## EXPLANATORY NOTES

\*\*\*\*\*

- Introduction 1. This publication contains 1992-93 details of selected crop, fruit and livestock data.
- Scope and coverage 2. The ABS excludes from the Census those establishments which make only a small contribution to overall agricultural production. From 1991-92 the scope of the Census is establishments undertaking agricultural activity having an Estimated Value of Agricultural Operations (EVAO) of \$22,500 or more. The scope of previous Censuses (from 1986-87) was establishments undertaking agricultural activity having an EVAO of \$20,000 or more.
3. The change in scope means that the current census results are not directly comparable with Census results prior to 1992.
- Definitions 4. An *establishment* covers all operations carried out at a single physical location.
5. Establishments within the agricultural sector have been classified in accordance with the methodology used in the 1983 edition of *the Australian Standard Industrial Classification (ASIC)*, continuing the practice commenced with the 1978-79 issue of this publication.
6. The ASIC and ANZSIC Group and Class codes of agricultural units are determined annually by valuing physical crop and livestock activity undertaken by each unit (as reported in the Agricultural Census), assessing that unit's *PREDOMINANT ACTIVITY* according to the derived estimated value and then attributing the unit to the ASIC and ANZSIC Group and Class appropriate to that activity. The aggregation of derived values for all crop and livestock activity for each unit is termed the ESTIMATED VALUE OF AGRICULTURAL OPERATIONS (EVAO). It should be clearly noted that EVAO is applicable only for industry coding and size valuation purposes. It is NOT an indicator of receipts obtained by units nor of the value of agricultural commodities produced by these units.
- Related publications 7. Refer to the back cover for other agricultural publications produced by the ABS Victoria. Users may also wish to refer to the following ABS publication which is available on request:
- Agricultural Industries, Financial Statistics, Australia (7507.0)* (annual)
8. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia (1101.0)*, which is available from any ABS office.
- AgStats 9. *AgStats* contains data for all commodities and areas within Australia, at the statistical local area level of aggregation and is available on magnetic tape, microfiche and computer disk. Details are contained in *AgStats, Australia (revised edition) (7107.0)* available free on request.
10. *AgStats* are available by statistical local area of aggregation in Victoria on microfiche from 1976-77 onwards and computer disk from 1982-83 to 1991-92 inclusive.

Unpublished agricultural statistics

11. In some cases the ABS can also provide additional information which is unpublished such as at the parish and statistical local area level of aggregation. In general a charge is made for this service.

Symbol

- nil or rounded to zero

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
