CHAPTER 27

THE TERRITORIES OF AUSTRALIA

The internal Territories of Australia are the Northern Territory and the Australian Capital Territory. External Territories under the control of Australia are: Norfolk Island; the Territory of Heard and McDonald Islands; the Australian Antarctic Territory; the Territory of Cocos (Keeling) Islands; the Territory of Christmas Island; and the Territory of Ashmore and Cartier Islands.

Information on all Territories except Ashmore and Cartier Islands is contained in the following pages, details of the acquisition of all the Territories can also be found in Chapter 1 of this Year Book. More detailed statistics and additional descriptive matter are to be found in the Annual Reports of the Administrations of the various Territories and in the Northern Territory Statistical Summary (1306.7) and the Australian Capital Territory Statistical Summary (1307.8) issued by the ABS. Statistics for the Northern Territory and the Australian Capital Territory are also included in chapters dealing with particular subjects.

THE NORTHERN TERRITORY

General description

The total area of the Northern Territory is 1,346,200 square kilometres.

The Northern Territory seat of Government is Darwin on the North Coast. The estimated resident population of the Darwin Statistical Division at 30 June 1983 was 63,404.

Northern Territory Self-Government

The Northern Territory was established as a self-governing territory by the Northern Territory (Self-Government) Act 1978 of the Commonwealth. Under that Act, the Commonwealth transferred most of its powers to the Government of the Northern Territory.

In all fields of transferred power, the Government is similar to that of the Australian States, with some differences in titles, for example there is an Administrator instead of a Governor and a Chief Minister instead of a Premier.

The Administrator, appointed by the Governor-General, has responsibility for administering the Government of the Northern Territory. The Administrator is advised by an Executive Council comprised of all Northern Territory Ministers, led by the Chief Minister. The Administrator acts with the advice of the Executive Council on all matters transferred to the Northern Territory. He acts with Commonwealth advice on matters not transferred.

The Legislative Assembly of the Northern Territory is the Northern Territory's Parliament. It has 25 Members, which are elected for a period of four years. A Speaker is elected by, and Ministers are appointed from, the Members of the Legislative Assembly. A Ministry of eight is responsible for the administration of all transferred powers and acts through a number of departments and authorities, most of which are staffed by the Northern Territory Public Service.

Local Government was established in Darwin in 1957 and afterwards in regional centres. Municipal councils are elected by universal adult franchise, with elections at intervals of not more than three years. Provision has been made for a limited form of local government by smaller communities. There has been considerable interest in this provision, particularly in Aboriginal communities.

Development of Administration

Upon the extension of New South Wales westwards to the 129th east meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 it was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1 January 1911.

From 1911 until 30 June 1978, the Commonwealth administered the Northern Territory under the provisions of the Northern Territory (Administration) Act 1910, as amended. The Act provided for an Administrator, appointed by the Governor-General, to administer the Northern Territory on behalf of the Commonwealth Government.

By amendment of the Act in 1947, a Legislative Council comprising seven official and six elected members, with the Administrator as President, was created to make laws for the peace, order and good government of the Northern Territory. Composition of the Legislative Council was changed by further amendment in 1959 to provide for six official members, three nominated non-official members and eight elected members, and for an Administrator's Council to advise the Administrator. The Act was further amended in 1974 to provide for a Legislative Assembly of 19 elected Members and for a Speaker to be one of those Members, elected by the Members.

Laws passed by the Assembly were presented to the Administrator for assent. The Administrator was required to reserve laws on specific subjects for the pleasure of the Governor-General who was empowered to assent, withhold his assent or refuse his assent in part to such laws, or to return them to the Assembly with recommended amendments.

On 1 January 1977, the Commonwealth Government began a program of transferring executive powers to the Legislative Assembly by amendment of the Northern Territory (Administration) Act. A separate Northern Territory Public Service was created and administrative powers were transferred. Positions of Executive Member were created under the Act. These Members exercised ministerial-type powers in respect of transferred matters such as policy, fire brigade, local government and correctional services. An Executive Council replaced the Administrator's Council.

On 1 July 1978, the Northern Territory (Self-Government) Act came into force and established the Northern Territory as a body politic under the Crown. This Act also provided for the appointment of an Administrator by the Governor-General. It created offices of Ministers of the Northern Territory who, together with the Administrator, comprise the Executive Council of the Northern Territory. A Northern Territory Government, comprised of Ministers of the Northern Territory, was established with full responsibility for a range of state-type transferred powers administered through a Northern Territory Public Service and a Treasury. A Northern Territory flag was raised for the first time on 1 July 1978, the date upon which the Northern Territory became self-governing.

Major matters not transferred on 1 July 1978 were the mining of uranium and other prescribed substances, Aboriginal land matters, health, education and the Supreme Court. Powers in respect of health, education and the Supreme Court were progressively transferred from the Commonwealth to the Northern Territory Government during 1979.

At the end of 1979, the only major powers retained by the Commonwealth in the Northern Territory were those relating to rights in respect of Aboriginal land and the mining of uranium and other prescribed substances. Since the end of 1979, the Northern Territory, although remaining a Territory of the Commonwealth and still subject to Commonwealth laws made under Section 122 of the Constitution, is in most respects a self-governing Territory.

The Northern Territory is represented in the Parliaments of the Commonwealth by one Member in the House of Representatives and two Senators, whose terms of office coincide with that of the Member in the House of Representatives. Since October 1984 the Cocos (Keeling) Islands have been included in the Northern Territory electorate for the purposes of all Federal elections and referenda.

Physical geography

The Territory is within the torrid zone, with the exception of a strip about 300 kilometres wide which lies south of the Tropic of Capricorn.

The low flat coastline seldom reaches a height of 30 metres. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and laterite form the occasional cliffy headlands. The coastline of 6,200 kilometres is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries. The only practicable deep-water port for general use, however, is Darwin.

Inland, the country generally is devoid of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the seventeenth or eighteenth parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply for the interior system. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east-west trend.

Climate, fauna and flora

There are two main climatic divisions: the wet season, November to April; and the dry season, May to October. The changes of weather are uniform and regular. Nearly all the rainfall occurs in the summer months.

The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, freshwater tortoises, snakes (mostly non-venomous), and frogs abound. There are many varieties of freshwater fish and littoral Mollusca. Butterflies and beetles are strongly represented. The termite is a pest which is capable of serious

damage to wooden buildings unless special preventive measures are taken. Mosquitoes and sandflies are very troublesome in the 'top end', particularly in the wet season. Buffaloes exist in large herds on the northern coastal plains. Most types of native fauna are protected.

The vegetation is north Australian in type, but a number of forms belong to the Malayan and Oceanic regions. The climate and generally poor soils associated with it give rise to tropical savannah vegetation, with the size and volume of woody material present being closely related to rainfall and the quality of the forests decreasing strikingly as one proceeds inland from the northern coastline. In the north, cypress pine (which is termite resistant), ironwood, bloodwood and paperbark timbers are cut and milled for local building purposes. Further inland, particularly on the Barkly Tablelands and parts of the Victoria River district, there are better grazing grasses and some shrubs, while the wide belt of sandy plain between the Barkly Tableland and the ranges in the Alice Springs area carries mainly spinifex grass and low scrub. The plains of the Alice Springs district carry chiefly an acacia scrub known as mulga, spinifex and other sparse grasses. The principal families represented in the interior are *Gramineae*, *Chenopodiaceae*, *Compositae* and *Mimosaceae*.

Water

The Northern Territory Government provides water and sewerage facilities in four of the five major centres—Darwin, Alice Springs, Katherine and Tennant Creek. In the other major centre, Nhulunbuy, the mining company North Australian Bauxite Company provides those services. Facilities are also provided for numerous Aboriginal communities and all smaller gazetted towns such as Pine Creek, Mataranka, Elliott and Finke. Facilities for the new Yulara Tourist Village near Ayers Rock are provided by the Yulara Corporation, and in Jabiru they are provided by the Jabiru Town Development Authority.

Darwin is served by the Darwin River Dam, some 70 kilometres from the city. The rockfill dam was completed in 1972. It is 30 metres high with a crest length of 564 metres, has an active storage of 230 million cubic metres and a safe draft of 90 megalitres a day. Studies are also being carried out to identify future sources to meet the growing needs of the Darwin region.

Katherine is supplied with treated water from the Katherine River, but with the proposed development of Tindal RAAF base near Katherine, feasibility studies are in progress to assess future supplies from various dam sites on the Katherine River system.

Alice Springs, Tennant Creek and all other towns and communities are supplied by bores from groundwater sources. Alice Springs has twenty production bores at Roe Creek. Tennant Creek has ten at Kelly Well and three at Cabbage Gum.

Soil conservation

The Conservation Commission of the Northern Territory administers soil conservation and control legislation, undertakes resource inventories to assess land capabilities and conducts soil erosion works on behalf of the Government and the private sectors.

Population

See also Chapter 6, Demography.

The estimated population of the Northern Territory at 30 June 1983, was 133,876 persons.

Aboriginal Affairs

Policy

The Government is committed to policies of Aboriginal self-management at all levels. Involvement of Aboriginals in delivery and planning programs, and in all stages of the development and implementation of policy is paramount.

The basis of the Government's approach is to secure for Aboriginals access to government services equal to that accorded other Australian citizens, together with additional services appropriate to Aboriginals' state of extreme disadvantage, and, in recognition of a community obligation deriving from Aboriginals' past dispossession and dispersal.

Legal status

As Australian citizens, Aboriginals are entitled to equality before the law. For the purpose of administering various programs designed to benefit Aboriginals, the Department of Aboriginal Affairs and other Commonwealth Government departments and agencies define an 'Aboriginal' or 'Torres Strait Islander' as a person of Aboriginal or Torres Strait Islander descent who identifies as an Aboriginal or Torres Strait Islander and is accepted as such by the community in which he or she lives.

Land and land rights

Aboriginals who are able to prove strong traditional links with unalienated Crown land may make a claim before the Aboriginal Land Commissioner, a judge of the Northern Territory Supreme Court. The Aboriginal Land Rights (Northern Territory) Act 1976 requires the Land Commissioner, in hearing a claim, to consider a number of matters in addition to traditional ownership before making a recommendation to the Minister for Aboriginal Affairs. The Minister can then accept or reject the Aboriginal Land Commissioner's recommendations.

Aboriginal land tenure, freehold or in the process of being granted freehold amounts to 429,452 square kilometres or 31.9 per cent of the Northern Territory. Leasehold and reserve mission land total 19.638 square kilometres.

Freehold titles to Aboriginal land are held by Aboriginal Land Trusts and the land is administered by Aboriginal Land Councils.

Minerals on Aboriginal land remain the property of the Crown. The Aboriginal Land Rights Act provides, however, that mineral exploration can only proceed with the approval of the appropriate land council which in turn must abide by the wishes of the traditional Aboriginal owners of the area concerned. This veto power can be overruled if the Governor-General, by Proclamation, declares that the national interest requires the grant of a mining interest, and neither House of Parliament disallows that Proclamation. Pre-existing mining interests were exempt from the requirement for Aboriginal consent. In all cases however, agreement must be reached on terms and conditions of mining and the Minister for Aboriginal Affairs is able to appoint an arbitrator in cases where Aboriginal consent is not required but a land council is unable or unwilling to reach agreement with a mining company.

Royalties from mining on Aboriginal land are paid into an Aboriginals Benefit Trust Account and are distributed to pay administrative expenses of land councils, to communities affected by mineral developments and, on the recommendation of an advisory committee, to Aboriginal communities of the Northern Territory generally. Control of uranium mining has been reserved by the Commonwealth and special arrangements have been made between the Commonwealth and the Northern Territory Governments in relation to payments in lieu of royalties.

Aboriginals on Utopia Station in the Northern Territory, speaking with Australian Government officials. The Angarapa Aboriginal Land Trust was presented with title deeds to the station in July 1983.

Aboriginal communities are also being assisted to purchase land on the open market. An Aboriginal Land Fund Commission was established in 1974 for this purpose. This function was taken over on 1 July 1980 by the Aboriginal Development Commission which assists Aboriginal and Torres Strait Islander communities, groups and individuals to acquire land for a variety of purposes, engage in business enterprises, obtain finance for housing and other personal needs, and to receive training where necessary.

Community services and affairs

Government policy in the administration of Aboriginal affairs is to encourage State and Commonwealth departments and instrumentalities to provide services to Aboriginals as to other Australian citizens and to take special measures to ensure that these services are appropriate, accessible and reflect the variety of Aboriginal life styles. In line with the transfer of other functions to the Northern Territory Government on 1 July 1978, the Northern Territory Government has assumed responsibility for the provision of major services to Aboriginal communities including essential services such as water and power supply, health, education and support for local government. Subsequently, the Commonwealth has provided annual grants to the Northern Territory Government and to the Aboriginal Development Commission for housing programs for Aboriginals.

Special programs for Aboriginals

Attention is being given to changing the institutional character of Aboriginal communities in the Northern Territory. Support is designed to encourage and strengthen the capacity of Aboriginals to manage their own affairs, to increase their economic independence, and to reduce social handicaps facing them.

Government policy is to provide Aboriginal primary school children in Aboriginal communities with education in their own language as far as practicable. Bilingual education programs initiated in Northern Territory Aboriginal communities in 1973 have been expanded and are operating in several schools.

The Aboriginal Legal Aid service is supported by the Department of Aboriginal Affairs and operates to ensure that Aboriginals have access to legal aid advice and are competently represented in the courts.

Production

See also the chapters dealing with particular subjects.

On 31 July 1984, 23,303,785 hectares were held under freehold title; 69,879,000 hectares under leasehold; 2,962,500 hectares under various licences; 26,927,100 hectares was Aboriginal land (held under the Aboriginal Land Rights Act); 69,385 hectares set aside for Government use; and 11,478,230 hectares unalienated. Land rent collected for the year 1983-84 amounted to \$500,553.

Following the report of the Aboriginal Land Rights Commissioner in April 1974, the Commonwealth Government introduced the Aboriginal Land Rights (N.T.) Act 1976. This Act which commenced on Australia Day, 26 January 1977 gives traditional Aboriginals inalienable freehold title to former Aboriginal reserves and some other land, amounting to approximately 19 per cent of the Northern Territory, and provides a procedure for them to claim title to other areas of unalienated Crown Land. On 31 July 1984, 26,692,400 hectares were designated as Aboriginal Land under the Act, 18,673,600 hectares had been recommended as the result of claims, while claims were pending in respect of 17,754,800 hectares.

With the commencement of the Crown Lands Amendment Act (No. 3) 1980 most existing leases in the Territory were automatically converted to freehold tenure making it the rule rather than the exception. Most Pastoral Leases and all Special Purposes Leases were excluded from automatic freeholding.

The various forms of lease or licence of lands are as follows:

Pastoral leases —granted for periods not exceeding 50 years.

Crown leases (Term) -granted for a term of years, and in majority of cases can be

converted to freehold when developed.

Crown leases (Perpetual) —granted in perpetuity.

Special purposes leases

-granted for a term of years or in perpetuity for purposes other than pastoral, agricultural or mining, or for private residential

purposes within a town.

-granted to graze stock on Crown Lands for periods not exceeding Grazing licences

one year.

Occupation licences

granted for manufacturing, industrial or any prescribed purposes

for periods not exceeding five years.

Miscellaneous licences —granted for periods not exceeding one year.

Pastoral and agricultural industries

Beef cattle production is the major rural industry in the Northern Territory. The beef industry has been characterised throughout its history by a slow rate of expansion due mainly to the quality of pastures in the top end of the Territory, periodic droughts in the Alice Springs district and remoteness from large domestic markets and other market infrastructure. Although the rate of expansion has been slow it has been persistent. Significant developments in the last two decades include: the establishment of a beef road system; expansion of market outlets, including live animal exports to Malaysia and Brunei; introduction of tropical cattle breeds in the northern regions; continued private investment in water supplies, fences and yards; and development of low cost aerial mustering techniques. Export licenced abattoirs now operate in Alice Springs, Tennant Creek, Katherine, and Point Stuart and Mudginberri on the northern coast. The latter three abattoirs process both cattle and buffalo for export. The gross value of cattle production in 1983-84 is estimated to have been \$65 million.

In the Darwin district, the cattle industry has continued to be augmented by the buffalo meat industry. Interest in buffalo control has received a significant boost due to the recent development of a high-priced live export trade with Indonesia. Buffalo surplus to the live export trade requirements continue to be slaughtered predominantly for the West German market. The gross value of the buffalo industry in 1983-84 was of the order of \$5 million.

Both the cattle and buffalo industries of the Northern Territory are experiencing dramatic changes in management practices due to a campaign to eradicate brucellosis and tuberculosis from the herds. The campaign requires all stock to be manageable to the extent where a 100 per cent efficient muster can be carried out and so controlled stock are segregated and protected from possible infection by non-controlled stock. In those areas where it is not possible to muster and test stock for the presence of the diseases, the program is proceeding by way of partial and total destocking orders. Owners of destocked livestock are assisted by way of compensatory payments.

In 1980 the Agricultural Development and Marketing Authority (ADMA) was established to develop broadacre cropping industries to the point where export sales were viable. The ADMA has developed six project farms in the Douglas-Daly basin, 250 kilometres from Darwin. These farms provide a commercial environment for the development of the required levels of agronomic and economic efficiency. ADMA operates as the handling and marketing authority for these and other non-project farmers in the Territory. Grain handling depots have been established at Katherine and Douglas-Daly. Gross value of production in 1983-84 was \$1.2 million.

The horticultural industry in the Northern Territory has experienced very rapid expansion over the last four years. Value of production has increased from just over \$200 000 in the early 1980s to in excess of \$3 million in 1983-84. Very significant plantings of mangoes are as yet immature. The value of mango production is predicted to be in excess of \$10 million by 1990 and will continue to expand thereafter. Commercial trials of cashew production are being undertaken and it is expected that these will be the forerunner for a \$5 million industry. The top end of the Northern Territory has a natural advantage for horticultural production due to its capacity to produce the earliest maturing product in Australia for many lines of tropical fruit and vegetables. Table grape production in the Alice Springs district enjoys a similar advantage.

NORTHERN TERRITORY: NUMBER, AREA AND LAND UTILISATION OF AGRICULTURAL ESTABLISHMENTS

							Total	
			Number of agricultural establishments	Area under sown Area used pastures for crops (a) and grasses		Balance of area (b)	Area	Percentage of N.T. land area (134,620,000 hectares)

Mining

The value of mineral output continued its rapid growth of recent years from \$437 million in 1980 to \$716 million in calendar year 1983. The most important single factor to account for increases in value of production was yellowcake production at Nabarlek and Ranger. Uranium accounts for 44 per cent of the total value of minerals produced in 1983.

The principal mining areas are the Alligator Rivers Region for uranium; Gove Peninsula for bauxite/alumina production, Groote Eylandt for manganese and Tennant Creek for copper and gold.

⁽a) Includes working proprietors. (b) Turnover plus increase (or less decrease) in the value of stocks less purchases, transfers in and selected expenses. Commencing with 1978-79, 'rent, leasing and hiring revenue' and 'rent, leasing and hiring expenses' have been included in the calculation of value added and its components 'turnover' and 'purchases, transfers in and selected expenses'. (c) Outlay on fixed tangible assets less disposals.

Petroleum and natural gas

Expenditure on offshore and onshore exploration was \$45.3m in 1982 and \$54.5m in 1983. In September 1983 a 148 km natural gas pipeline from the Palm Valley field to Alice Springs power station was completed. Appraisal testing and drilling took place on the Mereenie oil-field during 1982 and 1983. Production at 1800 BPSD started in September 1984 and a fractionation plant at Alice Springs and oil pipeline to feed it are planned for 1985.

Extensive studies on a gas pipeline from the Amadeus Basin to Darwin for power generation have been undertaken in 1984 and a decision on this project is expected during 1984. Amadeus gas reserves have been significantly upgraded during these studies.

Forestry

Forestry activities in the Northern Territory commenced in 1959 under the Forestry and Timber Bureau; later a State-type service was developed under the Department of the Northern Territory.

In July 1978, with the granting of self-government, forestry became the responsibility of the Territory Parks and Wildlife Commission, now the Conservation Commission of the Northern Territory.

Present activities fall into four main areas: Urban Forestry, Plantation Forestry, Native Forest Management and Conservation.

The Urban Forestry section is aimed at improving the urban environment throughout the Northern Territory through programs of park and street beautification and arid area species testing.

The Plantation Forestry section is predominantly based on plantation establishment on more favourable sites on Melville Island and is ultimately aimed at import replacement. The major species in use is *Pinus caribaea*, though early plantings were largely Cypress pine. A small pressure treatment plant providing treated round timber is operated by the Aborigines on nearby Bathurst Island.

Management of native forest is currently confined to the Murganella area of Arnhem Land where a policy of protection from fire has resulted in extensive regeneration of Cypress pine and native hardwoods, *Eucalyptus tetrodonta* and *E. nesophila*. Current research in this area is aimed at development of sound management prescriptions for treatment of this regeneration.

In its conservation role, the Conservation Commission has given emphasis to fire and ecological studies throughout the Territory together with seed collection, testing and propagation, and gene pool conservation of rare or unique species.

Fishing

After livestock production, fisheries is the second most valuable primary production industry in the Northern Territory. Prawn production, contributing over 85 per cent of the total value, is the major fishery. Barramundi is second, with the remainder mainly threadfin salmon, spanish mackerel, bay lobster, squid, mud crabs and reef fish.

Prawn and Barramundi are heavily fished and measures have been taken to prevent over-exploitation. The Territory Government is encouraging development of under-utilised demersal and pelagic species (mainly fished by foreign vessels), shark, scallops, squid and tuna. Foreign bilateral fishing vessels were allocated a quota of 30,000 tonnes in 1983-84.

The Australian Government is encouraging Australians to participate in fisheries not being utilised and those being exploited by foreign vessels. The recent establishment of an Australian-Taiwanese joint venture having a 2,000 tonnes pelagic fish quota for 1983-84 has been an important progression in the Australianisation of the northern fisheries.

Secondary industries

The types of secondary industries that have developed in the Northern Territory have been largely based on demand from the local markets, some processing of primary production for exports including the processing of mined ores and beef together with exports in the mining and construction industries.

The isolation of the Northern Territory from the major population areas of Australia and resultant high transportation costs make other than local market expansion difficult.

While industry is limited to local markets, industrial expansion will be small. However determined efforts are being made to take advantage of the proximity of Darwin to the rapidly expanding South East Asian markets. It is envisaged that in the longer term secondary industry will be largely export based.

The following table shows results of the Manufacturing Censuses taken in respect of the years 1980-81 to 1982-83.

NORTHERN TERRITORY: MANUFACTURING ESTABLISHMENTS

	Unit	1980-81	1981-82	1982–83
Establishments at 30 June	No.	98	106	117
Persons employed (a)	No.	2,651	2,489	2,434
Wages and salaries	\$m	41.6	42.5	45.2
Turnover	\$m	292.3	296.9	343.9
Opening stocks at 30 June	\$m	48.8	83.1	82:9
Closing stocks at 30 June	\$m	83.5	78.2	81.3
Purchases, transfers in and selected expenses	\$m	230.6	230.9	251.3
Value added	\$m	96.3	61.2	91.0

⁽a) Average over whole year. Includes working proprietors.

Tourism

Tourism is second only to mining as the Territory's most important industry with direct earnings for 1983–84 estimated at \$172 million.

A visitor growth rate of 14.6 per cent with visitor expenditure increasing from \$85 million in 1977-78 at an average rate of 8.9 per cent to \$172 million in 1983-84 continues to encourage investment in tourism facilities.

The Northern Territory Tourist Commission has a head office in Alice Springs and a regional office in Darwin. It operates Government Tourist Bureaux in Adelaide, Hobart, Melbourne, Doncaster, Sydney, Parramatta, Perth, Canberra, Brisbane, Darwin and Alice Springs as well as Bureaux in Los Angeles, Frankfurt, Tokyo, Singapore and London.

Its budget for 1983-84 is \$13.7 million.

National parks and reserves

There are 53 parks and reserves, covering abour 5,800 square kilometres, under the care, control and management of the Conservation Commission of the Northern Territory. The Commission's functions include the preservation and protection of natural and historical features and the encouragement of public use and enjoyment of land set aside under its control.

In addition, the Cobourg Peninsula National Park (2,207 square kilometres) is managed by the Cobourg Peninsula Sanctuary Land Trust, and both Uluru (Ayers Rock—Mt. Olga) and Kakadu National Parks (15,923 square kilometres) are managed by the Australian National Parks and Wildlife Service.

Transport and communication

Railways

Passenger and freight train services commenced in December 1980 over the then new 831 km standard gauge Tarcoola—Alice Springs railway. Direct services from Sydney to Alice Springs commenced in 1984.

Roads

The Stuart Highway is the principal north-south axis route for the Northern Territory connecting Alice Springs, Katherine, Tennant Creek and Darwin to Adelaide. The section Darwin—Alice Springs is 1,486 kilometres long and sealed over its full length. The section south of Alice Springs is sealed to the South Australian border, a distance of 293 kilometres.

The Barkly Highway is the principal route to and from Queensland via Mount Isa. It is 648 kilometres long and is sealed. Running approximately east-west, it connects to the Stuart Highway some 26 kilometres north of Tennant Creek.

The Victoria Highway, the principal access route to and from Western Australia via Kununurra, is 467 kilometres long and is sealed.

These highways are used to carry a variety of freight, including cattle, particularly between the railheads at Mount Isa and Alice Springs. They provide access to meatworks at Wyndham (Western Australia), Cloncurry (Queensland) and Katherine. In addition, they play a particularly important part in the Northern Territory economy through their association with the tourist industry.

The first program for upgrading the Stuart and Barkly Highways is complete, while the second program is nearing completion. Future works will be an ongoing program to bring these roads to National Highway Standards.

Shipping

Shipping services to Darwin are provided from Western Australia by Stateships using two multi-purpose, roll on-roll off vessels (Pilbara and Koolinda). Both services are on a fortnightly basis. Tankers from Australian and overseas ports deliver oil products to Darwin. General cargo vessels from overseas ports also visit Darwin. The prawning and fishing industry accounts for a significant portion of the shipping entries into the port.

A regular shipping service which serves Aboriginal communities as well as the mining centres of Melville Bay (Gove) and Milner Bay (Groote Eylandt) operates from Brisbane to the Gulf of Carpentaria ports. Bulk carriers load ore and other mining products for delivery to ports in Australia and overseas.

Two Darwin-based companies operate landing craft to Aboriginal communities and ports along the coast. The vessel, Frances Bay, is involved in overseas trade from Darwin to Singapore and other South East Asian ports.

Air services

At 1 September 1983 there were 88 licensed aerodromes plus 4 Commonwealth controlled airports in the Territory. Qantas operates a weekly international service from Darwin to Singapore whilst Garuda Indonesian Airways provides a twice weekly service to Den Pasar (Bali). Regular services to Darwin with intermediate stops at some Territory centres are operated by Trans Australian Airlines and Ansett Airlines of Australia from mainland capital cities and by Airlines of Western Australia from Western Australia. Airlines of Northern Australia commenced operations in 1981 and provide a network to all major Territory centres. The Northern Territory Aerial Medical Service has aircraft based at Darwin and Gove while the Royal Flying Doctor Service operates from Alice Springs. Regular commuter services operate from Darwin, Katherine and Alice Springs to outlying centres. Charter services are available at Darwin, Alice Springs, Gove, Groote Eylandt, Katherine, Tennant Creek, Ayers Rock and Jabiru. Responsibility for the economic licensing of domestic operations passed from the Commonwealth to the Northern Territory Government on 1 June 1980. The Commonwealth Government retains responsibility for safety and operational aspects and works closely with Territory authorities in the licensing of commercial operations within the Territory.

Several organisations provide helicopter services particularly for cattle mustering and aerial survey. In 1981 heavy helicopter activity from Darwin increased in support of offshore drilling rigs involved in oil and gas exploration.

Civil aircraft under contracts to the Department of Transport, Australia, operate on extensive coastal surveillance operation from Darwin.

Post, telegraph, telephone, radio and television

Postal communication is maintained by daily air transport between major Northern Territory centres and the capital cities of Australia. Large centres receive surface mails by two major road mail services operating from Queensland and South Australia. More remote centres are served by aerial services. Direct mail despatches are exchanged between Darwin and several overseas countries.

Trunk telephone links to Darwin extend from Townsville via a broadband microwave radio relay system, and from Adelaide via systems operated over leased circuits on the NAR Tarcoola-Alice Springs microwave link. These systems also carry telegraph and data traffic and serve towns along the routes. Subscriber trunk dialling facilities were introduced to Darwin, Nhulunbuy (Gove Peninsula) in 1974 and to Katherine in 1975. ISD (International Subscriber Dialling) was introduced to telephone exchanges in the Darwin area and to Katherine and Nhulunbuy in December 1976. Tennant Creek and Elliott telephone services were connected to automatic with subscriber trunk dialling facilities during 1979.

Completion of Australia's first solar-powered broadband microwave relay system between Tennant Creek and Alice Springs in October 1979 brought subscriber trunk dialling and ISD facilities to Alice Springs. It also provides live television programs to the National Television Service transmitter at Alice Springs.

The automatic conversion program in the Northern Territory is now complete and all services are provided with direct dialling facilities and access to STD. High frequency radio telephone exchanges at Katherine and Alice Springs provide connections to the telephone network for some of the remote properties in the Northern Territory. The majority of homesteads on pastoral leases are equipped with radio transceivers operating through the Royal Flying Doctor base at Alice Springs or the Telecom Australia Outpost Radio base in Darwin which provide a message passing and emergency communications service. A number of homesteads and settlements adjacent to the Darwin-Isa and Tennant Creek-Alice Springs microwave corridors are provided with VHF radio telephone giving 24 hour service with STD facilities.

Telecom's major thrust in the Northern Territory is an extension of the network to outback areas, scheduled for completion by 1990. During 1984 automatic telephone exchanges were installed at Yulara and Groote Eylandt complete with STD and ISD access. Utilisation of new technology such as the Australian-developed Digital Radio concentrator system and the domestic satellite will bring world standard telephone service to all customers, however isolated.

Regional national broadcasting stations are situated at Darwin, Alice Springs, Tennant Creek, Katherine, Jabiru and Gove. Darwin is also served by a national broadcasting ABC-FM station. Commercial broadcasting stations are located at Darwin, with a translator to serve Katherine, and at Alice Springs. Two television stations, ABD Channel 6 of the national broadcasting system and commercial station NTD Channel 8 operate in Darwin. The Darwin ABD 6 program is also broadcast in Katherine (ABKN 7) and Tennant Creek (ABTD 9) with translators serving Adelaide River, Bathurst Island, Mataranka, Newcastle Waters/Elliott and Warrego Mine. Alice Springs is served by national television station, ABAD Channel 7. Remote area television is provided via satellite earth stations at Borroloola, Daly River, Galiwinku, Groote Eylandt, Jabiru, Nhulunbuy and Yirrkala.

Education

See also Chapter 12, Education.

Responsibility for education in the Northern Territory was transferred from the Commonwealth Department of Education to the Northern Territory Government on 1 July 1979.

Since that date education services have been provided by the Northern Territory Department of Education.

Details of the responsibilities are outlined in the Northern Territory of Australia Education Act 1979. Under the Act, the Minister for Education is responsible for the general administration and control of education services. The Act states that the Minister may take all measures which, in his opinion, are necessary or desirable to assist parents of children in the Territory in fulfilling the responsibility to educate their children according to the individual needs and abilities of those children; to make education services, provided by him, available to all people in the Territory; and to assist all people of the Territory with their own education. The Act also provides for the establishment of Advisory Councils.

Schools in the Northern Territory

At 1 June 1984 there were 157 schools in the Northern Territory with a total school population of 33,169. Of that number 3,870 attended 12 private schools and 1,208 attended mission schools. Approximately 10,108 students were of Aboriginal descent. In addition to primary and pre-schools, there are 10 government high schools, one secondary correspondence school and three private high schools. There are three area schools offering secondary courses and two residential colleges for Aboriginal students. There are also 17 government schools in Aboriginal communities that offer post-primary courses and six mission schools with post-primary programs.

Teaching staff are provided by the Northern Territory Teaching Service and qualified applicants are recruited from all parts of Australia.

With the exception of Year 12 level, where most students are assessed by the Senior Secondary Assessment Board of South Australia, all aspects of curriculum, course accreditation and student assessment are the responsibility of the Northern Territory Board of Studies, with subject area committees in Language, Mathematics, Science, Computer Education, Social and Cultural Education, The Arts, Health and Physical Education and Life/Work Skills. Apart from Life/Work Skills, which is concerned with secondary education only, all committees span primary and secondary education from Transition to Year 12.

Subject area committees define the core of essential skills and understandings in which all students should gain competence and the educational experiences which they should have during their primary and junior secondary schooling. They also identify or develop the recommended curricula, which consists of those courses and materials which are regarded as the best available to schools to assist in achieving the objectives specified in the core, as well as skills, understandings, content and experiences considered appropriate for extension beyond the core.

In addition to curriculum development, subject area committees provide for teachers guidelines on the assessment of student performance, examples of assessment instruments and, in some subjects, moderation of student assessment. The Junior and Senior Secondary Studies Certificates are issued by the Northern Territory Board of Studies at Year 10 and Senior levels respectively.

The work of subject area committees is co-ordinated and supplemented by curriculum officers at central and regional levels and by a range of educational services.

The two Schools of the Air in the Northern Territory, one at Katherine and one at Alice Springs, have developed individual programs and provide correspondence and radio lessons for students in the years One to Seven. One correspondence school caters for isolated secondary students. Aerial and road patrols are carried out regularly to provide teacher/student and parent contact.

Special schools are located in Alice Springs and Darwin for handicapped children. However, where appropriate, students with special needs are integrated into primary and secondary schools. Guidance and Special Education Advisory services operate from the two Regional Offices in Alice Springs and Darwin.

A program of exchange between Indonesia and the Northern Territory is continuing in which up to two teachers from each country are exchanged for a school year, and four senior students spend up to six months in each country. The Northern Territory have also sponsored a group of junior high school students and teachers from Bali on a two-week educational visit to the Territory each year.

Aboriginal education

Most Northern Territory Aboriginals live away from town centres and their education is provided in various settings including mission schools, government schools on or near Settlements or Aboriginal townships, on pastoral properties and outstations or homeland centres.

There has been an increasing number of requests from outstations for the Department of Education to provide assistance. A small group of teachers is currently working in this field and developing special methods and modified courses to help overcome the difficulties faced by isolated outstation groups in their quest for education.

Government schools for Aboriginal children in out-of-town centres provide tuition at pre-school and primary school level with a number of them providing post primary (secondary age) classes as well.

For Aboriginal children who wish to proceed to secondary schools there are now two residential colleges: Yirara and Kormilda. These colleges are regionally based but situated near urban centres, Yirara at Alice Springs and Kormilda in Darwin. They provide secondary age students from outlying centres with the opportunity to undertake a range of courses internally or to attend an urban high school.

Bilingual education programs in Northern Territory schools in Aboriginal communities have attracted wide interest from within Australia and overseas. There are 16 schools offering bilingual programs to 3,500 students. Six further programs are under consideration. Many other schools include Aboriginal language and culture in the curriculum. Twelve languages are now being used in the program and 6 further languages are under consideration. Many school children are acquiring initial literacy skills in their own language. Although a large proportion of the curriculum is devoted to instruction in an Aboriginal language, a structured English course forms an integral part of the bilingual program. Other aspects of Aboriginal education are covered in the TAFE section.

Darwin Community College

The College was opened in 1974 and is an autonomous, multi-purpose institution. It has Schools of Business and Administration, General Studies, Creative and Applied Art, Technology and Science, Trades, and Australian Linguistics. As well as courses at Advanced Education and TAFE levels leading to awards, the College provides a wide range of non-award recreational classes. It provides examination facilities and some tutorial assistance to external students in the N.T. studying at other Australian institutions, through the N.T. External Studies Centre at the Casuarina Campus. The College is divided into three campuses: the main one at Casuarina; the School of Australian Linguistics at Batchelor; and an annexe of the Division of Extension Services at Nhulunbuy. Annual enrolment is 7,500.

Vocational Training

The N.T. Industries Training Commission after amendment to legislation in December 1982, which came into effect in February 1983, is now known as the N.T. Vocational Training Commission. The amendment also transferred the formulation of policy and planning for technical and further education from the Department of Education to the Commission.

The Commission has a tripartite membership of employer, employee and Government representation. Functions include manpower planning, labour market research, supervision and development of apprentice training courses, co-ordination of and policy and planning for technical and further education, accreditation of technical and further education courses, policy and planning for Aboriginal employment and training, industry liaison and promotion of industry training.

Technical and Further Education

Aboriginal Adult Education. Most large Aboriginal communities have an Adult Educator who relates to adults in the community and arranges non-formal programs which he or local part-time instructors and visiting lecturers teach.

Communities are developing more confidence in the management of their own affairs. There is thus a growing demand for Adult Education requiring a co-ordinated effort on the part of all agencies offering Adult Education services.

Community College of Central Australia. Prior to 1 July 1979, this college was a campus of Darwin Community College. It offers electrical and aircraft engineering licences, apprenticeship, business, secretarial, tourism, hospitality, Aboriginal development, technology, art, matriculation and preparatory studies, non-credit refresher, recreational and general education courses and a tutorial program for degrees, diplomas and certificates from Warrnambool Institute of Advanced Education, Darwin Community College and the South Australian Department of Technical and Further Education.

Katherine Rural College began teaching in 1979 and is residential. It offers a one year and a two year full-time Certificate course in Rural Studies and short courses such as power saw maintenance, water conservation and use, helicopter mustering and horse shoeing.

Batchelor College is a residential institution providing programs for Aboriginal people leading to teacher education qualifications at advanced education and TAFE levels.

Adult Migrant Education Centre supersedes Adult Migrant Education Service courses and provides courses for on-arrival migrants and adult migrants preparing to enter the work force.

Health

At the start of 1979 the Northern Territory Government assumed responsibility for the provision of the Territory's health services from the Commonwealth.

Hospitals are located at Darwin, Alice Springs, Katherine, Tennant Creek and Gove.

Schools of general and midwifery nursing are operated at Royal Darwin Hospital whilst a training school for enrolled nurses is conducted at Alice Springs Hospital.

In the urban areas of Darwin, Katherine, Tennant Creek, Alice Springs and Gove, community health centres have been established to provide a full range of community and public health services. A number of rural health centres have also been established in smaller communities, providing a range of services appropriate to the size and nature of the community concerned.

Dental clinics are located in the main urban centres and are progressively being extended to the smaller communities. Rural areas are serviced regularly by mobile teams from the urban centres. The school dental service now covers all pre school and primary school children in urban areas and is being extended to rural areas by inclusion of School Dental Therapists in mobile teams and the increasing involvement of Aboriginal Health Workers in the program. An oral health program has been established at secondary schools to complement the primary schools service.

The Air Medical Service operates in all areas of the Northern Territory using a combination of charter, and commercially scheduled services, Royal Flying Doctor Service, and Government owned Nomad aircraft.

Health services to Aboriginal communities are provided by departmental staff, doctors, nurses and Aboriginal Health Workers either directly employed by the Department of Health or through Grants-in-Aid

The training of Aboriginal Health Workers is carried out at the Katherine Institute for Aboriginal Health and training schools in Gove and Alice Springs. Both basic and post basic modules in Aboriginal Health Worker training are now available.

Extended Care Services encompasses all of the health services that are required by the aged and the disabled of all ages. It incorporates Geriatric Medicine, Rehabilitation, and aspects of the Community Health Program. This service serves the population of a defined geographical area and is one of the components of an Area Health Service.

A public health service is provided throughout the Territory by Health Inspectors located in the major urban areas who make regular visits to outlying areas.

The Northern Territory Drug and Alcohol Bureau services the Northern Territory Drug and Alcohol Advisory Committee and its associated regional drug and alcohol groups. The Bureau coordinates the activities of the many Government and non-Government organisations which have a role in the control of drug and alcohol problems in the Northern Territory, making policy recommendations to these bodies.

Other services provided are the conduct of drug education programs and a program of mosquito control and research aimed at prevention of outbreaks of Australian Encephalitis. Both of these activities are subsidised by the Commonwealth Government.

Finance

The following table gives details of government receipts and outlays that have been identified as relating specifically to the performance of local or State-type functions in the Northern Territory for 1980-81 and 1981-82. Receipts collected in the Northern Territory from Australia-wide sources (e.g. income taxes, customs duties, etc.) and outlays in the Northern Territory on items of a national character (e.g. defence, civil aviation and cash benefits paid to Northern Territory residents as part of national programs) are not included.

In addition to transactions relating to the Northern Territory in the Consolidated Revenue Fund and certain trust funds the transactions of the following public corporations are included: Northern Territory Port Authority, Northern Territory Housing Commission, Northern Territory Electricity Commission, Jabiru Town Development Authority, Corporation of the City of Darwin, Corporation of the Municipality of Alice Springs, Corporation of the Municipality of Katherine and Corporation of the Municipality of Tennant Creek.

NORTHERN TERRITORY: OUTLAY AND RECEIPTS (5'000)

THE AUSTRALIAN CAPITAL TERRITORY

General description

The Constitution provides that the Seat of Government of the Commonwealth of Australia shall be in the State of New South Wales but distant not less than 160 kilometres from Sydney. After a number of alternative sites were considered, an area of 2,359 square kilometres lying approximately 320 kilometres south-west of Sydney was transferred to the Commonwealth as from 1 January 1911. A further 73 square kilometres at Jervis Bay were transferred as from 4 September 1915 to serve as a port for the Territory.

The primary responsibility for administering the Australian Capital Territory lies with the Department of Territories and Local Government, whose functions include the leasing and management of land, housing, public transport, forestry and municipal services. Education, public health and justice are the responsibilities of the Department of Education, the Capital Territory Health Commission and the Attorney-General's Department respectively. The National Capital Development Commission has the responsibility for the planning and development of the Canberra city area.

In 1974, the A.C.T. Advisory Council, which had been in existence since 1930, was replaced by the A.C.T. Legislative Assembly. The first Assembly was elected on 28 September 1974 and held its first meeting on 28 October 1974.

During 1979, the name of the A.C.T. Legislative Assembly was changed to the A.C.T. House of Assembly. The first election for the House of Assembly was held on 2 June 1979 and first meeting of the House of Assembly was held on 29 June. The Assembly is established by the *House of Assembly Ordinance 1936* which defines its role as follows:

'The Assembly may advise the Minister (for Territories and Local Government) in relation to any matter affecting the Territory including the making of new Ordinances or the repeal or amendment of existing Ordinances.'

The Assembly consists of 18 Members (9 from each of the electoral divisions of Canberra and Fraser) and its procedure is modelled on that of the House of Representatives. Its Members serve on a part-time basis.

The Assembly normally considers (and sometimes introduces) Ordinances which are proposed for the Territory. It also passes resolutions on matters affecting the Territory. It is represented on a number of boards, authorities and committees such as the Canberra Commercial Development Authority, the A.C.T. Electricity Authority, the A.C.T. Schools Authority, the Gaming and Liquor Authority, the Consumer Affairs Council and the Australian Constitutional Convention.

At 30 June 1983, the population of the Australian Capital Territory was 234,900. See also Chapter 6, Demography.

Works and services

Housing

The role of the Department of Territories and Local Government in the area of housing has changed significantly since 1930 when, as the Department of the Interior, it offered rental accommodation to all public servants in Canberra. The proportion of houses and flats in the Australian Capital Territory occupied by tenants of the Department of Territories and Local Government has fallen steadily from 79.7 per cent of total occupied houses and flats in 1954 to 58.3 per cent in 1961, 38.8 per cent in 1966, 28.1 per cent in 1971, 13.3 per cent in 1981 and 10 per cent in 1983; and then risen again to 13 per cent in 1984.

Although there has been a considerable increase in the proportion of home ownership in the Australian Capital Territory since 1954, the demand for public housing has continued to increase. At June 1979 there were 363 persons on the waiting list for public housing. There were 1,238 in 1980; 2,126 in 1981; 1,554 in 1982; 1,757 in 1983; and 2,141 in 1984. Housing resources have not been able to keep pace with the demand; therefore the allocation of rental accommodation and housing finance is now restricted on a means tested basis.

The Department of Territories and Local Government in conjunction with the National Capital Development Commission has endeavoured to expand public housing stock through annual building programs. In 1983-84 500 dwellings were commenced and it is expected that 650 dwellings will be commenced in 1984-85.

Both private and public home building activity has continued to expand in the Australian Capital Territory, especially in the area of Tuggeranong. At June 1984 there were 19,431 occupied dwellings in the Woden Valley and Weston Creek area, 23,052 in the Belconnen area, and 12,292 in the Tuggeranong area. The total number of occupied dwellings in the Australian Capital Territory at June 1984 was 77,017.

See also Chapter 19, Housing and Construction.

Municipal services

Since its establishment, Canberra has been developed as a garden city. City Parks Administration of the Department of Territories and Local Government manages urban parklands, gardens, sportsgrounds and rural picnic areas. The total area managed increased by approximately 280 hectares (ha) to 8,280 ha in 1983-84.

The Yarralumla Nursery, established in 1913, propagates trees and shrubs for use in development projects and as replacements in landscape maintenance. Plant production during 1982-83 decreased because of drought conditions by 10,000 plants to 250,000.

The Horticultural Services Unit provides horticultural advice and trials turf grasses, trees, shrubs and new products and techniques for application in the Canberra environment.

Production

Lands

Reference has been made in earlier issues of the Year Book to the general conditions of land tenure in the Australian Capital Territory and to the area of alienated and leased land. The Agricultural Industry chapter in this Year Book contains statistical information on these subjects.

With minor exceptions the freehold estate of land in the Australian Capital Territory has been acquired by, and is vested in the Crown. The Seat of Government (Administration) Act 1910 prevents the sale or disposal of such Crown land for any estate in freehold except in the case of a contract that preceded the Act. Progressively the remaining areas of freehold land are being acquired.

Leases of land for residential, commercial and other purposes in the city area are usually granted under the City Area Leases Ordinance 1936. Some special leases for other purposes (such as diplomatic sites or churches) are granted under the Leases (Special Purposes) Ordinance 1925 or the Church Lands Leases Ordinance 1924 or the Leases Ordinance 1918 if for a short term or experimental land use. Some areas outside the city area not immediately required for the development of the City or for other public purposes or where there is no intention of development are leased for agriculture or grazing under the Leases Ordinance 1918. Under the A.C.T. Nature Conservation Ordinance 1980, 94,000 ha have been gazetted as Namadgi National Park.

The Commonwealth Territory at Jervis Bay, comprising about 7,360 ha, was acquired from New South Wales for the possible provision of port facilities in connection with the Australian Capital Territory. A portion of the area is occupied by the Royal Australian Naval College (H.M.A.S. Creswell) and a Royal Australian Navy airfield. Several blocks fronting Sussex Inlet plus an area on Bowen Island have been leased for guest houses and holiday camps, etc., under the Leases Ordinance 1918, and an area of land in the Murray's Beach area has been set aside for possible use as an atomic power station under the control of the Australian Atomic Energy Commission. An Aboriginal community is located at Wreck Bay. Approximately two thirds of the Territory is declared a Nature Reserve under the Public Parks Ordinance 1928. The reserved area and adjacent land managed in sympathy with the Reserve includes picnic and camping areas, afforestation and soil conservation activities and an annex to the National Botanic Gardens.

Forestry

Forestry field operations in the Australian Capital Territory began in 1915 with the planting of pines on the denuded slopes of Mount Stromlo to arrest soil erosion and improve visual quality of the landscape. In 1926, a program for development of commercial forests was approved following a comprehensive review of the Territory's potential for forest development. Major reviews of this program were made in 1932, 1954, 1967 and 1983, always, however, retaining the basic policy of systematic conservation and development. Forestry operations including fire protection treatment were extended to some 44,500 ha of natural forest in the Cotter catchment and adjacent areas. The more productive stands in these areas were harvested extensively to provide timber for Canberra's post-war expansion and were subsequently treated to promote regeneration and protect the quality of water harvested.

The policy of forest management in the Australian Capital Territory has been formulated to cater not only for commercial timber production but also to provide recreation facilities and an attractive visual environment for the national capital and to protect the water supply.

The forest authority is charged with the management of some 46,000 ha of land in the Australian Capital Territory. Of this, some 18,000 ha carry native forest or woodland. As at 30 June 1984, the total area of coniferous plantations in the Australian Capital Territory and Jervis Bay was 15,600 ha nett. Of 220 ha at Jervis Bay, the majority consisted of *Pinus radiata* (Monterey Pine) and *Pinus elliottii* (Slash Pine). The plantations in the Australian Capital Territory consisted mainly of *Pinus radiata* and *Pinus ponderosa* (Yellow Pine). Total area of *Pinus radiata* was 14,600 ha.

In 1983-84 there was no commercial production of hardwood timber from the Australian Capital Territory and Jervis Bay. The volume of softwood cut was 177,000 cubic metres. The total value of this unprocessed timber unloaded at the mill (milldoor value) was \$6.04 million.

Agricultural and secondary industries

Since 1974-75 the number of agricultural establishments in the Australian Capital Territory has fallen from 142 to 95. In 1982-83 small amounts of wheat and oats for grain were grown and over 6,000 tonnes of meat (carcass weight) produced. Livestock numbers at 31 March 1983 included 10,168 cattle and 104,167 sheep.

Secondary industries established in the Australian Capital Territory are largely the service industries associated with the growth of the Territory.

AUSTRALIAN CAPITAL TERRITORY: MANUFACTURING ESTABLISHMENTS—1979-80 to 1981-82

	Unit	1979–80	1980-81	1981-82
Establishments operating during year	No.	112	117	126
Persons employed (a)	No.	3,132	3,316	3,451
Wages and salaries		37.2	44.9	49.4
Turnover	\$m	127.2	162.9	187.7
Opening stocks at 30 June	\$m	11.4	13.5	14.4
Closing stocks at 30 June	\$m	12.6	16.7	16.8
Purchases, transfers in and selected expenses		64.0	89.3	111.7
Value added		64.4	76.8	78.4

⁽a) Average over whole year. Includes working proprietors.

Commercial practices

The Consumer Affairs Bureau receives and investigates complaints from consumers about unfair commercial practices, conducts research into matters affecting consumer interests and provides information of benefit to consumers. The Bureau also provides advice to both landlords and tenants in relation to residential tenancies.

The Weights and Measures Office maintains the standards of mass, length and volume for the A.C.T. It periodically examines all scales and measures used for trade, and checks the weight or measures of packaged goods sold in retail premises. The Office also receives and investigates consumers' complaints in relation to weights and measures problems.

In the A.C.T. licensing is used as a means of regulating some commercial practices by establishing minimum standards of qualifications and/or experience for entry into certain occupations. These include motor vehicle agents; pawnbrokers and secondhand dealers. Licensing is also used in relation to the activities of all racing codes in the Territory.

The Co-operative Societies Ordinance 1939 provides for the incorporation of building societies, housing and service societies and credit unions. The Registrar is responsible for the incorporation of new societies, the registration of documents, inspections and inquiries into the working and financial situation of societies and the hearing and determination of certain disputes between a society and a member.

In Canberra there are two retail fruit and vegetable markets. These have been established, operated and controlled by the Canberra Retail Markets Trust. The establishment of a third market in the Tuggeranong Valley is being considered.

Transport and communication

The Department of Territories and Local Government is responsible for the regulation of transport and traffic under an A.C.T. Ordinance. ACTION, the Australian Capital Territory Internal Omnibus Network, is also operated by the Department of Territories and Local Government. It operated 377 buses in 1983-84 over 112 routes covering 1,275 kilometres. A total of 15,492,810 kilometres was travelled and 22,874,662 passenger journeys made.

There are six radio broadcasting stations currently in the Territory with the possibility of one new commercial licence and one community licence being granted in the near future: 2CY, 2CN and ABC-FM of the national broadcasting system; two commercial stations, 2CA and 2CC; and one community station, 2XX. There are three television stations, ABC Channel 3 of the national broadcasting system; Channel 0-28 of the Special Broadcasting Service and Australian Capital Television Pty Ltd (Capital 7), a Canberra based commercial station.

Social

See also Chapter 10, Health; Chapter 11, Law and Order; and Chapter 12, Education.

Schools

The Education Ordinance 1937 provides for the compulsory attendance at school of children between the ages of six and fifteen years. Government schools are administered by the A.C.T. Schools Authority, which became a Statutory body in January 1977. The Authority is representative of teachers, parents and the community. The A.C.T. Schools Accrediting Agency within the Authority system accredits courses and administers student assessment procedures for Years 11 and 12. These procedures replaced the New South Wales Higher School Certificate examination at the end of 1976.

In July 1984 there were seventeen government high schools in the Australian Capital Territory, and eight secondary colleges. High schools cater for Years 7 to 10 and secondary colleges for Years 11 and 12. Secondary students enrolled numbered 17,094.

Sixty-four schools provide courses at primary levels, three of these being in rural districts and one in the Jervis Bay area. The number of pupils enrolled in government primary schools at July 1984 was 22,428.

There are four government special schools in the A.C.T. with a total enrolment of 328 students. These schools cater for pre-school, primary and secondary school aged students who are physically or intellectually handicapped. There are two other Special Facility Establishments in the A.C.T., one providing schooling for hospitalised students, one catering for severely or profoundly intellectually handicapped students. The total enrolment at these facilities was 28 at July 1984. Mildly intellectually handicapped children are served by learning centres attached to nine primary schools and three high schools.

Special units for deaf children are available to three schools, blind children also receive specialised support. Children below school age with learning, sight or hearing problems receive assistance from specially-trained staff at pre-schools and in their homes.

Eleven primary schools cater for children of junior primary age who are unable to adjust to a normal class situation. One school caters for children with language and communication disorders. Educational guidance services are provided by two Education Clinics and through counselling staff attached to schools.

Special English classes for migrant children are available at fifty-three primary schools, sixteen high schools and seven secondary colleges. Three Introductory English Centres (two for primary, one for secondary aged pupils) cater for migrant children with little or no English. They attend for up to six months and then return to their neighbourhood school or college.

The seventy-three pre-schools provide facilities for 4,670 children between the ages of three and five years. Provision is made at all pre-schools for the additional enrolment of children who have minimal problems such as speech, behavioural and family problems.

In July 1984 there were twenty-two non-government primary schools in Canberra, eight schools offering both primary and secondary schooling and five schools with secondary grades only. There were 10,311 pupils enrolled in primary grades at non-government schools and 8,758 in the secondary grades at these schools.

A.C.T. Further Education

The Office of A.C.T. Further Education, which operates within the structure of the Department of Education and Youth Affairs, is responsible for the Technical and Further Education Colleges, the Canberra School of Art and the Canberra School of Music. The Office is also responsible for the A.C.T. Apprenticeship Board and for the co-ordination of the provision of Adult Migrant Education.

There are presently three TAFE Colleges in the A.C.T.: Canberra, Bruce and Woden. These Colleges provide trade, post trade, certificate, associate diploma, craft and leisure type courses at their main campuses and at several annexes. In the year ended 31 December 1983 there were 25,293 enrolments in A.C.T. TAFE Colleges.

The Canberra School of Art offers a Diploma of Arts (Visual), three years full-time study or part-time equivalent; an Associate Diploma of Arts (Visual), two years full-time study or part-time equivalent; and a Postgraduate Diploma, one year full-time study. It also provides art courses for students from the Canberra College of Advanced Education as well as non-vocational classes for the community in general. In the year ended 31 December 1983 there was 1,161 enrolments at the School.

The Canberra School of Music offers a Bachelor of Music, four years full-time study, and a Diploma of Music, three years full-time study. Courses for Canberra College of Advanced Education students and single study classes for part-time students are also offered. In the year ended 31 December 1983 there were 736 enrolments at the School.

It should be noted that enrolment figures here are course enrolments and are not adjusted for those students enrolled in more than one course at any time.

Other Tertiary Educational Institutions

The Canberra College of Advanced Education is administered by a governing Council constituted under an Act of Parliament and offers courses in six schools—Administrative Studies, Applied Science, Liberal Studies, Education, Information Sciences and Environmental Design. Courses have a professional or vocational orientation and lead to master and bachelor degrees, and associate and graduate diplomas. There were 5,129 students enrolled as at August 1984.

The Australian National University was established by an Act of Parliament and is administered by its governing Council. The Institute of Advanced Studies within the University is a centre for research and training in research. It includes the John Curtin School of Medical Research and Research Schools of Physical Sciences, Social Sciences, Pacific Studies, Chemistry, Biological Sciences and Earth Sciences. The faculties carry out both undergraduate and post-graduate training and research and are composed of the faculties of Arts, Asian Studies, Economics and Commerce, Law and Science. The total student enrolment as at August 1984 was 6,194.

The University has established the following centres: Centre for Resource and Environmental Studies; Humanities Research Centre; North Australia Research Unit (based in Darwin); Centre for Continuing Education; Peace Research Centre; Office for Research in Academic Methods; and the National Health and Medical Research Council Social Psychiatry Research Unit and Health Economics Research Unit.

Continuing education

The Centre for Continuing Education, which is run by the Australian National University, is intended to foster 'the learning society' by enriching the contacts between the university and the community to their mutual advantage. The Centre offers a wide range of courses in the natural and social sciences and the humanities.

Evening classes in the A.C.T. are provided at two high schools and four secondary colleges as a continuing education service by the A.C.T. Schools Authority. Enrolments in evening classes in July 1984 numbered 2,786, of which 1,488 were enrolled in recreational classes. Evening classes offer courses leading to the award of a certificate of entry to post-secondary and tertiary institutions as well as a variety of craft and cultural courses.

Apprenticeship training

The A.C.T. Apprenticeship Board, a Statutory Authority, is responsible for supervision over the practical and theoretical training of apprentices in the Australian Capital Territory.

At 30 June 1984, 1,239 indentured apprentices were in training in 54 declared apprenticeship trades in the Australian Capital Territory. They were employed by about 750 employers who had been approved to train. During 1983-84 the Board received 1,107 applications for apprenticeship.

New indentures totalling 480 were registered, an increase of 4.1% over new indentures for 1982-83. 347 apprenticeships were completed and 187 cancelled.

Adult migrant education

The Office of A.C.T. Further Education, on behalf of the Department of Immigration and Ethnic Affairs, is responsible for the Adult Migrant Education Program in the A.C.T. All classes are free and they are open to migrants who are permanent residents of Australia.

The language program is organised in two strands, an on-going strand for migrants who have been in Australia for some time and an on-arrival strand for newly arrived migrants. As part of the on-going program part-time classes are offered at different levels and at various times in the day and evening. A more intensive part-time course, aimed primarily at unemployed migrants whose lack of proficiency in the English language is prejudicing their employment prospects, is available as is a full-time accelerated English course lasting ten weeks.

As well, English classes are provided in the work place either partly or wholly within working hours. Migrants who are unable to attend classes may undertake a correspondence course, or have a tutor visit them in their own homes.

The on-arrival strand of the program caters for migrants who have arrived in Australia within the previous twelve months. The courses offered provide an introduction to Australian society and way of life as well as a basic English language instruction. On completion, students are encouraged to enrol in part-time classes.

All migrants attending full-time courses are eligible to receive a living allowance subject to a means test.

Employment Advisory Committee

The Government established an Employment Advisory Committee in September 1983 to advise the Minister on A.C.T. employment issues and to recommend employment creation proposals to be funded under the CEP.

Community Employment Program (CEP)

During 1983-84 the CEP provided funds of \$6.45m for job creation in the A.C.T. A further amount of \$3.28m was provided from contributions by the Department of Territories and Local Government and by project sponsors. In the community sector 100 projects were recommended to create 219 job opportunities. In the Territorial sector 47 projects were recommended and 337 jobs created. The average duration of these jobs is 45 weeks—the longest in Australia.

Tourism

Tourism is important to the A.C.T. economy and in the planning and development of the Capital. The number of visitors per annum now exceeds 3 million and their expenditure in the Territory and Queanbeyan \$200 million. It is estimated tourism sustains employment for 7,000 people in the district.

The official tourist servicing and promotional operation in the A.C.T. is provided by the Department of Territories and Local Government through the Canberra Tourist Bureau. Planning and development of physical facilities remain the responsibility of the National Capital Development Commission.

The Bureau operates a highway reception and information centre on the northern (main) gateway to the city, and branch offices in Sydney and Melbourne. Total operational costs, including salaries and overtime, will approximate \$1,720,000 in 1984-85.

Tourist features in the A.C.T. most partronised are the Australian War Memorial, the Black Mountain Telecommunication Tower, the High Court of Australia, Parliament House, the National Library, the Australian National Gallery, the Royal Australian Mint, and the mountain lookouts and reserves.

The most important attraction under construction is the new and permanent Parliament House. The endpapers and frontispiece of this year book depict aerial views of the project, as well as an impression of the interior design.

Finance

In the following table, identifiable receipts and outlay relating to the Australian Capital Territory have been classified in a National Accounts form. The table covers transactions of the Commonwealth Government in respect of the Australian Capital Territory in the Consolidated Revenue Fund and the following trust funds: Australian Capital Territory Forestry, Australian Capital Territory Housing, Australian Capital Territory Transport and Australian Capital Territory Suspense. In addition, details of the financial transactions of the following public corporations are also covered: Australian Capital Territory Electricity Authority, Commonwealth Brickworks (to September 1979), Canberra Retail Market Trust, National Capital Development Commission, the Canberra Theatre Trust, the Canberra College of Advanced Education, A.C.T. Gaming and Liquor Authority, Canberra Commercial Development Authority and the Capital Territory Health Commission including the Canberra and Woden Valley Hospitals. Not included are revenue derived by the Commonwealth Government from income taxes, sales tax, etc., levied in the Australian Capital Territory; outlay on items of a national character such as defence, civil aviation, railways, etc.; and payments to residents from the National Welfare Fund.

NORFOLK ISLAND

General description

Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29°02'S, longitude 167°57'E approximately. Its total area is approximately 3,455 hectares, the island being about 8 kilometres long and 5 kilometres wide. It is 1,676 kilometres from Sydney and 1,063 kilometres from Auckland. The coastline, which is 32 kilometres long, consists of almost inaccessible cliffs rising from the waters edge, except at Kingston in the south and the landing place at Cascade on the northern side. The climate is equable, the average daily maximum temperature varying between 16°C and 28°C, and the average annual rainfall is 1,350 millimetres. The resident population is about 1,800.

The island served as a penal station from 1788 to 1813 and from 1825 to 1855. In 1856, 194 descendants of the *Bounty* mutineers were transferred there from Pitcairn Island. See photo page 7.

Administration

In 1856, the Island was created a distinct and separate settlement under the jurisdiction of the Governor of New South Wales. In 1897 it was made a dependency under the Governor of that Colony, and finally, by the passage of the *Norfolk Island Act 1913*, became a Territory of Australia.

In May 1978 the Government announced that it should try to develop for Norfolk Island a form of Government involving the Island's own elected representatives under which the necessary revenue could be raised by its own system of law. The Norfolk Island Act 1979, which was assented to on 30 May, established the framework for this objective. In broad terms, the Act equips Norfolk Island with responsible legislative and executive government to enable it to run its own affairs to the greatest practicable extent. Wide powers are exercised by the Norfolk Island Legislative Assembly and by an Executive Council, comprising the executive members of the Legislative Assembly who have ministerial-type responsibilities. The Act preserves the Commonwealth's responsibility for Norfolk Island as a Territory under its authority, with the Minister for Territories and Local Government as the responsible Minister; and indicates the Parliament's intention that consideration will be given to an extension of the powers of the Legislative Assembly and the political and administrative institutions of Norfolk Island within five years.

The Office of the Administrator is financed from Commonwealth expenditure which amounted to \$198,000 in 1983-84. A further \$301,000 was provided by the Commonwealth during the year for the restoration and maintenance of historic structures.

Economic activity

The major economic activity of the island is tourism. Primary production is not fully adequate for local needs and foodstuffs are imported from New Zealand and Australia.

Primary industries. The soil on the island is particularly fertile, the climate equable and the rainfall fairly evenly distributed except for a pronounced dry period in November. This enables a wide range of temperate and semi-tropical products to be cultivated. However, the island's comparative isolation presents trading difficulties, and there is only very limited production of export crops.

Fish abound off the island. In the past a number of ventures have been formed to exploit this resource, but they have been short-lived, mainly because of the lack of a sheltered harbour. A modern whaling station was started on the island in 1955, and production commenced during the second half of 1956. Owing to a marked scarcity of whales after 1961 the station was closed down.

A forestry program is being carried out to increase the resources of Norfolk Island Pine and to introduce suitable types of eucalypts.

Tourists. Regular sea and air services to the island are available for those who seek a quiet holiday in surroundings of beauty and historic interest. At present, accommodation consists of flats and hotels as well as licensed and unlicensed guest houses.

Employment. A large proportion of the population derives its income from various aspects of the tourist industry including the operation of hotels and low duty stores. The Commonwealth Government provides service through staff from the Departments of Aviation and Science and Technology (Bureau of Meteorology). A number of clerical and other positions are available to islanders in the Norfolk Island Administration. Very few people rely entirely on agricultural pursuits for their income.

Trade, transport and communication

Imports to Norfolk Island since the 1939-45 War have risen from \$65,000 in 1945-46 to over \$15 million in 1983-84. The major proportion came from Australia and New Zealand. Exports in 1983-84 amounted to \$2.1 million, mainly to Australia and New Zealand, the principal markets. No duties are chargeable on goods imported into Australia from Norfolk Island if (i) the goods are produced or manufactured in Norfolk Island and shipped direct to Australia, and (ii) not goods which, if manufactured or produced in Australia, would be subject to excise duty.

One shipping company operates a service to Norfolk Island at approximately monthly intervals, linking the island with Australia, New Zealand and other islands in the South Pacific area.

A passenger and air freight service between Sydney and Norfolk Island is operated by East-West Airlines Ltd. 4-6 times a week. Air New Zealand Limited provides a service 2-3 times a week to the island from Auckland. Flights between Norfolk and Brisbane are operated by Air New South Wales 2-3 times a week and by Norfolk Island Airlines 2-4 times a week.

There are approximately 80 kilometres of motor roads on the island. A substantial section of the population possesses private motor cars. Hire cars, taxis and scooters are available.

The island has an automatic telephone exchange and international telephone connection with Australia, New Zealand and Fiji by way of the ANZCAN submarine cable system. A local broadcasting service is operated by the Administration.

Education

Education is free and compulsory between the ages of 6 and 15 years. The school, which is conducted for the Administration by the New South Wales Department of Education, conforms to the Australian standard of public education, ranging from Kindergarten to the School Certificate (Year 10) level. The number of students enrolled at 30 June 1984 was 297.

Some bursaries, subject to a means test, are available for pupils who wish to attend a mainland school either to continue their studies beyond the School Certificate level or to undertake high school courses not available on the island. A limited number of trainee scholarships are available for pupils who have left school and wish to undertake apprenticeships or similar training away from the island.

Judiciary

The judicial system of Norfolk Island consists of a Supreme Court and a Court of Petty Sessions. The Supreme Court is the highest judicial authority in the Territory and is a superior court of record with original criminal and civil jurisdiction. The jurisdiction of the court is exercised by one judge sitting in court or, to the extent that in the cases provided by or under ordinance, sitting in chambers. The jurisdiction of the Court of Petty Sessions is exercised by the Chief Magistrate or any three magistrates other than the Chief Magistrate.

Finance

Until 1979 Norfolk Island revenue was supplemented by annual grants from the Commonwealth Government. Under present constitutional arrangements the cost of maintaining the island, other than the Administrator and his staff, is met as far as practicable from Island sources.

HEARD ISLAND AND McDONALD ISLANDS

These islands, about 4,100 kilometres south-west of Fremantle, were transferred from the United Kingdom to Australia as from 26 December 1947. The laws of the Australian Capital Territory were declared to be in force in the Territory of Heard Island and McDonald Islands by the Heard and McDonald Islands Act 1953. In 1968, the responsibility for the administration of this Act was transferred from the Minister for External Affairs to the Minister for Supply, and in 1972 the responsibility was transferred to the Minister for Science and Technology.

In December 1947, an Australian scientific station was established on Heard Island. Meteorological investigations were conducted until the station was closed in March 1955 following the establishment of Mawson station on the Antarctic mainland. Australian expeditions have since visited the Island from time to time. Heard Island is about 43 kilometres long and 20 kilometres wide. The McDonald Islands are 43 kilometres to the west of Heard Island. They are small, rocky and precipitous. The first known landing on McDonald Island, the largest of the group of the same name, took place on 27 January 1971 when two members of the Australian National Antarctic Research Expeditions (ANARE) paid a short visit on their way to the Heard Island station.

AUSTRALIAN ANTARCTIC TERRITORY

An Imperial Order in Council of 7 February 1933 placed under Australian authority all the islands and territories other than Terre Adelie situated south of 60°S latitude and lying between 160°E longitude and 45°E longitude. The Order came into force with a Proclamation issued by the Governor-General on 24 August 1936 after the passage of the Australian Antarctic Territory Acceptance Act 1933. The boundaries of Terre Adelie were definitively fixed by a French Decree of 1 April 1938 as the islands and territories south of 60°S latitude lying between 136°E longitude and 142°E longitude. The Australian Antarctic Territory Act 1954 declared that the laws in force in the Australian Capital Territory are, so far as they are applicable and are not inconsistent with any ordinance made under the Act, in force in the Australian Antarctic Territory. In 1968 responsibility for the administration of this Act was transferred from the Minister for External Affairs to the Minister for Supply, and in 1972 the responsibility was transferred to the Minister for Science. For map of Antarctica, see following page.

On 13 February 1954 the Australian National Antarctic Research Expeditions (ANARE) established a station on Mac-Robertson Land at latitude 67° 36'S and longitude 62° 53'E. The station was named Mawson in honour of the late Sir Douglas Mawson and was the first permanent Australian station to be set up on the Antarctic continent. Scientific research (including meteorology, cosmic ray physics and glaciology) is conducted at Mawson, which is also a centre for coastal and inland survey expeditions.

A second Australian scientific research station was established on the coast of Princess Elizabeth Land on 13 January 1957 at latitude 68° 35'S and longitude 77° 58'E. The station was named in honour of the late Captain John King Davis, second-in-command of two of Mawson's expeditions and master of several famous Antarctic ships. The station was temporarily closed on 25 January 1965 and re-opened on 15 February 1969. On 4 February 1959 the Commonwealth Government accepted from the United States Government custody of Wilkes station, which was established by the United States on 16 January 1957 on Vincennes Bay at latitude 66° 15'S and longitude 110° 32'E. The station was named in honour of Lieutenant Charles Wilkes who commanded the 1838-42 United States expedition to the area. The station was closed on 19 February 1969 when activities were transferred to Casey station built about 2 kilometres south of Wilkes. Casey station, which was opened on 19 February 1969, was named in honour of Lord Casey, former Governor-General of Australia, in recognition of this long association with Australia's Antarctic effort.

In 1981-82 a ten-year program for redeveloping Australia's Antarctic stations began and is now well advanced. The stations act as bases for mounting inland programs and provide basic facilities for weather observations, communications and research.

The highest priority for research relates to the study of living and mineral resources of the Antarctic continent and off-shore areas and the environmental effects of their exploration and exploitation.

ANTARTICA

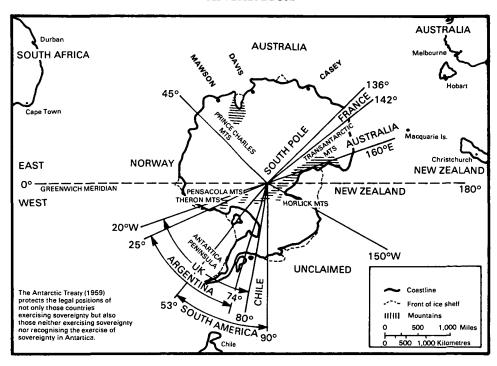

PLATE 51

Australia's Antartic Territory covers some 6 million square kilometres—about the combined size of Western Australia, Queensland and the Northern Territory, and comprises approximately three sevenths of the Antarctic continent.

COCOS (KEELING) ISLANDS

General description

The Territory of the Cocos (Keeling) Islands comprises a group of 27 small coral islands in two separate atolls in the Indian Ocean, 2,768 kilometres north-west of Perth.

West Island, about 10 kilometres long, is the largest. The Territory's administrative community, airport and animal quarantine station are located there. The Cocos Malay community lives on Home Island.

The main atoll is low-lying, flat, and thickly covered by coconut palms, and surrounds a lagoon which has an anchorage in the northern part but which is extremely difficult for navigation.

The climate is equable and pleasant, usually being under the influence of the south-east trade winds for about nine months of the year. However, the winds vary at times, and meteorological reports from the Territory are particularly valuable for those engaged in forecasting for the eastern Indian Ocean. The temperature varies between 21°C and 32°C, and the average yearly rainfall is 1,998 millimetres. There are occasional violent storms.

History and administration

The islands were discovered in 1609 by Captain William Keeling of the East India Company, but were uninhabited until Alexander Hare and John Clunies-Ross established small settlements at different points on the main atoll in 1826 and 1827 respectively. Clunies-Ross secured sole possession in 1831 and the islands were declared part of the British Dominions in 1857. In 1878 responsibility for the supervision of the islands was transferred to the Government of Ceylon and eight years later, to the Government of the Straits Settlements.

In 1903 the islands were incorporated in the Settlement of Singapore but were attached again to Ceylon during the 1939-45 war while Singapore was under Japanese occupation.

By mutual agreement between the British and Australian Governments, and confirmed by complementary legislation, the islands became an Australian territory in 1955. The Australian Government purchased the Clunies-Ross interests in the Territory in 1978, except for the family home and grounds.

The Cocos (Keeling) Islands Act 1955 is the basis of the Territory's administrative, legislative and judicial systems.

An Administrator, appointed by the Governor-General and responsible to the Minister for Territories and Local Government, is the senior Government representative in the Territory.

On 25 July 1979 the Cocos (Keeling) Islands Council was elected by members of the Home Island community. The Council has responsibility for a wide range of functions in the Home Island village area, advises the Administrator on local affairs, and is also empowered to make representations on ordinances proposed for the Territory.

The Cocos Islands Co-operative Society Limited, also established in 1979, conducts the business enterprises of the Cocos people. The Co-operative undertakes copra production, building maintenance and construction, and stevedoring and lighterage services.

The Territory's own postal service, including a philatelic bureau, was opened in 1979. The service, run by the Administration, provides local employment and its profits are directed to the Cocos (Keeling) Islands Council for use on community projects.

On 6 April 1984 the Cocos Malay community, in an Act of Self Determination which took the form of a referendum observed by the United Nations, chose to integrate with Australia.

The population of the Cocos (Keeling) Islands at June 1984 was 584, distributed between Home Island (376) and West Island (208).

Transport and communication

There is an airport of international standard at West Island, controlled by the Administrator under licence from the Department of Transport. There is a weekly Perth-Christmas Island-Cocos (Keeling) Islands-Perth air charter service. A shipping service operates to the Territory every 6-8 weeks. A radio telephone service between West Island and Perth is maintained by the Administration. There are local postal and telephone services, and a non-commercial broadcasting station.

CHRISTMAS ISLAND

Christmas Island is an isolated peak situated in the Indian Ocean in latitude 10°25'S, longitude 105°40'E. It is approximately 360 kilometres south from Java Head at the south entrance to Sunda Strait, 1,300 kilometres from Singapore and 2,600 kilometres from Perth. Christmas Island covers an area of about 135 square kilometres. It consists of a central plateau about 150 to 250 metres above sea level with several prominent rises up to 360 metres high. The plateau descends to the sea in a series of steep slopes alternating with terraces. Sea cliffs over 20 metres high run along a considerable portion of the coastline except in a few places, the chief of which is Flying Fish Cove where the principal settlement is located and which is also the only anchorage.

The climate is pleasant, with prevailing winds coming from the south-east to east-south-east from May to December, and occasionally shifting round to between north and west from December to April (the wet season). The average yearly rainfall is about 2,673 mm with a marked summer incidence. The porous nature of the ground prevents the formation of pools of water, but there are several good springs which maintain an adequate supply of fresh water for the population of some 3,000 people and for the mining operations. The mean average temperature is about 27°C, and does not vary greatly throughout the year.

Economy

The economy of the Territory is based almost entirely on the mining and extraction of phosphate. During the year ended 30 June 1984, 772,000 tonnes of phosphate rock were sent to Australia and New Zealand, while 341,000 tonnes were exported elsewhere. Mining operations on Christmas Island are conducted by the Phosphate Mining Company of Christmas Island, Ltd (PMCI) which is wholly owned by the Australian Government. To minimise the impact of mining on the environment, a program of land rehabilitation has been adopted and a nursery is maintained for reafforestation.

Population

Some 3,214 people (2,078 males, 1,136 females) were residents of the Island at 30 June 1983. There is no indigenous population. Under the provisions of the Christmas Island Act and the Citizenship Act almost all residents are Australian citizens or have permanent Australian resident status.

Education

The Christmas Island Area School provides pre-school, primary and secondary education, based on the Western Australian curriculum. The Christmas Island Technical School conducts trades and commercial courses, and provides adult education classes and supervision of correspondence courses from the Western Australian Education Department's Technical Extension Service. Over 600 students are enrolled at the Area School.

History and administration

Summarised particulars of the history of Christmas Island up to its administration by the United Kingdom as a separate Crown Colony (from 1 January 1958, pending transfer to Australia) are given in Year Book No. 51, page 141, and in earlier issues. On 1 October 1958 the island was transferred to Australia by the Christmas Island Act 1958. The Territory is administered by an Administrator appointed by the Governor-General. Responsibility for the administration and government of the Territory rests with the Minister for Territories and Local Government and the Administrator administers the Territory in accordance with instructions given to him by the Minister. The laws which were in force on the island at 30 September 1958 were continued as the laws of the Territory after its transfer to Australia.

The Christmas Island Administration (Miscellaneous Amendments) Act received Royal Assent on 18 October 1984. The Act provides for the extension of the Commonwealth Electoral Act, Social Security Act, National Health Act, Student Assistance Act and related relevant Acts to Christmas Island. Following passage of the legislation, normal social security and health benefits apply with effect from 1 October and Australian citizens are entitled to vote in federal elections and referendums. Amendment of the Christmas Island Act 1958 will enable ordinances to be made to regulate the use of land occupancy.

Transport and communication

Sea transport to and from the Island is maintained by vessels operated under charter by the phosphate manufacturers and the PMC1.

An air charter arranged by the Department of Territories and Local Government provides a weekly service to the island following a route Perth-Christmas Island-Cocos (Keeling) Islands-Perth. The PMCI operates a weekly air charter between Singapore and the island.

The Territory has its own radio broadcasting station, police force, postal service and philatelic bureau. A radio-telephone and teleprinter service operates between the island and the mainland, and links with Singapore and ships at sea.

CORAL SEA ISLANDS

The Coral Sea Islands Territory comprises scattered reefs and islands, often little more than sandbanks, spread over a sea area of 1,035,995 square kilometres with only a few square kilometres of land area. The territory lies between the Great Barrier Reef and longitude 157°10'E and between latitude 12° and 24°S. Some of the better known islands in the Territory are Cato Island, Chilcott Islet in the Coringa Group and the islands of the Willis Group.

The islands, or cays, are formed largely of coral and sand and some have a cover of grassy or scrub-type vegetation. Large populations of sea birds nest and breed in the area.

The Lihou Reef and Coringa-Herald National Nature Reserves, declared on 3 August 1982, provide protection for the wide variety of wildlife in these areas.

History

About one hundred years ago guano workers camped on a number of the islands. They were there to collect manure deposited by the sea birds. However, isolation, a lack of permanent fresh water, and the limited size of the islands, discouraged any further occupation.

The Commonwealth Government based its claim to the Coral Sea Islands on numerous acts of sovereignty since early this century and asserted its sovereignty by enacting the *Coral Sea Islands Act 1969* (which declared the Coral Sea Islands to be a Territory of Australia).

Installations

A lighthouse has been erected on Bougainville Reef and beacons operate on the Frederick and Lihou Reefs. A three-man meteorological station has provided a service on Willis Island since 1921 and there are eight automatic weather stations scattered throughout the Territory.

Most of the islands have been surveyed and the area is visited regularly both by Royal Australian Navy vessels and maintenance vessels of the Bureau of Meteorology.

Administration

By ordinance the laws of the Australian Capital Territory apply in the Coral Sea Islands Territory. The Minister for Territories and Local Government is responsible for matters affecting the Territory.

ABS Publications

Northern Territory Statistical Summary (1306.7) Australian Capital Territory Statistical Summary (1307.8)

Other Publications

Information additional to that contained in ABS publications is available in the Annual Reports of the Administrations of the various Territories.

STATISTICAL SUMMARY: AUSTRALIA

In earlier issues of the Year Book, it was the practice to include in the Statistical Summary figures for every tenth year of the period 1861 to 1901, plus the latest year for which data were available. In each subsequent issue, the latest year available was substituted for the year immediately preceding it until the next tenth year had been reached, and the earliest year in the series was eliminated as space was needed. In consequence of this system, no single issue of the Year Book contained a continuous yearly series.

In recent issues of the Year Book, this defect has been remedied in part by the inclusion of a continuous series back to the year 1949 where possible, with earlier tenth years back to 1901. In this issue of the Year Book the time series has been altered to show a continuous series back to 1959 where possible, with earlier tenth years back to 1901. In issue No. 39, pages xxviii–xxix, some of the series are shown for every tenth year from 1861 to 1941. There are, however, discrepancies between the original series and the series now published.

Breaks in series, preliminary figures, etc., are indicated by the symbols on page xvii of this Year Book.

(a) At 31 December. (b) Net Overseas migration component used in population estimates. Prior to 30 June 1971, net migration includes discrepancies disclosed by the various censuses and is based on the excess of all arrivals over all departures. From 30 June 1971, net migration is defined as the excess of overseas arrivals over overseas departures classified a spermanent and long-term (greater than one year). From 30 June 1976, net migration consists of net permanent and long-term movement and an adjustment for the net effect of changes in travel intentions which affect the categorization of movements. (c) Number per 1,000 of mean population. (d) Includes decrees made absolute and nullities of marriage up to and including 1946. From 1947 excludes nullities of marriage. (e) Number per 1,000 live births. (f) Excluses movements of defence personnel from September 1939 to June 1947. (g) Includes Aboriginals. (h) Figures for 1971 and later years are based on the estimate resident population introduced after the 1981 Census. Populations and rates for 1976 to 1981 have been recalculated using final 1981 Census results. (f) Introduction of Family Law Act.

1984									

(a) Previously child and student endowment. (b) At 30 June. (c) Wives' allowance commenced on 8 July 1943 and was replaced by wives' pension on 5 October 1972. (d) Includes expenditure on additional pension/benefit for children. (e) Five 12-weekly payments made during the year instead of the normal four. (f) Less than \$0.05 million. (g) Does not include \$22,714,000 paid in respect of family allowance payday 3 July 1979. (h) Estimate used for Western Australia. (l) Includes \$22,714,000 paid during 1978-79 in respect of family payday 3 July 1979. (j) Estimated. (k) National Welfare Fund items only, including expenditure for all years on pensions, benefits, etc. which subsequently became payable from the National Welfare Fund. In addition to the items shown in the preceding columns, the tables include expenditure on—the rehabilitation service; milk for school children; tuberculosis compaign; sickness, special and funeral benefits and some miscellaneous welfare and health services. Excludes war and service pensions, telephone rental concessions for pensioners and some minor welfare and health services. (l) Medical benefits applicable to the period 1976-79 were funded from both National Welfare fund and consolidated revenue.

(a) Includes Fishing.

(b) Included in Forestry.

The classification categories 'Pastoral', 'Dairying', 'Poultry' and 'Bee-farming' employed in the previous table have been replaced by a more appropriate commodity classification. Direct comparison with figures for previous years is not possible.

(a) Excludes Northern Territory and Australian Capital Territory before 1 July 1964. (b) Average over whole year, includes working proprietors. (c) Excludes amounts drawn by working proprietors. (d) Value added in process of manufacture (i.e. value of output less value of materials and fuel used). (e) Year ended previous December. (f) Owing to variation in classification, effective comparison is not possible. (g) Direct comparison with figures for previous years are not possible (for details, see Chapter 17). (h) All manufacturing establishments owned by multi-establishment enterprises and single establishment manufacturing enterprises with four or more persons employed.

⁽a) Series commenced 1945-46. Partly estimated before July 1951, and excludes Northern Territory before July 1954. (b) Building by private contractors, government authorities and owner builders. (c) At 31 December, Base; year 1954=100, weighted average for 'wage' earners only. Excludes rural industry. Series replaced by Award Rates of Pay Indexes from September 1982. (d) At 31 December, Base; June 1976=100.0. Excludes ASIC Division A—Agriculture, forestry, fishing and hunting; ASIC sub-division 72—Defence forces and ASIC sub-division 94—Private households employing staff. This series shows index numbers for both wage and salary earners (i.e. all employees). (e) Base; year 1911=100. The index numbers are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are; from 1901 to 1914, the 'C' Series Retail Price Index; from 1946-47, to 1948-49, a composite of Consumer Price Index Housing Group (partly estimated) and 'C' Series Index excluding Rent; and from 1948-49 onwards, the Consumer Price Index. (f) Year ended previous December. (g) Value added from 1968-69. (h) Manufacturing census was not conducted. (i) November.

⁽a) Government and municipal trolley-bus services ceased in August 1969. (b) At end of period. (c) Open and closed light commercial type vehicles; utilities and panel vans, rigid and articulated trucks, other truck type vehicles and buses. (d) Letters, postcards, letter-cards, newspapers, packets, parcets, and registered articles. (e) All single lines plus one half the number of duplex lines. Until the introduction of duplex services in December 1948, statistics of exchange lines and telephone services were identical. (f) Telegrams despatched to places within Australia and despatched to or received from overseas. (g) Year ended previous December. (h) Year 1923-24. First year licences issued. (i) Tram passenger journeys only before 1942. (j) Excludes telegrams received from overseas. These particulars are no longer available. (k) Television viewer and broadcast listener's licences were abolished on 17 September 1974. (l) Excludes details for South Australia, which are no longer separately identifiable from the railway operations of the State Transport Authority. (m) Excludes details for Victoria and South Australia.
