

# PRICE INDEX OF MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING<sup>1</sup>

EMBARGOED UNTIL 11:30AM MON 12 SEPTEMBER 1994

## JULY KEY FIGURES

	% change Jun 94 to Jul 94	% change Jul 93 to Jul 94
<b>Weighted average of six State capital cities</b>	<b>0.5</b>	<b>2.1</b>
Sydney	0.6	2.2
Melbourne	0.2	1.9
Brisbane	0.4	1.3
Adelaide	0.4	2.1
Perth	0.3	2.0
Hobart	0.3	0.7
Canberra	0.2	1.2

## JULY KEY POINTS

### ALL GROUPS INDEX

- Increases in structural steel and ready mixed concrete prices, mainly in Sydney, were the main contributors to the increase in the index for the weighted average of the six State capital cities.

### MAJOR MOVEMENTS

- Structural steel prices increased 2.5 per cent in Sydney.
- Ready mixed concrete prices increased 1.3 per cent in Sydney.
- Higher world copper prices resulted in increased prices for copper pipes (+3.5 per cent), mains cable (+2.7 per cent) and electrical circuitry (+2.2 per cent).

### INQUIRIES

- For further information about these and related statistics, contact Robert Adams on 06 252 6198, or any ABS Office.

## EXPLANATORY NOTES

\*\*\*\*\*

### INTRODUCTION

**1** This publication presents index numbers measuring changes in prices of selected materials used in the construction of buildings other than houses — the Price Index of Materials Used in Building Other than House Building. It is calculated on the reference base 1989–90 = 100.0 for the six State capital cities and Canberra.

**2** Index numbers for the current month and the previous three months are preliminary and subject to revision.

### SCOPE

**3** The index includes 63 items which are combined into 10 industry of origin groups and an 'All groups' total. Table 1 presents 'All groups' index numbers for the weighted average of the six State capital cities, for each of the cities separately, and for Canberra. Although many of the selected materials are also used in house building, in building repair, maintenance and alteration work and in engineering construction work (e.g. projects such as roads, dams, bridges and the like), the weighting pattern of the index is not applicable to these other activities of the construction industry. In addition, since the weights are based on an average materials usage over a range of types of building within the defined area (building other than house building), the index is not necessarily applicable to any specific building or type of building.

### CLASSIFICATION

**4** For the weighted average of the six State capital cities the selected materials have been combined into broad groups on an industry of origin basis. Table 4 presents index numbers for groups defined in terms of the Groups (3 digit level) of the 1993 *Australian and New Zealand Standard Industrial Classification (ANZSIC)*; the percentage contributions for individual materials and groups are shown in Table A1 of the Appendix of the October 1993 issue of this publication. The 'industry of origin' is not necessarily identical to the industry which supplies the materials to builders. The 'industry of origin' is the industry in which the material is *primarily produced*, determined in accordance with the classification rules of the ANZSIC. For instance, many of the materials are classified to the appropriate producing industries, rather than the wholesale trading industries. Some materials used in constructing buildings in Australia are imported. Imported materials are allocated to the similar industry of origin as Australian produced materials.

### ITEMS AND WEIGHTS

**5** The index is a fixed weights index. The items were selected and allocated weights in accordance with the estimated average values of materials used in the construction of buildings other than houses completed in each of the seven capital cities in the five years ended June 1992. This same weighting pattern is used for each of the seven capital cities. The weighting pattern for the 'All groups' index is set out in Appendix A of the October 1993 issue of this publication.

### PRICE MEASUREMENT

**6** Prices are collected at the mid point of the month to which the index refers, or the nearest trading day. They relate to specific standards of each material and are obtained from representative suppliers of materials used in building. In general, the point of pricing is 'delivered on site' but in some cases it has been necessary to use the nearest realistic price available e.g. 'delivered to electrical contractor's store'. Local prices are used in the indexes for each capital city.

PRICE MEASUREMENT (continued)

**7** As far as possible, actual transactions prices are used in this index — that is, prices actually paid by building contractors or subcontractors to suppliers for materials delivered on building sites. The actual price paid for anything can be described in various ways. Instead of being described as a single price (as usually happens in retail shops) a price for a building material may be described in terms of the components which make up the price — for instance 'list price plus sales tax', 'suppliers price plus freight', 'basic price less (particular types of) discount' and so on. It is these *net* prices that buyers pay to sellers for materials that the ABS aims to use in compiling this index.

**8** The ABS asks respondent businesses to report details of the discounts they offer so that actual transactions prices can be calculated. However, as building material suppliers offer many different types of discounts to buyers (e.g. trade discounts, settlement discounts, quantity discounts, competitive discounts), the identification of the discounts and the way in which they are applied by sellers pose considerable problems for the ABS. To the extent that discounts are identified and measured, their effects are taken into account in calculating the index. Sometimes new discounts, or changes in the way discounts are applied by sellers, are identified only after index numbers for a particular period have been published. In such cases, or in any other case where it is discovered that incorrect prices have been used in compiling the indexes, revisions to index numbers may occur in subsequent issues of this publication.

**9** To minimise the incidence of revisions, the ABS has stringent procedures to verify that prices reported in its mail collections are transactions prices net of discounts.

**10** Sales taxes levied on building materials are included in the prices used to compile the index. Materials used in the construction of Commonwealth, State and Local Government owned buildings are exempt from sales tax; materials used in most non-government 'health' and 'education' buildings and buildings for non-profit organisations such as religious and charitable institutions are also exempt. At any particular time, when there is a change in the rate of sales tax on building materials, the movement in the index takes into account the proportion of materials sold subject to sales tax and the proportion of materials exempt from sales tax.

**11** On request, the ABS can provide further information on the treatment of sales tax in the index including details of factors to either include the full effects of sales tax changes or exclude entirely the effects of sales tax changes.

INDEX NUMBERS

**12** Index numbers for financial years are simple averages of monthly index numbers.

**Selected Materials**

**13** Table 5 contains index numbers for selected materials used in constructing buildings other than houses for the weighted average of the six State capital cities. In general these indexes relate to either single items or combinations of items as shown in the weighting pattern published in Table A1 of the Appendix to the October 1993 issue of this publication. Tables 6 to 9 contain index numbers for selected major materials for each State capital city and Canberra.

INDEX NUMBERS (continued)

**Special Combinations of Materials**

**14** Tables 10 to 14 contain index numbers for the following special combinations of materials, for the weighted average of the six State capital cities, each State capital city and Canberra:

- All groups excluding electrical materials and mechanical services components
- Electrical materials
- Mechanical services components
- Plumbing materials

REVISIONS

**15** Index numbers for the current month and the previous three months are preliminary and subject to revision. From time to time index numbers for earlier months may also be revised. This will occur whenever the ABS obtains more complete information or discovers that incorrect prices have been used.

ANALYSIS OF INDEX CHANGES

**16** Care should be exercised when interpreting month-to-month movements in the indexes as short-term movements do not necessarily indicate changes in trend.

**17** The separate city indexes measure price movements over time in each capital city individually. They do not measure differences in price levels between cities.

**18** Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

Weighted average of six State capital cities index numbers —

July 1994	109.1	(see Table 1)
less July 1993	106.9	(see Table 1)
Change in index points	2.2	
Percentage change	$\frac{2.2}{106.9} \times 100 = 2.1$	

**19** Table 3 provides an analysis of the contribution which selected major building materials make to the All groups index for the weighted average of the six State capital cities. For example, Ready mixed concrete contributed 10.61 index points to the All groups index number of 109.1 for July 1994 and 0.07 index points to the net change of 0.5 index points.

FURTHER INFORMATION

**20** Further information on the index is presented in the publication *Producer and Foreign Trade Price Indexes: Concepts, Sources and Methods* (6419.0).

**22** Users may also wish to refer to the following price index publications which are available from ABS Bookshops:

- *Price Index of Materials Used in House Building, Six State Capital Cities and Canberra* (6408.0)
- *Price Indexes of Materials Used in Manufacturing Industries, Australia* (6411.0)
- *Price Indexes of Articles Produced by Manufacturing Industry, Australia* (6412.0)
- *Price Indexes of Copper Materials, Australia* (6410.0)

**23** Other ABS publications that may be of interest include:

- *Award Rates of Pay Indexes, Australia* (6312.0)
- *Average Weekly Earnings, States and Australia* (6302.0)

RELATED PUBLICATIONS

**24** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

UNPUBLISHED STATISTICS

**25** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Robert Adams on 06 252 6198 or to any ABS office.

## FOR MORE INFORMATION

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

### INFORMATION CONSULTANCY SERVICES

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below).

### ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below).

### BOOKSHOP AND SUBSCRIPTIONS

There are over 500 titles available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
