PREFACE

This publication contains statistics from the 1981 Census of Population and Housing showing the movement of persons whose local government area of usual residence in 1981 differed from that in 1976. The inward (including overseas arrivals) and outward movement (excluding overseas departures) of persons is shown for each local government area and statistical division in New South Wales. Location of usual residence is classified by local government area and statistical division if within New South Wales, by State or Territory if elsewhere in Australia, or as 'overseas'.

More information is available on request from the New South Wales Office of the Australian Bureau of Statistics (for details see Explanatory Notes 25 to 28).

T. J. Skinner
DEPUTY COMMONWEALTH STATISTICIAN

March 1984

MAIN FEATURES

- In the five-year intercensal period from 1976 to 1981, 164,511 persons moved into New South Wales from the other States and Territories, and 188,981 moved out to other parts of Australia, resulting in a net loss of 24,470 persons from internal migration.
 - New South Wales experienced net losses of 32,784 persons to Queensland and 3,359 to Western Australia, but had net gains of 11,135 persons from Victoria and 1,536 from South Australia.
 - The most noticeable trend in New South Wales was the very large movements of persons to the coastal areas - particularly to the North Coast. The Statistical Divisions with the largest net increases due to internal migration were Mid-North Coast with 20,577 persons (comprising 17,076 from elsewhere in NSW, and 3,501 from other States and Territories), Richmond-Tweed with 14,738 persons (10,404 and 4,334 respectively), and Hunter with 13,171 persons (12,602 and 569 respectively).
 - The largest net decrease due to internal migration was recorded in the Sydney Statistical Division which lost a total of 61,841 persons. The major losses were 23,568 to Queensland, 12,685 to the Mid-North Coast Statistical Division, 9,052 to the Hunter Statistical Division, 7,762 to Illawarra Statistical Division and 7,243 to Richmond-Tweed Statistical Division. Decreases were also recorded in all of the inland Statistical Divisions, the largest losses being from Central West (4,635), Northern (3,865) and Murrumbidgee (3,299).
 - There were 202,799 persons aged five years or more who were usual residents of New South Wales at the time of the 1981 Census, and who were overseas at the time of the 1976 Census.
 - Of the 4,708,542 usual residents of New South Wales aged 5 years or more enumerated at the 1981 Census, 2,607,955 (55.4%) were recorded in the same residence they had occupied at the previous Census five years earlier. A further 639,848 (13.6%) had changed their place of residence but were still living in the same local government area.
-

EXPLANATORY NOTES

Introduction

1. The 1981 Census of Population and Housing aimed at counting every person who spent Census night, 30 June 1981, in Australia, including persons on vessels in or between Australian ports, or on board long-distance trains, buses or aircraft. People were counted where they were on Census night, which may not have been where they usually resided. Visitors to Australia were enumerated, regardless of how long ago they had arrived or how long they planned to stay. Australian residents out of the country on Census night were excluded from the Count.

2. While every effort is made to minimise under-counting in the Census, some inevitably remains for various reasons (e.g. inadvertent omission of very young children, treatment of some dwellings as unoccupied when, in fact, they were occupied, and failure to find all dwellings). Refusal by householders to complete the Census schedule is not a significant cause of under-counting. In order to obtain a measure of the extent of this under-counting a post-enumeration survey

(PES) is undertaken as soon as possible after the census. Results of this survey indicate that 1.8 per cent of usual residents of New South Wales were missed in the Census, and shows that the Australian Census ranks high in world comparisons of accuracy.

3. The schedule used for the 1981 Census included a set of questions which asked respondents to state their usual place of residence in 1981, 1980 and 1976 as follows:

<p>8. Where does each person usually live?</p> <ul style="list-style-type: none"> • "Usual" residence is that address at which a person has lived or intends to live for any period of 6 months or more in 1981. • For persons who now have no usual residence, regard this dwelling as their usual residence and tick box 1. <p>• If usual residence is overseas, write only name of country. →</p>	<p>At the address shown on front of this form..... <input type="checkbox"/> 1 <input checked="" type="checkbox"/> Elsewhere..... <input type="checkbox"/> 2</p> <p>▼ If "Elsewhere" please print the usual address.</p> <p>No. and street..... Suburb, town or locality..... Name of local council..... State..... Postcode.....</p> <p>Country.....</p>
<p>9. Where was each person's usual residence one year ago (i.e. at 30 June 1980)?</p> <ul style="list-style-type: none"> • If the person is less than one year old, write "N/A". • For persons who had no usual residence on 30 June 1980, give the address at which they were then living. <p>• If usual residence was overseas, write only "O/S". →</p>	<p>Same as in question 8..... <input type="checkbox"/> 1 <input checked="" type="checkbox"/> Elsewhere..... <input type="checkbox"/> 2</p> <p>▼ If "Elsewhere" please print usual address one year ago.</p> <p>No. and street..... Suburb, town or locality..... Name of local council..... State..... Postcode.....</p>
<p>10. Where was each person's usual residence five years ago (i.e. at 30 June 1976)?</p> <ul style="list-style-type: none"> • If the person is less than five years old, write "N/A". • For persons who had no usual residence on 30 June 1976, give the address at which they were then living. <p>• If usual residence was overseas, write only "O/S". →</p>	<p>Same as in question 8..... <input type="checkbox"/> 1 Same as in question 9..... <input type="checkbox"/> 2 <input checked="" type="checkbox"/> Elsewhere..... <input type="checkbox"/> 3</p> <p>▼ If "Elsewhere" please print usual address five years ago.</p> <p>No. and street..... Suburb, town or locality..... Name of local council..... State..... Postcode.....</p>

4. Usual residence was defined in Question 8 as the 'address at which a person has lived or intends to live for any period of 6 months or more in 1981'; and this same concept applied to their usual residence in 1980 and 1976.

SCOPE OF THESE STATISTICS

5. The population selected for the analysis contained in this publication is:
All persons, aged 5 years or more, recorded anywhere in Australia at the Census of 30 June 1981, who were usual residents of New South Wales in 1976 or 1981.

6. This population comprises:

- a. Those who moved usual residence between the 1976 and 1981 Censuses -
 - i. Those persons who had a different LGA of usual residence at the 1976 Census to that at the 1981 Census, and
 - ii. Those persons who were resident in an overseas country at the time of the 1976 Census, but who were usual residents of New South Wales at the 1981 Census.

- b. Those who did not move usual residence between the 1976 and 1981 Censuses -
 - i. Those persons who did not change their LGA of usual residence between the 1976 and 1981 Censuses (although they may have moved within the same LGA), and
 - ii. Those persons who did not state a LGA of usual residence at the time of the 1976 Census, and/or the 1981 Census.

(For a more detailed description of these persons see "DEFINITIONS OF DATA ITEMS", paragraph 16.)

USUAL RESIDENCE

7. As mentioned above, the usual residence of a person at the 1976 and 1981 Census was determined by the answers given to questions 8 and 10 on the 1981 Census schedule. The movement of persons between 1976 and 1981 has been determined by their stated usual residence in 1976 and 1981.

8. The terms "Movement" and "Moved" are used in this publication to indicate those persons who changed their LGA of usual residence (including overseas permanent arrivals) as defined in paragraph 6 above. However, by definition, certain persons who may have moved usual residence are excluded from the internal migration figures. They include:

- a. Persons who moved within the intercensal period but who had returned to the same LGA, as in 1976, by the 1981 Census, and
- b. Persons who moved but who did not give sufficient details (in answers to Questions 8 and 10) to enable them to be classified as having moved.

TABLE DESCRIPTION

TABLES 1-13

9. 'Inward movement' refers to those persons who were usual residents of the LGA or statistical division in 1981 and whose usual residence in 1976 was in a different LGA to that in 1981. The tables show the source of these inward movements which include those persons whose usual residence in 1976 was another LGA in NSW, or elsewhere in Australia, or overseas.

10. 'Outward movement' refers to those persons who were usual residents of the LGA or statistical division in 1976 and whose usual residence in 1981 was in a different LGA to that in 1976. The tables show the destination of these outward movements which include persons whose usual residence in 1981 was another LGA in NSW, or elsewhere in Australia. Excluded are those persons who were usual residents of the LGA or statistical division in 1976 but who were overseas at the time of the 1981 Census.

11. For both inward and outward movement, an age distribution of those persons who moved is shown.

12. Inward and outward movement applies only to those persons as stated above whose stated LGA of usual residence differed between 1976 and 1981 (in questions 8 and 10). In addition, a number of other persons who were usual residents in LGAs in NSW in 1981 were not within the scope of these inter-LGA movements. These are shown as items 32 to 36. For an explanation of those items see under "DEFINITIONS OF DATA ITEMS".

TABLE 14

13. This table presents information on the movement, of persons who were usual residents of the Sydney Statistical Division in both 1976 and 1981 and whose LGA of usual residence differed at those two points in time. The table is an expansion of the information presented in Item 1, Table 1, and as such does not include persons aged less than 5 years, persons who did not state usual residence for 1976 or 1981, and persons whose usual residence at both censuses was in the same LGA.

14. The statistics are presented as a two-way table, with LGAs grouped by statistical subdivisions. Where usual residence was coded as 'Sydney, undefined' no information has been shown, although the row and column totals include this component.

15. Each column in the table represents the outward movement from the LGA to another LGA in the Sydney Statistical Division, while each row represents the inward movement to the LGA from another LGA in the Sydney Statistical Division.

DEFINITIONS OF DATA ITEMS

16. In interpreting the figures shown against the various item numbers in the tables, the following specific points should be borne in mind.

Item
No.

- | | |
|----------|--|
| 1 to 12 | In Tables 1 to 12 the inward and outward figures for each LGA show movement of persons between that LGA and the various statistical divisions in NSW (including inter-LGA movement within the statistical division in which the LGA is located). For the statistical division totals in Tables 1 to 12 and Table 13, the inward and outward figures for each statistical division show movement of persons between LGAs within that statistical division, and the other statistical divisions in NSW. Movement from one address to another within the same LGA is excluded from these items but is shown in each case against item 35. |
| 13 | Includes persons who stated their place of usual residence as "New South Wales", "Migratory" or "Lord Howe Island". |
| 22A | Internal Migration. Relates to intra-state and inter-state movement, i.e. items 14 and 22 combined. |
| 23 | Overseas arrivals. Relates to inward movement of persons aged 5 years or more who were resident overseas at the 1976 Census. Outward movement is shown as "not applicable" as those persons who were resident in Australia at the 1976 Census, but were outside Australia at the 1981 Census, were necessarily excluded from the 1981 Census count. |
| 24 | The total of items 22A and 23. The inward and outward movement totals are not strictly comparable as inward movement from overseas is included, but outward movement to overseas is excluded (see also note to item 23 above). |
| 25 to 31 | See item 24 above. |

- 32 Children enumerated at the 1981 Census who were born after the 1976 Census, excluding 3,651 children whose 1981 usual residence was not stated (these are included in Item 36). This item is included here purely as a balancing item as it is one of the components which make up the total Usual Residents - see Item 37.
- 33 Persons who indicated that they resided in the stated LGA/Statistical Division at the 1981 Census, but did not indicate their State of usual residence at the 1976 Census.
- 34 Persons who stated that they were resident in the same dwelling at both the 1976 and 1981 Censuses (i.e. those who did not move).
- 35 Persons who stated that their place of usual residence at the 1976 Census was different to that at the 1981 Census, but was still in the same local government area.
- 36 Persons who were enumerated in the stated LGA/Statistical Division at the 1981 Census, but did not indicate their place of usual residence.
- 37 The total usual residents (of all ages) of the LGA in 1981 who were recorded in Australia on Census night (residents overseas on Census night were excluded). This figure comprises those persons who stated an LGA of usual residence, and those persons who were enumerated in the LGA on Census night but did not state an LGA of usual residence.

RANDOM ADJUSTMENT

17. The ABS has an obligation to protect the confidentiality of information which it receives from individuals and businesses. The number of census characteristics tabulated and the detail requested in census releases inevitably produces tables in which there are many cells with very small numbers. These may inadvertently allow the release of identifiable information, even though identifiers (such as names and addresses) are not available.

18. It has been necessary, therefore, for the ABS to randomly adjust non-zero cells. In these tables the column and row totals, sub-totals and overall totals were derived before the random adjustment processes were applied, hence totals may be slightly greater or less than the sum of their components. These adjustments allow the maximum amount of detailed census data to be published.

19. The random adjustments are insignificant in relative terms except for numbers too small, in any case, to be of statistical significance. In addition, small numbers in the original data may be affected by such things as respondents omitting to answer particular questions or giving incorrect answers, or by the occasional error in coding or transcribing data in the course of ABS processing. No significance should be attached to cells with values of 5 or less, or to differences between cells of similar magnitude.

20. While this method does slightly alter some of the data the effect is minimal and will not hinder the vast majority of uses of this census data.

21. An Information Paper 'Census 81 - Effects of Introduced Random Error' (Catalogue No. 2156.0) explains more fully the principles underlying the application of a random adjustment to these statistics.

GEOGRAPHIC DEFINITIONS

22. Local Government Areas in New South Wales are constituted under the Local Government Act, 1919, and comprise municipalities (usually centres of population) and shires (for the most part country areas embracing tracts of rural land as well as towns and villages). Twenty-nine municipalities had been proclaimed as cities as at 30 June 1981. For the purposes of the 1981 Census, local government area boundaries in New South Wales are those defined at 30 June 1981.

23. Statistical Divisions - Statistical Divisions are designed to be relatively homogenous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. The Capital City Statistical Division is predominantly urban in character and the boundary is delineated to contain the anticipated urban development of the Capital City (and associated Urban Centres) for a period of at least twenty years.

24. Statistical Subdivisions - Statistical subdivisions within Sydney Statistical Division were delineated in 1976, in order to provide statistical areas of optimum assistance to users (particularly physical and social planners). The boundaries of the seven sub-divisions created within Sydney Statistical Division have been drawn to coincide with the regions formed by the former Commonwealth Department of Urban and Regional Development.

These geographical areas are shown on the map at the back of this bulletin.

OTHER INFORMATION

25. An Information Paper 'Census 81 - Usual Residence and Internal Migration' (Catalogue No. 2155.0) provides more detail on these concepts and explains the relationship between usual residence and the new concept of population estimates used by the ABS, the Estimated Resident Population. Further information on the Estimated Resident Population and population estimates are described in another Information Paper 'Population Estimates: An Outline of the New Conceptual Basis of ABS Population Estimates' (Catalogue No. 3216.0).

26. A number of other tabulations based on internal migration have been also produced for N.S.W. which are further cross-classified by other characteristics including birthplace, marital status, age, income, and occupation. These data are available on microfiche. (1981 Census of Population and Housing - Microfiche: N.S.W. Cross-Classified Tables; 81.601 Tables 10035-10042).

PUBLICATIONS ISSUED BY AUSTRALIAN BUREAU OF STATISTICS (NEW SOUTH WALES OFFICE)

The Deputy Commonwealth Statistician issues a large range of publications presenting statistics relating to New South Wales. All of these are obtainable from the Australian Bureau of Statistics, St. Andrew's House, Sydney Square (George Street, next to Sydney Town Hall), Sydney.

The New South Wales Year Book presents a comprehensive statistical survey of the social, demographic, and economic structure and growth of the State, and describes the legislative provisions and administrative arrangements which are of significance for a proper interpretation and analysis of the statistics of the State. The Pocket Year Book and New South Wales In Brief contain a wide range of statistical and other material in compact form and are useful for handy reference. More recent statistics are available in the Monthly Summary of Statistics. The Handbook of Local Statistics presents a selection of the more important statistics available for geographical areas of the State. More detailed statistics relating to matters treated generally in the above publications are available in the various Subject Bulletins, which range from preliminary monthly statements to detailed bulletins presenting the results of periodic censuses, etc. A selection of the more important subject bulletins is shown below.

Catalogue No.	Publication	Month of issue	Price	
			Excl. postage	Incl. postage
			\$	\$
