**LOCAL GOVERNMENT AUTHORITY AMALGAMATIONS**

Amalgamations of Local Government Authorities commenced during the reference period (1 October 1992 to 30 September 1993) for this edition with the formation of the City of Greater Geelong on 18 May 1993. Statistics in this publication are collated from data collected on Victoria Grants Commission returns. For the year ended 30 September 1993 component municipalities of the City of Greater Geelong reported individually to the Victoria Grants Commission and are therefore presented individually in this edition. *Care should be taken when comparing statistics for component municipalities with statistics in previous editions. Boundary changes to municipalities occurring at the time of amalgamations are reflected in statistics in this edition.*

## EXPLANATORY NOTES

### Introduction

1. This publication contains statistics of the financial activities of Victorian municipalities for the year 1992-93 (i.e. the year ended 30 September 1993). To present uniform data for Municipalities in Victoria for 1992-93, statistics have been collated from data items collected on a *revised* Victoria Grants Commission form based on Financial Reporting by Local Governments (Australian Accounting Standard AAS 27). Data from 1989-90 to 1991-92 was collated using the Victorian Minimum Data Set.

### Scope

2. As at 30 September 1993, the whole of Victoria except for unincorporated areas was under the control of 205 municipalities which exercise powers and functions granted to them by statute, principally the Local Government Act. Although the City of Greater Geelong was formed on 18.5.1993, component municipalities reported on an individual basis to the Victoria Grants Commission for the year ended 30 September 1993. Therefore this edition continues to present data for 210 municipalities in Victoria. However care should be taken when comparing data for component municipalities of the City of Greater Geelong with data in previous editions as data reflect boundary changes occurring at the time of formation.

3. Data are derived from two sources, namely the Victoria Grants Commission return and the Consolidated Financial Statements for the year ended 30 September 1993. Reporting for both these documents are based on Financial Reporting by Local Governments (Australian Accounting Standard AAS 27). Victorian Local Government authorities are required to present data using accrual accounting.

4. Services provided by municipalities are partly financed by local taxes (rates) which are levied on the owners or occupiers of rateable property in each municipality. In previous years municipalities rated on the net annual value or site value of a rateable property, or on a combination of both. In 1992-93 five municipalities i.e. Broadford, Chiltern, Omeo, Tullarook and Woorayl have rated on capital improved value. These valuations have been excluded in this edition.

### Definitions

5. Data presented in this edition for 1992-93 are typically aggregations of line items reported in the Victoria Grants Commission Returns for each

Municipality. The method of aggregation is based on the *Classifications Manual for Government Finance Statistics Australia, 1989* (1217.0) and uses Australian Accounting Standard (AAS) 27 "Financial Reporting by Local Government".

Terms for economic type transactions used in this bulletin are described here in brief. Fuller definitions of transactions are given in the *Classifications Manual for Government Finance Statistics Australia, 1989* (1217.0).

**Capital expenditure;** Expenditure on new or secondhand fixed assets.

**Current expenditure;** Represents purchases of goods and services. That is, cost of providing services, wages and salaries, repair and maintenance of roads, bridges, buildings, etc.

**Government general purpose grants;** Includes Commonwealth and State grants as tax revenue sharing grants, Local Government assistance grants and other untied grants.

**Government specific capital grants;** Commonwealth and State grants for the purchase or construction of new or existing fixed assets, such as roads, buildings, land and plant and equipment.

**Government specific current grants;** Grants allocated to assist with operating expenses or running costs of services, including repairs and maintenance of plant and equipment, and the purchase of consumable items.

**Charges;** Income from sales of goods or services or rent of properties.

**Financial Institutions;** Covers government and privately owned banks, finance companies, money market organisations, building societies and credit unions, life insurance offices, superannuation funds, fire, marine and general insurance, health and friendly societies, investment companies, unit trusts, and industry development corporations.

### Public Trading Enterprises (PTEs)

6. According to the ABS definition of Public Sector Enterprise units, legal entities which engage in both activities relevant to public trading enterprises and general government enterprises are split into separate enterprises where the legal entity is a local government authority with any of the following types of trading undertakings:

- (a) electricity undertakings;
- (b) gas undertakings;
- (c) abattoir undertakings;
- (d) market undertakings;

- (e) any other trading undertaking with annual revenue greater than \$500,000 measured in 1977-78 prices.

7. Sewerage and Water supply in Victoria falls under the authority of the Department of Conservation and Resources, with the exception of a few Municipalities which are granted power to supply under the Local Government Act.

8. Excluded are Public Enterprises mainly engaged in the production of goods and/or services for General Government Enterprises.

9. In Victoria, Councils engage in the following trading activities: electricity; gas; abattoirs; markets and 'other activities'. The major activity undertaken by Municipalities is the reticulation of electrical power. Twelve Municipalities, all except one being in the Melbourne Major Statistical Region, supply electricity under bulk supply arrangements with the SEC.

#### **Australian Standard Geographical Classification (ASGC) (1216.0)**

10. The ABS has prepared the ASGC for use in the collection, compilation and publication of its statistics. It is a system for the classification of statistical units by geographical areas. Three hierarchical structures in Edition 2.4 have been used in this publication:

- (i) The Detailed Main Structure;
- (ii) The Detailed Statistical Region Structure;
- (iii) The Legal LGA Structure.

Major Statistical Regions and Statistical Regions from the detailed Statistical Region structure have been used to represent the metropolitan area. Statistical Divisions from the detailed Main Structure and Statistical Regions from the detailed Statistical Region structure have been used to represent the ex-Metropolitan area. All Municipalities are represented using the Legal Local Government areas from the Legal LGA structure.

#### **Reliability**

11. Financial data collected for this publication are checked against the statement of accounts of each municipality. In some cases differences between local government accounting terminology and procedures on the one hand and economic or statistical requirements on the other may affect the comparability of the treatment of certain financial transactions. Overheads are not allocated on a standard basis in Victoria and for this reason functional expenditure data are not comparable between municipalities. For details of the concepts and special treatments required to generate the

statistics in this publication refer to *Classifications Manual for Government Finance Statistics Australia, 1989* (1217.0).

#### **Acknowledgements**

12. Local Government Finance Statistics for Victoria are collected jointly with the Victoria Grants Commission (VGC). The ABS acknowledges the assistance of the VGC in this collection.

#### **Related publications**

13. A full description of the powers, duties, and activities of municipalities can be found in the Local Government chapter of the *Victorian Year Book, 1986* (1301.2).

#### **Symbols and other usages**

- r figure or series revised since previous issue
- .. not applicable
- nil or rounded down to zero
- n.e.c. not elsewhere classified

The designation of City (C), Town (T), Borough (B), Rural City (RC) or Shire (S) shown against the name of each municipality indicates its status at 30 September, 1993.

Where figures have been rounded, discrepancies may occur between sums of component items and totals.
