(a) Exports are compiled on the basis of goods shipped in any calendar month rather than the documentation of goods shipped in that or earlier months. (b) Fresh, chilled or frozen, excluding offal and small quantities of buffalo meat. (c) State of origin. (d) Factors can be applied to 'bone-out' figures to derive 'bone-in' carcass weight. The factor for beef and veal is 1.5 and that for mutton and lamb, 2.0.

EXPLANATORY NOTES

The statistics on slaughterings and meat production for Queensland (Tables 1 to 3) are based on a monthly collection from abattoirs and an annual collection from slaughterhouses. Final figures for slaughterhouses for 1993–94 are included in this publication. From July 1992, an estimate of livestock slaughtered on farms is no longer included. Numbers and weights from July 1992 have been revised accordingly. This change in scope means that figures from July 1992 are not directly comparable to figures prior to July 1992. Figures refer only to livestock slaughtered and passed for human consumption and do not include animals condemned or killed for boiling down.

2. The foreign trade statistics (Tables 4 and 5) have been compiled from information in export entries submitted by exporters or their agents to the Australian Customs Service as required by the Customs Act. Figures have been classified on a State of origin basis and show the export of meat produced in Queensland.
