonwealth National Library".

It has been enriched by several important gifts, notably the Gregory Mathews collection on Australian Ornithology in 1940, and the Ferguson collection of books, manuscripts and pictures relating to Australia and the South Seas in 1946. The great pictorial collection of Rex Nan Kivell in the same field was received on indefinite loan in 1947.

The National Library's activity in the field of Australiana was substantially advanced when, following the posting of a Liaison Officer to London in 1944, arrangements were concluded to microfilm, in association with the Public Library of New South Wales, original records relating to Australia in the Public Record Office and elsewhere. Acquisition of these microfilms will permit resumption at a later date of the *Historical Records of Australia* of which 34 volumes had been published by 1926.

The operation of the Commonwealth Publications Exchange Agency, established in 1947, brings substantial sets of official publications of oversea countries as well as those of research institutions and learned societies throughout the world. Under the Copyright Act 1912 the publisher of every book, pamphlet, etc., printed in Australia is required to deposit a copy in the Library.

In 1945, following the death of President Roosevelt, the Government established, as its memorial to him, a Roosevelt wing in the Library, housing a comprehensive and growing collection of material illustrating the growth and activity of the American people.

Following the appointment of the War Archives Committee in 1942, the National Library became an Archival Authority for the war-time records of all Commonwealth Departments and agencies other than the Service Departments, the latter being entrusted to the Australian War Memorial. In 1947 the activity was extended to cover all records created since 1901, and in 1952 the National Library became the authority for all Departments. Repositories have been established in Canberra, Melbourne, Sydney, Brisbane and Adelaide, and to date over 1,000,000 cubic feet of records have been surveyed, of which about 100,000 cubic feet of records have been transferred to the custody of the Library.

Following the establishment of the Australian National Film Board in 1945, the Library's existing activity in the collection of Australian historical films was expanded into a central library of documentary and educational films and made the non-theatrical distributing agency in Australia for the Board, on which the Library has been represented since its creation. Films are loaned direct to organizations in Commonwealth Territories and to Commonwealth Departments and agencies, and to State Education Departments and State film centres to supplement their individual resources. An information service is given on new and unusual films, and exchanges are conducted with a number of oversea governments. The film collection contains about 4,000 titles, together with Australian historical films and a great number of film strips.

Training in librarianship for Commonwealth Government Departments and for students from the States has been a function since 1938. A post-graduate library school is conducted in which students are prepared for the examinations of the Library Association of Australia.

The National Library is also responsible for providing and servicing the Australian reference libraries at all Commonwealth Government establishments overseas. These now number 36, those in London and New York being major collections under the direct control of officers of the National Library. The services to Commonwealth Territories began in 1936, when, with the assistance of a Carnegie grant of 7,500 dollars, free library services were established in association with the local Administrations. All of these were interrupted by the 1939-45 War, but have since been re-established on an extended basis in Papua-New Guinea and in the Northern Territory, as well as in Norfolk Island and Nauru. The National Library selects, purchases and catalogues the major part of the book stocks, assists in meeting reference needs, and provides from its staff the Chief Librarian in the Northern Territory. In Papua-New Guinea the central library is at Port Moresby, with regional libraries at Rabaul, Lae and Samarai, and several small branches. Parcels of books, carried free by the postal service, are sent to remote areas.

Since the transfer of the seat of Government to Canberra in 1927, the National Library has been accommodated in more than one building in Canberra. Plans are being drawn for further building on its permanent site to enable a consolidation of its collections and services.

A union catalogue of serials in the social sciences held by Australian libraries has been compiled and the following publications issued:—Historical Records of Australia—34 volumes, 12s. 6d. per volume (publication temporarily suspended in 1926); Parliamentary Handbook and record of elections—eleven issues, 10s. 6d. per volume; Annual Catalogue of Australian Publications—No. 1, 1936 to date, 2s. per volume; Books published in Australia, a list of books supplied under copyright—January–March, 1946 to date (monthly); Select List of Representative Works dealing with Australia (reprinted from the Official Year Book)—1933 to 1948 (annual); Australian Books (supersedes Select List)—1949 to date (annual); Australian Public Affairs Information Service (subject index to current literature)—July, 1945 to date (monthly); Catalogue of 16mm. films—1950, and supplements 1951 and 1952, 10s.

(ii) *Patent Office Library.* The library of the Commonwealth Patent Office, Canberra, contains over 56,000 volumes. Patent specifications of inventions are received from the principal countries of the world, and a wide range of technical literature and periodicals is available.

(iii) *The Australian War Memorial Library.* In the War Memorial library are housed the documentary and pictorial records of Australia's fighting Services, collected during and after both world wars. This mass of material is constantly being augmented by the addition of books, periodicals and other records covering contemporary trends and events in the field of military history and science, as well as records of earlier wars in which Australian troops participated.

The printed records section contains approximately 50,000 volumes, a large collection of military maps, newsclippings and newspapers, sound recordings of war leaders and personalities, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody.

Written records comprise correspondence files of head-quarters and units of both world wars, and the original war diaries compiled from day to day by each unit during its existence.

The collection of official war photographs covering 1914–18 and 1939–45 Wars numbers over 250,000, and a similar collection of official motion picture film depicting Australia at war totals about 4 million feet.

Facilities for public research are not yet fully developed, but all requests for information are met where practicable.

(iv) *Other Departmental Libraries.* The following Commonwealth authorities in Canberra have specialized collections in their own fields, and in addition draw largely on the National Library:—Attorney-General's Department, Commonwealth Bureau of Census and Statistics, Commonwealth Forestry and Timber Bureau, Department of Commerce and Agriculture, Department of External Affairs, Department of Territories, Department of Health, Department of National Development, Commonwealth Public Service Board, Department of Trade and Customs, Department of Works and Housing, and News and Information Bureau of the Department of the Interior.

The Department of Labour and National Service has its main library in Melbourne, and branch libraries in Sydney and Adelaide. Other departmental libraries in Melbourne are those of the Department of Air, Department of Defence, Department of Social Services and Postmaster-General's Department. The library of the Commonwealth Office of Education was established in Sydney during 1945.

(v) *Commonwealth Scientific and Industrial Research Organization.* The head office in East Melbourne maintains a library covering all branches of science except the medical sciences. In addition, each division and section of the Organization has its own library; together, these form a series of specialist libraries covering such subjects as food preservation, horticulture, fisheries, entomology, botany, agriculture, veterinary science, animal husbandry, building research, dairy products, etc. There are 22 such branches, each with its own staff varying in number from one to sixteen, and also smaller collections

under the care of research officers aided by visiting librarians. Ten of the branches are in Victoria, eight in New South Wales, two in South Australia, and one each in the Australian Capital Territory and Queensland.

The Head Office Library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and smaller union catalogues are being developed among groups of branch libraries with similar interests.

The collections are particularly strong in the publications of oversea scientific and technical research institutions, with many of which exchange relations exist.

The general public may have access to these materials for reference purposes.

3. States.—(i) *Metropolitan Public Libraries.* In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favorably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the Public Library of each capital city at 30th June, 1952 :—

METROPOLITAN PUBLIC LIBRARIES, 30th JUNE, 1952.

City.	Number of Volumes in—			Total.
	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Canberra (a) .. ..	400,000	..	(b)	400,000
Sydney .. ..	(c) 472,426	(d)	134,279	606,705
Melbourne .. ..	600,182	78,720	36,090	714,992
Brisbane .. ..	105,568	..	18,123	123,691
Adelaide .. ..	184,695	31,970	(e) 55,415	272,080
Perth .. ..	189,413	..	2,838	192,251
Hobart .. ..	48,435	26,547	(f) 153,506	228,488

(a) Commonwealth National Library, including Parliamentary Section. (b) Books are lent to libraries or students throughout Australia whenever necessary for research work. (c) Includes 152,609 volumes in the Mitchell Library. (d) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. In 1951, books in this library numbered 122,043. (e) Includes 7,767 volumes in the Children's Branch. (f) Includes 109,116 volumes in the Children's Branch.

(ii) *New South Wales.* The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. The Library Board was fully constituted in 1944, and came into effective operation in September of that year. One hundred and sixteen local authorities have adopted the Library Act and during 1951-52 spent £182,002 on their libraries from rates, as well as £119,000 received in subsidy. There are 107 libraries, containing 690,500 volumes, being operated by 100 councils.

The Joint Coal Board made grants for library purposes to Councils in coal-mining areas, a grant of £5,000 having been made to the City of Greater Wollongong to help establish branch libraries and a mobile library service to mining centres, and a grant of £4,150 to the City of Greater Newcastle to meet part of the cost of establishing a library at Wallsend.

The State Library has been housed since 1942 in a new building, whose reading room provides seating accommodation for 500 persons, and has 50,000 volumes in open access. Within four years, however, the old building had to be reoccupied in part owing to lack of space caused by the Library's extended functions.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central book-buying and master cataloguing service for departmental libraries, and municipal and shire libraries constituted under the 1939 Act.

In 1943 the Banks Memorial Trust was set up to report on the best use of funds which had accumulated since 1905. The government has approved of a memorial at Kurnell, and of the publication of the Banks Papers.

The State Library has undertaken the management of the libraries of the University Tutorial Class and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to Schools of Arts and to individual students. During 1951-52, 103,424 books were lent to small State schools, 43,434 to Schools of Arts and small country libraries, 306 to the Far Western Division, and Special Loans lent for extended periods to shire and municipal libraries and to Lord Howe Island, while 25,019 reference works were lent to individual country students.

The Mitchell Library in Sydney of more than 60,000 volumes and pamphlets, and 300 paintings, principally relating to Australasia and the Southern Pacific, and valued at £100,000, was bequeathed to the trustees of the Public Library in 1905 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testator stipulated that the regulations of the British Museum were to be adopted as far as possible, hence the library is the resort of specialists. There are now 152,609 volumes in the library, in addition to valuable manuscripts, collections of Australian postage and fiscal stamps, and various pictures, coins, etc.

In Newcastle, Dr. Roland Pope has given his collection, worth £10,000, which is being housed temporarily at the School of Arts.

Other important libraries in New South Wales are the Australian Museum, 33,363 volumes; Teachers' Colleges, 123,192; Technical Education Branch, 78,484; Public Schools, 1,104,899; Railways Institute, 140,619; Road Transport and Tramways Institute, 47,777; Cooper Library of the New South Wales Public School Teachers' Federation, 17,467; and the Library at the National Herbarium, 10,000 volumes. At 30th June, 1952 the Parliamentary Library contained 107,838 volumes.

(iii) *Victoria.* Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria except from the State Public Library and one or two Metropolitan Municipal Libraries were those offered by about 200 out-moded Mechanics' Institute Libraries situated in country areas all over the State.

The Board's policy has been to substitute for these inadequate services an efficient system of adequately stocked, modern public libraries controlled by local Municipal Councils and subsidized by the Board.

Since the Board's inception 56 municipalities, comprising 934,000 of the State's population, have established libraries. Of these, 15 are in the city, serving 616,000 people, and 41 in the country, serving 318,000 people.

The amount of £96,000 was paid to the Councils in library subsidy for the year 1952-53 and a total of £173,435 was expended in Municipal Library Service for the same year. Since 1947-48, £334,000 has been expended by the Board as library subsidy.

There are 435,745 books available to the communities in which libraries are established and combined circulation figures were 2,794,600 as at 30th September, 1952.

(iv) *Queensland.* Prior to 1945 Queensland's library needs were met by the State Public Library, established in 1902 and administered by the Chief Secretary's Department, and by Schools of Arts or similar libraries in metropolitan and country districts supported by members' subscriptions. The Libraries Act 1943 constituted a Library Board "to attain efficient co-ordination and improvement of the library facilities of the State with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally throughout the State".

The control and management of the Public Library has been entrusted to the Board, which had built up the book collection to 123,691 volumes in 1951-52. The Libraries Act Amendment Act of 1949 provides for the deposit in the Public Library of a copy of all books, pamphlets, maps and other printed material published in Queensland.

By means of subsidy to local bodies the Board, as in previous years, endeavoured to encourage the establishment of new library services and the extension of existing facilities.

During the year 1951-52 the Board granted subsidy on the following basis:—  
(a) Books—50 per cent. of the amount spent in the purchase of books; (b) 50 per cent. of the cost of library accommodation and equipment with an upper limit of £2,000 in respect of accommodation.

The Act empowers local authorities to establish library facilities. In 1952, 23 local authorities were conducting library services, several others have indicated that they will do so in the near future.

The Brisbane City Council has established seven libraries, of which five have separate children's collections, and hopes to increase the number to 28. The number of local bodies subsidized was 88 in 1951-52. The Board's policy is to subsidize not more than one local body in any area in providing library facilities.

A country extension service for people residing outside the metropolitan area is now operating on a limited scale. Its book collection numbered 18,117 in 1951-52.

The Oxley Memorial Library was established under the terms of a Declaration of Trust dated 26th August, 1926. Its object is the promotion of the study of Australian literature, literature relating to Australia and Queensland historical material. The library, housed in the Public Library since 1934, remained under separate administration until 1946, when its assets were transferred to the Library Board. Since that date it has been administered as a department of the Public Library, and the collection kept segregated. It is governed by a committee which has advisory powers only. During the year 1951-52 its holdings in volumes increased from 15,872 to 16,272. A valuable addition in 1950 was the L'Estrange collection of Queensland stamps.

The library of the Parliament of Queensland was established in 1860. It contained in 1952 approximately 80,000 volumes, consisting of official publications and books devoted largely to history and the social sciences. The cataloguing and reclassification of the library commenced in 1948. An amendment to the Act in 1949 entitles the library to a copy of every book published in Queensland.

(v) *South Australia.* Following the Price Report of 1937, which stressed the need for a free lending service for metropolitan and country readers, and suggested the establishment of a State Libraries Board, the Public Library of South Australia was separated from the Museum and Art Gallery early in 1940 and became a government department, administered by a Principal Librarian and a Libraries Board.

In the Reference department there are about 187,000 volumes and seating for 300 readers. Most of the books may be borrowed, and about 35,000 volumes are lent every year. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia.

The library of the Parliament of South Australia contains 65,000 volumes.

The Adelaide Lending department, which lends books to persons living in the metropolitan area, has 32,000 books, 27,000 registered borrowers, and an annual book issue of 262,000 volumes.

In the Country Lending Service there are 48,000 volumes, of which about half are suitable for children. In 1951-52 this service sent out 48,000 volumes to adults and 91,000 to children, including 21,000 volumes lent to schools.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The Institutes Association in 1952 comprised 250 suburban and country libraries with 766,004 volumes.

(vi) *Western Australia.* At the end of 1951 the Library Board of Western Australia Act was passed. The Board, now appointed, consists of 13 members whose functions are to advise the Minister on matters of general policy, to approve of libraries to be registered as free libraries and to provide for their control, and to control and manage libraries and services and the training of librarians.

In 1945 an Archives Branch was established at the Public Library as a repository for the non-current records of the Government and other historical material relating to Western Australia, including the collection of the Western Australia Historical Society.

An Adult Education Library of 12,000 volumes of general reading and fiction provides for readers in metropolitan and country areas. The library is conducted by the Adult Education Board and requires no deposit from its readers. The Board pays outward freight for country readers.

(vii) *Tasmania.* Library service in Tasmania has expanded rapidly during the past few years. Under the Libraries Act 1943 the Tasmanian Library Board was constituted, and the State Library of Tasmania was established on 1st January, 1944. The Board, in addition to administering the State Library headquarters in Hobart, is responsible for the extension of library services throughout the State and for the control of State aid. Municipalities adopting the Act spend the proceeds of local rates on library premises, salaries and maintenance, and books for permanent retention. State aid is provided in the form of books of a value equal to the amount collected in rates, which are exchanged at intervals. In Launceston State aid is given in cash. In 1951-52 the Launceston City Council contributed £4,392, and £5,119 was received in State aid. During the year, book issues increased from 300,238 to 314,639.

Of the 49 municipalities in the State, 34 have adopted the Act and seven libraries have been established with the support of the Hydro-Electric Commission.

The State Library provides lending and reference services for the people of Hobart and operates a reference service for people throughout the State. In addition, it conducts screenings of documentary films, recitals of recorded music, summer schools, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session, and undertakes to catalogue all new books added to the library as well as supplying recreational reading.

4. *University Libraries.*—The libraries of the Australian Universities provide material not only for the education of graduates and undergraduates, but also for scholars, research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the Library of the University of Sydney is the fourth library in Australia, and the Libraries of the Universities of Melbourne and Adelaide are respectively seventh and eighth. The following table shows the sizes and rates of growth and expenditure of the Australian university libraries; it is impossible to give borrowing statistics, as they differ too widely to be comparable without much explanation.

## UNIVERSITY LIBRARIES, 1952.

University or College.	Volumes.	Accessions during year.	Expenditure.
	No.	No.	£
Sydney .. .. .	343,000	9,351	42,951
Melbourne .. .. .	184,447	9,403	53,162
Queensland .. .. .	108,141	5,767	25,794
Adelaide .. .. .	178,927	8,051	26,527
Western Australia .. .. .	109,167	6,441	18,374
Tasmania .. .. .	79,700	2,682	16,221
New South Wales University of Technology	31,940	3,940	28,660
New England University College .. .. .	22,881	1,999	7,588
Canberra University College .. .. .	13,177	1,887	5,170

The first books were bought for the Library of the University of Sydney as early as 1851; only since 1910, however, has it possessed a building of its own. It is named after the principal benefactor, Thomas Fisher, who bequeathed to it in 1885 the sum of £30,000. It contains an up-to-date bookstack of glass and steel and a fine reading room in which, since the beginning of 1941, about 18,000 volumes of the collection have been made available on open access shelves. In addition, members of the teaching staff and certain classes of undergraduates are admitted to the bookstacks; all readers are encouraged to borrow freely. The Library possesses a large number of periodicals, especially scientific, valuable collections of seventeenth-century pamphlets and Elizabethan translations from the classics, and an extensive collection of Australian literature. Besides medical and law branches, there are a number of departmental libraries.

Early in 1854 the University of Melbourne made its first allocation for books, but the Library was housed in temporary quarters for a number of years. In recent years the university authorities have treated the Library generously, and there have been some welcome benefactions, but accommodation is insufficient and a new library building is a pressing need of the University. The W. L. Baillieu Trust has made available the first instalments of a £100,000 gift for building purposes. All the books are accessible on open shelves, and though the Library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The Library is administered from the centrally situated general library; there is a large medical branch library specially rich in periodicals, and smaller branch libraries in some of the science departments.

The Library of the University of Queensland, founded in 1911, began with £3,000 worth of books, £2,000 having been raised by public subscription and £1,000 granted by the Government. The main library is now in its own building in the new University at St. Lucia.

The Adelaide University Library bears the title of its original benefactor, Robert Barr Smith, who, with members of this family in and after 1892, gave the University about £50,000 for library purposes. Some 20,000 volumes are shelved in the reading room and are available to the ordinary student. Up-to-date steel bookstacks provide accommodation for about 100,000 volumes. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are medical and law departmental libraries. The medical library has on permanent loan the collection of the Institute of Medical and Veterinary Science, and also incorporates the library of the British Medical Association (South Australian Branch).

In the University of Western Australia the first permanent library staff was not appointed until 1927. Provision of permanent library accommodation was not possible when the University moved to its present site, and space and facilities have consequently been inadequate. Extensions to the temporary quarters were made in 1946. The whole collection, consisting of about 109,000 volumes, is accessible on open shelves, and there are several departmental libraries. A special feature is the use made of students' co-operation.

The Library of the University of Tasmania was founded in 1893, but for many years it comprised little more than a collection of text-books. In 1913 a substantial increase of funds was allotted and important gifts were received. In 1919 it was organized for the first time in accordance with modern library practice. A full-time librarian was appointed for the first time at the end of 1945, and the staff has increased from two to ten. The Library is now providing a cataloguing service for the library of the Royal Society of Tasmania.

The New England University College Library was founded in 1938, and bears the name of its first benefactor, Sir William Dixon. At the end of 1952 it contained some 22,880 volumes mainly on open shelves.

The Canberra University College Library was established in 1938. At the end of 1952 it contained 13,177 volumes, which are on open shelves; reference books may be borrowed.

The library of the Australian National University is unique in that it is designed to serve the research staff of a wholly post-graduate institution. It specializes in the fields of the physical and medical sciences, excluding clinical materials. In the social sciences and Pacific studies consideration is given to the holdings of the Commonwealth National Library to avoid unnecessary duplication. The library was established in 1948 and operated in Melbourne until December, 1950, when it was transferred to Canberra. The collection comprises some 70,000 volumes, and in addition a special collection of 25,000 volumes in Oriental languages.

5. *Children's Libraries and School Libraries.*—(i) *General.* A survey conducted early in 1946 revealed that only a small proportion of children was being catered for by adequate library service. The effective use made of the few existing children's libraries is proof that the growing interest in this branch of library work will be well rewarded.

(ii) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. Three formerly independent children's libraries at Mosman, Wollongong and Moss Vale are now departments of municipal and shire libraries and have greatly increased budgets.

From 1937-38, school library work has been fostered by the State Library in co-operation with the Education Department. A "Model School Library" was established, and vacation classes for teacher librarians are held. In 1949 there were 63 district units under the central library scheme.

(iii) *Victoria.* Since 1943-44 children's libraries have shared a grant of £500 between them, the number participating in 1950 being 34.

The Education Department is making provision for libraries in new schools being erected. Where accommodation is available in existing schools, grants of up to £4 for £1 are provided to furnish and equip libraries. In addition, the Government subsidizes the purchase of approved books on the basis of £1 for £1, or £2 for £1, according to the size of the school, to a maximum grant of £60 per annum.

With the assistance of school committees and municipalities, subsidized by the Department, many country districts have established circulating group libraries. Boxes of books are circulated to all schools in the group, changes being made at the commencement of each school term.

Financed by a bequest from the late William Gillies, a scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. At present 441 schools benefit from this scheme.

The Department has a Library Services Officer with a small staff to advise and assist schools in the organization of libraries. A number of Education Department teachers have been trained at the Library School of the Public Library of Victoria, and an increasing number of schools have well-equipped library rooms with trained teacher-librarians in charge.

(iv) *Queensland.* The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Public Instruction on a £1 for £1 basis. The subsidy was suspended from 1931 to 1943.

In 1937 a system of Circulating Supplementary Readers was commenced. Books are graded for age levels and are moved from school to school, sufficient copies of each book for a whole class being sent, and reading being done in school. There are 96,000 such books now in use, the distribution at present being confined to primary schools.

(v) *South Australia.* A Children's Library of 7,800 volumes is used by school classes and individual children living in the metropolitan area. Books of fiction are lent to children of fourteen years and over, while other books may be borrowed by children of any age.

(vi) *Western Australia.* For schools with more than two teachers, including high schools and technical schools, £1 for £1 subsidy up to £50 is granted each year. New primary schools are provided with a room for a library, while high schools and some technical schools have a teacher acting as librarian.

For schools with one or two teachers there are two services. Through the Small Schools Fixed Library Service reference books up to the value of £15 are supplied annually to be kept permanently in the school. The Charles Hadley Travelling Library provides recreational reading, and operates 250 boxes which can be exchanged every three months through a local school acting as distributing centre for a district. All boxes are returned to headquarters for repair and renewal at the end of the year. The Government grants £250 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Bank for the teachers' services—about £200.

Children in isolated country areas are catered for by books sent out by the State Correspondence Schools Library. The children are kept in touch with the Library by means of radio talks and leaflets issued periodically. There is as yet no general scheme to serve children in the metropolitan area.

The Federation of Police and Citizens Boys' Clubs of Western Australia aims at establishing a system of circulating boxes of books at an estimated cost of £10,000. Books are in circulation to 44 centres, of which 15 are Police Boys' Clubs, 24 State Schools, and 5 Children's Libraries.

Western Australian Children's Book Council Inc. was incorporated in 1948 and receives a government grant to assist its work of interesting local authorities in establishing children's free libraries.

(vii) *Tasmania*. The Lady Clark Memorial Children's Libraries, with headquarters at the State Library, in Hobart, aim to serve all children in Tasmania with books. They work through the municipal authorities; at 30th June, 1952, children's libraries had been established in 55 municipalities, including Hobart, and five special Hydro-electric districts, children's books being provided on a population basis.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them. The libraries of the Friends' School, Hobart, and the Hobart High School are among the foremost of their kind in Australia.

A Schools' Library Service assists with loans of curriculum books, 30 at a time, and provides advice and guidance in the use of books. In 1951 the number of schools receiving service was 64 and books issued was 3,678. The majority of primary schools have libraries; most area schools, in particular, have good ones.

The Education Department sends, each year, selected students or teachers to the Library School in Sydney.

6. **Special Libraries.**—Before the 1939-45 War the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their specialist or other staff. These libraries, which are most numerous in Sydney and Melbourne, are being increasingly staffed by trained librarians.

7. **Microfilms.**—The following libraries supply microfilm or photostat copies of material, usually at a small charge (the letter "P" signifies photostat supplies and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), Commonwealth National Library (PM), C.S.I.R.O. (M); *New South Wales*—Metropolitan Water Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); and *Tasmania*—University of Tasmania (PM).

## § 11. Public Museums.

The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing fine collections of the usual objects found in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building to 30th June, 1950 was £86,560. The number of visitors to the institution during 1951-52 was 247,104, and the average attendance on week-days 542, and on Sundays 1,487. The expenditure for 1951-52 amounted to £47,542. A valuable library containing 33,363 volumes is attached to the Museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, and afternoon lectures for school children are provided. Nature talks are also broadcast by radio. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter

institution prepares collections of specimens to be used as teaching aids to country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public. There is a Museum of Applied Arts and Sciences in Sydney with branches in four country centres. Expenditure during the year 1952 was £40,296. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally.

The National Museum at Melbourne, devoted to natural history, geology and ethnology, is located in the eastern section of the Public Library Building. The National Art Gallery is situated in the same building. The Museum of Applied Science, also housed under the same roof, contained at 30th June, 1950, 23,320 exhibits which covered applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the School of Mines in the chief mining districts.

The Queensland Museum, founded in 1855, comprises exhibited and reference collections of zoology, geology and ethnology. It is entirely maintained by the State Government, and the cost of the building was £31,736. Expenditure for the year 1951-52 was £14,218. The collections are principally, but not exclusively, Australian; there is, for example, the excellent series of ethnological material formed by Sir William McGregor in New Guinea. The publication is *Memoirs of the Queensland Museum* which was preceded by the *Annals of the Queensland Museum*. The library is extensive and valuable, and of great assistance to research workers in the State. In 1952 during the schools vacation, special programmes were held, including brief talks, natural history films, and natural history questions and early in 1952 natural history lessons were given to eleven classes of school children to which the children supplied the answers by reading the explanatory labels in the cases.

The Queensland Geological Survey Museum has branches in Townsville, opened in 1886, and in Brisbane, opened in 1892.

The South Australian Museum has considerable collections of most branches of natural history and was attended by 150,000 visitors in 1951-52. Cost of construction of the Museum building was returned as £65,000. In 1951-52 expenditure was £30,800.

The latest available returns show that the Western Australian Museum and Art Gallery contains altogether 205,000 specimens, of an estimated value of £106,250. The Museum, Art Gallery, and Library are housed in one building, and the visitors to the combined institutions during the year reached 80,000. At 30th June, 1952, the structure was valued at £65,500.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral, and miscellaneous products. The Museums received aid from the Government during 1951-52 to the extent of £10,000. The cost of construction in each case is included in that of Art Galleries given below.

## § 12. Public Art Galleries.

The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. Cost of construction of the present building amounted to about £96,000. At the end of 1951 its contents, which are valued at £261,000, comprised 1,104 oil paintings, 715 water colours, 1,915 black and white, 236 statuary and bronzes, and 1,057 ceramics, works in metal and miscellaneous. Since 1895, loan collections of pictures have been regularly forwarded for exhibition in important country towns.

The National Gallery at Melbourne at 30th June, 1950 contained 2,190 oil paintings, 7,792 objects of statuary, bronzes, ceramics, etc., and 22,033 water colour drawings, engravings and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £439,000. Cost of purchases during 1949-50 was £57,653. Several munificent bequests have been made to the institution. That of Mr. Alfred Felton, given in 1904, amounts to about £8,000 per annum. In 1913, Mr. John Connell presented his collection of art furniture, silver, pictures, etc., the whole being valued at £10,000. There are provincial art galleries at Ballarat, Bendigo, Geelong, Castlemaine and Warrnambool, and periodically pictures are sent on loan from the National Gallery.

The Queensland National Art Gallery, situated in the Executive Buildings, Brisbane, was founded in 1895, and contains a small but well-chosen collection of pictures. At the end of 1950 there were on view 279 oil paintings, 135 water colours, 243 black and white, and 44 pieces of statuary, together with 158 various prints, mosaics, and miniatures. Exclusive of exhibits on loan, the contents are valued at about £23,500. Visitors during the year averaged 925 on Sundays and 214 on week-days.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2,000 in the purchase of pictures, which were exhibited in the Public Library Building in 1882. The liberality of private citizens caused the gallery rapidly to outgrow the accommodation provided for it in 1889 at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir Thomas Elder, the Government erected the present building, which was opened in April, 1900. The Gallery also received bequests of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and valuable prints and £3,000 in 1907 from Mr. David Murray. In 1935 Mr. Alex Melrose gave £10,000 for the extension of the building. At 30th June, 1952 there were in the Gallery 1,481 paintings in oil and water colours, 565 drawings and black and white, and 91 items of statuary, the contents being valued at £95,900. The cost of construction of the Art Gallery amounted to £48,000. The expenditure during 1951-52 was £17,900.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, and the Public Library, Museum, and Art Gallery are all situated in the one structure. The collection comprises 225 oil paintings, 152 water colours, 371 black and white, 276 statuary, and 1,388 ceramic and other art objects, the whole being valued at £33,000. Cost of construction of the buildings amounted to £10,000.

In Tasmania, the Art Gallery at Hobart was opened in 1887. At June, 1952 the contents consisted of 119 oil paintings, 64 water colours, 7 black and white, 3 statuary and 103 etchings, engravings, etc. The cost of construction of the building was £4,500. Expenditure in 1951-52 was £9,932.

The Art Gallery at Launceston was erected in 1888 at a cost of £6,000, and opened on the 2nd April, 1891. Only a small proportion of the contents belongs to the gallery, the bulk of the pictures being obtained on loan. At June, 1952 there were on view 51 oil paintings, 23 water colours, 4 black and white, and 3 engravings and miscellaneous exhibits. Expenditure in 1951-52 was £7,891.

### § 13. Scientific Societies.

1. **Royal Societies.**—In previous issues of the Official Year Book an outline was given of the origin and progress of the Royal Society in each State (*see* No. 22, pp. 454-5). The accompanying table contains the latest available statistical information regarding these institutions, the headquarters of which are in the capital cities.

## ROYAL SOCIETIES 1952.

Particulars.	Sydney.	Mel- bourne.	Bris- bane.	Ade- laide.	Perth.	Hobart.	Can- berra.
Year of Foundation .. ..	1866	1854	1884	1880	1914	1843	1930

Vols. of transactions issued ..	86	96	62	75	36	86	..
Number of books in library ..	30,400	20,780	44,900	40,000	4,500	29,684	..
Societies on exchange list ..	420	355	257	100	200	271	..
Income .. ..	£ 2,505	1,469	417	1,471	321	1,100	56
Expenditure .. ..	£ 2,293	678	413	1,128	244	1,181	38

2. **The Australian and New Zealand Association for the Advancement of Science.**—This Association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and meetings are usually held biennially within the various States and in the Dominion of New Zealand. The latest meeting was held in Canberra in January, 1954.

3. **Other Scientific Societies.**—The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society maintains a research bacteriologist and offers annually to graduates of the University of Sydney, who are members of the Society and resident in New South Wales, research fellowships (Linnean Macleay Fellowships) in various branches of natural history. Two fellowships were awarded in 1952. The library comprises some 18,000 volumes, valued at about £9,000. Seventy-seven volumes of proceedings have been issued, and the Society exchanges with about 260 kindred institutions and Universities throughout the world. The membership at the end of 1952 was 233.

The British Astronomical Society has a branch in Sydney, and in each of the States the British Medical Association has a branch.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

## § 14. State Expenditure on Education, Science and Art.

The expenditure in each State on education, science and art during the years 1950–51 and 1951–52 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under Public Health, etc. :—

## STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART.

(£.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
1950–51.						
New South Wales .. ..	16,143,253	2,636,302	..	18,779,555	476,731	18,302,824

(a) In addition, fees in respect of technical education amounting to £236,730 in 1950-51 and £252,926 in 1951-52 were received and spent by the School Councils.

## CHAPTER XII.

### PUBLIC JUSTICE.

#### § 1. Introduction.

Each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia (largely a Court of Appeal intermediate to the Privy Council although it has also original jurisdiction), the Commonwealth Court of Conciliation and Arbitration and the Federal Court of Bankruptcy. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution which appeared on page 18 of Official Year Book No. 39.

In considering the criminal returns of the various States, due allowance must be made for certain factors, such as the relative powers of the higher and lower courts. In the case of lower courts, the actual number of laws in each State whose breach renders a person liable to fine or imprisonment must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws or laws connected with vagrancy or gaming, the views of the magistrates, and instructions issued to the police, may be responsible for considerable variations in the numbers. The strength and distribution of the police forces, and the age-constitution and distribution of the population of the States, also influence the results. Due weight should be given also to the prevalence of undetected crime, but information on this point is not available for all States.

#### § 2. Lower (Magistrates') Courts.

1. Powers of the Magistrates.—(i) *New South Wales*. There is no general limit to the powers of the magistrates in regard to offences punished summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to twelve months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts and damages, whether liquidated or unliquidated, the amount is limited to £50 before a court constituted by a stipendiary magistrate. The amount in actions of debt before two or more Justices of the Peace is limited to £30 and in actions of damage to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 and to £30 by consent of parties.

(ii) *Victoria*. The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £50, and to actions arising out of torts or contracts. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences up to two years may be imposed. The proportion of long sentences is, however, comparatively small.

(iii) *Queensland*. Generally speaking, the maximum term of imprisonment which justices can inflict is six months, but in certain exceptional cases, such as offences against sections 233, 344, and 445 of the Criminal Code (betting houses, aggravated assaults, and illegally using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice, in general, not more than one sentence is made cumulative on a previous sentence.

Magistrates have no power to deal with habitual offenders, but there are such powers vested in the Supreme Court.

(iv) *South Australia.* In South Australia the power of special magistrates to impose fine and imprisonment is defined by the special act creating the offence and conferring jurisdiction. In the case of minor indictable offences, triable summarily, a maximum penalty of £100 fine or 2 years' imprisonment is fixed by the Justices Act 1921-1943. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £750.

(v) *Western Australia.* The powers of magistrates and justices in regard to offences triable summarily are governed by the act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of magistrates and courts is restricted in general to £250, but disputed actions, the subject matter of which exceeds £100, must be tried by a judge. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Courts of Session. They may be appointed as Commissioners of the Supreme Court.

On the goldfields, the magistrate is also the warden.

(vi) *Tasmania.* Magistrates may hear and determine in Courts of Petty Sessions all offences other than those punishable on indictment. Stealing and analogous crimes where the property involved does not exceed £10 in value may be dealt with by magistrates unless the defendant objects.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889 provides that a fine of £50 may be imposed. Generally speaking, sentences which justices can inflict are limited to six months, although in several cases sentences of up to two years may be imposed. The aggregate term of cumulative sentences cannot exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, who must be a legal practitioner, and is invariably a police magistrate, may hear actions for the recovery of debts and damages not exceeding £100. The jurisdiction of these courts may be increased by proclamation to £250, and this has been done in five instances. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court has the maximum jurisdiction, the others being limited to £30.

2. *Cases Tried at Magistrates' Courts.*—The total number of arrest and summons cases tried at Magistrates' Courts in each State is given below for 1939 and for the years 1947 to 1951 :—

#### CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1939.	1947.	1948.	1949.	1950.	1951.
New South Wales ..	144,848	180,835	198,456	205,817	214,894	242,165
Victoria ..	82,858	73,990	76,516	80,511	97,201	109,066
Queensland(a) ..	32,501	34,664	36,149	40,503	43,932	49,849
South Australia ..	22,776	(a)27,005	(a)25,376	(a)28,349	(a)31,964	(a)30,953
Western Australia ..	24,111	22,893	26,257	27,373	29,521	31,985
Tasmania ..	9,498	9,024	9,060	11,713	12,403	14,649
Northern Territory(a)	1,494	1,102	1,598	1,199	1,269	1,178
Aust. Cap. Territory ..	284	893	777	1,018	1,237	1,500
Total ..	318,370	350,406	374,189	396,483	432,421	481,345

(a) Year ended 30th June following.

Investigation of the returns shows that considerable variations in the figures for single States are occasioned by breaches of new Acts, or the more stringent enforcement of the provisions of existing Acts. Any deductions drawn from the total returns as to the increase or decrease of criminality should, therefore, be based upon a careful analysis of the detailed list of offences.

3. **Convictions at Magistrates' Courts.**—The figures given in the previous table include, of course, a number of people who were charged without sufficient reasons, and, statistically, are not of general importance. A classification of convictions of persons who appeared before the lower courts in each State during 1951 is given in the following table :—

CONVICTIONS AT MAGISTRATES' COURTS, 1951.

Class of Offence.	N.S.W.	Vic.	Qld.(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Against the Person . . .	2,787	1,205	399	276	349	151	74	50	5,291
Against Property . . .	12,769	5,290	2,642	1,647	2,765	678	65	121	25,977
Forgery and Offences against the Currency	76	..	..	3	1	..	5	..	85
Against Good Order . .	108,065	30,310	30,157	7,284	7,581	1,641	695	553	186,286
Other Miscellaneous . .	100,817	61,564	13,238	18,222	19,067	10,295	141	718	224,062
Total ..	224,514	98,369	45,435	27,432	29,763	12,765	980	1,442	441,701

(a) Year ended 30th June following.

The following table shows the number of convictions in 1939 and in each year from 1947 to 1951 :—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1939.	1947.	1948.	1949.	1950.	1951.
New South Wales ..	126,353	165,472	183,367	189,955	199,619	224,514
Victoria ..	72,186	66,086	68,243	72,416	87,873	98,369
Queensland(a) ..	28,920	31,315	33,469	38,691	41,492	46,436
South Australia ..	20,429	(a)24,164	(a)22,834	(a)25,496	(a)28,675	(a)27,432
Western Australia ..	22,539	21,095	24,360	25,388	27,315	29,763
Tasmania ..	8,722	7,312	7,701	10,206	10,961	12,765
Northern Territory(a)	1,394	1,058	1,516	1,127	1,145	980
Aust. Cap. Territory ..	260	729	714	917	1,151	1,442
Total ..	280,803	317,231	342,204	364,196	398,231	441,701

(a) Year ended 30th June following.

4. **Convictions for Serious Crime at Magistrates' Courts.**—(i) *General.* While the figures given in the preceding table refer to the entire body of convictions, the fact must not be overlooked that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliament. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense from some other offences, also help to swell the list. The following table has therefore been prepared for the purpose of showing the convictions at magistrates' courts, for what may be regarded as the more serious offences, i.e., against the person and property, either separately or conjointly, and forgery and offences against the currency. Owing to the smallness of the population, the rates for the Northern and the Australian Capital Territories are subject to considerable variation.

(ii) *Number and Rates, Years 1939 and 1947 to 1951.*—The following table shows the number and rates of convictions for serious crime at magistrates' courts for the years 1939 and 1947 to 1951 :—

**CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.**

State or Territory.	1939.	1947.	1948.	1949.	1950.	1951.
NUMBER.						
New South Wales ..	12,724	14,626	13,308	12,983	14,141	15,632

Total ..	36.91	35.68	33.44	31.66	33.66	37.09

(a) Year ended 30th June following.

(iii) *Rate of Convictions, 1881 to 1951.* The rate of convictions at ten-yearly intervals over a period of seventy years is shown below; only the more serious offences particularized on the preceding page have been taken into consideration.

**RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS : AUSTRALIA.**

Year .. .. .	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1951.
Convictions per 10,000 persons	69.3	44.8	29.1	24.6	29.2	37.1	33.6	37.1

5. *Committals to Higher Courts.*—(i) *General.* In a previous paragraph it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, inasmuch as the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connexion allowances must be made for the want of uniformity in jurisdiction. A classification of the offences for which persons appearing in the lower courts were committed to higher courts in each State and Territory for the year 1951 is shown in the following table :—

COMMITTALS TO HIGHER COURTS, 1951.

Class of Offence.	N.S.W.	Vic.	Qld.(a)	S.A.(a)	W.A.	Tas.	N.T.(a)	A.C.T.	Aust.
Against the Person ..	914	328	165	153	92	19	19	6	1,696
Against Property ..	2,622	1,148	257	279	107	161	3	18	4,595
Forgery and Offences against the Currency ..	67	102	2	20	1	6	2	..	200
Against Good Order ..	33	9	2	5	6	6	1	1	63
Other Miscellaneous ..	70	63	8	23	3	5	3	5	180
<b>Total .. ..</b>	<b>3,706</b>	<b>1,650</b>	<b>434</b>	<b>480</b>	<b>209</b>	<b>197</b>	<b>28</b>	<b>30</b>	<b>6,734</b>

(a) Year ended 30th June following.

The following table shows the number of committals in 1939 and in each year from 1947 to 1951, with the rate of such committals per 10,000 of population :—

COMMITTALS TO HIGHER COURTS.

State or Territory.	1939.	1947.	1948.	1949.	1950.	1951.

(a) Year ended 30th June following.

Under the heading "drunkenness" are included cases of ordinary drunkenness, drunkenness and disorderliness, and habitual drunkenness.

The number of convictions is, as might naturally be expected, almost identical with the number of cases.

(ii) *Convictions per 10,000 of Population.* The convictions for drunkenness per 10,000 of population during 1939 and each of the years from 1947 to 1951 are shown in the following table :—

**CONVICTIONS FOR DRUNKENNESS PER 10,000 OF POPULATION.**

State or Territory.	1939.	1947.	1948.	1949.	1950.	1951.

Tasmania ..	17.0	16.9	18.9	25.9	22.6	23.7
Australian Capital Territory	91.2	163.8	215.7	205.3	180.5	195.1
<b>Total</b> ..	<b>88.0</b>	<b>144.4</b>	<b>170.4</b>	<b>167.9</b>	<b>170.5</b>	<b>174.4</b>

(a) Year ended 30th June following.

In the twenties the convictions for drunkenness averaged approximately 100 per 10,000 of population, but the rate fell away considerably during the following years and was only 57.1 in 1931. With the improvement in the social condition of the people following that year, the average rose steadily to 84.1 in 1936. The annual average for the period 1936 to 1939 was 82.7 as compared with 90.8 for the years 1940 to 1945. Following an appreciable increase in the previous year the convictions per 10,000 rose very steeply in 1946 to 132.1 and increased to 170.5 in 1950 and to 174.4 in 1951. Figures for the consumption of beer have followed a somewhat similar course. The average consumption of beer per head, which in the twenties was slightly over eleven gallons, fell to 7.32 gallons in 1931-32. It rose to 10.34 in 1936-37, averaged 11.75 gallons for the years 1936-37 to 1939-40 and increased further to an average of 13.23 for the years 1940-41 to 1945-46. Consumption increased in 1945-46, and except for a slight decline in 1947-48 has continued to do so. In 1951-52 the average consumption per head was 20.46 gallons.

The convictions for drunkenness taken by themselves are not altogether a satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, are by no means identical in all the States. Another factor is the distribution of the population. Arrest or summons for drunkenness obviously is more likely in the regions densely populated than in those sparsely populated. In addition, allowance must be made for the attitude of the magistracy, the police and the general public in regard to the offence. Due account also must be taken of the effect of legislation dealing with the limitation of hours during which liquor may be sold in hotels.

(iii) *Consumption of Intoxicants.* The following table shows the consumption of spirits, wine and beer per head of population in Australia during the years 1938-39 and 1946-47 to 1951-52 :-

CONSUMPTION OF INTOXICANTS IN AUSTRALIA PER HEAD OF POPULATION.

Year.	Spirits.			Wine.			Beer.		
	Proof Gals.			Gals.			Gals.		
1938-39	..	..	..	0.22	0.65	12.13			
1946-47	..	..	..	0.29	1.09	15.90			
1947-48	..	..	..	0.31	1.37	15.47			
1948-49	..	..	..	0.33	1.38	17.87			
1949-50	..	..	..	0.32	1.50	18.23			
1950-51	..	..	..	0.38	1.61	19.72			
1951-52	..	..	..	0.32	1.62	20.46			

(iv) *Treatment of Drunkenness.* (a) *General.* Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. The dangers of moral contamination in this way are appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with those convicted of more serious offences.

(b) *Remedial.* Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions. The laws in the various States are as follows :—New South Wales, Inebriates Act 1912; Victoria, Inebriates Act 1928; Queensland, Inebriate Institutions Act 1896; South Australia, Inebriates Act 1908-1934, Convicted Inebriates Act 1913-1934; Western Australia, Inebriates Act 1912-1919; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. In most cases the institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management; nevertheless, the results of remedial measures have been encouraging.

7. *First offenders.*—In all the States, statutes dealing with first offenders have been in force for many years. Existing legislation is as follows :—New South Wales, Crimes Act 1900 amended in 1924 and 1929, First Offenders (Women) Act 1919 as amended in 1929; Victoria, Crimes Act 1928; Queensland, Criminal Code Acts 1899 to 1945; South Australia, Offenders Probation Act of 1913-1951; Western Australia, Criminal Code Act 1913-1942; Tasmania, Probation of Offenders Act 1934. The method of procedure is practically the same in all cases, i.e., with regard to most first offenders convicted of a minor offence the magistrate or judge is empowered to allow the offender to go free on recognizances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those convicted under it having been found to relapse into crime.

8. *Children's Courts.*—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Queensland, Western Australia and Tasmania, while Children's Courts, although not under that title, are provided for by the Maintenance Act 1926-1950 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court.

## § 3. Higher Courts (Judges' Courts).

1. Convictions at Higher Courts.—The following table shows for each State and Territory during 1951 and in Australia as a whole in that and the previous year, the number of convictions at Higher Courts for each of the principal offences.

## CONVICTIONS AT HIGHER COURTS, 1951.

(a) Year ended 30th June following.

3. **Habitual Offenders.**—An account of the methods adopted in each State in connexion with habitual offenders is given in the following paragraphs.

(i) *New South Wales.* The Habitual Criminals Act of 1905 gives power to judges to declare as habitual criminals persons who have a certain scheduled number of previous convictions. Action may be taken either on the initiative of the judge in indictable matters, or on the recommendation of a stipendiary magistrate, when the matter becomes a special hearing before a judge. The result of the declaration is that the offender is kept for an indefinite period after the completion of his sentence, and is released only when he is considered to be fit to be at large. During the indeterminate stage of his sentence the conditions of detention are governed by regulations under the Act which are somewhat less restrictive than those under the Prisons Act 1899.

At 31st December, 1952 there were 72 prisoners detained in pursuance of the legislation.

(ii) *Victoria.* The Indeterminate Sentences Act came into force in Victoria in July, 1908, and up to the end of June, 1952, 6,151 individual prisoners had been detained under its provisions. Of the 5,370 who were released on parole or probation, 2,222 were

reconvicted or returned, 2,885 had completed probation or not offended again, so far as is known, and 234 were reporting on parole or probation. The report of the Indeterminate Sentences Board indicates that the successful results from all inmates approximates 59 per cent., while the results from the younger delinquents (up to 25 years of age) is over 66 per cent. The Indeterminate Sentences system was brought into operation with the object of more comprehensive control of prisoners, particularly after parole and probation, with the twofold object of the reform of the inmate and protection of society.

Committals to reformatory prison are generally by Supreme Court Judges or Chairmen of General Sessions pursuant to the provisions of Sections 514 and 515 of the Crimes Act and by Special Magistrates of Children's Courts pursuant to the provisions of Section 28 of the Children's Court Act. This latter provision is limited to children between the ages of fifteen and seventeen.

(iii) *Queensland.* Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be an habitual criminal. An habitual criminal is to be detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of an habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

(iv) *South Australia.* The Criminal Law Consolidation Act 1935-1952 provides that persons convicted of a certain number of indictable offences shall be detained, upon further conviction, during the Governor's pleasure. Proof of previous conviction is always relevant to the question of penalty.

(v) *Western Australia.* Under the Criminal Code Amendment Act of 1918, power is given to sentence prisoners to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be an habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventative detention on 30th June, 1952 was 17, and the total number dealt with since the passing of the Act was 130.

(vi) *Tasmania.* Since the Indeterminate Sentences Act came into operation in 1922, 65 persons have been confined under its provisions; at present five are in custody.

Of the 60 released on probation, 15 have been re-committed.

4. **Capital Punishment.**—There were eleven executions in Australia during the period 1939 to 1951. One took place in New South Wales (in 1939), six in Victoria (two in 1939, one in 1942 and three in 1951), three in South Australia (one in 1944, one in 1946 and one in 1950) and one in Tasmania (in 1946).

Under the Criminal Code Amendment Act 1922 capital punishment was abolished in Queensland.

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' court. With the growth of settlement and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be stated that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loath to convict on this charge, owing to the uncertainty whether sentence of death will be carried out.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; from 1931 to 1940, 1; and from 1941 to 1950, 0.5.

§ 4. Civil Courts.

1. Lower Courts.—The total number of complaints entered and the amounts awarded to plaintiffs during the years 1950 and 1951 are shown in the following table. The figures represent the returns from the Small Debts Courts in New South Wales, Petty Session Courts in Victoria, Magistrates' Courts in Queensland, Local Courts of South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in Northern Territory and Court of Petty Sessions in the Australian Capital Territory.

2. Higher Courts.—The following table shows the transactions on the civil side in the Higher Courts during the years 1950 and 1951. The particulars given below include the number and amount of judgments entered by default or confession, or agreement, and differ from those in issues of the Official Year Book prior to No. 29, which related in most States only to causes actually tried during the year.

The New South Wales returns refer to judgments in the District Courts only, and exclude 1,778 judgments in 1950 and 1,897 judgments in 1951 signed in the Supreme Court.

(vi) *Divorces Granted—Duration of Marriage and Issue of Persons Involved.* The following table shows the number of divorce decrees made absolute in 1952, classified according to the legal duration of the marriage (i.e., the period from the date of marriage to the date when the decree nisi was made absolute) and the issue involved. In respect of 40 per cent. of the divorces finalized in that year the marriages had been celebrated within the previous 10 years. Of the couples divorced, 34 per cent. had no children, 30 per cent. had one child, 21 per cent. had two children, 8 per cent. had three children and 7 per cent. had four or more children.

**DIVORCES : DURATION OF MARRIAGE AND ISSUE OF PARTIES, AUSTRALIA, 1952.**

(vii) *Number of Divorced Persons at Censuses 1891 to 1947.* The following table shows the number and proportions of divorced males and females in Australia at each Census from 1891 to 1947. A classification of these persons by age has appeared in previous

issues of the Official Year Book (see No. 39, page 269). Prior to 1911 no record was made of divorced persons in South Australia, so comparisons cannot be made to extend beyond that date.

**DIVORCED PERSONS AT CENSUS DATES : AGE DISTRIBUTION, AUSTRALIA.**

(a) Excludes South Australia.

4. **Bankruptcies.**—Particulars relating to bankruptcy in each State up to the end of 1927 were incorporated under this heading in issues of the Official Year Book prior to No. 23. Under the terms of the Bankruptcy Act 1924-1950 jurisdiction in bankruptcy and insolvency was taken over by the Commonwealth from 1st August, 1928. The Act made provision for the declaration of districts, and each State (except Queensland) and Northern Territory have been declared bankruptcy districts. The bankruptcy district of New South Wales includes the Australian Capital Territory. Queensland has been divided into three districts corresponding to the three Supreme Court districts in that State. Operations under the Act for the year ended 31st July, 1952 are shown in the following table. For the purposes of comparison, the annual averages for periods between the years 1929 and 1948 are appended to the table.

**FEDERAL BANKRUPTCY ACT : OPERATIONS, 1951-52.**

It is pointed out that the procedure in certain States has been influenced largely by the procedure in force prior to the passing of the Commonwealth Act, and that therefore, no particular significance attaches to the large number of compositions, etc., in South Australia and Western Australia.

The Bankruptcy Act 1930 created a Federal Court of Bankruptcy and provided for the appointment of a Judge or two Judges thereto. In 1930 a Commonwealth Judge in Bankruptcy was appointed, in addition to the State Judges, to deal with bankruptcy work in New South Wales and Victoria, as the Courts in these States were unable to cope with the business. All the bankruptcy cases in these States are now heard in the Federal Court which sits in Sydney and Melbourne alternately.

5. **High Court of Australia.**—Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The High Court of Australia possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution, and in the Judiciary Act 1903–1950. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals of the various States as occasion may require. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1951 and 1952.

#### TRANSACTIONS OF THE HIGH COURT OF AUSTRALIA.

Original Jurisdiction.	1951.	1952.	Appellate Jurisdiction.	1951.	1952.
	Number of writs issued	127		151	Number of appeals set down for hearing ..
Number of causes entered for trial ..	42	39	Number allowed ..	31	40
Verdicts for plaintiffs ..	17	42	Number dismissed ..	42	63
Verdicts for defendants	6	15	Otherwise disposed of	2	10
Otherwise disposed of ..	47	18			
Amount of judgments	£85,642	£85,388			

During 1951 and 1952 respectively the High Court dealt also with the following : Appeals from Assessments under Taxation Assessment Act, 38, 53 ; Special cases stated for the opinion of the Full Court, 5, 16 ; Applications for Prohibitions, etc., 65, 37. The fees collected amounted to £1,431 in 1951 and £1,521 in 1952.

6. **Commonwealth Court of Conciliation and Arbitration.**—Information regarding this Court, which was established under the Conciliation and Arbitration Act 1904–1952, will be found in Chapter VIII.—Labour, Wages and Prices, of this volume and in the *Labour Report* issued by this Bureau.

### § 5. Police and Prisons.

1. **General.**—Early issues of the Official Year Book (*see* No. 4, p. 918) contain a *résumé* of the evolution of the police force in Australia up to the passing of the Police Act 1862 (25 Vic. No. 16) in New South Wales.

2. **Duties of the Police.**—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Much of the time of the several forces is taken up in extraneous duties not connected with the protection of life and property, while the cash value of the services rendered to other Government departments is considerable.

3. **Strength of Police Force.**—(i) *General.* The strength of the police force including probationers, cadets, special constables and women police, in each State and Territory during 1939 and the years 1947 to 1951 is shown in the following table. It may be

mentioned that the police forces (with the exception of the small body of Commonwealth police maintained in the Northern Territory and in the Australian Capital Territory) are entirely under State control, but, by arrangement, the Commonwealth Government utilizes their services in various directions, such as acting as aliens registration officers, and policing the various regulations, etc.

## STRENGTH OF POLICE FORCES.

State or Territory.	Area of State in Sq. Miles.	No. of Police.					
		1939.	1947.	1948.	1949.	1950.	1951.

(a) 30th June of year following.

The figures for New South Wales for 1951 exclude 12 "black trackers" (i.e., natives employed in detection of offenders chiefly in outlying districts) and 4 matrons, while the Victorian returns exclude one black tracker. For Queensland the figures exclude 28 black trackers, for South Australia 3 wardresses, for Western Australia 18 black trackers and 6 female searchers, and for the Northern Territory 29 black trackers. Women police are employed in all the States, the respective numbers for 1951 included in the table above being:—New South Wales 36, Victoria 25, Queensland 8, South Australia 16, Western Australia 9, Tasmania 6 and Australian Capital Territory 2. Their work is mainly preventive, relating particularly to females and neglected children. They also carry out escort duties in respect of female prisoners.

(ii) *Proportion of Population.* The average number of persons in the various States to each police officer during 1939 and the years 1947 to 1951 is shown in the following table. In considering these figures allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

## POLICE FORCES IN RELATION TO POPULATION.

State or Territory.	Number of Persons per Sq. Mile, 1947 Census.	Persons to each Police Officer.

<b>Total .. .. .</b>	<b>71</b>	<b>69</b>	<b>5,488</b>	<b>5,367</b>	<b>877</b>	<b>877</b>	<b>4,089</b>	<b>4,444</b>

(a) Year ended 30th June following.

The figures refer to prisoners under sentence and exclude aborigines and debtors. There are no gaols in the Australian Capital Territory, but there is a lock-up consisting of six cells attached to the police station at Canberra, and a similar lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by the Magistrate's Court.

5. Prisoners in Gaol, 1939 and 1947 to 1951.—The number of prisoners in gaol at 31st December in each of the years 1939 and 1947 to 1951 and the proportion per 10,000 of the population are shown in the following table. The figures refer to prisoners under sentence and exclude aborigines and debtors.

(a) 30th June of year following.

In recent years the proportion of prisoners in gaol to the total population has remained about 5 per 10,000. This figure compares most favorably with that obtaining in 1891, when the proportion was as high as 16 per 10,000. Rates for the Northern Territory have not been included on account of the abnormal prevailing conditions.

§ 6. Cost of Administration of Justice.

1. Expenditure by the States.—The table below shows the expenditure from Consolidated Revenue during 1938-39 and 1950-51 and 1951-52 in connexion with the administration of justice in each of the States.

Net costs are shown instead of gross expenditure as it is difficult to obtain comparable figures of the total costs of the various services under this heading. It will be noted that in South Australia for each year and in Western Australia for the year 1938-39 the receipts for legal fees and registrations exceed the actual expenditure under "Justice".

NET EXPENDITURE ON ADMINISTRATION OF JUSTICE.

State.	Net Expenditure.			Per Head of Population.

2. **Commonwealth Expenditure.**—The expenditure shown in the previous table is that incurred by the State Governments only, and does not include expenditure of the Commonwealth Attorney-General's Department which is shown hereunder for the years 1938-39 and 1947-48 to 1951-52.

**EXPENDITURE OF THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT.**

(£.)

Year.	Gross Expenditure.	Receipts.	Net Expenditure.
1938-39 .. .. .	281,497	111,036	170,461
1947-48 .. .. .	688,572	178,591	509,981
1948-49 .. .. .	745,106	176,310	568,796
1949-50 .. .. .	820,560	183,398	637,162
1950-51 .. .. .	1,096,274	204,362	891,912
1951-52 .. .. .	1,348,721	238,676	1,110,045

The totals for each year include expenditure in connexion with patents and copyright which amounted in 1951-52 to £318,614. The Commonwealth took over jurisdiction in bankruptcy in August, 1928, and the expenditure thereon in 1951-52 amounted to £90,269. Revenue of the Attorney-General's Department for the year 1951-52 amounted to £238,676, comprising £142,972 for patents, copyright, trade marks and designs, £27,364 for bankruptcy and £68,340 miscellaneous, including fees and fines.

In addition to the foregoing, during 1951-52, £93,292 was expended in the Northern Territory for the upkeep of the police force and prison services.

Expenditure in connexion with the Australian Capital Territory police in 1951-52 amounted to £63,995.

## CHAPTER XIII.

### PUBLIC HEALTH AND RELATED INSTITUTIONS.

#### A. PUBLIC HEALTH.

##### § 1. State Public Health Legislation and Administration.

1. *New South Wales.*—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is also a Director-General of Public Health and Chief Medical Adviser to the Government, who is ex-officio President of the Board of Health and Chairman of the Nurses' Registration Board. He is assisted by a Deputy Director-General.

The Inspector-General of Mental Hospitals is responsible for the administration of that part of the Lunacy Act relating to the care and treatment of mental patients. There is also a Deputy Inspector-General.

The following statutory authorities are constituted under Acts administered by the Minister for Health:—Board of Health (Public Health Act), Hospitals Commission of N.S.W. (Public Hospitals Act), Milk Board (Milk Act), Dental Board (Dentists Act), Pharmacy Board (Pharmacy Act), Medical Board (Medical Practitioners Act), Board of Optometrical Registration (Opticians Act), Ambulance Transport Service Board (Ambulance Transport Service Act), Physiotherapists Registration Board (Physiotherapists Registration Act) and Nurses Registration Board (Nurses Registration Act).

The Department's activities extend over the whole of the State and embrace all matters relating to the public health and the greater part of the general medical work of the Government. These include the following:—(a) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—Public Health Act, Noxious Trades Act and Pure Food Act; (b) Scientific Divisions (Government Analyst, Microbiological Laboratory, and Division of Industrial Hygiene); (c) Tuberculosis and Social Hygiene Divisions; (d) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore; (e) State Hospitals and Homes and State Sanatoria; (f) Mental Hospitals; (g) Public Hospitals (Hospitals Commission); (h) Maternal and Baby Welfare (Baby Health Centres); (i) School Medical and Dental Services; and (j) Publicity, Nutrition and Library Services.

2. *Victoria.*—The Ministry of Health Act 1943 made the Minister of Health responsible for all Acts administered up to that time by the Department of Public Health, the Hospitals and Charities Acts, the Mental Hygiene Acts, and all legislation and matters relating to the health and well-being of the people of the State.

The former Department of Public Health became the General Health Branch controlled by a Chief Health Officer. The latter also administers the Maternal and Child Hygiene Branch, and the Tuberculosis Branch. These three with the Mental Hygiene Branch make up the four branches of the Department of Health.

The Secretary of the Department of Health and a number of administrative officers assist the Minister with all matters relating to policy, legislation, etc.

The Mental Hygiene Authority Act 1950 provided for the establishment of an Authority of three members with a medical expert in mental illnesses at its head and established a pattern for the extension of the services of the Branch and for the

improvement of treatment and accommodation of mental patients throughout the State. The Authority is responsible for the administration of the Mental Hygiene Branch.

The constant fight against infectious disease is actively carried on in the General Health Branch by seven District Health Officers and their staffs, in collaboration with the local health authorities. Where any specific infection is unduly prevalent, immunization is concentrated and the success obtained over a period of years is illustrated in the comparison of the following figures in respect of diphtheria :—Year 1927—cases, 3,254 ; deaths, 93 : Year 1952—cases, 246 ; deaths, 10.

The control and treatment of venereal disease is undertaken by a special division of the General Health Branch, and clinics for prophylaxis and treatment are attached to all hospitals receiving Government aid throughout the State.

The Poliomyelitis Division, formed during the outbreak of the disease in 1949 and expanded since that time, supervises treatment and after-care of patients throughout the State. The Division is staffed by three medical officers, fifteen physiotherapists and two visiting nurses.

Determining the suitability of sewerage projects and ensuring the safety of public buildings are the responsibilities of the Engineering Division of the General Health Branch, and it acts in an advisory and supervisory capacity in municipal undertakings of this nature. In conjunction with the Hospitals and Charities Commission of Victoria, it examines plans and advises on all hospital construction throughout the State.

The Industrial Hygiene Division supervises the environmental conditions of the 300,000 persons employed in industry in Victoria and consists of three medical officers, three special scientific officers and a number of inspectors.

Under the direction of a medical director, the Tuberculosis Branch comprises State sanatoria, tuberculosis clinics, tuberculosis bureaux and the Mass X-ray Survey Division. The latter service has visited every large Victorian centre and many of the smaller townships, affording to the population throughout the State every facility in obtaining an X-ray. A relatively new project is the acquisition by the Government of suitable properties as hostels for the accommodation of ex-tuberculosis patients during their rehabilitation. In order to exercise better control over the spread of tuberculosis in this State, power has been given, by special legislation, to the Chief Health Officer to require any individual or any group of persons to undergo radiological examination of the chest. Should tubercular infection be suspected as a result of this examination, the Chief Health Officer may then require the patient to be further examined and, if necessary, treated until his condition is no longer dangerous to others.

As with the Tuberculosis Branch, a medical director supervises the activities of the Maternal and Child Hygiene Branch. This Branch embraces pre-natal hygiene, infant health, pre-school child hygiene and school medical and dental services. An extensive State-wide correspondence scheme for women during their pregnancy and early motherhood supplies these women with all the latest advice and information. The expansion of the School Dental Service, under the control of a dental director appointed to organize and develop the service, is proceeding steadily. By opening a new dental centre in the metropolitan area, putting into operation a number of new mobile dental surgeries and employing additional trained staff, the number of school children receiving regular dental treatment through the School Dental Services has been more than doubled. Further dental vans for country work are on order and more dentists will be employed as they can be absorbed into the service.

Legislation which comes within the purview of the Minister of Health includes the following :—Anti-Cancer Council Act, Births Notification Acts, Cancer Institute Act, Cemeteries Acts, Dietitians Registration Act, Part V. of the Goods Act, Hairdressers Registration Acts, Health Acts, Hospitals and Charities Acts, Infectious Diseases Hospital Acts, Masseurs Acts, Medical Acts, Mental Deficiency Act, Mental Hygiene Acts, Midwives Act, Nurses Acts, Opticians Registration Act, Poisons Acts and Venereal Diseases Act.

3. Queensland.—(i) *General*. The Health Acts 1937 to 1949 are administered by the Director-General of Health and Medical Services subject to the Minister for Health and Home Affairs. A Central Staff controls the following Divisions :—

(a) *Division of Public Health Supervision*. This Division is controlled by the Deputy Director-General of Health and Medical Services and comprises separate sections of environmental sanitation, food and drug control, enthetic (venereal) diseases, hookworm control and Hansen's disease control. Qualified whole-time officers are in charge of each section. Free treatment of venereal diseases is offered at the Department's male and female clinics in Brisbane, and at any public hospital. Two institutions (one at Peel Island in Moreton Bay for white patients and one at Fantome Island near Townsville for aboriginal patients) are maintained for the treatment of Hansen's disease. Modern therapy with sulphone drugs has caused a dramatic decline in numbers of patients at these institutions. Free immunization against diphtheria, whooping cough and tetanus is offered by most of the Local Authorities. A recent survey showed that 94 per cent. of school children in the Greater Brisbane area and 90 per cent. in the rest of the State had been immunized against diphtheria.

Wide powers for the control of environmental sanitation have been conferred on Local Authorities by the Health Acts and their work in this connexion is closely supervised by a staff of State health inspectors who visit all parts of the State. State-wide control of foods and drugs is carried out by the inspectors of this Division. High standards of purity are insisted on and particular care is taken to prevent excessive consumption of habit-forming narcotics. School children north of Ingham are regularly examined for evidence of hookworm infestation. Hookworm disease has markedly diminished in this high rainfall area during the last twenty years. Principal sufferers are now aboriginals.

(b) *Division of Tuberculosis*. The Director of Tuberculosis, assisted by medical officers and nurses, exercises control of patients with tuberculosis. A central chest clinic in Brisbane offers Mantoux tests, X-ray examinations, and inoculations of Mantoux negative reactors free of charge and this service is extensively used. A mobile X-ray unit is being established to tour country districts.

(c) *Division of Industrial Medicine*. This Division in charge of a Director exercises supervision over the health of workers in both primary and secondary industries, including control of leptospirosis (Weil's disease) and scrub typhus in the sugar-cane growing districts north of Ingham.

(d) *Division of Maternal and Child Welfare*. The Director of Maternal and Child Welfare, assisted by full-time and part-time health officers and a staff of qualified nurses, offers supervision and advice on the rearing of infants and pre-school children at baby health centres throughout the State. Outlying centres are visited by air or by special rail car. Homes for in-patient treatment of infants with feeding problems have been established at Brisbane, Toowoomba, Ipswich and Rockhampton.

(e) *Division of School Health Services*. This Division comprises the Chief Medical Officer, School Health Services, and a staff of medical officers, dentists and visiting school nurses. Every school child is examined regularly and defects are reported to parents. Free dental treatment is provided for school children by either dentists of the School Health Services or public dental clinics. Rail dental cars and portable equipment are used to provide the service for sparsely settled areas.

(f) *Division of Mental Hygiene*. The Director of Mental Hygiene is responsible for the care and treatment of mentally sick patients in the States' three mental hospitals, at Brisbane, Toowoomba and Ipswich. A new mental hospital is being erected at Charters Towers.

(g) *Division of Laboratory Services*. Two laboratories—the Laboratory of Microbiology and Pathology and the Government Chemical Laboratory—are maintained to ensure the purity of a wide range of foodstuffs and materials. The former also offers a service in clinical pathology to country hospitals and private medical practitioners.

(ii) *Hospitals.* All public hospitals operate under what is known as the district system, which provides for the constitution of Hospitals Districts and Hospitals Regions and a Hospitals Board for each district. The State is divided into 11 Hospitals Regions with a base hospital for each region which comprises a number of Hospitals Districts. The purpose of the regional scheme is to co-ordinate the public hospitals in the region with the base hospital. The administration of the hospitals services, including public dental services, in each Hospitals District is vested in the Hospitals Board which comprises not less than four members nor more than eight members appointed by the Governor-in-Council and one member elected by the component Local Authorities. There are 54 Hospitals Boards controlling 121 public hospitals.

The financial structure of the district system resolves itself into two parts, namely, capital expenditure and maintenance expenditure. Capital expenditure is provided by way of loan moneys. The State Government is responsible for the net annual cost of administration and maintenance of all hospitals controlled by Hospital Boards. All in-patient treatment in public wards and out-patient treatment at public hospitals is free of charge and no means test is applied in respect of such treatment, which includes X-ray, pathology and all other forms of treatment. The Commonwealth Government pays the State the hospital benefit of 8s. per day for each qualified in-patient and an additional benefit of 4s. per day for each pensioner in-patient who is enrolled in the Commonwealth Pensioner's Medical Service Scheme and who produces his or her entitlement card.

The Mater Misericordiae Hospital, Brisbane, and St. Vincent's Hospital, Toowoomba, operated by religious organizations, provide public as well as private accommodation. The State subsidizes these hospitals for public patients for whom free treatment is provided. There are 23 private hospitals in Brisbane and 40 in the country. These private hospitals are registered under the Health Acts. Two tuberculosis sanatoria are operating in the State, one at Westwood, via Rockhampton, and the other at Thursday Island. The latter is for natives. Another one is under construction in Brisbane.

4. *South Australia.*—The Department of Public Health embraces the activities of the Central Board of Health, the School Medical Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey, under the control of the Director of Tuberculosis.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor while one each is elected by metropolitan local boards and all other local boards. The Central Board of Health administers the Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registration and Early Notification of Birth Acts. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation. Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The Health Act of 1935-1952 constitutes every municipal council and every district council a local board of health for its municipality or district. There are 143 of these local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act every local board is constituted the local authority for its respective district, except in the metropolitan area, for which the Metropolitan County Board is the local authority.

The medical staff of the Department includes the Director of Tuberculosis, a Senior Medical Officer and the Principal Medical Officer for Schools, six full-time medical officers, one temporary medical officer and six part-time medical officers. Five dentists, four dental assistants and six nurses are engaged in connexion with the School Medical Services. There are six full-time and fourteen part-time inspectors directly responsible to the Board. There is also a nurse inspector employed to advise and assist local boards in connexion with infectious diseases. Three nurses are engaged in the State X-ray Health Survey and one in B.C.G. vaccination. The inspectors appointed under the Health and Food and Drugs Acts periodically visit the local districts and see, generally, that the local boards are performing their duties.

5. **Western Australia.**—The legislation in this State is the Health Act 1911–1952. This was consolidated and reprinted in 1948 and amended by Acts Nos. 25 of 1950 and 11 and 25 of 1952. The Central Authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is covered by Local Authorities which are constituted as Municipalities or Road Boards.

It is provided that a Local Board of Health may be set up in lieu of a Road Board, but this method of control is no longer used. In any emergency the Commissioner may exercise all the powers of a Local Health Authority in any part of the State.

Interesting features of recent legislation are as follows :—(a) Act No. 70 of 1948 gave compulsory power to control sufferers from tuberculosis and established a Tuberculosis Control Branch; (b) Act No. 71 of 1948 provided that within areas declared for the purpose all still-born infants must be submitted for post-mortem examination and all stillbirths must be notified to the Commissioner by the attending medical practitioner; and (c) Act No. 11 of 1952 gave wide powers to regulate the sale and use of pesticides.

All the usual provisions for public health control are embodied in the Health Act. They include the medical and dental examination of school children, control of public buildings, inspection of food and the provision of standards thereof. The Nurses Registration Act now makes provision for the registration of nurses in each of the following branches of the nursing profession—general, midwifery, tuberculosis, infant health, mothercraft, mental, children's and nursing aides.

6. **Tasmania.**—The Department of Public Health is under the jurisdiction of the Minister for Health, and the administration of the various services is controlled by the permanent head of the Department, the Director-General of Medical Services, who is also responsible for the administration of the Hospital and Medical section. Associated with the permanent head are the Director of Public Health, the Director of Tuberculosis, and the Director of Mental Hygiene.

The Hospital and Medical Services section is responsible for administration of the laws relating to hospitals and nurses' registration, and the following services: Government Medical Service, Bush Nursing Service, Institutions for the Aged and Infirm at St. John's Park and Cosgrove Park.

Public Health functions comprise administration of laws relating to public health, food and drugs, places of public entertainment and cremation, and the following services: School Medical and Dental, Maternal and Child Welfare, Infectious and Venereal Disease control, Analytical Laboratory, and Mothercraft Home. The Tuberculosis section is responsible for administration of the laws relating to tuberculosis, and for the management of chest clinics and chest hospitals at New Town and Perth. The Mental Hygiene section is responsible for administration of the laws relating to mental hospitals and mental defectives, and for the management of Lachlan Park Hospital (Mental Hospital) and Millbrook Psychopathic Home.

## § 2. The National Health and Medical Research Council.

In 1926 the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between Commonwealth and State Health Authorities". This Council held sessions each year except in 1932. In 1936 the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions :—

To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research.

- To advise the Commonwealth Government as to the expenditure of money specifically appropriated as money to be spent on the advice of this Council.
- To advise the Commonwealth Government as to the expenditure of money upon medical research and as to projects of medical research generally.
- To advise Commonwealth and State Governments upon the merits of reputed cures or method of treatment which are from time to time brought forward for recognition.

The Council consists of the Commonwealth Director-General of Health (as Chairman), two officers of his Department, the official head of the Health Department in each State, together with representatives of the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Australian Dental Association, and (jointly) the four Australian Universities having medical schools. A prominent layman and laywoman, appointed by the Commonwealth Government, also serve on the Council.

The first session of the National Health and Medical Research Council met at Hobart in February, 1937; the thirty-fourth session met at Canberra in November, 1952.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to provide assistance :—(a) to Departments of the Commonwealth or of a State engaged in medical research; (b) to Universities for the purpose of medical research; (c) to institutions and persons engaged in medical research; and (d) in the training of persons in medical research.

Approved research institutions under this system now number 51. During 1952 grants numbered 56 in the following fields :—bacteriology, biochemistry, biophysics, clinical research, dentistry, epidemiology, haematology, medical chemistry, neurology, neuro-physiology, obstetrics, pathology, physiology and pharmacology, tuberculosis and virus diseases. In certain instances, equipment and apparatus have been made available by the Council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the Council in such subjects as industrial hygiene, public health, epidemiology, maternal and child welfare, radio-active isotopes, antibiotic distribution, tropical physiology and hygiene, tuberculosis and the latest developments in X-ray technology and application.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputation. Beyond this practical achievement, the original objectives of the Council are being attained in encouraging young graduates to take up research work and in securing a continuity and permanence of medical research in Australia.

An insurance benefit scheme for medical workers on the lines of the Federated Superannuation System for Universities is now in operation.

### § 3. The Commonwealth Department of Health.

1. *General.*—The Commonwealth Department of Health was created by an Order-in-Council of 3rd March, 1921. This Order specified various functions to be performed by the Department in addition to Quarantine. Prior to the 1946 amendment of the Commonwealth Constitution, Quarantine was the only constitutional power expressly relating to public health under which the Commonwealth Parliament could legislate. The amendment of 1946 gave the Commonwealth Parliament power to make laws with respect to, among other things, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription) and benefits to students. The Commonwealth is at present providing medical benefits, medical services to pensioners, medicines to pensioners, under the National Health Act 1948-1949;

pharmaceutical benefits under the Pharmaceutical Benefits Act 1947-1952; hospital benefits under the Hospital Benefits Act 1951; medical services in respect of tuberculosis by arrangement with State Governments and tuberculosis allowances, under the Tuberculosis Act 1948; and free milk for school children under the States Grants (Milk for School Children) Act 1950. In earlier issues of the Official Year Book reference has been made to the part played by the Commonwealth in the development of public health in Australia, including:—The Royal Commission on National Health, 1925 (*see* No. 22, pp. 509-10), the International Pacific Health Conferences (*see* No. 22, p. 510 and No. 29, p. 334), Industrial Hygiene (*see* No. 18, pp. 522-55), Tropical Hygiene (*see* No. 22, pp. 506-7, No. 25, pp. 415-7, and No. 32, p. 226), and the Commonwealth Advisory Council on Nutrition (*see* No. 32, pp. 222-23). Reference to quarantine is made below (*see* § 3. paras. 12 and 13 and § 4. para. 2).

**2. The Commonwealth Serum Laboratories.**—The laboratories were established in 1916 under the administration of the Quarantine Branch, Department of Trade and Customs (later the Commonwealth Department of Health, Order-in-Council, March, 1921). Work began in temporary quarters but new buildings were erected and occupied in 1918 at Royal Park, Melbourne, where the Commonwealth had acquired 23 acres. In 1936 a farm of 325 acres was purchased at Broadmeadows, 9 miles from Melbourne, for experimental and other purposes. The laboratories function as a Public Health Institute conducting research and training laboratory workers as well as producing a comprehensive range of biological products for use as human and animal therapeutics. Since their foundation 37 years ago, the laboratories have been greatly enlarged both physically and in the scope of the work undertaken.

The list of biological preparations produced by the laboratories has been extended, until at the present time almost the whole range of these products is manufactured and Australia is practically independent of other countries in thus producing its own requirements. Penicillin is being produced in increasingly large quantities, which it is anticipated will shortly suffice for total Australian requirements. Constant research is being conducted into every relevant aspect of bacteriology and immunology and new sera and prophylactic agents are being tested as the growth of medical knowledge opens up new avenues of treatment, prevention and diagnosis. Other original and applied research relating to all aspects of public health is maintained. The laboratories serve as the national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization Interim Commission). For the past 29 years the production of veterinary biological products has been a feature of the work of the laboratories. In recent years an extensive development has occurred in this direction and the products are being used in greatly increased amounts in all States for the prevention or treatment of diseases in domestic animals and stock.

**3. The Commonwealth Health Laboratories.**—The fifteen health laboratories of the Department are situated at strategic points throughout Australia. They are located at Darwin, Cairns, Townsville, Rockhampton, Toowoomba, Lismore, Bendigo, Launceston, Hobart, Port Pirie, Kalgoorlie, Broome, Tamworth, Wollongong and Albury. These laboratories were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide medical practitioners of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other hand, is essential to the efficient investigation of disease and the effective operation of control measures.

From this standpoint, the laboratories have already proved their value in the determination of leptospirosis and endemic typhus in North Queensland, in the investigation of special local problems at Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations close co-operation has existed with State and local health and hospital

services ; especially is this so in Queensland where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers hitherto unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the Sydney School of Public Health and Tropical Medicine.

A major part of the work performed at the Kalgoorlie laboratory, since its establishment in 1925, has been the medical examination, on behalf of the State Department of Mines, of employees and applicants for employment in the metalliferous mines in Western Australia. These examinations are performed in accordance with the provisions of the State Mines Regulation Act and the Mine Workers' Relief Act, the objects of which are to provide a healthy body of men for the industry and to free the industry of serious pulmonary disease and to protect the interest of sufferers. The examinations include clinical, laboratory and radiographic investigation. By means of a mobile X-ray unit an annual tour is also made of outlying mining centres.

X-ray facilities are also provided at the Bendigo laboratory, as part of the campaign against tuberculosis, for the examination of miners and for other radiographic work in the district.

4. **Commonwealth Acoustic Laboratories.**—The Department of Health established the first of the series of Acoustic Laboratories in January, 1947, in Erskine House, York Street, Sydney. The laboratory continued and expanded the work of the Acoustic Research Laboratory which was sponsored by the National Health and Medical Research Council during the years 1942-1946 for the purpose of investigating problems of noise and difficulties of intercommunication in aircraft and tanks. After the 1939-45 War the Acoustic Research Laboratory directed its attention to the problem of deafness in children, particularly the group whose affliction was caused by the mothers contracting rubella in the early months of pregnancy.

The taking over of the Acoustic Research Laboratory by the Department of Health was influenced by the request from the Repatriation Commission for technical assistance in the matter of the supply of hearing aids to deafened ex-servicemen. Arrangements for this purpose were completed and branch laboratories were established in all other State Capital Cities.

During 1948 the Acoustic Laboratories Act was passed to allow the expansion of activities on the following lines :—(1) To carry out the requirements of the Repatriation Commission for deafened ex-Service personnel and to provide a similar service for the Commonwealth Department of Social Services in respect of deafened ex-Service personnel whose disability was not caused by war service ; (2) to assist the Education Departments of the States in measuring deafness, fitting aids, and maintaining hearing aid equipment for school children ; (3) to act on behalf of various State and other authorities who desire to have independent tests made before assisting financially in the purchase of hearing aids for people under their care ; and (4) the investigation of problems associated with noise in industry.

The laboratory in Sydney is responsible for the training of personnel for the whole Acoustic Service, the production of equipment, the calibration of hearing aids and audiometers and the technical administration of the branch laboratories.

5. **Commonwealth Bureau of Dental Standards.**—The National Health and Medical Research Council sponsored the Dental Materials Research Laboratory during the years 1939-1946, for the purpose of assisting the Defence Services, the Medical Equipment Central Committee and other Government Departments in the selection and purchase of suitable dental equipment and materials. Valuable assistance was also given to Australian manufacturers of dental materials in relation to improvement of their products and the development of new materials.

Much of the work was of a routine nature and after the 1939-45 War the National Health and Medical Research Council decided to cease its sponsorship, but recommended that the Department of Health should take over the laboratory as it was serving a good purpose. This was done in January, 1947, and the laboratory was renamed the Commonwealth Bureau of Dental Standards and is at present situated in the grounds of the University of Melbourne.

The functions of the Bureau are as follows :—(1) Original research into dental equipment, materials, techniques and processes ; (2) the development, through the Standards Association of Australia, in consultation with a representative committee of the Commonwealth Department of Health, of the Australian Dental Association and of manufacturers and distributors, of specifications for dental materials and equipment ; (3) regular systematic surveys of dental materials on sale to the profession in Australia, and the reporting of the results of such investigations in recognized Australian scientific journals ; and (4) the provision of a consultative service and testing facilities for local manufacturers and distributors of dental materials with the view to assisting them in the improvement of existing products and the development of new materials.

6. **The School of Public Health and Tropical Medicine.**—The Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney as from 4th March, 1930, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The work of the school comprises both teaching and investigation. Courses are held for the University post-graduate diploma of public health and the diploma of tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Other classes include students in architectural, social and school hygiene, and lay officers and nurses in the tropical services and missionaries. In addition to this work throughout the war, all the resources of the School were made available for the training of medical and hygiene officers and other ranks from all the Services of the Australian and Allied Forces.

Investigational work covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out not only in Australia but in co-operation with the local administrations in Papua, New Guinea, Norfolk Island and Nauru. Sections of Child Health and Occupational Disease have been established and suitable staff selected.

7. **The Australian Institute of Anatomy.**—Information concerning the Australian Institute of Anatomy at Canberra is given in previous issues of the Official Year Book (*see* No. 32, pp. 919-21). In 1931 the Institute became an integral part of the Commonwealth Department of Health. The work of the Institute on general problems of comparative anatomy has now been concentrated on aspects of structure and function with special reference to the development of the growing child. Biochemical and biological research in this field is being developed in close association with the model kindergarten centres established by the Department in each capital city (*see* par. 10 below). Work in specialized aspects of nutrition has steadily increased. The Institute now plays an important part in research and the scientific application of nutritional knowledge under Australian conditions. The background of comparative anatomy and the museums of the Institute are maintained as part of the general plan of work. *See also* Chapter XXIX.—Miscellaneous.

8. **The Northern Territory Medical Service.**—As from 1st April, 1939, the Commonwealth Department of Health assumed administrative responsibility for the medical and health services of the Northern Territory, absorbing the Northern Territory Medical Service. With civilian evacuation during the 1939-45 War, military control of the

medical services operated in the years 1942 to 1945. Civilian control was resumed by the Department during the period November, 1945 to May, 1946, starting at Alice Springs and gradually extending north to Darwin. The hospitals at Alice Springs, Tennant Creek, Katherine and Darwin, and the Health Laboratory at Darwin were re-established as civilian institutions.

The Darwin Hospital, when the new ward is completed, will have 187 beds, Alice Springs Hospital will have 90, Katherine Hospital 25 and Tennant Creek Hospital 25. The existing leprosarium at Channel Island will be replaced by a new leprosarium on the mainland to accommodate 300 inmates. The new leprosarium is in course of construction. A pathologist has been appointed to the Health Laboratory. Dental services are available and two clinics have been established, one at Darwin and one at Alice Springs, whilst mobile road and aerial units serve the outback.

An aerial medical service, operated by the Department, is based on Darwin. De Havilland Drover and Dragon aircraft are used, the pilots being supplied by arrangement with Trans-Australia Airlines. Emergency and regular monthly routine visits and surveys are undertaken. At Alice Springs medical officers of the Northern Territory Medical Service provide free service for the Flying Doctor Service base.

The Commonwealth Department of Health maintains a Quarantine Station at Darwin which is a first port of entry for oversea aircraft. Public health services are provided at large centres and all other centres of population are visited periodically by the Senior Health Inspector.

9. **National Fitness.**—Health authorities in Australia have closely followed the world-wide movement for the advancement of physical fitness and in several States active work has been proceeding over some years. In 1938, following a recommendation of the National Health and Medical Research Council, the Commonwealth Government agreed to appoint a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and local government authorities in the movement. Meetings of this Council are held at regular intervals, at least annually. Meanwhile, active State Councils have been formed in all States. As a result of the recommendations of the central Council, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In July, 1941 a National Fitness Act was passed by the Commonwealth Parliament to ensure greater permanence to the movement, and in June, 1942 the Commonwealth grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory. In 1951 the total grants were extended for a further period of three years. The movement continues to develop and to gain public interest and support throughout Australia.

10. **The Pre-school Child.**—Sessions of the National Health and Medical Research Council and the reports of the Commonwealth Advisory Council on Nutrition have called attention to the need for greater effort throughout Australia directed towards the care of the growing child, especially during the pre-school period. Movements for the care of the infant and the welfare of the school child are already developed by State authorities as recorded in §§ 7 and 8 below. The Commonwealth Government felt that more could be done for the child of pre-school age, and it was decided to give a lead by making it possible to demonstrate what could be done and the practical methods which could be applied.

The Commonwealth Government therefore decided to establish in each capital city a pre-school demonstration centre, known as the Lady Gowrie Child Centre, and in order to achieve the best results in association with those who have had experience in this field it has secured the co-operation of the Federal Organization of Kindergarten Unions which is operating under the title of "The Australian Association for Pre-school Child Development". A suitable site was secured in each capital city and the necessary school structure was built. Formerly the administration of these centres was under

the direction of the local Kindergarten Union and the employment of staff was made with the approval of the Commonwealth Department of Health. Recently the local Lady Gowrie Child Centre Committees were given a greater degree of autonomy, so that while the technical supervision still rests with the Australian Association for Pre-school Child Development, the management of each centre, including staffing, is in the hands of the local Committee. This development is associated with a change in the method of financial control. An annual grant is made to each Committee towards the cost of the centre, the disbursement of these funds being at the discretion of the local Committee, subject to the general supervision of the Australian Association for Pre-school Child Development. This applies in so far as the educational side is concerned, and in this field advantage is being taken of the opportunity to try new methods and to make systematic records of observations with the object of securing reliable knowledge of the educational technique of this pre-school period.

Along with this educational practice there proceeds also the study of physiological requirements of the child and of the interaction between physical and mental health under varying conditions. The children available at these centres provide a considerable mass of human material for control and study, which is of great value in view of the importance of the study of growth and of nutrition of their age-period. Not only are routine measurements made of height, weight and other bodily data, but problems of nutrition are studied in detail. The medical work at each State centre is conducted on a uniform basis, according to a scheme formulated at, and directed from, the Australian Institute of Anatomy, Canberra, where parallel investigations on the laboratory side are being undertaken.

**II. Organization for the Control of Cancer.**—The persistent increase in cancer mortality has led to the development in Australia of a national organization directed towards the control of this disease. The Commonwealth Department of Health has actively participated in this movement. Since 1928 the Australian Cancer Conferences, convened by the Department, have provided an opportunity each year for those actively engaged in the campaign against the disease to meet for the discussion of problems and the determination of lines of action and further development. The tenth conference in this series met in New Zealand in February, 1939, and so marked an association which has been maintained between Australia and the Dominion since the inception of the conferences.

A large amount of radium purchased in 1928 by the Commonwealth Government for use in treatment and research has been distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all requiring it, irrespective of ability to pay. This work is co-ordinated by the Department.

Close co-operation is maintained between research workers, physicists and biochemists and the medical men engaged in the clinical investigation and treatment of the disease, so that problems are mutually investigated and treatment is applied with the highest attainable degree of scientific accuracy.

Realizing the essential importance of accuracy in determining the quality of radiation used in the treatment of cancer and in measuring the dosage of this radiation actually delivered to the tumour, and the need for the investigation of physical problems in connexion with the utilization of X-rays and radium in the treatment of disease, the Commonwealth Department of Health in 1935 extended the work of the Commonwealth Radium Laboratory, established in 1929, to include the investigation of the physical problems of radiation therapy generally. This laboratory, known as the Commonwealth X-ray and Radium Laboratory, is situated by agreement with the University of Melbourne within the University grounds, and is maintained, controlled, and staffed by the Commonwealth Department of Health. It is accommodated in a building specially designed for work with X-rays and radium, and is amply provided with all necessary equipment for research work, including a 500,000 volt high tension generator.

The laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the

measurement of radiation exposure of X-ray and radium workers. The laboratory has continued to repair radium containers. It also undertakes investigations into physical problems arising in the use of X-ray and radium in treatment.

During the year 1952, a total of 136,640 millicuries of radon was prepared and issued from the laboratory, while 35,260 millicuries were issued by the associated centres in Sydney, Adelaide and Brisbane. The corresponding figures for 1951 were 145,648 and 42,089 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is a unique Australian development, and enables a very efficient use to be made of the radium available.

The development of atomic energy programmes overseas has made available supplies of artificial radio-isotopes which can be used as an alternative to natural isotopes such as radium and radon. Supplies of radio-phosphorus and radio-iodine are now being distributed by the laboratory for medical work throughout Australia according to a policy developed by the National Health and Medical Research Council Standing Committee on X-rays. The use of radio-iodine has involved the laboratory in the development of a scheme of physical measurements which can readily be made in hospitals.

**12. Animal Quarantine.**—Animal quarantine is authorized by the provisions of the Quarantine Act 1908–1950 and has as its objective the prevention of the introduction or spread of diseases of animals. This legislation covers the importation of all animals, raw animal products, biological cultures, etc., associated with animal diseases and goods associated with animals.

Domesticated animals, i.e., horses, cattle, pigs, sheep, goats, dogs, cats and poultry, are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia they are subject to quarantine detention.

Zoological specimens are imported into registered zoos where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All of these premises are kept under constant surveillance. Raw animal products such as hair, special types of wool, skins, hides, etc., are subjected to special treatment under quarantine control, whilst such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items such as harness, fittings, fodder, ship's refuse, etc., are appropriately treated to destroy possible infection.

The Division of Veterinary Hygiene was created in 1926 to deal with the administration of animal quarantine; formerly the full responsibility of this aspect was carried by the Director of Quarantine. The organization of the Division provides an excellent example of Commonwealth and State co-operation. The Central Administration is situated within the Health Department at Canberra, with a Director, an Assistant Director and Veterinary Officers. By provision in the Quarantine Act and by arrangement with the States, the Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State and members of his staff Quarantine Officers (Animals). These State officers, acting in their Commonwealth capacity, implement quarantine policy as formulated by the Central Administration. Quarantine accommodation is provided at permanent animal quarantine stations at each Capital City.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world. Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications. Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization. In matters of policy and the implementation of quarantine control of imports there is a close liaison with the Department of Trade and Customs.

The Division collaborates with the "General" and "Plant" Divisions of the Quarantine Service. Many diseases of animals are communicable to man and for this

reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" Divisions overlap, many items such as insects, fodder, straw, etc., being the subject of combined control.

13. **Plant Quarantine.**—Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country. Under the Quarantine Act 1908–1950 general powers are held by which the quarantine inspectors are required to examine all plant material at the first port of entry and to release only such material as is free from diseases and pests. Everyone reaching Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found deliberately evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel for which they are reimbursed by the Commonwealth. In 1921 the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created under a Director who is responsible for policy and legislation and for co-ordinating the work of the State Officers who carry out the detailed administration in their capacity as Commonwealth Officers.

Any plant material found carrying diseases or pests or suspected of doing so may be ordered into quarantine for remedial treatment, or if the treatment be impracticable, may be destroyed. Such treatments are paid for by the importer. Air transport has created many new problems in maintaining effective control. It is impossible in this summary to give details of regulations governing the different types of plants, but the following will indicate certain broad principles in them :—(a) The importation of plant diseases, insect pests, noxious fungi, certain weeds and poison plants, and soil likely to carry these things is prohibited; (b) Agricultural seed must conform to standards of purity; (c) Many commodities such as hops, cotton, peanuts in shell, nursery stock, potatoes, important crop seeds, vines and specified plants may only be imported by approved importers under special conditions; (d) Certain plant products, such as bulbs and timber (in logs or sawn), from specified areas may only be imported if accompanied by certificates showing that prescribed treatment has been given in the country of origin.

The regulations are constantly being amended in the light of experience, with the object of maintaining for Australia the freedom from a large number of serious diseases and pests of plants which ravage crops in other lands.

#### § 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts in regard to the compulsory notification of infectious diseases and the precautions to be taken against the spread thereof may be conveniently dealt with under the headings—Quarantine; Notifiable Diseases, including Venereal Diseases; and Vaccination.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows :—(i) Human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) Animal quarantine which controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports, and (iii) Plant quarantine which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds. (See § 3, paras. 12 and 13 above.)

In regard to interstate movements of animals and plants, the Act becomes operative only if the Governor-General be of opinion that Federal action is necessary for the protection of any State or States; in general, the administration of interstate movements of animals and plants is left in the hands of the States.

The Commonwealth controls stations in each State for the purposes of quarantine of humans, animals and plants.

3. Notifiable Diseases.—(i) *General. (a) Methods of Prevention and Control.* Provision exists in the Health Acts of all the States for the observance of precautions against the spread and for the compulsory notification of infectious disease. When any such disease occurs, the local authority must at once be notified, and in some States notification must be made also to the Health Department. The duty of making this notification is generally imposed, first, on the head of the house to which the patient belongs, failing whom on the nearest relative present, and, on his default, on the person in charge of or in attendance on the patient, and, on his default, on the occupier of the building. Any medical practitioner visiting the patient is also bound to give notice.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State as to the health, cleanliness and general sanitary state of their several districts, and must report the appearance of certain diseases. Regulations are prescribed for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing, or other articles which have been exposed to infection. Bacteriological examinations for the detection of plague, diphtheria, tuberculosis, typhoid and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as small-pox and leprosy.

(b) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and Territory the diseases notifiable in 1952 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

**DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY AND NOTIFICATIONS FOR THE YEAR ENDED 31st DECEMBER, 1952.**

\* Not notifiable. † Acute rheumatism, chorea, dengue, infantile diarrhoea, filariasis and homologous serum jaundice were made notifiable in Victoria in June, 1952. ‡ Acute rheumatism, chorea and infantile diarrhoea have been notifiable in New South Wales since September, 1952.

NOTE.—No cases of cholera, plague, smallpox, epidemic typhus or yellow fever were notified.

(ii) *Veneral Diseases.* The prevention and control of venereal diseases are undertaken by the States. Each State has a Venereal Diseases Act, or provisions in the Health Act govern the working of the measures taken to combat these diseases. Under these Acts notification has been made compulsory in every State. Steps have been taken to ensure free treatment by medical practitioners or in subsidized hospitals and clinics. Registered pharmaceutical chemists are allowed to dispense prescriptions only when signed by medical practitioners. Clinics have been established and, in some cases, beds in public hospitals have been set aside for patients suffering from these diseases.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person and the employment of an infected person in the manufacture or distribution of foodstuffs.

4. *Vaccination.*—There is statutory provision for compulsory vaccination in all States except New South Wales. Jennerian vaccine for vaccination against smallpox is prepared at the Commonwealth Serum Laboratories in Melbourne. There has been a considerable increase in the demand for vaccination, especially by people about to travel overseas by air, so that they may conform with the quarantine requirements of countries to which they are travelling.

### § 5. Inspection and Sale of Food and Drugs.

Public Health legislation in force in all States provides for the inspection of foods and drugs with the object of ensuring that all those goods which are sold shall be wholesome, clean and free from contamination or adulteration; and that all receptacles, places and vehicles used for their manufacture, storage or carriage shall be clean. For further particulars in this connexion see § 1. State Public Health Legislation and Administration, pp. 509-13.

### § 6. Supervision of Dairies, Milk Supply, Etc.

1. *General.*—In earlier issues of the Official Year Book (see No. 22, p. 498) reference was made to the legislation in force in the various States to ensure the purity of the milk supply and of dairy produce generally.

2. *Number of Dairy Premises Registered, 1952.*—The following table shows, so far as the particulars are available, the number of dairy premises registered and the number of cows in milk thereon. In some States registration is compulsory within certain proclaimed areas only.

#### DAIRY PREMISES REGISTERED, AND COWS IN MILK THEREON, 1952.

### § 7. Medical Inspection of School Children.

1. *General.*—Medical inspection of school children is carried out in all the States and the Australian Capital Territory. Medical staffs have been organized, and in some States travelling clinics have been established to deal with dental and ocular defects.

2. **New South Wales.**—The School Medical Service became a Division of the Department of Public Health in 1946, having previously been administered by the Department of Education since 1913-14, when it was founded. It provides a service of medical inspection of pupils of all schools administered by the Department of Education and the majority of other schools in the State. It is prepared to provide an equal service for all schools when requested. The primary object of the service is the medical examination of children to discover any departure from normal in the health of a child, either physical or mental, and to notify the parent or guardian in order that the child may be further investigated to determine the need for treatment. In many cases it is not possible to make a diagnosis of the conditions found at the time of the examination. This is due partly to the fact that only a limited time can be devoted to each individual examination, and also to lack of facilities within the service for further investigation. Treatment is accepted as the responsibility of the practising medical profession.

In the metropolitan, Newcastle and Wollongong areas and in a number of the larger towns in the State, each school—primary and secondary—is visited annually, and children in 1st and 5th classes and 1st and 5th years are fully examined. Children in other classes are reviewed, as necessary. In the remainder of the State it is the aim of the service to visit schools every three years, and all children are examined. Up till now it has not been possible to cover the State fully owing to shortage of medical staff.

The establishment for the School Medical Service consists of 32 medical officers (including a Director and a Deputy Director), a part-time medical officer, 4 psychiatrists, 22 nurses, 10 speech therapists, 4 psychologists, 6 social workers (5 full-time and one part-time), a part-time ear, nose and throat surgeon, 2 trainees in speech therapy, 14 clerical officers and a switchboard operator. Except for speech therapists, of whom only five have been appointed, the staff of the service is maintained at full strength.

Nurses are employed in the metropolitan, Newcastle and Wollongong areas to assist in the preparation of the schools prior to the visit of the medical officers, and to follow up cases where parents have not sought medical advice as recommended by medical officers.

In 1952 every school in the metropolitan, Newcastle and Wollongong areas was visited, and a number of schools in country areas. In the metropolitan area there were 202,653 children in primary schools and 59,069 children in secondary schools; in the remainder of the State there were 226,228 in primary schools and 58,395 in secondary schools. The number of full examinations of primary school children in the metropolitan areas was 57,408, and in secondary schools 19,855. The figures for the remainder of the State were 45,537 in primary schools and 14,848 in secondary schools—thus making a total of 137,648 full examinations carried out. The number of children who were reviewed was 30,730.

Notices covering conditions departing from the normal were sent by medical officers in 20.7 per cent. of the cases of full examination. This percentage is less than for previous years, owing to the fact that notices were sent regarding teeth only when the state of the mouth was particularly unhealthy, and not when minor defects were observed.

During the year two oculists visited the western areas of the State, and in addition to the examination of children refracted the eyes of those who showed loss of visual acuity.

There are four Child Guidance Clinics administered by the School Medical Service, and the clinics examine children referred by school medical officers, teachers, and Child Welfare Department and various outside bodies. Boy and girl delinquents are examined at the clinics at the request of the Children's Court.

A hearing clinic conducted by a part-time ear, nose and throat surgeon functioned throughout the year. The parent of any child found to have a defect of hearing at the time of the school medical examination was invited to bring the child to the clinic for a full investigation in order to determine the cause of the loss of hearing.

Recommendations with regard to children examined and found to have severe loss of hearing were made to the Education Department, as to the most suitable method of education. Through liaison with the Commonwealth Acoustic Laboratory a number of children were fitted with hearing aids free of charge.

Five full-time speech therapists were appointed at the beginning of the year and five clinics were established. There is a considerable field for work in speech therapy, and it is hoped that these clinics will be the forerunners of a number of others.

All students desirous of entering a Teachers' College were examined by the School Medical Service. The health of the students within the colleges is supervised by medical officers of this service, who in addition to this duty, also act as lecturers at the colleges in the subject of school health. The Department of Education referred a number of teachers for medical examination, covering sick leave cases, cases for retirement, etc.

The service provides a nurse at each of the two National Fitness Camps, whose duty is to provide first aid treatment for the children attending the camps and to advise on matters relating to their health.

Other duties of the School Medical Service include the supervision of the health of children attending departmental nursery schools, reporting on matters relating to school sanitation, and special examination of children, e.g. those attending the Far West Health Camp, immigrant children on arrival, children in attendance at Glenfield Special School, and special cases referred by the Child Welfare Department or the Education Department.

3. **Victoria.**—Medical inspection of school children was established in 1909. Regular medical examination every three years is carried out within the limits of staffing to ascertain defects, to ensure as far as possible suitable treatment and to refer children physically and mentally handicapped to special schools and classes available for their education.

At the routine inspection each child is weighed and measured, eyesight and hearing tested and defects of teeth, throat, skin and posture noted. The child is questioned and advised concerning general hygiene, cleanliness, etc., and is then undressed and examined as for life assurance. A school nurse assists each medical officer at the examination and is also responsible for the sending of defect notices to the parent. In many cases she also interviews the mother either at the school or in the home, thus acting as liaison between medical officer, parent and teacher. In cases where a serious defect is found the parent attends the school by appointment for a discussion with the medical officer. School nurses visit all metropolitan schools twice each term to carry out hygiene inspections, for pediculosis, cleanliness and infectious skin conditions. The cities of Ballarat, Bendigo, Geelong and Mildura are also visited.

Special classes of school : are provided by the Education Department for physically and mentally handicapped children, such as the partially sighted, partially deaf, undernourished, those with minor postural defects, speech handicaps, mentally retarded, etc. Children attending these classes are kept under regular medical supervision during their school career. Many children are given special appointments on account of behaviour problems, truancy, etc. These cases are also investigated by a school nurse, and, if necessary, sent on to the appropriate psychiatric clinic. Visits to state schools within the metropolitan area are maintained regularly. Extension of the service to children attending Roman Catholic primary schools in metropolitan districts and country areas as medical staff became available was agreed upon in April, 1950, and these schools are now included in the regular itineraries.

Country districts are gradually being included, and all schools in the regions of Glenelg, East Gippsland, Gippsland and Central Highlands are now under regular medical inspection every three years.

During the year ended 30th June, 1952, 89,883 children were examined by medical officers in schools and 108,199 by the School Nursing Staff. The cost of the School Medical Service for 1952 was £45,378.

The School Dental Service affords dental treatment to children attending primary schools and resident in institutions in certain parts of the State. The districts included are progressively extending as facilities and staff increase. Children from metropolitan

schools in industrial suburbs are transported to the School Dental Centre by contract bus service. Country schools are visited by mobile dental units. Three new dental vans and a two-surgery semi-trailer unit have been added to the mobile service, and all former country itineraries were resumed in 1952. This service now extends through the Mallee, Gippsland and East Gippsland regions, and parts of the Goulburn, Upper Goulburn and Port Phillip regions. As further mobile units are obtained, new regions will be added. The Dental Division has a staff of 31 dentists and 30 dental attendants. During 1952, 24,770 children attending 218 schools received dental examination and all necessary treatment, including 27,466 extractions, 31,347 fillings and 11,747 other treatments. The cost for the year 1952 was £82,500.

4. **Queensland.**—The School Health Services Branch, under the direction of the Chief Medical Officer, consists of three sections known as the Medical, Dental and Nursing Sections.

Medical inspection of schools and school children is carried out by two full-time and one part-time officer under the general direction of the Chief Medical Officer, School Health Services. These officers examine as thoroughly as possible all children who have recently entered school and those children referred to them by the school nurses.

The nurses now number 16. Each nurse is assigned a group of schools and in areas where Departmental medical officers are stationed, screens all children prior to the officer's visit. In other areas parents are notified direct of suspected defects found by the nurse who also reports on the sanitation, cleanliness and ventilation of the school, notifies the head teacher of all infectious or verminous children and advises regarding appropriate treatment. During 1951-52, school nurses examined 81,691 children. In the metropolitan area the nurses examine the teeth and report all eligible carious cases to the Dental Hospital for treatment.

The Department now has a staff of 23 dentists, and one part-time dental inspector. These officers are each assigned a district and visit schools in rotation. During 1951-52, 40,133 children were examined; 29,667 extractions were performed; and there were 68,740 fillings and 34,128 other treatments.

In order to give the same medical and dental facilities to the children of the back country as are obtainable by city dwellers, four Rail Dental Clinics equipped on the most modern lines have been constructed. A motor car is carried on a railway wagon attached to each clinic for use at each stopping place to visit the surrounding villages served by the rail centre.

Local practitioners in Western Queensland act as part-time ophthalmic officers.

The work of hookworm control (dealing with *anchylostoma duodenale* and *neecator americanus* infestation) throughout the State is under the control of the Director-General of Medical Services. This activity has resulted in a marked reduction of the incidence of this dangerous menace on the northern coastal belt. Two sisters of the School Health Services are seconded for hookworm duty. The personnel consists of a microscopist, a health inspector and two trained sisters.

This service cost £74,381 in 1951-52.

5. **South Australia.**—The system of medical inspection in operation requires the examination of all children attending both primary and secondary schools. As a rule they are examined three times during their primary course in Grades I, IV, and VII., and twice during their secondary course in the 2nd and 4th years. Country schools are not visited annually because of staff shortage, but approximately every three or four years. On these visits all the children are examined. Reports are furnished to the parents of any remediable defects found during these examinations. The medical inspectors meet the parents after the examination of the children and give an address on the prevention and treatment of the conditions which were found during the inspection. After these lectures the parents are given an opportunity to ask questions regarding their children. When there is an epidemic or a threatened epidemic in a district, similar lectures are given and special visits paid to all the schools in that locality. All students are examined before they enter the Teachers' College and before they begin teaching. Medical and physiological tests are conducted four times during the course (two years) on all candidates taking the Diploma of Physical Education. Courses of lectures in hygiene and in first aid are given to all College students and in home nursing to Domestic Arts students.

The medical staff consists of a principal medical officer, 4 full-time and a part-time medical officer and 5 trained nurses. Five dentists and 4 dental assistants are

attached to the Branch. On 1st July, 1951 the Medical Branch of the Education Department was transferred to the Department of Public Health. The Psychology Branch and Speech Therapist remain in the Education Department.

During 1952, 31,913 children were examined by medical officers and of these 2,217 required notices for defective vision, 642 for defective hearing, and 2,204 for tonsils and adenoids.

The Psychology Branch consists of a psychologist, 2 assistant psychologists, a senior guidance officer, 2 guidance officers, 2 social workers, an advisory teacher of opportunity classes, an advisory teacher of hard of hearing children, a half-time speech therapist and a part-time consultant psychiatrist. The work of the Branch may be divided into three sections—clinical, educational and vocational.

*Clinical.* The clinical work involves examining difficult children of many types, including those with such problems as backwardness, retardation, truancy, delinquency, etc. In addition, the parents of all children examined are always interviewed and their co-operation is sought.

*Educational.* In addition to supervising opportunity and special classes for children backward in school work, the Branch advises on questions of placement and types of education for ordinary children in schools.

*Vocational.* The guidance officers test and advise all children about to leave school. The guidance officers are also responsible for the supervision of record cards where used in primary schools.

The Branch also undertakes lectures to students of the Teachers' College as well as to other interested organizations such as mothers' clubs.

The cost of these services combined in 1950-51 was £15,020.

6. **Western Australia.**—Under the Public Health Act 1911-1952 the medical officers appointed by the local authorities became medical officers of schools and of school children. The principle aimed at is that every school child shall be examined once every two years.

In the Health Department there are five full-time medical officers for schools. During 1952, 40,407 children were examined (metropolitan 21,671, country 18,736), of whom 20,867 were boys and 19,540 girls. There were 209 schools visited, comprising metropolitan, 52 State schools and 21 convents and country, 168 State schools, 40 convents and one kindergarten. During 1952 the 12 full-time dental officers employed visited 18 metropolitan schools, and in dental vans visited 153 country schools; the number of children examined was 9,725 of whom 6,505 were treated with parents' consent. The cost of this service for 1951-52 was £16,370.

7. **Tasmania.**—During the year 1952 2 full-time and 3 part-time medical officers were employed in the examination of school children. The Government medical officers also performed routine examinations as part of their ordinary duties. One part-time and 12 full-time sisters visited homes and schools regularly. Of the 22,805 children examined by medical officers 12,521 were found to have defects.

There are now three dental clinics—one at Hobart, another at Launceston, and the third at Devonport—each with a full-time dental surgeon in charge. In addition, five mobile clinics operated in various parts of the State. There were 11,819 new visits paid to dental clinics and 14,757 repeat visits.

The cost of medical and dental services for the year ended June, 1952 was £36,628.

8. **Australian Capital Territory.**—By arrangement, education facilities are provided by the Education Department of New South Wales. In 1930 the Commonwealth Department of Health took over from the State the medical inspection of school children and carried out examinations of entrants and those leaving in that year. From 1943 to 1951, all primary pupils of Government schools in the Territory were medically examined annually.

During 1951, with the appointment of an Infant Welfare and Schools Medical Officer, a plan for triennial examinations of children in primary and secondary schools was introduced, more attention being paid to those children with defects who were marked for review. In 1951, 2,276 children were examined. (This figure includes 802 children attending private schools, which were brought into the scheme for the first time.)

In 1952, 1,438 children were given routine examinations, and an additional 514 children were given partial examinations when they had special conditions marked for

review. At Pre-School Play Centres and Nursery Schools all children were examined on entrance, and reviewed in their second year of attendance. In 1952, approximately 1,000 pre-school examinations were made.

Parents are notified of defects found. The commoner ones are those of hearing, eyesight, and nose and throat. Amongst children of school age, approximately 4 per cent. have defective sight and 5 per cent. have defective hearing.

### § 8. Supervision and Care of Infant Life.

1. **General.**—The number of infant deaths and the rate of infant mortality for the five years 1948 to 1952 are given in the following table, which shows that during this period 23,711 children died in Australia (excluding Territories) before reaching their first birthday. Further information regarding infant mortality will be found in Chapter X.—Vital Statistics:—

#### INFANT DEATHS AND DEATH RATES.

(a) Excludes Territories.

(b) Number of deaths under one year of age per 1,000 live births registered.

During recent years greater attention has been paid to the fact that the health of the community depends largely on pre-natal, as well as after-care, in the case of mothers and infants. Government and private organizations, therefore, provide instruction and treatment for mothers before and after confinement, while the health and well-being of mother and child are looked after by the institution of baby health centres, baby clinics, crèches, visits by qualified midwifery nurses, and special attention to the milk supply, etc.

2. **Government Activities.**—In all the States acts have been passed with the object of supervising and ameliorating the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out to suitable persons of the wards of the State, and wherever possible the child is boarded out to its mother or near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children. (See also in this connexion Chapter XIV.—Welfare Services.) Under the provisions of the Maternity Allowances, Part V. of the Social Services Consolidation Act 1947–1952, from 1st July, 1947 a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born. Where there are one or two other children under 16 the amount payable is £16, and where there are three or more other children under 16 the amount payable is £17 10s. Where more than one child is born at a birth the amount of the allowance is increased by £5 in respect of each additional child born at that birth. Detailed particulars regarding Maternity Allowances are given in Chapter XIV.—Welfare Services.

3. **Nursing Activities.**—(i) *General.* In several of the States the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (see No. 22, pp. 515-6) information may be found concerning the activities of institutions in each State.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations :—

**BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1952.**

(a) Year ended 30th June, 1952.

(b) Includes eight mobile units.

(c) Includes seven mobile units.

In the last twenty years the number of attendances at the Baby Health Centres has more than trebled. The numbers of attendances, at five-yearly intervals, since 1930 were as follows :—1930, 919,893; 1935, 1,355,306; 1940, 2,035,299; 1945, 2,927,764; 1950, 3,049,375. During the year 1951 the number of attendances was 2,958,852.

### § 9. Hospital Benefits Act.

1. **General.**—Under the Hospital Benefits Act 1951, which repealed the Hospital Benefits Act 1945-1948, the Commonwealth has entered into agreements with the States to pay to the States hospital benefits at agreed rates for beds occupied by qualified patients in public hospitals; and has made regulations approving the payment of hospital benefits in respect of patients in private hospitals, the payment of additional benefits and the payment of hospital benefits in respect of persons temporarily absent from Australia.

2. **Hospital Benefits Agreements.**—These agreements provide that the agreements under the Hospital Benefits Act 1945-1948 shall be deemed to have ceased to be in force. The benefit rate is 12s. per day in relation to a qualified patient who is a pensioner as defined in the National Health (Medical Services to Pensioners) Regulations, or the dependant as so defined of a pensioner not being a qualified patient in a State Benevolent Home and who—(a) being eligible, has enrolled for benefit under the medical practitioners' service arranged by the Director-General of Health under the National Health Service Act 1948-1949; (b) produces to the proper hospital authority an entitlement card issued by the Commonwealth for the purposes of the medical services prescribed by the National Health (Medical Services to Pensioners) Regulations; and (c) is not a contributing patient as defined in the Hospital Benefits Regulations.

The benefit rate in relation to all other qualified patients is 8s. per day.

The agreements provide that the States shall ensure that the charges per day payable by qualified patients in respect of beds in public hospitals shall be reduced by the benefit rate.

3. **Hospital Benefits Regulations.**—Private hospitals are entitled to claim benefits for beds occupied by qualified patients. These hospitals must be approved by a joint committee of Commonwealth and State Health Authorities before payment of benefit is made. The hospitals are required to reduce each qualified patient's account by the amount of the benefit payable by the Commonwealth. The benefit rate for private hospitals is 8s. per day.

Hospital benefits are payable also to, or in respect of, any person ordinarily resident in Australia who, whilst temporarily absent from Australia, has been a qualified patient in a hospital in any country outside Australia. The benefit rate for these patients is

8s. (Australian currency) per day. Arrangements have been made for these benefits to be paid in several countries overseas where Commonwealth offices are established. Any claims not dealt with overseas receive attention in Australia.

An additional hospital benefit of 4s. per day is payable in respect of each qualified patient in an approved public hospital or an approved private hospital who is a contributor or a dependant of a contributor to the funds of a hospital benefit organization registered by the Commonwealth for the purposes of additional benefits. The additional benefit is not payable if the gross fees payable do not exceed 14s. per day. Where the gross fees exceed 14s. per day, but do not exceed 18s. per day, the rate of additional benefit payable is ascertained by deducting an amount of 14s. from the amount of those gross fees per day. The additional benefit is paid through the registered organization, either to the contributing patient or to the hospital concerned.

### § 10. Mental Institution Benefits Act.

The Mental Institution Benefits Act 1948 authorizes the execution on behalf of the Commonwealth of agreements with all or any of the States relating to the provision of mental institution benefits.

Agreements made with all States provide for the payment of benefits at a rate per patient-day determined separately in respect of each State and based on the amounts received by that State from the estates and relatives of patients during the year ended 30th June, 1948. Under the agreements the States are required to ensure that no means test is imposed on, and that no fees are charged to, or in respect of, qualified persons.

### § 11. Tuberculosis Act.

The main provisions of this Act, which was assented to on 25th November, 1948, are as follows:—(a) Section 5, which authorizes the Commonwealth to enter into an arrangement with the States for an effectual national campaign against tuberculosis; (b) Section 6, which empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis; (c) Section 8, which provides for the setting up of an Advisory Council to advise the Commonwealth Minister for Health on matters relating to the national campaign; and (d) Section 9, which authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and their dependants to enable sufferers to give up work and undergo treatment, and thus minimize the spread of infection.

The Commonwealth has completed an arrangement with each State, whereby each State is required to conduct an effectual campaign against tuberculosis and to provide adequate facilities for that purpose. In consideration of this, the Commonwealth undertakes to reimburse the State for all approved capital expenditure in relation to tuberculosis on and after 1st July, 1948, and for net maintenance expenditure to the extent it is in excess of net maintenance expenditure for the base year 1947–48. Thus, the States are required to carry out the actual physical or field work of the national campaign with the Commonwealth acting in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An Advisory Council, known as the National Tuberculosis Advisory Council, has been set up and has already had three meetings. There are eleven members under the chairmanship of the Commonwealth Director-General of Health. The members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and the Chief Administrative Officer of the Commonwealth Department of Health.

A system of tuberculosis allowances has been drawn up and is an important factor in the campaign against the disease. Payments under the scheme were commenced on 13th July, 1950. The rates of allowance from 29th October, 1953 were £9 2s. 6d. a week for a married sufferer with a dependent wife, £5 12s. 6d. a week for a sufferer without dependants (reducible to £3 10s. when maintained free of charge in an institution), and 10s. a week for each dependent child under the age of sixteen (which is additional to child endowment). There is a means test, generous to the sufferer, which has regard only to income and not to property.

### § 12. Pharmaceutical Benefits Act.

A Pharmaceutical Benefits Act was passed by the Commonwealth Parliament in March, 1944 and was amended in September, 1945. This Act was the subject of a High Court action, as a result of which the Government sought by means of a referendum of the people the constitutional power necessary to implement the Act. This power having been granted, a further Pharmaceutical Benefits Act, which repealed the Acts of 1944 and 1945, was assented to on 12th June, 1947. This Act embodied a scheme for providing pharmaceutical benefits to all persons ordinarily resident in Australia. The benefits provided were contained in a Commonwealth Pharmaceutical Formulary, which was subject to periodic revision by a Formulary Committee comprised of members of the medical and pharmaceutical professions. Benefits were supplied without cost to the person receiving the benefit, payment being made by the Commonwealth to authorized suppliers from the National Welfare Fund. Special arrangements existed for supplying benefits or their equivalent to persons residing in isolated areas. These pharmaceutical benefits were first made available to the public on 1st June, 1948. Further Pharmaceutical Benefits Acts were assented to on 25th March, 1949 and 7th July, 1949 respectively, but a clause in the former which sought to compel the use by doctors of official prescription forms when prescribing pharmaceutical benefits was held by the High Court to be invalid. In August, 1950 the Government amended the regulations under the Act, thereby limiting the range of benefits to a list of live-saving and disease-preventing drugs compiled on the recommendation of a special Medical Advisory Committee. These regulations came into force on 4th September, 1950. Subsequent amendments restrict the use of certain drugs to the treatment of specified diseases. By a Pharmaceutical Benefits Act assented to on 1st November, 1952, the number of committees to be established under the Act was to be determined at the discretion of the Minister.

### § 13. Pensioner Medical Service.

The Pensioner Medical Service which commenced on 21st February, 1951, was introduced under the authority of the National Health (Medical Services to Pensioners) Regulations in accordance with the provisions of the National Health Service Act 1948-1949.

Under this service medical treatment of a general practitioner nature, such as is usually rendered in the doctor's surgery or in the patient's home, is provided for eligible pensioners and their dependants, but it does not extend to specialist services. The service also includes the supply of medicines prescribed by medical practitioners under the National Health (Medicines for Pensioners) Regulations. Subject to certain terms and conditions, any registered medical practitioner may participate in the service, which is free to eligible pensioners and their dependants. However, a medical practitioner may charge a pensioner a small fee for "after hours" service or for travelling beyond a certain distance from his surgery. Medical practitioners participating in the service are remunerated on a concessional fee-for-service basis by the Commonwealth, and the pensioner has freedom of choice as to which participating doctor he will consult.

To be eligible for the benefits of the Pensioner Medical Service, a pensioner must be in receipt of an Australian age, invalid, widow's or service pension (but not a war pension) or a tuberculosis allowance, and he must have an entitlement card issued by the Commonwealth for the purposes of the service.

At 30th June, 1952, there were 3,502 medical practitioners enrolled in the Pensioner Medical Service to provide medical services to approximately 501,400 pensioners and dependants. More than 90 per cent. of eligible pensioners have been enrolled for the benefits of the service, and it is estimated that more than 80 per cent. of active general medical practitioners in Australia are participating.

During the year ended 30th June, 1952, participating medical practitioners were paid £1,034,902 from the National Welfare Fund. This was made up of £1,020,905 for 2,332,824 medical services to pensioners and their dependants (1,227,829 surgery consultations and 1,104,995 domiciliary visits), and £13,997 for approximately 140,000 miles travelled by participating medical practitioners, outside a radius of 3 miles from their surgeries, in visiting pensioners and their dependants. The number of medical services rendered by medical practitioners averaged 4.6 per enrolled pensioner and dependants for the year ended 30th June, 1952, but at the end of that year services were being rendered at the rate of 5.4 per eligible person per annum.

### § 14. Free Milk for School Children Scheme.

In 1950 the States Grants (Milk for School Children) Act was passed. The objective of this Act was to improve the diet of school children by the addition of a small quantity of milk each day. All children under the age of thirteen years attending public or primary schools, including nursery schools, kindergartens, crèches and aboriginal missions, are eligible to receive this issue. The Act provides that the cost of supplying the milk, which is given to the children in one-third of a pint bottles, wherever practicable, is reimbursable by the Commonwealth to the States plus half the capital or incidental costs, including administrative expenses incurred in administering the scheme. All States are now participants in the scheme, and at present approximately 700,000 children are receiving free milk.

In the more remote areas powdered milk is supplied where fresh milk is not available. Eventually it is expected that one million children will be covered by this scheme. In the years 1950-51 and 1951-52 the following amounts were reimbursed to the various States and Territories:—1950-51—New South Wales, £35,683; Australian Capital Territory, £92; Total, £35,775; 1951-52—New South Wales, £440,316; Victoria, £140,000; South Australia, £74,642; Western Australia, £67,480; Tasmania, £90,390; Northern Territory, £158; Australian Capital Territory, £3,989; Total, £816,975.

### § 15. Disposal of the Dead by Cremation.

The disposal of the dead by cremation has been in existence in Australia for many years, as the first crematorium was opened in South Australia in 1903. The number of crematoria in New South Wales is five; the first was opened in 1925. There are two crematoria in Victoria; the first crematorium opened in 1905, but was closed in 1926 and re-opened in 1936, while the other one was opened in 1927. There are two crematoria in Queensland, the first being opened in 1934. In South Australia there is one crematorium which opened in 1903. In Western Australia there is one crematorium which opened in 1939. In Tasmania there are two crematoria; the first was opened in 1936.

The following table shows the number of cremations in each State for the ten years 1943 to 1952:—

#### CREMATIONS.

Year.	N.S.W.	Vic.	Q'land.(a)	S. Aust.(a)	W. Aust.	Tas.	Aust.

1952 .. ..	10,165	5,338	2,671	347	929	532	19,982

(a) Year ended 30th June.

## B. INSTITUTIONS.

### § 1. General.

In Australia, institutions related to public health may be classified in three groups: (a) State; (b) public; and (c) private. To the first group belong those institutions wholly provided for by the State, such as the principal mental hospitals in the various States and the Government and leased hospitals in Western Australia. To the second group belong public institutions of two kinds, namely:—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the first of these two kinds belong such institutions as the principal metropolitan hospitals; in the second are included institutions established and endowed by individuals for the benefit of the needy generally. All institutions of a private character are included in the third group. A more or less accurate statistical account is possible in classes (a) and (b), but in regard to (c) general tabulation is, for obvious reasons, impossible. Owing to differences in the dates of collection and tabulation it is impossible to bring statistics of some charitable institutions to a common year.

## § 2. Public Hospitals (other than Mental Hospitals).

1. **General.**—All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for infectious diseases, tubercular patients, women, children, incurables, etc.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals and private hospitals conducted commercially. The particulars for New South Wales in the following tables relate to public hospitals operating under the control of the Hospitals Commission.

2. **Principal Hospitals in each State.**—In earlier issues of the Official Year Book (see No. 22, pp. 481-2) particulars respecting staff, accommodation, etc., of each of the principal hospitals were given.

3. **Number, Staff and Accommodation, 1950-51.**—Details regarding the number of hospitals, staffs and accommodation for the year 1950-51 are given in the following table:—

### PUBLIC HOSPITALS : NUMBER, STAFF AND ACCOMMODATION, 1950-51.

(a) Year ended 31st March, 1951.

In addition to those admitted to the hospitals there are large numbers of out-patients. During 1950-51 there were 991,710 out-patients (cases) treated in New South Wales, 415,495 in Victoria, 485,025 in Queensland, 113,352 in South Australia, 105,698 (estimated) in Western Australia, 84,427 in Tasmania and 10,792 in the Australian Capital Territory, making a total for Australia of 2,206,499.

5. **Revenue and Expenditure.**—Details of the revenue and expenditure for the year 1950-51 are shown in the next table. The revenue includes the Commonwealth Hospital Benefits Scheme which operated in Victoria, Queensland, Western Australia and Tasmania from 1st January, 1946, in South Australia from 1st February, 1946, and in New South Wales and the Australian Capital Territory from 1st July, 1946.

(a) Partly estimated.

§ 3. Leper Hospitals.

Isolation hospitals for the care and treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Fantome Island, North Queensland); Western Australia (Derby); and the Northern Territory (Channel Island, near Darwin). At the end of 1952 there were 17 cases in residence at Little Bay, 33 at Peel Island, 70 at Fantome Island, 303 at Derby, 179 at Channel Island, and 5 cases at Wooroloo, Western Australia. Of the 607 cases, 499 were full-blood aborigines, 51 half-caste aborigines, 5 Asiatics and 54 Europeans.

§ 4. Mental Hospitals.

1. **General.**—The methods of compiling statistics of mental diseases are fairly uniform throughout the States, but there is an element of uncertainty about possible differences in diagnosis in the early stages of the disease. The figures for the States cannot be brought to a common year; consequently the following particulars relate to a combination of calendar and financial years. Licensed houses are included in all particulars excepting revenue and expenditure for New South Wales. The figures exclude those of reception houses and observation wards in gaols. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals.

2. **Hospitals, Staff, etc., 1950-51.**—Particulars regarding the number of hospitals, the medical and nursing staffs, and accommodation are given in the following table for the year 1950-51:—

MENTAL HOSPITALS : NUMBER, STAFF, ACCOMMODATION, 1950-51.(a)

Particulars.	N.S.W.	Vic.	Q'land. (b)	S. Aust.	W. Aust.	Tas.	Total.

Males .. .. .	3.34	2.68	3.49	3.24	3.15	2.11	3.13
Females .. .. .	3.40	3.13	3.31	3.26	2.16	2.63	3.20
Total .. .. .	3.37	2.91	3.41	3.25	2.67	2.36	3.16

(a) See footnote (a) to previous table.

(b) Includes the Epileptic Home.

Persons who are well advanced towards recovery are allowed to leave the hospitals and reside with their relatives or friends, but they are under supervision and their names are kept in the records.

4. **Revenue and Expenditure, 1950-51.**—The revenue of Government mental hospitals is small in comparison with their cost, and consists chiefly of patients' fees, and mental institution benefits. The proportion of expenditure borne by the State amounts to about 87 per cent. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals :—

Expenditure—Total .. .. .	£ 1,903,817	3,575,676	4,484,879	5,390,526	6,449,862
" —Per Average daily resident .. .. .	£79/2/4	£143/7/11	£179/11/9	£212/18/1	£248/2/2

6. Number of Mental Patients, 1938-39 and 1947-48 to 1950-51.—The total number returned as under treatment shows slight increases during the period but the proportion to total population shows a slight decline. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an actual increase in mental diseases.

## MENTAL PATIENTS IN HOSPITALS.

State.	1938-39.	1947-48.	1948-49.	1949-50.	1950-51.
NUMBER.

Australia .. ..	26,509	27,214	27,425	27,922	28,932

## PER 1,000 OF POPULATION.

New South Wales .. ..	4.25	3.91	3.80	3.73	3.77
Victoria .. ..	3.92	3.42	3.38	3.33	3.35
Queensland(a) .. ..	3.59	3.55	3.54	3.51	3.55
South Australia .. ..	2.93	3.29	3.29	3.30	3.35
Western Australia .. ..	3.16	2.96	2.94	2.84	2.73
Tasmania .. ..	2.66	2.47	2.46	2.46	2.34
Australia .. ..	3.81	3.56	3.50	3.45	3.46

(a) Includes the Epileptic Home.

The difference between States in the number of mental patients in hospitals per 1,000 of population may to some extent be the result of differences in classification.

## CHAPTER XIV.

### WELFARE SERVICES.

#### A. COMMONWEALTH SOCIAL SERVICE BENEFITS.

##### § 1. Introduction.

Commonwealth social service benefits are provided under the Social Services Consolidation Act 1947-1952 which came into operation on 1st July, 1947. This Act provided for the repeal of the existing laws relating to age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits, and for the immediate re-enactment of the necessary provisions for the grant and payment of these benefits under a unified law. Its more important effects were the elimination of obsolete provisions, the removal of anomalies, the amalgamation of like provisions, and the modernizing and grouping of the legislation so that it presented a symmetrical part of a well-defined pattern of social security. The history of the variations in the rates and conditions of age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits prior to 1st July, 1947 is referred to in earlier issues of the Official Year Book.

##### § 2. Commonwealth Expenditure on Social and Health Services.

1. States, 1951-52.—The Commonwealth expenditure in each State on Social and Health Services for the year 1951-52 is shown in the following table:—

#### COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES, 1951-52. (£'000.)

(a) Includes allowances and reimbursements to States.

### § 3. Age and Invalid Pensions.

1. **General.**—Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who have resided in Australia continuously for at least 20 years which need not be immediately prior to the date of claim for pension. Absence in a Territory of the Commonwealth does not break continuity of residence. Any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances, and in the case of a claimant who has had at least 18 years' residence, occasional absences aggregating up to 2 years plus 6 months for every year of residence in excess of 18 years are counted as residence.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years, and who are permanently incapacitated for work or permanently blind. For the purpose of the residential qualification, the position in regard to absences is the same as for age pensions. A person is deemed to be permanently incapacitated for work if the degree of his permanent incapacity is not less than 85 per cent. The claimant must have become permanently incapacitated or permanently blind while in Australia or during a temporary absence from Australia, but this condition is waived if he has resided in Australia for not less than 20 years (continuous or otherwise), which may be partly before or partly after the occurrence of the permanent incapacity or blindness.

2. **Blind Persons.**—All permanently blind persons qualified in other respects, are eligible for a pension of £3 a week free of the means test. Additional pension up to 10s. a week is payable subject to the means test.

Where a blind person receives income in excess of £10 per week the full pension of £3 10s. is reduced by the amount of the excess income, but not below £3 a week. Where both husband and wife are blind the full pension of £3 10s. is reduced by half the amount of any excess income of £10 a week but each pension cannot be reduced below £3 per week, and any blind pensioner who has a child under 16 years of age is entitled to receive a child's allowance of 11s. 6d. per week in addition to the pension.

3. **Persons Disqualified.**—A pension is not payable to :—an alien (except a woman who, prior to marriage, was a British subject); a person who has directly or indirectly deprived himself of property or income in order to qualify for a pension; a person in

receipt of income of £286 per annum (£572 per annum for a married couple); a person who owns property, apart from his permanent home and other exempt property, to the net value of more than £1,250 (£2,500 for married persons), a person who is not deserving of a pension; a person who is not of good character or who has deserted his wife (or her husband) or children for six months immediately preceding the date of the claim (age pension only).

4. **Aboriginal Natives.**—Pensions may be granted to aboriginal natives of Australia who have been granted exemption from State control laws, or who, in any State where exemption is not provided for, are considered suitable persons to receive pensions by virtue of character, standard of intelligence and social development.

5. **Pension Rate.**—The maximum rate of pension from 29th October, 1953, is £182 per annum.

6. **Effect of Income.**—Permissible income is £104 per annum. Any income in excess of this amount is deducted from the pension. The income of a married person is deemed to be half the total income of husband and wife except where they are legally separated or in certain other circumstances. A married couple where only one is a pensioner may have an income of £5 a week between them without reduction of the pension. "Income" does not include gifts or allowances from children or parents, benefits from friendly societies, payments in respect of illness, infirmity or old-age from any trade union, the value of State food relief, child endowment or other payments for or in respect of children, Commonwealth Hospital Benefits, Pharmaceutical Benefits and interest on Commonwealth war gratuities.

7. **Effect of Property.**—The rate of pension is reduced by £1 per annum for every complete £10 of the net value of property which exceeds £150 up to £450, and by £2 per annum for every complete £10 of the remainder (if any) of the net value of the property up to £1,250. The value of property of a married person is deemed to be half the total value of property of husband and wife.

The value of a home, furniture and personal effects, the surrender value (up to £750) of any life assurance policies, the capital value of any life interest, annuity or contingent interest, the value of any property from the estate of a deceased person which has not been received and the amount of any Commonwealth war gratuity are disregarded in the computation of property.

8. **Claimants Receiving War Pensions.**—A person receiving a war pension may be granted an age or invalid pension in addition to the war pension, but the total amount payable in respect of the two pensions must not exceed £253 10s. per annum. In the case of a married couple where husband and wife each receive a civil pension (age or invalid, or service pension), the total amount which may be received in respect of war pensions and civil pensions is £461 10s. per annum; in the case of a married couple (where husband receives a civil pension and wife receives a wife's allowance) the limit is £461 10s.; and in the case of a married person (whose husband does not receive a civil pension or whose wife does not receive a civil pension or a wife's allowance) the limit is £390. Where the war pension (or pensions) and the civil pension (or pensions) together exceed the appropriate limit, the civil pension (or pensions) is (or are) reduced by the amount of the excess, but the pensioner is permitted to have other income to bring the total war pension and civil pension payments, plus the other income, up to the appropriate limit of income plus pension, £253 10s. per annum for a single person or £507 per annum for a married couple, both qualified for pensions.

9. **Inmates of Institutions.**—A pensioner who is an inmate of a benevolent home is paid £63 14s. per annum of his pension and the balance of the pension is paid to the institution for his maintenance.

10. **Wife's Allowance.**—An allowance, not exceeding £91 per annum, may be granted to the wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) if she is living with her husband and is not receiving an age or invalid pension or a service pension. The rate of the allowance is affected by income and property on the same basis as an age or invalid pension.

11. **Child's Allowance.**—An allowance of £29 18s. per annum in respect of one child under the age of 16 years may be granted to the wife of an invalid pensioner (or age pensioner who is permanently incapacitated for work or permanently blind) if she is living with her husband and is not receiving a service pension. This child's allowance is additional to the wife's allowance and may also be granted where the wife is ineligible

for a wife's allowance on account of income or property. The allowance may also be granted to any invalid pensioner who has the custody, care and control of a child under the age of 16 years, but where both husband and wife are invalid pensioners (living together) the child's allowance is payable only to the wife.

12. **Rehabilitation.**—(i) *General.* The rehabilitation service has been set up to help persons who are too disabled to work or who have had to give up their employment because of sickness or injury. It aims at restoring disabled men and women to a state of fitness where they can earn their living and lead useful lives. This is done by means of suitable treatment and training, the cases selected being those in which the person's disability is remediable and where there are reasonable prospects of his engaging in a suitable vocation within three years after the commencement of treatment or training.

The benefits are available to invalid pensioners, persons receiving unemployment or sickness benefits or tuberculosis allowances. The treatment of certain other disabled persons may also be approved by the Director-General of Social Services. During the treatment stage of rehabilitation the payment of pension or benefit is continued. If, however, vocational training is provided the pension or benefit is suspended and the trainee is paid instead a rehabilitation allowance equivalent to the amount of invalid pension for which he is qualified, or which would be payable if he were qualified, together with the amount of any wife's and child's allowances, where appropriate, plus a training allowance of £1 5s. per week.

Living-away-from-home allowances, where necessary, are paid by the Commonwealth. Fares and living expenses (including those of an attendant where required) incurred in connexion with treatment, training or attendance for an interview or for medical examination may also be paid. A person receiving treatment or training may be provided, free of charge, with necessary artificial replacements, surgical aids and appliances. He may also be provided with books, equipment and tools of trade, costing not more than £30. If these are retained by him, he is required to pay the cost, but payments may be made by small instalments after he has commenced employment.

If the treatment or vocational training does not result in the trainee being able to engage in employment, his right to the continuance of his pension or benefit is not prejudiced.

(ii) *Summary of Operations.* The number of persons receiving benefits who were examined, accepted, trained and placed in employment during the year 1951-52 are shown in the following table :—

**REHABILITATION SERVICE : OPERATIONS, AUSTRALIA, 1951-52.**

Type.	Examined.	Accepted.	Completed Training.	Placed in Employment.	
				After Training.	Without Training.
Invalid Pensioners .. .. .	11,343	475	171	134	240
Unemployment and Sickness Beneficiaries .. .. .	8,516	1,280	64	49	897
Recipients of Tuberculosis Allowances .. .. .	434	252	90	77	100

13. **Funeral Benefits.**—From 1st July, 1943 a funeral benefit of up to £10 has been payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension. This provision has been extended to include payment in respect of the death of a person who at the time of his death was receiving, or was a claimant for, a tuberculosis allowance, if he was otherwise qualified to receive an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

14. Rates of Pension Payable.—The following statement shows the rates of pension at 1st July, 1909 and the rates as they have been varied since that date:—

## MAXIMUM RATES OF PENSION PAYABLE.

(a) Additional pension of £6 10s. per annum (2s. 6d. per week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. per week were paid additional pension of 2s. 6d. less the amount of income. (b) Variation according to rise in retail price index-number. (c) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942. (d) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulation 112A—Statutory Rule 315 of 1943.

NOTE.—Provision for variations according to retail price index-numbers was repealed on 6th April, 1944.

15. Age Pensions.—(i) *Number in force.* At 30th June, 1951, there were 342,806 age pensions in force. During 1951–52, 39,905 age pensions claims were granted and 2,802 pensioners were transferred from the invalid pension list, while 33,464 pensions expired through cancellations and deaths. The net increase for the year was 9,243 and the total in force at 30th June, 1952, was 352,049.

(ii) *Sexes of Age Pensioners—States.* Of the age pensioners at 30th June, 1952, 118,025 (or 34 per cent.) were males, and 234,024 (or 66 per cent.) were females. Details for each State are as follows:—

## AGE PENSIONS: SEXES OF PENSIONERS AT 30th JUNE, 1952.

State.	Males.	Females.	Total.	Masculinity. (a)
New South Wales(b)	50,876	94,181	145,057	54.02
Victoria	26,503	61,342	87,845	43.21
Queensland	17,739	32,979	50,718	53.79
South Australia(c)	9,759	22,172	31,931	44.01
Western Australia	9,124	15,658	24,782	58.27
Tasmania	4,024	7,692	11,716	52.31
Total	118,025	234,024	352,049	50.43

(a) Number of males to each 100 females.

(b) Includes Australian Capital Territory.

(iii) *Age and Conjugal Condition of Age Pensioners.* The recorded ages of the 39,905 pensioners (14,329 males and 25,576 females) to whom age pensions were granted during the year 1951–52 varied considerably, ranging from 6,881 at age 60 to one at age 97, but 28,969 were in the 60–70 group. The conjugal condition of these new pensioners was as follows:—Males—single, 1,840; married, 9,801; and widowed, 2,688; Females—single, 3,793; married, 11,365; and widowed, 10,418.

16. **Invalid Pensions.**—(i) *Number in force.* The number of invalid pensioners decreased from 68,918 in 1950-51 to 67,963 in 1951-52, a decrease of 955. Total pensions granted during the year were 8,160, while 6,313 pensions ceased through cancellations or deaths, and 2,802 were transferred to the age pension list.

(ii) *Sexes of Invalid Pensioners—States.* Of the 67,963 persons in receipt of invalid pensions at 30th June, 1952, 37,001 (or 54 per cent.) were males, and 30,962 (or 46 per cent.) were females. Details for each State are as follows:—

**INVALID PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1952.**

State.	Males.	Females.	Total.	Masculinity. (a)
New South Wales(b)	17,986	14,410	32,396	124.82
Victoria .. .. .	7,562	6,411	13,973	117.95

<b>Total .. .. .</b>	<b>37,001</b>	<b>30,962</b>	<b>67,963</b>	<b>119.50</b>

(a) Number of males to each 100 females.

(b) Includes Australian Capital Territory.

(c) Includes Northern Territory.

(iii) *Age and Conjugal Condition of Invalid Pensioners.* The recorded ages of the 8,160 persons (4,854 males and 3,306 females) to whom invalid pensions were granted during 1951-52 varied from 16 to 89, 4,031 or 49 per cent. being in the 45-59 years age-group.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows:—Males—single, 1,606; married, 2,877; and widowed, 371; Females—single, 1,535; married, 1,197; and widowed, 574.

17. **Age and Invalid Pensions : Payments and Annual Liability.**—Separate particulars of the payments to age and invalid pensioners are not available but the total payments in 1951-52 in each State, together with the annual liability of each class of pensioner at 30th June, 1952, are shown in the following table:—

**AGE AND INVALID PENSIONS : PAYMENTS AND ANNUAL LIABILITY, 1951-52.  
(£.)**

State.	Total Payments Age and Invalid Pensions, 1951-52.(a)	Annual Liability at 30th June, 1952.

(a) Based on an estimate of the aggregate of males aged 65 and over and females aged 60 and over at 30th June of each year. (b) Includes allowances to wives of invalid pensioners payable from the 8th July, 1943, but excludes funeral benefits in respect of deaths of pensioners, £209,588 in 1947–48; £252,479 in 1948–49; £243,822 in 1949–50; £243,058 in 1950–51; and £275,850 in 1951–52. (c) Not available.

## § 4. Maternity Allowances.

1. **General.**—A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia or is in Australia and intends to remain. The allowance is payable in respect of a birth which occurs in Australia or on board a ship proceeding from a port in Australia or a Territory of the Commonwealth to another port in Australia or a Territory of the Commonwealth. The allowance is also payable in respect of a birth which occurs on board a ship proceeding to Australia, provided the mother receives no maternity benefit in respect of the birth from the country from whence she came. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the period of intra-uterine life of the child was at least 5½ calendar months. There is no means test.

2. **Alien Mothers.**—Payment may be made to an alien mother if she was a British subject prior to her marriage, or if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child. Payment in respect of a birth which occurs within twelve months of the mother's arrival in Australia may be made at the end of that twelve months, but may be made immediately if the mother is likely to remain in Australia.

3. **Aboriginal Natives.**—Maternity allowances may be paid only to those aboriginal natives of Australia who have been granted exemption from State control laws or who, in any State where exemption is not provided for, are considered suitable persons to receive the allowance by virtue of character, standard of intelligence and social development.

4. **Amount Payable.**—From 1st July, 1947, the amount of a maternity allowance has been £15 where there are no other children; £16 where there are one or two other children; and £17 10s. where there are three or more other children. "Other children" means children under the age of sixteen years who were in the custody, care and control of the claimant on the date of the birth in respect of which the claim is made. The amount payable is increased by £5 in respect of each additional child born at a birth. Payment of £5 on account of a maternity allowance may be made available, upon application, within a period of four weeks prior to the expected date of birth. The balance is payable immediately after the birth.

5. **Persons Temporarily Abroad.**—Maternity allowances may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily abroad.

6. **Summary.**—The following table gives details of the maternity allowance claims paid and rejected and of the amount paid for the years 1938-39 and 1947-48 to 1951-52 and since the inception in 1912-13 :—

**MATERNITY ALLOWANCES : SUMMARY, AUSTRALIA.**

(a) Includes Australian Capital Territory.

(b) Includes Northern Territory.

**§ 5. Child Endowment.**

1. **General.**—Any person who is resident in Australia and has the custody, care and control of one or more children under the age of sixteen years, and an approved institution of which children are inmates shall be qualified to receive an endowment in respect of each child. There is a twelve months residential requirement in respect of a claimant and a child who were not born in Australia, but this is waived if the claimant and the

child are likely to remain permanently in Australia. A child born during the mother's temporary absence from Australia is deemed to have been born in Australia. There is no means test.

2. **Child of Alien Father.**—Endowment may be paid in respect of a child whose father is not a British subject if—the child was born in Australia; the mother is a British subject; and the child is likely to remain permanently in Australia.

3. **Aboriginal Natives.**—Endowment may be paid to aboriginal natives of Australia unless they are nomadic, or unless the child concerned is wholly or mainly dependent on the Commonwealth or a State.

4. **Rate of Payment.**—From 20th June, 1950, the rate of endowment payable has been (a) where the endowee has the custody of one child only—5s. per week; (b) where the endowee has the custody of two or more children—in respect of the elder or eldest child 5s. per week and in respect of each other child 10s. per week; and (c) in the case of an approved institution the rate is 10s. per week for each child inmate. From 1st July, 1941, the date of the inception of the scheme, the rate of endowment was 5s. per week for each child in excess of one in a family, and for each child under sixteen years in an approved institution. The rate was increased to 7s. 6d. per week from 25th June, 1945, and to 10s. per week from 9th November, 1948.

5. **Divided Families.**—There are provisions to meet cases of families divided by reason of divorce, separation, unemployment, death of a parent or other circumstances. In these cases endowment may be paid to the father, mother or other person.

6. **Australians Temporarily Overseas.**—Endowment may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily overseas.

7. **Members of United Kingdom Defence Forces.**—Endowment will be paid for the children of members of the Naval, Military or Air Forces of the United Kingdom who are serving with the Australian Forces from the time of arrival of the children in Australia.

8. **Summary.**—During the year 1951-52, 93,866 claims were granted, cancellations amounted to 39,292 and the number of endowed family group claims in force at 30th June, 1952 was 1,205,421, an increase of 54,574 or 4.7 per cent. during the year. The large increase of 73.6 per cent. in 1950-51 was due mainly to the extension from 20th June, 1950, of endowment to the first or only child under sixteen years of age in a family. The following table shows particulars of the operations in each State and Australia during 1951-52 and in Australia for earlier years:—

## CHILD ENDOWMENT : SUMMARY, 1951-52.

State.	Family Groups.					Total Payments to Endowees and Institutions.

Eight children ..	2,248	17,984	Total ..	1,205,421	2,493,246

(a) Under 16 years of age.

**§ 6. Widows' Pensions.**

1. **General.**—Widows' pensions and the rates in each class, as from 20th October, 1953, have been payable to the following classes of women:—

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years. Rate £195 per annum.

Class "B"—A widow, not less than 50 years of age, who has no children under 16 years of age in her custody, care and control. Rate £149 10s. per annum.

Class "C"—A widow, under 50 years of age, who has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband. Rate £2 17s. 6d. per week for not more than 26 weeks. If at her husband's death, a widow is with child, this period will be extended until the birth of the child. She would then, of course, become eligible for an "A" class widow's pension.

Class "D"—A woman whose husband has been serving a term of imprisonment for at least six months, if she has the custody, care and control of one or more children under the age of 16 years or is not less than 50 years of age. Rate £149 10s. per annum.

The term "widow" includes:—a "dependent female" (i.e. a woman, who, for not less than three years immediately prior to the death of a man, was wholly or mainly maintained by him as his wife on a permanent and bona fide domestic basis); a deserted wife (i.e. a woman deserted by her husband for not less than six months); a divorcee (i.e. a woman whose marriage has been dissolved and who has not remarried); and a woman whose husband is an inmate of a mental hospital.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim. This period is reduced to one year where the claimant and her husband were residing permanently in Australia when the husband died.

2. **Persons Disqualified.**—A widow's pension is not payable to:—a woman who is not a British subject unless she was a British subject before her marriage; a woman who is in receipt of an age or invalid pension, tuberculosis allowance, or a war widow's pension under the Repatriation Act in respect of the death of her husband; a woman who has deprived herself of property or income in order to qualify for a pension; a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband; a woman who is not of good character, a woman who is not deserving of a pension; a woman in Class "A" in receipt of income of £299 per annum or more or owning property, apart from her permanent home and other

exempt property, to the net value of more than £1,500 or a woman in Classes "B" or "D" in receipt of income of £253 10s. per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,250.

3. **Aboriginal Natives.**—Widows' pensions may be granted to aboriginal native women of Australia under the same conditions as age pensions.

4. **Effect of Income.**—Permissible income is £104 per annum. Any income in excess of this amount is deducted from the pension. "Income" has the same meaning as for age pensions. Any amount in excess of 15s. per week received by a deserted wife, or a divorcee from her husband or former husband, for the maintenance of a child is taken into account in the claimant's income.

5. **Effect of Property.**—The rate of pension for women in Classes "B" and "D" is reduced by £1 per annum for every complete £10 of the net value of property which exceeds £150 but does not exceed £450, and by £1 per annum for every complete £7 of the net value above £450 up to £1,250. Property disregarded in determining eligibility for pension is the same as for age pensions.

6. **Claimants Receiving War Pension.**—A widow is not permitted to receive, in respect of the death of her husband, both a war widow's pension under the Repatriation Act and a civil widow's pension. A widow, however, may receive a civil widow's pension in addition to a war pension (as distinct from a war widows' pension) but the total amount payable in respect of the two pensions must not exceed £273 per annum in the case of a Class "A" widow or £227 10s. per annum in the case of a widow coming within Classes "B", "C" or "D". Where the war pension and the widow's pension together exceed the limit applicable, the widow's pension is reduced by the amount of the excess. The widow is permitted to have, in addition, other income to bring her total war pension and widow's pension payments up to the appropriate limit of income plus pension, £299 per annum for a Class "A" widow, £253 10s. for a Class "B" or "D" widow.

7. **Payment of Class "A" Pension for Children Continuing Education.**—The pension payable to a Class "A" widow may be continued after her child attains the age of 16 years if the child continues with full-time education at a school or university and is still dependent on the widow and is not in employment. These conditions apply until the child reaches the age of 18 years.

8. **Summary.**—The number of widows' pensions current at 30th June, 1952, was as follows:—Class "A" 17,424; Class "B", 23,095; Class "C", 99; Class "D", 140; total, 40,758. The amount paid in pensions during 1951-52 was £5,614,768. The following table shows details of widows' pensions paid in each State in the year 1951-52 and for Australia for each of the years 1947-48 to 1951-52:—

(a) The Commonwealth Government commenced to pay widows' pensions from 1st July, 1942.

(b) Excludes eleven (1951-52), nine (1950-51), fourteen (1949-50), eleven (1948-49), six (1947-48), pensions in respect of pensioners in Benevolent Homes.

(c) Based on mean population for the financial year.

(d) Includes Australian Capital Territory.

(e) Includes Northern Territory.

### § 7. Unemployment and Sickness Benefits.

1. **General.**—From 1st July, 1945, men over 16 and under 65 years of age, and women over 16 and under 60 years of age and who were qualified in other respects, have been eligible to apply for an unemployment benefit or a sickness benefit. There is a twelve months' residential requirement but this is waived if the claimant is likely to remain permanently in Australia. A person in receipt of an age, invalid or widow's pension, or a service pension (as distinct from a war pension) under the Repatriation Act or a tuberculosis allowance is ineligible to receive a benefit.

2. **Unemployment Benefit.**—To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike; that he is capable and willing to undertake suitable work; and that he has taken reasonable steps to obtain such work. Registration with the local Commonwealth District Employment Officer is necessary.

3. **Sickness Benefit.**—To qualify for a sickness benefit a person must establish that he is temporarily incapacitated for work by reason of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

4. **Married Women.**—A married woman is not qualified to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances. In exceptional cases a married woman may qualify for an unemployment benefit in her own right.

5. **Aboriginal Natives.**—A benefit may be paid only to those aboriginal natives of Australia who are considered suitable, by reason of character, standard of intelligence and social development.

6. **Maximum Rates of Benefits and Income.**—The maximum weekly rates of benefit payable and permissible income from 27th September, 1952, are as follows:—

#### MAXIMUM RATES OF BENEFITS AND INCOME.

(s. d.)

Age and Conjugal Condition.	Maximum Weekly Benefit.				Permissible Weekly Income.
	Claimant.	Dependent Spouse.	Child.	Total.	
Unmarried—					
16 years and under 17 years ..	30 0	..	..	30 0	5 0
17 " " " 18 " ..	30 0	..	..	30 0	10 0
18 " " " 21 " ..	40 0	..	..	40 0	15 0
21 years and over ..	50 0	..	..	50 0	20 0
Married .. ..	50 0	40 0	5 0	95 0	20 0

Where an unmarried claimant has the custody, care and control of a child under the age of sixteen years, the total income may be increased by 5s. per week.

Additional benefit of up to £2 per week may be paid in respect of a claimant's housekeeper where no such benefit is payable in respect of his wife, provided there are one or more children under 16 years of age in the home and the woman is substantially dependent on the claimant but is not employed by him.

7. **Means Test.**—Any income in excess of the permissible income shown in the previous table is deducted from the rate of benefit. For unemployment benefit purposes, the incomes of the claimant and his spouse are taken into account, but where the claimant and his spouse are permanently separated any income received by the spouse may be disregarded. "Income" does not include child endowment, or other payments in respect of children, the Commonwealth hospital benefits and pharmaceutical benefits, or a tuberculosis allowance or an amount paid in reimbursement of medical, dental or similar expenses actually paid.

For sickness benefit purposes, there is disregarded £2 per week of any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable.

Where a person qualified for sickness benefit receives or is entitled to receive (in respect of the same period and the same incapacity for which sickness benefit is payable) any payment by way of compensation (including workers' compensation), damages, or otherwise under any law (except payments for which he has contributed), the amount of the compensation, etc., is not taken into account as income but is deducted from the rate of sickness benefit otherwise payable.

8. **Waiting Period.**—There is a waiting period of seven days in respect of which unemployment or sickness benefit is not payable.

9. **Special Benefit.**—A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not in receipt of an age, invalid or widow's pension or a service pension, if by reason of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants.

10. **Rehabilitation.**—Unemployment and sickness beneficiaries are eligible to participate in the Commonwealth rehabilitation scheme under the same conditions as invalid pensioners. Payment of an unemployment or sickness benefit may be refused if the claimant or beneficiary, on being required, fails to undergo a medical examination or to receive treatment or undertake training or to do any suitable work. See Division A, § 3, para. 12, Rehabilitation.

11. **Statistics, 1951-52.**—(i) *Persons on Benefit.* At 30th June, 1952, 15,820 persons were paid benefits, comprising 8,294 unemployment, 6,378 sickness and 1,148 special benefits.

(a) Excludes migrants.

(b) Includes payments to migrants.

## § 8. Reciprocal Agreements with Other Countries.

1. *New Zealand.*—An agreement between the Governments of Australia and New Zealand for reciprocity in social services came into operation on 1st July, 1949.

The reciprocal arrangements cover age and invalid pensions, widows' pensions, child endowment and unemployment and sickness benefits, and apply to both permanent and temporary change of residence.

Residence in one country counts as residence in the other country in relation to entitlement to benefits in which a residential qualification applies.

Persons from one country taking up permanent residence in the other country become eligible for any of the specified benefits of the new country under the same conditions (with one or two exceptions) as apply to citizens of that country.

Persons in receipt of any of the specified benefits in one country may continue to receive those benefits while temporarily absent in the other country. These payments are made on an agency basis by the appropriate authority of the country in which the person is temporarily resident.

2. **United Kingdom.**—The Governments of the United Kingdom and Australia signed a reciprocal agreement on social services in London on 8th June, 1953.

The agreement covers age and invalid pensions, widows' pensions, child endowment, and unemployment and sickness benefits. Under the agreement former residents of the United Kingdom over pension age—65 years for men and 60 years for women—and who were in the National Insurance Scheme when they left the United Kingdom will be eligible to receive Australian pensions without having to complete 20 years' residence in Australia.

Subject to the means test, these persons so entitled have any United Kingdom pensions they receive supplemented by Australia to bring the total payments in most cases to the maximum pension rate for Australians—at present £3 10s. od. per week.

Similar principles apply to widows' pensions. Australian residential requirements will be waived for these pensions, also for invalid pensions, child endowment and unemployment and sickness benefits.

With few exceptions, all these benefits will be payable to former residents of the United Kingdom at the same rates as are payable to Australian citizens.

Persons from Australia going to the United Kingdom for permanent residence will be treated in the United Kingdom as if they had been insured under the National Insurance Scheme while in Australia, so that they can qualify for various National Insurance benefits.

Families who go from one country to another will be able to qualify for child endowment, or family allowances, as soon as they arrive in their new country.

There is also provision for the safeguard of social service rights for Australians going to the United Kingdom for temporary residence, and vice versa.

The agreement came into operation in both countries on 7th January, 1954.

## B. OTHER SERVICES.

### § 1. Benevolent Homes.

1. **General.**—The public provisions for the care of indigent old people have been a feature of the social development of recent years in most countries. Numerous establishments exist in Australia for the housing and protection of persons no longer able to provide for themselves. These institutions are supported by Government and municipal aid, public subscriptions, bequests, etc.; while in many cases relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1950-51 are given in the following table.

## BENEVOLENT HOMES : REVENUE AND EXPENDITURE, 1950-51.

(a) These figures relate to the three State hospitals and homes only. (b) Year ended 31st March, 1951. (c) Includes Commonwealth Hospital Benefits and Age and Invalid Pension receipts. (d) Includes £270,729 in Victoria, £27,956 in Queensland, £4,615 in South Australia and £30 in Western Australia, covering such items as purchase of land, cost of new buildings and additions to buildings.

## § 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (see No. 22, p. 486).

3. **Transactions of State Departments.**—The following table summarizes the transactions of State Departments during 1950-51 in connexion with children under their control or supervision. In addition to neglected children, the figures include uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody.

CHILDREN UNDER GOVERNMENT AUTHORITY : SUMMARY, 1950-51.

Particulars.	N.S.W.	Vic.(a)	Q'land.	S. Aust.	W. Aust.	Tas.	Total.

(a) Year ended 31st December, 1950.

(b) Includes inmates of hospitals.

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and

clothing when they call, whilst others but rarely come near the stations. The aboriginal native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1951-52 was as follows (figures in brackets are for year 1950-51):—New South Wales, £130,459 (£97,637); Victoria, £9,628 (£8,695); Queensland, £407,543 (£314,727); South Australia, £40,385 (£99,861); Western Australia, £164,338 (£148,035); Northern Territory, £213,260 (£125,485); Australian Capital Territory, £2,933 (£1,021); total for Australia, £969,046 (£795,461).

#### § 4. Royal Life Saving Society.

In each of the State capitals, "centres" of the Royal Life Saving Society have been established, and in some States sub-centres have also been established in the larger provincial districts. In 1934 an Australian Federal Council of this Society was formed with headquarters at Melbourne, and each State centre, or branch, as it is now called, is controlled by the new organization. Saving of life from drowning and other forms of asphyxiation is the object of the Society, and its immediate aims are (a) educative and (b) remedial. The encouragement of swimming and life-saving in schools, colleges, clubs, etc., will bring about a more widespread knowledge of these necessary matters, and there is increasing provision of life-belts, reels, lines, warning provisions, and other first-aid appliances on ocean beaches, wharves and other suitable places. Numerous certificates of proficiency in various grades are issued annually after examination throughout Australia, the number for the individual States for 1951-52 being:—New South Wales, 19,718; Victoria, 7,455; Queensland, 2,656; South Australia, 261; Western Australia, 1,347; and Tasmania, 1,650.

#### § 5. Royal Humane Society.

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance promptly risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (a) Gold Medal; (b) Silver Medal; (c) Bronze Medal; and (d) Certificate of Merit. The Clarke Medal is awarded for the outstanding case of the year, and the Rupert Wilks Trophy is awarded for the most outstanding bravery by a child under 13 years of age. About 75 awards are made annually.

#### § 6. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include homes for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds, etc.

## CHAPTER XV.

## LOCAL GOVERNMENT.

## § 1. Introduction.

1. **General.**—The statistics on Local Government operations are not entirely satisfactory, as they are incomplete, and not sufficiently comparable and up to date. Those on Local Government financial operations were improved, prior to the 1939–45 War, through the use by the State Statisticians of standard forms in supplying information on their respective States to the Commonwealth Statistician. The presentation of the statistics thus made available was only being developed when the war made it necessary to discontinue the returns. However, since the war these returns have been recommenced, and efforts are being made, as opportunity and circumstances permit, to widen the range of information presented on local government activities beyond the purely, or primarily, financial.

2. **Local Government Authorities.**—In each State of the Commonwealth there exists a system of local government whose powers and responsibilities are in general similar, and which covers such matters as the upkeep and construction of roads, streets and bridges, water, sewerage and drainage systems and health and sanitary services, the supervision of building and the administration of regulations relating to items such as weights and measures, slaughtering, the registration of dogs, etc. In addition to these obligatory functions there are also a large number which may be performed by local government authority either with or without the consent of the ratepayers or the Governor-in-Council. These include transport facilities, electricity, gas and other business undertakings, hospitals, charitable institutions, recreation grounds, parks, baths, libraries, museums, etc.

The system is based on the principle of a grant of specific powers by the State legislatures to the local authorities, their autonomy, however, being more or less limited by the provision for general supervision by a department of the central government or by the Governor-in-Council. Otherwise, within the scope of the Acts under which they are constituted or which they have to administer, they are responsible only to the ratepayers.

While the broad pattern of local government throughout the States of Australia is similar, the range of activities, election of officers, methods of valuation and rating powers, etc., differ considerably.

The areas over which local government bodies exercise general control, numbering 915, are known in New South Wales as cities, municipalities and shires; in Victoria as cities, towns, boroughs and shires; in Queensland as cities, towns and shires; in South Australia as municipal corporation areas and district council areas; in Western Australia as municipalities and road districts; and in Tasmania as municipalities. In New South Wales some local government authorities in an area have combined to provide services such as electricity supply and water, sewerage and drainage—e.g., the county councils. Within shires there are also some municipal units known as urban areas. In Western Australia there are local health boards, whose personnel in most cases coincides with those of municipalities and road boards. Apart from the more thinly populated parts of New South Wales and South Australia and the Federal Territories, practically the whole of Australia comes within local government jurisdiction.

The financial statistics in § 2 following are classified under the headings of Ordinary Services and Business Undertakings. The former covers the obligatory and general functions referred to above. Business Undertakings include public utilities such as water supply, sewerage, electricity, gas, transport and hydraulic power undertakings, and other miscellaneous works such as abattoirs, quarries, ice works, cinemas, etc.

3. **Semi-Governmental Authorities.**—In addition to local government authorities, there is a large number of authorities set up to control specific activities, whose forms of activity are often identical with some of those performed by either, or both, of the other classes of public authority—central government and local government—and a complete picture of any field of activity for a State or Australia as a whole cannot be obtained without reference to each class operating in that particular field. These semi-governmental authorities differ primarily from local government authorities in that their operations are restricted to the specific activity for which they were constituted—e.g. roads and bridges, or water and sewerage, or electricity and irrigation, or harbours, or tramways, etc.—i.e. each dispenses a specific service throughout an area as distinct from the general services of the local authority.

Sections 4 to 7 following, dealing with roads and bridges, water supply and sewerage, harbours and fire brigades, include particulars of the more important of these authorities which operate within the range covered by this chapter.

4. **Roads, Bridges, etc.**—The construction and maintenance of roads, bridges and ferries are generally part of the functions of local authorities, but in each State there exists a central road authority or a Government department whose duties relate to the construction and maintenance of "main" and "developmental" roads, the distribution of funds to local bodies, and the supervision and co-ordination of road construction and policy throughout the State. Although roads and bridges constructed and maintained directly by the Government or by the central road authority do not properly come under the heading of "Local Government", they have been included in this chapter for the sake of convenience. Owing to difficulty in obtaining complete particulars of receipts and expenditure by the various local governing bodies in regard to roads under their control, the details of receipts and expenditure given in § 4 are those of the Government only, relating either to the supervisory board or commissioner in the State or to direct activities of a department. In § 2 some information is given of the revenue and expenditure of Local Government Authorities in respect of roads.

5. **Water Supply and Sewerage.**—In the cities of Sydney and Melbourne the control of water supply and sewerage is in the hands of special Boards, while in Adelaide and Perth these services are under the direct supervision of Government departments. In most of the other cities and towns, the municipal councils, or, in some cases, water trusts, are the controlling bodies which either construct the works out of their own resources or take them over after they have been constructed by the Government.

6. **Harbours.**—The majority of the harbours in Australia are managed by Boards, the members of which are either elected by persons interested, or are appointed by the Government. In a few instances, however, they are directly controlled by the Government.

7. **Fire Brigades.**—In all the States, the management of fire brigades is undertaken by Boards. These Boards usually comprise members elected by the councils of municipalities and insurance companies within the districts placed under their jurisdiction, and one or more members appointed by the Government. Occasionally volunteer or country fire brigades are represented.

8. **Other Local or Semi-Governmental Activity.**—The activities referred to above are not the only forms of local or semi-governmental undertakings. There are others, the most important being tramways and omnibus services and electricity and gas undertakings, which are not dealt with in this chapter, except to the extent that they are represented in the finances as shown in the following section. Chapter V.—Transport and Communication contains information on municipal transport services, and Chapter XXV.—Electric Power Generation and Distribution deals with the various types of electricity undertakings in each State. In addition, particulars of municipal electricity and gas undertakings, although not shown separately, are included in the relevant sections in Chapter XXIV.—Manufacturing Industry.

## § 2. Local Government Authorities.

1. **Area, Population, Dwellings and Value of Ratable Property.**—(i) *New South Wales.* For purposes of local government the whole of the Eastern and Central land divisions and a small portion of the sparsely populated Western division have been divided into cities, municipalities (most principal towns) and shires (mainly large rural areas, some of which embrace important towns). At the end of 1950 the area incorporated was 184,000 square miles, or nearly three-fifths of the total area of the State.

The Local Government (Areas) Act 1948 repealed the Sydney Corporation Act 1932 which had regulated the operations of the Capital City. It unites the City of Sydney and certain areas, constituting the united area as a city; unites certain other areas or areas and parts of areas, constituting them as municipalities; and reconstitutes the Sydney County Council. All local government authorities in the State are now subject to the general provisions of the Local Government Act.

Municipalities and shires may combine to form county councils for the establishment and conduct of services of joint benefit, e.g., electricity, water, sewerage. There were 33 county councils and the Grafton and South Grafton Water Board at 31st December, 1950.

The area, population, dwellings and value of ratable property in the incorporated areas for the year ended 31st December, 1950 are shown in the table below. The valuations relate to ratable property only and exclude Government and other non-ratable property, whose value is not inconsiderable in the aggregate. In this table, particulars of dwellings are in accordance with the definition used in the 1947 Census, and are the results of information collected on the Census Schedules. Occupied dwellings include individual private houses, flats and tenements, and dwellings other than private (boarding houses, hotels, caretakers' quarters, hospitals, educational establishments, etc.). Also included are portions of shared private houses in respect of which portions separate Householders' Schedules were furnished. Unoccupied dwellings include "week-end" and holiday dwellings and other dwellings temporarily unoccupied on the night of the Census. Dwellings being built are not included.

### LOCAL GOVERNMENT AUTHORITIES, NEW SOUTH WALES : AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950.

Local Bodies.	Number.	Area.	Popu- lation.	Dwellings.(a)		Value of Ratable Property.		
				Occu- pied.	Unoccu- pied.	Unim- proved Capital Value.	Im- proved Capital Value.	Assessed Annual Value. (b)

(a) As at Census, 30th June, 1947.

(b) Nine-tenths annual rental value of land with improvements thereon.

(c) Not available.

(ii) *Victoria.* Local Government is established throughout the State, the various divisions being termed cities, towns, boroughs, or shires. The only unincorporated areas are French Island (42,000 acres) in Westernport Bay, Julia Percy Island (650 acres) off Port Fairy, and Tower Hill (1,350 acres) adjacent to the Borough of Koroit. Melbourne and Geelong were incorporated under special statutes prior to the establishment of a

general system of local government, but are now subject to several provisions of the Local Government Act. The law relating to local government was consolidated by the Local Government Act 1946.

As from 1st January, 1947, the metropolitan area for statistical and health purposes was redefined by the inclusion of the cities of Nunawading and Sunshine, the borough of Ringwood, the Broadmeadows and Campbellfield ridings of the shire of Broadmeadows, the Doutta Galla riding of the shire of Keilor and the shire of Mulgrave.

The area, population, dwellings and estimated value of ratable property in the incorporated areas for the year ended 30th September, 1951 are shown below.

**LOCAL GOVERNMENT AUTHORITIES, VICTORIA : AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950-51.**

Local Bodies.	Number.	Area.	Popu- lation.	Dwellings.(a)		Value of Ratable Property.	
				Occupied.	Un- occupied.	Improved Capital Value.	Net Annual Value.
		'000. acres.	'000.	No.	No.	£'000.	£'000.

(a) Particulars of occupied and unoccupied dwellings are based on returns furnished by municipalities. These figures refer to number of units in all habitable buildings. (b) Includes the whole of the cities of Heidelberg and Sunshine, the borough of Ringwood, and the whole of the shires of Broadmeadows, Keilor and Mulgrave, whose parts do not all lie within the Metropolitan Area. (c) Excludes Yallourn area under the jurisdiction of the State Electricity Commission of Victoria.

Particulars of the unimproved capital value are not available.

(iii) *Queensland.* The whole of the State (except certain islands along the coast, the Dawson Valley Irrigation Area and the Somerset Dam Area) is incorporated into cities, towns and shires under the Local Authorities Act 1902 and its amendments. In June, 1949, the State Government rearranged the boundaries of the local authorities to the south of Brisbane, reducing their number by ten. The towns of Coolangatta and Southport were absorbed by the new town of South Coast; two new shires were created and eleven were abolished, being absorbed by the new shires and existing cities, towns and shires. The following table shows particulars of the area, population, dwellings and value of ratable property in the incorporated areas for the year ended 30th June, 1951 :—

**LOCAL GOVERNMENT AUTHORITIES, QUEENSLAND : AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950-51.**

Local Bodies.	Number.	Area.	Population. (a)	Dwellings.(a)		Un- improved Capital Value of Ratable Property.
				Occupied.	Un- occupied.	
		'000 acres.	'000.	No.	No.	£'000.
Capital City(b) .. ..	1	246	402	99,771	1,475	25,333

Total .. ..	134	429,120	1,099	271,171	9,546	98,054

(a) As at Census, 30th June, 1947. (b) City of Greater Brisbane.

Particulars of improved capital value and annual value are not available.

(iv) *South Australia.* The settled portion of South Australia is incorporated, being mostly under municipal corporations in the larger cities and towns, and district councils in the agricultural areas.

The following table shows the area, population, dwellings and value of ratable property in incorporated areas for the year ended 30th June, 1951.

**LOCAL GOVERNMENT AUTHORITIES, SOUTH AUSTRALIA : AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950-51.**

Outside Metropolitan Area .. .. .	122	34,402	268	70,390	(a)	128,000	6,377
Grand Total .. .. .	143	34,505	704	185,290	(a)	283,000	14,132

(a) Not available.

(v) *Western Australia.* In this State, Local Government is carried on by means of municipalities and district road boards. Certain functions are delegated to health boards, whose personnel, in most cases, coincides with those of the municipalities and district road boards. The following table shows particulars of the area, population, dwellings and value of ratable property in incorporated areas for the year ended 31st October, 1951 for municipalities, and the year ended 30th June, 1951 for district road boards.

**LOCAL GOVERNMENT AUTHORITIES, WESTERN AUSTRALIA : AREA, POPULATION, DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950-51.**

Local Bodies.	Number.	Area.	Popu- lation.	Dwell- ings.(a)	Value of Ratable Property.

Grand Total .. .. .	147	624,590	571	142,368	(b)	(b)	4,136

(a) Particulars of unoccupied dwellings are not available separately. (b) Not available.  
(c) Includes part only (8.064 acres) of Swan River District situated in Metropolitan Area.

The method of valuation is not identical in the case of all district road boards, as in some the assessment is based on the unimproved capital value and in others partly on the unimproved capital value and partly on the annual value. The amounts shown are the totals for the areas rated on each valuation, and are not a function of each other.

(vi) *Tasmania.* The whole State is divided into municipal districts, Hobart and Launceston being incorporated under separate Acts. The following table shows particulars of the area, population, dwellings and value of ratable property in incorporated areas for the year ended 30th June, 1951.

**LOCAL GOVERNMENT AUTHORITIES, TASMANIA : AREA, POPULATION,  
DWELLINGS AND VALUE OF RATABLE PROPERTY, 1950-51.**

(a) As at Census, 30th June, 1947.

(b) Comprises the whole of the Municipalities of Clarence and Glenorchy.

2. *Finances.*—(i) *General.* The following tables show the latest available financial statistics for Local Government Authorities. The figures relate to the year 1950-51 except for New South Wales where they relate to the year 1950.

(ii) *Ordinary Services.* In the returns of revenue and expenditure for 1950-51 in the following table, the proceeds from loans and expenditure thereof have been excluded, as have the operations of business undertakings controlled by the various Local Government Authorities. The profits resulting from the working of these undertakings, where taken into general revenue, have been included.

LOCAL GOVERNMENT AUTHORITIES: ORDINARY SERVICES—REVENUE AND EXPENDITURE, 1950-51.

(a) Figures for New South Wales relate to the year ended 31st December, 1950, and are on an income and expenditure basis as distinct from those of other States, which are on a cash basis. (b) Year ended 30th September, 1951. (c) Year ended 30th June, 1951. (d) Municipalities—Year ended 31st October, 1951; Road Districts—Year ended 30th June, 1951. (e) Includes £31,326 reimbursement from Highways Department for work done. (f) Includes interest from sinking fund investments for debt redemption, £164,232. (g) Includes £487,972 plant hire. (h) Includes £171,450 for sewerage and drainage. (i) Includes £223,872 for sewerage, mosquito control and drainage. (j) To Main Roads Department. (k) Includes £220,530 to Country Roads Board. (l) This deduction offsets duplications caused by the inclusion above of particulars of expenditure on (i) the purchase from revenue of assets and the depreciation of those assets, and (ii) the depreciation of assets purchased from loans and the repayment of those loans. The amount deducted cannot be apportioned according to the various headings.

The following table shows the revenue and expenditure (excluding loan) of local government authority ordinary services for the years 1938-39 and 1946-47 to 1950-51 :—
