

CATALOGUE NO. 5609.0 EMBARGOED UNTIL 11.30 A.M. 23 SEPTEMBER 1992

HOUSING FINANCE FOR OWNER OCCUPATION, AUSTRALIA JULY 1992

MAIN FEATURES

The provisional trend estimate of the number of dwelling units for owner occupation for which finance was committed to individuals in July 1992 was 36,760, an increase of 771 dwelling units (2.1%) over June 1992 and an increase of 6,533 dwelling units (21.6%) over July 1991. It should be noted that trend data for the most recent months are subject to revision as additional observations become available — see Part 2 of the analytical notes.

Although the provisional trend estimates for the number of dwelling units financed again increased in all three lending categories in July 1992 compared with June 1992, the rate of increase has been showing a gradual decline in recent months. The trend estimates for each purpose of commitment increased as follows: Construction of dwellings, 1.7 per cent, purchase of newly erected dwellings, 0.3 per cent, purchase of established dwellings, 2.4 per cent.

Seasonally adjusted, finance was committed to individuals to finance 35,707 dwelling units for owner occupation in July

1992, 1,951 dwelling units (5.2%) less than in June 1992, but 3,720 dwelling units (11.6%) more than in July 1991.

The value of secured housing finance commitments for owner occupied dwellings, in seasonally adjusted terms (excluding alterations and additions), totalled \$2,780.6 million in July 1992, down \$186.7 million (6.3%) on June 1992 but up \$442.1 million (18.9%) on July 1991.

In original terms, there were 36,498 dwelling units financed during the month of July 1992, 683 dwelling units (1.9%) more than in June 1992 and 3,340 dwelling units (10.1%) more than in July 1991.

Of the total number of dwellings being financed in July 1992, 11.1 per cent were being refinanced through another institution. The proportion of refinancing in July 1992 varied significantly between the States, ranging from 4.9 per cent in the Northern Territory to 14.0 per cent in Western Australia.

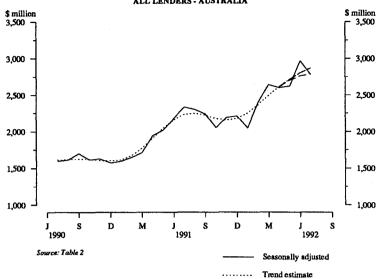

NOTE 1: The type of lender statistics in this bulletin reflect the change of the St George Building Society, in New South Wales and the Australian Capital Territory, and the Victorian Savings and Loans Society, in Victoria, to the St George Bank. Lending activity data reported by St George Bank are included from July 1992 onwards under the 'All Banks' classification; data for the St George Building Societies and the Victorian Savings and Loans Society are recorded up to June 1992 under the 'Permanent Building Societies' classification:

NOTE 2: This July 1992 issue coincides with the introduction of a revised list of lending institutions resulting from a coverage survey conducted in respect of the 1991 calendar year. For details please refer to paragraphs 4, 5 and 6 of the Explanatory Notes on Page 11 of this publication. Readers should be aware that as a result of this a number of series have been revised back to July 1989.

INQUIRIES

- for further information about statistics in this publication contact Mr John Carson on Canberra (06) 252 7110 or Harry Wilson (06) 252 6170 or any ABS State office.
- for information about other ABS statistics and services please refer to the back page of this publication.

- Revised trend if seasonally adjusted

NOTES

ANALYTICAL NOTES

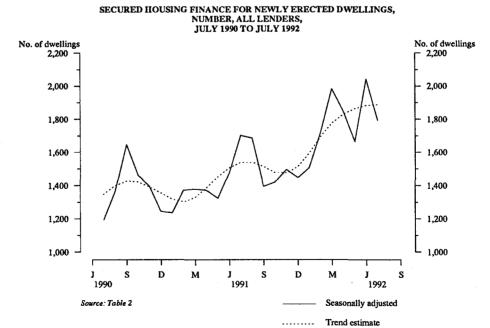

PART 1: Comment on Major Aggregates

Provisional trend estimates continued to show an upward movement for all three purpose of loan categories, although the rate of increase is slowing, most noticeably in the category newly erected dwellings (see Table 2). Trend estimates for the most recent months are subject to revision. For a detailed explanation of the reliability of trend estimates refer to Part 2 of these analytical notes entitled 'Reliability of Contemporary Trend Estimates'.

The trend estimate for commitments of finance to individuals for the construction of dwellings in July 1992 was 7,151 dwelling units, up 1.7 per cent on June 1992. As was the case last month, the increase in the trend was less than in previous months. Seasonally adjusted, finance

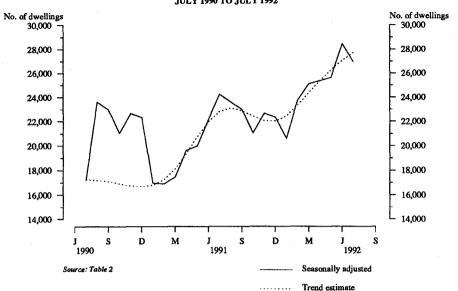

was committed to individuals for the construction of 6,981 dwelling units in July 1992, 172 dwelling units (2.4%) less than in June 1992 but 936 dwelling units (15.5%) more than in July 1991.

The trend estimate for commitments to individuals for the purchase of newly erected dwellings reached 1,889 dwelling units in July 1992, up 6 dwelling units (0.3%) on June 1992. Seasonally adjusted, the number of newly erected

dwelling units for which finance was committed for purchase by individuals in July 1992 was 1,792, 250 dwelling units (12.2%) less than in June 1992, but 90 dwelling units (5.3%) more than in July 1991.

SECURED HOUSING FINANCE FOR ESTABLISHED DWELLINGS, NUMBER, ALL LENDERS, JULY 1990 TO JULY 1992

The trend estimate for commitments to individuals for the purchase of established dwellings reached 27,721 dwelling units in July 1992, up 2.4 per cent on June 1992, continuing the upward trend which began in January 1992. Seasonally adjusted, the number of established dwellings

for which finance was committed for purchase in July 1992 was 26,934, 1,529 dwelling units (5.4%) less than in June 1992 but 2,694 dwelling units (11.1%) more than in July 1991.

PART 2: Reliability of Contemporary Trend Estimates

The trend estimates in this publication have been derived by applying a 13 term Henderson-weighted moving average to all except the last six months of the seasonally adjusted series. The last six monthly trend estimates have been obtained by applying surrogates of the Henderson-weighted averages to the seasonally adjusted series. (Further details concerning trend estimates in general, including more information on the Henderson methodology and the 'end point' problem, can be obtained in the information paper A Guide to Smoothing Time Series — Estimates of Trend (1316.0).)

While this procedure enables trend data for the latest period to be produced, it also results in revisions in later bulletins to the trend estimates for the most recent months as additional observations become available. Generally, the size of revisions to the trend estimates tends to be larger the greater the volatility of the original series. Revisions of trend estimates will also occur with revisions to original data and re-estimation of seasonal adjustment factors.

Analysis of housing finance series has shown that the original series can be volatile and that the initial estimates of a month's trend value can be revised substantially. In particular, some months can elapse before a turning point in the trend series is identified reliably.

A number of ways of indicating the reliability of trend estimates have been under consideration. The following paragraphs outline an approach that illustrates the potential for revision of contemporary trend estimates.

The table below presents trend estimates of the number of dwelling units for which finance was committed for the six months February to July 1992. To illustrate the possible impact of future months observations on the trend estimates for the latest months, the table shows the revisions to the trend estimates that will result if the seasonally adjusted estimate for next month (August 1992) is five per cent higher or lower than this month. Five per cent was chosen because analysis of monthly movements over the last ten years in the seasonally adjusted series for both number of dwellings and value of commitments, showed that the average monthly percentage change, without regard to sign, has been about five per cent.

If the seasonally adjusted estimate for the number of dwelling units increases in August 1992 by 5 per cent, to 37,492, the trend movement for that month will be +1.1 per cent. The movements in the trend estimates for May, June and July 1992 which are currently estimated to be +3.3 per cent, +2.6 per cent and +2.1 per cent respectively, will be revised to +3.4 per cent, +2.7 per cent and +2.1 per cent. On the other hand, a 5 per cent seasonally adjusted decline in the number of dwellings in August 1992 to 33,922, will produce a trend movement of -0.2 per cent for August and the movements in the trend estimates for May, June and July 1992 will be revised to +2.7 per cent, +1.6 per cent and +0.9 per cent respectively.

The graphs on pages 1 and 2 of this publication illustrate the potential degree of revision of the last three months of the trend series.

EXPLANATORY NOTES

Introduction

This publication presents statistics of secured housing finance commitments made by significant lenders to individuals for the construction or purchase of dwellings for owner occupation.

Scope

2. The following types of lender fall within the scope of these statistics: banks, permanent building societies, co-operative housing societies, credit unions/co-operative credit societies, life or general insurance companies, other financial corporations registered under the *Financial Corporations Act 1974*, general government enterprises, superannuation funds, providers of consumer finance registered with State credit tribunals not otherwise included above and organisations raising funds through the secondary mortgage market for approved home buyers under various State government housing schemes.

Coverage

3. The statistics cover only those lenders listed in paragraph 2 that are defined as 'significant lenders'. Significant lenders are the largest lenders, accounting in aggregate for at least 95 per cent of the Australian total and at least 90 per cent of each State total of finance commitments to individuals for the construction or purchase of dwellings for owner occupation.

Coverage revision

- 4. The list of lenders covered by the statistics requires revision periodically to ensure the inclusion of new significant lenders and the exclusion of insignificant lenders from the monthly statistics. A new list of lenders based on a coverage survey done for the calendar year 1991 has been introduced with the July 1992 issue of this bulletin. Each of the lenders defined as a significant lender following this latest revision committed funds of more than \$16 million Australia wide during the calendar year 1991.
- 5. These significant lenders accounted for the following percentages of total housing finance commitments for owner occupation made by all lenders during the calendar year 1991 -

	Per cent
Australia	96.1
NSW	95.0
Vic.	96.4
Qld	97.3
SA	97.4
WA	96.5
Tas.	93.9
NT	92.9
ACT	96.4

6. The percentage contributions of these significant lenders to total lending by type of lender for the calendar year 1991 were -

	Per cent
Banks	100.0
Permanent building societies	97.0
Other lenders	90.3

Statistical period

- 7. While the statistics are described as being for calendar months, it should be noted that:
 - (a) in the case of some of the larger banks, the data relate to a month ending on the last Wednesday; and
 - (b) in the case of *other lenders*, some have accounting periods which do not correspond exactly to a calendar month and their figures are used without adjustment.

Definitions and descriptions of data items

- 8. Lending commitment. A lending commitment is a firm offer to provide finance which has been or is normally expected to be accepted. For a contract of sale the commitment value is the sale value of the dwelling less any deposit. Commitments to provide housing finance to employees and commitments accepted and cancelled in the same month are included.
- 9. Dwelling. A dwelling is classified as either a house or other dwelling:
 - (a) A house is a single self-contained (i.e. includes bathing and cooking facilities) place of residence detached from other buildings occupying a separate titled block of land;
 - (b) an other dwelling is a single-self contained place of residence other than a house defined in (a) above. Examples of other dwellings are flats, home units, town houses, terrace houses, etc.
- 10. Dwelling Units. This item refers to the number of houses and other dwellings for which commitments have been made on the security of first mortgage or contract of sale.
- 11. Alterations and additions. Covers all structural and non-structural changes to dwellings which are integral to the functional and structural design of the dwelling e.g. garages, carports, pergolas, reroofing, recladding, etc. but excludes swimming pools, ongoing repairs, and maintenance and home improvements not involving building work.
- 12. Construction of dwellings. This item represents commitments made to individuals to fund, by way of progress payments, the erection of dwellings which they will occupy.
- 13. Purchase of newly erected dwellings. This item represents the purchase of dwellings which have been completed or will be completed within a period of twelve months preceding lodgement of the loan application where the applicant is, or will be, the first occupant.
- 14. Purchase of established dwellings. This item represents the purchase of dwellings which have been completed for a period greater than twelve months preceding the lodgement of the loan application or, if purchased within twelve months, the applicant is not the original occupant.

15. Refinancing. Refinancing is limited to commitments to re-finance existing loans where the re-financing institution is not the same institution that made the original loan. Re-financing by an institution of its own loans is excluded from the statistics. It should be noted, however, that all commitments to finance a change of residence by the borrower are treated as new lending commitments, even if the change of residence is effected by re-financing an existing loan.

Seasonally adjusted and trend estimates

- 16. In the seasonal adjustment of these series, account has been taken not only of normal seasonal factors, but also of 'trading day' effects (arising from the varying reporting practices of the lenders) and the influence of Easter which may, in successive years, affect figures for different months. Details of the methods used in seasonally adjusting these series are available on request.
- 17. Seasonal adjustment procedures do not aim to remove the irregular or 'non-seasonal' influences which may be present in any particular month. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after seasonal adjustment.
- 18. The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates have been derived by applying a 13-term Henderson weighted moving average to the seasonally adjusted series. For an explanation of how the trend estimates presented in this publication are derived please refer to the Analytical Notes at the beginning of the publication.

Unpublished data

19. More detailed dissections of the data in this publication may be made available on request. Generally a charge is made for providing this information. Inquiries should be made to the officer named in the Phone Inquiries section of the inquiries box at the front of this

publication or by writing to Financial Surveys Section, ABS, P.O. Box 10, Belconnen, A.C.T. 2616.

Revisions

20. Revisions to previously published statistics are included in issues of this publication as they occur.

Commitments not advanced at end of period

21. In principle, 'commitments not advanced at end of period' presented in Table 4 are derivable by adding total new housing commitments plus alterations and additions less cancellations of commitments less commitments advanced during the period to the balance of commitments at the end of the previous period. In practice, however, revisions and other adjustments may mean that such a derivation is inexact.

Related publications

22. Users may also wish to refer to the following publications which are available on request:

Personal Finance, Australia (5642.0) — issued monthly Commercial Finance, Australia (5643.0) — issued monthly

Lease Finance, Australia (5644.0) — issued monthly

23. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Symbols and other usages

- nil or rounded to zero
- . not applicable
- n.y.a. not yet available
- 24. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data is available on electronic media. Selections of the most frequently requested data are available, updated daily, on DISCOVERY (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC-AUSSTATS service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
