

CATALOGUE NO. 3401.0 EMBARGOED UNTIL 11.30 A.M. 2 APRIL 1992

OVERSEAS ARRIVALS AND DEPARTURES, AUSTRALIA JANUARY 1992

MAIN FEATURES

The total number of overseas movements in January 1992 was 884,600, 4 per cent more than in January 1991 (848,300). There were 477,800 arrivals (3% more than in January 1991) and 406,800 departures (5% more than in January 1991).

Permanent movement In January 1992:

- 8,410 settlers arrived in Australia, 13 per cent less than in January 1991 (9,680). Settler arrivals from Northeast Asia (1,700) increased 28 per cent while settler arrivals from Europe and the Former USSR (2,130) and Southeast Asia (1,550) both decreased 22 per cent compared with January 1991. Settler arrivals for all other major groups showed decreases compared with January 1991.
- 2,810 permanent departures were recorded, about the same number as in January 1991 (2,820).

Arrivals of overseas visitors for short-term visits In January 1992:

- The number of overseas visitor arrivals was 196,100, 11 per cent more than in January 1991 (177,400). In seasonally adjusted terms, short-term visitor arrivals were 10 per cent more than in December 1991 although the trend estimate for visitor arrivals is showing a downward trend.
- The major source countries were: Japan with 58,700 (30% of total), the United Kingdom with 22,700 (12%), New Zealand with 20,100 (10%) and the U.S.A. with 17,200 (9%). These four major source countries accounted for 61 per cent of all visitor arrivals. Visitors from Japan increased significantly compared with January 1991 (26%) and were the largest number ever to arrive in one month. Visitors from New Zealand (23%) decreased significantly.

SHORT-TERM VISITOR ARRIVALS (a)

(a) Refer to paragraph 20 of the Explanatory Notes.

- The number of visitors from Hong Kong (6,300), Korea (4,500) and Talwan (4,500), although small compared with the number from the main source countries, showed significant increases when compared with January 1991.
- The main purposes for visiting Australia remain 'holiday' (63% of total) and 'visiting relatives' (17%). The number of visitors arriving for the purpose of 'holiday' increased 15 per cent compared with January 1991.
- Visitors intending to stay for less than 1 week increased by 29 per cent compared with January 1991. Visitors intending to stay for less than 2 weeks accounted for 56 per cent of total short-term visitor arrivals compared with 52 per cent in January 1991.

Departures of Australian residents for short-term trips abroad In January 1992:

- 141,400 Australian residents departed for short-term visits overseas, an increase of 11 per cent compared with January 1991. In seasonally adjusted terms, the number of departures fell 5 per cent compared with December 1991. The trend estimate for resident departures appears to be stablising.
- The most popular destinations were: New Zealand with 26,400 (19% of total), the U.S.A. with 20,200 (14%) and Indonesia with 13,400 (10%). When compared with January 1991, visitors to Indonesia, the U.S.A. and New Zealand all increased. Departures to Fiji decreased 19 per cent.
- Departures for 'holidays' (70,400) and 'visiting relatives' (28,600) increased 4 per cent and 22 per cent respectively compared with January 1991. The number of resident departures intending to stay for 2 weeks and less than 1 month (46,100) increased (13%) when compared with January 1991 (40,700).

SHORT-TERM RESIDENT DEPARTURES

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics, contact Robert Chibnall on Canberra (06) 252 6671 or any ABS State office.

EXPLANATORY NOTES

Introduction

This series of publications contains statistics of overseas arrivals and departures in summary form for the latest available month during which the movement occurred. More detailed statistics can be made available, on request, in unpublished form.

Scope

2. The statistics in this publication relate to the number of movements rather than the number of travellers (i.e. the multiple movements of individual persons during a given reference period are each counted separately). The statistics exclude the movements of operational air and ships' crew, of transit passengers who pass through Australia but are not cleared for entry, and of passengers on pleasure cruises commencing and finishing in Australia aboard ships not then engaged on regular voyages.

Definitions

Category of movement

3. Category of movement is primarily determined by the traveller's selection of their own category on the passenger card. This selection is accepted provided it is consistent with other information on the passenger card.

Permanent movement

4. Permanent arrivals (settlers) comprise travellers who hold migrant visas, (regardless of stated intended period of stay), New Zealand citizens who indicate an intention to settle and those who are otherwise eligible to settle (e.g. overseas born children of Australian citizens). Permanent departures are Australian residents (including former settlers) who on departure state they do not intend to return to Australia.

Long-term movement

5. Long-term arrivals comprise overseas visitors (except those who hold migrant visas—see paragraph 4 above) who intend to stay in Australia for 12 months or more and Australian residents returning after an absence of 12 months or more overseas. Long-term departures comprise Australian residents who intend to stay abroad for 12 months or more and overseas visitors departing who stayed 12 months or more in Australia.

Short-term movement

- 6. Movements of travellers whose intended or actual length of stay is less than twelve months are classified as short-term, except those who on arrival hold migrant visas (see paragraph 4 above).
- 7. A significant number of travellers state exactly 12 months or one year as their intended period of stay. Many of these stay for less than that period and on their departure from, or return to, Australia are therefore classified as short-term. To maintain consistency between arrivals and departures, movements of travellers who report their actual or intended period of stay as being one year exactly are randomly allocated to long-term or short-term, in proportion to the number of movements of travellers who report their actual length of stay as up to one month more, or one month less, than one year.

Country of birth or residence

8. The classification of countries in this publication is based on the Australian Standard Classification of

Countries for Social Statistics (ASCCSS). For more detailed information refer to the ABS publication Australian Standard Classification of Countries for Social Statistics (1269.0).

Since the publication of the ASCCSS, political developments in Europe and the Former USSR have resulted in a number of changes to the country classification. These changes have affected some of the categories in this publication and are detailed in Revision 1.02 of the ASCCSS.

9. Statistics on country of birth, residence or citizenship have certain limitations because of inadequate reporting on passenger cards. For instance, it is not possible to identify separately England, Scotland and Wales. Similarly 'Korea' includes both the Republic of Korea and the Democratic People's Republic of Korea. U.S.A. includes 'America (undefined)'. Germany refers to all people who list country of birth as either 'Germany, Federal Republic' or 'Germany, Democratic Republic' as a result of the unification of Germany in 1990.

Estimation method

- 10. Overseas arrival and departure statistics are derived from a combination of full enumeration and sampling. All permanent movements and all movements with a duration of stay of one year or more are fully enumerated and processed. All movements with a duration of stay of less than one year are sampled. Statistics relating to these movements are therefore estimates which may differ from statistics which would have been obtained if details of all these movements had been processed.
- 11. The statistics in this publication have been rounded, to the nearest 100 for short-term movements and to the nearest 10 for permanent and long-term movements. In tables showing both short-term and permanent and long-term movements the total movements have been rounded to the nearest 100. The sums of the components may, due to rounding, not add exactly to totals.

Corrections and imputations

- 12. The imprecision due to sampling errors should not be confused with errors arising from imperfections in reporting, which may occur in any data collection, whether sampled or not. Every effort is made to minimise such errors, both through careful design of the passenger cards and through checks on the information once it is received. During the edit process some items are corrected where they conflict with other known information. Missing replies to certain items such as age and country of birth are also imputed by reference to other related items.
- 13. Errors of this kind differ from discrepancies arising from the fact that certain information reflects the travellers intentions, at the time the passenger cards were completed. These intentions are of course subject to change. Particularly affected is the distinction between permanent and temporary movement and in the latter case, length of intended stay, country in which most time will be spent and purpose of journey.

Seasonal adjustment

14. Original and seasonally adjusted short-term overseas visitor arrivals and short-term Australian resident departures are shown in Tables 1 and 2 respectively. In the seasonally adjusted series, account has been taken of nor-

mal seasonal factors and 'trading day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the effect of movement in the date of Easter which may in successive years, affect figures for different months.

- 15. Seasonal adjustment may be carried out by various methods and the results may vary slightly according to the procedure adopted. Accordingly, seasonally adjusted statistics should not be regarded as in any way definitive. In interpreting particular seasonally adjusted statistics it is important to bear in mind the methods by which they have been derived and the limitations to which the methods used are subject. The adjustment procedure used for the short-term visitor arrivals and resident departures data is an aggregative adjustment. Prior to the July 1989 issue these data were adjusted at the category total level only (for visitor arrivals and resident departures separately). The aggregative method adjusts the major components separately (in this instance, the main countries of each category). The adjusted category total is obtained by summing the adjusted components. For more detail, contact the Supervisor, Time Series Analysis, ABS on (06) 252 6103.
- 16. Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular month, such as the effect of major sporting and cultural events, changes in airfares structure and the fluctuation of \$A relative to other currencies. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation.
- 17. The seasonally adjusted series can, however, be smoothed to reduce the impact of the irregular component in the adjusted series. There are a number of ways of accomplishing this, depending on the intended uses of the smoothed series. If importance is attached to measuring the underlying change in the most recent periods, moving averages employing appropriate weighting patterns should be adopted; the choice of averaging technique will determine in part the degree of smoothness of the derived series. The longer the term of the moving average the longer is the time series affected by revisions resulting from more recent data. In order to ensure that the underlying trend-cycle of a series is reflected in the trend estimate series, the degree of smoothness alone cannot always be used as the sole criterion in determining which moving average is appropriate.

- 18. The trend estimate short-term overseas visitor arrivals and short-term Australian resident departures statistics are shown in Tables 1 and 2 respectively. The trend estimate has been derived by applying a 13-term Henderson-weighted moving average to the series.
- 19. While this technique enables smoothed data for the latest period to be produced, it does result in revisions to the smoothed series, principally, of recent months as additional observations become available. There may also be revisions as a result of the re-estimation of the seasonal factors. For further information concerning the smoothing process refer to an Information Paper A Guide to Smoothing Time Series Estimates of 'Trend' (1316.0).
- 20. With the opening of World Expo 88 in April 1988 and at its conclusion in October 1988, abrupt dislocations occurred in the trend path of the short-term overseas visitor arrivals series. As different countries displayed varied timings of this effect, the trend path between April and October 1988 is suppressed. Estimates of the trend path are now available from November 1988 onwards.

Related publications

21. Comprehensive definitions and explanations, and detailed data are contained in:

Overseas Arrivals and Departures, Australia (3402.0)—issued quarterly

Overseas Arrivals and Departures, Australia (3404.0)—issued annually

22. Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
