COMMONWEALTH BUREAU OF CENSUS AND STATISTICS, CANBERRA,
AUSTRALIA.

OVERSEA TRADE.

1950-51.

BULLETIN No. 48.

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER
BY
S. R. CARVER,
ACTING COMMONWEALTH STATISTICIAN.

PREFACE.

The Annual Statement of the Oversea Trade of Australia with other countries, and of the Customs and Excise Revenue, for the year 1950-51, together with comparative figures for previous years, has been compiled from documents obtained under the Customs Act and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Trade and Customs.

The Customs Area, to which all oversea trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including the Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately i.e., the trade of Australia with each particular country is separately recorded and tabulated.

The tables of imports and exports have been compiled according to a revised statistical classification divided into 21 classes, which came into operation on 1st July, 1945. The classification now comprises 2,851 items of imports and 1,478 items of exports. An extensive alphabetical index of imports and exports is given on page 11.

Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are shown. In the table of exports separate details are given of the exports of Australian produce and other produce, while in the imports table the quantity or value of goods cleared for consumption and particulars concerning the rates of duty are also shown.

The countries of destination in respect of exports and of origin in respect of imports are arranged in two divisions, namely—(a) British Countries (including protectorates, mandated territories and territories under condominium) and (b) Foreign Countries. Within each of these divisions the arrangement is alphabetical except that dependencies and possessions of a foreign country follow immediately after that country.

Where, in respect of any item in Tables III. and IV., the total value is less than £3,000 for each of the years under review, details of the States and countries concerned are omitted. Where country details are shown for an item, only United Kingdom and those countries with totals of £2,000 or more in either year are shown separately.

A list of countries of trade is shown in Table 1 together with the countries or territories included under each individual country of trade.

Prior to 15th November, 1947, imports into Australia were recorded in "British Currency Values". As from 15th November, 1947, all imports into Australia have been recorded in Australian Currency.

Import and export values throughout this bulletin are expressed in £ Australian f.o.b.

Full explanatory notes on the methods of recording import values before and after 15th November, 1947, follow immediately after the preface in Oversea Trade Bulletin No. 45, 1947-48.

A supplementary bulletin "Imports Cleared for Home Consumption, 1950-51" was published on 31st October, 1951. This bulletin shows the quantity and value of goods cleared and duty paid thereon under each tariff item classified according to statistical item, the latter being further sub-divided according to country of origin and nature of tariff.

I am especially indebted to Mr. V. Fahey, Supervisor, Trade and Transport Branch, and to Mr. A. A. Sluce and the other officers of the Oversea Trade Section, for the care and attention bestowed on the compilation of this bulletin, and the preparation of the material for the printer. My thanks are due also to the officers of the Department of Trade and Customs.

S. R. CARVER,
Acting Commonwealth Statistician.

EXPORTS

FROM

THE COMMONWEALTH OF AUSTRALIA DURING 1950-51.

Value of Exports.—The value of goods exported (including cost of containers) is recorded in Australian currency and the f.o.b. values have been determined as from 1st July, 1937, as follows:—

- (1) Goods sold to overseas buyers before export. The f.o.b. equivalent of the price at which the goods were sold (e.g., as regards wool, the actual price paid by the overseas buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (2) Goods shipped on consignment.—The Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

Exports of "Australian Produce" and "Other Produce".—Goods exported from Australia are shown under two headings—"Australian Produce" and "Other Produce".

"Australian Produce" comprises—(i) Raw materials produced in Australia; (ii) Articles manufactured therefrom; (iii) Articles wholly or partly manufactured in Australia from imported materials.

"Other Produce" represents the re-export of articles produced elsewhere than in Australia.

N.E.I.—Means "not elsewhere included".

N.E.S.—Means "not elsewhere specified".

Classification of Articles.—An Alphabetical Index of the Articles included in the following table will be found on page II (Table II.). The items are shown according to the revised Statistical Classification of Imports and Exports which came into operation on 1st July, 1945. In all cases where an item was not exported during the past two years, the classification number of the item has been omitted from the following table. Where the number of a statistical item has been changed since 1949-50 the previous number is shown in parenthesis.

IMPORTS

INTO

THE COMMONWEALTH OF AUSTRALIA DURING 1949-50 AND 1950-51.

Value of Imports—An amendment to the *Customs Act* 1901-1936 which has operated from 15th November, 1947, provides for the value of goods imported into Australia to be recorded in *Australian currency* and this value represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the *Customs Act* 1901-1948 provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
(ii) the current domestic value of the goods, whichever is the higher;
(b) all charges payable or ordinarily payable for placing the goods free on board at the port of export;

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country."

In all tables in this Bulletin the value is recorded in *Australian currency*.

Quantities.—Generally, but not invariably, quantities have been shown in the ordinary trade unit. Where the cental is used, the unit equals 100 pounds avoirdupois. Where imports have been declared in packages without an indication being given to the number, capacity, or weight of the articles imported, the values only have been inserted.

Import Duties.—The duties charged on Imports into the Commonwealth of Australia during the year 1950-51 were collected in accordance with the *Customs Tariff* 1933-1950 and subsequent Tariff Resolutions. The rates of Duty shown against the goods cleared have been classified under the "General" and "Preferential" Tariffs. The Tariff under which the goods were cleared is denoted by the particulars shown in parentheses immediately after the rate of Duty. The following symbols have been used to denote the Tariffs and other particulars:—(G), General; (G.B.), General—By-law; (M), Most-Favoured-Nation; (M.B.), Most Favoured Nation—By-law; (P), Preferential (British); (P.B.), Preferential (British)—By-law; (C), Preferential (Canada); (C.B.), Preferential (Canada)—By-law; (N), Preferential (New Zealand); (N.B.) Preferential (New Zealand)—By-law; (Col.), Preferential (British Colonies); (Col. B.) Preferential (British Colonies)—By-law; (R.I.), Re-imported; (C'wealth), Goods imported for use of Commonwealth Government, Consuls, &c.; (I.P. Act), Industries Preservation Act. Dumping duties on certain imports were charged under the provisions of the *Customs Tariff (Industries Preservation) Act* 1921-1936.

Extra Duty.—The amounts shown under the heading "Rate of Duty and Gross Amount Received" as "Extra Duty" include amounts which were lodged on deposit and paid into Trust Accounts, and brought to revenue at a later date.

Primage Duty.—From 10th July, 1930, a primage duty of 2½ per cent. *ad valorem* was imposed on all goods, whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff, excepting bullion, specie, radium and certain Governmental and other special imports. The rate of primage duty was increased to 4 per cent. as from 6th November, 1930. On 11th July, 1931, a further amendment came into operation (a) exempting certain aids to primary production and minor imports from primage duty, (b) providing for a rate of 4 per cent. *ad valorem* on a few other items, mainly aids to production, and (c) increasing the *ad valorem* rate of primage duty to 10 per cent. on all other articles imported. The amendment of 5th October, 1933, provided for exemptions, rates of 4 per cent., 5 per cent., and 10 per cent., together with preferential treatment upon certain goods admitted under the British Preferential Tariff. Preferential treatment was extended as from 1st January, 1937, to specified items admitted under the Intermediate Tariff. Further amendments removing or reducing primage duties have operated at various subsequent dates. The amounts collected under this duty are not shown in the publication against the items to which they refer but only as a total under "Collections" in Tables XXVII.-XXIX.

N.E.I., means "not elsewhere included".

N.E.S., means "not elsewhere specified".

Classification of Items.—In the following table commodities of analogous character have been arranged under categories. The position of any item will be readily found by reference to the alphabetical index, Table II. The items in the table are shown according to the revised Statistical Classification of Imports and Exports which came into operation on 1st July, 1945. In all cases where there was no import of a classified item during the past two years the classification number has been omitted.
