IMPORT PRICE INDEX

AUSTRALIA

EMBARGOED UNTIL 11:30AM MON 17 JULY 1995

MAY KEY FIGURES

	% change Apr 95 to May 95	% change May 94 to May 95
All groups	1.8	6.0
Food and live animals	1.7	16.2
Beverages and tobacco	2.2	1.2
Crude materials	2.4	14.2
Mineral fuels, etc.	4.3	0.1
Animal and vegetable oils, etc.	3.6	36.0
Chemical products	2.7	19.8
Manufactured goods, by material	1.4	4.1
Machinery and transport equipment	1.4	4.3
Miscellaneous manufactured articles	1.0	1.4
Commodities and transactions n.e.s.	-0.3	0.6

MAY KEY POINTS

ALL GROUPS INDEX

 Despite a slight improvement in the value of the Australian dollar against most of the other trading currencies, the fall against the US dollar and previous falls against other currencies, were the main contributors to the general increase in the index in May.

MAJOR MOVEMENTS

- The cumulative effect of the dramatic appreciation of the Japanese Yen over recent months was the predominant cause of the price increases for road vehicles and parts during May.
- The continuing upward trend in world oil prices was reflected in the increases shown for petroleum and related products in May.
- Recent and continuing strong world demand and resultant supply shortages have pushed up prices for plastics and plastic resins. These increases are reflected in the movement shown for organic chemicals.

¹ Base of each index: 1989-90 = 100.0

INTRODUCTION

- **1** This publication presents index numbers measuring changes in the prices of imports of merchandise landed in Australia the Import Price Index. It is calculated on a reference base of 1989-90 = 100.0.
- **2** Index numbers for the current month and the previous month are preliminary and subject to revision.

SCOPE

- **3** The Import Price Index, either directly or indirectly, covers about ninety five percent of merchandise imported during 1988-89 and 1989-90.
- **4** The remaining imports are not represented because of the inherent difficulties in pricing the items to a constant quality. These unrepresented items include:
 - live animals (not for food)
 - jewellery and other articles of precious metal n.e.s.
- military equipment
- special transactions
- · commodities not classified according to kind
- works of art, collectors' pieces, antiques
- ships of various types.
- **5** The index numbers for each month relate to prices of those imports of merchandise that are physically landed in Australia during that month.

CLASSIFICATION

- **6** Index numbers for sections and selected divisions of the Standard International Trade Classification (SITC), Revision 3 are provided in Tables 3 and 4, while index numbers for selected sections of the Combined Australian Customs Tariff and Statistical Nomenclature (ATSN) are provided in Table 5.
- **7** Tables 6 and 7 contain index numbers for selected Divisions and Subdivisions, on an 'industry of origin' basis, of the Australian and New Zealand Standard Industrial Classification (ANZSIC). The 'industry of origin' is the industry in which the imported commodity would be classified as primarily produced had it been produced in Australia, determined in accordance with the classification rules of the ANZSIC.
- **8** Table 8 contains index numbers for categories of the United Nations' Classification by Broad Economic Categories (BEC). Table 9 contains index numbers for these categories rearranged to form the broader end use classes: Capital goods, Intermediate goods and Consumption goods. Each category has been allocated wholly to one of these classes except for:
- category 321, Motor spirit (which has been allocated in part to Intermediate goods and in part to Consumption goods)
- category 51, Passenger motor cars (which has been allocated in part to Capital goods and in part to consumption goods)

ITEMS AND WEIGHTS

9 The index is a fixed weights index. The commodities directly represented in the index (the index items), were selected on the basis of their import values during 1988–89 and 1989–90. They constituted approximately 95 per cent of the total value of imports of merchandise to Australia during these years. The selected items were allocated weights in accordance with the average value of imports for each item during 1988–89 and 1989–90. These weights were then revalued to reflect 1989–90 price levels. Many of the items carry not only their own weight but also the weight of unpriced commodities whose prices are considered to move in a similar manner. The weighting pattern of the Import Price Index, i.e. the percentage contributions for index items and groups, was shown in the September 1991 issue of this publication.

PRICE MEASUREMENT

- **10** Prices of individual shipments are obtained from importers of the selected items and relate to the month in which the goods arrive in Australia. Imports are priced on a 'free on board' (f.o.b.), country of origin basis. Preight and insurance charges involved in shipping goods from foreign to Australian ports are therefore excluded from the prices used in the index, as are Australian import duties.
- 11 As the prices used in the index are expressed in Australian currency, changes in the relative value of the Australian dollar and overseas currencies can have a direct impact on price movements for the many commodities that are bought in currencies other than Australian dollars. Prices reported in a foreign currency are converted to Australian dollars using the exchange rate prevailing at the time of departure from the foreign port. Where imports are purchased at prices expressed in terms of a foreign currency and forward exchange cover is used, the prices in the index *exclude* the forward exchange cover.
- 12 The price series used relate to specified standards, grades, types, etc. of each commodity. The aim is to incorporate in the index price changes for imports of representative goods of constant quality. Wherever possible, prices from predominant countries of origin are used for each of the specified goods priced in order to lessen the impact of price variations attributable solely to changes, over time, in the mix of countries of origin. In most cases prices are combined using fixed weights between markets. Weights between countries are reviewed from time to time and revised where necessary.

INDEX NUMBERS

13 Index numbers for financial years are simple averages of monthly index numbers.

REVISIONS

14 Index numbers for the current month and the previous month are preliminary and subject to revision. From time to time index numbers for earlier months may also be revised. This will occur whenever the ABS obtains more complete information or discovers that incorrect prices have been used.

ANALYSIS OF INDEX CHANGES

- **15** Care should be exercised when interpreting month-to-month movements in the indexes as short-term movements do not necessarily indicate changes in trend.
- **16** Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

All groups index numbers —

May 1995 120.1 (see Table 1)
less May 1994 113.3 (see Table 1)
Change in index points
$$6.8$$
Percentage change =
$$\frac{6.8}{113.3} \times 100 = 6.0$$

17 Table 2 provides an analysis of the contribution which selected categories of imports make to the All groups index. For example, Road vehicles contributed 17.12 index points to the All groups index number of 120.1 for May 1995 and 0.36 index points to the net change of 2.1 index points.

FURTHER INFORMATION

- **18** The September 1991 issue of this publication contains a more detailed description of the index. A detailed description of the previous Import Price Index is contained in the December Quarter 1982 issue of this publication.
- **19** Further information on the index is presented in the publication *Producer and Foreign Trade Price Indexes: Concepts, Sources and Methods* (6419.0).

RELATED PUBLICATIONS

- **20** Users may also wish to refer to the following publications which are available from ABS Bookshops:
- Export Price Index, Australia (6405.0)
- Price Indexes of Articles Produced by Manufacturing Industry, Australia (6412.0)
- Price Indexes of Materials Used in Manufacturing Industries, Australia (6411.0)
- **21** Other ABS publications that may be of interest include *Balance of Payments, Australia* (5302.0).
- **22** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

UNPUBLISHED STATISTICS

23 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Carole Duthie on 06–252–5348 or to any ABS office.

FOR MORE INFORMATION...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below).

ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below).

BOOKSHOP AND SUBSCRIPTIONS

There is a large number of ABS publications available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
