

Reference No. 4.3

OVERSEAS ARRIVALS AND DEPARTURES
SEPTEMBER 1973

This publication provides summary statistics of overseas arrivals in and departures from Australia during the month of September 1973 and the three months ended September 1973 with comparable statistics for earlier periods. More detailed statistics are published quarterly and annually – see *Overseas Arrivals and Departures* (Reference Nos. 4.1 and 4.23).

9.	Australian residents departing – short-term movement : sex, mode of transport, intended length of stay, stated purpose of journey and country of disembarkation	8

EXPLANATORY NOTES

Permanent movement consists of persons arriving in Australia with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. **Settlers** are persons who, on arrival in Australia, indicated that they came intending to settle. **Former settlers** are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more, and were now departing permanently.

2. **Long-term movement** (which is distinct from permanent movement) consists of the arrival of visitors and the departure of Australian residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more, and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

3. **Short-term movement** consists of all other movements, including the movement of Australian troops irrespective of the period of stay.

4. The statistics for December 1972 and later months are affected by two procedural changes, and are not strictly comparable with statistics for previous periods. From the beginning of December 1972, overseas passengers arriving at Sydney airport intending to proceed overseas on another flight without leaving the airport were encouraged to use a newly established transit area, and those who did so were excluded from the statistics of arriving and departing overseas visitors. The number so excluded is believed to exceed 1,500 per month. Also, beginning in the December quarter, the region and length of time within which ships' journeys out of and back to Australia are treated as "cruise" trips were extended. Passengers on such extended cruises, formerly included in statistics of Australian residents departing and arriving in the short-term movement, number about 6,000 per annum. The majority of cruises take place in the spring and summer months. Passengers affected by these changes are included in the statistics of transit passengers through Australia by air, and of passengers returning from short pleasure cruises by sea, published in the Appendix to the quarterly issue of *Overseas Arrivals and Departures* (Reference No. 4.1).

5. Seasonally adjusted figures of total and short-term arrivals and departures are shown in Tables 2 and 5. In the adjustments, account is taken of "trading day" effects as well as normal seasonal factors. Details of the methods used and selected measures of variability are available on request and were published in *Seasonally Adjusted Indicators – 1973* (Reference No. 1.10).

6. Statistics of characteristics of travellers in the short-term movement from April 1971 to September 1972 are estimates derived from a fifty per cent sample of short-term travellers. From October 1972, the sample comprises one-third of short-term movement. While the total number of such travellers and statistics of their mode of transport are fully known, statistics in various classifications, e.g. nationality, may differ from those that would be obtained from complete processing. A measure of this difference is given by the standard error. There are about 2 chances in 3 that the difference will be less than 1 standard error, and 19 chances in 20 that it will be less than 2 standard errors. The standard error varies with the size of the estimate and the following table shows the standard errors of various estimate sizes, based on samples of 1 in 2 (applicable to statistics up to September 1972) and 1 in 3 (applicable to statistics thereafter).

Size of quantity estimated (persons)	Approximate standard error of estimate			
	Sample of 1 in 2		Sample of 1 in 3	
	Persons	Per cent of estimate	Persons	Per cent of estimate
10,000	100	1.0	140	1.4
5,000	70	1.4	100	2.0
1,000	32	3.2	45	4.5
500	23	4.5	32	6.3
100	10	10.0	14	14.1

7. Statistics of permanent and long-term movement are based on records of all travellers in this movement and therefore do not contain sampling errors. However, since short-term movement is a component of *total* and *net total* movement, statistics of characteristics of travellers in such movements are subject to sampling errors.

8. A fuller description of the sampling procedures is published in the quarterly bulletin *Overseas Arrivals and Departures* (Reference No. 4.1).

9. A line drawn across a column between two consecutive figures indicates a break in the continuity of the series.

COMMENT

10. In September 1973, overseas arrivals (125,347) exceeded departures (89,667) by 35,680. Except for a small excess of arrivals over departures in July (5,049), September is the first month since February 1973 in which a net gain was recorded.

11. The downward trend in settler arrivals, which first became evident early in 1971, has continued. Total settler arrivals were 9,556 in September (9,872 last year), and 25,273 in the three months ended September (28,903 last year). The number of assisted settlers during the three months ended September 1973 was 11,472; for the corresponding quarter in the last three years, the numbers of assisted settlers arriving were 30,128 in 1970, 24,832 in 1971 and 16,835 in 1972.

12. After adjustment for seasonal variations, the number of overseas visitors arriving in the short-term movement in September 1973 (38,950) was slightly below the seasonally adjusted figure for August 1973 (39,099). Actual arrivals in the three months ended September 1973 were 104,993, compared with 92,406 for that quarter in 1972. The number of Australian residents departing in the short-term movement continues to rise, the figure for the three months ended September 1973 being 164,649, compared with 124,779 in the same quarter in 1972.
