INTRODUCTION.

This Bulletin contains an analysis, in summary form, of the population and dwellings of the Territory of Norfolk Island as enumerated at the Census of 30th June, 1961. It is one of a series of Census Bulletins for the States and Territories and for Australia as a whole being issued as information becomes available from the first phase of machine tabulation. The information herein may be subject to minor amendment on completion of later tabulations. A list of 1961 Census publications already issued appears at the end of this Bulletin.

In this Bulletin the population is classified according to age, conjugal condition, birthplace, period of residence in Norfolk Island of persons born outside Norfolk Island, nationality, religion, industry and occupational status. Dwellings are classified according to class, (i.e. private house, flat, etc.) and private houses according to number of rooms, number of inmates, material of outer walls, nature of occupancy, date of building, rent and facilities.

Each major table herein shows the numbers of males, females and persons or of dwellings according to one particular characteristic (e.g., age or conjugal condition of persons or number of rooms or inmates of dwellings). At a later stage the data in this Bulletin will be published in amplified form in the Detailed Tables of the Census and detailed analyses showing particulars of both population and dwellings in a series of cross-tabulations (e.g. the numbers of males and females in the various industries according to their age groups and the numbers of dwellings according to both numbers of rooms and inmates, etc.) will be available in the Census Division of the Bureau.

PART A. - POPULATION OF THE TERRITORY OF NORFOLK ISLAND

CENSUS, 30TH JUNE, 1961.

TOTAL	478	464	942	421	423	844	100.00	- 98	-10.40

A feature of this table is the high proportion of persons in the older age groups. The proportion of persons 65 years and over was 14.5 per cent. at the 1961 Census and 15.2 per cent. in 1954.

A marked decrease (46.2 per cent.) occurred between Censuses in the female population of the age group 0-4. This accounted for the decrease of 21.7 per cent. in this age group.

Although there was an overall decrease in total population of 10.4 per cent. since 1954, the age groups 5-14, 35-39 and 75-94 increased by 11.4 per cent., 15.1 per cent. and 24.0 per cent. respectively.

Because the male population decreased by a greater proportion than the female (11.9 per cent. compared with 8.8 per cent.) the male surplus of 14 in 1954 was changed to a male deficit of 2 in 1961.

2. Conjugal Condition. - The following table shows the population of Norfolk Island classified according to sex and conjugal condition.

(a) Includes police, fire brigades, hospitals, medical and dental services, education, and business services such as consultant engineering and surveying, accountancy and auditing, industrial and trade associations, advertising, etc.

The largest group in 1961 was Primary Production with 91 persons (87 males and 4 females). It represented 29.3 per cent. of the total work force. Commerce was next with 44 persons (14.1 per cent. of the work force) followed by Public Authority (n.e.i.) and Defence Services (11.9 per cent.). Community and Business Services (including Professional), and Amusement, Hotels, etc., each had 27 persons or 8.7 per cent. of the work force.

Although there was a decrease of 8.5 per cent. in the total work force since 1954, the number of persons in Primary Production increased by 56.9 per cent. The increase of 32 males contrasted with the decrease of 40 males in Building and Construction.

Figures are not yet available for 1961 to show industry in any greater detail than given in Table 7.

8. Occupational Status. - The following table gives details of the occupational status of the population at 30th June, 1961, compared with the 1954 Census. It shows the capacity in which persons are engaged in the work force, whether as employer, employee, not at work, etc., as well as particulars of those persons not in the work force.

At the 30th June, 1961, 71.4 per cent. of the work force were employees (66.4 per cent. in 1954); 20.3 per cent. self-employed (24.5 per cent. in 1954); and 5.5 per cent. employers (6.4 per cent. in 1954). The proportion of dependent population (i.e. persons not in the work force) to total population was lower in 1961 than in 1954 being 63.2 per cent. and 63.9 per cent. respectively.

PART B. - DWELLINGS IN THE TERRITORY OF NORFOLK ISLAND,

CENSUS, 30TH JUNE, 1961.

9. Definitions and Scope. - For the purpose of the Census a dwelling is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only a part of a building.

Occupied Dwellings are classified into "private" and "other than private" dwellings.

Private Dwellings in Norfolk Island comprise private houses, shares of private houses, and flats.

Dwellings Other than Private include the hotel, hospital and boarding houses.

Unoccupied Dwellings include dwellings temporarily unoccupied on the night of the Census and nearly completed dwellings awaiting occupation.

The detailed information in this Part relates to private houses occupied at the date of the Census. However, the number of private dwellings (other than private houses) and the number of dwellings other than private is given in Table 10. The number of unoccupied dwellings is shown in Table 9.

10. Summary of Population and Dwellings. - The following table is a summary of the population and dwellings (as defined above) in the Territory of Norfolk Island at the Censuses of 1954 and 1961.
