Monthly Summary of Statistics

New South Wales

NOTES

SEASONALLY ADJUSTED INDICATORS

In most instances, the aim in compiling monthly or quarterly economic time series is to provide evidence of movement, in order to indicate the effects changing conditions are having on the activities being measured — and, in so doing, to signal what might be likely to occur in the near future. Seasonal adjustment is a technique designed to assist in these processes of analysis and interpretation by removing the estimated effects of normal seasonal variation from statistical series, so that the effects of other influences on the series may be more clearly recognised.

Details of the methods used in deriving the seasonally adjusted figures shown in this publication are given in the publication *Seasonally Adjusted Indicators* (1308.0), last issued in 1983 by the Central Office of the ABS.

Seasonally adjusted statistics are revised following revision to the original data and as additional data are brought into the analysis each year.

For series where one of the components and the total of the components have been seasonally adjusted (e.g. private dwellings and total dwellings), any figures derived by deduction (in the example quoted — government dwellings) do not amount to a formally seasonally adjusted series for the balance of the components.

.....

SYMBOLS AND OTHER USAGES

kWh	kilowatt hour
L	litre
MJ	megajoule
n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere specified
n.p.	not available for publication but included in totals where applicable
n.y.a.	not yet available
r	figure or series revised since previous issue
*	subject to sampling variability too high for most practical purposes
..	not applicable
—	nil or rounded to zero
—	break in continuity of series (where a line is drawn across a column between two consecutive figures)

NOTE: Monthly Summary of Statistics preliminary figures are not indicated by the symbol 'p'. All revisions, however, will be indicated by the symbol 'r'.

TABLES

Population and vital statistics

1	Estimated resident population	5
2	Births, deaths, marriages and divorces	6

Employment and unemployment

3	Labour force status of the civilian population aged 15 years and over	7
4	Labour force status of the civilian population aged 15 years and over, Sydney Major Statistical Region	9
5	Unemployed persons, number unemployed and unemployment rate	10
6	Unemployed persons, duration of unemployment	11
7	Employed civilian wage and salary earners, sector and full-time/part-time status	12
8	Employed civilian wage and salary earners, by industry division	13
9	Job vacancies	14
10	Overtime	14
11	Working days lost in industrial disputes, during the period	15

Wages and prices

12	Average weekly earnings of employees	16
13	Average retail prices of selected items, Sydney	17
14	Consumer price index	18
15	Price indexes of materials used in house building	19
16	Price indexes of materials used in building other than house building	20

Production

17	Coal production	21
18	Receipts of taxable wool, greasy wool basis	22
19	Wool sales at auction	23
20	Livestock slaughtered (for human consumption) and meat production	24
21	Production of food products	26
22	Production of textiles, clothing and footwear	27
23	Production of bricks, plastics and timber products	28
24	Production of electricity and gas	29

Building

25	Number of new dwelling units, by stage of construction	30
26	Number of dwelling units approved	31
27	Value of residential and non-residential building approved	32
28	Value of building work completed	33
29	Value of building work done, seasonally adjusted	33
30	Value of building approved, by class of building	34
31	Secured housing finance commitments to individuals for owner occupation	36

CONTENTS *continued*

(a) Statistics in this table relate to vital events which occurred in each quarter and year shown, and are registered up to the release of this publication. Because of late registrations, they are likely to be revised, particularly the most recent periods.

(b) Births and deaths statistics relate to events which occurred in Australia where the usual residence was within NSW.

(c) Deaths under one year of age.

(d) Number per 1,000 of estimated resident population at 30 June, or number of infant deaths per 1,000 live births.

(a) Sydney Major Statistical Region is equivalent to Sydney Statistical Division.

(b) The number of unemployed in each group expressed as a percentage of the labour force in the same group.

(c) The labour force in each group expressed as a percentage of the civilian population aged 15 years and over in the same group.

(a) Period from the time the person began looking for work or was stood down to the end of the reference week. Period of unemployment is recorded in complete weeks and this results in a slight understatement of duration.

(b) Average duration is obtained by dividing the aggregate number of weeks a group has been unemployed by the number of persons in that group.

(a) Full-time employees are permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

(b) Part-time employees are permanent, temporary and casual employees who are not full-time employees as previously defined.

NOTE: The tables on pages 12 and 13 contain estimates derived from the Survey of Employment and Earnings, an Australia-wide employer-based survey. Explanatory notes are contained in *Employed Wage and Salary Earners, Australia* (6248.0), which is issued quarterly and is available from the Sydney Office of the ABS. Estimates derived from the Survey of Employment and Earnings will differ from labour force estimates derived from the Monthly Population Survey for the reasons set out in the Information Paper *Comparison of Employment Estimates from the Labour Force Survey and the Survey of Employment and Earnings* (6263.0).

1997				
February	2.47	1.12	7.16	15.71

(a) Overtime is time worked in excess of award, standard or agreed hours of work for which payment is received. Overtime hours represent the number of hours of overtime paid for.

(b) The figures shown are based on the last pay period ending on or before the third Friday of the month shown.

(c) Calculated by dividing total overtime hours paid for in each group by the total number of employees in the same group.

(d) Calculated by dividing total overtime hours paid for by the number of employees who were paid for overtime.

(e) The number of employees who were paid for overtime as a percentage of the total number of employees.

(a) Working days lost refer to days lost by:

- (i) employees who were directly involved in the dispute, and
- (ii) employees who worked in establishments where stoppages occurred but were not themselves parties to the disputes; excluded is the time lost, as a result of the disputes, by employees in other establishments.

(b) Relates to industrial disputes involving a stoppage of work for a

minimum of 10 working days, regardless of the length of the stoppage, for example, 80 employees on strike for one hour. Disputes are classified by industry according to the Australian and New Zealand Standard Industrial Classification (ANZSIC). Disputes prior to January 1994 are classified by industry according to the Australian Standard Industrial Classification (ASIC).

(a) Supermarket sales

(b) From December quarter 1996 rice prices relate to long grain and are not comparable to previous quarters

(c) Eggs in Sydney have a net carton weight of 700g per dozen.

NOTE: Prices shown are the averages of prices for specified grades, qualities, brands, etc. charged by a number of selected retailers in Sydney. They should be regarded as no more than approximate indicators of price levels and price changes for the items concerned.
