

CHAPTER III.—WAGES AND HOURS.

§ 1. Arbitration and Wages Boards Acts and Associated Legislation.

1. **General.**—Particulars regarding the operation of Commonwealth and State Acts for the regulation of wages, hours and conditions of labour were first compiled for the year 1913 and revised particulars have appeared annually in each issue of the Labour Report.

2. **Laws Regulating Industrial Matters.**—The principal Acts in force regulating rates of wage, hours of labour, and working conditions generally in both Commonwealth and State jurisdictions at the end of 1954 are listed below :—

COMMONWEALTH.

Conciliation and Arbitration Act 1904-1952.
 Defence Transition (Residual Provisions) Act 1952.
 Public Service Arbitration Act 1920-1952.
 Coal Industry Act 1946-1952.
 Stevedoring Industry Act 1949-1954.
 Snowy Mountains Hydro-electric Power Act 1949-1952.
 Navigation Act 1912-1953.

STATES.

New South Wales	..	Industrial Arbitration Act 1940-1954. Coal Industry Act 1946-1951.
Victoria	..	Labour and Industry Act 1953.
Queensland	..	Industrial Conciliation and Arbitration Acts, 1932 to 1953.
South Australia	..	Industrial Code, 1920-1951.
Western Australia	..	Industrial Arbitration Act 1912-1952. Mining Act 1904-1952.
Tasmania	..	Wages Boards Act 1920-1951.

3. **Methods of Administration.**—(i) *Commonwealth*—(a) *Commonwealth Conciliation and Arbitration Act.*—Under placitum (xxxv) of section 51 of the Commonwealth of Australia Constitution, the Commonwealth Parliament is empowered to make laws with respect to “conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State”. The Parliament has made such a law, namely, the Conciliation and Arbitration Act.

This Act defines “an industrial dispute” as a “dispute (including a threatened, impending or probable dispute) as to industrial matters, which extends beyond the limits of any one State and a situation which is likely to give rise to a dispute as to industrial matters which so extends”. Such disputes are dealt with, in part, by a Court constituted under the Act, and otherwise by Conciliation Commissioners appointed under the Act. At the present time, the Court comprises a Chief Judge and six other Judges, whilst there is a Chief Conciliation Commissioner and nine other Conciliation Commissioners.

The Act provides that where a State award or determination is inconsistent with an award issued by the Commonwealth Authority, the latter shall prevail, and the Commonwealth Court can also restrain a State Authority from proceeding in a matter already covered, or being dealt with, by the Commonwealth Authority.

During the 1939-45 War, the powers of the Court were considerably enlarged under National Security (Industrial Peace) Regulations to secure the prompt settlement of industrial disputes. The Defence Transition (Residual Provisions) Act 1952 provides for the continuation of awards, orders, determinations or decisions made under these National Security Regulations unless revoked by a Commonwealth or State industrial authority.

The allocation of the respective powers and functions of the Court and the Conciliation Commissioners is defined by Statute. The Court deals with industrial disputes in so far as they concern the standard hours of work in an industry, the basic wage for both adult males and adult females and questions relating to long service leave with pay, but all other matters in dispute are dealt with by a Conciliation Commissioner. There is, however, provision for a Conciliation Commissioner to refer any dispute or any part of a dispute to the Court for determination, but a Conciliation Commissioner is entitled to so refer a matter only if he is of the opinion, and if the Chief Judge concurs in that opinion, that the matter is one of such importance that, in the public interest, it should be dealt with by the Court.

In addition to the functions outlined above, the Act empowers the Court to make orders concerning the interpretation, and relating to the enforcement, of orders and awards. The Act also makes provision for the registration of associations of employees and employers, and certain powers in connexion therewith are, by the Act, given to the Court.

Although, in certain circumstances, there is a right of approach to the High Court with respect to decisions of the Court, the circumstances are very limited, and, for practical purposes, it can be said that decisions given by the Court are final. Decisions given by a Conciliation Commissioner, however, may be made the subject of appeal to the Court of Conciliation and Arbitration provided the party desiring to appeal can satisfy the Chief Judge, by way of application for leave to appeal, that the order or award the subject of the application deals with a matter of such importance that leave to appeal should, in the public interest, be granted.

Whilst many of the minor powers of the Court may be exercised by a Court constituted by one Judge, in all major matters, e.g., questions relating to the basic wage, standard hours of work, long service leave, applications concerning registered organizations and also appeals from orders or awards made by Conciliation Commissioners, the Court must be constituted by at least three Judges one of whom may be the Chief Judge.

The Conciliation Commissioners have been given wide powers, without technical and artificial hindrances, to go to the cause of impending industrial trouble in the particular industries to which they have been assigned and to endeavour to remove the cause of the trouble by conciliation between the parties. If this fails, the Conciliation Commissioner should then, but not until then, with no further formalities, act as arbitrator to prevent or settle the dispute by making an award or order. Prior to 1947, there was no division of work as between the Court and Conciliation Commissioners, a dispute being dealt with by either one or other part of the Tribunal, with the

exception that questions relating to the basic wage and standard hours could only be dealt with by at least three Judges of the Court sitting together. There was also, at that time, a right of appeal to the Court against a decision of a Conciliation Commissioner. The amending Act of 1947 brought about the division of work between the two parts of the Tribunal, and, at the same time, made decisions of Conciliation Commissioners final. However, a further amending Act passed in 1952 gives the Full Court (consisting of not less than three Judges) power to hear appeals from decisions of Conciliation Commissioners, from decisions of single Judges appointed to deal with industrial disputes in the maritime industry and the Snowy Mountains Hydroelectric Scheme and from decisions of the Public Service Arbitrator. From 19th December, 1952, jurisdiction for the settlement of interstate disputes in the maritime industry has been transferred from a Conciliation Commissioner to a single Judge of the Court. The Snowy Mountains Hydroelectric Power Act 1951 also gives a single Judge of the Court power to hear and determine industrial disputes affecting employees working on this project.

The function of preventing and settling industrial disputes exercised by the Stevedoring Industry Commission from 1947 to 1949, in which latter year it was reconstituted as the Stevedoring Industry Board, is now vested in the Commonwealth Court of Conciliation and Arbitration and is exercised by a single Judge, who may refer questions of law for the opinion of the Full Court.

(b) *Coal Industry Tribunal*.—The Coal Industry Tribunal was established under the Commonwealth Coal Industry Act 1946 and the New South Wales Coal Industry Act 1946 to consider and determine interstate disputes and, in respect of New South Wales only, intra-State disputes between the Australian Coal and Shale Employees' Federation and employers in the coal-mining industry.

Special war-time bodies were created to deal with specific aspects of the coal industry, reference to which was made in earlier issues of the Labour Report (*sec* No. 41, page 53). Under amending legislation passed jointly by the Commonwealth and New South Wales Parliaments in 1951 the Tribunal was vested with authority to deal with all interstate industrial disputes in the coal-mining industry, irrespective of the trade union involved, and in the case of New South Wales intra-State disputes also. The Tribunal consists of one person who may appoint two assessors nominated by the parties to advise him in matters relating to any dispute. Subsidiary authorities are the Local Coal Authorities and Mine Conciliation Committees who may be appointed to assist in the prevention and settlement of certain disputes. An amendment to the Commonwealth Coal Industry Act passed in 1952 makes it obligatory for the Tribunal to use conciliation and arbitration to settle industrial disputes.

(c) *Commonwealth Public Service Arbitrator*.—Wages, hours of labour and working conditions in the Commonwealth Public Service are regulated by the Commonwealth Public Service Arbitrator, under powers conferred by the Public Service Arbitration Act 1920-1952. The system of arbitration commenced to operate in 1912, cases being heard by the Commonwealth Court of Conciliation and Arbitration as part of the ordinary work of that Court. From 1920, however, the control was transferred to the Arbitrator, who is appointed by the Government for a term of seven years, and who need not necessarily have legal qualifications. In 1952 amending legislation made provision for reference to the Full Court of matters of general importance and also for appeals from decisions of the Arbitrator.

(d) *Australian Capital Territory Industrial Board*.—The regulation of industrial matters in the Australian Capital Territory under a local Industrial Board commenced in the year 1922. An amending Ordinance gazetted on 19th May, 1949, however, abolished the Board and transferred its functions to authorities established by the Commonwealth Conciliation and Arbitration Act. A separate Registry of the Commonwealth Court of Conciliation and Arbitration was established in Canberra. Industrial matters formerly dealt with by the Industrial Board are now determined by either the Commonwealth Court of Conciliation and Arbitration or the Conciliation Commissioner assigned to the Australian Capital Territory.

Details of the provisions relating to the Board during its period of jurisdiction may be found in issues of the Labour Report prior to No. 37 (see No. 36, p. 51).

(ii) *States*—(a) *New South Wales*.—The controlling authority is the Industrial Commission of New South Wales, consisting of a President and five other Judges. Subsidiary tribunals are the Conciliation Commissioners, the Apprenticeship Commissioner, Conciliation Committees and Apprenticeship Councils constituted for particular industries. Each Conciliation Committee consists of a Conciliation Commissioner as chairman and equal numbers of representatives of employers and employees. The Apprenticeship Commissioner and the members of the Conciliation Committee for an industry constitute the Apprenticeship Council for the industry. These subsidiary tribunals may make awards binding on industries, but an appeal to the Industrial Commission may be made against any award. Special Commissioners with conciliatory powers only may be appointed. Compulsory control commenced in 1901, after the earlier Acts of 1892 and 1899 providing for voluntary submission of matters in dispute had proved abortive.

(b) *Victoria*.—The authorities are separate Wages Boards for the occupations and industries covered, each consisting of a chairman and equal numbers of representatives of employers and employees, and a Court of Industrial Appeals, the latter presided over by a Judge of the County Court. The system was instituted in the State in 1896, and represented the first example in Australia of legal regulation of wage rates.

(c) *Queensland*.—The authority is the Industrial Court, consisting of a Judge of the Supreme Court and not more than four members appointed by the Governor in Council. Legal control was first instituted in 1907 with the passing of the Wages Board Act.

(d) *South Australia*.—The principal tribunal is called the Industrial Court; there are also Industrial Boards consisting of a chairman and equal numbers of representatives of employers and employees for the various industries, and a Board of Industry. The Court is composed of the President (a person eligible for appointment as a Judge of the Supreme Court) who may be joined by two assessors who must be employed in the industry concerned. Deputy Presidents may also be appointed. The "Living Wage" is declared by the Board of Industry, composed of the President or Deputy President of the Industrial Court and four Commissioners. Legal control was first instituted in 1900.

(e) *Western Australia.*—The system of control comprises an Arbitration Court, Industrial Boards, Conciliation Committees and a Conciliation Commissioner. Employers and employees are equally represented on both Boards and Committees. The Court consists of a Judge of the Supreme Court and two members. Commissioners may also be appointed by the Minister for the settlement of particular disputes. Legal control dates back to 1900.

Since 1949, legislation has provided for the appointment of a Western Australian Coal Industry Tribunal to settle intra-State disputes in the coal-mining industry in Western Australia. It was not, however, until April, 1952, that persons were appointed to the Tribunal. The Tribunal consists of a Chairman and four other members (two representatives each of employers and employees). Boards of reference may be appointed by the Tribunal and decisions of the Tribunal may be reviewed by the President of the Arbitration Court.

(f) *Tasmania.*—The authority consists of Wages Boards for separate industries, comprising a Chairman, appointed by the Governor, and equal numbers of representatives of employers and workers, appointed by the Minister administering the Act. The system was instituted in 1910.

4. **Awards, Determinations, and Agreements in Force.**—In each issue of the Labour Report from 1913-14 to 1947 (Reports Nos. 5-36) statistics were published of the number of awards, determinations made and industrial agreements filed, excluding variations, in each State and under Commonwealth legislation dealing with these matters. Statistics were also published, up to and including 1939, showing the number of awards, determinations and industrial agreements in force at the end of each year. These details are not now published because of the difficulty of obtaining precise data. One of the reasons for this decision is explained in the following paragraph.

It is difficult to establish the exact number of industrial awards and registered industrial agreements in force at the end of any period, because awards and determinations made by both State and Commonwealth tribunals generally continue in force, after the term of operation mentioned therein has expired, until rescinded or superseded by a subsequent order or award. Section 48 (2) of the Commonwealth Conciliation and Arbitration Act provides that, after the expiration of the period specified, the award shall, unless the Court otherwise orders, continue in force until a new award has been made; provided that, where in pursuance of this sub-section an award has continued in force after the expiration of the period specified in the award, any award made by the Court for the settlement of a new industrial dispute between the parties may, if the Court so orders, be made retrospective to a date not earlier than the date upon which the Court first had cognizance of that dispute. In the Industrial Code of South Australia, Clause 47 (2), and in legislation for other States, similar provisions are in force. All industrial agreements continue in force after the expiration of the term mentioned until rescinded or superseded by a subsequent agreement or order. The Tasmanian Wages Boards Act 1934 repealed Part IV. of the Principal Act providing for industrial agreements and all such agreements ceased to operate from the commencement of the Act unless an agreement existed in a trade to which no determination of a Board was applicable, in which case the agreement remained in force until its expiry or until a determination was made.

5. **New Legislation and Special Reports.**—Information concerning the main provisions of various Industrial Acts in force throughout Australia was given in earlier Reports, and brief reviews are furnished each year of the more important aspects of new industrial legislation having special application to the terms of awards or determinations. The period January to December, 1954 is covered by this Report.

(i) *Commonwealth.*—The Stevedoring Industry Act 1949 was amended by an Act, assented to on 16th November, 1954, which contained the following main provisions.

The Section in the Principal Act dealing with the registration of waterside workers was amended so that applications for registration, to maintain the quota for each port, had to be endorsed and lodged with the Stevedoring Industry Board by an employer registered at the port concerned. Provision was made for the Waterside Workers Federation to lodge an objection to the proposed registration of any employee.

Part III of the Amending Act provided for a Committee of Inquiry to be set up to inquire into and report upon the functioning of the stevedoring industry, its efficiency, the arrangements for the settlement of disputes and maintenance of discipline, the costs and profits in the industry, the increases in freight rates since the commencement of the Stevedoring Industry Act 1947 and any other matter referred to it by the Minister.

(ii) *New South Wales.*—The Industrial Arbitration Act was amended to allow the Government to fill the office of a member of the Industrial Commission about to retire and who has been granted leave of absence pending his retirement.

(iii) *Victoria.*—The Labour and Industry Act 1953, assented to on 23rd December, 1953 and proclaimed to operate from 1st July, 1954, replaced the Factories and Shops Acts 1928-1953. This Act was largely a consolidation of the Factories and Shops Acts with certain new provisions and amendments. Two important new provisions authorized the establishment of a Labour and Industry Advisory Board and Boards of Reference. The Labour and Industry Advisory Board, set up to advise the Minister on any matter referred to it, shall comprise seven members, three representatives each of employers and employees with an independent chairman, the Secretary to the Department. A Board of Reference may be set up by any Wages Board, with power to determine disputes of facts concerning any provision of any determination of that Wages Board. The Chairman of the Board of Reference would be the Chairman of the Wages Board, with an equal number of representatives (up to two) of employers and employees. Other new or amended provisions of this Act relate to procedure for registration and inspection of factories, etc., the compulsory provision of time records, safety guards for machinery, reporting of accidents and other minor matters.

(iv) *Queensland.*—The Industrial Conciliation and Arbitration Acts were not amended during 1954.

(v) *South Australia.*—The Industrial Code was not amended during 1954.

(vi) *Western Australia.*—No amendments were made in 1954 to either the Industrial Arbitration or Mining Acts.

(vii) *Tasmania*.—The Wages Boards Act was not amended during 1954.

(viii) *Australian Capital Territory*.—There was no special industrial legislation affecting only the Australian Capital Territory passed in 1954.

§ 2. Rates of Wage and Hours of Labour.

1. **General.**—The collection of data for nominal rates of wage payable in different callings and in occupations in various industries carried on in each State was first undertaken by this Bureau in the early part of the year 1913. Owing to the difficulty of obtaining reliable particulars of the numbers of apprentices, improvers and other juvenile workers to whom progressive rates of wage fixed according to increasing age or experience were payable from year to year, the inquiry was confined to the rates of wage payable to adult workers only, and was further limited generally to those industries in operation within the metropolitan area of each State. In order to make the inquiry comprehensive, however, certain industries were included which were not carried on in the capital cities, e.g., mining, shipping, agriculture and the pastoral industry. The particulars acquired were obtained primarily from awards, determinations and industrial agreements under Commonwealth and State Acts, and related to the minimum wage prescribed. In those cases where no award, determination or agreement was in force, the ruling union or predominant rate of wage was ascertained from employers and secretaries of trade unions. For convenience of comparison weekly rates of wage were adopted. In many instances, however, the wages were based on daily or hourly rates, since in many industries and occupations in which employment is casual or intermittent, wages are so fixed; hence the average weekly earnings in such occupations may fall short of the computed weekly rates. The information thus obtained referred to the weekly rate of wage in upwards of 400 specific occupations. Rates of wage were of course not available for each of these occupations in every State but the aggregate collection for the six States amounted to 1,569 male occupations or callings. These particulars furnished the necessary data for the computation of average rates of wage in various industrial groups* and in each State and Australia as a whole. The average rate of wage for each industrial group in each State was computed by taking the arithmetical average† of the rates of wage payable for all classified occupations within that group. A more detailed system of weighting could not be applied owing to the difficulty in the past of obtaining satisfactory data as to the number of persons engaged in each of the occupations for which rates of wage had been obtained. Though a considerable amount of information as to the number of persons engaged in different industries and occupations was available from subsequent Census results, it was found impracticable to bring the classification of these results into line with the detailed classification of occupations in the various industries as set out in the awards and determinations. For final results for each State and for each industrial group throughout the States, however, a careful system of weighting according to industrial groups was adopted. For example, in computing the result for any State in any period, the computed average wage rate in each industrial group was multiplied by a number (weight) representing the relative number of all male workers engaged in that group of

* The adopted classification of industries is shown in the Preface

† The sum of the weekly rates of wage divided by the number of occupations included.

industries in the particular State. The sum of the products thus obtained, divided by the sum of the weights, represented the average wage rate for that State for the particular period. The weights used for each industrial group in the computations of the average wage for male and female occupations were published in issues of the Labour Report prior to No. 20, 1929.

The results thus ascertained for the year 1913 were published in Labour Report No. 2, pp. 28-43. In the early part of the year 1914, the scope of the inquiry was considerably extended, and particulars included of the weekly rates of wage in respect of 930 specific occupations. The aggregate collection for the six States amounted to 4,256 adult occupations (3,948 male and 308 female). The results obtained thereby to 30th April, 1914, were published in Labour Report No. 5, pp. 44-50. These results were further analysed, and the average number of working hours which constituted a full week's work in each occupation was ascertained and weighted in a manner similar to that for the rates of wage. This course was adopted in order to overcome the difficulty of making comparisons between States of the rates of wage in any specified occupation, since, in many instances, a different number of working hours constituted a full week's work in different States. By dividing the weighted average number of working hours into the weighted average weekly rate of wage, a more satisfactory standard of comparison was ascertained. Results obtained from these computations were given for each industrial group for each State.

Since 30th April, 1914, the number of occupations included in comparative computations has been slightly reduced. When technical change or some other factor has led to the disappearance of the original occupation from an award, agreement or determination, the usual practice has been to substitute a similar occupation with a comparable rate of wage. In some cases, however, such a substitution could not be made and the slight drop in the total number of occupations included has resulted. The particulars of wages given in the Appendix (Sections III. and IV.) to this Report include all the more important occupations. These have been taken from awards or determinations made by industrial tribunals, or from agreements registered under Commonwealth or State Acts.

To supplement the results thus obtained, investigations were made regarding rates of wage in earlier years with a view to showing their general trend in each State and in the several industrial groups. The total number of occupations for which particulars were available back to 1891 was 652.

The particulars given in this chapter show variations in nominal wage rates from year to year in each State and in various industrial groups. Index numbers are also given showing variations in effective wage rates in each State. The figures of nominal wages and hours of labour are in course of revision to meet changes in industrial structure. The amounts should not be regarded as actual current averages but as an index of changes expressed in money and hour terms.

A comparison of wage rates and hours of labour for certain occupations in Australia, the United Kingdom and New Zealand will be found in Section V. of the Appendix.

2. **Adult Male Weekly Wage Rates—States, 1891 to 1954.**—The following table shows the weighted average nominal weekly rates of wage payable to adult male workers at the dates specified for a full week's work in each State and Australia. Index numbers are also given for each State with the average for Australia for the year 1911 as base (= 1,000):—

(a) See note (a) to table on page 39.

(b) Includes the value of keep, where supplied.

(c) Includes the value of board and lodging, where supplied.

4. **Adult Female Weekly Wage Rates—States, 1914 to 1954.**—The index numbers given in the preceding paragraphs for male adult workers were computed with the weighted average wage in 1911 as base (= 1,000). In the case of females, however, it has not been possible to secure information for years prior to 1914, and the index numbers are therefore computed with the weighted average rate of wage payable to adult female workers in Australia at 30th April, 1914, as base (= 1,000).

The following table shows the weighted average nominal weekly rates of wage payable to adult female workers for a full week's work in each State and Australia at the dates specified. Index numbers are also given for each State with the average for Australia at 30th April, 1914, as base (= 1,000).

Weekly Wage Rates(a) : Adult Females, States.

Weighted Average Nominal Weekly Rates payable for a Full Week's Work (excluding Overtime) and Index Numbers of Wage Rates.

(b) As at 31st December, 1954.

5. Adult Female Weekly Wage Rates—Australia—Industrial Groups, 1914 to 1954.—The following table shows for Australia (a) the weighted average weekly rate of wage in each of the industrial groups in which the number of females is significant, and (b) the weighted average wage for all groups combined, at the dates specified. Index numbers are also given for each industrial group with the average for all groups at 30th April, 1914, as base (= 1,000).

Weekly Wage Rates(a) : Adult Females, Industrial Groups.

Weighted Average Nominal Weekly Rates payable for a Full Week's Work (excluding Overtime) and Index Numbers of Wage Rates in Industrial Groups.

6. Weekly and Hourly Rates of Wage, and Weekly Hours of Labour, 31st December, 1954.—(i) *General.*—The rates of wage referred to in the preceding paragraphs are the minima payable for a full week's work (excluding overtime). The number of hours constituting a full week's work

differs, however, in some instances, between various trades and occupations in each State, and between the same trades and occupations in the several States. To secure what may be for some purposes a better comparison, the results in the preceding paragraphs are reduced to a common basis, namely, the rate of wage per hour in industrial groups in each State and in all States. In the Appendix (Sections III. and IV.) details are given of the number of hours worked per week in the various industries. The following tables include the average number of hours per week in industrial groups for each State.

The tables show (a) the average weekly wage rate; (b) the average number of working hours per week for a full week's work; and (c) the average hourly wage rate for adult male and female workers in each State and industrial group except Groups XI. (Shipping, etc.) and XII. (Pastoral, Agricultural, etc.). Some of the occupations included in the latter two groups are of a casual or seasonal nature, and the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or in other ways. Hence the necessary definite particulars for the computation of average working hours and hourly rates of wage are not available.

(ii) *Adult Males.*—The following table shows the average nominal weekly and hourly rates of wage payable to adult male workers and the weekly hours of labour at 31st December, 1954.

Weekly and Hourly Wage Rates and Weekly Hours of Labour(a) : Adult Males, Industrial Groups.

Average Rates of Wage Payable and Weekly Hours of Labour, 31st December, 1954.

Industrial Group.	Particulars.	N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	Australia. (b)

(a) See note (a) to table on page 39.

II. Nominal and Effective Wage Rates.—(i) *General.*—Index numbers of wage rates are said to be *nominal* when they represent changes in the wage rates themselves but are described as *effective* or *real* when they represent changes in equivalent purchasing power, that is, the purchasing power of the corresponding wages in terms of some definite composite unit or regimen the cost of which can be ascertained at different times. The relation between *nominal* and *effective* or *real* wages was discussed at some length in Labour Report No. 6, and was also referred to in Labour Report No. II.

Prior to 1936 it was the practice of the Bureau to compute effective wage index numbers by dividing the nominal wage index numbers by the corresponding retail price index numbers for food, groceries and rent of all houses ("A" series). While wage rates were generally varied on the basis of the "A" series index numbers there was a good deal to be said for this procedure. When the Commonwealth Court abandoned the "A" series, the merits of the "C" series of retail price index numbers for "deflating"

* For explanation of "A" series see page 4 and of "C" series see page 5

nominal wage rates were strengthened. The "C" series covers food, groceries, rent of four and five-roomed houses, clothing and miscellaneous household requirements. As the computation of the "A" series index by this Bureau was discontinued after the June quarter, 1938, real wages are measured in terms of their purchasing power over the "C" series only. A table showing for each State and for Australia real wages to the end of 1937 measured in terms of their purchasing power over the "A" series appeared in earlier issues of the Labour Report (see No. 38, page 70).

(ii) *Nominal Weekly Wage Rate Index Numbers—Adult Males, States, 1911 to 1954.*—The following table shows for the period 1911 to 1954 the weighted average nominal weekly rates of wage in each State, the weighted average rate for Australia in 1911 being taken as the base (= 1,000). The index numbers for 1911 are based on rates current at the end of December, annual averages not being available. For 1914 and subsequent years, however, the index numbers have been computed from the average of the rates current at the end of each quarter.

Nominal Wage Rate^(a) Index Numbers : Adult Males, States.
(Base : Weighted Average Weekly Wage^(a) for Australia, 1911 = 1,000.)

(a) For a full week's work (excluding overtime).

(iii) *Effective or Real Wage Rate Index Numbers—Adult Males, States, 1911 to 1954.*—In obtaining the effective wage rate index numbers in the following table the nominal wage rate index numbers shown above have been divided by the corresponding retail price index numbers for the capital city and multiplied by 1,000.

Since the "C" series index numbers were not compiled for periods prior to November, 1914, it has been assumed for the purpose of the following table that fluctuations between 1911 (the base of the table) and 1914 in the "C" series would have been similar to the fluctuations observed in the "A" series.

Effective or Real Wage Rate^(a) Index Numbers for Adult Males : Measured in terms of purchasing power over the "C" series regimen.

(Base : Weighted Average Real Wage^(a) for Australia in 1911 = 1,000.)

State.	1911.	1914.	1921.	1929.	1931.	1939.	1941.	1948.	1949.	1950.	1951.	1952.	1953.	1954.

Tasmania	902	984	1,108	1,120	1,153	1,142	1,334	1,338	1,371	1,438	1,432	1,436	1,454
Australia ..	1,000	948	1,087	1,151	1,210	1,211	1,104	1,357	1,367	1,380	1,439	1,438	1,450	1,459

(a) For a full week's work (excluding overtime).

In the above table the *effective* wage rate index numbers are computed to the one base, that of Australia for 1911. As the index numbers are

comparable in all respects, comparisons may be made as to the increase or decrease in the *effective* wage rate index number for any State over any period of years.

As retail prices (as shown by the "C" series index) rose by 1.0 per cent. in 1954, while nominal wages rose by 1.7 per cent., the *effective* wage rate index number rose from 1,450 to 1,459. Index numbers of nominal and effective wage rates as well as total and average weekly earnings for periods subsequent to 1952 appear in the *Monthly Review of Business Statistics*.

(iv) *Effective or Real Wage Rate Index Numbers—Adult Males, Australia, 1901 to 1951.* In Labour Report No. 40, page 70, a table was included showing, at intervals from 1901 to 1929 and for each year from 1931 to 1951, similar index numbers for Australia as a whole under both the "A" and "C" series. For the reason referred to above, index numbers under the "A" series could not be published beyond 1937.

12. Productive Activity.—The tables on page 49 show the movement in *real* (or *effective*) wage rates, i.e., wages measured in terms of retail purchasing power. A parallel problem is the measure of productivity, i.e., the quantity of production (irrespective of prices) in relation to population or persons engaged in production. The tables formerly published in this section relating to gross value of Australian production and material production per head of population and per person engaged in material production (*see* Labour Report No. 35) have been discontinued, as it has been found that the methods previously used in constructing these indexes do not give reliable results under conditions experienced in recent years. At this stage, no alternative methods have been devised to measure satisfactorily the productivity of the working population.

13. Average Weekly Wage Earnings.—(i) *Average Weekly Total Wages Paid and Average Earnings, All Industries.*—The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which prior to 1st September, 1954 covered approximately 80 per cent. of the total employment for Australia) and from estimates of the unrecorded balance. The figures relate to civilian wages and salaries only, pay and allowances of members of the armed forces being excluded.

1954-55	16.96	17.06	14.51	16.09	15.55	15.60	16.42

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State, and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

(ii) *Average Weekly Wage Earnings Index Numbers.*—The following table shows, for "All Industries" and for "Manufacturing", the movement in average weekly wage earnings from 1945-46 to the June Quarter, 1955. The "All Industries" index is based on Pay-roll Tax returns and other data. The index for manufacturing industries for the years 1945-46 to 1953-54 is based on the average earnings of male wage and salary earners employed in factories as disclosed by annual factory returns. Figures subsequent to June, 1954 are preliminary estimates based on Pay-roll Tax returns.

The index numbers show for "All Industries" and "Manufacturing" the movement in average earnings over a period of time. However, they do not give, at any point of time, a comparison of actual earnings in the two groups. The base of each series is the year 1945-46 = 1,000 and both series have been seasonally adjusted.

Average Weekly Wage Earnings(a) Index Numbers : Australia.

SEASONALLY ADJUSTED.

(Base of each Series : Year 1945-46 = 1,000.)

Year.	All Industries (b)	Manufacturing.	Quarter.	All Industries.(b)	Manufacturing.

(a) Including salaries. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings.

§ 3. Standard Hours of Work.

1. **General.**—In the fixation of weekly wage rates most industrial tribunals prescribe the number of hours constituting a full week's work for the wage rates specified. The hours of work so prescribed form the basis of the compilation of the index numbers on pages 45-48 of this Labour Report. The first year shown is 1914, at which time the 48-hour week was recognized as a standard working week for most industries. The main features of the reduction of hours from 48 to 40 per week are summarized below. In considering such changes it must be remembered that even within individual States the authority to alter conditions of labour is divided between Commonwealth and State industrial tribunals and the various legislatures, and that the State legislation does not apply to employees covered by awards of the Commonwealth Court of Conciliation and Arbitration.

2. **The 44-hour Week.**—No permanent reduction to a 44-hour week was effected until 1925 although temporary reductions had been achieved earlier. In 1920 the New South Wales legislature granted a 44-hour week to most industries, but in the following year this provision was withdrawn. Also in 1920 the President of the Commonwealth Court of Conciliation and Arbitration (*Higgins J.*), after inquiry, granted a 44-hour week to Timber Workers, and in the following year extended the same privilege to the Amalgamated Society of Engineers. In 1921, however, a reconstituted Commonwealth Court of Conciliation and Arbitration unanimously rejected applications by five trade unions for the shorter standard week and reintroduced the 48-hour week in the case of the above-mentioned two unions then working 44 hours. During 1924 the Queensland Parliament passed legislation to operate from 1st July, 1925, granting the 44-hour standard week to employees whose conditions of work were regulated by awards and agreements of the Queensland State industrial authority. Similar legislative action in New South Wales led to the re-introduction of the 44-hour week in that State as from 4th January, 1926.

In 1927 after an exhaustive inquiry the Commonwealth Court of Conciliation and Arbitration granted a 44-hour week to the Amalgamated Engineering Union and intimated that this reduction in standard hours of work would be extended to industries operating under conditions similar to those in the engineering industry. Applications for the shorter hours by other unions were, however, treated individually, the nature of the industry, the problem of production, the financial status and the amount of foreign competition being fully investigated. The economic depression delayed the extension of the standard 44-hour week until the subsequent improvement in economic conditions made possible its general extension to employees under Commonwealth awards.

In States other than New South Wales and Queensland no legislation was passed to reduce the standard hours of work so that, for employees not covered by Commonwealth awards, the change had to be effected by decisions of the appropriate industrial tribunals. In these cases the date on which the reduction to 44 hours was implemented depended on the decision of the tribunals in particular industries, employees in some industries receiving the benefit of the reduced hours years ahead of those in others. In these States the change to the shorter week extended over the years from 1926 to 1941.

3. **The 40-hour Week.**—(i) *Standard Hours Inquiry, 1947*—Soon after the cessation of hostilities in the 1939–45 War, applications were made to the Commonwealth Court of Conciliation and Arbitration for the introduction of a 40-hour week, and the hearing by the Court commenced in October, 1945. Before the Court gave its decision the New South Wales Parliament passed legislation granting a 40-hour week, operative from 1st July, 1947, to industries and trades regulated by State awards and agreements, and in Queensland similar legislation which provided for the 40-hour week in that State to become operative from 1st January, 1948, was introduced in Parliament.

The Commonwealth Court of Conciliation and Arbitration in its judgment on 8th September, 1947, granted the reduction to the 40-hour week from the beginning of the first pay-period commencing in January, 1948. The Queensland Act was passed, and was proclaimed on 10th October, 1947. On 27th October, 1947, the South Australian Industrial Court after hearing applications by unions approved the incorporation of the 40-hour standard week in awards of that State. The Court of Arbitration of Western Australia on 6th November, 1947, granted the 40-hour week to employees under its jurisdiction from the beginning of the first pay-period commencing in January, 1948.

In Victoria and Tasmania the Wages Boards met and also incorporated the shorter working week in their determinations, so that from the beginning of 1948 practically all employees in Australia whose conditions of labour were regulated by industrial authorities had the advantages of a standard working week of 40 hours or, in certain cases, less.

(ii) *Basic Wage and Standard Hours Inquiry, 1952–53.*—In the 1952–53 Basic Wage and Standard Hours Inquiry the employers sought an increase in the standard hours of work per week claiming that “one of the chief causes of the high costs and inflation has been the loss of production due to the introduction of the 40-hour week”.* This claim was rejected by the Court as it considered that the employers had not proved that the existing economic situation called for a reduction of general standards in the matter of the ordinary working week. (See also page 59.)

§ 4. Basic Wages in Australia.

1. **The Basic Wage.**—The concept of a “basic” or “living” wage is common to rates of wage determined by industrial authorities in Australia. Initially the concept was interpreted as the “minimum” or “basic” wage necessary to maintain an average employee and his family in a reasonable state of comfort. However, it is now generally accepted “that the dominant factor in fixing the basic wage . . . is the economic or productivity factor and that the basic wage must be the highest that industry as a whole can pay.”†

Under the Commonwealth Conciliation and Arbitration Act, the Commonwealth Court of Conciliation and Arbitration may, for the purpose of preventing or settling an industrial dispute extending beyond the limits of any State, make an order or award altering the basic wage (that is to say, that wage, or that part of a wage, which is just and reasonable, without regard to any circumstance pertaining to the work upon which, or the

* 77 C.A.R. p. 505.

† 44 C.A.R., p. 57.

industry in which, the person is employed) or the principles upon which it is computed. In practice, the Court holds general basic wage inquiries and its findings are then applied to industrial awards within its jurisdiction. In New South Wales and South Australia, in general, the State industrial authorities are required to adopt the relevant basic wage prescribed by the Commonwealth Court of Conciliation and Arbitration. In Victoria and Tasmania, where the Wages Boards systems operate, no provision is included in the industrial Acts for the declaration of a basic wage, although, in fact, the Wages Boards have generally adopted basic wages based on those of the Commonwealth Court. In Queensland and Western Australia the determination of a basic wage is a function of the respective State Industrial or Arbitration Courts, and, subject to State legislation, these Courts have regard to the rates determined by the Commonwealth Court.

In addition to the basic wage, "secondary" wage payments, including margins for skill, loadings and other special considerations peculiar to the occupations or industry, are determined by these authorities. The basic wage and the "secondary" wage, where prescribed, make up the "minimum" wage for a particular occupation. The term minimum wage (as distinct from the basic wage) is used currently to express the lowest rate payable for a particular occupation or industry.

In § 1 of this chapter (pages 31-37) particulars are given of the current Commonwealth and State industrial Acts and the industrial authorities established by these Acts. The powers of these authorities include the determination and variation of basic wage rates.

2. **The Commonwealth Basic Wage.**—(i) *Early Judgments.*—The principle of a living or basic wage was propounded as far back as 1890 by Sir Samuel Griffith, Premier of Queensland, but it was not until the year 1907 that a wage, as such, was declared by a Court in Australia. The declaration was made by way of an order in terms of Section 2 (d) of the Excise Tariff 1906 in the matter of an application by H. V. McKay that the remuneration of labour employed by him at the Sunshine Harvester Works, Victoria, was "fair and reasonable".

The Commonwealth Parliament had by the Act imposed certain excise duties on agricultural implements, but provided that the Act should not apply to goods manufactured in Australia "under conditions as to the remuneration of labour which are declared by the President of the Commonwealth Court of Conciliation and Arbitration to be fair and reasonable". Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, discussed at length the meaning of "fair and reasonable", and defined the standard of a "fair and reasonable" minimum wage for unskilled labourers as that appropriate to "the normal needs of the average employee, regarded as a human being living in a civilized community".* The rate declared by the President in his judgment (known as the "Harvester Judgment") was 7s. per day or £2 2s. per week for Melbourne, the amount considered reasonable for "a family of about five".† According to a rough allocation by the Judge, the constituent parts of this amount were £1 5s. 5d. for food, 7s. for rent, and 9s. 7d. for all other expenditure.

The "Harvester" standard was adopted by the Commonwealth Court of Conciliation and Arbitration for incorporation in its awards, and practically the same rates continued until the year 1913, when the Court took cognizance

* 2 C.A.R., p. 3. † The average number of dependent children per family was apparently regarded by the Court as about three, although statistical information available at the time did not permit of exact figures being ascertained. For particulars of available information which may have been considered by the Court, see Labour Report No. 41, footnote on page 73.

of the retail price index numbers, covering food and groceries and rent of all houses ("A" series) for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. The basic wage rates for towns were thereafter varied with regard to variations in the respective retail price index numbers. Court practice was to equate the retail price index number 875 for Melbourne for the year 1907 to the "Harvester" rate of 42s. per week (or the base of the index (1,000) to 48s. per week). At intervals thereafter as awards came before it for review, the Court usually revised the basic wage rate of the award in proportion to variations in the retail price index. In some country towns certain "loadings" were added by the Court to wage rates so derived to offset the effect of lower housing standards, and consequently lower rents, on the index numbers for these towns.

Over the period of its operation, the adequacy or otherwise of the "Harvester" standard was the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. During the period of rapidly rising prices towards the end of the 1914-18 War, strong criticism developed that this system did not adequately maintain the "Harvester" equivalents. A Royal Commission was appointed in 1919 to inquire as to what it would actually cost a man, wife and three children under fourteen years of age to live in a reasonable standard of comfort, and as to how the basic wage might be automatically adjusted to maintain purchasing power. The Commission's Reports were presented in November, 1920 and April, 1921.* An application by the unions to have the amounts arrived at by the inquiry declared as basic wage rates was not accepted by the Court because they were considerably in advance of existing rates and grave doubts were expressed by members of the Court as to the ability of industry to pay such rates.

The system of making automatic quarterly adjustments to the basic wage in direct ratio to variations in the retail price index ("A" series) was first introduced in 1921. The practice then adopted was to calculate the adjustments to the basic wage quarterly on the index number for the preceding quarter. Previously adjustments had been made sporadically in relation to retail price indexes for the previous calendar year or the year ended with the preceding quarter. The practice adopted by the Commonwealth Court in 1921 of making automatic quarterly adjustments continued until the Court's judgment of 12th September, 1953.†

In 1922 an amount known as the "Powers' 3s." was added by the Court‡ as a general "loading" to the weekly basic wage, for the purpose of maintaining, during a period of rising prices, the full equivalent of the "Harvester" standard. This loading continued until 1934.

(ii) *Basic Wage Inquiries, 1930-31, 1932, 1933.*—No change was made in the method of fixation and adjustment of the basic wage until the onset of depression which began to be felt severely during 1930. Applications were then made to the Court for some greater measure of reduction of wages than that which resulted from the automatic adjustments due to falling retail prices. The Court held a general inquiry, and, while declining to make any change in the existing method of calculating the basic wage, reduced all wage rates under its jurisdiction by 10 per cent. from 1st February, 1931.§ The Court refused in June, 1932, applications by employee organizations for the cancellation of the 10 per cent. reduction of wage rates.|| In May,

* See Labour Report No. 41, 1952, pp. 102 and 103 for a summary of the Commission's findings.
 † See pp. 59-62. ‡ 16 C.A.R., p. 32 § 30 C.A.R., p. 2. || 31 C.A.R., p. 305.

1933 the Court again refused to cancel the 10 per cent. reduction in wage rates, but decided that the existing method of adjustment of the basic wage in accordance with the "A" series retail price index number had resulted in some instances in a reduction of more than 10 per cent. In order to rectify this the Court adopted the "D" series of retail price index numbers for future quarterly adjustments of the basic wage.*

(iii) *Basic Wage Inquiry, 1934.*—The "Harvester" standard, adjusted to retail price variations, continued to be the theoretical basis of the basic wage of the Commonwealth Court until the Court's judgment, delivered on 17th April, 1934,† declared new basic wage rates to operate from 1st May, 1934. The new rates were declared on the basis of the relative "C" series retail price index numbers for the various cities for the December quarter, 1933, and ranged from 81s. for Brisbane to 67s. for Sydney and Hobart, the average wage for the six capital cities being 65s.

The 10 per cent. special reduction in wages referred to above ceased to operate upon the introduction of the new rates, and the automatic quarterly adjustment of the basic wage with variations in retail price index numbers was transferred from the "A" and the "D" series to the "C" series of index numbers.‡ The base of the index (1,000) was taken by the Court as equal to 81s. per week. The new basic wage for the six capital cities was the same as that previously paid under the "A" series, without the "Powers' 3s." and without the 10 per cent. reduction. For further particulars of the judgment in this inquiry see Labour Report No. 26, p. 76.

(iv) *Basic Wage Inquiry, 1937.*—In May and June, 1937, the Commonwealth Court heard an application by the combined unions for an increase in the basic wage. The unions asked that the equivalent of the base (1,000) of the "C" series index be increased from 81s. to 93s., which on index numbers then current would have represented an average increase of about 10s. per week. The chief features of the judgment, delivered on 23rd June,§ were:—

(a) Amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" additional to the rates payable under the 1934 judgment. The wage assessed on the 1934 basis was designated in the new judgment as the "needs" portion of the total resultant basic wage. These loadings, referred to as "Prosperity" loadings, were 6s. for Sydney, Melbourne and Brisbane; 4s. for Adelaide, Perth and Hobart; and 5s. for the six capitals basic wage. "Prosperity" loadings for the basic wage for provincial towns in each State, for combinations of towns and combinations of capital cities, and for railway, maritime and pastoral workers were also provided for in the judgment.

(b) The minimum adjustment of the basic wage was fixed at 1s. per week instead of 2s.

(c) The basis of the adjustment of the "needs" portion of the wage in accordance with the variations shown by retail price index numbers was transferred from the "C" series to a special "Court" series based upon the "C" series. (See page 5.)

(d) Female and junior rates were left for adjustment by individual judges when dealing with specific awards.

* 32 C.A.R., p. 90. For further particulars see Labour Report No. 22, pp. 45-8 and Labour Report No. 23, pp. 45-6. † 33 C.A.R., p. 144. ‡ For explanation of the "A", "C" and "D" series see pages 4 and 5 of this Report. § 37 C.A.R., p. 583.

The main parts of the judgment were reprinted in Labour Report No. 28, pp. 77-87.

(v) *Judgment, December, 1939.*—The Commonwealth Court on 19th December, 1939 heard an application by trade unions for an alteration in the date of adjustment of the basic wage in accordance with the variations in the "Court" series of index numbers. On the same day, the Court directed that such adjustments be made operative from the beginning of the first pay-period to commence in February, May, August or November, one month earlier than the then current practice.*

(vi) *Basic Wage Inquiry, 1940.*—On 5th August, 1940 the Full Court commenced the hearing of an application by the combined unions for an increase in the existing basic wage by raising the value of 1,000 (the base of the "C" series index upon which the "Court" series was based) from 81s. to 100s. per week, and the incorporation of the existing "Prosperity" loadings in the new rate mentioned. In its judgment of 7th February, 1941† the Court unanimously refused to grant any increase, and decided that the application should not be dismissed but stood over for further consideration after 30th June, 1941. The application was refused mainly owing to the uncertainty of the economic outlook under existing war conditions.

Concerning the concept of a basic wage providing for the needs of a specific family unit, Chief Judge Beeby in his judgment stated:—"The Court has always conceded that the 'needs' of an average family should be kept in mind in fixing a basic wage. But it has never, as the result of its own inquiry, specifically declared what is an average family, or what is the cost of a regimen of food, clothing, shelter and miscellaneous items necessary to maintain it in frugal comfort, or that a basic wage should give effect to any such finding. In the end economic possibilities have always been the determining factor . . . what should be sought is the independent ascertainment and prescription of the highest basic wage that can be sustained by the total of industry in all its primary, secondary and ancillary forms. . . . More than ever before wage fixation is controlled by the economic outlook."

The Chief Judge suggested that the basic wage should be graded according to family responsibilities and that, notwithstanding the increase in aggregate wages, a reapportionment of national income to those with more than one dependent child would be of advantage to the Commonwealth. The relief afforded to those who needed it would more than offset the inflationary tendency of provision for a comprehensive scheme of child endowment. If a scheme of this nature were established, as recently announced by the Commonwealth Government,‡ future fixations of the basic wage would be greatly simplified.

(vii) *"Interim" Basic Wage Inquiry, 1946.*—The Court, on 25th November, 1946, commenced the hearing of this case as the result of (a) an application made on 30th October, 1946 (during the course of the Standard Hours Case) by the Attorney-General for the Commonwealth for the restoration to the Full Court List of certain adjourned 1940 basic wage applications (see (vi) above); (b) a number of fresh cases which had come to the Court since 1941; and (c) an application by the Australian Council of Trade Unions on behalf of trade unions for an "interim" basic wage declaration.

* 41 C.A.R., p. 520.

† 44 C.A.R., p. 41.

‡ See page 94 for particulars.

Judgment was delivered on 13th December, 1946,* whereby an increase of 7s. was granted in the "needs" portion of the basic wage then current to operate from the beginning of the first pay-period commencing in the month of December, 1946, except in the case of casual and maritime workers for whom the increases operated from 1st December.

For the purpose of automatic quarterly adjustments a new "Court" series of index numbers was created by increasing the base index number (1923-27) from 81.0 to 87.0. The "Court" series index number calculated on this base for the September quarter, 1946 effected an increase in the basic wage for the weighted average of the six capital cities (as a whole) from 93s. to 100s. A similar increase of 7s. was recorded in the basic wage for each capital city except Hobart where the amount was 6s. All "loadings" on the basic wage were retained at their existing amounts unless otherwise ordered by the Court.

This new series was designated "Court Index (Second Series)" to distinguish it from the Court Index (First Series) which was introduced after the 1937 Basic Wage Inquiry. The new "Court" index numbers were obtained by multiplying the "C" series retail price index numbers (Base: 1923-27 = 1,000) by the factor 0.087, and taking the result to the first decimal place.

The wage rates for adult females and juveniles were to be increased proportionately to the increase granted to adult males, the amount of the increase being determined by the provisions in each award. For further particulars of the judgment see Labour Report No. 35, p. 85.

(viii) *Basic Wage Inquiry, 1949-50.*—This finalized the case begun in 1940 and continued in 1946 (see above). In 1946, during the hearing of the Standard Hours Inquiry and following the restoration to the Full Court List of applications for an increased basic wage, the Chief Judge ruled that the claim for an increase in the basic wage should be heard concurrently with the "40-hour week" claims then before the Court. The unions, however, objected to this course being followed, and, on appeal to the High Court, that Court in March, 1947, gave a decision which resulted in the Arbitration Court proceeding with the "Hours" Case to its conclusion.

The Basic Wage Inquiry, 1949-50, finally opened in February, 1949, and the general hearing of the unions' claims was commenced on 17th May, 1949. Evidence was completed on 22nd August, 1950, and the three Judges (Kelly C.J., Foster and Dunphy JJ.) delivered separate judgments on 12th October, 1950.† In those judgments, which were in the nature of general declarations, a majority of the Court (Foster and Dunphy JJ.) was of the opinion that the basic wage for adult males should be increased by £1 per week, and that for adult females should be 75 per cent. of the adult male rate. Kelly C.J., dissenting, considered that no increase in either the male or the female wage was justified.

On 24th October, 1950 and 23rd November, 1950 the Court made further declarations regarding the "Prosperity" loading of 1937 (see page 56), which was being paid at rates between 3s. and 6s. per week according to localities, etc., and the future basis of quarterly adjustments. The "Prosperity" loading was standardized at a uniform rate of 5s. per week for all localities and was declared to be an adjustable part of the basic wage. The Court also declared that the "War" loadings were not part of the basic wage.

* 57 C.A.R., p. 603.

† 68 C.A.R., p. 698.

With regard to other "loadings" the Court, on 17th November, 1950, proceeded to examine the individual awards in the claims before it, for the purpose of determining to what extent such "loadings" formed part of the basic wage. Any "loading" declared to be part of the basic wage ceased to be paid as a separate entity, but apart from the special case of the Australian Capital Territory there were very few "loadings" which fell within this category.

The new rates operated from the beginning of the first pay-period in December, 1950, in all cases being the "needs" rate (2nd Series) on the indexes of the September quarter, 1950 plus a flat-rate addition of £1, together with the standardized "Prosperity" loading of 5s.

The basic wage rate for the six capital cities (weighted average) arrived at by the Court after applying the foregoing declarations was £8 2s., comprising £6 17s. "needs" (2nd Series) plus 5s. uniform "Prosperity" loading plus the £1 addition. The declaration provided that the whole of this basic wage would be subject to automatic quarterly adjustments as from the beginning of the first pay-period commencing in February, 1951, on the basis of the index numbers for the December quarter, 1950. For this purpose the new rate of £8 2s. was equated to the "C" series retail price index number 1572 for the six capital cities (weighted average) for the September quarter, 1950. From this equation was derived a new "Court" Index (Third Series) with 103.0 equated to 1,000 in the "C" Series Index.

The basic wage rates operative in November, 1950, in comparison with those operative from the beginning of the first pay-period commencing in December, 1950, are shown below:—

Date of Operation.	Sydney.	Met- bourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Six Capitals.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
November, 1950 ..	146 0	143 0	135 0	137 0	139 0	139 0	142 0
December, 1950 ..	165 0	162 0	154 0	158 0	160 0	160 0	162 0

(ix) *Basic Wage and Standard Hours Inquiry, 1952-53.*—On 5th August, 1952 the Commonwealth Court of Conciliation and Arbitration began hearing claims by:—

1. The Metal Trades Employers' Association and other employers' organizations—

- (a) that the basic wage for adult males be reduced;
- (b) that the basic wage for adult females be reduced;
- (c) that the standard hours of work be increased;
- (d) that the system of adjusting the basic wages in accordance with variations occurring in retail price index numbers be abandoned.

2. The Metal Trades Federation, an association of employees' organizations, that the basic wage for adult males be increased, which would also have resulted in increasing the amount, though not the proportion it bore to the basic wage for adult males, of the basic wage for adult females.

A number of Governments, organizations and other bodies obtained leave to intervene and in this role the Australian Council of Trade Unions supported the claims of the Metal Trades Federation.

The Court consisted of Kelly *C.J.*, Foster, Kirby, Dunphy, Wright, McIntyre and Morgan *JJ.*, but before the hearing of evidence commenced Wright *J.* withdrew and during the hearing of the case Foster *J.* withdrew from the bench. The Court gave its decision on 12th September, 1953, and stated that reasons for its decision would be delivered later. Before the reasons for the judgment could be delivered McIntyre *J.*, who had been ill during the case, died.

In the early stages of the case the employers applied for an immediate and separate hearing on the question of suspension of the basic wage adjustment provisions in awards. The Court, however, after hearing argument, indicated that it was not satisfied that a sufficient case had been made out for such a separate hearing.

Evidence in the employers' case began on 16th September, 1952. On completion of the employers' case the counsel for employee organizations submitted that there was "no case to answer" and asked for the dismissal of the case. The Court rejected this claim and the hearing of evidence for the employee organizations was concluded on 11th September, 1953.

The decision of the Court, announced on 12th September, 1953, was expressed in the following terms:—

1. The employers' applications for reduction of the current basic wages for adult males and for reduction of the current basic wages for adult females are refused.
2. The employers' applications for an increase of the standard hours of work in the industries covered thereby are refused.
3. The employers' applications for omission or deletion of clauses or sub-clauses providing for the adjustment of basic wages are granted.
4. The Unions' applications for increases of basic wages are refused.

The Court makes orders accordingly, to operate as from today.

The reasons for the above decision will be delivered at a later date.

The form of the appropriate orders will be settled by the Industrial Registrar."

The reasons for the above decision were delivered on 27th October, 1953.

The Court in the course of its judgment said that in the present case nothing had been put before the Court in support of a departure from its now well-established principle that the basic wage should be the highest that the capacity of the community as a whole could sustain. If the Court is at any time asked to fix a basic wage on a true needs basis, the question of whether such a method is correct in principle and all questions as to the size of the family unit remain open.

No evidence was submitted in the inquiry to suggest that the basic wage in its character of a "foundational wage" of providing, or helping to provide, a just and reasonable standard of living to employees whose income is based or dependent upon it, was inadequate, and the arguments of both the employers and employees were directed towards a basic wage based on the capacity of industry to pay.

The Court, in reviewing the claims of the respondents, in the light of the existing economic situation, indicated that although aware of the difficulties besetting industry and of the dependence of Australia's prosperity upon that large part of her productive effort whose rewards are conditioned by good seasons and whose prices are largely beyond her control, the Court

was satisfied that the employers had not discharged the onus of proving that the existing situation called for a reduction of general standards either in the matter of the basic wage or in the matter of the ordinary working week. The Court was satisfied that there could be, in the existing situation, no increase in the basic wage, as was claimed by the Metal Trades Federation.

The Court decided to discontinue the system of automatically adjusting the basic wage in accordance with variations in retail price index numbers while the basic wage was assessed on the capacity of industry. It was considered that "the further the Court has withdrawn from relating the basic wage to the fulfilment of any particular standard of needs, the less has become the justification for keeping the nominal wage 'automatically adjusted' during the currency of an award".* Moreover, there was no ground for assuming that the capacity of industry to pay will be maintained at the same level or that it will rise or fall coincidentally with the purchasing power of money. The Court found that the system of automatic adjustments had undoubtedly been an accelerating factor in the rapid increase in prices in Australia particularly in the years 1951 and 1952 and this factor supported the Court's decision to discontinue the system.

In regard to the basic wage for female employees, the Court decided that no basis existed, on the material presented to it, for a review of the existing ratio of the female to the male basic wage, the Court being satisfied that industry had the capacity to maintain the existing female basic wage rates.

In rejecting the claim for an increase in the standard hours of work, the Court considered that the industry of the country was healthy and prosperous enough at present to sustain the existing standard (i.e., 40 hours per week).

The Court intimated that time would be saved in future inquiries if the parties to the disputes, in discussing the principle of the "capacity to pay", direct their attention to the broader aspects of the economy, such as indicated by a study of—

- Employment.
- Investment.
- Production and Productivity.
- Overseas Trade.
- Overseas Balances.
- Competitive position of secondary industry.
- Retail Trade.

In order to remove certain misconceptions about the function of the Court it was stated during the course of the judgment that "the Arbitration Court is neither a social nor an economic legislature. Its function under Section 25 of the Act is to prevent or settle specific industrial disputes".† However, this function must be exercised in the social and economic setting of the time at which it makes its decision. It must settle industrial disputes upon terms which seem to it to be just; having regard to conditions which exist at the time of its decision. In addition, the Court stressed that "the primary rule that a claimant is required to substantiate his claim should always be observed."‡

In accordance with its decision to abolish the automatic adjustment clause from its awards, the Court began, on 21st October, 1953, to deal with awards which were not actually affected by the original order. During this process the Court announced that it had no other method in mind in

* 77 C.A.R., p. 497.

† Ibid., p. 506.

‡ Ibid., p. 507.

substitution of the automatic adjustment clauses. In fact the only issue before the Court was the abolition or retention of the adjustment principle and that issue had been determined. The basic wage as fixed by the Court in the new or amended clauses in awards was that operating from August, 1953, and no provision was made for its automatic quarterly adjustment.

The last such adjustment had been made on the "Court" series retail price index numbers for the June quarter, 1953.

After the Court had amended all the awards listed before it as a result of applications by one of the parties to the awards, the Court, on its own motion under Section 49 of the Commonwealth Conciliation and Arbitration Act, listed those awards not the subject of an application by one of the parties and then proceeded to delete the clauses providing for the automatic adjustment of the basic wage.

The power of the Commonwealth Court of Conciliation and Arbitration to vary awards not the subject of an application by one of the parties was unsuccessfully challenged in the High Court of Australia.

(x) *Rates Operative, Principal Towns.*—The "basic" wage rates of the Commonwealth Court for adult males and females, operative in the principal towns of Australia as from the beginning of the first pay-period commencing in August, 1953, are shown in the following table:—

Commonwealth Basic Wage : Weekly Rates(a), November, 1955.

(a) Operative from the beginning of the first pay-period commencing in August, 1953. By decision of the Commonwealth Court of Conciliation and Arbitration, announced on 12th September, 1953, automatic adjustment of basic wages in accordance with variations occurring in retail price index numbers was discontinued in Commonwealth awards. (b) Weighted average. (c) Melbourne rate plus 6s. 6d. for males; 7s. per cent. of male rate for females. (d) Adelaide rate plus 5s. for males; 7s. per cent. of male rate for females. (e) See pp. 72 and 74 regarding special loadings.

The rate for provincial towns, other than those mentioned above, is 3s. less than that for their respective capital cities.

The rate for adult females is 75 per cent. of the male rate.

A table of basic wage rates from 1923 to 1955 will be found in Section VI. of the Appendix.

3. Basic Wage Rates for Females.—(i) *General.*—In its judgment of 17th April, 1934, wherein the Commonwealth Court of Conciliation and Arbitration laid down the basis of its "needs" basic wage for adult males, the Court made the following statement in regard to the female rate:—

"The Court does not think it necessary or desirable, at any rate at the present time, to declare any wage as a basic wage for female employees. Generally speaking they carry no family responsibilities. The minimum wage should, of course, never be too low for the reasonable needs of the employee, but those needs may vary in different industries. In the variations now to be made the proportion in each award of the minimum wage for females to that of males will be preserved."

The previous practice of the Court was therefore continued whereby each judge granted such proportion of the male rate as he deemed suited to the nature of the industry and the general circumstances of the case. Generally speaking, this proportion was in the vicinity of 54 per cent. of the male rate, although in some cases the proportion was about 56 per cent.

Until 1942 this continued to be substantially the practice of all Commonwealth and State industrial tribunals and in the main its continuance was then made mandatory by Part V. of the National Security (Economic Organization) Regulations which "pegged" as at 10th February, 1942, all rates of remuneration previously prevailing in any employment. The only exceptions allowed were variations to rectify anomalies, variations resultant from hearings pending prior to 10th February, 1942 and "cost of living" variations.

In March, 1942, however, special action was taken to constitute a Women's Employment Board in conjunction with measures to encourage women to undertake, in war-time, work which would normally have been performed by men. This Board was given special jurisdiction to determine terms and conditions of such employment. The Commonwealth Court of Conciliation and Arbitration and State Industrial Tribunals continued to determine rates of pay, etc., of women engaged in what may broadly be described as "women's work" in the pre-war sense, while the jurisdiction of the Women's Employment Board was made to cover women engaged during the war in work formerly performed by men or in new work which immediately prior to the outbreak of the war was not performed in Australia by any person.

In July, 1944, National Security (Female Minimum Rates) Regulations authorized the Commonwealth Court of Conciliation and Arbitration to make comprehensive investigations (a) as to whether minimum rates of wage payable to females in industries considered by the Government to be necessary for war purposes were unreasonably low in comparison with minimum rates payable to females in other essential industries, (b) if so, as to whether it was in the national interest, and fair and just, to increase such rates, and (c) as to the amount of such increases. Determinations could be made for any period specified by the Court but not extending beyond six months after the end of the war. In making such determinations the Court was not bound by Part V. of the National Security (Economic Organization) Regulations,

although such regulations applied to the new rates after determination. The objective of the National Security (Female Minimum Rates) Regulations was to remove disparities which were creating discontent and impeding the manpower authority in redistributing female labour to vital industries. This review commenced in the Court on 23rd February, 1945 and ended on 23rd March, judgment being reserved.

Judgment was delivered by the Full Court on 4th May, 1945,* to the effect that, in regard to (a) above, the majority of the Full Court (Fiper *C.J.*, O'Mara and Kelly *JJ.*) found itself unable to declare that the rates in the "referred"† industries were unreasonably low compared with those in the three industries submitted by the Crown and the union representatives as the standard rates for comparison, namely, those of the Clothing, Rubber and Metal industries, and that there was consequently no necessity to answer question (b). In a minority judgment, Drake-Brockman and Foster *JJ.* answered (a) and (b) in the affirmative.

Following this negative result, the Government, by National Security (Female Minimum Rates) Regulations (S.R. 1945, No. 139) dated 13th August, 1945, provided in respect of "vital" industries specified by the Minister by notice published in the *Gazette* that the remuneration of females employed therein should not be less than 75 per cent. of the corresponding minimum male rate. The validity of this Regulation was challenged in the High Court by Australian Textiles Pty. Ltd., but in a judgment dated 3rd December, 1945 the Court (Starke *J.* dissenting) held that the Regulations were a valid exercise of the powers under the National Security Act 1939-1943. The rates under this Regulation commenced to operate from 31st August, 1945.

As from 12th October, 1944, the Women's Employment Board was abolished and the Chairman of the Board (A. W. Foster) was made a judge of the Commonwealth Court of Conciliation and Arbitration. The function of the Board under the Women's Employment Act then devolved upon the Court as constituted by a judge designated by the Chief Judge. (See S.R. 1944, No. 149.)

The following sub-sections give a brief account of the functions allotted to and of the principles followed by the Women's Employment Board, and a summary of an important judgment delivered by the Commonwealth Court of Conciliation and Arbitration in 1943 stating the principles followed by the Court in fixing the basic rates payable to female workers and the difference between the rates payable to the women engaged in "women's work" and those payable to the special group of women engaged in "men's work" in war-time under the jurisdiction of the Women's Employment Board. The judgment also dealt with the question of "anomalies" as between the rates payable to the two classes of women workers.

(ii) *Women's Employment Board.*—The functions of the Women's Employment Board were specified by the Women's Employment Act 1942.‡ The purpose of the Act as expressed in the title was "to encourage and regulate the employment of women for the purpose of aiding the prosecution of the present war". The jurisdiction of the Board was limited to females employed (after 2nd March, 1942) on work usually performed by males or which, immediately prior to the outbreak of the war, was not performed in Australia by any person.

* 54 C.A.R., p. 613. † Twelve vital industries were "referred" by the Government for consideration. ‡ The Board was originally created under regulations under the National Security Act 1939-1940, dated 25th March, 1942 (Statutory Rules 1942, No. 146), but owing to the disallowance of such regulations by the Senate on 23rd September, 1942, the Board operated as from 6th October, 1942, under the Women's Employment Act, No. 55 of 1942, which validated all previous decisions, etc., of the first Board (gazetted on 11th June, 1942). The second Board was created on 10th November, 1942.

The functions of the Board briefly were to decide what work and what female workers came within its jurisdiction (as defined) and the terms and conditions upon which women might be so employed including hours and special conditions as to safety, welfare and health. The Board was required to fix rates of payment for such women with regard to their efficiency and productivity in relation to that of males engaged in such work and the Regulations provided that payment to females (engaged on "men's work") should be not less than 60 per cent. nor more than 100 per cent. of the male rate.

The Board ceased to function in 1944 but the Women's Employment Regulations continued to operate until 1949, when, by a judgment of the High Court, such continuation was declared invalid. A summary of the activities of the Board during its period of operation was given in previous issues of the Labour Report (see No. 36, page 84).

(iii) *Judgments by Commonwealth Court of Conciliation and Arbitration.*—On 24th March, 1943, a case involving determination of general principles as to rates of wage of female employees not within the jurisdiction of the Women's Employment Board was remitted to the Commonwealth Court of Conciliation and Arbitration by the Minister for Labour and National Service under Regulation 9 of the National Security (Industrial Peace) Regulations, particularly as affecting female workers at Government small arms ammunition factories. The rates in these cases were considered by their trade union to be anomalous compared with those awarded by the Women's Employment Board to certain other women employed in those factories. The Court, in its judgment dated 17th June, 1943,* rejected the contentions of the union (The Arms Explosives and Munition Workers Federation of Australia) and enunciated in full the principles followed by the Court in determining female rates of wage within its jurisdiction.

In order to place the matter in perspective in its relation to the basic wage for males, the Court traced the history of the principles on which the basic wage for males was determined from its original declaration by Mr Justice Higgins in his "Harvester" judgment of 1907 (see pp. 54-5 of this Report) and continued—

"Although since 1930, when the 'economic or productivity factor' emerged as the 'dominant factor' in the problem of assessment [of the basic wage of adult male employees], the adequacy of the wage to meet the requirements of any 'specified family unit' has been only a subsidiary consideration, subsidiary that is to say to the question of the capacity of the national production to sustain a particular wage level, it is plain that the Court has not held that its basic wage has been fixed at too low a figure to meet the normal and reasonable needs of a family of husband, wife and at least one child. Nor has its adequacy to that extent been questioned. In this sense it can still be regarded as a family wage, inasmuch as it has been accepted as sufficient at all events to provide 'frugal comfort' for a man, his wife and at least one dependent child. For present purposes it is enough to say that, until a proper investigation demonstrates the contrary to be the case, we cannot but hold that the amount provided is more than sufficient to meet the normal and reasonable requirements of an unmarried worker with no dependants to support out of his earnings. And the same may be said of the living or basic wages determined by authorities functioning under State legislation as appropriate for male

employees within their jurisdiction. The method of assessment of wage rates for adult male workers adopted and followed by industrial authorities throughout Australia has been to fix a basic wage portion adequate for the estimated needs of some family group and to add to that some additional payment in recognition of the skill or experience possessed by the worker or the special conditions met with in his particular occupation. The basic wage portion has had no reference to work value; it has been assessed in accordance with needs and it has never been either held or suggested to be inadequate to meet the normal and reasonable needs not only of the worker himself but also of his wife and at least one dependent child."

The Court in its judgment then set out decisions arrived at by various Commonwealth and State Courts since 1912 when the Commonwealth Court first dealt directly with the problem of women's wages. Mr. Justice Higgins dealt with the case, and stated "I fixed the minimum in 1907 of 7s. per day by finding the sum which would meet the normal needs of an average employee, one of his normal needs being the need for domestic life. If he has a wife and children, he is under an obligation—even a legal obligation—to maintain them. How is such a minimum applicable to the case of a woman . . . ? She is not, unless perhaps in very exceptional circumstances, under any such obligation. The minimum cannot be based on exceptional cases."

In respect of the "minimum rate" enjoined by the Commonwealth Arbitration Act, he held that "Nothing is clearer than that the 'minimum rate' referred to in Section 40 means the minimum rate for a class of workers, those who do work of a certain character. If blacksmiths are the class of workers, the minimum rate must be such as recognizes that blacksmiths are usually men. If fruit-pickers are the class of workers, the minimum rate must be such as recognizes that, up to the present at least, most of the pickers are men (although women have been usually paid less), and that men and women are fairly in competition as to that class of work. If milliners are the class of workers, the minimum rate must, I think, be such as recognizes that all or nearly all milliners are women, and that men are not usually in competition with them."*

In its review the Court stated "the fixation of the basic wage for women at amounts below 60 per cent. of that fixed for men has been general in the awards and determinations of this Court and other industrial authorities of Australia".

The Court laid down general principles in the following words:—

"It is beyond question that the general rule adopted and followed by the Australian industrial authorities in the assessment of wages for adult women workers, engaged upon work suitable for women in which they cannot fairly be said to be in competition with men for employment, has been and still is to fix a foundational amount, calculated with reference to the needs of a single woman who has to pay for her board and lodging, has to maintain herself out of her earnings, but has no dependants to support; and to add to this foundational or basic amount such marginal amounts as may be appropriate in recognition of the particular skill or experience of the particular workers in question or as compensation for the particular conditions which they encounter in their occupations

* 6 C.A.R., p. 72.

"Just as the wages for male workers are assessed by adopting first a foundational wage—the basic wage—and adding to it marginal amounts fixed according to the relative skill and experience of particular workers or groups of workers, or to the special conditions they encounter, so too are women's wages, for work suitable to them in which they will not be disadvantaged by male competition, fixed by adding to a foundational or basic amount analogous margins. But in each case the foundational wage is in principle and justice different. The man's basic wage is more than sufficient for his personal needs; it purports to provide him with enough to support some family. The woman's, on the other hand, purports to be enough for her to maintain herself only. No allowance is made for the support of any dependants. The man's wage has been measured by this Court with reference to the dominating factor of the productive capacity of industry to sustain it and with due regard consequently to what its application in industry will mean, to the marginal structure which rises above it, and to the consequent wages which will in accordance with established rules and practice be paid to women and to minors.

"In the course of the hearing the Chief Judge drew attention to the necessity which would occur, if women's rates were to be assessed on the basis that relative efficiency and productivity (as between men and women) were to constitute the dominant factor, for a review of the principles in accordance with which the basic wage has been determined. That this necessity would arise must be apparent. For the basic wage for adult males has been fixed at as high an amount as the Court has thought practicable in all the circumstances of the case, including the circumstance of the existing proportionate levels of wages for women and minors. The share of men workers in the fruits of production will need to be reduced if women are to participate therein on an equal footing, or on a better footing generally than that to which they have hitherto been held to be entitled.

"It is desirable that we should indicate as clearly as possible the effect of the conclusions to which the review of the principles of wage assessment we have made has led us. It is that, so long as the foundational or basic wage for women is assessed according to a standard different from that which is the basis of the foundational or basic wage—a family wage—for men, the Court will not, in the exercise of its function of adjudicating between opposing interests, raise the general level of women's minimum wages in occupations suitable for women, and in which they do not encounter considerable competition from men, according to a comparison of their efficiency and productivity with the efficiency and productivity of men doing substantially similar work. To do so would at once depress the relative standard of living of the family as a group, and of its individual members, as compared with that of the typical single woman wage-earner."*

In December, 1943,† *Drake-Brockman J.* of this Court, in dealing with women employes in the Clothing (Dressmaking and Tailoring Sections) and Rubber industries, awarded for the duration of the war and for six months thereafter as a "flat rate" for the industry 75 per cent. of the "needs" basic wage, plus the "prosperity" and "industry" loadings ordinarily applicable. The reason for this action was (in the words of the

* 50 C.A.R., p. 291.

† 51 C.A.R., pp. 632 and 648.

judgment) as follows: "it was also common ground [between all the parties] that wastage of the employees in the industry during the last three years had been exceptionally heavy and that it was essential that some means should be found to attract women to the industry and thereafter to retain them for some reasonable period of time after they had been trained."

In July, 1944, the National Security (Female Minimum Wage) Regulations extended the discretion of the Commonwealth Court of Conciliation and Arbitration in fixing female minimum wage rates in "vital" industries in war-time as briefly described on page 63.

The Commonwealth Conciliation and Arbitration Act 1947 (see Labour Report No. 37, page 50) provided amongst other things that "a Conciliation Commissioner shall not be empowered to make an order or award altering . . . (d) the minimum rate of remuneration for adult females in an industry." As the result of doubts which arose as to the powers of the Commissioners to "fix" a basic wage, the matter came before the Full Court of the Commonwealth Court of Conciliation and Arbitration for clarification at the instance of several trade unions. Judgment was delivered on 27th July, 1948, and it was held that Conciliation Commissioners had jurisdiction to fix the female rates in question under the provisions of the Act, but it was also held that the provision referred only to the basic element in any prescribed female rates. Where, however, such a prescribed rate did not specifically fix or disclose the basic wage element, the appropriate Conciliation Commissioner had to fix the rate, and when such rate had been fixed its alteration became a matter for the Court. In view of the fact that there were fifteen Commissioners whose views might differ as to the element of the rates of pay of adult females which could be ascribed to an adult female basic wage analogous to the basic wage for adult males, the Government in December, 1948 passed an Act (No. 77 of 1948) further amending the above-mentioned Act to authorize the Court—and the Court alone—to fix the basic rate by providing that "a Conciliation Commissioner shall not be empowered to make an order or award . . . (d) determining or altering the minimum rate of remuneration for adult females in an industry."

A further amending Act (No. 86 of 1949) empowered the Court to determine or alter a "basic wage for adult females" which was defined as "that wage, or that part of a wage, which is just and reasonable for an adult female, without regard to any circumstance pertaining to the work upon which, or the industry in which, she is employed."

At the end of the 1949-50 Basic Wage Inquiry (see page 58) the Commonwealth Court of Conciliation and Arbitration by a majority decision fixed a new basic weekly wage for adult females at 75 per cent. of the corresponding male rate operative from the beginning of the first pay-period commencing in December, 1950.

In the 1952-53 Basic Wage and Standard Hours Inquiry the employers claimed a reduction in the proportion the female basic wage bore to the male basic wage from 75 to 60 per cent. and based this claim on two grounds. The employers claimed that the existing ratio was unjust and unreasonable having regard to the principles of male basic wage fixation and also that the existing ratio constituted an additional burden on employers at a time when the economy was adversely affected by the level of wage costs. The first contention was based on the fact that the male basic wage was a family

wage whereas the female basic wage was to provide for only one person. The Court in its judgment stated that "no evidence was presented to enable it to assess the reasonable needs either of a family group, typical, average or appropriate or of a typical or average woman wage-earner whose wage should be within the concept of the definition of 'basic wage' in section 25"* (of the Conciliation and Arbitration Act).

On the second contention, the judgment stated that "the Court finds it impossible to say that the higher ratio of the women's basic wage to the men's, adopted by the 1950 decision, has resulted to date in either a significant degree of unemployment amongst women or, generally speaking, a comparatively greater wages cost burden having to be carried, at the expense of reasonable profits, by enterprises employing a relatively higher proportion of women workers."* The Court decided that there was no basis for a review of the existing ratio and ordered that the female basic wage should remain at 75 per cent. of the male basic wage.

4. **Australian Territories.**—(i) *Australian Capital Territory.*—Prior to 1922 the lowest rate payable to an unskilled labourer was not defined as a basic wage, as all wages were paid under the authority of the Federal Capital Commission as a lump sum for the particular occupation in which the worker was employed, but in 1922 an Industrial Board commenced to operate under a local Ordinance (see page 34). A summary of the decisions made by the Industrial Board during its period of operation was given in earlier issues of the Labour Report (see No. 40, page 89).

By an amending Ordinance, No. 4 of 1949, the Industrial Board was abolished and its functions were transferred to authorities established under the Commonwealth Conciliation and Arbitration Act. Industrial matters are now determined by either the Commonwealth Court of Conciliation and Arbitration or the Conciliation Commissioner assigned to the Australian Capital Territory. It was provided, however, that all existing orders and agreements should continue to operate subject to later orders, awards and determinations made by the Court or Commissioner.

In reviewing the Australian Capital Territory awards following its decision of 12th October, 1950, the Commonwealth Court of Conciliation and Arbitration fixed the Canberra basic wage at £8 5s. per week for adult males, operative from the beginning of the first pay-period commencing in December, 1950.† This amount was the "needs" basic wage as expressed by the Court's Second Series index number for Canberra for the September quarter, 1950, with the prescribed addition of £1 5s. The new rate represented an increase of 13s. 6d. a week over that previously payable.

The basic wage payable in the Australian Capital Territory in November, 1955, in respect only of workers outside the Commonwealth Public Service, was £11 18s. a week for adult males and £8 18s. for adult females. These rates have not varied since August, 1953 following the decision by the Commonwealth Court of Conciliation and Arbitration in September, 1953 to discontinue quarterly basic wage adjustments (see page 59).

(ii) *Northern Territory.*—The determination of the basic wage for this Territory comes within the jurisdiction of the Commonwealth Court of Conciliation and Arbitration.

There are, in fact, two basic wages operating—(a) in respect of areas north of the 20th parallel of south latitude, and generally referred to as the "Darwin" rate, and (b) in respect of areas south of that parallel. These are calculated on different bases as set out in the following paragraphs.

* 77 C.A.R., p. 504.

† 69 C.A.R., p. 486.

(a) *The Darwin Basic Wage.*—This wage was first determined by the Court in 1915* when the Deputy President (Powers J.) awarded a rate of £3 17s. per week, or 1s. 9d. per hour, for an unskilled labourer, which included an allowance of 4s. for lost time.

The basic wage level again came under consideration when the wage for carpenters and joiners was reviewed by Mr. Justice Powers in 1916-17.† The Judge referred to an agreement dated 2nd June, 1916, between the Amalgamated Carpenters and Joiners and the Northern Agency (formerly Vestey Brothers) which provided for rates based on a budget of the estimated living requirements of a family consisting of a man, wife and two dependent children, amounting to £3 11s. 1d. per week. As the amount awarded (2s. 4d. per hour) for carpenters, however, was over £5 per week, the Judge felt that a fair living wage was fully assured. His Honor stated that he did not find anything to cause him to alter the judgment given on 15th March, 1915, when he prescribed a wage of 1s. 9d. per hour.

Up till 1924 the practice of the Court had been to fix the basic wage in accordance with the principles laid down in 1916, and in connexion with an application in 1924 concerning the rate for employees of the Commonwealth Railways, when the wage for these workers stood at £5 4s. 6d., the Judge (Powers J.) refused to alter the wage. He stated that he had in mind the amount of £4 12s., to which he would have felt justified in adding £1 to compensate for the many disadvantages caused by isolation, especially the loss of or extra expense of the proper education of the children. He considered, therefore, that the wage of £5 4s. 6d. then payable contained a special allowance on such account, and that the question of such special allowances was a matter for employers and employees to settle between themselves.‡

In 1927§ Judge Beeby also referred to the regimen of 1916, and implied that since then it had formed the foundation of the basic wages fixed by the Court, and that the sufficiency of the regimen, except as to rent and one or two minor omissions, had never been questioned. On this occasion he fixed the basic wage at £5 10s. per week, or 2s. 6d. per hour, including 20s. per week district allowance which was suggested by Mr. Justice Powers in his 1924 award as being a reasonable amount.

As there was no adjustment clause in operation in Territory awards, the basic wage of £5 10s. per week, remained in operation until 1934 (except for the reduction by the Financial Emergency Act 1931 to £4 16s. 3d.).

In 1934|| the Full Court for the first time considered the basic wage. The Court brought the regimen of the 1916 agreement up to date, altered the rent figure from 45s. to 65s. per month, and arrived at the amount of £4 10s. 9d. per week. This was £1 4s. 9d. above the Court's "needs" basic wage recently declared for the six capital cities, the Court regarding the difference as representing the extra amount required to purchase the same standard of living as in the six capital cities, with nothing by way of compensation allowance. Automatic adjustment provisions first introduced into the awards by this judgment were effected by inserting an appropriate adjustment scale based on the equation of £4 10s. 9d. to the Food and Groceries retail price index number (Special) 1,184 for Darwin for the month of August, 1934.

In 1938¶ the Court granted a "loading" of 3s. per week on the wage because the Commonwealth Government had extended to the Territory its general civil service increase of £8 per annum.

* 9 C.A.R., p. 1.
|| 33 C.A.R., p. 944.

† 11 C.A.R., p. 51.
‡ 39 C.A.R., p. 501.

§ 20 C.A.R., p. 737.

§ 25 C.A.R., p. 898

In 1939 an additional amount was added to the basic wage as a special loading to offset the increase in the cost of living not reflected by the index numbers. The loading was 16s. 3d. for employees on works and 10s. for railway employees.* In February, 1940, before an automatic adjustment increase of 2s. became payable, the Court suspended the adjustment clause pending further inquiry.†

In 1941‡ the Full Court again reviewed the basic wage and, after a full investigation of its past history, awarded £5 12s. 9d., made up of (a) £4 10s. 9d. awarded in 1934; (b) 4s. in respect of accrued adjustments since 1939; (c) 5s. additional allowance for rent; and (d) two constant (unadjustable) "loadings" of 3s. and 10s. per week. The Court also restored the adjustment clause by equating £4 15s. 9d. of the foregoing amounts (£4 10s. 9d. plus 5s. rent) to the base index 1,184 of the former adjustment scale (based solely on the Food and Groceries price index number). This, however, never became effective owing to its being superseded early in 1942 by the Blakeley Orders referred to below. The two "loadings" were not made adjustable. All other "loadings" mentioned above were dropped.

The basis of adjustment was altered by A. Blakeley, C.C., by Orders dated 29th January, 1942,§ owing to the urgent necessity to provide, over the period of the war, for adjustments in respect of rent, clothing and other miscellaneous items of domestic expenditure which, with the exception of rent, had already increased considerably in price throughout Australia, and threatened to increase further as the war continued. Adjustment by means only of the Food and Groceries Index was therefore no longer doing justice to the workers of the Territory, since the workers elsewhere in Australia were enjoying the benefit derived from the adjustment of their wages by means of the more comprehensive "C" series retail price index.

As there was no "C" series retail price index for the Territory, nor was it possible to compile one on the basis of prices in Darwin, the only alternative was to create a "composite" index with the help of prices for these additional items from some other town of somewhat similar living conditions. The town selected as being most suitable for this purpose was Townsville, and the "composite" index was therefore computed on the basis of food and groceries prices in Darwin, combined with Townsville prices for rent, clothing and other miscellaneous items of domestic expenditure mentioned above, the index being designated "The Darwin Special 'All Items' Index".

Taking the December quarter, 1940, as a suitable period upon which adjustments should be based, for which quarter the Special "All Items" index number was 1,036, the Court's basic wage of £4 19s. 9d. (including 4s. for accrued adjustments) declared in its judgment of 7th April, 1941¶ was related (not "equated") to the index number division (1031-1043) containing index number 1,036 of the "C" series adjustment scale formerly used by the Court in its awards (Base: 1923-27 = 1,000 = 81s.), thus giving workers in the Territory the same basis of adjustment as that operating in respect of all workers throughout Australia coming within the jurisdiction of the Court. It should be noted in this connexion that the Court's "needs" equivalent of index number 1,036 was 84s., so that 15s. 9d. of the Darwin wage was left "unadjustable". The rate payable from 1st February, 1942 (when the new basis first became operative), on the basis of index number 1,099 for the December quarter, 1941, was therefore £5 17s. 9d.,

* 40 C.A.R., p. 323 and 41 C.A.R., p. 269.
 † 46 C.A.R., p. 411.

‡ 42 C.A.R., p. 164.

§ 44 C.A.R., p. 253

inclusive of 5s. by adjustments under the scale since the December quarter, 1940 (1,036), and the two unadjustable "loadings" of 3s. and 10s. granted by the Court's judgment of 7th April, 1941.

Following the bombing of Darwin on 19th February, 1942, and on subsequent occasions, it was no longer possible to obtain even food and groceries prices in Darwin, and prices from Alice Springs and Tennant Creek were substituted for those of Darwin in the Special Index by means of a suitable "graft" of the new to the old prices in order to cancel out the effect on the index due solely to this substitution.*

On an application by the unions for the addition to the basic wage in the Territory of the amount of 7s. per week added by the Court elsewhere in Australia by its "Interim" Basic Wage Judgment of 13th December, 1946 [see page 57, (vii)], the Full Court on 13th March, 1947, decided to postpone the matter pending a general review of the basic wage in the Territory, although the Court granted the amount in the case of areas south of the 20th parallel of south latitude (see below). This further review was opened in Darwin with preliminary evidence taken by J. H. Portus, C.C., on 16th February, 1948, and ultimately dealt with by the Full Court in Adelaide on 20th May, 1948. The Court made an "interim" judgment, pending the hearing and finalization of the basic wage inquiry held in 1949-50 at the instance of the combined unions throughout Australia [see page 58, (viii)], granting the current equivalent of the 7s. referred to above, namely, 8s. In the judgment the Court adopted as from the March quarter, 1948, the new Darwin Special "All Items" Index (containing the restored prices of food and groceries for Darwin proper, plus Townsville prices for rent, clothing and miscellaneous items), namely, 1,283, and transferred the basis of adjustment from the existing automatic adjustment scale ("C" Series) on 1,000 = 81s. per week to the new scale on 1,000 = 87s. per week [in conformity with the "Court" Index (2nd Series)]. The new basic wage was to come into operation from the beginning of the first pay-period commencing after 20th May, 1948. The resultant total basic wage payable was therefore £7 os. 9d., made up of £5 12s. (the "needs" equivalent of index number 1,283 mentioned above), the "unadjustable" amount of 15s. 9d. (see page 71) and the loadings of 3s. and 10s.

Consequent upon the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry an "interim" increase of £1 2s. per week was authorized pending a special inquiry into the fixation of a new basic wage for the Northern Territory.† As a result of the latter inquiry the Court announced, on 19th November, 1951, that it would make an order "based upon the consent and agreement of the parties for a basic wage in the Northern Territory of £10 10s. per week." The new rates were operative from the beginning of the first pay-period commencing in November, 1951. The Darwin Special "All Items" Index (see above) was retained as the basis for subsequent quarterly adjustments but with the index number of 1824 equated to 200s. per week. Subsequently by decisions of the Conciliation Commissioner a special loading of 10s. per week, operative from the same date as the new basic wage, was added to the wage rates in most awards applicable to that part of the Northern Territory north of the 20th parallel of south latitude. This loading should be taken into account in any analysis or comparison involving the basic wage component of such wage rates.

* 48 C.A.R., p. 20.

† 69 C.A.R., p. 816.

The basic wage payable for this area of the Northern Territory in November, 1955, was £12 15s. a week for adult males. This rate has not varied since August, 1953 following the decision by the Commonwealth Court of Conciliation and Arbitration in September, 1953 to discontinue quarterly basic wage adjustments (see page 59).

(b) *Northern Territory (South of the 20th parallel of South Latitude).*—There are two main groups of employees in this area of the Northern Territory, namely, employees of the Commonwealth Railways and employees of the Department of Works (formerly the Works and Services Branch of the Department of the Interior).

The few Commonwealth Railways employees engaged in the area are at Alice Springs and in several small permanent-way gangs between Alice Springs and the South Australian border.

Prior to 1937, all employees of Commonwealth Railways, except clerks, were covered by awards of the Commonwealth Court of Conciliation and Arbitration, but since that year rates of pay for certain occupations have been prescribed by determinations of the Commonwealth Public Service Arbitrator. It has been the practice of the Court and the Public Service Arbitrator to fix a common base rate for Commonwealth Railways employees (the main centre being Port Augusta) and to provide, by means of "district allowances", additional rates to employees in isolated areas.

Prior to 3rd February, 1935, Commonwealth employees (other than Commonwealth Railways employees) engaged in the Northern Territory south of the 20th parallel of south latitude were paid the Darwin basic wage. The Full Court in a judgment issued on 13th November, 1934,* fixed a rate of 80s. per week for Works and Services employees, which included an amount of 7s. per week to cover the cost of freight on goods purchased from the Railway Stores at Port Augusta. This rate compared with £4 10s. 9d. being paid in areas north of the 20th parallel, and with £3 5s. in Adelaide.

Provision was also made for the adjustment of this wage to be made in the manner provided by the Court for railway employees at Alice Springs, namely, on the basis of the Court's "C" series adjustment scale in accordance with the variations of the "Special" index number for Port Augusta (inclusive of Railway Stores prices for groceries and dairy produce). Although no base index number was mentioned, it can be taken that the base index number division of the scale (809-820 = 66s.) was the starting point of the variations and was related to a total basic wage of £4, as this division contained "C" series index number 819 (Special) for the September quarter, 1934—from which it will also be observed that only 66s. of the total wage was actually adjustable.

The 3s. per week "loading" granted by the Court in 1938 (see page 70) applied to employees located south of the 20th parallel of south latitude as well as to those engaged north thereof.

At a hearing on 12th and 13th March, 1947, the Full Court granted to workers in this area the amount of 7s. per week consequent upon its "Interim" Basic Wage Judgment of 13th December, 1946, as an addition to the "adjustable" part of the basic wage applicable. The questions raised as to a general review of the basic wage in the Territory as a whole were postponed pending the hearing and finalization of the basic wage inquiry held in 1949-50 at the instance of the combined unions of Australia (see page 58).

* 33 C.A.R., p. 947.

By an Order of 11th October, 1949, the Full Court amended the existing award to provide for the adjustment to date and thereafter (by means of the "C" Series Automatic Adjustment Scale) of the 7s. per week "excess" over the contemporaneous "needs" rate granted by the Full Court on 13th November, 1934 (see page 73). The relevant "Special" "C" series index number for the latter period (as indicated above) was 819, equivalent to a "needs" wage of £3 6s. per week, and the above adjustment was effected by an additional column to the scale calculated on the basis of raising the weekly "needs" equivalents by the ratio of 73s. to 66s., or by multiplying the successive weekly "needs" rates by the factor 1.10606. Thus, the base rate of the scale 1000 = 87s. became 96s.

The Order came into operation from the first Sunday in December, 1949, with the index number for the September quarter, 1949 as the starting point. The "needs" rate for this was £6 1s. which by the above formula became £6 14s., and to this were added the loadings previously payable of 7s. for "Freight Costs" and 3s. for "Prosperity" loading, making a total basic wage of £7 4s., representing an increase of 6s. per week over the basic wage calculated on the former basis.

Consequent upon the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry (see page 58) an "interim" increase of £1 2s. per week was authorized pending a special inquiry into the fixation of a new basic wage for the Northern Territory. As a result of the latter inquiry the Court announced, on 19th November, 1951, that it would make an order "based upon the consent and agreement of the parties for a basic wage in the Northern Territory at £10 10s. per week". The new rates were operative from the beginning of the first pay-period commencing in November, 1951. The Port Augusta Special "All Items" Index (see above) was retained as the basis for subsequent quarterly adjustments but with the index number of 1757 equated to 194s. per week. Subsequently, by decisions of the Conciliation Commissioner, a special loading of 7s. per week operative from the same date as the new basic wage was added to the wage rates in most awards applicable to that part of the Northern Territory south of the 20th parallel of south latitude. This loading should be taken into account in any analysis or comparison involving the basic wage component of such wage rates.

The basic wage for this area of the Northern Territory in November, 1955 was £12 2s. a week for adult males. This rate has not varied since August, 1953 following the decision by the Commonwealth Court of Conciliation and Arbitration in September, 1953 to discontinue quarterly basic wage adjustments (see page 59).

5. State Basic Wages.—(i) *New South Wales.*—The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, when the Court of Industrial Arbitration fixed the "living" wage at £2 8s. per week for adult male employees in the metropolitan area. A Board of Trade established in 1918, with power to determine the "living" wage for adult male and female employees in the State, made numerous declarations during the period 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act 1926 transferred its powers to the Industrial Commission of New South Wales, as from 15th April, 1926. The Industrial Arbitration (Amendment) Act 1927 altered the constitution of the Industrial Commission from a single Commissioner to one consisting of three members. Act No. 14 of 1936, however, provided for the appointment of four members and

Act No. 36 of 1938 for the appointment of not less than five and not more than six members. The Commission was directed, *inter alia*, "not more frequently than once in every six months to determine a standard of living and to declare . . . the living wages based upon such standard for adult male and female employees in the State." The Industrial Arbitration (Amendment) Act 1932 directed the Commission within twenty-eight days from the end of the months of March and September to adjust the living wages so declared to accord with the increased or decreased cost of maintaining the determined standard. The first declaration of the Commission was made on 15th December, 1926, when the rate for adult males was fixed at £4 4s. per week, the same rate as that previously declared by the Board of Trade. The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925; a man and wife only in 1927, with family allowances for dependent children; and a man, wife, and one child in 1929, with family allowances for other dependent children. With the adoption in 1937 of the Commonwealth basic wage, however (*see below*), the identification of a specified family unit with the basic wage disappeared.

Employees in rural industries are not covered by the rates shown in the following table; a living wage for rural workers of £3 6s. per week was in force for twelve months from October, 1921 and a rate of £4 4s. operated from June, 1927 to December, 1929, when the power of industrial tribunals to fix a living wage for rural workers was withdrawn.

The variations in the living wage determined by the industrial tribunals of New South Wales are shown below :—

(a) From 1923 dates of declaration were the same as those for male rates. (b) Rate declared, £1 15s 6d., but law amended to provide a rate for females at 54 per cent. of that for males. (c) From October, 1937 the rates follow those of the Commonwealth Court of Conciliation and Arbitration for New South Wales.

Following on the judgment of the Commonwealth Court of Conciliation and Arbitration of 23rd June, 1937 (see page 56), the Government of New South Wales decided to bring the State basic wage into line with the Commonwealth rates ruling in the State, and secured an amendment of the Industrial Arbitration Act (No. 9 of 1937) to give effect thereto. The Act came into operation from the commencement of the first pay-period in October, 1937. The general principles laid down by the Commonwealth Court were followed as closely as practicable and provision was made for the automatic adjustment of wages in conformity with variations of retail prices as shown by the Commonwealth Court's "All Items" retail price index numbers, shortly known as the "Court" series of index numbers. The Commonwealth Court's principle of treating the "Prosperity" loadings as a separate and non-adjustable part of the total basic wage was adopted. The rates for country towns were, with certain exceptions, fixed at 3s. per week below the metropolitan rate; and Crown employees, as defined, received a "Prosperity" loading of 5s. per week, as against the 6s. laid down for employees in outside industry. The basic rate for adult females was fixed at 54 per cent. of the adult male rate to the nearest sixpence. The provisions of the main Acts for the periodic declaration of the living wage by the Industrial Commission were repealed, but the amending Act placed on the Commission the responsibility of altering all awards and agreements in conformity with the intentions of the new Act; of defining boundaries within which the various rates are to operate;* and of specifying the appropriate "Court" series retail price index numbers to which they are to be related.

An amendment to the Industrial Arbitration Act was assented to on 23rd November, 1950, which empowered the Industrial Commission to vary the terms of awards and industrial agreements affecting male rates of pay, to the extent to which the Commission thought fit, to give effect to the alteration in the basic wage for adult males made by the judgment of the Commonwealth Court of Conciliation and Arbitration of 12th October, 1950. In the case of female rates of pay the Commission was empowered to review the terms of awards and industrial agreements and to vary such terms as in the circumstances the Commission decided proper, but no variation was to fix rates of pay for female employees lower than the Commonwealth basic wage for adult females.

To facilitate the work of the Commission, awards were divided into separate classes, and orders issued regarding the variations to be made to those in each class. The rates for adult males were increased by the same amounts as the corresponding Commonwealth rates, with special provision to cover the cases of apprentices, casual workers and employees on piecework. In deciding the variation for female employees the Commission prescribed an increase in the total wage rate (i.e., basic wage plus marginal rate) of £1 4s. 6d. per week subject to the statutory provision (incorporated in the amendment of 23rd November) that the minimum total rate was to be not less than the basic wage for adult females prescribed in Commonwealth awards, that is, at least 75 per cent. of the corresponding male basic wage rate.

In the judgment delivered on 9th March, 1951, giving reasons for its decision on female rates, the Commission decided that the basic wage for adult females prescribed by the Commonwealth Court in reality included a portion "due to secondary considerations," and could not be considered a "reasonable and proper basic wage for the assessment of rates of female employees under the Industrial Arbitration Act".

* 52 N.S.W. I.G., pp. 783-4.

In discussing the composition of the amount of £6 3s. 6d. which the Commonwealth Court, in its judgment of October, 1950, had prescribed as the basic wage for adult females in New South Wales, the Commission stated :—

“ After giving the matter fullest consideration, we think in the circumstances it is reasonable to allocate £1 of the said sum of £6 3s. 6d. to secondary considerations and to regard the amount of £1 4s. 6d. as an addition proper to be made to the pre-existing basic wage in New South Wales of £3 19s. The total, £5 3s. 6d., becomes therefore the true female basic wage in New South Wales ”.*

As a consequence of the overriding statutory requirement that no rate for adult females in State awards shall fall below the Commonwealth basic wage for adult females, the amount of the quarterly adjustments to the female basic wage for changes in the “ Court ” series index numbers is the same in Commonwealth and State awards.

By an amendment to the Industrial Arbitration Act in June, 1951, the differentiation in rates for the basic wage in different districts and for employees under Crown awards was eliminated as a general rule, making the basic wage throughout most of the State equal to that paid in Sydney, the main exception being the Broken Hill district where a different basic rate still prevails.

The decision of the Commonwealth Court of Conciliation and Arbitration in September, 1953 to discontinue the system of automatic adjustment of the basic wage consequent on changes in the “ Court ” series retail price index numbers was considered by the New South Wales Industrial Commission. On 23rd October, 1953 the Commission certified that there had been an alteration in the principles upon which the Commonwealth basic wage was computed and ordered the deletion of the automatic adjustment clauses from awards and agreements within its jurisdiction.† In October, 1955 however, the New South Wales Government passed the Industrial Arbitration (Basic Wage) Amendment Act which required the Registrar of the Industrial Commission to restore, to all awards and agreements within its jurisdiction, quarterly adjustments of the basic wage consequent on variations in retail price index numbers. Subsequently the basic wage was adjusted as from the beginning of the first pay-period commencing in November, 1955, when the rates for the State, excluding Broken Hill, became £12 13s. for adult males and £9 9s. 6d. for adult females.

The new rate of £12 13s. a week for adult males was an increase of 10s. on the rate previously payable from August, 1953 and represented the full increase in the “ C ” series of retail price index numbers between June, 1953 and September, 1955.

The principle of supplementing wages by a payment in respect of dependent children under fourteen years of age operated in New South Wales from July, 1927, until superseded by the Commonwealth Government scheme from 1st July, 1941, and a brief account of the main features of the system appeared on page 103 of Labour Report No. 36.

(ii) *Victoria*.—There is no provision in Victorian industrial legislation for the declaration of a State basic wage. Wages Boards constituted from representatives of employers and employees and an independent chairman, for each industry group or calling, determine the minimum rate of wage to be paid in that industry or calling. In general, these Boards have adopted a basic wage in determining the rate of wage to be paid.

* 1951 N.S.W. A.R., p. 16.

† 111 N.S.W. I.G., p. 128.

By an amendment to the Factories and Shops Act in 1934, Wages Boards were given discretionary power to include in their determinations appropriate provisions of relevant Commonwealth awards. A further amendment to this Act in 1937 made it compulsory for Wages Boards to adopt such provisions of Commonwealth awards. This amending Act also gave Wages Boards power to adjust wage rates "with the variation from time to time of the cost of living as indicated by such retail price index numbers published by the Commonwealth Statistician as the Wages Board considers appropriate". The Wages Boards thus adopted the basic wages declared by the Commonwealth Court of Conciliation and Arbitration and followed that Court's system of adjusting the basic wage in accordance with variations in retail price index numbers.

After the Commonwealth Court of Conciliation and Arbitration discontinued the system of automatic adjustment of the Commonwealth basic wage (*see* page 59), a number of Wages Boards met in September, 1953 and deleted references to these adjustments. However, an amendment to the Factories and Shops Act in November, 1953 required Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers.

From 1st July, 1954 the Factories and Shops Acts 1928-1953 were replaced by the Labour and Industry Act 1953, which was, in general, a consolidation of the previous Acts and retained the requirement providing for the automatic adjustment of wages in accordance with variations in retail price index numbers.

The rates generally payable under the Victorian Wages Boards determinations from the beginning of the first pay-period commencing in November, 1955, were £12 6s. for adult males and £9 4s. 6d. for adult females.

(iii) *Queensland*.—The Industrial Conciliation and Arbitration Act of 1929 repealed the Industrial Arbitration Act of 1916 and amendments thereof, and the Basic Wage Act of 1925. The Board of Trade and Arbitration was abolished, and a Court, called the Industrial Court, was established. The Act provides that it shall be the duty of the Court to make declarations as to—(a) the "basic" wage, and (b) the maximum weekly hours to be worked in industry (called the "standard" hours). For the purposes of making any such declarations the Court shall be constituted by the Judge and two members one of whom shall be also a member of the Queensland Prices Board.

The main provisions to be observed by the Court when determining the "basic" wage are—(a) the minimum wage of an adult male employee shall be not less than is sufficient to maintain a well-conducted employee of average health, strength and competence, and his wife and a family of three children in a fair and average standard of comfort, having regard to the conditions of living prevailing among employees in the calling in respect of which such minimum wage is fixed, and provided that the earnings of the children or wife of such employee shall not be taken into account; (b) the minimum wage of an adult female employee shall be not less than is sufficient to enable her to support herself in a fair and average standard of comfort, having regard to the nature of her duties and to the conditions of living prevailing among female employees in the calling in respect of which such minimum wage is fixed. The Court shall, in the matter of making declarations in regard to the "basic" wage or "standard" hours, take into consideration the probable economic effect of such declaration in relation to the community in general, and the probable economic effect thereof upon industry or any industry or industries concerned.

The first formal declaration of a basic wage by the Queensland Court of Industrial Arbitration was gazetted on 24th February, 1921, when the basic wage was declared at £4 5s. per week for adult males and £2 3s. for adult females. Prior to this declaration the rate of £3 17s. per week for adult males had been generally recognized by the Court in its awards as the "basic" or "living" wage. The declarations of the Industrial Court are published in the *Queensland Industrial Gazette* and the rates declared at various dates are as follows:—

(a) Fixed by Basic Wage Act, 1942—see below.

(b) Quarterly adjustments provided by judgment of 21st April, 1942—see below.

(c) Consequent upon basic wage increases granted by the Commonwealth Court of Conciliation and Arbitration.

(d) Rates declared in 1954 Basic Wage Inquiry (see page 80).

On 15th April, 1942, the Court declared the rates operative from 31st March, 1941 as adequately meeting the requirements of Section 9 of the Industrial Conciliation and Arbitration Act of 1932, having regard to the level of the "C" Series Retail Price Index for Brisbane for the December quarter, 1941, and decided to make a quarterly declaration of the basic wage on the basis of the variations in the "cost of living" as disclosed by the "C" Series Index for Brisbane, commencing with the figures for the March quarter, 1942. This declaration was duly made by the Court on 21st April, 1942, at the rates of £4 11s. for adult males and £2 9s. 6d. for adult females. Following this judgment regular quarterly adjustments were made to the basic wage until January, 1953 (see below).

The Queensland Industrial Court granted increases of 7s. and 5s. to the basic wages for adult males and adult females respectively, payable from 23rd December, 1946, following the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration announced earlier in December, 1946 (see page 57).

Following the decision of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950 (see page 58), the Queensland Industrial Court conducted an inquiry as to what change should be made to the State basic wage for Queensland. The Industrial Court granted an increase of 15s. weekly to both adult males and adult females, thus increasing the metropolitan rates to £7 14s. per week and £5 2s. 6d. per week respectively. The increase became operative from 7th December, 1950. The basic wage payable to adult females was approximately 66 per cent. of the male rate.*

In January, 1953 the Queensland Industrial Court departed from the practice (established in 1942) of varying the basic wage in accordance with quarterly variations in the "C" series of retail price index numbers for Brisbane. If the practice had been continued, a reduction of 1s. in the basic wage for adult males from January, 1953 would have been made. The Court was not satisfied, however, that the movement in the "C" series index for Brisbane for the December quarter, 1952 was a true representation or reflex of the economic position for Queensland as a whole and so declined to make any alteration to the then existing basic wage.*

Quarterly adjustments were made for the next four quarters and the basic wage became £11 5s. for adult males from 1st February, 1954.

Commencing in March, 1954 a Basic Wage Inquiry was conducted by the Court and in its judgment of 11th June, 1954 the Court stated that there would be no change in the basic wage rates declared for February, 1954.†

At subsequent hearings consequent on the movement in the "C" series of retail price index numbers for Brisbane in respect of the quarters ended 30th June, 30th September and 31st December, 1954 and 31st March, 1955 the Court again decided not to vary the existing basic wage rates. However, after considering the "C" series index number for the quarter ended 30th June, 1955 and its relation to the index number for the March quarter, 1955 the Court announced that as these figures showed a continued upward trend of cost of living in 1955 the basic wage for adult males should be increased from £11 5s. to £11 7s. from 1st August, 1955. In this judgment the Court emphasised that it holds itself free whether or not to adjust the basic wage upwards or downwards in accordance with movement of the "C" series retail price index number.

Subsequently, the basic wage rates were again increased by the Court following the movement in the "C" series retail price index number for the quarter ended 30th September, 1955 and the rates payable from 24th October, 1955 became £11 9s. for adult males and £7 14s. for adult females in the Southern Division (Eastern District).

The rates shown above are applicable throughout the Southern Division (Eastern District—including Brisbane); allowances are added for other areas as follows:—Southern Division (Western District), 7s. 4d.; Mackay Division, 5s. 6d.; Northern Division (Eastern District), 10s.; and Northern Division (Western District), 17s. 4d. Half of these allowances are granted to females.‡

(iv) *South Australia*.—The Industrial Code 1920-1951 provides that the Board of Industry shall, after public inquiry as to the increase or decrease in the average cost of living, declare the "living wage" to be paid to adult male employees and to adult female employees. The Board has power also to fix different rates to be paid in different defined areas.

It is provided that the Board of Industry shall hold an inquiry for the purpose of declaring the "living wage" whenever a substantial change in the cost of living or any other circumstance has, in the opinion of the Board, rendered it just and expedient to review the question of the "living wage", but a new determination cannot be made by the Board until the expiration of at least six months from the date of its previous determination.

The Board of Industry consists of five members, one nominated by the Minister for Industry, two nominated by the South Australian Employers' Federation as representatives of employers, and two nominated by the

* Qld. I.G., Vol. 38, p. 137.

† Qld. I.G., Vol. 39, p. 355

‡ As defined in *Queensland Industrial Gazette*, 10th December, 1921, page 826.

‡ As defined in *Queensland*

United Trades and Labour Council of South Australia as representatives of employees. The member nominated by the Minister is President and presides at all meetings of the Board.

According to the Industrial Code 1920-1951, "living wage" means a sum sufficient for the normal and reasonable needs of the average employee living in the locality where the work under consideration is done or is to be done.

The family unit is not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the "average employee" in respect of whom the "living wage" is to be declared is a man with a wife and three children.

The first declaration by the Board of Industry was made on 15th July, 1921, when the "living wage" for adult male employees in the metropolitan area was determined at £3 19s. 6d. per week. The "living wage" for adult female employees in the same area was declared on 11th August, 1921 at £1 15s. per week.

The "living wage" declarations by the Board of Industry are set out below. The rates apply to the whole State.

(a) From 1937 date of operation were the same as those for male rates. (b) Commonwealth rate for metropolitan area adopted.

Following on the declaration of an "interim" increase in its "needs" basic wage by the Commonwealth Court of Conciliation and Arbitration on 13th December, 1946 (see page 58) the South Australian Government made provision through the Economic Stability Act, 1946 for the declaration by the Governor of a "living wage" based on the Commonwealth basic wage for Adelaide. This action was taken because the Board of Industry had made a determination on 5th September, 1946 and under the Industrial Code was not able to make a further determination for six months. On 24th December, 1946 the Governor issued a proclamation, declaring a rate of £5 2s. per week, including the 4s. "Prosperity" loading, to operate from

7th January, 1947. The Economic Stability Act also provided for similar proclamations in respect of adjustments to the "living wage"; however, the powers of the Board of Industry to declare a "living wage" which would supersede any wage declared by proclamation were retained.

The Industrial Code Amendment Act, 1949 made provision for the quarterly adjustment of the "living wage" in accordance with the variations in the Commonwealth basic wage for Adelaide. In effect this made the State living wage and the Commonwealth basic wage equal from the beginning of the first pay-period commencing in February, 1950. The prescribed adjustment to the female "living wage" was seven-twelfths of that made to the Commonwealth male basic wage. The Board of Industry retained power to amend the "living wage" but any new "living wage" was to be adjusted quarterly as above.

Following the decision of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry (*see* page 58), the South Australian Industrial Code was amended to provide for declarations of the "living wage" by proclamation to prevent unjustifiable differences between the Commonwealth and State basic wages. By proclamation dated 30th November, 1950, the South Australian living wage in the metropolitan area was increased from £6 17s. to £7 18s. for adult males and from £3 14s. 11d. to £5 18s. 6d. for adult females, operative from 4th December, 1950. These new rates were identical with the December rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia.

The female rate, which had previously been approximately 54 per cent. of the male basic wage, was, by the proclamation, increased to 75 per cent. of the corresponding male rate.

The basic wages of the Commonwealth Court of Conciliation and Arbitration for Adelaide have remained unchanged from the beginning of the first pay-period commencing in August, 1953, consequent on the discontinuance of quarterly adjustments (*see* page 60). The rates payable in accordance with the quarterly notifications, by the President of the Board of Industry, of the South Australian living wage for the metropolitan area have also remained unchanged over this period at £11 11s. for adult males and £8 13s. for adult females.

(v) *Western Australia*.—The Court of Arbitration, appointed under the provisions of the Industrial Arbitration Act 1912-1952, determines and declares the "basic wage" in this State. The Court consists of three members appointed by the Governor, one on the recommendation of the industrial unions of employers, one on the recommendation of the industrial unions of employees, while the third member is a Judge of the Supreme Court. The last-mentioned member is the President of the Court.

The Industrial Arbitration Act 1912-1952 provides that the Court of Arbitration may determine and declare a basic wage at any time on its own motion, and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination shall be made within twelve months of the last preceding inquiry.

The term "basic wage" is defined in the Act as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies". In determining what is just and reasonable the Court must take into account not only the "needs of an average worker" but also the "economic capacity of industry" and any other matters the Court deems relevant.

The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis of its calculations a man, his wife and two dependent children.

The Act provides that the Court of Arbitration may make adjustments of the basic wage each quarter if the official statement supplied to the Court by the State Government Statistician relating to the cost of living shows that a variation of 1s. or more per week has occurred, compared with the preceding quarter. These adjustments apply from the dates of declaration by the Court.

The annual and special declarations of the Court of Arbitration under the provisions of the Industrial Arbitration Act are shown for the various areas of the State in the following table. It must be noted that prior to 1950 the legislation differed from that outlined above. Particulars of the previous legislation will be found in earlier issues of the Labour Report.

(a) Exclude Goldfields areas, where rates were the same as those operating from 1st July, 1926.
 (b) Applicable from 24th April, 1939. (c) Applicable from 28th April, 1941. (d) Special declarations following basic wage increases granted by the Commonwealth Court of Conciliation and Arbitration.
 (e) Inquiry into female rates only.

The first declaration of the "basic wage" by the Court of Arbitration since the authority to fix one was vested in the Court by the Industrial Arbitration Act, 1925 was made on 11th June, 1926, when the rate for adult male employees was determined at £4 5s. per week, and for adult female employees at £2 5s. 11d. per week. Since that date the principal inquiries have been those of 1938, 1947, 1950 and 1951.

The declaration of 13th June, 1938 (operative from 1st July) was based on the findings of the Royal Commission on the Basic Wage, 1920 (see page 55). For this purpose the Court reduced the amount recommended by the Commission for a five-unit family to the equivalent for a four-unit family, and brought the resulting amounts up to their purchasing equivalents at the March quarter, 1938, by means of the separate "group" retail price index numbers in respect of the sections for food, clothing and miscellaneous expenditure, and for rent added an amount which was considered fair under ruling conditions.*

The increased basic wage of 26th February, 1947, was granted after an inquiry† by the Western Australian Court of Arbitration consequent upon the "Interim" Basic Wage Judgment of the Commonwealth Court of Conciliation and Arbitration in December, 1946 (see page 57).

Following the judgment of the Commonwealth Court of Conciliation and Arbitration in the 1949-50 Basic Wage Inquiry (see page 58) the Western Australian Court of Arbitration resumed an inquiry which had been adjourned, to ascertain what change should be made in the State basic wage rates. In its judgment of 7th December, 1950‡ the Court decided that the basic wage should be increased by £1 per week for adult males and by 15s. per week for adult females. The rates in the metropolitan area then became £8 6s. 6d. for adult males and £4 14s. 1d. for adult females, operative from 18th December, 1950. In relation to the female rate the unions' claim had been for a basic wage equal to 75 per cent. of the male rate instead of the existing 54 per cent basis. Although this claim was not granted it was intimated that the increase of 15s. should not necessarily be regarded as the Court's final word on the subject.

As the result of a subsequent inquiry§ the basic wage for adult females was increased from 1st December, 1951 to 65 per cent. of the corresponding male rate. This was subject to the condition that the increase in the basic wage should be offset by the reduction in or deletion of existing margins between the basic wage and the total wage as specified by the appropriate award or determination.

The Commonwealth Court of Conciliation and Arbitration announced on 12th September, 1953 the discontinuance of quarterly adjustments. Following this decision the Western Australian Court of Arbitration exercised its discretionary power and, after reviewing the quarterly cost of living statements prepared by the Government Statistician for each quarter from September quarter, 1953 to March quarter, 1955, declined to make, where applicable, any adjustment to the basic wage. However, after reviewing the cost of living statement for the quarter ended 30th June, 1955 the Court decided to increase the basic wage for Perth by 5s. 11d. a week for adult males and to make corresponding increases for the other areas in the State. On 2nd November, 1955, the Court announced that there would be no alteration of the existing basic wage, on the grounds that the cost of living index numbers for the quarter ended 30th September, 1955 did not reveal the necessary statutory margin of difference from the previous quarter's figures.

The rates ruling in November, 1955 were £12 12s. 5d. for adult males and £8 4s. 1d. for adult females.

(vi) *Tasmania*.—A State basic wage is not declared in Tasmania. Wages Boards constituted for a number of industries, from representatives of employers and employees and an independent chairman, determine the

§ W.A. I.G., Vol. 36, p. 497.

minimum rate of wage payable in each industry. In general these Boards have adopted the basic wages of the Commonwealth Court of Conciliation and Arbitration in determining the rate of wage to be paid.

The Wages Board Act 1920-1951 gives Wages Boards power to adjust their wage rates with variations in cost of living as indicated by retail price index numbers published by the Commonwealth Statistician. When the Commonwealth Court discontinued the system of automatic adjustments of the basic wage in September, 1953, the Chairman of the Wages Boards stated he was of the opinion that automatic adjustment clauses should be deleted from all Wages Boards determinations. Before Wages Boards met to consider this matter, the wage rates for all determinations were automatically adjusted upwards from the first pay-period commencing in November. By early December, 1953, all Wages Boards had met and deleted the automatic adjustment clause from determinations and cancelled the adjustment increases payable from November.

The rates commonly adopted by Tasmanian Wages Boards in November, 1955 were £12 zs. for adult males and £9 is. 6d. for adult females. These rates were operative in September, 1953, when the Commonwealth Court of Conciliation and Arbitration announced its decision to discontinue the system of automatic quarterly adjustments to the basic wage.

(vii) *Rates Prescribed.*—The "basic wage" rates of State industrial tribunals operative in November, 1954 and 1955 are summarized in the following table :—

(a) Where dates are not quoted rates operate from beginning of first pay-period commencing in month shown. (b) Automatic adjustments discontinued from August, 1953 until November, 1955 (see page 77). (c) No basic wage declared but rates shown (Melbourne) are those commonly adopted by Wages Boards. The Victorian Labour and Industry Act 1953 requires Wages Boards to provide for the automatic adjustment of wage rates in accordance with variations in retail price index numbers. (d) Between February, 1951 and August, 1955 the Queensland Industrial Court declined to make any alteration in the basic wage rates consequent on quarterly movements in the "C" series of retail price index numbers. (e) The "living wage" declared for the metropolitan area is also adopted in country areas except at Whyalla where a loading of 5s. is generally payable. Automatic adjustments consequent on variations in retail price index numbers have not been made to the living wage since August, 1953 following the decision of the Commonwealth Court of Conciliation and Arbitration on 12th September, 1953. (f) The Western Australian Arbitration Court from July, 1953 to August, 1955 declined to adjust the basic wage in accordance with movements in the cost of living statements supplied by the Government Statistician. (g) None declared but rates shown (Hobart) are those commonly adopted by Wages Boards. From 9th December, 1953, automatic adjustment was discontinued and the adjustment increases of 10s for males and 7s 6d. for females payable from early November 1953 were cancelled.

§ 5. Wage Margins.

On 5th November, 1954 the Commonwealth Court of Conciliation and Arbitration delivered a judgment* which in effect became a general determination of the basis upon which all relevant wage and salary margins should be assessed. This became known as the Metal Trades Case, 1954.

General principles of marginal rate fixation had previously been enunciated by the Court in the Engineers' Case of 1924, the Merchant Service Guild Case of 1942 and the Printing Trades Case of 1947, and the Court adopted these insofar as they were applicable to current circumstances.

“ Margins ” were defined as—

“ Minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are the skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance.”

A brief account of the Metal Trades Case is as follows :—

The Amalgamated Engineering Union, the Electrical Trades Union and other employee organizations parties to the Metal Trades award, 1952, filed applications during 1953 for increased margins for all workers covered by this award.

The applications came on for hearing before Mr. Conciliation Commissioner Galvin who decided that they raised matters of such importance that, in the public interest, they should be dealt with by the Commonwealth Court of Conciliation and Arbitration. On 16th September and 6th October, 1953 the Conciliation Commissioner, pursuant to Section 14A of the Conciliation and Arbitration Act, referred these applications to the Court.

The actual claims of the trade unions were that the marginal rate of 52s. per week payable to a fitter in the metal trades should be increased to 80s. per week (86s. for certain electrical trades) with proportionate increases for other award occupations. The margins then current, with a few exceptions, had been in existence since 1947. The employees' claims were in the nature of a test case to determine the attitude of the Court to applications for increased margins.

The Metal Trades Employers' Association and other respondents to the Metal Trades award had counter-claimed that existing margins for skilled tradesmen should remain unaltered, while those paid to partly skilled or unskilled workers should be reduced.

The Court decided to take the Commissioner's two references together and the matter came on for hearing before the Full Arbitration Court (Kelly C. J., Kirby, Dunphy and Morgan J.J.) in Melbourne on 13th October, 1953.

In a judgment delivered on 25th February, 1954 the Court held that a prima facie case had been made for a re-assessment of margins but that the economic situation at that time, particularly in regard to the level of costs, did not permit of such a comprehensive review. The Court decided that to avoid the creation of new disputes, to save expense and to obviate procedural difficulties, it would not reject the claims but adjourn them until 9th November, 1954.

* Print No. A4009.

On 25th and 26th August, 1954, summonses were filed by the employees' organizations for orders that proceedings in this case be brought forward and the hearing was resumed on 5th October, 1954.

In a judgment delivered on 5th November, 1954 the Court made an order re-assessing the marginal structure in the Metal Trades award by, in general, raising the current amount of margin to two and a half times the amount of the margin that had been current in 1937. However, in cases in which the result of that calculation produced an amount less than the existing margin, the existing margin was to remain unaltered. In effect, this decision increased the margin of a fitter from 52s. per week to 75s. per week, increased similarly margins of other skilled occupations, and made no increase in margins of what may generally be described as the unskilled or only slightly skilled employees under the Metal Trades award.

At the end of its judgment the Court stated that, while its decision in this case related immediately to one particular industry, it was expected to afford general guidance to all authorities operating under the Conciliation and Arbitration Act or under other legislation which provided for tribunals having power to make references, or being subject to appeal, to the Court, where the wage or salary may properly be regarded as containing a margin. The Court added observations for the guidance of these and of other tribunals "which may regard decisions of this Court as of persuasive authority."

In view of the widespread effects of this judgment some extensive extracts from it are given below :—

"Margins are minimum amounts awarded above the basic wage to particular classifications of employees for the features attaching to their work which justify payments above the basic wage, whether those features are the skill or experience required for the performance of that work, its particularly laborious nature, or the disabilities attached to its performance. Furthermore, the assessment of each margin should be made in relation to each other margin, so that the margin awarded to one employee should bear, as far as possible, its proper monetary comparison with that of every other employee awarded a margin, having in mind the various matters which in each case should be weighed in assessing the margin. These observations may appear to be somewhat trite, but we state them because we think that they are often forgotten or overlooked."*

"The first task of the Court in the problem of determining what should be the present assessment or re-assessment of margins in this industry has been to decide what can be regarded—generally speaking—as a sound basis on which to build. Our conclusion on this question is that the proper point for a general approach to this question is the variation order made by Beeby J. on the 23rd February, 1937 . . . †"

"Since 1937 there have been four major decisions which have increased the margins in this industry; certainly three of these have resulted in distortions of greater or lesser degree of the scheme of margins

* Print No. A4009, p. 22.

† *Ibid.*, p. 23.

assessed by Beeby J. in 1937. The distortions to which we refer have resulted in each case in the improvement of the relative marginal position of the unskilled or relatively unskilled employee in comparison with that of the skilled. In two of these cases the major adjustments of margins which were made were the result in part of the agreement of some employers.*

"The cumulative effect of the distortions resulting from the addition of the loadings in 1941, and of the two variation orders made by Mr. Commissioner Mooney in 1947, can conveniently be seen in the following table which sets out certain selected classifications, some of which have been regarded as "key" classifications in the industry:—

Title of classification.	Margin under 1937 orders.	Margin including "loading" under 1941 order.	Margin including "loading" under first Mooney order of 1947.	Margin including "loading" under second Mooney order of 1947.
Duster	50s.	56s.	65s.	82s. 6d.
Fitter	30s.	36s.	45s.	52s.
Annealer	25s.	29s.	36s.	42s. 6d.
Machinist 2nd class	20s.	24s.	31s.	37s.
Machinist 3rd class	14s.	17s.	22s.	28s.
Process worker ..	8s.	11s.	16s.	22s.
Racksmen	4s.	7s.	12s.	18s.
All other labourers	Nil	3s.	3s.	3s.

An examination of this table shows in a somewhat startling way the deterioration of the relative position of the skilled employee's margin in relation to the margins of the semi-skilled or unskilled.†

"In our earlier reasons we said:—

'The Court has in the past rejected the principle that marginal rates should be adjusted, either automatically or from time to time, in accordance with variations in the purchasing power of money. It again rejects this principle.'

"Mr. Eggleston [Counsel for the unions] in discussing that observation during the adjourned hearing remarked that the claim was not now made that the margins should be automatically adjusted on change in the value of money. But the claim now made is that at this 'time' such an adjustment should be made, provided that in the view of the Court the economic state of the country can sustain the burden of the adjustment. On the question of the adjustment of margins according to variation in the value of money we do not propose to add anything to what we said earlier, and we again reject the claim that wage justice requires that, even *prima facie*, a margin properly assessed earlier should be adjusted when it comes up for re-assessment by relation to a change in the purchasing power of money.

"In our earlier reasons we said:—

'The court adopts the general principles of marginal fixation enunciated in the *Engineers Case* of 1924, the *Merchant Service Guild Case* of 1942, and the *Printing Trades Case* of 1947.'

* Print No. A4009, p. 23.

† *Ibid.*, p. 27.

“In the *Printing Trades Case* of 1947, Kelly J. (as he then was), after reviewing earlier decisions of this Court relating to the assessment of margins, including the *Engineers Case* of 1924 and the *Merchant Service Guild Case* of 1942, said :—

‘I conclude, therefore, that the following rules should guide me in the review of wage rates sought by the present application :—

1. That it must be put upon the applicant Union to satisfy the Court that material change in circumstances, occurring since the making of the award, has rendered the rates then prescribed as minima no longer just as such.
2. That the standard of justice must be the true value today of the work for which the rates are to be made payable as minima.
3. That the true value is not to be ascertained by reference to high wages being paid on account of accidental and temporary conditions connected with a shortage of labour.
4. That the true value is not to be ascertained by reference to variation in the purchasing power of money since the award was made.
5. That the assessment of the true value must have regard to comparisons of minimum rates payable for work in comparable industries or of comparable occupations.’

“Paragraph 4 of that quotation should be read with a sentence later in the same reasons in which Kelly J., in giving his reasons for assessing the margin of the hand-compositor at a new and higher rate, remarked :—

‘Whilst not allowing myself to inform my decision by reference to any proportionate fall in the purchasing power of money since either the 1942 or previous awards were made, I have not forgotten that nominal values of all things, including the nominal value of work, must tend to increase with an increase in the nominal prices of essential commodities.’

“We think that it may be convenient to discuss first the position of the fitter, whom we may take as exemplifying the position of the really skilled employee under this award. (We do not wish it to be thought, however, that in discussing the position of the fitter first we have in any sense looked upon him in isolation from the other classifications in the award. The problem must be considered as a whole and it is desirable for us to mention before we come to the margin of the fitter that we are clearly of opinion that looked at from any point of view—whether from the value of money or otherwise—no case has been made out for any increase in the margins prescribed for what may generally be described as the unskilled or only slightly skilled employees.) We have said that the fitter’s margin in 1937 was assessed at 30s. ; it has now reached 52s. Our task is to decide what is ‘the true value today of the work’ which the fitter does. The fact, of which there is some evidence, that a large body of other employees not in this industry have been awarded increases in margins since 1947 may have seemed to supply some *prima facie* ground for the increase of the fitter’s margin, awarded in 1947 by the Full Court, which has not since been increased ; but the evidence on that score is of such a nature that it would provide

but an uncertain foundation upon which to decide that the fitter's margin should be increased by comparison; still less does it point to any particular amount as an appropriate increase. We may mention as one difficulty that we do not know the extent to which the increases in margins in other industries since 1947 were themselves reflections of the increase in the fitter's margin in that year. Indeed, as to the fitter's margin it is generally difficult to re-assess it by relation to the margins of other skilled employecs, since the fitter's margin has itself been so often accepted as a key margin for the skilled employee. We mentioned in our earlier reasons that evidence had been tendered as to 'over-award' payments in fact being made in this industry. No further evidence was tendered on this subject and we do not feel able to add anything further to our earlier observations upon it. But our view is that the real mischief which our assessment of the margins in this case is required to cure is that which we believe to exist in the relative position of the margin for the skilled employee in relation to the margin for the unskilled, a state of affairs which we believe is not confined to this industry. In attempting to rectify the relative position of the skilled employee, we cannot overlook the fact that any increase in his margin is likely to have some reflection in the marginal rates of other skilled employees not in this industry. It is particularly because of this fact that in making any increase for the skilled employee we have anxiously considered the state of the economy. Our examination of the economy and our conclusions thereon will be found set out later in these reasons. In attempting to find the true value of the margin for the fitter today, we have not forgotten that the nominal value of his skill must tend to increase with the increase in the nominal prices of essential commodities, a feature which was present in the mind of Kelly J. in the *Printing Trades Case*, as we have indicated. We have concluded that, viewed in the light of present monetary values and in the whole setting of marginal rates, the fitter's margin should now be assessed at 75s. That amount is two and a half times the fitter's 1937 margin. It has not been calculated by adjusting the 30s. margin to any change in the value of money since 1937. But for the benefit of those interested in such comparisons we may mention that the Commonwealth Statistician's "C" series index number for the six capital cities for the December quarter 1936, that available at the time when Beeby J. made his variation order on the 23rd February, 1937, was 862; the comparable number for the September quarter 1954 was 2321; the last-mentioned number is a little more than two and two-thirds times the first. It may be seen therefore that an award of 75s. per week as the margin for the fitter gives him now only a little below the same purchasing value as his 1937 margin gave if measured by the "C" series index. On this aspect of the matter we may quote the following passage from our earlier reasons in these matters:—

It is apposite to mention here the many benefits which all or many employees covered by the awards of this Court have received at the instance of the unions since the termination of hostilities in the second world war. These have included the increase in the real value of the basic wage, the extension of paid annual leave, the reduction of the standard ordinary working week from forty-four hours to forty, the increase in so-called "penalty" rates for work performed at the week-end and, speaking generally, the large increases in margins for work

which is unskilled or which requires little skill or experience. All of these things not inconsiderably supplemented by over-award payments gained in most cases by the intervention of the unions have, in our opinion, substantially increased wage costs and have thereby contributed to the fall in the value of money on which the claim of the unions for the increase in margins very largely rests in these proceedings.'

'We then proceeded to state that the 'really skilled employee has shared most of these improvements.' In the light of all these circumstances it cannot be regarded as unjust that the really skilled employee's new margin should happen to fall somewhat short in purchasing-power of the margin which was assessed for him in 1937, which we have regarded as a proper 'datum point'.'*

"If the margins of the eight classifications set out in the table which earlier appears in these reasons are each multiplied by two and a half, the result is as follows (we include for purposes of comparison the present margin):—

—	1937 margin	Present margin	1937 margin multiplied by two and a half.
Duster	50s.	82s. 6d.	125s.
Fitter	30s.	52s.	75s.
Annealer	25s.	42s. 6d.	62s. 6d.
Machinist 2nd class	20s.	37s.	50s.
Machinist 3rd class	14s.	28s.	35s.
Process worker	8s.	22s.	20s.
Rackman	4s.	18s.	10s.
All other labourers	Nil	3s.	Nil
		during first three months in metal trades industry, thereafter 9s.	

"It will be seen that as regards the three lowest paid classifications set out in the above table, the multiplication of the 1937 margin by two and a half would produce a result which if awarded would result in a reduction of the present margins. This would seem at first sight logical for complete consistency, but after consideration we have come to the conclusion that we should not reduce any margins simply because they do not accord with the scheme of re-assessment of the higher margins by relation to those prescribed in 1937. It is difficult, perhaps in some cases impossible, to ignore past history in dispensing industrial justice. We do not think that we should ignore, or that we should now attempt wholly to correct, the tendency which has been wide spread during and since the recent war to award relatively higher margins to employees with less claims to marginal payments than to those in the upper marginal brackets. Moreover, our assessment of the new margin for the fitter as 75s. per week is, as we have indicated, to a large extent affected by the result of that and other trends.

"As a general rule, therefore, our new assessment of the margins in this industry is to increase the 1937 margins by two and a half. But in cases in which the result of that calculation produces an amount less than the existing margin, the existing margin remains unaltered.

"To this general approach there are, however, some exceptions."†

* Print No. A4009, pp. 28-31.

† Ibid., p. 31.

The Court instanced new classifications inserted since 1937 and margins re-assessed since 1937.

The judgment then proceeded to examine the statistical evidence adduced in relation to the "indicators" of the condition of the economy and concluded :—

" We can do no more than to reach our conclusions in accordance with the general picture as we see it, after pondering to the best, of our ability, in the absence of any conclusive evidence being available of the bounds of economic capacity, those aspects of economic capacity of which we have some evidence.

" In fine, we are satisfied that, subject to economic considerations, the adjustments in favour of the more skilled employees' minimum rates, now to be made, ought to be made in accordance with principles of wage-justice. Then, having examined the material at hand, we have come to the conclusion that the economy can support what we have proposed.

" The variations to be made are, of course, of the minimum rates prescribed by the award. Where wages are in fact being paid at higher amounts than the minimum rates which we now prescribe, the order will be understood to be not applicable, that is to say, not effective to increase such over-award payments.

" In the statement published in February the Court endeavoured to make it clear that its judgment was 'not to be read as being determinative, except within the bounds of necessary inference, of matters in the lists of the Court relating to claims and counter-claims concerning the minimum rates of payment which should be fixed for other classes or types of employment than those to which the present references relate.' 'Insofar, however, as it deals with the claim for a general adjustment of marginal rates in accordance alone with variation of the purchasing power of money,' so proceeded the statement, 'what is said here must be understood as being necessarily applicable to all similar claims or submissions.' Nevertheless, it is proper, we think, again to emphasise that the decision we are now making deals only with the particular industry with which the references made by the Conciliation Commissioner are concerned. At the same time, we desire to state that what the Court now decides is expected by it to afford general guidance to all authorities operating under the *Conciliation and Arbitration Act*, or under other legislation which provides for a wage-or salary-fixing tribunal having power to make references, or being subject to an appeal, to this Court, where the wage or salary may properly be regarded as containing a margin. It is desirable that we should attempt to say a little for the guidance of those authorities and perhaps also of other industrial tribunals which may regard decisions of this Court as of persuasive authority. The matter is of particular importance since we are aware not only that our decision in this case establishes a new and higher standard of margins for skilled employees covered by the Metal Trades award, but also that successive awards in this industry have in the past been regarded as guides for margins in a number of other awards. It is unwise for us to attempt to be too specific, in particular since, as we said in our reasons delivered in these references in February last, 'every claim for an increase in award rates of a marginal nature should be considered in the light of the history of the margin concerned.'

" It must be emphasised that our main purpose in prescribing new and higher margins for the skilled employees in this award has been to restore to some extent their marginal status in relation to the unskilled, and it is obvious that to give the same proportionate increase of existing margins to the unskilled as to the skilled would, generally speaking, destroy that purpose. In cases of awards in which the general marginal pattern has in the past followed that of the Metal Trades award, it would seem that no particular difficulty should be found; in those cases it may be regarded as proper to prescribe a new marginal structure which will accord, *mutatis mutandis*, with the Court's new marginal structure in the Metal Trades award. But in other cases, speaking very generally, the matter may be approached in the following manner. Margins prescribed in 1937, or shortly thereafter, since in some cases the reflection of the increase in 1937 in the Metal Trades award margins may have occurred later, could be multiplied by two and a half; if the result of the calculation is more than the present margin there would seem *prima facie* ground for its increase to that result; if not, *prima facie* there would seem to be no ground. But we emphasise that there may be exceptions to this general approach, particularly in cases of new classifications, or in cases where some change in the nature of the work done, or of the disabilities suffered by a particular class of employees has required a new assessment of margins since 1937 or thereabouts. The margins for such employees must be fitted into their appropriate places in the new scale."*

§ 6. Child Endowment in Australia.

The Commonwealth Government, in June, 1927, called a conference at Melbourne of the Premiers of the several States to consider the question of child endowment from a national standpoint. The Prime Minister submitted various estimates of the cost of endowing dependent children under fourteen years of age in Australia at 5s. per week. After discussion, it was decided to refer the matter to a Royal Commission to be appointed by the Commonwealth Government.

The Commission submitted its report on 15th December, 1928. It was not unanimous in its findings, and the opinions and recommendations of the members were embodied in two separate reports, which dealt exhaustively with the constitutional aspects, existing systems, industrial legislation, the basic wage, standard of living, regulation of wages, working conditions and cognate matters.

The findings and recommendations in the *majority* and *minority* reports were given in Labour Report No. 19.

At the conference of Commonwealth and State Ministers held at Canberra in May, 1929, the Prime Minister stated that the Commonwealth Government was not prepared to adopt a scheme financed entirely from the proceeds of taxation, as had been recommended in the minority report. The Commonwealth Government agreed with the majority of the Commission that child endowment could not be separated from the control of the basic wage—a power which the Commonwealth did not possess and which the States were not prepared to relinquish. The Government, therefore, did not propose to establish any system of child endowment.

It was generally agreed that any scheme which would increase the charges upon industry would be unwise at that particular time. The matter of child endowment was accordingly left to be dealt with as the State Governments should think proper.

Early in 1941, the Commonwealth Government announced its intention to introduce a scheme of child endowment throughout Australia. The necessary legislation* was passed and the scheme came into operation from 1st July, 1941. As amended to November, 1955 its main features are as follows :—

Any person who is a resident of Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates shall be qualified to receive an endowment in respect of each child.

From 20th June, 1950, the rates of endowment have been—

- (a) where the endowee has one child only, 5s. per week ;
- (b) where the endowee has two or more children—in respect of the elder or eldest child, 5s. per week and in respect of each other child, 10s. per week ;
- (c) in the case of the endowee being an approved institution the rate is 10s. per week for each child inmate.

There are provisions to cover cases of families divided by reason of divorce, separation, death of a parent or other circumstances. In such cases payment may be made to the father, mother or other person.

A child born during the mother's temporary absence from Australia is deemed to have been born here.

There is a twelve months residential requirement for claimants and children who were not born in Australia, but this is waived if the claimant and the child are likely to remain permanently in Australia.

Endowment will be paid for the children of members of the Naval, Military or Air Forces of the United Kingdom who are serving with the Australian Forces from the time of the arrival of the children in Australia.

From 1st July, 1941 when the scheme was introduced the rate of endowment was 5s. per week for each child in excess of one in a family and for each child under 16 years in an approved institution, the rate being increased to 7s. 6d. per week from 26th June, 1945, and to 10s. per week from 9th November, 1948. There is no means test.

Endowment in respect of the first child under 16 years in a family was first provided for by an amendment of the legislation in June, 1950.

Consequent upon the operation of the Commonwealth Child Endowment Scheme, appropriate steps were taken for the termination of existing schemes operating in New South Wales and the Commonwealth Public Service. The New South Wales system of child endowment was in operation from July, 1927 to July, 1941, and the Commonwealth Public Service system operated from November, 1920 until July, 1941. Details of these schemes appeared in earlier issues of the Labour Report (*see* No. 36, page 103).

* Act No. 8, 1941 (Child Endowment Act) as amended by No. 5, 1942 and Nos. 10 and 41, 1945 (now Part VI. of the Social Services Act 1947-1955).

A summary of the operations of this scheme during each of the years 1950-51 to 1954-55 is given below :—

Child Endowment : Australia.

Year.	Endowed Families at 30th June.		Approved Institutions.		Total Number of Endowed Children.
	Number of Claims in Force.	Number of Endowed Children.	Number of Institutions.	Number of Endowed Children.	
1950-51 ..	1,150,847	2,365,177	370	23,753	2,388,930
1951-52 ..	1,205,421	2,493,246	379	24,623	2,517,869
1952-53 ..	1,246,986	2,599,026	376	24,951	2,623,977
1953-54 ..	1,280,439	2,689,577	387	27,397	2,716,974
1954-55 ..	1,304,227	2,764,167	392	24,394	2,788,561

Year.	Amount Paid to Endowees and Approved Institutions.	Annual Liability for Endowment at 30th June.	Average Annual Rate of Endowment per Endowed Family at 30th June.	Average Number of Endowed Children per Endowed Family at 30th June.	Number of Endowed Children in each 10,000 of Population.
	£	£	£		
1950-51 ..	43,584,614	47,151,169	40.434	2.055	2,837
1951-52 ..	46,625,052	49,794,121	40.777	2.068	2,915
1952-53 ..	53,243,722	52,012,584	41.190	2.084	2,977
1953-54 ..	50,760,799	53,995,617	41.613	2.101	3,023
1954-55 ..	52,529,902	55,547,635	42.104	2.119	3,031
