**11 NOVEMBER 1974** 

Reference No. 9.1

## CONSUMER PRICE INDEX - SEPTEMBER QUARTER 1974

### **REVISED EDITION**

Further to the corrigenda statement of 1 November 1974, this publication replaces the bulletin published on 21 October 1974. It includes, in full detail, revisions to Consumer Price Index figures for September quarter 1974. These revisions arise from a re-compilation of the Health Services Sub-group of the index. The special purpose dissection of 'All Groups' into 'Goods' and 'Services' is also revised in this publication. Revised figures are indicated by the letter r.

Variations in retail prices as measured by the Consumer Price Index for the six State capital cities and Canberra are shown herein.

- 2. Compared with the previous quarter, the All Groups Consumer Price Index for September quarter 1974 increased by 5.1% for the weighted average of the six State capital cities, the largest quarterly increase since December quarter 1951. Changes in individual cities were: Sydney +5.2%, Melbourne +4.9%, Brisbane +5.4%, Adelaide +5.1%, Perth +4.9%, Hobart +5.0%, Canberra +5.2%.
- 3. Recent quarterly changes in the All Groups index have been as follows:

## Percentage Change from Preceding Quarter

Quarter	Six Capitals (a)	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	Canberra
•	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent	Per cent
1972-73 –								
September '	+1.4	+ 1.4	+1.4	+ 0.8	+1.6	+1.4	+ 1.1	+ 1.4

- 6. The Consumer Price Index measures quarterly variations in prices of goods and services as affecting a high proportion of the expenditure of wage-earner households in the aggregate. Changes in the pattern of this expenditure since 1950 have been such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals (rather than on the basis of a list of items and set of weights which remained unchanged throughout the period). Seven series for short periods have therefore been constructed and linked to form a continuous retail price index series published herein as the Consumer Price Index. In each period between links the items and weighting have remained unchanged.
- A detailed description of the Consumer Price Index is contained in Labour Report No. 57, 1972 (Reference No. 6.7). For periods after December quarter 1973, reference should be made to the appendix of the March quarter 1974 bulletin. This appendix describes the seventh series of the index which was introduced as from December quarter 1973 and is broadly based on the estimated pattern of consumption in 1971-72.
- 8. The quarterly prices for food items used in the index are the averages of prices normally collected as at the middle of each of the three months of the quarter. However, for potatoes and for onions from December quarter 1968, weekly prices are averaged to arrive at monthly prices. Prices of all non-food items are collected at regular quarterly intervals (or at annual intervals with items such as local government rates and seasonal clothing) normally as at the middle of the mid-month of each quarter. However, for furniture, major household appliances and motoring items (other than motor car) the collection is made during the first month of each quarter to facilitate field collection arrangements.
- 9. The indexes measure price movements in each city individually. They do not provide a comparison of the retail price level in any city with the retail price level of any other city.
- 10. Table 1 on page 5 of this Bulletin shows Consumer Price Index numbers for each fiscal year from 1962-63 to 1973-74 and for each quarter from March quarter 1968. Table 2 on pages 6 and 7 shows Group Index numbers quarterly from September quarter 1971 to September quarter 1974.
- Table 3 on page 8 shows monthly Food Group index numbers for each month from January 1971. In Table 4 information of contributions by the Food Group to the total index in terms of All Groups Index Points is shown for both June quarter 1974 and September quarter 1974 and each of the three months of this quarter, i.e. July, August and September 1974. A more detailed presentation of information on monthly food price movements can be found in the monthly bulletin Consumer Price Index, Food Group Index Numbers (Reference No. 9.11). Since the food group is the only group of the index for which prices are collected monthly, it is not possible to provide monthly indexes for other groups.
- Table 5 on page 9 shows index numbers for June quarter 1974 and September quarter 1974 for groups and sub-groups of the index and for some special groupings. It also contains information of contributions by index sub-groups to the total index in terms of All Groups Index Points for these two quarters. Users of these figures should bear in mind that the Consumer Price Index is designed to measure the proportionate change in retail prices as combined in the five major groups and more particularly the total of the groups. For sub-groups or particular items, the index does not necessarily provide comprehensive and valid measures of price changes in those particular fields. Nor does it necessarily measure the relative influences of those classes of items in aggregate variations in prices. The Consumer Price Index is essentially a combination of selected items under various headings and not a dissection of total household expenditure into its component parts.

Movements of the indexes from one date to another are usually expressed as percentage changes rather than changes in the 'index points' because 'index point' changes are affected by the level of the index in relation to its base period while percentage changes are not. In this bulletin details are given in terms of percentage changes in paragraphs 2-5. However, the analysis in paragraph 14 shows movements in terms of All Groups 'index points'. This analysis shows the contribution of selected items and of the five groups to movements in the total indexes. Table 5 on page 9 shows movements expressed as both percentage changes and changes in 'index points'. The following example illustrates the computation of 'index point' and percentage changes:

All Groups: Weighted Average of Six State Capital Cities

Index Point Change		Percentage Change
Sept. quarter 1974 CPI (1966-67 = 100.0)	162.0	Index points difference divided by the index for the previous period
less June quarter 1974 CPI Index points difference	154.1 7.9	$\frac{162.0 - 154.1}{154.1} \times 100 = 5.1\%$

14. The following analysis and Table 5 on page 9 are provided to assist interpretation of movements shown by the Consumer Price Index from June quarter 1974 to September quarter 1974.

15. A summary of the various group indexes, together with the *main quarterly* price changes which affected the index between June quarter 1974 and September quarter 1974 is shown below:

Food Group. Changes in meat and potato prices are frequently the major cause of movements in the total index and of disparate movements between cities. Price falls in butchers' meat partly offset increases in all other sections of the Food Group. Prices of potatoes, bread, milk, butter, eggs, soft drinks, ice cream and confectionery rose in all cities. The group index for the weighted average of the six State capital cities increased by 2.7%.

Clothing and Drapery Group. Increases in prices of footwear and men's clothing accounted for most of the increase in this group. The group index for the weighted average of the six State capital cities showed a quarterly increase of 4.9%.

Housing Group. There were increases in all sections of this group, and especially in house price, private dwelling rents and repairs and maintenance. The group index for the weighted average of the six State capital cities showed a quarterly increase of 4.7%.

Household Supplies and Equipment. There were widespread increases in most sections of this group, the main ones being for furniture, household appliances and utensils, personal requisites, soaps and detergents and in gas and fuel charges. The group index for the weighted average of the six State capital cities increased by 6.6 per cent since June quarter 1974.

Miscellaneous Group. This group showed widespread increases, the main ones being for motoring, health services, cigarettes, wines and spirits, beer (in all cities except Sydney and Hobart) and hairdressing. The group index for the weighted average of the six State capital cities showed a quarterly increase of 7.0%.

#### FOOTNOTES TO TABLES

- (a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid the distortions that would occur in rounding off the figures to the nearest whole number.
- (b) Weighted average of six State capital cities.
- (c) Any discrepancies between totals and sums of components in this table are due to rounding. For similar reasons quarterly movements shown by sub-group or group index numbers do not necessarily correspond exactly with those shown by the relevant index points.
- (d) See paragraph 13 on page 3.
- (e) Includes poultry as from December quarter 1968 and sausages as from December quarter 1973 (previously included in Beef sub-group)
- (f) Base: December quarter 1973 = 100.0.
- (g) Includes fried chicken, meat pies, hamburgers and sandwiches.
- (h) Men's, women's, boys' and girls' summerweight outerwear and women's and girls' summerweight underwear.
- (i) Men's, women's, boys' and girls' winterweight outerwear and underwear, and blankets.
- (j) Includes flats as from December quarter 1968.
- (k) Does not include cost of land or interest charges on house purchase.
- (1) Firewood and kerosene. Includes heating oil and briquettes as from December quarter 1968.
- (m) City and suburban rail, bus and tram.
- (n) Motor car, petrol, oil, tyres, tubes, tyre retreading and battery.
- (o) Repairs, registration, third party insurance and driver's licence.
- (p) Includes cameras, film, film processing, phonograph records, radio and television operation and cinema admission.
- (q) Base: December quarter 1968 = 100.0.
- (s) Hairdressing, drycleaning and shoe repairs.
- (t) The Special grouping "Goods" is composed of the Food Group; Clothing Group; Household Supplies and Equipment Group, house price and maintenance, motoring goods, cigarettes and tobacco, beer, wines and spirits, photographic goods, records, newspapers and magazines and television replacement parts. The remaining items are classified as "Services".
- r Revised.
