## CHAPTER XV.

### EDUCATION.

#### § 1. Introduction.

An account of the development of the Australian school system up to 1929 may be found in Official Year Books Nos. 1, 2, 17 and 22. In Official Year Book No. 40, a reasonably complete review of changes which occurred up to 1951 and of the practices then current was presented from material furnished in the main by the Commonwealth Office of Education.

In the sections which follow, the information relating to the educational programme applies mainly to the year 1958. The statistics given in the tables relate to 1957.

#### § 2. Government Schools.

1. *Administration.*—Education is mainly the responsibility of the State Governments but the Commonwealth Government provides financial assistance to students and meets the full cost of education in Commonwealth Territories (*see* Chapter V.)

Although there is a tendency towards regional administration, State educational administration is centralized. The permanent head of the Education Department in each State is responsible to the Minister for Education. Contact with the schools is maintained principally through Inspectors, called Superintendents in Western Australia and Tasmania. Departments are usually divided into primary, secondary and technical divisions. Some technical colleges are in a large measure autonomous. Universities are independent foundations although much of their income is derived from State and Commonwealth grants.

Examination Boards which represent universities, Education Departments and non-government schools, control public examinations and syllabuses, and curriculum committees prepare primary and secondary curricula. State Ministers for Education meet periodically as the Australian Education Council, and Directors of Education meet annually as a standing committee of this Council.

2. *The School System.*—(i) *Compulsory.* In all States, there is legislation for compulsory school attendance. The original Victorian Education Act was passed in 1872, followed by similar Acts in Queensland (1875), South Australia (1875), New South Wales (1880), and Tasmania and Western Australia (1893).

In 1958, the ages between which children were required by law to attend school were as follows:—New South Wales, 6 to 15 years; Victoria, 6 to 14 years; Queensland, 6 to 14 years; South Australia, 6 to 14 years (children may not leave school until the end of the term during which they reach the age of 14 years); Western Australia, 6 to 14 years; and Tasmania, 6 to 16 years. The employment of children of school age is prohibited by law.

In Victoria, South Australia, and Western Australia, amendments to the Acts have provided for the raising of the school leaving age to 15 years, but to date this legislation has not been proclaimed.

Schooling may be given in government schools (including correspondence and special schools), in non-government schools, or by private tuition. Schooling in government schools is ordinarily free. Non-government schools charge fees and are not usually assisted financially by State or Commonwealth Governments.

(ii) *Non-Compulsory.* In recent years, the development of large-scale industry and scientific farming has demanded a diversity of skills and a general raising of the educational level of the population. The raising of the school leaving age in two States and the tendency everywhere for children to stay longer at school have been expressions of public realization of this. In recent years, less than half of all children left school when they reached the age limit for compulsory attendance. Indeed, almost half now proceed to some form of further education beyond secondary school, either as full-time students, as part-time apprentices or trainees released during the day by their employers, or as part-time evening students.

In the early years of government provision of education, the main emphasis was on the primary school, which catered for children under compulsion and offered a course largely confined to the tool subjects, reading, writing and arithmetic. However, a process of extension and differentiation both at the bottom—infants' schools and kindergartens—and at the top—secondary schools—was well under way during the early years of this century.

3. The Educational Ladder.—(i) *Infants' Schools.* It is now customary, although not compulsory, for children to begin school when they are five years old. In larger primary schools they enter the infants' school, and in smaller schools infants' classes, which occupy two or three years, the first year in some States being called "Kindergarten" or "Preparatory". The emphasis in the infants' classes is very much on general development, on play activities and on the informal aspects of the educational processes. In some cases, the first two grades of primary education, together with any "Preparatory" or "Kindergarten" classes, are to be found in separate infants' schools or departments. But whether in a separate establishment or as a part of a primary school, there is a gradual move towards formal instruction. At the end of the period, most children are able to read with some fluency, carry out simple arithmetical operations founded on the basic number facts, and can write in pencil. In addition, they have acquired skills with art materials and the like. A good deal of the instruction is carried on through activity methods, involving, for example, dramatic work, puppetry, and school "shops". Children then pass at about the age of 8 or 9 to the more formal primary school, in which they normally spend four or five years.

(ii) *Primary Schools.* The main emphasis in the primary school as distinct from the infants' school still lies on the tool subjects (reading, writing and arithmetic) and, in more recent years, on oral language, but the methods of teaching have undergone considerable changes. Changes in the purpose and outlook of educationists, and the raising of the professional standards of teachers, have made for greater freedom for pupils and teachers, some departure from the methods of mass instruction, and the closer linking of the curriculum with the child's social environment.

In general, there is now less emphasis on results than formerly, and basic skills are taught at a somewhat later stage. At the same time, the curriculum has been broadened. More individual instruction has led to a reduction in minimum standards of achievement for the less able and a stress on curriculum enrichment for the bright. Retardation, i.e., the repeating of grades, has been considerably reduced, the aim being for each child to remain with his age group. In all States, opportunity classes exist for backward children, and in one State opportunity classes are provided for the especially bright.

(iii) *Secondary Schools.* At the age of 12 or 13 (in Queensland, 14), children transfer to a secondary school course. In the cities and larger country centres, this is provided in a separate school, but in less densely populated areas secondary classes share the same buildings as primary classes. In rural areas, secondary pupils may share teachers or classrooms with primary pupils, and in one-teacher schools a few secondary students may carry out correspondence assignments under the supervision of the primary teacher-in-charge.

Secondary curricula have developed from the matriculation requirements of the universities. Formerly English grammar and literature, and mathematics, including algebra, geometry and trigonometry, were the core. Languages, chiefly Latin and French, or science, chiefly physics and chemistry, and history had an important place. Geography and drawing were often taken in the first two or three years.

As a result of changes in the academic course for matriculation, greater emphasis has been placed on oral and written expression in the English course and on language generally (English or foreign languages); in two universities, new matriculation regulations require a pass in either mathematics or a foreign language (not necessarily Latin which, in recent years, has been less popular than previously). A general science course has been introduced in some States, and social studies, a synthesis of history, geography and civics, is a subject to matriculation level in two States. More emphasis has been placed on art, music and physical education. In recent years, the provision of a secondary education for all has gained ground rapidly, although the entrance requirements of tertiary institutions are still provided for.

Consequently, alongside the academic course, other courses have grown up. In country areas, they may be offered in the same school or the academic course may even be largely abandoned. In the city, it is usual to offer non-academic courses in separate schools. The academic schools and multi-lateral country schools are usually known as High Schools, while the other types are generally distinguished by such names as Junior Technical Schools and Home Science Schools.

Particular mention should be made of the recent development of the all-age consolidated school sometimes with an agricultural bias, found under various names in different States. Tasmania and South Australia adapted the idea of the English village area schools to Australian conditions and established "Area Schools", some of which have farms attached.

The courses followed in the non-academic schools are, in general, broader than in the academic schools. There is less concentration on establishing an academic discipline and method peculiar to each subject, but more attention to correlation between fields of knowledge, sometimes expressed by projects involving them all. Generally, less time is devoted to mathematics and the formal sciences, and more time to practical work and to art and musical appreciation. In English, oral language is emphasized rather more and grammar much less than in the academic schools.

(iv) *State Details.* Very brief particulars of the position in each of the States are given on pages 432-3 of Official Year Book No. 40.

4. **Examinations and Accrediting.**—(i) *Examinations.* The various public examinations which were formerly held at different stages of education were described in previous Year Books, in particular in No. 40 (1954). At present there is only one State, Queensland, where a public examination is held at the primary level; in all other States, school pupils sit for public examinations at the secondary level only, and the trend is towards greater use of internal examinations within each school, and headmasters' recommendations. In Queensland, pupils sit for the Scholarship Examination at the end of primary school to qualify for free secondary school tuition.

The length of the secondary course now varies from four years in Queensland to six years in Victoria, the Intermediate or Junior Examination generally being taken after two to four years' study.

There is no Intermediate Examination in Tasmania, the first public examination being the Schools' Board Certificate, at the end of the fourth year. The Leaving Certificate in most States has not been supplanted, but has been modified to provide a greater variety of subjects and, as for example in mathematics, the opportunity of choosing several specialized courses or a broad course. In four States, it remains a fully external examination in which a pass which satisfies certain requirements is accepted by the University for matriculation purposes. The School Leaving Examination in Victoria and the Schools' Board Examination in Tasmania may be taken internally by approved schools. In both these States, a further year's study is required of students who wish to sit for the University matriculation examination.

South Australia has a further year beyond the Leaving Certificate for a separate examination known as "Leaving Honours". Only the Leaving Certificate is necessary for matriculation, but good results—credits as distinct from passes—in the Leaving Honours examination may carry exemption from some subjects of the first-year university course. Separate matriculation examinations also exist in New South Wales and Western Australia but successful Leaving candidates are not required to sit.

In New South Wales, a special committee set up to review the education system has recommended that the present secondary examinations be replaced by a School Leaving Certificate examination at the end of four years, and a Higher School Certificate two years later, which will serve for university matriculation.

(ii) *Accrediting.* The system of granting certificates, or credit for subjects passed, without external examination is a major development and now operates in five States (but in two of these on a limited scale only). Credit is assessed on the student's record of work for the year, together with performance in internal examinations. Syllabuses can be less rigidly controlled and can be more freely adapted to local conditions, although standards are maintained by the supervision of the central authority. However, all States have an external examination for matriculation.

(iii) *State Details.* The details of accrediting in each State were given on pages 433-4 of Official Year Book No. 40.

5. **Health Services to Schools.**—Information relating to school medical and dental services is given in Chapter XVII.—Public Health.

6. **Guidance.**—Each Australian State now has a comprehensive system of educational guidance administered by trained and experienced educational psychologists and backed by a system of school record cards. In general, the functions of these services are:—selection and differentiation for secondary education, diagnosis and guidance of atypical children, preliminary vocational guidance and, in some States, research. The weight given to each of these functions varies considerably from State to State, but the aim is to provide thorough educational guidance for all children.

Throughout Australia, branches of the Commonwealth Employment Service co-operate with State Education Departments by giving post-school vocational guidance, using the data obtained and made available by the Education Departments during the school career of the children. In New South Wales, a similar service is also provided by the Youth Welfare Section of the Department of Labour and Industry

**7. Research.**—(i) *State Education Departments.* All State Education Departments have set up research branches which function as integral parts of head offices. In several States, the officer who directs research is also responsible for the guidance service offered by his department. The research undertaken is directed towards departmental activities and the findings are examined carefully in the determination of policy and procedures; in addition, many problems of immediate importance are handled. In the majority of States, too, the Research Branch supervises the collation of statistics and also plays an important part in curriculum revision and modification of examinations.

(ii) *Australian Council for Educational Research.* The Australian Council for Educational Research, a non-governmental body, is also engaged on educational research in a wide variety of fields, ranging from tertiary to pre-school education. It conducts surveys and inquiries, makes grants to approved educational investigators, serves as a centre for disseminating educational information, provides training for research workers, and standardizes and distributes educational and psychological tests for use in Australia. Although this council is an autonomous body, the Commonwealth and State Governments contribute some financial support to it.

**8. Atypical Children.**—Pupils who, for one reason or another, cannot progress to their best advantage in an ordinary school are catered for by special schools or classes. Among groups given special attention are the mentally backward, the gifted, the physically handicapped, the blind, deaf and dumb, the epileptic, the cerebral palsied, the partially sighted, the hard-of-hearing and the delinquent. The provision of special schools and classes has involved the appointment of departmental specialists, special training courses and close liaison with school health services. In some States, special clinics attached to hospitals, or functioning as an independent child-welfare service, handle cases of personality maladjustment and work in co-operation with the psychological services of the Education Departments.

**9. Education of Native Children in Australia.**—The Commonwealth Government is responsible for the education of full-blood native children in the Northern Territory. Each State has responsibility for the welfare and education of native children within its boundaries.

Native children are admitted to government schools in all States except in areas where separate facilities are provided. In those States where natives are more numerous, special schools are located at or near aboriginal reserves, settlements and stations. The schools are for the most part staffed by teachers from the Education Departments, and the curriculum is similar to that in ordinary government schools with a bias towards handicrafts. Numbers of native children also attend the mission schools conducted in several States by the various denominations. The standard of education in these schools is similar generally to that in the government schools.

**10. Provision for Rural Areas.**—(i) *General.* The population of Australia is so scattered that there is a problem in providing primary, and more especially secondary, education for all children. One method of meeting this problem has been the establishment of a wide network of one-teacher primary schools, staffed in the main with trained teachers. The practice of sending itinerant teachers to assist correspondence students in outlying areas has been introduced in the far north of Western Australia.

(ii) *Subsidized Schools.* Where a group of children is too small to warrant the establishment of a one-teacher school, a "subsidized school" may be opened. The Education Department pays part of the cost, and in some States appoints a teacher. Some States also administer "provisional schools", which are completely financed by the Government but which are not large enough, or sufficiently assured of adequate continued attendance of pupils, to warrant classification as permanent schools.

(iii) *Consolidated Schools.* In some States, in districts where a number of small centres are scattered around a larger centre or country town, recent policy has been to close the one-teacher schools and transport pupils each day by bus to a "consolidated" school in the larger centre. Consolidated schools provide primary instruction and from two to four years of post-primary instruction. The post-primary curriculum adopted usually has a bias towards practical activities and training in subjects bearing on the primary industries of the locality.

(iv) *Special Assistance.* Another way of bringing children to the school has been the provision of financial assistance for children who have to live away from home in order to attend school. Most of these board in private homes but there are a few government hostels in several States, and over 60 private hostels (excluding private boarding schools), many of which are government-subsidized. Together, these cater for almost 2,000 children of secondary school age and a small number of primary school children also. In all States, some provision is made for financial assistance towards the living and travelling expenses of children who are obliged to live away from home in order to attend school.

(v) *Correspondence.* For children who are still unable to attend school, systems of correspondence tuition have been established in every State. The Education Departments provide tuition through primary and secondary school levels and up to matriculation standard if required. In addition, the Technical Correspondence Schools conducted by the senior technical college of each State arrange for correspondence tuition at secondary level up to matriculation standard for students over the school leaving age. Further reference to the work of the Technical Correspondence Schools is made in § 5 of this chapter, which deals with technical education (*see p. 583*).

**11. School Broadcasting in Australia.**—Over the years, an extensive school broadcasting system has been developed in Australia by the co-operative efforts of the Australian Broadcasting Commission and education authorities. The Youth Education Department of the A.B.C. is responsible for the broadcasting of the programmes, but it draws freely on the advice and services of teachers and maintains permanent liaison officers with the Education Departments. More than two-thirds of Australian schools are equipped with radio receivers.

School broadcasts are presented as part of the regular A.B.C. programmes without separate stations or wave lengths. Special efforts are made, however, to relate the broadcasts to school work by the extensive distribution of booklets giving details of programmes in advance and subject notes accompanied by picture sheets, work books, and teachers' notes.

Broadcasting has proved to be a most effective way of reaching the outback children of Australia, and radio lessons have been designed to supplement correspondence lessons. The success of the first School of the Air, which has been in operation at Alice Springs in the Northern Territory since 1950 and serves correspondence pupils of the South Australian Education Department, has led to the opening of similar schools based at Ceduna and Port Augusta in South Australia, and at Broken Hill, in the far west of New South Wales. In all, these schools serve a total of well over half a million square miles. By means of special two-way radio equipment, children hundreds of miles apart can participate in the same lesson and teachers and pupils can talk directly with each other.

The "Kindergarten of the Air" is described in § 4 of this chapter, which deals with pre-school education (*see p. 582*).

**12. Teacher Training and Recruitment.**—(i) *General.* The training of government school teachers is carried out by the State Education Departments, but in most States persons who wish to train for teaching in private schools may attend government training colleges on payment of a fee. Many non-government school teachers have been drawn from the government teaching services and others have been recruited at the university graduate level. Private training institutions also provide some teachers.

An account of the early growth of teacher training systems is to be found in Official Year Book No. 22 and subsequent developments were reviewed extensively in Official Year Book No. 40. The pupil-teacher system has been abandoned as the chief method of training teachers and teacher students are now recruited at matriculation level and given a professional course of training at colleges controlled by Education Departments or by university departments of education. The raising of standards and lengthening of training have led to a close association between the Education Departments and universities. The trend has been towards placing teacher training on the same basis as other professional training.

There is at present a shortage of teachers in Australia. Measures taken to overcome this shortage include substantial increases in teachers' salaries and liberalization of promotion systems, publicity drives to attract recruits and increases in living allowances to departmental teachers' college students. In some States, special arrangements are in force for intensive shorter training courses, in order to meet the immediate need. In others, recruitment of teachers overseas is undertaken to reduce the shortage.

(ii) *Training Colleges.* Every State maintains at least one teachers' training college. Most students are trained at colleges in the capital cities, although there has been a movement towards the establishment of colleges in the country. At the end of 1958, there were in Australia 23 teachers' colleges conducted by Education Departments and professional training for graduate teachers was provided by seven universities.

(iii) *Training of Primary Teachers.* In most States, teachers for government primary schools are trained in co-educational teachers' training colleges controlled and administered by the State Education Departments. Departmental trainees are given a monetary allowance while in training and are required to enter into a bond to serve for a specified period on completion of training or to repay all or portion of the cost of training.

The entrance standard is generally at the Leaving Certificate level at about the age of seventeen. In some States, intending teachers can obtain a scholarship at the Intermediate Certificate level to enable them to complete teachers' college entrance requirements. In return, they are required to enter into a bond of service additional to that normally required of departmental teachers' college trainees.

In general, the duration of courses is two years for primary teachers, including infants' teachers. The basic subjects taken in the various courses are principles, history and general methods of teaching, special methods of teaching primary school subjects and educational psychology. In addition, students undertake courses in physical education, art, music, school hygiene and handicrafts as well as lectures designed to widen their own cultural background.

In South Australia, primary teacher trainees attend certain university courses, including Education, as part of their training. In Tasmania, while the majority of departmental teacher trainees receive their training at the university, there is also a government teachers' college providing courses in infant, primary and home arts teaching.

In some States, separate courses are provided for infants' teachers and for teachers in small one-teacher schools. In Victoria, an extension course of one year following the primary course is designed to train teachers of home-crafts for primary schools.

(iv) *Training of Secondary Teachers.* Prospective secondary teachers are required to undertake a degree course followed by a one-year post-graduate course leading to a university degree or diploma in education, or a two or three year course at a teachers' college. Both these periods of training include lectures on subjects associated with educational theory and practice, study of methods and techniques appropriate to secondary school subjects, periods of practice teaching and the observation of classroom techniques in the teaching of special subjects.

(v) *Training of Specialist Teachers.* Teachers of specialist subjects such as music, art, manual arts, domestic science and commercial subjects receive from two to five years' training varying according to the institution concerned and the type of secondary school in which the teacher is to teach. In several States, the shorter courses are provided wholly by the teachers' colleges. Where the specialist course is given at an institution other than the teachers' college—for example, at a university, technical college or conservatorium of music—as is usual for teachers of specialist subjects in high schools, trainees are required to attend teachers' college or university lectures in education and in some cases the specialist course is followed by a year of professional training.

There are conservatoria of music in four States. In New South Wales and Queensland, the conservatorium is a State institution under the Minister for Education; in Victoria and South Australia, it is attached to the university.

Courses designed to train physical education teachers are offered in five States, in one at a teachers' college and in the others by the universities.

Training for teachers of agricultural subjects in secondary schools is available in five States and consists of either an agricultural college diploma or a university degree course together with professional training. In Victoria, the two-year agricultural college diploma course follows the normal two-year primary teachers' course. In New South Wales, in addition to the three-year university agricultural course followed by one year's professional training, there is a two-year teachers' college agricultural course.

(vi) *Training of Technical Teachers.* Teachers of general subjects in technical schools and colleges usually receive their training either as primary or as secondary teachers and after some experience in either or both fields are transferred to a technical institution.

Teachers of specialist subjects in technical schools are usually recruited from the ranks of qualified tradesmen engaged in either industry or commerce. Upon appointment, teachers of technical subjects usually receive instruction in classroom teaching techniques and procedures. A separate Technical Teachers' College has been established in Victoria.

(vii) *In-service Training.* As almost all teachers now enter the profession by way of teachers' colleges, where they receive basic professional training, in-service training in Australia is directed chiefly towards keeping teachers abreast of developments and adding to their basic training.

Such training usually takes the form of short courses held sometimes during vacations, sometimes during school-time or in the evenings. Courses consist of discussions and lectures given by senior staff members of Education Departments and university and teachers' college lecturers, on such subjects as classroom techniques and supervision, librarianship, visual aids, music, arts and crafts and physical education. In some States, there are also in-service courses for special groups of teachers, such as headmasters or teachers of one-teacher schools. In addition, district inspectors are responsible for organizing short conferences of teachers where professional topics are discussed.

Education Departments encourage teachers to pursue university courses, and in some States pay the cost of courses undertaken by selected teachers.

The official publications of the Education Departments contain articles dealing with educational theory and practice. In most States, the magazines of the teachers' organizations, which reach the majority of government teachers, also contain articles of this type.

(viii) *State Details.* The details of teacher training in the States are given on pages 442-3 of Official Year Book No. 40.

(ix) *Sex and Status of Teachers.* Although about one half of the teachers in State schools in Australia are men, the ratio varies from State to State. In the infants' schools and generally in girls' departments, women teachers only are employed. Men, however, predominate in the senior positions, both because of their greater preponderance amongst those with long service and because the higher promotion positions are generally reserved for men, except in infants' schools and girls' schools.

13. *School Buildings and Grounds.*—In 1930, school building programmes were seriously cut because of the financial difficulties of the depression. The 1939-45 War intervened before school building could be resumed on a large scale. After the war, the building of schools was given a high priority, but the rapid post-war increases in school population have imposed a severe strain on available school accommodation and such emergency measures as the use of halls, cloakrooms and weather-sheds for class instruction have been adopted in some areas.

The post-war buildings fall into two groups, portable and permanent. In primary schools in particular, some Education Departments favour the use of both kinds of classroom in conjunction, thus enabling them to cope with the changing age-composition of particular areas. Prefabricated buildings and classrooms have been imported or locally produced in increasing quantities and include both timber-frame, aluminium and steel units, and single and multiple pre-cast concrete units. Such prefabricated buildings are used not only in extending the facilities of existing schools and to provide multi-purpose units such as assembly hall gymnasiums but also, now, for erecting entire schools. Expenditure on school building has increased greatly in all States over recent years.

14. *Equipment.*—(i) *Text Books and Materials.* The State Education Departments supply government schools with essential equipment free of charge, including scientific apparatus and equipment, maps, blackboards, chalk and cleaning materials, and non-consumable equipment for commercial, home science and manual training. Garden tools and physical training equipment are supplied free in most States.

Primers and writing equipment for individual pupils are usually supplied free in primary schools, and each Department, except that in Tasmania, produces in addition monthly school magazines which are supplied free or at a small cost. Textbooks, however, are supplied to primary pupils free of charge in one State only. In other primary schools and in all secondary schools, textbooks must be purchased by students, although in several States schools own stocks of textbooks which are hired to students, and in one State secondary textbooks are sold at reduced rates.

Other equipment is supplied free by the Departments on a limited basis only. Equipment such as radios, film and filmstrip projectors, pianos, duplicators and library books are ordinarily purchased for individual schools by the parent and citizens organizations associated with them, with the assistance of subsidies from the Departments.

(ii) *Furniture.* There has been considerable development in this field. Originally most schools were equipped with long desks and benches, seating six to eight pupils, but these were later replaced by the standard dual desk with tip-up seat, and in infant classes by individual chairs and small tables. After the war, considerable research was undertaken on posture and the physical measurement of children. The dual desk is now being replaced in some States by the individual table and chair, provided in a range of sizes suitable to each class. In some States, tubular steel is used. The new type of furniture is more suitable for flexible arrangements of the class in line with modern educational practice.

(iii) *Visual Aids.* In the past 20 years, there has been a remarkable growth in the use of visual aids in education. After some resourceful pioneering work had been done by individuals, the Departments of Education, between 1936 and 1939, appointed special committees and teacher demonstrators to guide the development of the new educational medium. Production units to produce film strips suitable for use in schools were set up in five States and an Australian-produced film-strip projector was manufactured. After the war, the emphasis moved from the strip projector to the 16 mm. sound machine and the Australian National Film Board, set up by the Commonwealth Government to promote

the use of educational films, became the main producer of these films. Film companies are also designing films primarily for class-room use and several manufacturers have produced 16 mm. sound projectors. Education Departments have their own film libraries to distribute films to schools and, in addition, borrow from the Commonwealth National Library, which is the main distributing centre for non-technical films in Australia.

**15. Parent and Citizen Organizations.**—In Australia, where all government schools are administered by central departments, there is little opportunity for local administration of education. Public interest is expressed through parents' committees or organizations of parents and other citizens interested in supporting their local school. The Education Acts of all States provide for the formation of groups of this type, whose aims are to promote the interest of the school by bringing parents, pupils and teaching staff together, to help provide teaching aids and recreation materials not supplied by the departments, to assist in the regular attendance of children at school and to help find accommodation for teachers.

In several States, the general maintenance of school buildings, equipment and grounds is a statutory responsibility of the parent groups, costs being covered by government grants. Lunch canteen services at local schools, where Oslo lunches may be purchased, are maintained by groups in some States.

A notable achievement of the parent groups has been the establishment of school children's insurance schemes, operated through State government insurance offices or private insurance companies. These schemes cover accidents to children which occur between the time of leaving home for school and returning home by the usual direct route.

State-wide councils of federations of parents' groups are associated in a federal body, the Australian Council of School Organizations.

**16. School Banking.**—Particulars of School Savings Banks are included in Chapter XX.—Private Finance.

**17. Statistics of Government Schools.**—(i) *General.* The government schools shown in the following tables include primary, secondary, junior technical, correspondence and subsidized schools, but exclude senior technical colleges, evening schools and continuation classes.

Particulars relating to senior technical colleges are given in § 5, page 583.

Enrolments may be measured in a number of ways:—

*Gross Enrolment* means the number of names entered on the school rolls during the course of a year. Some children are thus counted more than once if they transfer from school to school during the year.

*Net Enrolment* means the gross enrolment less transfers from school to school. This is sometimes referred to as "the number of children instructed" at any time during the year. Children transferring from Government to non-Government schools will still be counted in both places. Net enrolment is less than gross enrolment, but greater than the number of children enrolled at one time.

*Average Weekly enrolment may mean either* (1) the average of the highest enrolment in each week; or (2) the average of the average enrolments for all weeks in the year. These figures do not differ appreciably, but some States use one, and some the other.

Average Weekly Enrolment, by either method, may include a few children counted twice. It may be less than net enrolment and less than the greatest number of children enrolled at one time.

*Census Enrolment* means the number of children enrolled on a chosen day, usually 1st August. The figures thus determined usually approximate to the average weekly enrolment. If the census is at the end of the year, the figure may be higher than average weekly enrolment for primary schools and lower for secondary schools.

*Average Daily Attendance* which means the average number of children present for each whole schoolday. In some States, half-day absences are taken into account in computing "average daily attendance" thus lowering the figure which would be obtained if presence for half a day were counted as presence for a whole day.

(ii) *Statistical Summary.* The following table shows for 1957 the number of government schools, together with the teachers employed, teachers in training and the number of children enrolled.

GOVERNMENT SCHOOLS(a), 1957.

| State or Territory.        | Schools Open at End of Year. | Teachers Employed (excluding Teachers in Training). | Teachers in Training. | Net Enrolment.   |
|----------------------------|------------------------------|---|-----------------------|------------------|
| New South Wales(b) .. .. . | 2,639                        | 17,486  | 3,946                 | 539,781          |
| Victoria .. .. .           | 2,073                        | 12,728  | 3,510 (c)             | 355,220          |

(a) Excludes Senior Technical Colleges. (b) At 31st December.

(iv) *Schools in the Australian Capital Territory.* During 1957, 14 government schools were in operation in the Australian Capital Territory. Enrolment numbered 5,882, and average attendance was 5,364. By arrangement with the Commonwealth Government, these schools are conducted by the New South Wales Education Department with a provision for primary and secondary education, the Department being recouped for expenditure. The cost of the teaching staff in 1956-57 was £278,376, while the cost of general maintenance amounted to £138,895. The figures quoted exclude enrolment, etc., at the Canberra Technical College and the Evening Continuation School. For further particulars of educational facilities in the Australian Capital Territory, see Chapter V.—The Territories of Australia, Australian Capital Territory, page 121.

(v) *Expenditure. (a) Maintenance—All Schools (except Senior Technical Colleges).* The net expenditure on maintenance in all grades of schools, except senior technical colleges and, in Victoria, junior technical schools, and the cost per head of average attendance for each of the years 1953 to 1957 are shown in the following table. The figures do not include expenditure on buildings, which is shown in a subsequent table. In all expenditure tables, the figures for Victoria, Queensland, Western Australia and the Northern Territory relate to the financial year ended six months earlier than the calendar year.

(a) Excludes Senior Technical Colleges. (b) Gross figures, receipts not being available.  
(c) Excludes Junior Technical Schools. (d) Twelve months ended 30th June of year shown.  
(e) Estimated.

(b) *Maintenance—Secondary Schools.* The figures shown in the preceding table refer to expenditure on the maintenance of all government primary and secondary schools, excluding senior technical colleges. It has been the practice of the State Education Departments to give separate information in regard to the cost of secondary education. The fact, however, that both elementary and higher education are in some instances given in the same school and by the same teacher makes difficult any satisfactory allocation of expenditure between primary and secondary education. Furthermore, the term "secondary" has not the same meaning in all States. Similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted hereunder in respect of cost have been extracted mainly from the reports of the State Education Departments, and are subject to the foregoing qualifications. There are no secondary schools in the Northern Territory, although some primary schools have secondary tops. Consequently no figures are given in the following table for the Northern Territory.

(a) Excludes Senior Technical Colleges. (b) Gross expenditure, receipts not being available. (c) Figures relate to 12 months ended 31st December of year shown. (d) Figures relate to 12 months ended 30th June of year shown. (e) Excludes Junior Technical Schools. (f) Excludes expenditure on buildings.

The figures in this and the preceding tables refer to all grades of government schools with the exception of senior technical colleges, and in Victoria, junior technical schools.

### § 3. Non-Government Schools.

1. *Public Authority and the Non-Government Schools.*—In all States, education is compulsory for all children between certain ages. It must be received in a government school, unless the child is under "regular and efficient" instruction elsewhere. This may be at home, or in a non-government school. The provision for control over the regularity and efficiency of instruction in the non-government schools varies considerably from State to State. In New South Wales and Western Australia, provision is made for an initial inspection when a new school starts, and for inspections thereafter as the Minister requires, to ensure efficiency. In Victoria and Tasmania, registers are kept of teachers and schools, and both teachers and schools must satisfy the administering authority that they are efficient before registration is granted. Without such registration, neither a teacher nor a school can operate. Provision is made, too, for inspections at any time by the registering authority.

In Queensland, eight grammar schools, which exist by statutory authority and are subsidized by the State, are subject to annual inspection. These are the only non-government schools in Australia for which an annual inspection is prescribed by statute. Other non-government schools in Queensland may be inspected at their own request, but it is possible for these schools—and also those in South Australia—to exist without inspection.

Public authority over schools or institutions having scholars above the compulsory ages is generally less direct. It is effected directly by the registration procedures in Victoria

and Tasmania, and in all States there is a measure of indirect control through provisions governing the award of State scholarships, bursaries or other forms of financial assistance to secondary scholars, which are available only in government or approved non-government schools. In New South Wales, also, the Intermediate and Leaving Certificates are awarded only to pupils of schools whose courses of study are approved by the Department of Education.

In all States, non-government schools are required, under the authority of either the Education Acts or Statistics Acts, to furnish certain statistical returns. The form of these returns may be prescribed in the Acts or may be subject to alteration with the Minister's consent.

2. **Non-Government Schools Finance.**—Roman Catholic parochial schools do not charge fees, although most families make a contribution if they can afford to do so. With this exception, pupils of non-government schools must ordinarily pay fees. At the majority of non-government secondary schools, privately endowed scholarships are available in varying numbers and reductions in fees are normally made for children of clergy or for two or more members of one family attending the same school.

Certain State scholarships and bursaries are, as noted above, tenable at approved non-government secondary schools. Since the establishment of educational systems by the State Governments, official policy has been largely against the provision of direct financial assistance to non-government schools. Eight undenominational grammar schools in Queensland, however, receive a State subsidy under the Grammar Schools Acts 1860–1900. In 1957, the Tasmanian State Government brought down legislation, which was subsequently rejected by the Legislative Council, for the provision of capital grants to non-government schools, and in 1956, the Commonwealth Government arranged to contribute to the interest payments on loans raised by churches in order to build denominational secondary schools in the Australian Capital Territory.

3. **Numbers of Non-Government Schools, Teachers and Enrolments.**—The numbers of non-government schools, teachers and enrolments for 1957 are shown in the following table:—

**NON-GOVERNMENT SCHOOLS, 1957.**

| Denomination.                    | N.S.W.<br>(a)  | Vic.           | Q'land.       | S. Aust.      | W. Aust.      | Tas.          | N.T.       | Aust.          |

5. The Organization of Roman Catholic Education.—There is, in each State capital, an official who acts under the Archbishop as a Director of Catholic Education for the area. Each diocese within the area is, however, autonomous and manages its own educational affairs subject to the local episcopal authority. The State Director has, in addition to possible inspectorial functions within his own diocese, the duty of co-ordination of educational matters within his area, and of liaison with other educational authorities, particularly the State Education Department.

The system includes kindergartens, sub-primary, primary, academic secondary, home science, commercial, agricultural and technical schools, juniorates and minor seminaries, schools for the mentally and physically handicapped, orphanages and a variety of special schools of a charitable nature for under-privileged or socially handicapped children.

With the exception of a small number of permanent lay teachers and a number of visiting teachers, usually specialists in such matters as physical education, sport, and speech, teaching is done by members of religious orders.

6. The Organization of Other Non-Government Education.—(i) *General.* Practically all non-government schools, except a limited number under private ownership, are governed by a controlling body known variously as a School Council or Board of Trustees or Governors.

Within each State, although the other non-government schools may be organized into loose forms of association for purposes such as sports, conferences, and uniform conditions, there is no system corresponding in size, detail or organization with the Roman Catholic schools.

The Headmasters' Conference of Australia and the Headmistresses' Association of Australia are composed of headmasters and headmistresses respectively of a number of the larger non-government schools, including some Roman Catholic schools. Neither body has executive powers. One of the chief considerations for the admission of new members is the degree of independence enjoyed by the governing body and principal of the school concerned.

(ii) *Church of England.* The various types of Church of England schools include small schools associated with a local parish; schools under direct ownership of a diocese; schools established by Acts of the Church Synod, in which the majority of the members of the council are church representatives but which, otherwise, have almost complete independence; and schools conducted by religious orders of the church.

The proportion of members of a school council nominated by the church varies. In some schools, members may also be nominated by parents, by former students, and by the council itself.

In general, schools incorporating the words " Church of England " in their title follow a diocesan syllabus of religious education.

(iii) *Other Denominations.* In general, control of Presbyterian schools is exercised through School Councils appointed by the General Assembly of the Presbyterian Church in the State concerned. Councils vary considerably in size and in the bodies represented on them. Similarly, appointments to councils of Methodist schools are made by the annual Conference of each State.

In Queensland, five schools are operated under the joint auspices of the Presbyterian and Methodist churches. A limited number of schools are conducted by other denominations, such as the Baptist, Congregational and Lutheran churches and by the Seventh-Day Adventists. The Society of Friends conducts one school in Australia, the Friends' School, Hobart.

Jewish schools are conducted in several capital cities.

(iv) *Undenominational.* There are a number of undenominational schools in Australia. Some of the larger, although not State-operated, have Government nominees on their boards. They include Sydney Grammar School, the Hale School, Perth, and the eight Queensland

grammar schools. Other undenominational schools operate under the auspices of corporate bodies, usually in the form of a limited liability company, while others are privately owned. The majority of schools in this last category are small kindergartens and primary schools.

#### § 4. Pre-School Education.

1. **Types of Pre-School Centres.**—Free kindergartens were originally established in congested industrial areas and financed mainly by voluntary effort, but over the years the Commonwealth Government, the State Governments and some municipal councils have provided an increasing amount of financial assistance, and in addition themselves maintain pre-school centres in certain areas.

In 1938, the six Kindergarten Unions, the voluntary organizations which pioneered pre-school education in Australia, met to form a federal organization. Its title "Australian Association for Pre-school Child Development" was changed in 1954 to "Australian Pre-school Association". Its membership is now open to all organizations whose main objective is the care of the pre-school child, and includes bodies in the Australian Capital Territory, the Northern Territory, and the Territory of Papua and New Guinea.

The aim of the association is to promote the continuous advancement of pre-school movements throughout Australia. It sets out standards which act as a guide throughout Australia to those sponsoring pre-school centres, and is responsible for the administration of the six Lady Gowrie Child Centres. These centres are demonstration nursery schools which the Commonwealth Government established in each of the capital cities in 1940 and which are maintained by Commonwealth grants.

To-day, pre-school centres are found not only in inner city areas but also in suburban and country districts. Programmes are adapted to suit the areas in which the centres are situated. Types of pre-school centres include nursery kindergartens, crèches with full-day care for children of working mothers, play groups and play centres, occasional care centres and residential holiday homes. Crèches accept children from a few weeks of age up to 5 or 6 years while other centres cater for children from about 3 years up to 5 or 6 years. A mobile unit is in operation in the Australian Capital Territory.

2. **The Training of Teachers.**—It is an accepted principle in Australia that all types of pre-school work should be under the guidance of trained pre-school teachers, although, owing to the shortage of teachers, this cannot always be put into practice.

The Kindergarten Unions in all States except Tasmania have established teacher training colleges providing three year courses. The minimum entrance age is seventeen and the Leaving Certificate is usually required before admission. In addition, in New South Wales, the Sydney Day Nursery and Nursery Schools' Association maintains a training college, and a two-year course for nursery teachers is available at the Sydney Teachers' College.

In Tasmania, prospective teachers complete a two-year course of training at one of the Education Department's pre-school centres. Those wishing to gain a Kindergarten Training College diploma must attend a college on the mainland.

Many students-in-training receive government scholarships, and others are sponsored by government departments or voluntary organizations.

3. **Kindergarten of the Air.**—The Kindergarten of the Air came into being in 1942 in Western Australia, where, under the stress of the war, kindergartens could not remain open. It was conducted by the Australian Broadcasting Commission and proved so successful that within a few years it was being broadcast throughout Australia and has inspired similar projects overseas. It consists of a daily programme of 25 minutes based on the interests of children from 3 to 5 years of age.

4. **Kindergarten Unions.**—The following information regarding kindergarten unions has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia where the details were furnished by the Education Department. It refers to kindergarten unions or associations and excludes the kindergarten branches in the government schools of the various States.

KINDERGARTEN UNIONS, 1957.

(a) Not available. (b) Includes affiliated suburban and country centres. (c) In 1956, all Kindergartens formerly under the jurisdiction of the Tasmanian Kindergarten Union came under the control of the Department of Education.

In 1957, only 69 of these 246 kindergartens were located outside metropolitan areas, mainly in the larger provincial cities. In each capital city, except Hobart, there is a training college and the number of students in training during 1957 was 85 in Sydney, 141 in Melbourne, 35 in Brisbane, 38 in Adelaide, and 24 in Perth.

### § 5. Technical Education.

1. General.—In this section, technical education refers to that branch of education which is concerned with the preparation for entry to skilled occupations, including trades and professions. In the main, this education is vocational and is chiefly part-time, being carried out by the student while he is engaged in his occupation. The work of technical high schools, junior technical schools and other schools of this nature, which provide courses with a bias towards technical handwork, has been excluded, as these schools provide a form of education which is more properly regarded as secondary education.

The chief institutions for higher education other than the universities are the technical colleges, which are administered in five States by a division of the Education Department. In New South Wales, a separate Department of Technical Education has been established, and in Victoria a number of the foremost technical colleges are controlled by independent councils which, although responsible to the Minister of Education, enjoy a large measure of autonomy.

The technical colleges offer training not only in all the major industrial skills, but also in a variety of commercial, artistic and domestic occupations. Their courses may be divided into three main types, as follows:—

- (i) Diploma courses giving advanced training in the technical professions and other fields such as accountancy and art.
- (ii) Vocational courses, usually leading to the award of a certificate, for skilled technical and semi-professional workers. Many of these courses are in fields not covered by an apprenticeship award.
- (iii) Craftsman or artisan training in the apprenticeship trades.

The University of New South Wales (formerly the N.S.W. University of Technology) conducts a number of diploma courses on behalf of the Department of Technical Education.

A brief description of the expansion in technical training since the 1939–45 War appears in Official Year Book No. 43, page 449. The following table gives some indication of the growth of technical education in the years 1953 to 1957.

TECHNICAL EDUCATION : AUSTRALIA.

| Year.        | No. of Colleges. | No. of Students. | No. of Teachers.(a) | Total Expenditure. |
|--------------|------------------|------------------|---------------------|--------------------|
|              |                  |                  |                     | £                  |
| 1953 .. .. . | 141              | 178,301          | 6,688               | 7,826,645          |
| 1954 .. .. . | 148              | 178,527          | 7,149               | 9,245,560          |
| 1955 .. .. . | 151              | (b)              | 7,632               | 10,058,917         |
| 1956 .. .. . | 164              | (b)              | 8,364               | 11,395,445         |
| 1957 .. .. . | (b)              | (b)              | (b)                 | (b)                |

(a) Includes both full-time and part-time teachers. (b) Not available.

Training in certain technical aspects of agriculture such as farm mechanics, wool classing, and in related fields such as food technology is also provided by the technical colleges, while the seven State agricultural colleges (*see also* § 27 of Chapter XXII), located in all States except Tasmania, provide comprehensive agricultural courses of two to three years' duration which lead to diplomas in agriculture. At some colleges, other diploma courses are offered in addition, including horticulture, dairying and dairy manufactures, food technology and oenology. The Queensland Agricultural High School and College is administered by the Department of Education; in other States, the Departments of Agriculture are responsible for administration of the colleges.

2. Correspondence Training.—Technical correspondence courses were first offered in Australia about 1910. During the period 1940 to 1944, technical correspondence schools were founded in each State in conjunction with the Commonwealth and these have become an important part of the system of technical education in the Australian States.

These schools not only offer a wide variety of correspondence courses, including trade and apprenticeship, rural, commercial and art courses, but, in addition, provide secondary courses up to matriculation or diploma entrance standard. Students who because of distance or working hours cannot attend technical college classes may enrol for these courses. In New South Wales, "mobile instructional units" consisting of rail cars equipped as self-contained workshops are used to provide practical experience for correspondence students, as well as for the instruction of apprentices and tradesmen at smaller country centres.

In 1955, the Royal Melbourne Technical College established a shortwave broadcasting station to provide further tuition for its correspondence students.

An interesting recent development in technical correspondence education, in which the Australian technical colleges are co-operating with the Commonwealth Government, is the correspondence scholarship scheme operating under the Colombo Plan. Through this scheme, South and South-east Asian students may take correspondence courses conducted by the technical colleges and by the University of Queensland, which has a highly organized system of external tuition. Courses include commercial, rural and teacher-training, engineering and other technical courses. Where practical training is required as part of the course, it is taken by the student in his own country.

3. **Teacher Training.**—Prior to the 1939–45 War, technical colleges were staffed chiefly by men drawn from two sources. They were either trained teachers in the employment of the Education Department or technicians drawn from industry. Although some of the latter were highly qualified, the great majority had not been trained as teachers. In order to remedy this, there has been a move to develop schemes of training technical college teachers without breaking the important link provided by recruiting specialist tradesmen to teach in the colleges. In Victoria, the Technical Teacher's College provides training for students with the appropriate diploma or trade qualifications and suitable industrial experience. In New South Wales, technical college lecturers and tradesmen-instructors receive an in-service course of teacher training in both general educational theory and teaching method, and correspondence courses and visiting lecturers care for the newly appointed teacher-instructor in country colleges. Modifications of this scheme are in operation in other States. Many technical teachers, principally of academic, commercial and domestic science subjects, hold trained teachers' certificates from teachers' colleges.

4. **Colleges, Teachers and Students.**—The number of colleges, teachers and enrolments of individual students during the years 1953 to 1957 are given in the following table:—

**TECHNICAL EDUCATION: COLLEGES, TEACHERS AND ENROLMENTS.**

| State.                     | Colleges. | Teachers   |            |        | Individual Students Enrolled. |          |          |

| <b>Australia(e) ..</b>  | <b>8,601,105</b>          | <b>409,172</b> | <b>2,317,047</b> | <b>12,243,824</b>     | <b>1,127,135</b>    | <b>11,116,689</b> |

(a) The differences between amounts shown in this column and the sums of the three preceding columns represent expenditure on other items. (b) Includes expenditure on Junior Technical Schools. (c) Year ending June, 1957. (d) Included with salaries and maintenance. (e) There is no technical college in the Northern Territory.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is financed largely from loan moneys, the sums provided from this source in 1957 being: New South Wales, £605,780; Victoria, £1,080,446; Queensland, £152,519; South Australia, £231,993; Western Australia, £35,473; Tasmania, nil.

### § 6. Commonwealth Activities.

Although the primary responsibility for education rests with the States, the Commonwealth Government is committed to a number of educational activities related to its other functions. For example, it maintains officer training colleges and education services for each of its defence services, a School of Pacific Administration for the training of administrative and other officers for service in Commonwealth Territories, and a School of Forestry. In each of the Australian Territories, the educational programme provides for both the native and white children who live there. References to these programmes appear in Chapter V.—The Territories of Australia.

The Australian Broadcasting Commission features school broadcasts and other educational broadcasts as part of its daily programmes. The Commonwealth Scientific and Industrial Research Organization undertakes research, the results of which are made available to educational institutions. In 1951, the Commonwealth Government introduced a free-milk scheme for school children. This extended a service which some State authorities were already providing for a proportion of the school population. Under the Commonwealth Reconstruction Training Scheme, many ex-servicemen and women have received the training which has enabled them to enter a variety of trades and professions.

The Commonwealth Office of Education, established under the Education Act 1945, acts as the Commonwealth's educational adviser, undertakes research work as Commonwealth activities require and is the channel for liaison between Commonwealth and State educational authorities. This office has responsibilities with regard to the education of migrants, international relations, including the association of Australia with the aims and activities of the United Nations Educational, Scientific and Cultural Organization, (UNESCO), and the provision of scholarships and fellowships for selected students under the Technical Co-operation Scheme (Colombo Plan) and under the scheme known as Australian International Awards.

The activities of the Universities Commission are described in § 8, para. 6.

The Commonwealth assists a number of other bodies concerned with education. Besides grants to organizations such as the Australian Council for Educational Research, grants are made to the States for payment to universities.

Further details of Commonwealth assistance to students (including the Commonwealth Scholarship Scheme) and of grants for universities are given in § 8, para. 6, of this chapter.

### § 7. Australia and International Relations in Education.

Despite its isolation, Australia has always been responsive to educational developments in oversea countries, particularly those in the United Kingdom, but it is only recently that it has begun to make any considerable impact on educational thought overseas.

*In this connexion, there have been important developments since the 1939–45 War. For instance, there has been a remarkable increase in the volume of information on educational matters exchanged between Australia and South-east Asia, and Australia participates in the Technical Co-operation Scheme (Colombo Plan), the United Nations Technical Assistance programme, the cultural programme of SEATO, and the scheme of Australian International Awards, under which a limited number of scholarships are given annually.*

Perhaps the most important single factor behind the quickening of Australian interest in international cultural affairs has been membership of UNESCO. Australia has been a member since 1946. Eleven expert committees in Australia are responsible for a wide and varied programme of activities on behalf of UNESCO. Their advice has helped to make Australia's contribution to international conferences and seminars highly effective. Other work undertaken by these committees has included the provision of technical material and advice to the countries of South and South-east Asia, the conducting of seminars in Australia, arranging for exhibitions and displays in Australia and overseas, and the publication of handbooks and brochures to assist teachers and other persons in meeting the problems involved in educating for international understanding.

The Australian National Advisory Committee for UNESCO, on which all the other committees are represented, advises the Commonwealth Government and co-ordinates the work of the specialist committees.

### § 8. Universities.

1. *General.*—There are at present, nine universities and two university colleges in Australia. The following list shows the date of foundation and the faculties existing at each university in Australia.

University of Sydney, established in 1850, located in Sydney, New South Wales. Agriculture, Architecture, Arts, Dentistry, Economics, Engineering, Law, Medicine, Science, Veterinary Science.

University of Melbourne, established in 1853, located in Melbourne, Victoria. Agriculture, Architecture, Arts, Dental Science, Economics and Commerce, Education, Engineering, Law, Medicine, Music, Science, Veterinary Science.

University of Adelaide, established in 1874, located in Adelaide, South Australia. Agricultural Science, Arts, Dentistry, Economics, Engineering, Law, Medicine, Music, Science, Technology.

University of Tasmania, established in 1890, located in Hobart, Tasmania. Arts, Commerce, Engineering, Law, Science.

University of Queensland, established in 1909, located in Brisbane, Queensland. Agriculture, Architecture, Arts, Dentistry, Economics and Commerce, Education, Engineering, Law, Medicine, Science, Veterinary Science.

University of Western Australia, established in 1912, located at Nedlands, Perth, Western Australia. Agriculture, Arts, Dental Science, Education, Economics, Engineering, Law, Science. A Medical School has been established and it is expected that the full six year course will be available in 1959.

Australian National University, established in 1946. A post-graduate research institution, located in Canberra, A.C.T. John Curtin School of Medical Research, the Research School of Physical Sciences, the Research School of Social Sciences, the Research School of Pacific Studies.

University of New South Wales, established in 1958 (1948 established as New South Wales University of Technology), located at Kensington, Sydney, New South Wales. Architecture, Commerce, Engineering, Humanities and Social Sciences, Science, Technology. The University also provides part-time instruction in science and engineering at technical colleges in country towns in New South Wales.

University of New England, established in 1954, (1938 established as New England University College), located in Armidale, New South Wales. Agricultural Economics, Arts, Rural Science, Science.

There are also two university colleges in Australia:—Canberra University College, founded in 1930, located in Canberra, Australian Capital Territory, is affiliated with the University of Melbourne, and has degree courses in Arts, Law, Science, and Economics and Commerce, and a diploma in Public Administration; and Newcastle University College, founded in 1951, located in Newcastle, New South Wales, is affiliated with the University of New South Wales and has degree and diploma courses in the faculties of Science,

Technology, Engineering, and Commerce, and diploma courses in the faculties of Architecture, and Humanities and Social Sciences. The Arts courses at the Newcastle University College are provided by the University of New England in co-operation with the University of New South Wales.

A second university in Victoria, Monash University, is at present in course of establishment. Under the Monash University Act, an interim council was appointed in May, 1958, by the Governor-in-Council and includes representatives of academic, scientific and industrial interests, together with three ex officio members—the Vice-Chancellor, when appointed, and the Director of Education and the Chief Inspector of Technical Schools in Victoria. The Act provides for training in Pure Science, Applied Science and Technology, Engineering, Agriculture, Veterinary Science, Medicine, Law, Arts, Letters, Education and Commerce. The University is also to provide facilities for university education throughout Victoria by the affiliation of other educational institutions and by the establishment of tutorial, correspondence and vacation classes.

2.—*Expansion within the Universities.*—Within the past 20 years, the appearance of some of the universities has altered to a striking extent. Many new permanent buildings and some temporary ones have been erected and new wings have been added. The universities are expanding their accommodation greatly to meet an expected record enrolment in the next decade.

There was a continuing increase in university enrolments from 1929 (approximately 9,000) to 1940 followed by a slight recession. In the closing year of the 1939–45 War, however, the number of students had risen beyond any previous figure, and rapid post-war expansion was responsible for a peak enrolment of 32,453 students in 1948. After 1948, the numbers decreased each year until 1953 as ex-service personnel completed their training under the Commonwealth Reconstruction Training Scheme. Thereafter they increased again and it is expected that by 1965 some 70,000 students will be enrolled in Australian universities. Enrolment in 1957 was 36,815.

3. *Courses.*—A brief survey of developments in university courses since the war up to 1954 was given in Official Year Book No. 42 (p. 476). An outline of some developments during 1955 and 1956 appeared in Year Book No. 43 (p. 453), and one for 1957 in Year Book No. 44 (p. 466).

At the University of New England, a four year degree course in Agricultural Economics commenced in 1958.

At the University of Sydney, a course in Criminology was under consideration late in 1958.

At the University of New South Wales, the establishment of a Faculty of Medicine is under consideration; it is hoped that the first year course will commence in 1960. Several new courses were instituted in 1958—a Bachelor of Science course in Industrial Arts, and in Fuel Technology; a Bachelor of Commerce course in Industrial Relations, and in Wool Commerce; a Bachelor of Engineering course in Naval Architecture; and Master of Technology courses in Civil Engineering, and in Highway and Traffic Engineering.

At the University of Western Australia, the courses available in the Faculty of Medicine were increased in 1958 to include the first, second, fifth and sixth years of the medical course. In 1959, all six years of the course will be available at the University of Western Australia.

For the majority of university courses full-time attendance is required. At most universities, however, certain courses, such as arts, commerce and economics, may also be undertaken by part-time or evening study. At the University of New South Wales, a variety of degree courses are available to evening students.

Several universities have limited systems of external tuition whereby students in country areas may take a restricted number of courses by correspondence. The University of Queensland has developed a system of correspondence tuition which now caters not only for students within the State but for those in the Northern Territory, Papua and New Guinea and adjacent Pacific islands. External students within Queensland receive tutorial assistance at university centres in the principal country towns. In addition, the university co-operates in the Colombo Plan Correspondence Scholarship Scheme (see p. 584).

The University of New England's Department of External Studies offers a wide range of subjects for external study, leading to the degree of Bachelor of Arts and the Diploma in Education. External students must attend short annual residential schools of instruction in their subjects, usually held at the university.

4. *Research.*—The research activities of the universities have been greatly stimulated over recent years by the interest and assistance of the Commonwealth and State Governments, of government instrumentalities such as the Commonwealth Bank, the Rural Bank of New South Wales, and the C.S.I.R.O., of private foundations, both oversea and Australian, such as the Nuffield Foundation, the Carnegie Corporation and the Water Research Foundation of Australia, and of industrial undertakings such as General Motors Holdens Limited and Broken Hill Proprietary Company Ltd.

Grants are made by the Commonwealth Government to bodies such as the Post-Graduate Committee in Medicine at the University of Sydney to facilitate arrangements for medical specialists from overseas to lecture and demonstrate advanced techniques in Australia.

During the year, the universities continued research projects in a number of fields, including education, anthropology, psychology, medicine and nuclear physics. Grants have been made by the Commonwealth Government, through the Australian Atomic Energy Commission, to a number of Australian universities for nuclear research.

The further expansion of teaching and research in various agricultural and veterinary fields was assisted by the annual and special grants of the Commonwealth Bank's Rural Credits Development Fund to several Australian universities. The C.S.I.R.O. also contributed to research in these and other fields.

5. *Services*.—The various types of community services provided by the universities are outlined in Official Year Book No. 42 (pp. 476–7). A noteworthy example of service to agriculture and industry is the Tractor Research Station at Werribee, Victoria, which was opened in 1957, as a result of an agreement between the Commonwealth, the States and the University of Melbourne. The station is conducted by the university and carries out tests for manufacturers on new tractors and other agricultural equipment.

6. *The Commonwealth and the Universities*—(i) *General*. The Commonwealth has given support to the Australian universities for many years. Prior to 1939, Commonwealth assistance was almost entirely concerned with research projects carried out by or in collaboration with the universities. During and since the 1939–45 War, the Commonwealth extended assistance to university students, at first to increase the number of highly trained people required for the war effort, then with the object of rehabilitating ex-servicemen, and finally as a social service benefit to the community. For the purpose of reconstruction training, the Commonwealth Government made available to the universities approximately £1 million for buildings and £500,000 for equipment. Since 1951, the Commonwealth has made special grants to the States for their universities and during the same time has continued to support the university institutions for which it is responsible.

(ii) *Assistance to Students*. Up to 1945, the Universities Commission functioned under National Security Regulations but in that year it was established on a permanent basis under the Education Act. After the 1939–45 War, the Commission continued to provide financial assistance to students under an interim scheme until 1951, when the interim scheme was superseded by the Commonwealth Scholarship Scheme.

Under this scheme, 3,000 scholarships are allocated annually to the States on a population basis. These scholarships are tenable at universities and other approved institutions. Awards are made on merit and all successful applicants have their fees paid. In addition, scholarship holders may be paid a living allowance subject to a means test. As from 1st January, 1959, the maximum rates of allowance will be £338 per annum for a scholar living away from home and £221 per annum in the case where he lives at home.

At 30th September, 1958, 11,089 scholars had completed courses of training under the Scheme. At the same date, there were 10,639 scholars in training of whom 9,513 were at universities and 1,126 at other institutions.

As from 1st January, 1959, post-graduate awards for training at Australian Universities will be made available under the Scheme. Up to 100 awards may be granted in 1959 and the benefits comprise a living allowance without a means test and payment to universities for tuition and facilities.

The Universities Commission also provides for the training at universities and similar institutions of ex-service personnel and war widows under the Reconstruction Training Scheme, the Korea and Malaya Training Scheme and the Disabled Members' and Widows' Training Scheme. A detailed description of the Reconstruction Training Scheme was given on page 240 of Official Year Book No. 39. At 30th June, 1958, 21,453 students had completed courses under these schemes and at the same date there were 97 in training.

(iii) *Commonwealth Grants to the States for University Purposes*. Following a report submitted by a committee of enquiry appointed to report on university finances and requirements, the Commonwealth has made grants since 1951 to the States for recurrent expenditure on university purposes. The payments have been made under the various States Grants (Universities) Acts.\*

In 1957, the Prime Minister appointed a committee to investigate the problems of Australian universities. The Committee was given wide terms of reference. Among other things, it was asked to consider the role of the university in the Australian community, the extension and co-ordination of university facilities, technological education at university level, the financial needs of universities and appropriate means of providing for those needs, and the Commonwealth Scholarship Scheme.

\* No. 81 of 1951; No. 75 of 1953; No. 28 of 1955; No. 37 of 1956 and No. 7 of 1957.

In accepting the principal recommendations of the Committee (Murray Report)\* the Commonwealth agreed to continue grants for recurrent expenditure in 1958, 1959 and 1960, to make additional unmatched recurrent grants, and to assist with the capital needs of the universities for building projects and for equipment. The Commonwealth is also to provide grants between 1958 and 1960 for the building programmes of residential colleges affiliated with universities.

The States Grants (Universities) Act No. 27 of 1958 operated from 1st January, 1958, and gave effect to these recommendations. This Act amended those parts of the States Grants (Universities) Act No. 7 of 1957 which referred to 1958 and provided for payments in 1957 to the South Australian School of Mines and Industries.

The maximum Commonwealth recurrent grants for 1958 are shown in the following table:—

**RECURRENT COMMONWEALTH GRANTS TO UNIVERSITIES.**  
(£.)

| University.   | Emergency Grant for Recurrent Expenditure Payable in 1958. | Amount for Teaching and Administrative Costs of Residential Colleges. | Maximum Amount for General Recurrent Purposes Payable in 1958. | Amount for Teaching and Administrative Costs of Residential Colleges. |
|---|--|---|--|---|
| (1)   | (2)  | (3)   | (4)  | (5)   |
| New South Wales—  |  |   |  |   |
| The University of Sydney ..                               | 240,000  | 6,100   | 685,000  | 13,400  |
| The University of New South Wales ..                      | 115,000  | 2,000   | 338,300  | 4,400   |
| The University of New England ..                          | 33,000   | 1,750   | 75,750   | 3,800   |
| Victoria—   |  |   |  |   |
| The University of Melbourne ..                            | 215,000  | 6,000   | 601,560  | 13,200  |
| Queensland—   |  |   |  |   |
| The University of Queensland ..                           | 135,000  | 4,200   | 352,400  | 9,200   |
| South Australia—  |  |   |  |   |
| The University of Adelaide ..                             | 129,000  | 2,600   | 326,800  | 5,700   |
| The South Australian School of Mines and Industries .. .. | ..   | ..  | 39,500   | 300   |
| Western Australia—  |  |   |  |   |
| The University of Western Australia                       | 90,000   | 1,800   | 224,190  | 4,000   |
| Tasmania—   |  |   |  |   |
| The University of Tasmania ..                             | 43,000   | 550   | 112,500  | 1,200   |
| <b>Total .. ..</b>  | <b>1,000,000</b>   | <b>25,000</b>   | <b>2,756,000</b>   | <b>55,200</b>   |

The emergency grant for recurrent expenditure (column 2) is an unmatched grant aimed at assisting the universities to meet some of their most urgent deficiencies in staff and equipment. The general grant for recurrent expenditure is a continuation of matched grants provided since 1951. The maximum amount available in 1958 is shown in column 4. In general terms the matched grants are made on a basis of £1 of Commonwealth money for every £3 of income received by a university from fees and State grants.

Columns 3 and 4 of Table I. show the grants which are required to be paid by each university from the emergency and the general recurrent grants, respectively, for the teaching and administrative costs of residential colleges administered by or affiliated with the university.

Provision is made in the States Grants (Universities) Act No. 27 of 1958 for these grants to be paid, at higher levels, in 1959 and 1960.

Between 1958 and 1960, the Commonwealth will make grants for selected building projects, shown in detail in the Third Schedule to the Act. Payments will be made up to a given maximum for each project, in the same proportion to State grants for these projects as that shown in the totals given for each university in columns 2 and 3 of the following table:—

\* Report of the Committee on Australian Universities (Canberra, Commonwealth Government Printer, 1957).

**COMMONWEALTH GRANTS FOR UNIVERSITY BUILDING PROJECTS, ETC.**  
(£.)

| Queensland—                                 |                                      |                               |
| The University of Queensland .. .. .        | 775,000                              | 775,000                       |
| South Australia—                            |                                      |                               |
| The University of Adelaide .. .. .          | 375,000                              | 375,000                       |
| Western Australia—                          |                                      |                               |
| The University of Western Australia .. .. . | 630,000                              | 505,000                       |
| Tasmania—                                   |                                      |                               |
| The University of Tasmania .. .. .          | 840,000                              | 670,000                       |
| <b>Total .. .. .</b>                        | <b>6,270,000</b>                     | <b>5,975,000</b>              |

In addition a grant of 16 per cent. of the cost to the Commonwealth of each project is to be made for equipment.

The Commonwealth is also to make grants for capital buildings for residential colleges affiliated with a university. The Commonwealth will make grants of one half of the cost, at the request of a State, for the purchase, erection or alteration of a building at an affiliated residential college. The maximum amount available for distribution in each State in the period 1958–60 is shown in column 2 of the following table:—

**MAXIMUM COMMONWEALTH GRANTS FOR RESIDENTIAL COLLEGE BUILDINGS.**

(£.)

| State.<br>(1)             | Maximum<br>Grant.<br>(2) |
|---------------------------|--------------------------|
| New South Wales .. .. .   | 180,000                  |
| Victoria .. .. .          | 170,000                  |
| Queensland .. .. .        | 110,000                  |
| South Australia .. .. .   | 80,000                   |
| Western Australia .. .. . | 40,000                   |
| Tasmania .. .. .          | 20,000                   |
| <b>Total .. .. .</b>      | <b>600,000</b>           |

The grants for capital building projects at universities and residential colleges are payable at any time within the period 1958–60.

7. Teaching and Research Staff.—The following table shows particulars of the teaching and research staff of Australian universities during 1957:—

## UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1957.

| Canberra University College ..          | 258             | ..               | 18            | ..                   | 127                     | 396                |
| <b>Total</b> .. .. .                    | <b>27,510</b>   | <b>735</b>       | <b>5,834</b>  | <b>1,135</b>         | <b>2,006</b>            | <b>36,903</b>      |

(a) Adjustment made for students enrolled for more than one course.

Of the students enrolled in 1957, 28,816 were males and 8,087 females. Included in those enrolled for degrees were 83 enrolled for higher degree courses at the Australian National University, 191 in Sydney, 230 in Melbourne, 115 in Queensland, 224 in Adelaide, 148 in Western Australia, 37 in Tasmania, 248 at the New South Wales University of Technology, 51 at the University of New England and 30 at the Canberra University College. In addition, 670 students at the University of Sydney were doing higher degree courses but were not enrolled.

The following table shows the number of students enrolled at Australian universities for each of the years from 1953 to 1957.

## UNIVERSITIES: STUDENTS ENROLLED, SUMMARY, AUSTRALIA.

| Year.        | Degree Courses. |                   | Diploma Courses. |               | Certificate Courses. | Miscellaneous Subjects. | Adjusted Total.(a) |

(a) Adjustment made for students enrolled for more than one course.

9. **University Income for General Activities.**—The income of the universities is derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations. From all sources other than new bequests, the income during 1957 for general university functions was as shown in the table below. In South Australia, Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute.

10. **Principal University Benefactions.**—Earlier issues of the Official Year Book included details of the principal private benefactions to universities. (See Year Book No. 40, pp. 467-8.)

11. **University Expenditure for General Activities.**—The principal item of disbursements on general university activities is the maintenance of the teaching and research staff, representing 66.0 per cent. of the total in 1957 compared with 62.9 per cent. in 1956.

The following table shows the expenditure including capital expenditure during the year 1957:—

**UNIVERSITIES: EXPENDITURE FOR GENERAL ACTIVITIES, 1957.**

(a) Includes degrees conferred on students of the Canberra University College. (b) Since separate degrees for M.B. and B.S. are conferred by the University of Sydney, the number of persons who qualify at that University to practise is approximately half the number of degrees conferred.

### § 9. Further Education.

1. **General.**—Beyond the schools, colleges and universities, there are agencies engaged in less direct educational work which cannot be readily assessed and described. Among them are the media of mass communication (press, film, radio and television) which are powerful educational forces—whether they are used specifically to disseminate information such as new agricultural techniques or preventive health measures, or, on the other hand, in a much more general way to exert a powerful influence on the cultural level of the population. There are also bodies and institutions such as the adult education authorities, libraries, art galleries and museums which aim at catering for the educational and cultural needs of the general public.

2. **Adult Education.**—(i) *General.* The term “adult education” is used in Australia to refer in the main to non-vocational educational and cultural activities for adults provided by some of the universities and by various adult education authorities, which vary in form from State to State.

The Workers' Educational Association movement, which has for its object the bringing of the universities into closer relationship with the community in general, and providing for the higher education of the workers in civic and cultural subjects, has been active in Australia. In 1913, associations were formed in all the Australian States. In four States the associations have been superseded by Adult Education Boards or Councils—set up by the State Governments in Victoria, Queensland and Tasmania and by the university in Western Australia. In the other two States, New South Wales and South Australia, the associations continue to co-operate with the universities in their extension work and are given direct grants by the governments concerned.

While the choice of courses offered by these bodies is naturally more limited in the smaller States, a variety of topics including social studies and current affairs, language and literature, drama, music, arts and crafts are available in all States.

(ii) *New South Wales:* (a) *Adult Education Advisory Board.*—State Government grants for adult education are allocated by the Adult Education Advisory Board. Grants are made to the University of Sydney (Department of Tutorial Classes), the Workers' Educational Association, the University of New England (Department of Adult Education), the Public Library of N.S.W. (Adult Education Section) and the Arts Council of Australia (N.S.W. Division).

(b) *University of Sydney.*—The Extension Board of the University of Sydney provides lectures and short courses in city and country.

In 1914, the Department of Tutorial Classes was established to provide classes and study groups along the lines of similar work in England. Its activities include the provision of tutorial classes in a wide variety of subjects, discussion groups and “kits” to serve the needs of country districts and people who cannot be catered for by tutorial classes, and publication of the fortnightly *Current Affairs Bulletin*. This publication, begun in 1942 and produced for four years by the Australian Army Education Service, was recommenced in 1947 as a civilian and service publication by the Commonwealth Office of Education. At the beginning of 1952, the Department of Tutorial Classes took over full responsibility for the bulletin. It receives an annual grant from the Commonwealth Government for this purpose.

In 1957, there were 131 tutorial classes (78 in the metropolitan area and 53 in the country) with a total enrolment of 3,714, 145 discussion groups (68 in the metropolitan area, 77 in the country) with a total enrolment of 2,241, and 42 kits groups with an estimated membership of 660, who studied a total of 45 kits.

The Department works in conjunction with the Workers' Educational Association through the Joint Committee of Tutorial Classes, appointed by the university senate.

(c) *Workers' Educational Association.*—In addition to co-operating with the Department of Tutorial Classes in organizing certain classes and groups, the Association itself provides classes in a wide variety of fields. It publishes *Highway*, a bi-monthly journal of adult education and maintains a property near Sydney where short residential schools are held throughout the year.

In 1957, the Association ran 47 classes, for which there were 3,309 enrolments.

(d) *University of New England.*—When the New England University College became an autonomous university in 1954, its Department of Adult Education took over full responsibility for the activities formerly undertaken by it on behalf of the Department of Tutorial Classes of the University of Sydney. It brings university extension activities to the people of northern New South Wales and conducts classes in arts and social sciences in towns throughout this region. Short residential courses are held on topics of interest to primary producers in the area.

(e) *Public Library of New South Wales.*—The Public Library's Adult Education Section provides an adult education library service for all classes and groups conducted by the Department of Tutorial Classes of the University of Sydney, the Workers' Educational Association, and the Department of Adult Education of the University of New England.

(f) *Arts Council*.—The New South Wales Division of the Arts Council of Australia provides a mobile theatre unit and organizes touring companies in ballet, opera and drama to country towns. Musicians provide some short lecture courses in the city.

(g) *Education Department*.—The New South Wales Education Department provides evening colleges, housed in its schools and staffed by trained teachers, which provide non-vocational courses in a wide variety of crafts, dramatic and musical activities. Adults may prepare for the Intermediate and Matriculation examinations at certain of these colleges.

(iii) *Victoria*.—The Council of Adult Education is a government instrumentality established by the Adult Education Act 1946. Its aims are to stimulate adult education in Victoria and to encourage voluntary organizations and associations by giving them advice and assistance. Its activities include a variety of classes (88 were available in 1957) on topics ranging from social studies, psychology, language and literature, to crafts, music, drama, travel and deportment, and usually lasting from 10 to 20 weeks. An annual 10-day summer school is another important activity. The Council publishes a monthly bulletin, *C.A.E. Newsletter* and a quarterly journal, *Adult Education*. Its group service assists and provides programme material for the discussion groups formed by organizations and individuals throughout the State. In 1956-57, there were 4,698 enrolments for classes and 2,514 individual enrolments for 215 discussion groups.

A recent development of importance is the extension of the council's activities, including classes and discussion groups, to the prisons, as part of a general plan for penal reform in Victoria.

Through its Community Arts Service, the Council organizes tours by musicians and by theatrical and other companies in country towns which otherwise would have no opportunity of seeing such performances: It provides an advisory service to musical societies and co-operates with the National Gallery of Victoria in the organization of travelling art exhibitions.

The council's income is derived mainly from a government grant, but also from student fees and Community Arts Service performances.

(iv) *Queensland*.—The Queensland Board of Adult Education was constituted in 1944 and is responsible under the Minister for Education for the provision of adult education facilities throughout the State. Under the executive officer of the Board, the Supervisor, are five district officers, based in large country towns, who are responsible for organizing activities in country areas.

The cost of the programme is borne by the State Government and admission to all courses is free. Activities include lectures, group meetings on a variety of topics, generally short-term but some of which extend over a full year, and film screenings. Library and film services are provided for adult education groups.

In 1957, enrolments in lectures totalled 1,808. Some form of adult education activity was available in almost 200 centres.

(v) *South Australia*.—Since 1917, the University of Adelaide, through the Joint Committee for Tutorial Classes, has provided each year in the metropolitan area a series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest. Fees are paid direct to the Workers' Educational Association, which organizes these classes. The Joint Committee extends its activities into the larger country centres by sending art exhibitions and plays on tour, lending boxes of books and arranging lectures and film screenings.

The Education Department also caters for adults in country towns by providing evening classes, particularly in arts and crafts, at adult education centres.

Adult education in South Australia is expanding. In 1956, the university appointed a director of adult education, who took up duty in 1957.

(vi) *Western Australia*.—Adult education in Western Australia is organized by the Adult Education Board, established in 1928 under the terms of the statutes of the University of Western Australia. The board has a considerable degree of autonomy. Its executive officer is the Director of Adult Education.

The board conducts lecture classes in the city and in a few suburban centres. Thirty-seven classes were held in 1957, with a total enrolment of 1,460. It sponsors musical and dramatic performances by outstanding artists both in the city and country, and arranges for screenings of foreign films. Its library provides a box scheme for discussion groups, of which there were some 68 scattered throughout the State in 1957.

The board holds an annual summer school in January, coinciding with the Festival of Perth, for the inauguration of which it was largely responsible.

The board's finance is derived from university grants, while many of its activities are self-supporting. The State Government makes grants for the board's work in country areas.

(vii) *Tasmania*. Some form of adult education has existed since the formation in 1913 of a Workers' Educational Association, which worked in conjunction with the University of Tasmania for a number of years, receiving a grant through the university, which had

a Director of Tutorial Classes. Later the grant was paid direct to the Association by the Government and the university's tutorial department ceased to exist. In 1948, the Adult Education Act was passed providing for the formation of an Adult Education Board whose functions are to plan and develop adult education in Tasmania and to assist other bodies actively engaged in adult education.

The executive officer of the board is the Director of Adult Education, at Hobart. Activities are organized on a regional basis by organizers based in Hobart, Launceston and three large country centres.

The board organizes classes of ten weeks' duration on a wide range of subjects. In 1956-57, 742 classes with an enrolment of more than 7,000 were held throughout the State. It sponsors special lectures, film screenings and art exhibitions, recitals of music and dramatic performances, in both city and country areas. Its income is derived from a State Government grant and from student fees.

3. **The New Education Fellowship.**—The New Education Fellowship is a world organization of parents, educators, and other citizens interested in the development of new educational practices. It was founded in London in 1915 and spread to Australia at the time of a regional conference held here in 1937. There are now sections in each State. Its Australia-wide journal *New Horizons in Education* is published quarterly.

4. **Migrant Education.**—The Commonwealth Government's post-war immigration policy has brought to Australia some thousands of immigrants with little or no knowledge of English. To assist their assimilation into the Australian community, a system of migrant education has been developed to teach them English and to give them information about Australia.

Before arriving in Australia, migrants who do not speak English are taught English by shipboard education officers.

In Australia, free evening classes are arranged by State Education Departments wherever a group of nine or more migrants in country areas, or twelve or more migrants in city areas, wish to learn English. Should migrants find it impossible to attend classes, they may apply, through State Education Departments, for a free correspondence course in English. In addition, English lessons are broadcast regularly by the Australian Broadcasting Commission. The Commonwealth Office of Education provides technical advice on all aspects of migrant education and is responsible for the preparation of teaching materials.

In July, 1958, 16,183 migrants were enrolled in evening classes and 11,227 were taking correspondence lessons. At the same time, 16,730 migrants were receiving the monthly booklet accompanying the radio lessons.

### § 10. The Commonwealth Literary Fund.

In 1908, the Commonwealth Government under Alfred Deakin first established the Commonwealth Literary Fund. The Fund was entirely a compassionate one devoted to literary pensions for aged or infirm authors, for the families of literary men who died in poverty and for writers who were unable for financial reasons to continue their activities.

In 1938, in an endeavour to encourage the development of Australian literature and to foster appreciation for it, the Commonwealth Government greatly enlarged the scope of the Fund. The Fund now awards a limited number of Fellowships each year, assists in the publication of manuscripts of high literary merit, makes grants for lectures in Australian literature and awards pensions to writers who have achieved a nation-wide reputation for their work in the field of creative literature.

The Fellowships are awarded each year to writers who have proved their capacity to do creative work in the field of literature but who are prevented from exercising their abilities because of financial circumstances. The Fellowship gives a writer the opportunity to devote all his time to creative writing for a period of up to one year. Since 1956, the Fellowships have had a maximum value of £1,000 per annum.

Australian writers are assisted into print where their work is of outstanding literary merit but would not be an attractive commercial proposition. The Fund does this by guaranteeing publishers against loss up to a limited amount. The Fund does not itself enter the field of the publisher.

Since 1940, annual grants have been made to each State University, including the University of New England and the Canberra and Newcastle University Colleges, for lectures in Australian literature. In 1956, the Fund decided to extend the scheme to cover lectures to the general public in the capital cities and in provincial and country centres. The first series of lectures to the general public was conducted in Tasmania with the co-operation of the Tasmanian Board of Adult Education. In 1957 and 1958, lectures were given in Queensland and Western Australia with the co-operation of the Queensland Board of Adult Education and the Board of Adult Education in Western Australia, respectively. In 1959, lectures will be given in South Australia with the co-operation of the Adult Education authorities.

The Fund also assists literary magazines of established literary merit.

The Fund is administered by a Committee consisting of the Prime Minister (Chairman), the Leader of the Country Party and the Leader of the Opposition in the House of Representatives.

The Committee is assisted by an Advisory Board of five persons with literary qualifications.

## § 11. Libraries.

1. **General.**—The Munn-Pitt Report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries in all States, all of which have now passed legislation to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, its functions now including the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the Commonwealth National Library, Canberra, and the Public Libraries at Sydney and Melbourne.

2. **Commonwealth.**—(i) *Commonwealth National Library.* This library grew directly from the Library of the Commonwealth Parliament established in 1901. Whilst providing, as a primary responsibility, for the general reading and reference needs of the Members of Parliament, it has developed into a central source of information for the government and its departments and other agencies. The close association of the National Library with the central government follows the pattern of the Library of Congress at Washington, U.S.A. Like the latter, it has also inherited the basic elements of the national library concept of the older countries of Europe: that a national library is the proper place to collect the national literature systematically and to make it known and available for use, and that it is a place to which scholars may turn for what is most significant in the literature of other countries.

Through its Legislative Reference Branch, the National Library aims to provide for the Parliament and the government an up-to-date reservoir of fact and opinion on public issues both domestic and foreign. In addition to assembling material, the staff compiles bibliographies and reference guides to the literature on special subjects and in 1958 handled 1,100 inquiries involving special search. A further service to the government flows from the activities of the Archives Division, a central element in the government machinery for the management and preservation of its records. Archival repositories for Commonwealth records are maintained in Canberra, Sydney, Melbourne, Brisbane, Adelaide and Perth.

As well as the governmental record of national life and development, the National Library systematically collects and preserves Australian books, periodicals, newspapers, government publications, pictures, prints, manuscripts, maps, moving-picture films and sound recordings. It is assisted by the Copyright Act 1912–1950, which requires one copy of all material printed in Australia to be deposited in the Library, and has been enriched by the acquisition of such notable collections as the Petherick collection of 16,500 items in 1911, the Cook manuscripts in 1923, the Cumpston collection on Public Health in Australia in 1936, the Mathews ornithological collection in 1940, and the Ferguson sociological collection now being transferred to the Library. A special feature of the Library's Australian work is the copying on microfilm, in association with the Public Library of New South Wales, of all important unique material overseas relating to Australia, including more than a million pages in the Public Record Office in London.

The Library fulfils its obligations to make Australian publications widely known, both at home and abroad, through a series of select lists which include *Australian Public Affairs Information Service* (monthly with an annual cumulation) and *Australian Books* (annual) and full bibliographies in the monthly *Australian Government Publications* and *Books Published in Australia*, cumulated as the *Annual Catalogue of Australian Publications*. Collections of Australian books are maintained by the library at all posts at which Australia is officially represented abroad. In London and New York the National Library maintains and staffs Australian Reference Libraries.

The Library is the central library of documentary and educational films and the non-theatrical film-distributing agency in Australia for the Australian National Film Board, and its film collection contains nearly 4,300 titles, together with Australian historical films and a great number of film strips. Special efforts are being made to discover and preserve samples of early Australian film-making.

Local library services are provided by the Library for the residents of the Australian Capital Territory, the Northern Territory, the Territory of Papua and New Guinea, Norfolk Island and Nauru.

The National Library's collections contain approximately 520,000 volumes, together with very extensive holdings of pamphlets, pictures, prints, maps, manuscripts and microfilm,

and about 5½ million feet of moving-picture films. Its permanent and temporary holdings of archives were, in 1958, approximately 122,000 cubic feet. Special features of the Library's book collections are its strong holdings of Australiana, materials relating to the Pacific area and to East and South-east Asia, the publications of foreign governments and of international organizations, works in the social sciences and in particular in political theory and economics.

(ii) *Patent Office Library.* The Library of the Commonwealth Patent Office, Canberra, contains approximately 8,500 books and a wide variety of periodicals and other literature relating to pure and applied science, industrial technology and the industrial property (patent, trade mark, design and copyright) laws and practice of most countries. Patent specifications of inventions are received from the principal countries of the world; present holdings are more than 6,000,000.

(iii) *The Australian War Memorial Library.* In the War Memorial library, are housed the documentary and pictorial records of Australia's fighting services, together with collections covering the war in Korea, 1950–53, and earlier wars in which Australian troops participated—Sudan, 1885, South Africa, 1899–1902 and the Boxer Rebellion in China, 1900–01. Books, periodicals and other records covering contemporary trends and events in the fields of military history and military science are constantly being added.

The printed records section contains approximately 65,000 volumes, a large collection of military maps, newscuttings and newspapers, sound recordings of war leaders, personalities and events, war posters and postage stamps. Many personal collections by distinguished soldiers and historical documents relating to the wars have also been placed in the Memorial's custody for preservation.

Written records comprise correspondence files of headquarters and units of both world wars, and the original war diaries compiled from day to day by each unit during its service.

The collection of official war photographs covering the 1914–18, 1939–45 and Korean Wars numbers over 250,000, and a collection of official motion picture film depicts Australia at war.

Facilities for public research are not yet fully developed, but all requests for information are met where practicable.

(iv) *Other Departmental Libraries.* The following Commonwealth authorities in Canberra have specialized collections in their own fields, and in addition draw largely on the National Library:—Attorney-General's Department, Commonwealth Bureau of Census and Statistics, Commonwealth Forestry and Timber Bureau, Department of Trade, Department of Primary Industry, Department of External Affairs, Department of Territories, Department of Health, Department of National Development, Commonwealth Public Service Board, Department of Customs and Excise, Department of Works, and News and Information Bureau of the Department of the Interior.

The Department of Labour and National Service has its main library in Melbourne and branch libraries in Sydney and Adelaide. Other departmental libraries in Melbourne are those of the Department of Air, Department of Defence, Department of Social Services, Repatriation Commission and Postmaster-General's Department. The library of the Commonwealth Office of Education is in Sydney.

(v) *Commonwealth Scientific and Industrial Research Organization.* The head office in East Melbourne maintains a library covering all branches of science except the medical sciences. In addition, each division and section of the organization has its own library; together, these form a series of specialist libraries covering such subjects as food preservation, forest products, industrial chemistry and physics, fisheries, agriculture, animal husbandry, and building research. There are 39 such branches, each with its own staff, and also smaller collections under the care of research officers aided by visiting librarians. The head office library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and small union catalogues are being developed among groups of branch libraries with similar interests. The collections are particularly strong in the publications of oversea scientific and technical research institutions, with many of which exchange relations exist. The general public may have access to these materials for reference purposes. The head office library and most of the larger branches have photocopying facilities. This service is normally for the use of officers of the organization itself, but where the organization holds a publication not available elsewhere in Australia photocopies will be made on request.

3. *States.*—(i) *Metropolitan Public Libraries.* In each of the capital cities, there is a well-equipped public library, the libraries in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the public library of each capital city at 30th June, 1957.

## METROPOLITAN PUBLIC LIBRARIES, 30th JUNE, 1957.

| City.               | Number of Volumes in— |                          |                         | Total.  |
|---------------------|-----------------------|--------------------------|-------------------------|---------|
|                     | Reference Branch.     | Ordinary Lending Branch. | Country Lending Branch. |         |
| Canberra(a) .. .. . | 520,000               | ..                       | (b)                     | 520,000 |
| Sydney .. .. .      | (c) 527,588           | (d)                      | (e) 161,743             | 689,331 |
| Melbourne .. .. .   | 643,929               | 106,665                  | 44,443                  | 795,037 |
| Brisbane .. .. .    | 171,987               | ..                       | ..                      | 171,987 |
| Adelaide .. .. .    | 181,247               | (f) 51,520               | 57,516                  | 290,283 |
| Perth .. .. .       | 278,000               | ..                       | ..                      | 278,000 |
| Hobart .. .. .      | 53,570                | (g) 142,221              | 92,381                  | 288,172 |
| Darwin .. .. .      | 550                   | ..                       | (h) 21,550              | 22,100  |

(a) Commonwealth National Library, including Parliamentary Section. (b) Books are lent to libraries or students throughout Australia whenever necessary for research work. (c) Includes 162,102 volumes in the Mitchell Library and 12,000 volumes in the Dixon Library. (d) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred to the Municipal Council in 1908. In 1958, books in this library numbered 175,459. (e) Includes 2,069 volumes in the Model School Library. (f) Includes 14,916 volumes in the Children's Branch. (g) Includes 111,910 volumes in the Children's Branch. (h) Ordinary and Country Lending Branch and 1800 volumes in the Children's Branch.

(ii) *New South Wales.* The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. Of the 157 councils which have adopted the Library Act, 137 have put their adoption into effect. During 1957-58, they spent on their libraries £818,849, including £177,928 received in subsidy. There are 152 libraries of which 39 are in the metropolitan area and 113 in the country. There are also 12 bookmobiles, of which two are in Sydney, five in the suburbs of Sydney and five in country municipalities and shires. These libraries contain 1,653,948 volumes.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central cataloguing service for certain municipal and shire libraries constituted under the 1939 Act. The State Library manages the libraries of the University Tutorial Classes and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to municipal and shire libraries and to individual students. During 1957-58, 97,392 books were lent to small State schools, and 19,039 to country libraries, while 45,937 reference works were lent to individual country students and to libraries to satisfy special requests.

The State Library includes a general reference department of 353,486 volumes together with the Shakespeare Tercentenary Memorial Library, and the Mitchell and Dixon Libraries and Galleries which are mainly devoted to Australian and Pacific material. The Mitchell Library, of more than 60,000 volumes and pamphlets and 300 paintings, was bequeathed to the trustees of the Public Library in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. There are now 162,000 volumes in the library, in addition to valuable manuscripts, maps and other material. In 1929, Sir William Dixon gave a collection of historical pictures then valued at £25,000. These were subsequently added to and, at his death in 1952, Sir William bequeathed the whole of his collection of books, manuscripts, pictures and other material together with an endowment of more than £113,000, mainly for the printing or reprinting of historical documents relating to Australia and the Pacific.

The State Library also takes care of the State archives.

Other important libraries in New South Wales are the Australian Museum, 32,000 volumes; Teachers' Colleges, 162,232; Technical Education Branch, 36,800; Railways Institute, 152,247; Government Transport Institute, 45,268; Cooper Library of the New South Wales Public School Teachers' Federation, 22,500; and the Library at the National Herbarium, 10,000 volumes. At 30th June, 1958, the Parliamentary Library contained 126,828 volumes.

(iii) *Victoria.* Until the establishment of the Free Library Service Board in 1947, the only public library facilities available in Victoria (apart from those of the State Public Library and one or two Metropolitan Municipal Libraries) were those offered by about 200 Mechanics' Institute Libraries situated in country areas all over the State. The Board's policy has been to replace these services with modern public libraries controlled by local Municipal Councils and subsidized by the Board. Since the Board's inception, 80 municipalities, comprising 1,567,340 of the State's population, have established libraries.

Of these, 20 are in the city, serving 1,051,863 people, and 60 in the country, serving 515,477 people. The amount of £221,851 was paid to the Councils in library subsidy for the year 1957-58 and a total of £432,000 was expended in Municipal Library Service for the same year. There are 851,878 books available to the communities in which libraries are established and combined circulation figures were 5,649,948 as at 30th September, 1957.

A feature of the services provided in the country is the number of co-operative or regional library groups now being developed. These services, of which there are fourteen, comprising a total of 43 Councils, consist of groups of Councils which pool their financial resources, book-stocks and trained staff, in order to provide more comprehensive, efficient library facilities.

Approximately 140 Mechanics' Institute Libraries are still in existence in country areas. In 1957, 62 of them shared a grant of £2,000.

(iv) *Queensland.* The Library Board of Queensland was established in 1945 under the provisions of the Libraries Act of 1943. Its duty is to attain the fullest co-operation and improvement of the library facilities of the State, with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally. The Board consists of six members with the State Librarian as ex officio member and secretary.

One of the Board's functions is the control and management of the Public Library of Queensland. Its policy is to build up the main collection of the Library, being as it is the State's reference centre.

The Country Extension Service, which is accommodated at the Public Library of Queensland, lends books of non-fiction free to adults and children residing outside the metropolitan area and to municipal libraries in areas of low population.

The Oxley Memorial Library was established in 1923, and since 1946 has been administered as a department of the Public Library of Queensland and the collection has been kept segregated. Its object is to collect books, manuscripts, pamphlets and other graphic material relating to the history and literature of Australia and of Queensland in particular, and to provide facilities for research students in Queensland literature and history.

The holdings of the Public Library of Queensland and its extension services in 1957-58 were:—Main Reference Collection, 112,888 volumes and 5,227 maps and pamphlets; Country Extension Service, 51,778 volumes; Oxley Memorial Library, 19,033 volumes and 7,875 maps, pamphlets and miscellaneous items. Regarding library development throughout the State, the policy of the Library Board of Queensland is to encourage local authorities to conduct library services as a function of local government. In 1957-58, 45 local authorities were conducting 59 library services and 27 others indicated that they would do so in the near future. There were 34 libraries in Queensland free to adults and 46 free to children.

To help overcome the problems of large area and sparse population, various local authorities provide library services on a regional basis. By 30th June, 1958, three regional library services had been established:—the South Western (1 town and 6 shires), the Central Western (6 shires), and the North Western (6 shires) with head-quarters at Charleville, Barcardine and Mt. Isa respectively. Other regional services are being planned.

The Brisbane City Council has established eleven libraries of which nine have separate children's collections.

The library of the Parliament of Queensland was established in 1860. At 30th June, 1958, the library held 85,031 books and pamphlets, consisting of official publications and books devoted largely to history, the social sciences, biography and literature. The Libraries Act Amendment Act, 1949, provides for the Public Library and the Parliamentary Library each to receive a copy of all books, pamphlets, maps and other printed material published in Queensland.

(v) *South Australia.* In the reference department of the Public Library of South Australia, there are about 184,200 volumes, most of which may be borrowed. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia. There are 38,300 volumes in the lending department available to persons living in the metropolitan area, and the Country Lending Service has 63,160 volumes, of which more than half are suitable for children.

The Research Service specializes in scientific and technical inquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues.

The library of the Parliament of South Australia held approximately 65,000 volumes at 31st December, 1957.

The Institutes' Association in 1957 comprised 223 suburban and country libraries with 746,840 volumes.

(vi) *Western Australia.* In 1955, the Library Board of Western Australia was made responsible for all public library services throughout the State to which the State Government contributes funds.

The Board has the following major functions :—

- (a) To encourage local authorities throughout the State to establish public libraries and to provide as a State subsidy all books and bibliographical services necessary for such libraries when established ;
- (b) To administer for a limited period a former scheme of monetary grants of up to £50 per annum to local authorities which maintain public libraries ;
- (c) To administer the State Library ;
- (d) To advise the Government on all matters relating to libraries ;
- (e) To provide for the training of librarians.

Local public libraries are subsidized on a £1 for £1 basis, the local authority providing accommodation and staffing and the Board all books and related services. The Board provides at least one volume per head of the population. All books throughout the State are available at any library on request to the Board. All cataloguing is done by the Board. The first library under this scheme was opened in August, 1954. By 30th June, 1958, 30 libraries had been established.

Prior to the establishment of the Library Board, the government appointed a Country Free Lending Libraries Committee in 1944 to make small grants to local authorities for library purposes. That committee has now been merged with the Board. Its activities will cease in about 1962, and will be replaced by the full service of the Board.

The State Library, established in 1887, is the reference division of the Library Service of Western Australia. In addition to providing the normal facilities of a reference library for the metropolitan area, it extends its service throughout the State through local public libraries. It is divided into four subject departments as follows:

- J. S. Battye Library of West Australian History.
- Library of Business, Science and Technology.
- Library of Social Sciences, Philosophy and Religion.
- Library of Literature and the Arts.

The State Bibliographical Centre is housed at the State Library and there is also a Commercial Information Centre. The State archives are maintained by the State Library and managed by the staff of the Battye Library. The library is fully equipped with micro-film and photocopy apparatus.

The bookstock of the Board at 30th June, 1958, was approximately:

- Lending library services (including books in public libraries) : 80,000 volumes.
- State Library : 200,000 bound volumes.

The University of Western Australia, through its Adult Education Board, manages the Adult Education Library of some 12,000 volumes of general reading and fiction. Books are sent to country readers by post.

There are some 80 special libraries in government departments and industrial firms. A union catalogue of periodicals received in the libraries of all types in the metropolitan area has been published by the Library Board of Western Australia.

(vii) *Tasmania.* The Tasmanian Library Board, constituted in 1944, is responsible for administering the State library headquarters in Hobart, for the extension of library services throughout the State and for the control of State aid for libraries. State aid to municipalities is provided in the form of books of a value equal to the amount of library rates collected. The total cost of library services to the State during 1956–57 amounted to £95,162.

The Tasmanian Library Board provides lending and reference services for the people of Hobart and operates a reference service for people throughout the State. In addition, it conducts screenings of documentary films, recitals of recorded music, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session. It catalogues all new books added to the library and supplies recreational reading.

4. *University Libraries.*—The libraries of the Australian universities provide material not only for the education of graduates and undergraduates, but also for scholars, research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the library of the University of Sydney is the fourth library in Australia, and the libraries of the Universities of Melbourne and Adelaide are respectively eighth and ninth. The following

table shows the sizes and rates of growth and expenditure of the Australian university libraries; borrowing statistics are not shown, as they differ too widely to be comparable without considerable explanation.

## UNIVERSITY LIBRARIES, 1957.

| University or College.                   | Volumes.         | Accessions during year. | Expenditure.   |
|--|------------------|-------------------------|----------------|
|  |                  |                         | £              |
| Australian National University .. .. .   | 129,787          | 8,313                   | 47,763         |
| Sydney .. .. .                           | 403,265          | 16,568                  | 68,065         |
| Melbourne .. .. .                        | 233,889          | 9,715                   | 81,568         |
| Queensland .. .. .                       | 160,971          | 13,306                  | 50,423         |
| Adelaide .. .. .                         | 221,893          | 9,557                   | 53,399         |
| Western Australia .. .. .                | 146,827          | 9,462                   | 39,657         |
| Tasmania .. .. .                         | 95,000           | 5,000                   | 29,984         |
| New South Wales University of Technology | 82,445           | 12,039                  | 70,014         |
| New England .. .. .                      | 50,967           | 11,813                  | 28,134         |
| Canberra University College .. .. .      | 41,000           | 8,000                   | 18,849         |
| <b>Total .. .. .</b>                     | <b>1,566,044</b> | <b>103,773</b>          | <b>487,856</b> |

The library of the Australian National University was founded in 1948. At the end of 1958, stock comprised about 140,000 volumes, including a collection in oriental languages. The library is designed to serve the staff and students of a post-graduate institution but its resources are freely available to all serious readers. It specializes in the fields of the physical and medical sciences, excluding clinical works. In the social sciences, it aims to provide a good working collection while giving consideration to the holdings of the Commonwealth National Library. It possesses significant collections in anthropology, linguistics, mathematics and mathematical statistics.

The first books were bought for the library of the University of Sydney as early as 1851. Only since 1910, however, has it possessed a building of its own; previously it had been housed in the main building. It is named after the principal benefactor, Thomas Fisher, who, in 1885, bequeathed to it the sum of £30,000. It contains an up-to-date bookstack of glass and steel and a fine reading room in which, since the beginning of 1941, about 18,000 volumes of the collection have been made available on open access shelves. In addition, members of the teaching staff and certain classes of undergraduates are admitted to the bookstacks and all readers are encouraged to borrow freely. The library possesses a large number of periodicals, especially scientific, valuable collections of seventeenth-century pamphlets and Elizabethan translations from the classics, and an extensive collection of Australian literature. Besides medical and law branches, there are a number of departmental libraries. The total holding at the 30th June, 1958, was 411,345 volumes, including more than 15,000 books in Chinese acquired during the previous two years.

Early in 1854, the University of Melbourne made its first allocation for books, but the library was housed in temporary quarters for some time. In recent years, the university authorities have treated the library generously, and there have been some welcome benefactions, but in the past, accommodation for the library has never been adequate. The W. L. Baillieu Trust made available the first instalments of a £100,000 gift for building purposes, which have been followed by subsequent gifts and substantial grants from the State government, with the result that the new building, costing £750,000 and occupied at the beginning of 1959, is the first to be designed for library purposes and provides space for 100 readers and 300,000 books. Most of the books are accessible on open shelves, and though the library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The resources of the library are also extensively used on inter-library loan by industries and other organizations throughout Australia. The library is administered from the centrally situated general library. There is a large medical branch library specially rich in periodicals, and smaller branch libraries in various other departments. At the end of 1957, it contained 233,889 volumes.

The library of the University of Queensland was founded in 1911. The main library is now in its own building in the new University at St. Lucia, and there are a considerable

number of departmental libraries. All books are in open access and most are available for borrowing. At 1st July, 1958, the library contained more than 168,000 volumes. The main library includes a special collection of material relating to the history, development and culture of the countries surrounding the Pacific Ocean.

The Adelaide University library bears the title of its original benefactor, Robert Barr Smith, who, with members of his family in and after 1892, gave the university about £50,000 for the library. Some 25,000 volumes are shelved in the reading room and are available to the ordinary student. Up-to-date steel bookstacks hold about 150,000 volumes. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are departmental libraries for medicine, law and music. The British Medical Association (South Australian Branch) makes an annual contribution towards the maintenance of the medical library. In return, all its members enjoy borrowing privileges.

In the University of Western Australia, the first permanent library staff was not appointed until 1927. Provision for a permanent library was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. The whole collection, consisting of about 150,000 volumes, is accessible on open shelves. There are a Law Library, a Medical Library, a number of departmental libraries, and a bindery. The library possesses a good range of periodicals, especially legal and scientific and is building up a useful collection of Australian literature.

Although the library of the University of Tasmania was founded in 1893, a full-time librarian was appointed for the first time at the end of 1945. From 1945 to 1956, the book stock almost doubled and now stands at approximately 100,000 volumes. The library received about 2,000 periodicals in 1957. Since 1954, a Hobart Union List of Serials has been housed in and kept up to date by the university library, thus providing a major reference tool for all bibliographic inquiries in the State.

The New England University library was founded in 1938, and bears the name of its benefactor, Sir William Dixon. At the end of 1957, it contained 51,648 volumes, mainly on open shelves. In 1957, the library moved to its new temporary quarters which can hold approximately 65,000 volumes in open access and seat 100 readers. Two basement areas are being developed to accommodate a bindery and a stack room for local records and additional books and periodicals. Microfilm and microcard readers are available.

The University of New South Wales made its first allocation for books and periodicals in 1950, the publications being incorporated in the Library of the Sydney Technical College. In 1951, publications relating to professional diploma courses were transferred to the university but remained in the libraries of the Technical College where these courses were being conducted. Of the 82,450 volumes in the university's library at December 1957, 18,930 were in the university's library at Kensington, 25,140 in the library of the Newcastle University College, and the rest in the Technical College libraries. The university library is administered through a central unit at the Sydney Technical College Library which maintains a central catalogue of the holdings of all libraries other than that of the Newcastle University College. The university library is strong in current scientific and technical periodicals. Borrowing facilities are available to all students.

The Canberra University College library was established in 1938. In 1958, it contained 45,000 volumes, which are on open shelves.

5. Children's Libraries and School Libraries.—(i) *New South Wales*. Children's libraries are being developed as departments of municipal and shire libraries. The Education Department maintains a school library service for the fostering of State school libraries, which are maintained partly by parents' and citizens' associations and partly by departmental subsidy. Secondary and central schools have trained teacher librarians.

(ii) *Victoria*. Under the auspices of the Free Library Service Board, 80 municipal children's libraries have been, or are in the process of being, established as part of the library services provided by the councils concerned. All these libraries provide comprehensive modern children's book collections which are constantly being refreshed. An annual grant of £5,000, which is additional to the ordinary annual municipal library grant, is provided to assist these libraries. In addition, seven independently controlled children's libraries shared in this grant in 1958.

The Education Department is making provision for the building of a library room in new schools. Where accommodation is available in existing schools, library furniture is provided free of cost to the schools and the government subsidises the purchase of books. In December, 1957, 270 schools had central libraries.

A scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. Four hundred and forty-five schools benefited from this scheme in 1957.

The Department has a Library Service Officer with a small staff to advise and assist schools in the establishment and organization of libraries. A one-year course for the training of teacher-librarians was established at Melbourne Teachers' College in 1955. Approximately 20 teachers are trained each year.

(iii) *Queensland.* The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Education on a £1 for £1 basis. Teachers are given short courses in school library organization at the public library in Brisbane.

(iv) *South Australia.* A Children's Library of 14,620 volumes is used by school classes and individual children living in the metropolitan area. Except for works of reference, all books are available for loan. In August, 1957, a Youth Lending Service was opened for adolescents from 13 to 18 years of age. It has a stock of 4,160 volumes.

(v) *Western Australia.* The State Education Department makes library subsidies and grants to government schools.

All high schools are provided with a library room and furniture, and trained teacher-librarians are appointed to them. Building plans do not provide for primary school libraries, but a number of the schools have set up central libraries when rooms have become available.

One-teacher and two-teacher schools are served by the Charles Hadley travelling library and the Small Schools Fixed Library services. Under the Fixed Library Scheme, permanent libraries of reference books and encyclopaedias were placed in each such school. Books to the value of £15 were added to each of these libraries annually from 1948 to 1954. Since then the grant for these books is made at three year intervals. The Hadley library provides recreational reading and operates 350 boxes which are exchanged every three months. The government grants £500 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Savings Bank for the teachers' services—about £170.

Children in isolated areas who are unable to attend school are catered for by books sent out by the State Correspondence School's Library. The children are kept in touch with the library by means of radio talks and leaflets issued periodically.

(vi) *Tasmania.* The Lady Clark Memorial Children's Libraries, at the State Library, Hobart, aim to serve all children in Tasmania with books. At 30th June, 1957, 197 children's libraries and depots had been established.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them. A Schools' Library Service gives a book service to schools and assists schools wishing to set up their own libraries. In 1957, the number of schools receiving service was 112 and the number of books issued was 10,170.

6. *Special Libraries.*—Before the 1939–45 War, the number of special libraries, apart from those maintained by government departments, was small, but during recent years many manufacturing, commercial, research and other firms, as well as statutory bodies, have found it necessary to establish special libraries to serve their specialist or other staff. These libraries, which are most numerous in Sydney and Melbourne, are being increasingly staffed by trained librarians.

7. *Microfilms.*—The following libraries supply microfilm or photostat copies of material usually at a small charge (the letter "P" signifies photostat supplied and "M" microfilm supplied):—*Australian Capital Territory*—Australian War Memorial (P), Commonwealth National Library (PM), C.S.I.R.O. (M); *New South Wales*—Metropolitan Water, Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM); *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM), C.S.I.R.O. (M); *Queensland*—Public Library (P); *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P); *Western Australia*—State Library (PM); *Tasmania*—University of Tasmania (PM).

## § 11. Public Museums.

The Australian Museum in Sydney, founded in 1836, is the oldest museum in Australia. In addition to possessing fine collections of Australian fauna, the museum contains valuable anthropological and mineral collections. The number of visitors to the institution during 1956–57 was 295,600 and the average attendance on week-days 720, and on Sundays, 1,330.

The expenditure for 1956-57 amounted to £70,150. A valuable library containing 32,000 volumes is attached to the museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, and afternoon lectures for school children are provided; 10,300 children attended during 1956-57. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University of Sydney, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public. There is a Museum of Applied Arts and Sciences in Sydney with branches in three country centres. Expenditure during the year 1956-57 was £52,369. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally.

The National Museum at Melbourne, devoted to natural history, geology and ethnology is in the eastern section of the Public Library Building. The Museum of Applied Science, also housed under the same roof, contained at 30th June, 1957, 24,250 exhibits which covered applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the School of Mines in the chief mining districts.

The Queensland Museum, founded in 1855, comprises exhibited and reference collections of zoology, geology and ethnology. It is maintained entirely by the State Government. Expenditure for the year 1956-57 was £30,000. The collections are principally Australian but there is an excellent series of ethnological material formed by Sir William McGregor in New Guinea.

The South Australian Museum has considerable collections of most branches of natural history. In 1957-58, there were at least 200,000 visitors and expenditure was £46,803.

The Western Australian Museum was established in 1895. It is under the statutory management of a Board of Trustees, appointed by the State Government, but operates under its own director and staff. Although it is primarily a museum of natural history, with principal research interests in the fauna of Western Australia and the ethnology of the Western Australian aborigine, the museum has also historical and technological exhibits.

The Education Department of Western Australia has two teachers attached to the Museum. One of these gives instruction to visiting classes from schools in the metropolitan area and the other acts in an advisory capacity to teachers in country schools. In 1957-58, 8,700 school children visited the Museum.

A close relationship exists between the museum and the Geological Survey of Western Australia, the collections of the survey being housed and exhibited in the museum.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral and miscellaneous products. The museums received aid from the Government during 1956-57 to the extent of £24,050.

## § 12. Public Art Galleries.

The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. The expenditure for 1956-57 was £33,684. At the end of 1957, its contents comprised 1,419 oil paintings, 904 water colours, 2,175 prints and drawings, 287 sculptures and casts, and 1,330 ceramics, works in metal and miscellaneous. Since 1895, loan collections of pictures have been exhibited regularly in important country towns.

The National Gallery at Melbourne at 30th June, 1957, contained 1,087 oil paintings, 7,600 objects of statuary, bronzes, ceramics, etc., and 8,048 water colour drawings, engravings and photographs. The Gallery is situated in the same building as the Museum and Public Library. Expenditure allocated to the National Gallery in 1956-57 was £67,327, including £3,125 for purchases of works of art. Several munificent bequests have been made to the institution by private citizens. There are provincial art galleries at Ararat, Ballarat, Bendigo, Castlemaine, Geelong, Mildura, Shepparton, St. Arnaud and Warrnambool, to which, periodically, pictures are sent on loan from the National Gallery.

The Queensland National Art Gallery, Brisbane, maintained by the State Government, was founded in 1895. The first Director was appointed in 1950, and the interior of the gallery has been remodelled. An art museum and a print room have been added. The collection comprises mainly Australian paintings, etc.

The Art Gallery at Adelaide originated in an exhibition of pictures in the Public Library Building in 1882. Many bequests made by private citizens have materially assisted its growth. At 30th June, 1958, there were in the Gallery 1,801 paintings in oil, water colours and pastels, 129 items of statuary and a large collection of drawings, prints and furniture. The expenditure during 1957-58 was £28,333.

The Art Gallery of Western Australia was established in 1895. Although under the statutory management of a Board of Trustees, appointed by the State Government, it functions under its own director and staff. At the 30th June, 1958, the collection comprised 332 oil paintings, 169 water colours, 10 pastels, 776 drawings, 509 prints, 9 miniatures and 19 pieces of sculpture. International and interstate exhibitions are frequently held and travelling exhibitions are sent to country centres.

In Tasmania, the Art Gallery at Hobart was opened in 1887. In June, 1957, the contents consisted of 177 oil paintings, 180 water colours, 119 black and white, three statuary and 151 etchings, engravings, etc. Expenditure in 1956-57 was £21,752.

The Art Gallery at Launceston was opened in 1891. Only a small proportion of the contents belongs to the gallery, the bulk of the pictures being obtained on loan. In June, 1957, there were on view 194 oil paintings, 116 water colours, 30 black and white, and 64 miscellaneous exhibits. Expenditure in 1956-57 was £11,438.

### § 13. Scientific Societies.

1. **Royal Societies.**—In earlier issues of the Official Year Book, an outline was given of the origin and progress of the Royal Society in each State. The accompanying table contains the latest available statistical information regarding these institutions, the headquarters of which are in the capital cities.

#### ROYAL SOCIETIES, 1956.

| Particulars.                         | Sydney. | Mel-<br>bourne. | Bris-<br>bane. | Ade-<br>laide. | Perth | Hobart. | Can-<br>berra. |
|--------------------------------------|---------|-----------------|----------------|----------------|-------|---------|----------------|

(a) Proceedings.

2. **The Australian Academy of Science.**—The Australian Academy of Science was founded in 1954 to promote scientific knowledge, to maintain standards of scientific endeavour and achievement in the natural sciences in Australia, and to represent Australian science in the international field. These objectives it shares with the Royal Society of London and with the National Academies of Science of most other countries.

Prior to 1954 Australian science had been represented in international activities by the Australian National Research Council. This Council, which was formed in 1919, particularly to provide for Australia's participation in the International Research Council, acted for many years as the top representative body of science in Australia. Over the years the National Research Council had widened its membership to include leaders in the social sciences as well as in the natural sciences. By 1951, there was a strong feeling that the natural sciences needed a body of men, distinguished in their respective fields, to foster the pursuit of the natural sciences in Australia, and to represent Australia in the increasing international activities. The social scientists were also ready to form a separate organization now known as the Social Sciences Research Council.

The Australian National Research Council agreed to the suggestion that two entirely new bodies should be formed and that the old Research Council should be disbanded. The initiative in the natural sciences was taken by a group of twelve Fellows of the Royal Society

of London, resident in Australia, who invited eleven other scientists of high standing to join them. These scientists became the Foundation Fellows of the Australian Academy of Science. With the help of the Australian Government and the Royal Society of London, the group of founders obtained a Royal Charter which established the Australian Academy of Science as a body with proper legal status and adequate prestige. During the Royal Visit, Her Majesty Queen Elizabeth II was graciously pleased to present her Charter to the provisional Council of the Academy at a simple ceremony at Government House, Canberra, on 16th February, 1954, thus following the precedent of King Charles II who presented his Charter to the Royal Society of London in 1662.

The Charter required that the Academy should be enlarged to at least 50 Fellows within three months. Six Fellows, distinguished for their achievements in the natural sciences, are elected annually. The total Fellowship is now 81.

The first task of the Academy was to take over from the National Research Council Australia's representation in international scientific affairs. An early duty was the organization of Australia's participation in the International Geophysical Year and as an indication of the confidence in the young Academy the necessary grant from the Australian Government was obtained. The co-ordination of Australia's scientific resources for the International Geophysical Year was placed in the hands of a National Committee and carried out on an honorary part-time basis.

The publication policy adopted is to support existing worthy publications rather than to enter the field actively for the present. Several grants have been made to learned journals conducted by reputable Australia-wide societies, and an agreement has been concluded with the Commonwealth Scientific and Industrial Research Organization for the control of the standard of the Australian Journals of Scientific Research published by the Organization. The only regular publication of the Academy is a Year Book.

Other assistance to scientific research has taken the form of grants for a number of projects—for several symposia and for the support of two biological research stations, one on the Great Barrier Reef and one in Western Australia.

The Royal Charter sets out as one of the Academy's objects "to suggest ways in which scientific projects in Australia may be instituted, carried out, or revised", and there are several matters of national scientific importance which have engaged the attention of the Council and expert committees over the last few years. The sciences of oceanography and hydrology, both of considerable practical significance to Australia, have hitherto been somewhat neglected and certain recommendations have been made to alleviate this position. The question of scientific manpower to supply the needs of the nation has given grave concern here as in other countries. Specific recommendations have also been made to the Government on this matter. A report has been published on the deterioration of the high mountain water catchments of New South Wales and Victoria—an area of vital importance where the huge Snowy Mountains hydro-electric scheme is being built.

The affairs of the Academy are managed by an elected Council consisting of the President, the Treasurer, two Secretaries (one representing the Physical and the other the Biological Sciences) and eight other members. The Assistant Secretary (who must not be a Fellow) is the Academy's salaried administrative officer.

The headquarters of the Academy is situated in Gordon Street, Canberra City. This building, which is of unconventional design, houses the offices of the Academy and provides a conference centre of international standard for scientific and other meetings.

**3. The Australian and New Zealand Association for the Advancement of Science.**—This association was founded in 1887. Its headquarters are at Science House, Gloucester Street, Sydney, and congresses are held at intervals of approximately eighteen months within the various States and in the Dominion of New Zealand. The next congress is scheduled to take place in Perth in August, 1959.

**4. Other Scientific Bodies.**—A number of scientific bodies have been set up by the Commonwealth Government. These are the Commonwealth Scientific and Industrial Research Organization, the Commonwealth Observatory (which has now been incorporated in the Australian National University), the Ionospheric Prediction Service, and the Atomic Energy Commission. Particulars concerning these bodies may be found in Chapter XXX.—Miscellaneous.

The Linnean Society of New South Wales, with head-quarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the Society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society offers annually to graduates of the University of Sydney

who are members of the Society and resident in New South Wales, research fellowships (Linnean Macleay Fellowships) in various branches of natural history. One fellowship was awarded in 1958. The library comprises some 18,000 volumes. Eighty-three volumes of Proceedings have been issued, and the Society exchanges with about 300 kindred institutions and universities throughout the world. The membership at the end of 1958 was 260.

The British Astronomical Society has a branch in Sydney, and in each of the States the British Medical Association has a branch.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

#### § 14. State Government Expenditure on Education, Science and Art.

The expenditure by each State Government on education, science and art during the year 1956-57 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under public health.

#### STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART, 1956-57. (£'000.)

| State.               | Expenditure from— |               |              |                | Receipts.    | Net Expenditure. |
|----------------------|-------------------|---------------|--------------|----------------|--------------|------------------|
|                      | Revenue.          | Loan.         | Other Funds. | Total.         |              |                  |
| New South Wales ..   | 37,835            | 7,453         | ..           | 45,288         | 908          | 44,380           |
| Victoria ..          | 26,105            | 7,446         | ..           | 33,551         | 326          | 33,225           |
| Queensland ..        | 11,616            | 1,814         | 370          | 13,800         | 503          | 13,297           |
| South Australia ..   | 8,669             | 1,640         | ..           | 10,309         | 436          | 9,873            |
| Western Australia .. | 8,126             | 1,589         | 20           | 9,735          | 142          | 9,593            |
| Tasmania ..          | 4,278             | 1,138         | 27           | 5,443          | 97           | 5,346            |
| <b>Total ..</b>      | <b>96,629</b>     | <b>21,080</b> | <b>417</b>   | <b>118,126</b> | <b>2,412</b> | <b>115,714</b>   |
