INTRODUCTION

This bulletin shows the numbers of males and females in each State and Territory of Australia as at the Census of 30th June, 1961, classified according to occupational status in conjunction with age and conjugal condition.

Particulars of each of the characteristics, occupational status, age, and conjugal condition, for Australia and for each State and Territory have been published separately in previous Census Bulletins. Amendments (of a minor nature) made during the card processing subsequent to those bulletins are incorporated in the present figures, which now supersede relevant figures shown in the earlier bulletins.

The cross-tabulations presented herein make it possible for the first time in the 1961 Census processing to show the numbers of married women in the work force. A brief review of this subject is presented below showing the position in 1961 compared with previous Censuses.

All of the tables in this bulletin exclude particulars of full-blood aboriginals.

A list of 1961 Census publications already issued appears at the end of this bulletin.

EXPLANATORY NOTES

In processing the 1961 Census data, an occupational status, age and/or conjugal condition were allocated prior to tabulation in each instance where this information was not stated.

The category "Not at Work" includes those who stated that they were usually engaged in work, but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work", therefore, do not represent the number of unemployed available for work and unable to obtain it.

MARRIED WOMEN IN THE WORK FORCE - AUSTRALIA

At the 1961 Census, 444,680 married women (including 39,148 women who were married but permanently separated, legally or otherwise) were recorded as being in the work force. This represented 42 per cent. of the total number of females in the work force. A comparison with Censuses since 1933 is given in the following table.

AUSTRALIA : MARRIED WOMEN IN THE WORK FORCE, CENSUSES, 1933-1961

Census	Total Females in the Work Force	Married Women in the Work Force (including Women Married but Permanently Separated, Legally or otherwise)	
	Number	Number	Per cent. of Total Females in Work Force
1933	599,068	66,000	11.02
1947	717,162	141,637	19.75
1954	845,402	289,932	34.30
1961	1,059,169	444,680	41.98

Between 1954 and 1961, there was an increase of 154,748 or 53.4 per cent. in the number of married women in the work force compared with an increase of 213,767 or 25.3 per cent. in total females in the work force. The largest increase (both numerical and proportional) in any age group was for married women aged 35-39 years, where the increase in the seven years 1954-1961 was almost 82 per cent. A comparison for all age groups is given below.
