

CATALOGUE NO. 7215.0

EMBARGOED UNTIL 11.30 AM WED 4 SEPTEMBER 1996

**LIVESTOCK PRODUCTS, AUSTRALIA  
JULY 1996**

**MAIN FEATURES**

**Livestock Slaughtering**

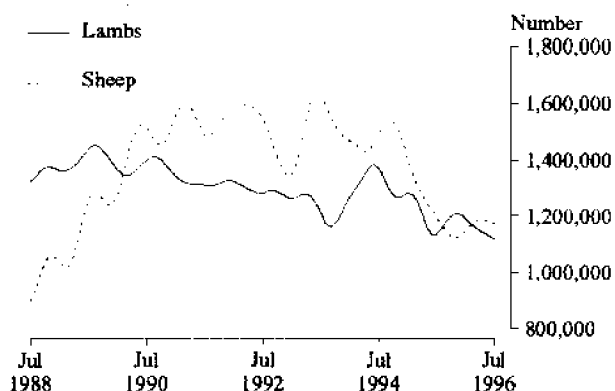

The trend estimate for cattle slaughtering continued to steadily decline, falling by 2.0% in July 1996. This is the sixth consecutive month in which a fall has occurred and the trend estimate is 9.7% below the peak in January 1996. The trend estimate for calves remained steady and is 0.3% below the last peak in May 1996.

**CATTLE SLAUGHTERINGS  
Trend Series**

The trend estimate for sheep slaughtering fell 0.8% in July 1996 and is 1.1% below the last peak in April 1996. The trend estimate for lamb slaughtering fell in July 1996 for the eighth consecutive month. It is 7.4% below the last peak in November 1995.

**SHEEP AND LAMB SLAUGHTERINGS  
Trend Series**

The trend estimate for pig slaughtering rose marginally, for the first time in 19 months. However it is 10.4% lower than the last peak in November 1994.

**Red Meat**

In July 1996 the trend estimate for total red meat production fell for the fifth consecutive month. This estimate is 8.4% below the last peak in February 1996. The trend estimate for beef production also fell in July 1996 for the fifth consecutive month and is 11.1% below the last peak in February 1996. The trend estimate for mutton production fell 1.8% in July 1996 and is 3.9% below the last peak in March 1996. The trend estimate for lamb production continued to fall at a steady rate, dropping by 1.3% in July 1996 and is 9.2% below the last peak in November 1995. The trend estimate for pigmeat production increased marginally for the third consecutive month.

**Chicken Meat**

The trend estimate for chicken meat production has fallen for the fifth consecutive month. It is 4.3% below the last peak in February 1996.

**Whole Milk Intake**

In June 1996 the trend estimate for whole milk intake by factories rose for the sixth consecutive month and is 9.7% above the last trough in December 1995.

**Wool Receivals by Brokers and Dealers**

The trend estimate for wool receivals by brokers and dealers fell 2.9% in July 1996. It is 6.4% below the last peak in March 1996.

**Live Exports**

In June 1996 the number of live sheep exported fell by 50.2% to 320,900, resulting in an annual increase of 6.1%. The unit value (\$36.33) rose 6.9% and the gross value (\$11.7 million) fell 46.8%.

Live cattle exports fell 13.9% to 65,200 in June 1996. The unit value (\$499.69) fell 9.7%, while the gross value (\$32.6 million) fell 22.1%. Live cattle exports have increased substantially over the last year, recording an annual increase of 59.5% in 1995-96.

**INQUIRIES**

- for further information about statistics in this publication and the availability of related unpublished statistics — contact Gabrielle Robbie on Canberra (06) 252 5226 or any ABS State office.
- for information about other ABS statistics and services — please contact Information Services on (06) 252 6627, 252 6007 or any ABS State Office.

(a) Red meat is shown in carcass weight and excludes offal. (b) Trend estimates for the most recent months are subject to revision when data for subsequent months become available. (c) Buffalo meat produced in the Northern Territory is included in Australian totals.

**RELIABILITY OF JULY TREND ESTIMATES  
FOR PRODUCTION OF RED MEAT**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of August.

The table below shows, for red meat production for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 3% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 3% on the July figure.

The percentage change of 3% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 3.30%

(a) Excludes offal. (b) Factors can be applied to beef, veal, mutton and lamb bone-out figures to derive bone-in carcass weight which, when added to bone-in figures, shows total exports in carcass weight. The factor for beef and veal is 1.5 and for mutton and lamb is 2.0 (Source: Australian Meat and Livestock Corporation). (c) Includes buffalo meat. (d) Cured carcass weight of smoked or cooked bacon and ham. Includes stated net weight of packs of canned bacon and ham. (e) Canned weight. Excludes canned bacon and ham.

(a) Chicken meat is shown in dressed weight of whole birds, pieces and giblets. (b) Excludes Tasmania, the Northern Territory and the Australian Capital Territory.

(c) Trend estimates for the most recent months are subject to revision when data for subsequent months become available.

Note: Some slaughtering and meat production statistics for 'Ducks and Drakes' and 'Other Fowls and Turkeys' are available by contacting the ABS on Canberra 252 5337 or by writing to PO Box 10, Belconnen ACT 2616 (Attention: Agriculture Section).

#### RELIABILITY OF JULY TREND ESTIMATES FOR CHICKEN MEAT

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of August.

The table below shows, for chicken meat production for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 4% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 4% on the July figure.

The percentage change of 4% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 4.00%

(a) Includes white, flavoured, high and low fat milk, uht milk.

**RELIABILITY OF JUNE TREND ESTIMATES  
FOR WHOLE MILK INTAKE BY FACTORIES**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of July.

The table below shows, for whole milk intake by factories for the six months ended June:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for July of 2% on the June figure;
- trend estimates assuming a decrease in seasonally adjusted data for July of 2% on the June figure.

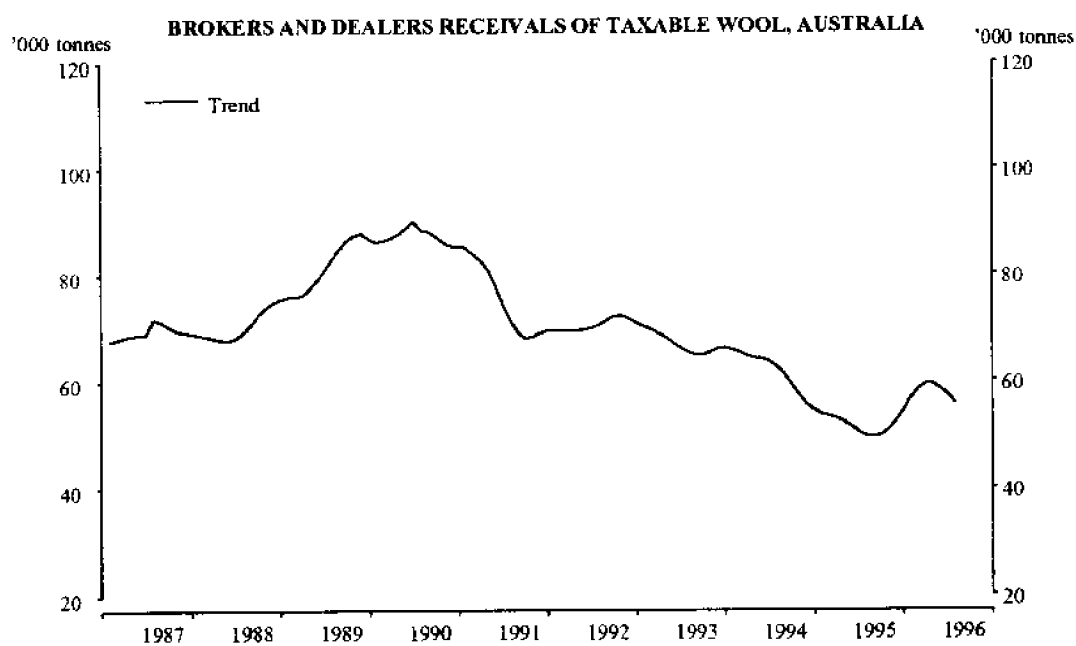

The percentage change of 2% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 1.92%

(a) Trend estimates for the most recent months are subject to revision when data for the subsequent months become available.

**RELIABILITY OF JULY TREND ESTIMATES  
FOR WOOL RECEIVALS**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of July.

The table below shows, for wool receivals for the six months ended July:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for August of 9% on the July figure;
- trend estimates assuming a decrease in seasonally adjusted data for August of 9% on the July figure.

The percentage change of 9% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 8.27%

	<i>Trend as published</i>	<i>Trend change with seasonally adjusted July estimate</i>

## EXPLANATORY NOTES

**Introduction**

This publication contains information (preliminary where indicated) on livestock slaughterings, meat production, stocks of frozen meat, exports of live sheep and live cattle, exports of fresh, frozen and processed meat, and whole milk intake by factories, market milk sales by factories and receivals of taxable wool by wool brokers and dealers.

**Livestock slaughterings and meat production**

2. The statistics on slaughterings and meat production are based on a monthly collection from abattoirs and other major slaughtering establishments and include estimates of animals slaughtered on farms and by country butchers and other small slaughtering establishments.

3. Care should be taken when using this information as the figures only relate to slaughterings for human consumption and do not include animals condemned or those killed for boiling down.

4. Poultry slaughterings statistics have been compiled from returns supplied by commercial poultry slaughtering establishments. Producers in the Northern Territory and the Australian Capital Territory and the many very small producers are excluded from the collection; however, the statistics represent a high level of coverage.

**Live sheep and cattle exports**

5. These tables contain statistics of the number of live sheep and cattle exported, the gross weight, gross value and unit value. Sheep or cattle exported for breeding are excluded.

**Milk**

6. Tables 9 and 10 contain statistics collected by the Australian Dairy Corporation (ADC) on whole milk intake and market milk sales by factories.

**Wool receivals**

7. The statistics in Table 11 show the amount of taxable wool received by brokers and dealers from wool producers. It excludes wool received by brokers on which tax has already been paid by other dealers (private buyers) or brokers.

8. The information shown is on the basis of the State in which wool has actually been received and does not necessarily reflect the production of wool in that State.

**Seasonal adjustment**

9. Details of seasonally adjusted figures for livestock slaughterings, red meat, milk and wool are shown in Tables 1, 2, 9 and 11 respectively. Information on the methods used in seasonally adjusting these series is available on request.

**Trend Estimates and Sensitivity Analysis**

10. A trend estimate is obtained by reducing the irregular component from the seasonally adjusted series. In this publication trend estimates are generally derived by applying a 13 term Henderson moving average to the seasonally adjusted series.

The 13 term Henderson, (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable the trend to be calculated for the latest month, it does result in revisions to the last six estimates as additional observations become available.

11. Sensitivity analysis indicates the potential magnitude and direction of revisions created to the last six estimates. It aims to show how a specified movement in the seasonally adjusted data in the next period will affect the trend path of the time series. By showing how sensitive the trend estimates are to the addition of new data, the analysis provides information which can be used in the assessment of the trend's stability. For further information, see *A Guide to Interpreting Time Series - Monitoring "Trends", an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.

**Related publications**

12. Users may also wish to refer to the following priced publication which is available on request:

*Livestock and Livestock Products, Australia* (7221.0)

*Apparent Consumption of Selected Foodstuffs, Australia 1994-95, Preliminary* (4315.0)

13. Current publications produced by the ABS are listed in the Catalogue of *Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

**Next release date**

14. The expected release date for the August 1996 issue of this publication is 2 October 1996. The date can be confirmed a few days prior to release by telephoning (06) 252 5226.

**Symbols and other usages**

p	preliminary
..	not applicable
—	nil or rounded to zero

15. The figures shown in this publication have been revised where necessary and as a consequence may not agree with similar data shown in previous publications.

16. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

17. Unless indicated otherwise, Australian totals include data for all States and both Territories.

T.J. Skinner  
Acting Australian Statistician

## SUBSCRIPTION SERVICE

For the regular supply of publications phone ABS Subscription Service toll-free on 1800 020 608.

## ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. You can also visit us on the Internet at <http://www.statistics.gov.au>. For more details about these electronic data services, contact any ABS Office.
