## PREFACE.

The present issue of the Demography Bulletin, the sixty-seventh in the series, furnishes detailed statistics relating to the year 1949. Statistics for the years 1860 to 1949 are also included in summary form.

Results of the 1947 Census are included in Section I., and oversea migration statistics in Section II. In Section IX. the leading particulars of Life Tables based on the results of the 1947 Census and on mortality statistics for the period 1946-48 have been included. Section VI., Vital Statistics of External Territories, which has been omitted for 1941 and subsequent years has been reinserted for 1949.

Tabulations in Sections IV., Births, and V., Deaths, have been made according to place of usual residence within the State of registration. The classification of occupations appearing in these sections, and in Sections II., Migration, and III., Marriages, is a revised classification as used in the Australian Census of 1947. In Section V., Deaths, the classification of the causes of death is in accordance with the "International List of Causes of Death, 1938" (International Commission, Paris, 1938), with slight modifications to suit Australian conditions.

From September, 1939, to March, 1947, estimates of population include Australian defence personnel, irrespective of their location, in the States and Territories from which they enlisted. Allied defence personnel, internees sent to Australia from overseas and prisoners of war are excluded from estimates of population.

Population estimates for the intercensal period 1933-47 are based on the final results of the 1947 Census.

In view of the uncertainty of war-time records of interstate migration, populations of States for the period July, 1943, to June, 1947, have been estimated on the basis of natural increase, deaths of defence personnel and oversea migration.

As from 1st July, 1948, migrants have been classified separately according to both nationality and race instead of on a joint basis as had been the case previously. The particulars published in Section II., therefore, are no longer directly comparable with those published for years prior to 1948.

The deaths as recorded in Section V. exclude deaths of defence personnel for the period January, 1942, to June, 1947, but include such of those deaths as were registered with civil Registrars during the years 1940 and 1941. The figures shown in this section thus relate to the Australian civilian population. Death-rates for the years 1939 to 1947 are calculated on total population and must be regarded as approximate.

At the back of this Bulletin there are five graphs showing (i) the movement in population since 1840, (ii) particulars of oversea migration since 1921, (iii) the numbers of births, deaths and marriages since 1860, (iv) the rates of births, deaths and natural increase since 1860, and (v) the number of deaths according to principal causes since 1940.

Thanks are expressed to the various State Government Departments responsible for the registration of births, deaths and marriages for the valuable assistance rendered by them in furnishing the data for the compilation of the Vital Statistics. For the work done in the preparation of this Bulletin, special thanks are due to Mr. E. H. Harry, B.A., B.Com., the Officer-in-Charge of the Demography Branch, and the staff under his control.

(a) For total increase recorded for each year commencing with 1860, see VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For period September, 1939, to June, 1947, troop movements have been excluded and deaths of defence personnel, whether in Australia or overseas, included. (e) Excludes interstate migration from July, 1943, to June, 1947.

NOTE.—Differences between the figures above and totals of figures for each element of increase shown separately in Tables 9, 10 and 11 (natural increase, net migration and deaths of defence personnel respectively) represent unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy, which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures.

Minus sign (—) denotes decrease.

NOTE.—The Metropolitan Divisions relate to the capital cities of the States and adjoining urban municipal areas within boundaries used for Census purposes.

The Urban Provincial Divisions comprise the capital cities of the Territories and, in States other than Tasmania, cities and towns outside the Metropolitan Divisions which are separately incorporated. In Tasmania, where most of the towns are not separately incorporated, boundaries were determined for Census purposes.

Rural Divisions comprise the remaining portion of each State and Territory.

(a) Deaths of defence personnel which were registered in civil registers in the years 1940 and 1941 and included in the figures of civilian deaths for those years have been deducted. (b) Excludes troop movements. Interstate migration has also been excluded for the period July, 1943, to June, 1947. (c) Unrecorded movement of population disclosed by the Census of 30th June, 1947. This item is believed to represent largely unrecorded migration but, in view of the abnormal period covered and omissions in other records, the discrepancy has not been apportioned between the various elements of population increase.

(a) Introduced July, 1924. (b) Includes evacuees:—1940, 1,404 males, 3,139 females; 1941, 600 males, 1,670 females; 1942, 4,033 males, 4,105 females; 1943, 1,167 males, 591 females; 1944, 23 males, 28 females; 1945, 216 males, 153 females. (c) Total arrivals include the following persons whose classification was not stated:—1927, 16 males, 11 females; 1928, 4 males; 1929, 4 males, 2 females; 1930, 1 male; and total departures include:—1927, 9 males, 5 females; 1928, 14 males, 1 female; 1929, 7 males; 1931, 2 males, 3 females. (d) Excludes troop movements for the period September, 1939, to June, 1947.

NOTE.—"Permanent movement" refers to persons intending residence for one year or longer, in Australia in the case of arrivals, and abroad in the case of departures. "Temporary movement" refers to persons intending, or returning from, residence for shorter periods.

Troop movements, however, were totally excluded from overseas migration records for the period September, 1939 to June, 1947. Australian troops have since been included and, together with dependents, are shown in the temporary migration figures irrespective of the length of their stay overseas.

NOTE.—The table above indicates the State or Territory where migrants disembarked from overseas or embarked for overseas. The figures do not indicate the effect of migration on the populations of the several States; for that purpose it is necessary to take interstate migration into account. Because, however, of the impracticability of obtaining accurate records of interstate passenger traffic during the war and in the post-war period, when large movements of troops occurred, no allowance was made in population estimates for interstate migration during the period July, 1943, to June, 1947.

(a) Excess of total arrivals over total departures. (b) Excludes troop movements for the period September, 1939, to June, 1947. (c) Includes Maltese and Cypriote. (d) Includes Austrian. (e) Mainly Polish and Baltic races.  
 NOTE.—(1) Minus sign (—) denotes excess of departures over arrivals. (2) The particulars shown are directly comparable with those published in Bulletins prior to No. 64 under the heading of "Nationality or Race." The figures should not, however, be regarded as a completely accurate record of "Racial Origin" as they are based on the passenger's own statement as to race, which in many cases may express the country of his nationality or birthplace rather than actual race. So far as available information permits, however, migrants are classified according to race. This applies particularly in cases where a person's nationality differs from race through naturalization or marriage. From July, 1948 onwards, migrants have been classified separately according to both nationality and race and the particulars available are no longer directly comparable with those published for previous years.

(a) The rate for each year is calculated on the basis of births in each year. (b) The "gross" reproduction rate is a measure of the average number of female children who, according to the fertility rates on which the calculation is based, would be born to women during their lifetime. (c) The "net" reproduction rate is a measure of the average number of female children who would be born to women during their lifetime if they were subject at each age to the fertility and mortality rates on which the calculation is based.

NOTE.—The mortality experience used throughout the table above for the calculation of the net reproduction rate is that for the period 1932-34. The numbers of females of child-bearing age on which the rates above are based for years 1938 to 1946 have not been adjusted in accordance with the results of the Census of 30th June, 1947.

NOTE.—Comparison of causes of death in the table above with years prior to 1940 should be made with caution owing to changes in classification which were adopted in 1931 and 1940. Demography Bulletins Nos. 49 and 58 indicate the extent of the changes and the connexion between former classification title numbers and those at present in use.

Causes in respect of which no deaths occurred have been omitted from this table. A complete classification of causes of death is given in Table No. 82.

## VI.—VITAL STATISTICS OF EXTERNAL TERRITORIES.

(Non-indigenous Population only.)

NOTE.—With the occupation of Nauru and New Guinea by enemy forces during the 1939–45 War the registration of births, deaths and marriages was completely disorganized. Since the resumption of registration in 1946 there have been many delayed registrations of births and deaths, and owing to geographic conditions there is some delay at any time. In the following tables, however, all figures relate as far as possible to births, deaths and marriages occurring during the year 1949, irrespective of the date of registration.

No. 116.—Marriages in External Territories, 1949.

(a) Northern Territory figures included with South Australia prior to 1900. (b) Part of New South Wales prior to 1st January, 1911. The estimated male population on 31st December, 1910, was 969. (c) Population increased by 156 males owing to transfer of Jervis Bay area to Australian Capital Territory.

NOTE.—All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth. Figures from 1939 to 1946 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas. The estimated populations from 31st December, 1947 onwards, include Australian defence personnel in Australia according to their actual location and are exclusive of members of the Forces overseas.

(a) Northern Territory figures included with South Australia prior to 1901. (b) Part of New South Wales prior to 1911. (c) See note (c), Table No. 120c. (d) For the period September, 1939, to June, 1947, troop movements have been excluded and deaths of defence personnel, whether in Australia or overseas, included. (e) Excludes interstate migration from July, 1943, to June, 1947.

NOTE.—Minus sign (—) denotes decrease of population.

Differences between the figures above and totals of figures for elements of increase shown separately in the two previous tables (natural increase and not migration) represent, after taking into account deaths of defence personnel, unrecorded movement of population from 1st July, 1933, to 30th June, 1947, as disclosed by the final results of the 1947 Census. Particulars of total increase have been adjusted for this discrepancy, which is believed to represent largely unrecorded migration, but in view of the abnormal period covered, and omissions in other records, no separate adjustment has been applied to individual elements of increase. Intercensal discrepancies disclosed by previous Censuses were adjusted on recorded departures.

- $l_x$  = Number Surviving at each Age out of 100,000 Born.
- $d_x$  = Number Dying in each Year of Age out of 100,000 Born.
- $p_x$  = Probability of Surviving One Year at each Age.
- $q_x$  = Probability of Dying within One Year at each Age.
- $\mu_x$  = Force of Mortality at each Age.
- $e_x$  = Complete Expectation of Life at each Age.
