AUSTRALIAN BUREAU OF STATISTICS Canberra

CATALOGUE NO. 3401.0

NOON 15 NOVEMBER 1978

OVERSEAS ARRIVALS AND DEPARTURES, APRIL AND MAY AND PROVISIONAL ESTIMATES FOR JUNE, JULY AND AUGUST 1978

INQUIRIES

If you want to know more about these statistics ring Mr Les Walsh on Canberra 526407 or our State office, or write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616

For copies of this publication contact Information Services, Canberra 526627 or State offices.

MAIN FEATURES

Provisional figures for total overseas arrivals and departures for June, July and August 1978 were in all cases higher than the corresponding months in 1977, as shown in the following table:

	ARRI	VALS	DEPART	URES
	1977	1978	1977	1978
June	108,988	116,271	125,864	136,184
July	131,382	141,819	127,537	136,033
August	140,196	153,255	154,692	167,978

- Overseas arrivals and departures in the year ended June 1978 are estimated at 1,727,981 and 1,671,816 respectively, compared with 1,660,366 and 1,604,019 in the year ended June 1977.
- Settlers arriving in the year ended June 1978 numbered 73,125 compared with 70,916 for the year ended June 1977.
- Australian residents departing for short-term trips abroad increased from 81,897 in April 1977 to 88,281 in April 1978 and from 95,386 in May 1977 to 111,096 in May 1978. The April 1978 figure represents an increase of 8 percent over the corresponding 1977 figure, and the May figure an increase of 16 percent.
- Overseas visitors arriving for short-term visits in April 1978 numbered 41,876, virtually unchanged from the April 1977 figure of 41,684. In May 1978, however, the number was 41,369, an increase of 14 percent over the corresponding 1977 figure.

EXPLANATORY NOTES

Introduction

This publication contains summary statistics of overseas arrivals in and departures from Australia during the months of April and May 1978, together with statistics for earlier periods. More detailed statistics are published quarterly and annually in Overseas Arrivals and Departures (3402.0 and 3404.0).

Preliminary and provisional estimates

The preliminary statistics shown in this bulletin are derived from part-edited data and are subject to subsequent correction. However, later edit and amendment action is not expected to greatly change the statistics shown in this bulletin. Provisional estimates of total arrivals and departures and of settlers arriving from different countries in the months of June, July and August 1978, included in Tables 1, 3 and 5, were provided by the Department of Immigration and Ethnic

Source of the statistics

Persons arriving in or departing from Australia are required to complete prescribed questionnaires in the form of Incoming and Outgoing Passenger Cards. These cards provide information to the Department of Immigration and Ethnic Affairs for administrative purposes and serve as the main source of statistics of overseas arrivals and departures.

Scope

The statistics published in this bulletin exclude air crew and ships' crew, transit passengers who pass through Australia but are not cleared for entry, and passengers on pleasure cruises commencing and finishing in Australia aboard ships not then engaged on regular voyages.

Seasonally adjusted series

Seasonally adjusted figures of total and short-term arrivals and departures are shown in Tables 1 and 7. Details of the methods employed in seasonally adjusting these series are given in Seasonally Adjusted Indicators (1308.0).

Category of traveller

Permanent movement consists of persons who, on arrival, state that they intend to settle in Australia (settlers) and of Australian residents, including former settlers, departing permanently, i.e. those who, on departure, state that they do not intend to return to Australia. Long-term movement is defined as comprising overseas visitors arriving and Australian residents departing temporarily with the intention of staying (in Australia or abroad, respectively) for twelve months or

more, together with the departure of visitors and the return of Australian residents who stayed, in Australia or abroad, for twelve months or more. Travellers whose intended or actual period of stay is less than twelve months are classified as short-term.

Country of stay, embarkation or disembarkation

7. Country of stay refers to the country in which Australian residents departing temporarily intend to spend most time, or the country in which Australian residents returning have spent most time. Country of embarkation or disembarkation refers to the country in which the traveller boards the actual ship or flight which brings him to Australia, or alights from the actual ship or flight which takes him from Australia. Travellers may answer this incorrectly, perhaps naming the country in which their journey commenced or will end, not withstanding any changes of flight or ship en route.

Related statistics

8. Related statistics are available from the Department of Immigration and Ethnic Affairs and the Department of Transport. The tables in this and other publications necessarily contain only a small part of the cross-classifications of items which are or can be produced. Also, items such as country, occupation and length of stay are necessarily summarised from more detailed classifications. Further details can be obtained by writing to the Bureau or ringing the number shown on page 1.

Sampling

- 9. While all permanent and long-term movement, and short-term movement by sea, is fully enumerated, statistics of short-term movement by air are estimates derived from a sample. The sampling fractions used for the various sampling strata are as follows:
 - . Overseas visitors, according to country of citizenship

	Sample
No. 7 of and and C.A.	1 in 30
New Zealand or U.S.A.	
U.K. or Australia	1 in 20
Canada or Japan	1 in 10
Other	1 in 4
Australian residents departing	1 in 10
Australian residents returning	1 in 20

Estimates based on a sample are likely to differ from those obtained from a full enumeration. A measure of the difference which may be expected due to sampling is the "standard error" of the estimate. There are approximately two chances in three that the difference will be less than one standard error, and nineteen chances in twenty that it will be less than two standard errors. Thus, for example, if the estimate for Australian residents departing short-term is 500 then the approximate standard error is 70. There are two chances in three that the actual number of Australian residents departing short-term would lie between 430 and 570, and nineteen chances in twenty that it would lie between 360 and 640. The standard error varies with the sampling fraction used and the size of the estimate. The table below gives approximate standard errors for estimates of various sizes for three categories of traveller.

Rounding

11. After sampling, weights are assigned to sampled records to three decimal places, to increase the accuracy of estimation. During estimation all figures are rounded to the nearest integer. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

ABS publications

12. All publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.
