EXPLANATORY NOTES

Introduction

For the purposes of these statistics a cash management trust is defined as a unit trust which:

- (a) is governed by a trust deed;
- (b) is open to the public; and
- (c) generally confines its investments (as authorised by the trust deed) to financial securities available through the short-term money market.

Coverage

2. All Cash Management Trusts operating in Australia are included in the statistics presented in this publication. However, the number of trusts may vary from month to month due to the establishment or closure of individual trusts.

Asset valuation

3. The value of total assets presented in Table 3 has been compiled on a 'cost plus accrued income' basis. Where trusts supply individual categories of assets on a cost of investment basis, the accrued investment income which is not yet received is supplied as a separate item.

Revisions

4. Revisions to previously published statistics are included in this publication.
