## PREFACE.

---

The Annual Statement of the Oversea Trade of Australia with other countries, and of the Customs and Excise Revenue, for the year 1942-43, has been compiled from documents obtained under the Customs Act and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Trade and Customs and, in special cases, supplemented from data supplied by various Commonwealth Departments. These data relate to certain goods exported or imported on Government account in respect of which Customs entries were not passed in the normal way.

The Tables of Imports and Exports have been compiled according to an extended Statistical Classification divided into 21 Classes, which came into operation on 1st July, 1922. Since that date the classification has been increased by additional items, and now comprises approximately 700 separate items of Exports and 2,000 items of Imports. An extensive Alphabetical Index of Imports and Exports is given in Table XXVII. (page 515).

Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are stated. In the table of Exports separate details are given of the exports of Australian Produce and Other Produce, whilst in the Imports Table the quantity or value of goods cleared for consumption and particulars concerning the rates of duty are also shown.

Exports are primarily recorded in Australian currency values, and imports are recorded in British currency values. The term "British currency value" is not exactly synonymous with "English Sterling", since imports already expressed in terms of £ s. d. are regarded for duty purposes as being expressed in British currency values. This exception to the general rule is chiefly important in the case of imports from Fiji, New Zealand, and the Union of South Africa, when their currencies are not at par with English currency. In all the tables in this volume, excepting XII., no correction has been made on this account, even when for the sake of brevity the term "Sterling" has been used as a contraction for "British currency values". Converted values are shown in the volume where it has been thought desirable.

For the year 1942-43 endeavour has been made (in Table X.) to classify "civil" imports and "civil" exports separately from those imported free for the use of the Commonwealth Government or shipped overseas on behalf of the Commonwealth Government.

For reasons of economy and at the request of the Publications Committee the size and content of this Bulletin have been substantially reduced.

I am especially indebted to Mr. H. W. Ransom, who has been officer in charge of Trade Statistics during the compilation of this volume, and to Mr. A. A. Sluce and the other officers of the Trade Section, for the care and attention bestowed on the compilation of this Bulletin, the preparation of the material for the printer, and its passage through the press. My thanks are also due to the officers of the Department of Trade and Customs.

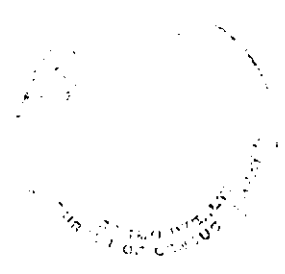

S. R. CARVER,  
Acting Commonwealth Statistician.

# EXPORTS

FROM

## THE COMMONWEALTH OF AUSTRALIA DURING 1942-43.

**Value of Exports.**—The value of goods exported (including cost of containers) is recorded in Australian currency, and is, generally, the value in the principal markets of the Commonwealth in the ordinary commercial acceptance of the term, except for the following commodities, concerning which an alteration in the method of valuation of exports was made as follows:—

From 1st July, 1929.—*Sugar* (a) sold in Australia for export: The value, f.o.b., at which the sugar was sold to oversea buyers; (b) shipped on consignment: The f.o.b. equivalent of the ruling price of such sugar in the London markets. *Goods on which bounty or rebate is payable on export*: The value of the goods in the principal markets of the Commonwealth less the amount of any bounty or rebate.

From 1st July, 1930.—*Wool* (a) sold in Australia for export: The actual price paid for the wool plus the cost of all services incurred in placing the wool on board ship; (b) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932.—*Wheat* (a) sold in Australia for export: The f.o.b. equivalent of the price at which the wheat was sold; (b) shipped on consignment: The f.o.b. equivalent of the current selling price overseas.

From 1st April, 1934.—*Butter* (a) sold in Australia for export: The f.o.b. equivalent of the price at which the butter was sold; (b) shipped on consignment: The f.o.b. equivalent of the current ruling price overseas.

From 1st July, 1934.—*Flour* (a) sold in Australia for export: The f.o.b. equivalent of the price at which the flour was sold; (b) shipped on consignment: The f.o.b. equivalent of ruling Australian prices.

From 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally:—

- (1) Goods sold to overseas buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

All values to be shown in terms of Australian currency, and to include cost of containers.

**Exports.**—Goods exported from Australia are shown under the following headings—“Australian Produce” and “Other Produce”.

“Australian Produce” comprises—(i) Raw materials produced in Australia. (ii) Articles manufactured therefrom. (iii) Articles wholly or partly manufactured in Australia from imported materials.

“Other Produce” represents the re-export of articles produced elsewhere than in Australia.

**Ships' Stores.**—Since the 1st January, 1906, goods shipped as Ships' Stores in Australian Ports on board oversea ships have not been included in Exports. For Ships' Stores see Table V.

**N.E.I.**—Means "not elsewhere included".

**Classification of Articles.**—An Alphabetical Index of the Articles included in the following table will be found at the end of the Bulletin. The items are shown according to the revised Statistical Classification of Exports which came into operation on 1st July, 1922. In all cases where an item was not exported during the year, the Classification number of the item has been omitted from the following table.

# IMPORTS

INTO

## THE COMMONWEALTH OF AUSTRALIA DURING 1942-43.

**Value of Imports.**—The value of goods imported from Countries beyond Australia is recorded in British currency and represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the *Customs Act 1901-1936* provides that “when any duty is imposed according to value, the value for duty shall be the sum of the following :—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction ; or
- (ii) the current domestic value of the goods, whichever is the higher ;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export ; and
- (c) ten per centum of the amounts specified under paragraphs (a) and (b) of this sub-section.”

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country.”

**Quantities.**—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given of the number, capacity, or weight of the articles imported, the values only have been inserted.

**Import Duties.**—The duties charged on Imports into the Commonwealth of Australia during the year 1942-43 were collected in accordance with the *Customs Tariff 1933-39* and subsequent Tariff Resolutions. The rates of Duty shown against the goods cleared have been classified under the “General” and “Preferential” Tariffs. The Tariff under which the goods were cleared is denoted by the particulars shown in parenthesis immediately after the rate of Duty. The following symbols have been used to denote the Tariffs and other particulars :—(G), General ; (P), Preferential (British) ; (C), Preferential (Canada) ; (N), Preferential (New Zealand) ; (Col.), Preferential (British Colonies) ; (I), Intermediate ; (R.I.), Re-imported ; (C'wealth.), Goods imported for use of Commonwealth Government, Consuls, &c. ; (I.P. Act), Industries Preservation Act. Goods cleared under the principal Customs By-law Items (Nos. 174, 404, 404A, 415A1, 415A2, and 434) are shown by the letter “B” in combination with the symbols shown above, e.g. (G.B.) represents cleared under General Tariff By-laws ; (P.B.), cleared under Preferential Tariff By-laws. Dumping duties on certain imports were charged under the provisions of the *Customs Tariff (Industries Preservation) Act 1921-1936*.

**Extra Duty.**—The amounts shown under the heading “Rate of Duty and Gross Amount Received” as “Extra Duty” are amounts which were lodged on deposit and paid into Trust Accounts, and brought to revenue at a later date.

**Primage Duty.**—From the 10th July, 1930, a primage duty of 2½ per cent. *ad valorem* was imposed on all goods, whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff, excepting bullion, specie,

radium and certain Governmental and other special imports. The rate of primage duty was increased to 4 per cent. as from the 6th November, 1930. On the 11th July, 1931, a further amendment came into operation (a) exempting certain aids to primary production and minor imports from primage duty, (b) providing for a rate of 4 per cent. *ad valorem* on a few other items, mainly aids to production, and (c) increasing the *ad valorem* rate of primage duty to 10 per cent. on all other articles imported. Further amendments removing or reducing primage duties have operated at various dates, and the amendment of the 5th October, 1933, provided for exemptions, rates of 4 per cent., 5 per cent., and 10 per cent., together with preferential treatment upon certain goods admitted under the British Preferential Tariff. Preferential treatment was extended as from 1st January, 1937, to specified items admitted under the Intermediate Tariff. The amounts collected under this duty are not shown in this publication against the items to which they refer but only as a total under "Collections" in Tables XXI.—XXIII.

**Special War Duty.**—This duty was imposed from 3rd May, 1940, as a war taxation measure. It comprises a tax of 10 per centum on the Amount of Duties of Customs (which include Primage) on all goods (other than goods covered by Item 229 (c) in the Schedule to the *Customs Tariff* 1933-1939) entered for home consumption on and after the date mentioned. The tax is not regarded as having any relationship to the Duties of Customs in the ordinary acceptance of the term, and the amounts collected do not therefore appear in this volume.

**Exchange Adjustment.**—The Customs Tariff Exchange Adjustment Act 1933-42 first came into operation on 5th October, 1933. The Gross Customs Duty figures shown in subsequent tables do not include amounts allowed as deductions under this Act.

**N.E.I.**, means "not elsewhere included".

**Classification of Items.**—In the following table commodities of analogous character have been arranged under categories. The position of any item will be readily found by reference to the alphabetical index at the end of the Bulletin. The items in the table are shown according to the Statistical Classification of Imports which came into operation on 1st July, 1922. Separate particulars relating to the imports of a large number of new items have been recorded since 1st July, 1922. In all cases where there was no import of a classified item during the year the classification number has been omitted.

(r) Recorded Values. (s) British Currency Values. NOTE.—minus sign (—) indicates excess of Imports.

(a) Does not include the value of Ships' Stores. See Note (a) to Table VII. (b) See Note (c) page 482. (c) The export figures relate only to merchandise actually shipped. Under contracts with the British Government, Australia receives payment for some exportable commodities irrespective of when the goods are shipped. Payments for exportable goods will be somewhat larger than the recorded value of exports and payments relating to the balance of trade will be more favorable than is indicated by the figures shown. (d) See notes (b) and (d) on page 474.
