SECTION I. CENSUS TABLES

A. SUMMARY

Table

1.	Selected crops and pastures: Area, NSW, year ended 31 March 1991–1993	7
2.	Selected crops and pastures: Production, NSW, year ended 31 March 1991–1993	8
3.	Selected crops and pastures: Yield per hectare, NSW, year ended 31 March 1991–1993	8
4.	Number of establishments growing principal crops, NSW, year ended 31 March 1991–1993	9
5.	Area and land use, NSW, year ended 31 March 1991–1993	9
6.	Number of establishments, area and land use, by statistical division, NSW, year ended 31 March 1993	9

B. CEREALS

Table

7.	Principal cereals for grain: Area and production, by statistical division, NSW, year ended 31 March 1993	10
8.	Other selected cereals for grain: Area and production, by statistical division, NSW, year ended 31 March 1993	10
9.	Wheat for grain: Area and production, by statistical division, NSW, year ended 31 March 1991–1993	10
10.	Wheat for grain: Yield, by statistical division, NSW, year ended 31 March 1991–1993	11
11.	Cereals for grain: Number of establishments, area, production and yield, NSW, year ended 31 March 1991–1993	11
12.	Wheat, oats and barley: Area and intended sowings, NSW, year ended 31 March 1991–1994	12
13.	Stocks of wheat, oats and barley, NSW, at 31 March 1991–1993	12
14.	Wheat: Number of establishments classified by area of wheat sown for grain, year ended 31 March 1991–1993, and by statistical division, 1991, NSW	13

C. OILSEEDS

Table

15.	Oilseeds: Number of establishments, area, production and yield, NSW, year ended 31 March 1991–1993	14
16.	Linseed, rapeseed and safflower: Area and production, by statistical division, NSW, year ended 31 March 1993	14
17.	Soybeans, sunflower and total oilseeds: Area and production, by statistical division, NSW, year ended 31 March 1993	15

SUMMARY OF FINDINGS

Wheat

In the 1992–93 season the area sown to wheat for grain increased from 1.5 million hectares to 1.7 million hectares, a rise of 13 per cent. The number of establishments growing wheat grew from 8,019 in 1992 to 8,561 in 1993, a rise of 7 per cent. The increases in area sown and the number of establishments reporting wheat were due to rising confidence in international markets and the forecast for improved growing conditions. Production rose by 64 per cent over the 1991–92 season to 3.6 million tonnes due to increased plantings and improved seasonal growing conditions throughout most of NSW which also contributed to a 45 per cent increase in yield from 1.46 to 2.11 tonnes per hectare (see Table 11). Wheat for grain was sown in all statistical divisions, the major contributors in terms of production being Central West and Murrumbidgee which accounted for 46 per cent of the State's production (see Table 7).

WHEAT, NSW, YEAR ENDED 31 MARCH

Barley

The area sown to barley for grain increased by 8 per cent over the 1991–92 season to 560 thousand hectares. This increase in area can be attributed to growers catering for the increasing demand for barley by feedlots and cattle raising establishments. Production during the same period increased by 39 per cent to 1,044 thousand tonnes and the yield rose by 28 per cent to 1.86 tonnes per hectare (see Table 11). These increases were the result of favourable growing conditions throughout most of NSW. Barley was grown in all statistical divisions except Sydney, the major contributors being Murrumbidgee, Central West and Northern divisions which accounted for 73 per cent of the State's production (see Table 7).

BARLEY, NSW, YEAR ENDED 31 MARCH

Rice

NSW accounted for 99 per cent of the total Australian rice crop in the 1992–93 season. The number of establishments growing rice decreased by 5 per cent to 1,229 and the area planted to 105 thousand hectares, a decrease of 4 per cent from the 1991–92 season. The 1992–93 season produced a crop of 846 thousand tonnes, a decrease of 9 per cent from the 1991–92 season, with a slight decrease in yield to 8.1 tonnes per hectare. This decrease in area planted was in response to an over supply on the international market, while the decrease in production and yield can be attributed to shortages in water for irrigation and poor growing conditions for part of the season. (see Table 11). Rice production in NSW is confined to Murray and Murrumbidgee Statistical Divisions which accounted for 55 per cent and 45 per cent of total rice production respectively.

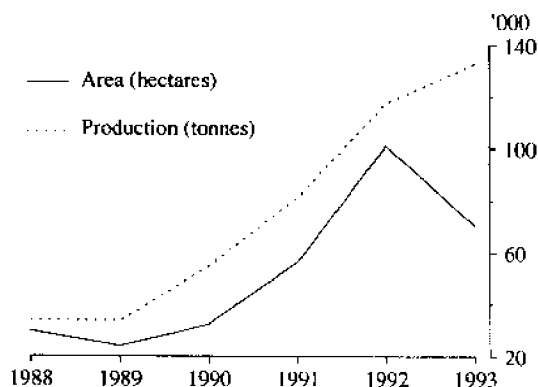

RICE PRODUCTION, NSW, YEAR ENDED 31 MARCH

Oilseeds

There was an decrease of 23 per cent in the area planted to oilseeds in the 1992-93 season, down from 155 thousand hectares in 1991-92 to 119 thousand hectares. Production increased by 4 per cent to 198 thousand tonnes. This decrease in area can be attributed to growers moving back in wheat and other agricultural activities. The area planted to rapeseed decreased by 30 per cent to 70 thousand hectares and the number of establishments growing rapeseed decreased by 15 per cent to 873. The production of rapeseed increased to 133 thousand tonnes, a rise of 13 per cent. The area planted to safflower fell by 6 per cent per cent to 9.1 thousand hectares. Safflower production fell by 6 per cent to 5.6 thousand tonnes. The area planted to linseed decreased by 49 per cent on 1991-92 to 1.4 thousand hectares, while production increased 13 per cent to 2 thousand tonnes and yield rose by 225 per cent to 1.44 tonnes per hectare. The area planted to sunflower fell by 13 per cent to 25 thousand hectares while production fell by 21 per cent to 30 thousand tonnes and yield fell 9 per cent to 1.18 tonnes per hectare. The area planted to soybeans increased by 2 per cent to 12.7 thousand hectares, while production fell marginally to 28 thousand tonnes. Murrumbidgee Statistical Division accounted for 38 per cent of total oilseed production in NSW and 50 per cent of rapeseed production (see Tables 15,16, and 17).

RAPESEED, NSW, YEAR ENDED 31 MARCH

SAFFLOWER, NSW, YEAR ENDED 31 MARCH

SUNFLOWER, NSW, YEAR ENDED 31 MARCH

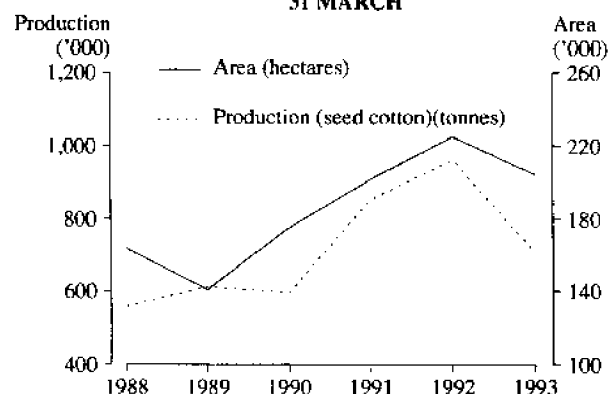

SOYBEANS, NSW, YEAR ENDED 31 MARCH

Cotton

The area planted to cotton decreased to 204 thousand hectares, a fall of 9 per cent over 1991-92. This decrease was mainly a result of a contraction in the supply of water available for irrigation in the major growing areas along the Namoi, Macintyre, Barwon and Darling rivers. For the 1992-93 season, production of raw cotton fell by 27 per cent to 707 tonnes over the 1991-92 season and yields falling 19 per cent to 3.5 tonnes per hectare. These decreases were due the shortfall in the supply of water for irrigation and poor growing conditions compared to the previous seasons. (see Table 19).

COTTON, NSW, YEAR ENDED 31 MARCH

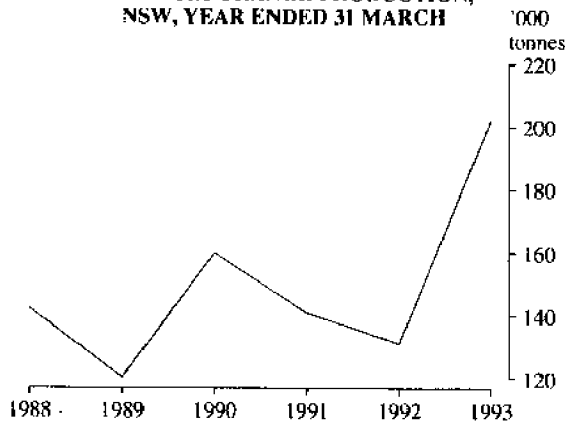

Oranges

Oranges continue to be the dominant citrus fruit grown in NSW, accounting for 84 per cent of the total number of citrus fruit trees and 93 per cent of total citrus fruit production. Due to favourable growing conditions during the 1992-93 season total production rose to 275 thousand tonnes, an increase of 47 per cent over 1991-92 while tree numbers remained relatively unchanged at 3.7 million. Valencia orange trees accounted for 74 per cent of total orange production in NSW. The major statistical divisions in terms of tree numbers and production were Murrumbidgee and Murray, with Murrumbidgee accounting for 64 per cent of the State's production (see Tables 24, 25, 26, and 27).

ORANGE PRODUCTION, NSW, YEAR ENDED 31 MARCH

VALENCIA ORANGE PRODUCTION, NSW, YEAR ENDED 31 MARCH

Apples

The number of apple trees at 31 March 1993 stood at 1.66 million, a decrease of 2 per cent from March 1992. Production decreased by 7 per cent to 70 thousand tonnes as a result of growers replacing the older trees of the more traditional varieties with varieties that are more suited to the Japanese and North American markets. The major apple growing areas in NSW were Central West and Murrumbidgee Statistical Divisions which together accounted for 87 per cent of the State's trees and 87 per cent of the State's production (see Tables 24, 25, 26 and 27). The most popular varieties of apples in terms of production continue to be red delicious and granny smith, which accounted for 44 per cent and 24 per cent of total apple production respectively (see Table 31).

APPLE PRODUCTION, NSW, YEAR ENDED 31 MARCH

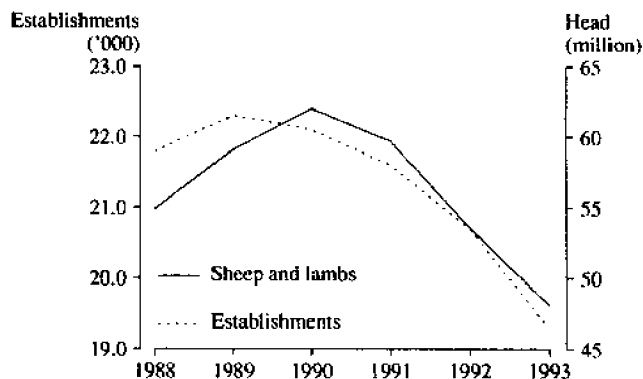

Grapes

The total area under vines in 1992-93 increased by 4 per cent over the previous year to 12.7 thousand hectares. Production of wine grapes increased 16 per cent to 139 thousand tonnes while grape production for drying decreased by 48 per cent to 28 thousand tonnes. The major wine grape growing area was Murrumbidgee Statistical Division with 63 per cent of the total NSW production followed by Murray and Hunter Statistical Divisions with 16 per cent and 15 per cent respectively (see Table 34).

Sheep

The number of establishments reporting sheep stood at 19,333, a decrease of 6.4 per cent from 1991-92. Sheep numbers at March 1993 were 48.1 million, a decrease of 10.3 per cent from 1991-92 (see Table 41). The number of lambs marked decreased by 2.5 per cent to 14.9 million (see Table 48). The decrease in sheep numbers as well as establishments reporting sheep can be attributed to the depressed economic climate for wool, the full impact of the Flock Reduction Scheme and continued drought conditions. The major statistical divisions in terms of sheep numbers are North Western and Central West which together accounted for 38 per cent of the State's flock.

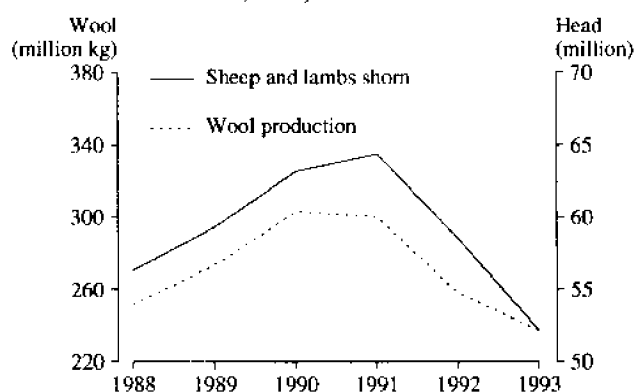

SHEEP AND LAMBS, NSW, AT 31 MARCH

Wool Production

The 1992-93 season saw the number of sheep and lambs shorn decrease by 11 per cent to 52.1 million, while the production of greasy wool decreased by 8 per cent to 236.8 million kilograms (see Table 47). The average clip for NSW rose slightly to 4.55 kilograms compared to 4.42 kilograms for the 1991-92 season. The decline in sheep and lambs shorn and greasy wool production reflects fluctuations on the domestic and international markets and continued drought conditions. The highest average clip occurred in Far West Statistical Division at 5.04 kilograms (see Table 47). The major statistical divisions for wool production were North Western and Central West which together account for 38 per cent of the State's production (see Table 47).

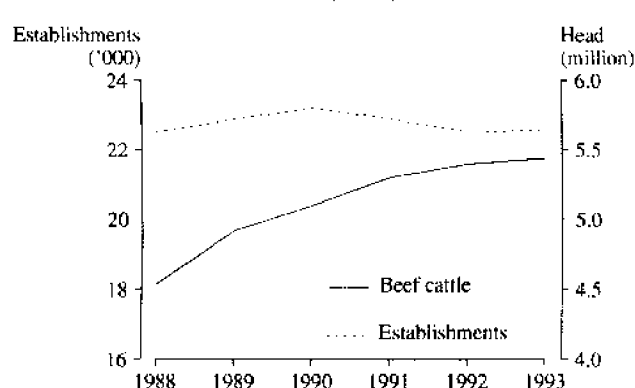

SHEARING, NSW, YEAR ENDED 31 MARCH

Beef Cattle

The beef cattle herd was 5.4 million at 31 March 1993, a similar size to the previous year. The major statistical divisions in terms of herd size are still Northern and North Western with 28 per cent and 14 per cent respectively of the State's beef cattle (see Table 54).

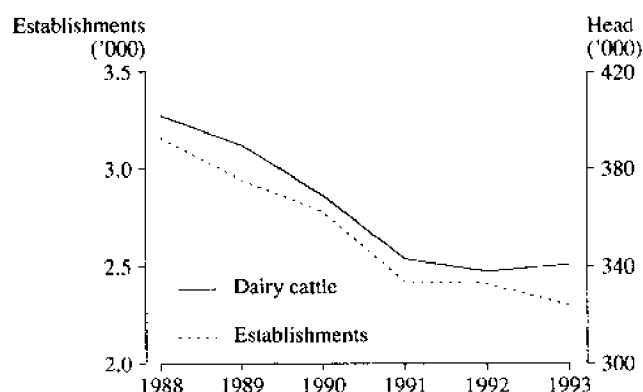

BEEF CATTLE, NSW, AT 31 MARCH

Dairy Cattle

The State's herd increased to 341 thousand, a rise of 1 per cent from 1991-92. The number of establishments with dairy cattle fell by 4 per cent to 2,304 reflecting the continued rationalisation within the industry in NSW. The major dairy regions in terms of size of herd are Hunter and Mid-North Coast Statistical Divisions, which together accounted for 37 per cent of the State's commercial dairy cattle (see Table 56).

DAIRY CATTLE, NSW, AT 31 MARCH

Pigs

There were 818 thousand pigs in NSW at 31 March 1993, an increase of 2 per cent from March 1992, while the number of establishments reporting pigs for 1992-93 stood at 1,557, a decrease of 5.5 per cent from 1991-92. Following the 11 per cent rise in the number of breeding sows for the 1991-92 season, numbers decreased by 11 per cent in the 1992-93 season to 98 thousand. The decrease in establishments reporting pigs is due to the continuing rationalisation within the industry which is resulting in a number of smaller establishments moving to other agricultural activities and the continuing trend is toward fewer pig establishments carrying larger herds. The major statistical division in terms of pig numbers is Murray which accounted for 36 per cent of the State's herd (see Tables 58, 59, 60, and 61).

PIGS, NSW, AT 31 MARCH

Irrigation

A total of 930 thousand hectares were irrigated during the 1992-93 season which was a decrease of 6 per cent over the previous season. The main purpose was for native or sown pastures which accounted for 517 thousand hectares or 61 per cent as against 48 per cent in the previous season. The major statistical divisions in terms of area irrigated were Murray, Murrumbidgee and Northern which together accounted for 76 per cent of the State's irrigated land (see table 39).

Use of artificial fertilisers

In the 1991-92 season, 537 thousand tonnes of artificial fertiliser was applied to 3.8 million hectares on 18.3 thousand establishments. This represents a decrease of 3 per cent in the number of establishments and area fertilised but an increase of 3 per cent in the quantity used over the previous season. The major statistical divisions in terms of

area fertilised were Northern and Murrumbidgee which together accounted for 40 per cent of the area fertilised and 41 per cent for the quantity of artificial fertiliser used. There was a 60 per cent increase in the number of establishments that used soil conditioners to treat 259 thousand hectares, an increase of 112 per cent over the previous season (see Table 40).

INTRODUCTION

This publication contains statistics on agricultural commodities for the year ended 31 March 1993, together with comparative information for earlier years. The prime source of these statistics is the census of agricultural establishments conducted throughout Australia at 31 March each year.

Explanatory notes are published at the back of this publication.

Total area used for crops and pastures	4,361,301	4,148,383	4,194,611

(a) Areas of land used for sowing more than one crop in a season have been counted for each crop. (b) Excludes lupins for pasture seed. (c) Bearing and not yet bearing. (d) Includes olives and edible nuts. (e) Excludes all areas of pastures, grasses and lucerne.

TABLE 2. SELECTED CROPS AND PASTURES: PRODUCTION, NSW, YEAR ENDED 31 MARCH
(tonnes)

Crop	1991	1992	1993
Cereals for grain—			
Barley	822,453	748,749	1,043,772
Grain sorghum	186,791	398,045	229,147
Maize	90,642	119,093	107,873
Oats	538,350	578,830	761,376
Rice	718,723	928,532	845,854
Triticale	86,957	97,008	146,103
Wheat	4,127,568	2,182,990	3,582,628
Cereals for hay—			
Oats	143,751	251,964	225,010
Wheat	51,513	63,918	59,566
Oilseeds—			
Linseed	1,101	1,749	1,980
Rapeseed	81,456	117,654	133,024
Safflower	2,125	6,003	5,631
Soybean	26,173	28,535	28,098
Sunflower	59,057	37,544	29,668
Other crops—			
Sugarcane (cut for crushing)	1,137,445	1,415,726	1,666,572
Cotton (seed cotton)	854,930	962,532	707,237
Peanuts	750	570	1,200
Tobacco	317	283	400
Lucerne—			
Cut for hay	340,116	385,030	446,765

TABLE 3. SELECTED CROPS AND PASTURES: YIELD (a), NSW, YEAR ENDED 31 MARCH
(tonnes per hectare)

Crop	1991	1992	1993
Cereals for grain—			
Barley	1.78	1.45	1.86
Grain sorghum	2.23	2.71	1.95
Maize	5.11	7.09	6.94
Oats	1.44	1.27	1.70
Rice	8.45	8.50	8.09
Triticale	2.08	2.23	3.01
Wheat	1.91	1.46	2.11
Cereals for hay—			
Oats	2.77	2.76	3.48
Wheat	2.67	2.14	2.79
Oilseeds—			
Linseed	0.98	0.64	1.44
Rapeseed	1.44	1.16	1.89
Safflower	0.43	0.62	0.62
Soybean	2.01	2.31	2.22
Sunflower	1.02	1.30	1.18
Other crops—			
Sugarcane (cut for crushing)	81.35	93.69	107.27
Cotton (seed cotton)	4.23	4.28	3.46
Peanuts	2.41	1.98	1.80
Tobacco	1.88	1.55	1.59
Lucerne—			
Cut for hay	4.37	4.61	5.10

(a) Land under crops which failed is included in the average.

TABLE 4. NUMBER OF ESTABLISHMENTS GROWING PRINCIPAL CROPS (a), NSW, YEAR ENDED 31 MARCH

<i>Crop</i>	<i>1991</i>	<i>1992</i>	<i>1993</i>
Cereals for grain—			
Barley	4,128	4,558	4,773
Grain sorghum	604	955	805
Maize	279	239	246
Oats	6,948	7,414	7,720
Rice	1,238	1,288	1,229
Triticale	768	790	876
Wheat	9,529	8,019	8,561
Oilseeds—			
Linseed	13	35	18
Rapeseed	680	1,029	873
Safflower	17	53	49
Soybean	264	264	282
Sunflower	340	182	169
Other crops—			
Sugarcane (cut for crushing)	420	489	480
Cotton (seed cotton)	404	491	493
Peanuts	2	3	9
Tobacco	18	21	23

(a) Establishments growing more than one of the crops shown in the table are counted for each crop.

TABLE 5. AREA AND LAND USE, NSW, YEAR ENDED 31 MARCH
(hectares)

<i>Season</i>	<i>Total area of establishments at 31 March</i>	<i>Area used for cropping (a)</i>	<i>Area under sown pasture at 31 March (b)</i>
1991	60,698,247	4,361,301	5,533,516
1992	60,366,633	4,148,383	6,034,345
1993	59,415,235	4,194,611	5,665,550

(a) Includes lucerne, pastures and grasses cut for hay, green feed or silage, and harvested for seed. (b) Excludes pure lucerne, native grasses and naturalised paspalum. Includes sown grasses and clovers oversown with crops during the year.

TABLE 6. NUMBER OF ESTABLISHMENTS, AREA AND LAND USE, YEAR ENDED 31 MARCH 1993

<i>Statistical division</i>	<i>Number</i>	<i>Establishments with agricultural activity at 31 March</i>		<i>Land use on establishments with agricultural activity</i>	
		<i>Total area of establishments (hectares)</i>	<i>Area used for cropping (a) year ended 31 March (hectares)</i>	<i>Area under sown pasture (b) at 31 March (hectares)</i>	
Sydney	1,474	80,373	8,409	10,598	
Hunter	2,106	1,355,255	64,277	175,379	
Illawarra	617	106,898	8,771	44,395	
Richmond-Tweed	2,255	412,082	34,947	47,867	
Mid-North Coast	2,270	860,688	21,836	96,934

(a) The total value of crops produced includes the value of grasses and clovers harvested for seed and of grass and pasture cut for hay. (b) Not collected.

TABLE 72. LIVESTOCK SLAUGHTERINGS AND OTHER DISPOSALS (a), NSW: GROSS AND LOCAL VALUES, YEAR ENDED 31 MARCH (\$'000)

<i>Livestock</i>	<i>1988</i>	<i>1989</i>	<i>1990</i>	<i>1991</i>	<i>1992</i>	<i>1993</i>
GROSS VALUE						
Cattle and calves	819,823	852,828	1,148,660	1,068,156	946,502	965,387
Sheep and lambs (b)	194,757	182,793	160,274	77,861	87,562	159,642
Pigs	183,624	202,780	205,739	222,245	196,669	189,979
Poultry (c)	291,793	322,737	369,778	368,815	352,089	377,592
Total, livestock slaughterings and other disposals	(d)1,492,408	(d)1,564,084	(d)1,886,745	(d)1,739,731	(d)1,588,169	(d)1,696,803
LOCAL VALUE						
Cattle and calves	765,521	800,026	1,080,509	986,806	857,729	879,852
Sheep and lambs (b)	168,933	163,862	139,939	57,679	56,558	129,369
Pigs	168,604	187,848	190,593	205,177	180,064	175,528
Poultry (c)	291,741	322,671	369,659	368,743	352,043	377,533
Total, livestock slaughterings and other disposals	(d)1,396,689	(d)1,476,949	(d)1,782,367	(d)1,620,212	(d)1,450,572	(d)1,565,413

(a) Includes adjustment for net exports overseas of live animals. Prior to 1987-88, excludes interstate movements of livestock between New South Wales and Victoria. From 1987-88, includes only interstate movements of livestock between New South Wales and the Australian Capital Territory. (b) Excludes value of wool on skins. (c) Includes poultry produced in the Australian Capital Territory but slaughtered in New South Wales. (d) Includes the value of goat slaughterings.

TABLE 73. LIVESTOCK SLAUGHTERINGS, NSW: AVERAGE UNIT GROSS VALUE (a), YEAR ENDED 31 MARCH (\$)

<i>Livestock</i>	<i>Unit</i>	<i>1991</i>	<i>1992</i>	<i>1993</i>
Cattle and calves	animal	437.44	403.03	410.37
Sheep and lambs	animal	6.30	7.41	15.47
Pigs	animal	127.74	119.83	119.78
Poultry	bird	3.05	3.16	3.07

(a) Obtained by dividing the total gross value of slaughterings by the total number of animals slaughtered.

GROSS VALUE OF LIVESTOCK SLAUGHTERINGS AND OTHER DISPOSALS, NSW, YEAR ENDED 31 MARCH 1993

(a) Includes Nursery products and cut flowers. (b) See Explanatory Note 13. (c) Includes goats.

EXPLANATORY NOTES

Sources and coverage

These statistics have been derived from the results of the Agricultural Census conducted at 31 March each year from occupiers of establishments with agricultural activity.

2. An establishment with agricultural activity is a single physical location which is used for the production of crops (including fruit and vegetables and/or for the raising of livestock and the production of livestock products.

3. Establishments which make only a small contribution to overall agricultural production are excluded from the scope of the census. Since the 1991-92 Agricultural Census, establishments with an estimated value of agricultural operations (EVAO) less than \$22,500 were excluded. In the period 1986-87 to 1990-91, establishments with an EVAO less than \$20,000 were excluded (previously those establishments with an EVAO less than \$2,500 were excluded). Data in this publication for the years prior to 1991-92 have not been recompiled.

4. Information covering such commodities as livestock slaughterings, dairy produce and beekeeping is obtained from separate ABS collections and from organisations such as the NSW Dairy Corporation.

5. The method of collection of relevant prices for, and the costs of marketing of, agricultural commodities varies considerably between commodities. Where a statutory authority handles marketing of the whole or portion of a product (e.g. NSW Dairy Corporation, Australian Wheat Board) data are usually obtained from this source. Information is also obtained from marketing reports, wholesalers, brokers and auctioneers.

6. For all commodities, values are in respect of production during the year (or season) irrespective of whether or when payments are made. For that portion of production not marketed (e.g. hay grown on farm for own use, milk used in farm household, etc.) estimates are made from the best available information and, in general, are valued on a local value basis.

Reference period

7. Crops and pastures statistics for New South Wales relate, in general, to the season ended 31 March. Where harvesting was not completed by 31 March 1993 (for example, maize, sorghum, rice and late planted potatoes), the production statistics relate to the completed harvest.

8. Fruit statistics for New South Wales relate, in general, to the season ended 31 March. For apples, pears and grapes, where harvesting was not completed by 31 March 1993, the production statistics relate to the completed harvest. Statistics on numbers of trees and area are at 31 March.

9. Details of the usual month of planting and harvesting of principal crops (including fruit) in New South Wales are included in Appendix A.

Statistical Areas of NSW

10. This bulletin contains data presented at the State and Statistical Division level in accordance with the Australian Standard Geographical Classification (ASGC). New South Wales comprises 12 Statistical Divisions which are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.

11. A reference map is provided at the end of the bulletin showing Statistical Division boundaries. Further information concerning statistical areas is contained in the publication *Regional Statistics, New South Wales*, 1991 issue (1304.1) and in the publication *Australian Standard Geographical Classification* (1216.0).

12. Due to frequent changes to Local Government Area boundaries, care should be taken if comparing statistics for these areas over time.

Definitions of terms used

13. The following are brief definitions of the terms used:

- (a) *Gross value of commodities produced* is the value placed on recorded production at the wholesale price(s) realised in the market place. In general, the market place is the metropolitan market. In cases where the commodities are consumed locally, or where they become raw materials for a secondary industry, these points are presumed to be the market place.
- (b) *Marketing costs* include freight, cost of containers, commission, insurance, storage, handling and other charges necessarily incurred by the producer in moving the agricultural product from the place of production to the market place.
- (c) *Local value of commodities produced* is the value placed on recorded production at the place of production and is determined by deducting marketing costs from the gross value of commodities produced.

14. Gross and local values of agricultural commodities produced involve some duplication, as they include certain agricultural commodities which are consumed as raw materials to produce other agricultural commodities (e.g. hay consumed by livestock).

- (a) Values include any relevant subsidy and bounty payments based on production.
- (b) Livestock slaughterings and other disposals. Values for livestock slaughterings and other disposals are published as one figure but include two distinct components:
 - (i) Value of livestock slaughtered, and

- (ii) Value of net exports, i.e. the total value of livestock intended for slaughter in adjacent State(s) and livestock exported overseas whether for slaughter or breeding, minus the value of imports of livestock.

15. Data on value of livestock slaughterings are available on request.

16. *The value of agricultural commodities produced in statistical areas of the State* is calculated by using selected agricultural census items in conjunction with the gross value of agricultural commodities produced to derive unit values for a range of commodities. These derived unit values are applied to the regional agricultural census commodity item totals for the area to form the area values shown in Table 76. Where production is not obtained directly from the Agricultural Census, selected Agricultural Census items having a direct link with the production of the particular commodity are used. Except for certain crops grown in irrigation areas (grapes), this method of estimation does not take account of differences in unit prices between areas. Beekeeping activities are included, but the values are apportioned to a particular statistical local area (and hence a statistical area) purely on the basis of the postal address of the operator; other agricultural

activities may be undervalued because some specialist activities are not identified in the Agricultural Census (e.g. studs). For these reasons, the area values should be treated as providing only *an indication rather than a precise measure* of the value of commodities produced by region.

Symbols and other usages

F	total failure of crop
n.p.	not available for publication but included in totals where applicable, unless otherwise indicated
n.y.a.	not yet available
r	figure or series revised since previous issue
SD	Statistical Division
..	not applicable
—	nil or rounded to zero (including null cells)

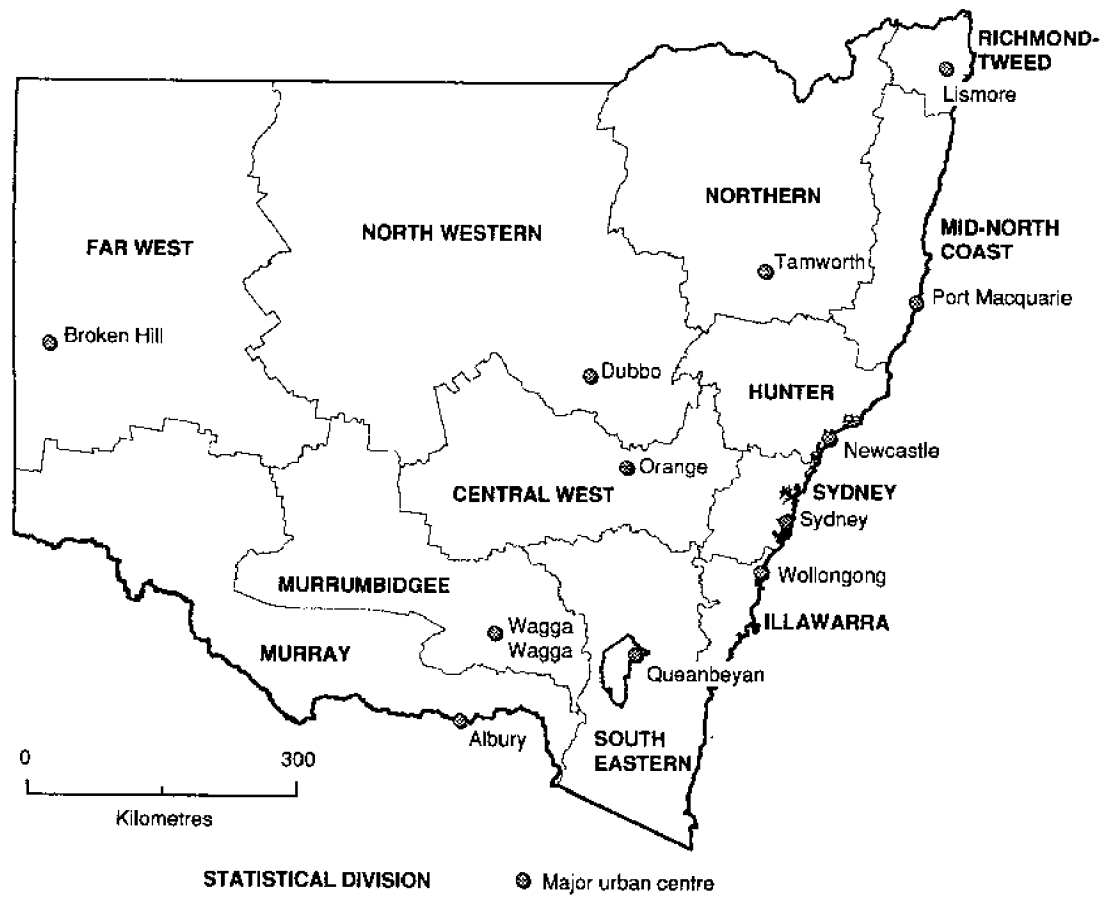

17. Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Published percentage changes are calculated prior to rounding of figures and, therefore, some discrepancies may exist between percentages that could be calculated from the rounded figures.

APPENDIX

USUAL MONTHS OF PLANTING AND HARVESTING OF CROPS (INCLUDING FRUIT)

Crop	Most usual months of—	
	Planting	Harvesting

Late	November	February–August
Sugarcane	September	July–December
Tobacco	September–December	January–April

STATISTICAL DIVISIONS OF NEW SOUTH WALES

Other ABS Data on Agricultural Activity

Agricultural Census data not included in ABS publications are also available—

AGSTATS

- Contains data for each commodity collected in the census
- Provides data down to Statistical Local Area level
- Available on microfiche, magnetic tape, floppy disc and CD-ROM
- Available for each year separately from 1976–77 to 1992–93 (except CD-ROM)
- Data available on CD-ROM for seasons 1985–86 to 1989–90
- CD-ROM package includes SUPERMAP software which can produce colour maps showing distribution of particular commodities

For more information about AGSTATS contact Graham Oxford on (02) 268 4165

Unpublished Data

The ABS can also make available information which is not published. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms—

- Photocopy
- Computer printout
- Clerically extracted tabulation

Generally a charge is made for providing unpublished information and can vary depending on the complexity of the data.

For further details please telephone Graham Oxford on (02) 268 4165

Other ABS publications on agricultural activity

The ABS publishes one other bulletin of detailed NSW data compiled from the 1992-93 Agricultural Census—

Agriculture, New South Wales, 1992-93

Cat. no. 7113.1 (\$47.00)

- Number, area and land use of establishments with agricultural activity
- Area and production of major crops, vegetables, pastures and plantation, berry and vine fruit
- Stocks of major grains and hay
- Number of trees and production of major orchard fruit
- Area and type of crops and pastures artificially fertilised and quantity of fertiliser used
- Number of cattle, sheep, pigs, poultry, goats, horses, lambing and mating intentions, wool production, honey and beeswax production
- Gross and local values of production of crops, livestock slaughterings and livestock products
- Average gross values of livestock slaughterings and livestock products
- Regional gross values of agricultural commodities
- Selected historical data

The ABS also publishes bulletins concerning the agricultural sector compiled from other sources—

Agricultural Industries, Financial Statistics, Australia, 1992-93

Cat. no. 7507.0 (\$27.50)

- Estimates of turnover, expenditure, cash operating surplus, capital expenditure and indebtedness of agricultural enterprises in each State (classified by industry (ASIC) for Australia)
- Value of selected assets and net worth of agricultural enterprises are also classified by industry

Agricultural Industries, Financial Statistics, Australia, Preliminary, 1992-93

Cat. no. 7506.0 (\$15.50)

- Estimates of the financial performance of enterprises engaged in agricultural activities

Livestock Products Australia

Cat. no. 7215.0 (\$8.00)

- Published monthly
- Livestock: cattle, sheep, pigs and poultry
- Data: numbers slaughtered, meat production, stocks and exports, milk intake and sales, wool receivals
- Historical data

You can order these publications from the ABS Bookshop on (02) 268 4620.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

This number gives you 24 hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see Information Inquiries below for contact details).

Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
