# **CHAPTER 4**

# **UNEMPLOYMENT**

The unemployment statistics presented in this chapter have been derived from ABS sources, primarily the ABS Monthly Labour Force Survey and associated supplementary surveys. Some summary statistics on job vacancies, which are an indicator of the demand for labour, are also included in this chapter.

For a full definition of unemployment as it relates to the Labour Force Survey, see the Glossary of this publication. Broadly speaking, a person is considered to be unemployed if he or she satisfies three criteria—not employed, available for work, and taking active steps to find work. The employed and the unemployed together make up the labour force.

Measures of unemployment provide an indicator of the unused capacity in the labour force. The two most important measures are the number of unemployed persons and the unemployment rate. The unemployment rate for any group is the number unemployed expressed as a percentage of the labour force in the same group. Characteristics of the unemployed presented in this chapter include their demographic composition, duration of unemployment, educational qualifications and difficulties experienced in finding work. The unemployment characteristics of families, i.e. unemployment rates of different family members and number of families with some unemployment are also shown.

## Unemployment

There were 916,000 unemployed persons in Australia in August 1993, of whom 564,500 were males and 351,600 were females. About 85 per cent of unemployed persons were looking for full-time work. Between August 1983 and August 1990, the estimated number of unemployed persons fell by 102,200. Between August 1990 and August 1993, the number of unemployed persons rose by 331,400.

The unemployment rate for persons generally fell between August 1983 and August 1989, decreasing from 9.9 per cent to 5.7 per cent. It then increased over the next four years to 10.7 per cent in August 1993. In August 1993 the unemployment rate for males aged 15 to 19 years was 24.0 per cent, while for females aged 15 to 19 years the unemployment rate was 21.9 per cent.

The average duration of unemployment rose from 41.4 weeks in August 1983 to a peak of 51.3 weeks in August 1988 before falling to 43.0 weeks in August 1991. The average then increased to 51.2 weeks in August 1992 and was followed by a further increase to 59.1 weeks in August 1993.

Indicates break in series. Estimates from August 1986 are based on a revised definition introduced in April 1986. See the Technical Notes for further information. Source: The Labour Force, Australia (6203.0).

# Job Search Experience of Unemployed Persons

In July 1993, the labour force numbered 8,645,700 persons, of whom 871,300 were unemployed persons taking active steps to find work. Of these, 85 per cent were persons looking for full-time work.

The most frequently reported difficulty in finding work was the belief that there are 'no vacancies at all'. The number of persons reporting this as the main difficulty had fallen from 32 per cent in July 1992 to 25 per cent in July 1993.

In July 1993, 83 per cent of unemployed persons reported that they were registered with the Commonwealth Employment Service (CES). Over the last decade, this percentage has been within the range of 76 per cent (July 1990) to 83 per cent (July 1993).

There were 331,200 persons (38 per cent of total unemployed) whose duration of current period of unemployment (at July 1993) was one year or more. For this group the most frequently reported main difficulties in finding work were 'no vacancies at all' (26%) and 'considered too young or too old by employers' (22%).

## Successful and Unsuccessful Job Search Experience

In July 1992 there were an estimated 1,453,000 persons who had started a job for wages or salary (lasting two weeks or more) in the previous twelve months. Of these persons, 1,029,200 had been out of work before starting their job, while 423,800 persons changed employer to start the job.

There were a further 970,800 persons who had looked for, but not started, a job for wages or salary in the last year.

Of the persons who started a job for wages or salary, 39 per cent (563,500) obtained their job by approaching the employer without prior knowledge that the job was available, while 37 per cent (537,300) approached the employer to obtain a job they knew was available. The remaining 24 per cent (352,200) of jobs had been obtained as a result of the employer approaching the jobseeker.

Persons aged 20 years and over were more likely to have started a job in their preferred occupation (67%) than persons aged 15 to 19 years (55%). Persons who changed employer to start their job were far more likely to be working in their preferred occupation (77%) than those who were out of work prior to starting the job (59%). This was the case for all age groups tabulated, except those aged 55 years and over.

## Labour Force Experience

An estimated 2,110,100 persons looked for work at some time during the year ending March 1993. The proportion of males who looked for work at some time during that year increased from 13 per cent in 1990 to 20 per cent in 1993 and for females there was an increase from 12 per cent in 1990 to 14 per cent in 1993.

Of the 2,110,100 persons who looked for work during the year ending March 1993, 77 per cent had only one spell of looking for work and spent, on average, 25 weeks looking for work.

An estimated 386,500 persons had looked for work for 52 weeks, and 807,200 persons had looked for work for less than 13 weeks.

## **Educational Attainment**

As a percentage of the total unemployed, persons with post-school qualifications rose from 29 per cent to 38 per cent between February 1988 and February 1993. In contrast, the proportion of total unemployed persons who were without post-school qualifications fell from 65 per cent to 58 per cent. Persons without post-school qualifications who had not attended the highest level of secondary schooling available fell from 49 per cent of total unemployed persons in February 1988 to 38 per cent in February 1993.

The unemployment rate for persons with post-school qualifications decreased from 5.1 per cent in February 1988 to 4.4 per cent in February 1990, then increased to 9.1 per cent in February 1993. For persons with a dcgrce, the unemployment rate rose from 3.6 per cent in February 1988 to 6.2 per cent in February 1993. Between February 1991 and February 1993 the unemployment rate for persons without post-school qualifications increased from 11.5 per cent to 14.8 per cent.

## Families

In June 1993, of the 590,900 families with one or more members unemployed, 44 per cent had no member employed, 35 per cent had one employed and 21 per cent had two or more employed. Dependants were present in 60 per cent of the 590,900 families with one or more members unemployed.

Unemployment rates varied from 19 per cent for full-time students aged 15-24 to 17 per cent for sole parents to 7 per cent for husband or wife in married-couple families. For persons who were not a member of a family the unemployment rate was 14 per cent. The average duration of unemployment for husbands or wives was 65 weeks. For sole parents it was 48 weeks and for those who were not members of a family, 60 weeks (living alone 80 weeks, not living alone 45 weeks).

## **Job Vacancies**

A job vacancy is a job available for immediate filling on the survey reference date and for which recruitment action has been taken. For a full definition of a job vacancy refer to the Glossary. Vacancies available only to persons already employed by the organisation are excluded.

The number of job vacancies in Australia at November 1993 was estimated at 38,200 - an increase of 9,000 since November 1992.

The greatest increases in numbers of vacancies since November 1992 were recorded in the Retail trade (2,600) and Construction (1,700) industries.

> TABLE 4.20. JOB VACANCIES : INDUSTRY, AUSTRALIA, NOVEMBER 1988 TO NOVEMBER 1993 ('000)

	November								
Industry	1988	1989	1990	1991	1992	1993			
Mining	0.7	0.4	0.3	0.3	0.2	0.7			
Manufacturing	15.1	11.7	3.7	*3.3	4.5	4.9			
Electricity, gas and water	0.8	0.7	0.4	0.2	0.2	0.2			
Construction	3.5	3.3	1.1	1.8	0.5	2.2			
Wholesale trade	1.9	4.2	2.0	0.9	1.2	2.2			
Retail trade	13.6	9.9	4.0	4.4	3.5	6.1			
Transport and storage; Communication	2.0	2.3	*1.0	*1.0	1.5	2.2			
Public administration and defence(a)	4.3	4.9	3.7	2.5	2.8	3.1			
Community services	13.2	12.8	10.3	6.4	5.7	6.8
