MAIN PRICE CHANGES BETWEEN JUNE QUARTER 1978 AND SEPTEMBER QUARTER 1978

- Food**
 - Beef prices increased significantly in all cities.
 - Fresh fruit and vegetable prices increased in all cities except Brisbane.
 - Prices for meals out and take-away food increased in all cities.
- Clothing**
 - There were increases in most sections of this group.
- Housing**
 - Private dwelling rents increased in all cities.
 - Government dwelling rents increased in Sydney and Melbourne.
 - Local government rates and charges increased in Brisbane.
- Household equipment and operation**
 - Prices of furniture and floor coverings increased in all cities.
 - Postal charges increased in all cities.
- Transportation**
 - Motor car prices increased in all cities.
 - Motor vehicle third party insurance charges increased in Brisbane, Adelaide, Perth and Canberra.
- Drivers' licences increased in Melbourne and Brisbane and motor vehicle registration charges increased in Brisbane.
 - Petrol prices fell significantly in Hobart as a result of increased discounting.
 - Air fares increased in all cities.
 - Rail fares increased in Brisbane and Perth and bus fares increased in Perth and Hobart.
- Tobacco and alcohol**
 - Main increases were for alcoholic beverages.
- Health and personal care**
 - Net medical expenses increased in all cities following the reduction in benefit levels effective from 1 July.
 - Health insurance fund contribution rates increased in Sydney, Melbourne, Adelaide and Canberra.
- Recreation**
 - There were increases in most sections of the group.
- R. J. CAMERON**
Australian Statistician

EXPLANATORY NOTES

Brief description of the CPI

The Consumer Price Index (CPI) measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditures by metropolitan wage and salary earner households. This 'basket' covers a wide range of goods and services, arranged in the following groups: Food; Clothing; Housing; Household equipment and operation; Transportation; Tobacco and alcohol; Health and personal care; and Recreation. Each group is in turn divided into subgroups. Index numbers at the *group* and *All Groups* levels are published for each State capital city and Canberra, for the weighted average of six State capital cities and for the weighted average of seven capital cities. This bulletin also contains *subgroup index numbers* for the weighted average of six State capital cities.

2. It is important to note that the capital city indexes measure price movements over time in *each city individually*. They do not measure differences in retail price levels between cities.

3. Further information about the CPI is contained in the booklet entitled *A Guide to the Consumer Price Index* which is available from the ABS on request.

Prices

4. Prices of *non-food items* are collected quarterly, usually as at the middle of the mid-month of the quarter. However, to facilitate field collection arrangements, some items (furniture, appliances, television sets, radios, sound equipment, motor vehicle operation, clothing and footwear services and hairdressing) are priced during the first month of each quarter. Items such as local government rates and seasonal clothing are priced annually.

5. The quarterly prices for *food items* used in the index are the averages of prices collected as at the middle of each of the three months of the quarter. In the case of some fresh food items (fruit, vegetables and fish) prices are collected more frequently and averaged to obtain monthly prices.

Weighting pattern

6. There are 105 expenditure classes (that is, groupings of like items) within the current CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.

7. Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI in fact comprises nine series of price indexes which have been linked to form a continuous series. The ninth series (that is, the current series) was introduced as from September quarter 1976 and its weighting pattern is based on estimated expenditures in 1974-75, obtained from the first household expenditure survey conducted by the ABS.

Index points and percentage changes

8. Movements in indexes from one period to another can be expressed either as percentage changes, or as changes in 'index points'. The difference between these two methods of describing movements in indexes is shown by the following example:

All Groups CPI : Weighted average of six State capital cities

Index numbers :

September quarter 1978 :	252.5
Less : June quarter 1978 :	247.7
Change in index points :	+4.8

$$\text{Percentage change} = \frac{+4.8}{247.7} \times 100 = +1.9\%$$

The index number of 252.5 for September quarter 1978 indicates an increase of 152.5% since the reference base year (1966-67).

9. Most of the tables in this bulletin show index numbers or percentage changes calculated from index numbers. Table 3, on the other hand, shows the main changes between June quarter 1978 and September quarter 1978, in terms of '*All Groups*' index points, for each capital city.

Special tables

10. Table 7 provides a *detailed analysis*, for the weighted average of six State capital cities, of movements in the CPI since the previous quarter, including information on movements for subgroups and for some special groupings. It also shows the *contribution* which each group and subgroup makes to the total index. For instance, the dairy produce subgroup contributed 5.24 index points to the total All Groups index number of 252.5 for September quarter 1978. The final column shows contributions to the *change in All Groups index points* by each group and subgroup.

11. The All Groups index includes the effects of unusual changes in prices for hospital and medical services, for September and December quarters of 1975 (following the introduction of Medibank) and for December quarter 1976 (following changes to Medibank). To facilitate analysis of trends in retail prices without the effects of these unusual changes Table 5 shows percentage changes for a special grouping "All Groups excluding hospital and medical services", and compares these with changes in the All Groups index.

Monthly food group index

12. The ABS publication *Consumer Price Index, Monthly Food Group Index, Six State Capital Cities and Canberra* (6402.0) contains monthly index numbers, percentage changes and other data relating to the Food group of the CPI.

Other related publications

13. Users may also wish to refer to the following publications which are available on request :

- . *Average Retail Prices of Selected Items, Six State Capital Cities and Canberra* (6403.0)
- . *Consumer Price Index, Monthly Food Group Index, Darwin* (6413.0)
- . *A Guide to the Consumer Price Index*

14. All publications produced by the ABS are listed in *Catalogue of Publications* (1101.0) which is available free of charge from any ABS office.

Symbols and other usages

— Nil or less than half the final digit shown.

NOTE. Any discrepancies between totals and sums of components in this publication are due to rounding. For similar reasons quarterly movements shown by subgroup or group index numbers in Table 7 do not necessarily correspond exactly with those shown by the relevant index points.
