SLAs are the smallest type of spatial unit of the Australian Standard Geographical Classification (ASGC) shown in this publication. Where applicable they have been aggregated to LGAs, which have in turn been aggregated to statistical divisions.

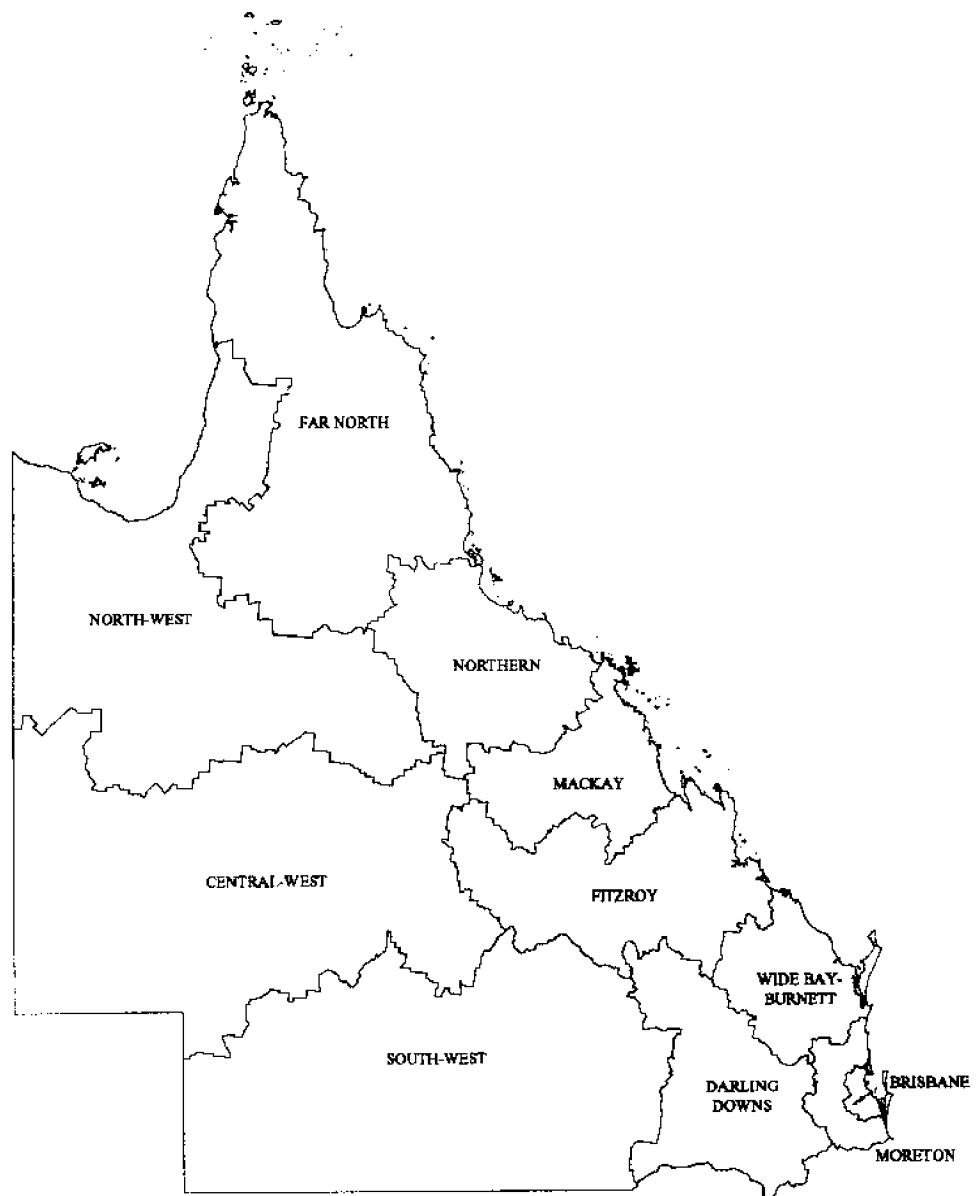

This cross-classification of the LGA structure with the statistical division level of the main structure of ASGC has required the combination of Brisbane and Moreton Statistical Divisions for some of the statistics shown as some LGAs cross the contiguous boundary of these two statistical divisions.

Maps showing statistical divisions, statistical subdivisions and statistical local areas are shown on pages 89 to 91.

Explanatory Notes are located at the back of this publication, commencing on page 82.

## STATISTICAL DIVISIONS IN QUEENSLAND

For the purpose of presenting the principal series of official statistics for the State, Queensland is divided into a number of geographical areas. These areas consist, for the most part, of aggregations of local government areas.

The primary division of the State is into 11 Statistical Divisions. These are intended to represent as far as possible 'regions' of the State which are characterised by discernible social and/or economic links between the inhabitants and economic units within them, under the unifying influence of one or more major cities or towns. The boundaries of the divisions have accordingly been delineated on the basic criterion that the degree of economic and/or social content and interaction within each division should be maximised. It should be emphasised that the boundaries of the divisions cannot be regarded as sharp lines of demarcation - they may, of necessity, be positioned within peripheral zones in which the influence of two or more 'focal' cities or towns overlap in varying degrees.

**BRISBANE AND MORETON  
STATISTICAL DIVISIONS**

## BRISBANE AND MORETON STATISTICAL DIVISIONS

Brisbane Statistical Division surrounds Moreton Bay and extends from Caboolture in the north to Ipswich in the west and Ormeau in the south. Moreton Statistical Division surrounds the Brisbane Statistical Division and takes in the Gold Coast and Sunshine Coast. The Brisbane and Moreton Statistical Divisions only accounted for 1.3% of Queensland's total area but 63.0% of the estimated resident population at 30 June 1994.

In 1993-94, crop production contributed half of the gross value of agricultural commodities produced in the Brisbane and Moreton Statistical Divisions and the region was Queensland's largest producer of vegetables and pineapples. During this period, the region also produced 22% of the gross value of Queensland's livestock products. At 31 March 1994, the region held 34% of Queensland's dairy cattle. Nurseries, fruit growing and poultry disposals also contributed significantly to the value of agricultural commodities produced.

Brisbane is the financial and administrative centre for Queensland. Brisbane also includes large retail and wholesale trade industries, hospitality and manufacturing industries. The Gold Coast region, in the Moreton Statistical Division, is based on the hospitality and retail trade industries and has significant property and business services industries. The Sunshine Coast region also has a significant hospitality industry.

**WIDE BAY-BURNETT  
STATISTICAL DIVISION**

## WIDE BAY-BURNETT STATISTICAL DIVISION

The Wide Bay-Burnett Statistical Division covers 52,392 square kilometres, 3% of the total area of Queensland. The Division had an estimated resident population of 216,140 persons at 30 June 1994 which represented 6.8% of the total Queensland population. While Wide Bay-Burnett Statistical Division is centred on Bundaberg, 368 kilometres north of Brisbane, the next most significant population centres are Hervey Bay, Maryborough, Gympie and Kingaroy.

Key industries in the region include agriculture, forestry, fishing and retail trade. There is a diversity of agricultural activities in the area. In 1993-94 crops contributed 58% of the gross value of agricultural commodities produced in the region. Sugar-cane is the major crop in the region and cereals for grain and vegetables are also significant crops. The region also accounted for 57% of peanut production and 27% of the area under orchard fruit growing in Queensland in 1993-94. Beef cattle, dairy cattle and pigs are also important agricultural industries. Tourism, particularly in Hervey Bay and on Fraser Island, is also a significant activity.

**DARLING DOWNS  
STATISTICAL DIVISION**

## DARLING DOWNS STATISTICAL DIVISION

The Darling Downs Statistical Division is to the west of Moreton Statistical Division, north of the NSW border. This Division covers 90,245 square kilometres of Queensland, representing 5.2% of the State. The Statistical Division had an estimated resident population of 203,591 persons at 30 June 1994 or 6.4% of the total State population.

The Condamine River and its tributaries flow through this rich pastoral and agricultural region which is bounded in the north-east by the Great Dividing Range.

Toowoomba City, approximately 138 kilometres west of Brisbane is on the eastern fringe of the Darling Downs Statistical Division and is the hub of commercial and industrial activity and the regional centre for higher education. Other major population centres in this Statistical Division are Warwick, Dalby, Stanthorpe and Chinchilla.

Agriculture is a key industry in the region. In 1993-94 the region was Queensland's largest producer of wheat, grain sorghum, barley and cotton. Vegetable growing and dairying also contributed significantly to the value of agricultural commodities produced. The value of livestock disposals in the Darling Downs Statistical Division over the same period was the highest in the State.

## SOUTH-WEST STATISTICAL DIVISION

The South-West Statistical Division covers 322,936 square kilometres, 18.6% of Queensland's total area. This Division had an estimated resident population at 30 June 1994 of 28,776 persons or just under 1% of the State's total population. The Statistical Division is situated on the South Australian and New South Wales border with the western part being desert receiving less than 150 millimetres of rain per annum. The main population centres are Roma, Charleville, St George and Cunnamulla.

Key activities in the region include wool growing and beef cattle grazing as well as cotton and grain growing. Oil and gas contribute significantly to the region while opal mining is also an important activity in the west of the Division.

**FITZROY  
STATISTICAL DIVISION**

## FITZROY STATISTICAL DIVISION

The Fitzroy Statistical Division covers 123,654 square kilometres (7.1% of Queensland's total area). The Division had an estimated resident population of 179,215 persons at 30 June 1994, representing 5.6% of the Queensland population. The region is bordered to the east by the Great Barrier Reef and offshore islands and to the west by the Carnarvon Ranges.

Rockhampton is the main city in this Division and lies on the Tropic of Capricorn and the Fitzroy River. Other significant centres of population are Gladstone, Blackwater, Emerald and Biloela. Gladstone is one of Queensland's major ports. In addition to being one of the world's largest coal ports, the port also handles significant amounts of bauxite, caustic soda, cement clinker, petroleum products and aluminium.

Key industries of the Fitzroy Statistical Division include mining, manufacturing, tourism, retail trade and agriculture. In 1993-94, 64% of the gross value of agricultural commodities produced in the region comprised livestock disposals and at 31 March 1994, the region held 17% of beef cattle in Queensland. Cotton and cereals for grain also contributed significantly to the value of agricultural production. The Fitzroy Statistical Division had the largest planting of sunflower in Queensland in 1993-94.

STATISTICAL DIVISION**

## CENTRAL-WEST STATISTICAL DIVISION

The Central-West Statistical Division covers 371,064 square kilometres (21.4% of Queensland's total area). The division is Queensland's least populated and had an estimated resident population of 13,083 persons at 30 June 1994, representing only 0.4% of Queensland's population. The largest population centre in the area is Longreach, approximately 700 kilometres west of Rockhampton. Blackall, Barcaldine and Winton are other major population centres in the region.

The key industries for the region are wool growing and cattle grazing.

# **MACKAY STATISTICAL DIVISION**

## MACKAY STATISTICAL DIVISION

Mackay Statistical Division covers 69,011 square kilometres (4% of total Queensland). The Mackay Statistical Division had an estimated resident population of 116,317 persons at 30 June 1994, or 3.6% of the Queensland population. The region is bordered to the east by the Great Barrier Reef and offshore islands. The main population centre of the area is Mackay. Other major population centres are Moranbah, Dysart, Sarina, Proserpine and Clermont.

The main economic bases of this division are sugar cane growing and processing, coal mining, cattle grazing and hospitality. The Mackay Port Authority handles the export of sugar and grain while the port of Hay Point handles much of Queensland's coal exports and is the world's second largest coal export port.

**NORTHERN  
STATISTICAL DIVISION**

## NORTHERN STATISTICAL DIVISION

The Northern Statistical Division covers 101,306 square kilometres (5.8% of total Queensland) and had an estimated resident population of 192,432 at 30 June 1994 (6.0% of Queensland's total population). The Northern Statistical Division is bordered to the east by the Great Barrier Reef and to the west by the Great Dividing Range. The population of the Division is centred in Townsville, the hub of commercial and industrial activity in the Division. Townsville is also the regional centre of government administration and higher education and is also important for its port trade. Other significant population centres in the division are Charters Towers, Ayr, Bowen and Ingham.

Key industries in the region are retail trade, manufacturing, finance and insurance and property and business services. In 1993-94, the Northern Statistical Division had the highest proportion (19%) of the State's gross value for crops and was Queensland's largest producer of sugar cane for crushing. Vegetables and fruit growing were among other important crops. Livestock disposals also contributed significantly to the gross value of agricultural commodities produced.

**FAR NORTH  
STATISTICAL DIVISION**

## FAR NORTH STATISTICAL DIVISION

The Far North Statistical Division covers 267,645 square kilometres, 15.4% of Queensland's total area. The Division had an estimated resident population at 30 June 1994 of 195,763 persons which is 6.1% of the State's population. The Division is bounded to the east by the Great Barrier Reef and partially to the west by the Gulf of Carpentaria and it extends to Thursday Island in the north.

Cairns is the largest population centre in the area and is also the focus for much of the hospitality industry activity in the area. The other major population centres include Mareeba, Innisfail, Atherton, Port Douglas and Gordonvale.

The region has a wide variety of industries associated with it, dominated by the hospitality industry based in Cairns. Other significant industries include mining and agriculture with sugar cane, fruit growing, dairying and beef cattle farming the most significant activities. The Far North Statistical Division also accounted for 95% of Queensland's production of bananas in 1993-94.

## EXPLANATORY NOTES

### Definitions

**1** *Legal local government areas (LGAs)* as defined under the *Local Government Act 1936*, are spatial units which represent the geographical areas of incorporated local government councils, such as cities (C), towns (T) and shires (S).

**2** *Statistical divisions*, which are groupings of whole or partial LGAs, are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region.

**3** *Statistical districts* have been defined around selected urban areas to provide comparable statistics over a period of time. These districts, which are intended to contain the anticipated urban spread for at least 20 years, are generally defined as having a population of 25,000 or more and experiencing urban growth beyond the LGA boundaries.

**4** Data for some series shown in Tables 1 through 11 which are available for statistical districts are shown on pages 80 and 81.

**5** *Statistical local areas* are the smallest types of spatial units in the Australian Standard Geographical Classification (ASGC) for which data are shown in this publication. In general, they correspond to LGAs in non-urban areas or suburbs in major urban areas.

**6** The area in square kilometres of statistical areas is derived from digitised statistical boundaries.

**7** Data in this publication relate to the period 1991 to 1994-95, over which time there have been three versions of ASGC used. Each data set is presented according to the ASGC version current at the time of collection.

ASGC Edition 2.1 applies to Manufacturing and Retail. See relevant footnotes.

ASGC Edition 2.3 applies to Agriculture.

ASGC Edition 2.4 applies to Estimated resident population, Births, Deaths, Building, Business locations, Schools, Tourist accommodation, Local government and Motor vehicles on register.

(a) Population changes estimated at 30 June prior to the year of effect. (b) Year ended 30 June. (c) Less than 0.1 square kilometres. (d) Not included above.

**8** Estimated resident populations shown are based on the 1991 Census of Population and Housing counts adjusted for under-enumeration, as measured by a post-enumeration survey, plus the estimated number of residents temporarily overseas.

**9** Figures shown for births and deaths relate to the resident population of the area for which they are shown.

**10** Statistics of building work approved are compiled from: (a) permits issued by local government authorities in areas subject to building control by those authorities and (b) contracts let or day labour work authorised by Commonwealth, State, semi-government and local government authorities. Major building activity which takes place in areas not subject to the normal administrative approval processes (e.g. mining leases) is also included. The number of dwelling units created by alterations and additions to existing buildings, i.e. buildings other than dwellings, is not included.

**11** *Location.* A location is a physical unit of an establishment, usually of an unbroken physical area or site.

**12** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues the *Release Advice* (1105.0) on Tuesdays and Fridays which lists publications to be released in the next few days. Both the *Catalogue* and the *Release Advice* are available from any ABS office.

**Other services**

**13** Information may be available in other forms including floppy disk, compact disc, microfiche, photocopy, computer printout or clerically extracted tabulation. A charge will be made for providing statistics in these forms.

**14** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries may be made by telephoning Information Services on (07) 3222 6351, by personal visit to the 18th Floor, 313 Adelaide Street, Brisbane, by facsimile on (07) 3222 6283 or by writing to Information Services, ABS, GPO Box 9817, Brisbane Q 4001.

**15** ABS publications are available for reference at most university libraries and various public and TAFE libraries throughout Queensland.
