## PREFACE.

THE Annual Statement of the Trade of the Commonwealth of Australia with other countries for the year 1906, and of the Customs and Excise Revenue, has been compiled from documents supplied to this Bureau by the Department of Trade and Customs. A classification under categories had been prepared, but at the special request of that Department, the general arrangement of the previous publications has in this instance been retained.

Table IV., appearing in the Annual Statement for 1905, has been advisedly omitted from this volume, since the values of goods entered for home consumption are merely estimates based upon the amount of net revenue received in each State, and cannot be directly obtained from any official record. On the other hand, the results given in Tables XI., XIII., and XIV. herein have not hitherto been published. These latter compilations give the following information, viz. :—

Table XI. shews the value of goods shipped in Australian ports, as ships' stores, on board of vessels departing for over-sea ports. These were formerly included in general exports. This table was prepared in response to a special request made by the Department of Trade and Customs.

Table XIII. shews the *direct* oversea and interstate trade of each State of the Commonwealth, as recorded by the Department of Trade and Customs. So far as exports are concerned its statistical value depends upon the fact that it shews, not the origin of the goods, but the State from which they are shipped abroad. To supplement its information Table XIV. has been prepared.

Table XIV. shews the oversea and interstate trade of each State of the Commonwealth, as modified by taking account in each State of goods received from other States for transshipment to oversea ports. Thus, so far as the records of the Trade and Customs Department will allow, this table indicates the actual trade of each State.

Excepting a few instances where inconsistencies have been eliminated, thus involving alterations, the whole of the figures given for preceding years have been merely transferred from previous Annual Statements. These earlier figures will disclose the relation of the trade of 1906 to that of past years.

This Statement is issued in two parts, of which Part I. contains Tables I. to XI. inclusive, and Part II. Tables XII. to XXXIV. inclusive. The Preface and Table of Contents will be found repeated in Part II.

# IMPORTS

INTO

## THE COMMONWEALTH OF AUSTRALIA DURING 1906.

**Value of Imports.**—The value of goods imported from Countries beyond the Commonwealth represents the amount on which Duty is payable or would be payable if the duty were *ad valorem*. The value of goods subject to Duty is taken to be the fair market value in the principal markets of the country whence the same were exported, with an addition of 10 per cent. to such market value.

**Quantities.**—Generally, but not invariably, quantities have been shewn in the ordinary trade unit. Where Imports have been declared in packages without an indication being given of the number, capacity, or weight of the articles imported, only the *values* have been inserted.

N.E.I. means "not elsewhere included."

**Import Duties.**—The Duties charged on Imports into the Commonwealth of Australia were collected under the Customs Act, 1901 (No. 6 of 1901), the Customs Tariff, 1902 (No. 14 of 1902), the Customs Tariff, 1906 (No. 14 of 1906—Harvesters and other Agricultural Implements), the Customs Tariff, 1906 (No. 17 of 1906—South African Preference), and provisionally under the Customs Tariff, 1906 (British Preference), from 30th August, 1906.

\* This amount does not include the duties collected on Spirits under the Resolution of the Minister of Trade and Customs, dated 2nd August, 1906. In the States of Victoria, South Australia, Western Australia and Tasmania these duties were paid into a Trust Fund, while in New South Wales and Queensland they were paid into the Treasury, but were refunded on the Resolution failing to become law. The amount £7,365,533, with the exception of the duties before mentioned, represents the amount collected by the Customs Department during the year 1906, and does not agree with the Revenue shown in other Tables in this volume, which represents the payments into the Treasury during the year.

# EXPORTS

FROM

## THE COMMONWEALTH OF AUSTRALIA DURING 1906.

**Value of Exports.**—The value of goods exported is the value in the principal markets of the Commonwealth in the ordinary commercial acceptance of the term.

**Exports—Australian Produce.**—Articles which were partly or entirely manufactured in Australia from imported materials are shewn under the heading "Australian Produce."

**Quantities.**—Generally, though not invariably, quantities have been shewn in the ordinary trade unit. Where exports have been declared in packages without an indication being given of the number, capacity, or weight of the articles exported, only the values have been inserted.

**N.E.I.**—Means "not elsewhere included."

\*The proportions of the Gold Specie shown as the produce of Australia and the produce of other countries are given as approximate only. The net value of Gold Bullion and Gold Ore of foreign origin introduced—by transfer or importation—into the minting States of the Commonwealth, with the addition of the imports of foreign Specie, has been taken to represent the value of the exports of Specie of other than Australian origin.

## PREFACE.

THE Annual Statement of the Trade of the Commonwealth of Australia with other countries for the year 1906, and of the Customs and Excise Revenue, has been compiled from documents supplied to this Bureau by the Department of Trade and Customs. A classification under categories had been prepared, but at the special request of that Department, the general arrangement of the previous publications has in this instance been retained.

Table IV., appearing in the Annual Statement for 1905, has been advisedly omitted from this volume, since the values of goods entered for home consumption are merely estimates based upon the amount of net revenue received in each State, and cannot be directly obtained from any official record. On the other hand, the results given in Tables XI., XIII., and XIV. herein have not hitherto been published. These latter compilations give the following information, viz. :—

Table XI. shews the value of goods shipped in Australian ports, as ships' stores, on board of vessels departing for over-sea ports. These were formerly included in general exports. This table was prepared in response to a special request made by the Department of Trade and Customs.

Table XIII. shews the *direct* oversea and interstate trade of each State of the Commonwealth, as recorded by the Department of Trade and Customs. So far as exports are concerned its statistical value depends upon the fact that it shews, not the origin of the goods, but the State from which they are shipped abroad. To supplement its information Table XIV. has been prepared.

Table XIV. shews the oversea and interstate trade of each State of the Commonwealth, as modified by taking account in each State of goods received from other States for transhipment to oversea ports. Thus, so far as the records of the Trade and Customs Department will allow, this table indicates the actual trade of each State.

Excepting a few instances where inconsistencies have been eliminated, thus involving alterations, the whole of the figures given for preceding years have been merely transferred from previous Annual Statements. These earlier figures will disclose the relation of the trade of 1906 to that of past years.

This Statement is issued in two parts, of which Part I. contains Tables I. to XI. inclusive, and Part II. Tables XII. to XXXIV. inclusive. The Preface and Table of Contents will be found repeated in Part II.

In order to ensure a correct record of the Export Trade of the Commonwealth it has been the practice of the Department of Trade and Customs, since the 1st September, 1903, to record goods transferred by sea from one State to another State of the Commonwealth for transshipment abroad in the following manner:—(i.) As an Outward Inter-State Transfer from the State from which the goods are originally moved. (ii.) As an Inward Inter-State Transfer to the State in which the goods are transhipped abroad. (iii.) As an Export (Oversea) from the State in which the goods are transhipped abroad.

The record thus obtained in each of the several States does not indicate the proportion of the Export Trade of the Commonwealth actually contributed by each State, nor does it correctly indicate the value of the Inter-State Trade.

The following Tables, viz., XIII. and XIV., shew respectively the Oversea and Inter-State Trade of each State as recorded, and the actual Oversea and Inter-State Trade of each State, after the necessary adjustments for transhipped goods have been made.

Goods transferred overland from one State to another and subsequently exported to oversea countries are included in the Exports from the State in which the goods are shipped oversea. In such instances no adjustment can be made, because the necessary data are not available.

**TABLE shewing the Gross Imports and Exports of each State of the Commonwealth from and to Oversea Countries direct, and from and to other States of the Commonwealth during the Year 1906.**

NOTE.—The Inter-State Transfers as shewn in the above Table include the values of goods transferred from one State of the Commonwealth to another for transshipment abroad, and the value of these goods is shewn as an oversea export of the State from which they were finally despatched oversea. The trade of each State after adjustments for transshipments have been made is shewn in the following Table.

TABLE shewing the Imports and Exports of each State of the Commonwealth from and to Oversea Countries and from and to other States of the Commonwealth—adjustments having been made for transshipments—during the year 1906.

NOTE.—In the above Table the value of goods transferred *by sea*, from one State of the Commonwealth to another State thereof, for transshipment to oversea countries, has been included in the oversea exports of the State from which the goods were originally despatched, and has, also, been excluded from the value of the Inter-State Trade.

There being no adequate official record by means of which goods transferred *overland*, and afterwards exported oversea, can be referred to the State of origin, such goods are included in the oversea exports of the State in which the goods were shipped.

NOTE.—The differences between the Customs and Excise Collections shewn above and those shewn in other parts of this volume are represented by the amounts collected at inland stations which are not included in this Table.

Principal and Other Articles Imported into the Commonwealth of Australia, 1902-1906.

NOTE.—The Articles imported during the year 1902 have been classified as nearly as possible on the same basis as in the latter years, but it was a matter of great difficulty, owing not only to the want of uniformity in the classification of articles in the various States, but also to the differences in classification between 1903 and previous years.

\* This item was included in the Returns for the first time in 1905.

† Prior to September, 1903, it was not the practice in the various State Customs Offices to record transhipments. That is to say, goods arriving from beyond the Commonwealth at any Australian port, and thence transhipped to another State, were recorded in the State in which they ultimately arrived, as an import from the transhipping State, and not as they ought to have been, and as they are now, as an overseas import. The figures shown above represent the estimated value of such transhipments for the year 1902 and for the first eight months of 1903. The figures must be added to the recorded imports to obtain the true gross import from Countries beyond the Commonwealth.

Principal and Other Articles of Australian Produce exported from the Commonwealth of Australia, 1902-1906.

NOTE.—Prior to the 1st September, 1903, the methods of recording Exports in the several States of the Commonwealth were not uniform; the figures for the years 1902 and 1903 must, therefore, be taken as approximate only.

\* The totals for the years 1903 and 1904 differ from those previously published on account of adjustments which were made owing to the discovery that false declarations had been made in those years in regard to the value of timber exported to South Africa. The value has been increased by £79,948 for the year 1903 and decreased by £3,301 for the year 1904.

† Does not include the value of Stores shipped in Australian ports on board vessels bound for oversea countries, which in former years were included in Exports.

NOTE.—Prior to the year 1904 it was customary for goods transferred from one State of the Commonwealth to another for transshipment abroad to be recorded only as interstate transfers from the original State, no record being made of the oversea export. Tasmania, however, treated these goods as a direct export. In order to avoid the possibility of transhipped goods being treated as exports both at the place of production and at the place of final export, the present practice, which has been in force since the 1st September, 1903, is to record such goods as an export from the place where they are actually placed on board oversea vessels. The totals shown above as the exports for the years 1902 and 1903 are, therefore, short of the true totals by the value of the transhipped goods. It is not possible to make any reliable estimate of these values, but that they are considerable will be seen from the fact that the recorded value of transhipped goods in the year 1906 was £4,820,448; in 1905, £4,275,611; and in 1904, £3,655,128.
