AUSTRALIAN DEMOGRAPHY, 1945.

PREFACE.

The present issue of the Demography Bulletin, the sixty-third in the series, furnishes detailed statistics relating to the year 1945. Statistics for the years 1860 to 1945 are also included in summary form.

Results of the last complete Census (1933) have been included in Section I., and oversea migration statistics in Section II. Some of the leading particulars of the Australian Life-Tables, based on the results of the 1933 Census and on the mortality statistics for the period 1932-34, are shown in Section VIII.

Tabulations in Sections IV., Births, and V., Deaths, have been made according to place of usual residence within the State of registration. The classification of occupations appearing in these sections is the classification used in the Census of England and Wales, 1931, as adapted to the requirements of the Australian Census of 1933, and further amended in 1939. In Section V., Deaths, the classification of the causes of death is mainly in accordance with the "International List of Causes of Death, 1938" (International Commission, Paris, 1938), with slight modifications to suit Australian conditions. Details of causes of death have been included for the years 1942 to 1945.

For the years 1939 to 1945, estimates of population include living Australian defence personnel, irrespective of their present location, in the States and Territories from which they enlisted. Allied defence personnel, internees sent to Australia from overseas and prisoners of war are excluded from estimates of population.

Population estimates from 1939 to 1943 have been adjusted to agree with the results of a quasi-Census based on tabulations of civilian registration cards issued in June, 1943.

In view of the uncertainty of war-time records of interstate migration, populations of States subsequent to June, 1943, have been estimated on the basis of natural increase, deaths of defence personnel and oversea migration. These estimates will be revised, if necessary, in the light of data obtained from the Census of June, 1947.

The considerable war-time movement of population as between statistical divisions in each State has rendered difficult the estimation of population according to divisions and has virtually destroyed the meaning of the crude birth and death-rates usually calculated for such divisions. Both the estimates and the rates have therefore been omitted from the Bulletin.

The deaths as recorded in Section V. exclude deaths of defence personnel in each of the years 1942, 1943, 1944 and 1945 but include such of those deaths as were registered with civil Registrars during the years 1940 and 1941. The figures shown in this section thus relate to the Australian resident civilian population. Death-rates for the years 1939 to 1945 are calculated on total population and must be regarded as approximate, subject to revision.

Thanks are expressed to the various State Government Departments responsible for the registration of births, deaths and marriages for the valuable assistance rendered by them in furnishing the data for the compilation of the Vital Statistics. Special thanks are due to Mr. V. Fahey for the work done in the preparation of this Bulletin.

ROLAND WILSON,
Commonwealth Statistician.

(g) Excludes 3 still-born triplets. (h) Excludes 1 still-born triplet. (i) Excludes 4 still-born triplets.

NOTE.—The table above shows the number of confinements resulting in one or more live births. The figures exclude cases where the births were of still-born children only (estimated to number approximately 4,500 during 1945).

For Queensland and South Australia the differentiation between single and multiple births cannot be regarded as completely accurate as the registration procedure there adopted differs from that in other States.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is the estimated average number of female children born to every woman who lives through child-bearing age. (c) The "net" reproduction rate allows for the effects of mortality and is an index of the number of women who, in the next generation, will replace each woman of reproductive age in this generation.

NOTE.—The mortality experience used throughout the table above for the calculation of the net reproduction rate is that for the period 1932-1934.

NOTE.—Comparison of causes of death in the table above with years prior to 1940 should be made with caution owing to changes in classification which were adopted in 1931 and 1940. Demography Bulletins Nos. 49 and 58 indicate the extent of the changes and the connexion between former classification title numbers and those at present in use.

Causes in respect of which no deaths occurred have been omitted from this table. A complete classification of causes of death is given in Table No. 75.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. The figures have not been amended in accordance with the results of the Census of the Australian Capital Territory on 30th June, 1938. Revised estimates of the population of the Territory based on the latter results are as follows:—31st December, 1933, 5,043; 1934, 5,065; 1935, 5,233; 1936, 5,606; 1937, 5,952.

Figures from 1939 to 1945 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1st January, 1911. The estimated male population on 31st December, 1910, was 969. (c) Population increased by 156 males owing to transfer of Jervis Bay area to Australian Capital Territory. (d) Revised.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. The figures have not been amended in accordance with the results of the Census of the Australian Capital Territory on 30th June, 1938. Revised estimates of the population of the Territory based on the latter results are as follows:—31st December, 1933, 4,298; 1934, 4,392; 1935, 4,528; 1936, 4,800; 1937, 5,091.

Figures from 1939 to 1945 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1st January, 1911. The estimated female population on 31st December, 1910, was 676. (c) Population increased by 126 females owing to transfer of Jervis Bay area to Australian Capital Territory. (d) Revised.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. The figures have not been amended in accordance with the results of the Census of the Australian Capital Territory on 30th June, 1938. Revised estimates of the population of the Territory based on the latter results are as follows:—31st December—1933, 9,341; 1934, 9,457; 1935, 9,761; 1936, 10,406; 1937, 11,043.

Figures from 1939 to 1945 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1st January, 1911. The estimated total population on 31st December, 1910, was 1,645. (c) Population increased by 252 persons owing to transfer of Jervis Bay area to Australian Capital Territory. (d) Revised.
