

CATALOGUE NO. 7215.0
EMBARGOED UNTIL 11.30 A.M. 6 SEPTEMBER 1995

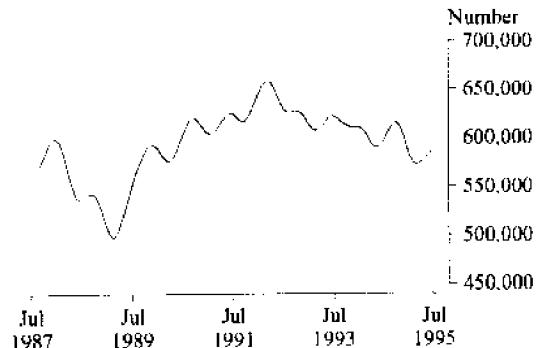

LIVESTOCK PRODUCTS, AUSTRALIA JULY 1995

MAIN FEATURES

Livestock Slaughterings

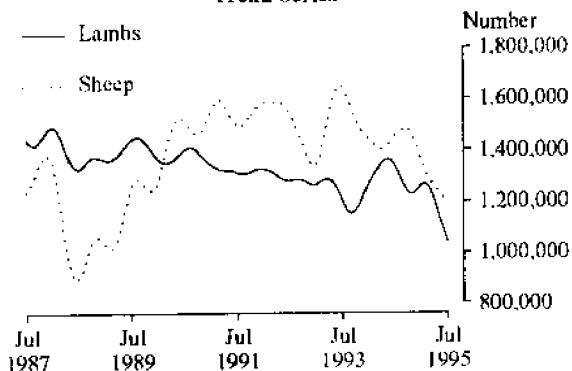

The trend estimate for cattle slaughterings rose 1.2 per cent in July 1995, and since the last trough in March 1995 has risen 3.0 per cent. The trend estimate for calves rose 1.1 per cent in July. The trend estimate is 3.5 per cent above the last trough which occurred in March but it is still 7.7 per cent below the previous peak of September 1994.

**CATTLE SLAUGHTERINGS,
AUSTRALIA
Trend Series**

Sheep slaughterings have fallen 19.2 per cent since the last peak in September 1994 but the rate of decline weakened in July, falling 1.2 per cent compared with June. The decline in the trend estimate of lamb slaughterings also weakened in July 1995 with a fall of 4.7 per cent compared with June. The trend estimate is now 18.1 per cent below the last peak which occurred in February 1995.

**SHEEP AND LAMB SLAUGHTERINGS,
AUSTRALIA
Trend Series**

The trend estimate for pig slaughterings fell 0.4 per cent in July. The estimate is 4.0 per cent below the last peak which occurred in November 1994.

Red Meat

The trend estimate for red meat rose marginally in July 1995. However, it is still 6.9 per cent below the previous peak which occurred in October 1994. The trend estimate for beef rose 0.9 per cent in July 1995 and since March 1995 it has risen 1.6 per cent. The trend estimate for mutton fell 0.7 per cent in July, and has fallen 21.0 per cent since the last peak in August 1994. The decline in the trend estimate for lamb weakened in July 1995 with a fall of 3.9 per cent. It is now 14.4 per cent below the estimate for February 1995. The trend estimate for pigmeat fell marginally in July 1995 after peaking in June although it is 1.8 per cent above the January 1995 trough.

Chicken Meat

The trend estimate for chicken meat production rose marginally in July 1995, following a fall of 0.9 per cent in the previous month.

Whole Milk Intake

The trend estimate for whole milk intake rose 1.7 per cent in June 1995. Since the last trough in February 1995 it has risen 5.0 per cent.

Wool Receivals by Brokers and Dealers

The trend estimate for wool receivals by brokers and dealers fell 2.5 per cent in July. This estimate is 10.0 per cent below the February 1995 peak.

Live Exports

The number of live sheep exported fell 38.6 per cent to 229,300 in June 1995. The unit value (\$38.08) rose 1.7 per cent but the gross value (\$8.7 million) fell 37.6 per cent. The number exported during 1994-95 rose 2.4 per cent on 1993-94.

Live cattle exports in June 1995 rose 13.9 per cent to 47,400, and the gross value rose 15.0 per cent to \$27.0 million compared with May 1995. The unit value (\$570.00) rose 1.1 per cent. Live cattle exports have grown significantly during 1994-95 with the number exported 64.4 per cent higher than in the previous year.

INQUIRIES

- for further information about statistics in this publication and the availability of related unpublished statistics — contact Joanne Gibbons on Canberra (06) 252 5226 or any ABS State office.
- for information about other ABS statistics and services please contact Information Services on (06) 252 6627, 252 6007 or any ABS State Office.

(a) Red meat is shown in carcass weight and excludes offal. (b) Trend estimates for the most recent months are subject to revision when data for subsequent months become available. (c) Buffalo meat produced in the Northern Territory is included in Australian totals.

**RELIABILITY OF JULY TREND ESTIMATES
FOR PRODUCTION OF RED MEAT**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of July.

The table below shows, for red meat production for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 3% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 3% on the July figure.

The percentage change of 3% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 3.32%.

(a) Excludes offal. (b) Factors can be applied to beef, veal, mutton and lamb bone-out figures to derive bone-in carcass weight which, when added to bone-in figures, shows total exports in carcass weight. The factor for beef and veal is 1.5 and for mutton and lamb is 2.0 (Source: Australian Meat and Livestock Corporation). (c) Includes buffalo meat. (d) Cured carcass weight of smoked or cooked bacon and ham. Includes stated net weight of packs of canned bacon and ham. (e) Canned weight. Excludes canned bacon and ham.

(a) Chicken meat is shown in dressed weight of whole birds, pieces and giblets. (b) Excludes Tasmania, the Northern Territory and the Australian Capital Territory.

(c) Trend estimates for the most recent months are subject to revision when data for subsequent months become available.

Note: Some slaughtering and meat production statistics for 'Ducks and Drakes' and 'Other Fowls and Turkeys' are available by contacting the ABS on Canberra 252 5317 or by writing to PO Box 10, Belconnen ACT 2616 (Attention: Agriculture Section).

**RELIABILITY OF JULY TREND ESTIMATES
FOR CHICKEN MEAT PRODUCTION**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of August.

The table below shows, for chicken meat production for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 4% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 4% on the July figure.

The percentage change of 4% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 4.03%.

(a) Includes white, flavoured, high and low fat milk, uht milk.

**RELIABILITY OF JUNE TREND ESTIMATES
FOR WHOLE MILK INTAKE BY FACTORIES**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of July.

The table below shows, for whole milk intake by factories for the six months ended June:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for July of 2% on the June figure;
- trend estimates assuming a decrease in seasonally adjusted data for July of 2% on the June figure.

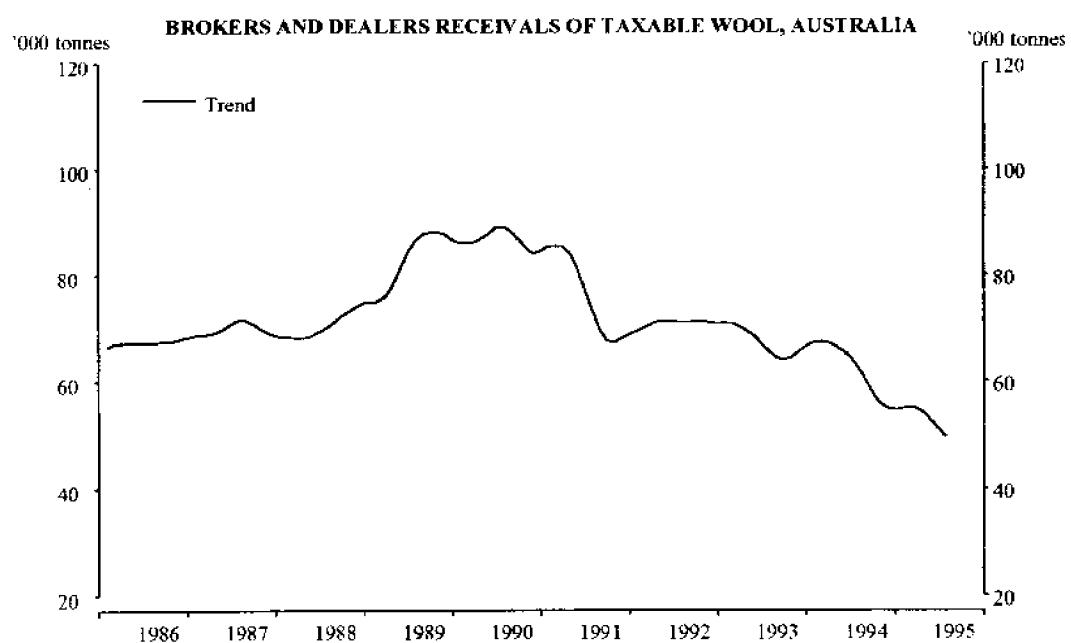

The percentage change of 2% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 1.99%.

(a) Brokers reporting to the National Council of Wool Selling Brokers of Australia (b) Trend estimates for the most recent months are subject to revision when data for the subsequent months become available.

**RELIABILITY OF JULY TREND ESTIMATES
FOR WOOL RECEIVALS**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of August.

The table below shows, for receipts of taxable wool for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 9% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 9% on the July figure.

The percentage change of 9% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 9.36%

EXPLANATORY NOTES

Introduction

This publication contains information (preliminary where indicated) on livestock slaughterings, meat production, stocks of frozen meat, exports of live sheep and live cattle, exports of fresh, frozen and processed meat, and whole milk intake by factories, market milk sales by factories and receivals of taxable wool by wool brokers and dealers.

2. Commencing with the June 1992 issue of this publication, the timing basis for compilation of merchandise exports statistics has changed. The change involves compiling export statistics on the basis of goods shipped in any month rather than on the basis of the documentation of goods shipped in that or earlier months. From the June 1992 issue the data from July 1990 has been revised to the new basis.

Livestock slaughterings and meat production

3. The statistics on slaughterings and meat production are based on a monthly collection from abattoirs and other major slaughtering establishments and include estimates of animals slaughtered on farms and by country butchers and other small slaughtering establishments.

4. Care should be taken when using this information as the figures only relate to slaughterings for human consumption and do not include animals condemned or those killed for boiling down. Since July 1994 the definition of livestock categories between States has been standardised.

5. Poultry slaughterings statistics have been compiled from returns supplied by commercial poultry slaughtering establishments. Producers in the Northern Territory and the Australian Capital Territory and the many very small producers are excluded from the collection; however, the statistics represent a high level of coverage.

Live sheep and cattle exports

6. These tables contain statistics of the number of live sheep and cattle exported, the gross weight, gross value and unit value. Sheep or cattle exported for breeding are excluded.

Milk

7. Tables 9 and 10 contain statistics collected by the Australian Dairy Corporation (ADC) on whole milk intake and market milk sales by factories.

Wool receivals

8. The statistics in Table 11 show the amount of taxable wool received by brokers and dealers from wool producers. It excludes wool received by brokers on which tax has already been paid by other dealers (private buyers) or brokers.

9. The information shown is on the basis of the State in which wool has actually been received and does not necessarily reflect the production of wool in that State.

Seasonal adjustment

10. Details of seasonally adjusted figures for livestock slaughterings, red meat, milk and wool are shown in Tables 1, 2, 9 and 11 respectively. Information on the methods used in seasonally adjusting these series is available on request.

Trend Estimates

11. A trend estimate is obtained by reducing the irregular component from the seasonally adjusted series. It is calculated for estimates in this publication by applying a 13 term Henderson moving average to the seasonally adjusted series. This technique enables trend estimates to be produced for the latest month. Trend estimates for the most recent months are revised as data for subsequent months become available. For further information, see *A Guide to Interpreting Time Series - Monitoring "Trends", an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.

Related publications

12. Users may also wish to refer to the following priced publication which is available on request:

Livestock and Livestock Products, Australia (7221.0)

13. Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publication Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

Next release date

14. The expected release date for the August 1995 issue of this publication is 9 October 1995. The date can be confirmed a few days prior to release by telephoning (06) 252 5226.

Symbols and other usages

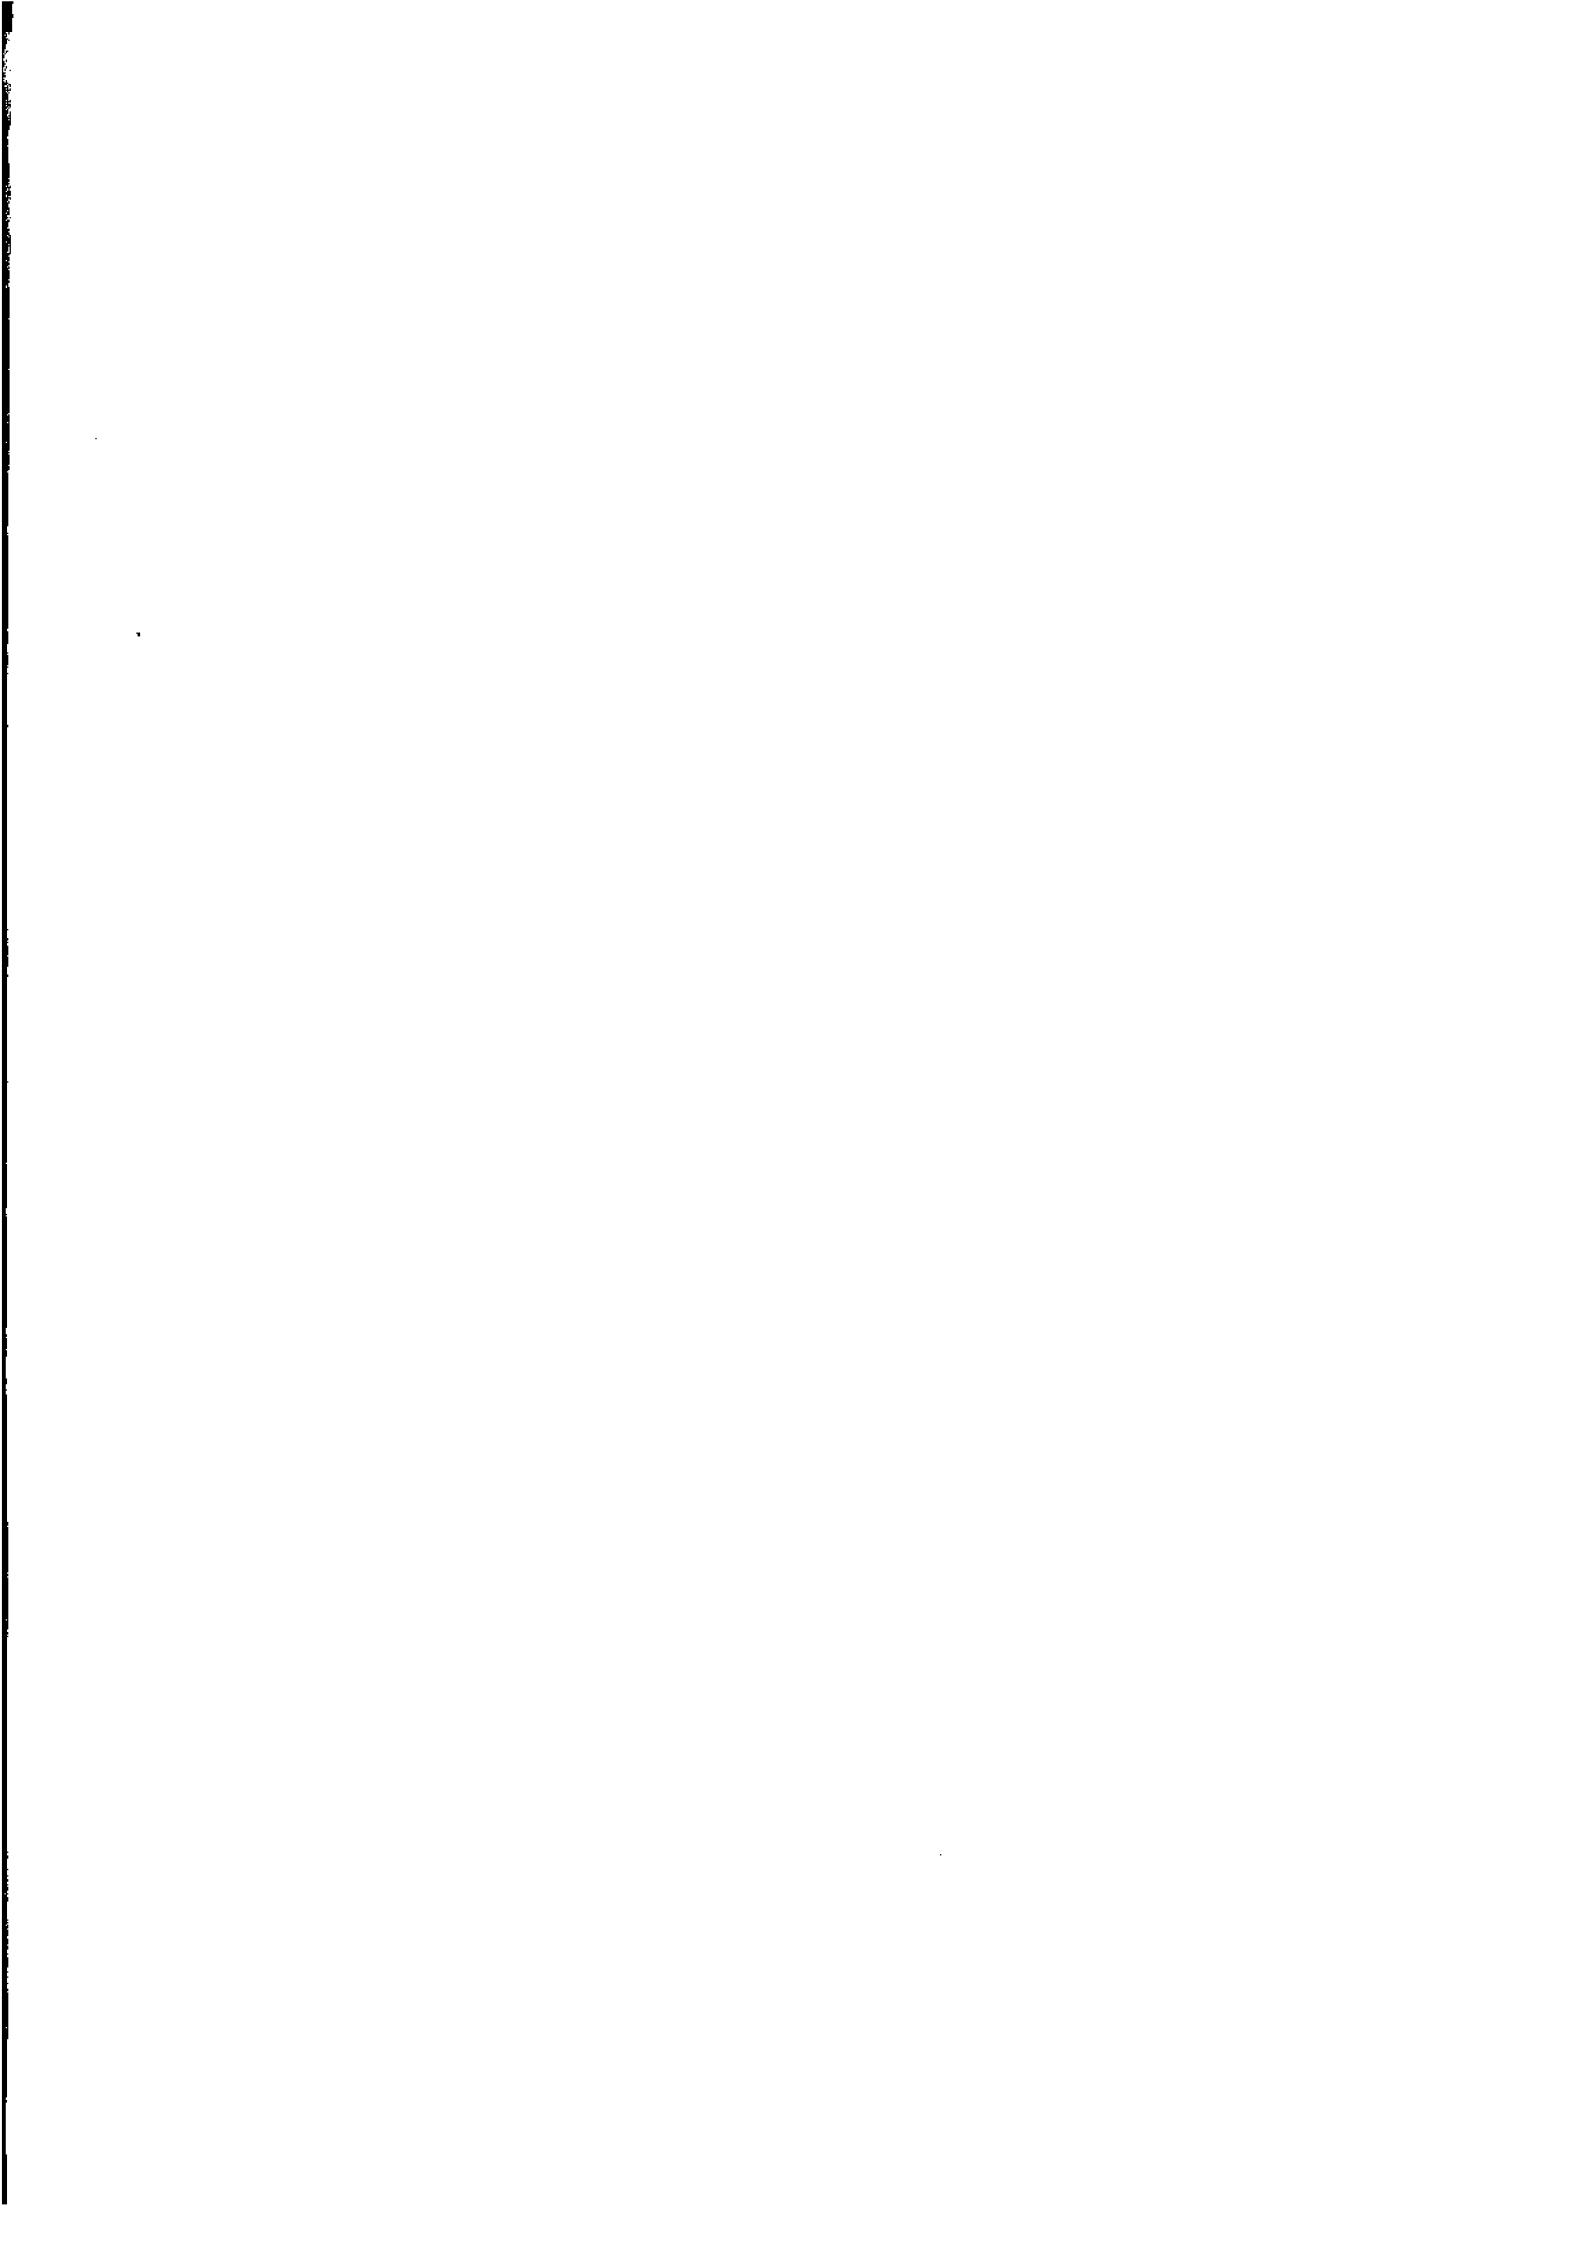

p	preliminary
..	not applicable
—	nil or rounded to zero

15. The figures shown in this publication have been revised where necessary and as a consequence may not agree with similar data shown in previous publications.

16. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

17. Unless indicated otherwise, Australian totals include data for all States and both Territories.
