INQUIRIES	 for information about the statistics in this publication or other ABS statistics and services. Information Services on Adelaide (08) 237 7100, or call at 55 Currie Street, Adelaide to Information Services, ABS, GPO Box 2272, Adelaide SA 5001. 	ces please contact SA 5001, or write

Do you want to know more?

- Unpublished information is available from the Agricultural Census for small areas such as Hundreds and Local Government Areas in South Australia.
- This data is readily available on a fee-for-service basis. For more information contact Information Services, telephone (08) 237 7100.

AGSTATS, AUSTRALIA

- * AgStats presents in electronic (or microfiche) format the data obtained from the Agricultural Census.
- * The information includes details of area and production of crops, livestock numbers, including shearing and wool production, numbers of fruit trees, some varietal information; and number of establishments reporting each item.
- * AgStats is available on floppy disk and microfiche. The floppy disk package includes easy-to-use, menu driven interrogation facilities. Data is provided down to Statistical Local Area (Local Governments) with aggregates to Statistical Subdivisions, Statistical Divisions and State Totals.

Contact: Adelaide (08) 237 7100 or any State Office.

SUMMARY OF FINDINGS

The gross value of agricultural commodities produced by South Australia increased in 1992-93 by \$38.7 million (1.8%) to \$2,217.4 million. The average gross unit value of cereals for grain and wool fell but sheep and lamb prices increased significantly.

Crops

 The gross value of crops fell by \$24.2 million (1.8%) to \$1,355.1 million.

Wheat

- Wheat increased by \$5.9 million (1.4%) to \$436.4 million.
- The main wheat growing region of the State, Eyre Statistical Division decreased by \$19.0 million (9.7%) to \$177.6 million. Yorke and Lower North decreased by \$7.0 million (6.2%). In contrast Murray Lands Statistical Division increased by \$21.2 million (53.9%).

Barley

- Barley decreased by \$18.5 million (6.9%) to \$247.6 million.
- The main barley growing region, Yorke and Lower North Statistical Division, was down by \$19.9 million (17.3%) to \$95.3 million. Eyre Statistical Division decreased by \$7.4 million (11.3%). Murray Lands Statistical Division increased by \$12.6 million (35.0%).

Legumes for grain

- The total gross value of legumes decreased by \$3.0 million (4.6%) to \$63.1 million.
- Lupins were the only legume to record an increase, up \$7.2 million (73.3%) to \$17.0 million.

Oilseeds

Oilseed decreased in total by \$0.2 million (3.4%) to \$5.2 million.

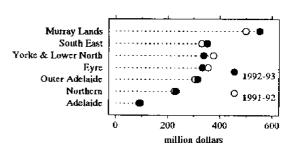

Fruit (excluding grapes)

 Fruit (excluding grapes) rose by \$11.3 million (6.6%) to \$182.3 million. Increased production of oranges, apples and almonds with improved prices for the two latter commodities represented the bulk of the increase.

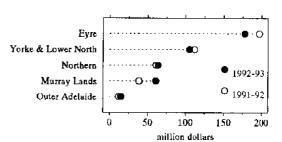

Grapes

- The total value of grapes decreased by \$29.2 million (20.3%) to \$114.9 million. Excessive rain and prevalence of deseases, especially downey mildew lead to a fall in production, particularly of dried grapes.
- Murray Lands Statistical Division decreased by \$15.8 million (18.5%), Outer Adelaide by \$7.2 million (29.4%) and the South East by \$2.8 million (16.4%).

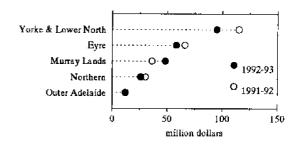

GROSS VALUE OF AGRICULTURAL COMMODITIES BY STATISTICAL DIVISION

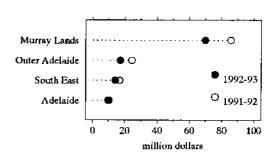

GROSS VALUE OF WHEAT IN SELECTED STATISTICAL DIVISIONS

GROSS VALUE OF BARLEY IN SELECTED STATISTICAL DIVISIONS

GROSS VALUE OF GRAPES IN SELECTED STATISTICAL DIVISIONS

SUMMARY OF FINDINGS - continued

Vegetables

- Vegetables decreased in value by \$6.3 million (4.2%) to \$145.7 million.
- Potatoes increased marginally by \$1.1 million (2.0%) to \$58.9 million and carrots increased by \$4.1 million (39.0%) to \$14.7 million. Broccoli, lettuce, rock melons, mushrooms, onions and tomatoes were major vegetables that declined in value.

Livestock slaughterings and other disposals

The gross value of livestock slaughterings and other disposals increased by \$52.9 million (15.8%).

Cattle

Cattle slaughterings rose marginally to \$154.4 million.

Sheep

- The gross value of sheep slaughterings and live sheep exports rose by \$43.0 million (64.2%) to \$110.0 million.
- Improved prices, increased live sheep exports and slaughterings of adult sheep far outweighed the reduced slaughterings of lambs.

Pigs

 The gross value of pig slaughterings in South Australia increased by \$5.2 million (8.2%) to \$68.9 million.

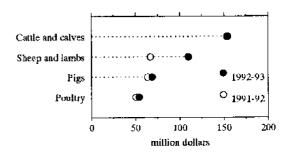

Livestock products

The gross value of livestock products increased by \$10.0 million (2.2%) to \$474.6 million. The increased value of milk, honey and beeswax outweighed the fall in value of wool.

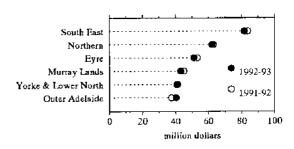

Wool

Wool decreased by \$4.2 million (1.3%) to \$319.9 million.
 The quantity shorn in 1992-93 increased but was offset by the fall in price.

GROSS VALUE OF LIVESTOCK SLAUGHTERINGS AND OTHER DISPOSALS

GROSS VALUE OF WOOL IN SELECTED STATISTICAL DIVISIONS

EXPLANATORY NOTES

Introduction

The statistics contained in this publication are compiled annually for South Australia and include gross and local values of production for all agricultural commodities, unit gross values of selected commodities, and the average value per hectare of selected crops.

Scope and coverage

- 2. Statistics are, in general, derived from the annual Agricultural Census, conducted throughout Australia at 31 March, which collects data from establishments with agricultural activity.
- 3. The ABS excludes from the Census those establishments which made only a small contribution to overall agricultural production. From 1991–92 the scope of the Census is establishments undertaking agricultural activity having an estimated value of agricultural operations (EVAO) of \$22,500 or more. The scope of previous Censuses (from 1986–87) was establishments undertaking agricultural activity having an EVAO of \$20,000 or more.
- 4. In addition to those statistics normally shown in this publication, tables are included to show a comparison of gross values of commodities for establishments with an EVAO of \$5,000 or more compared with those with an EVAO of \$22,499 or more.

Information sources

Quantity data. Production of crops relate, in the main, to crops sown during the year ended 31 March. Statistics of perennial crops relate to the position at 31 March and production during the year ended on that date. For example, particulars of area and production of wheat refer to wheat sown during the period from April to September and harvested between October and the following February, i.e. the 1992-93 season related to the harvesting period October 1992 to February 1993. In conjunction with the Census, supplementary collections are conducted, i.e. where the harvesting of certain crops had not commenced, or was not completed (e.g. potatoes) by 31 March. Special returns covering the crops concerned are collected after the completion of the harvest and the values of these crops included in this publication. For remaining commodities the period refers to the year ended 30 June. Information covering such commodities as livestock slaughterings and dairy produce is obtained from separate collections and from organisations such as the Australian Dairy Corporation.

Before 1986–87 the quantity of wheat was raised to incorporate Wheat Board receivals. In this publication, quantity valued relates to wheat reported in the Agricultural Census collections. The impact for this change is reflected in the graph 'Gross Value of Wheat for Grain'.

- 6. Price data. The method of collection of relevant prices for, and the costs of marketing of agricultural commodities, varies considerably between commodities. Where a statutory authority handles marketing of the whole or portion of a product (e.g. Australian Dairy Corporation, Australian Wheat Board, Australian Barley Board) data are usually obtained from this source. Information is also obtained from marketing reports, wholesalers, brokers and auctioneers.
- 7. For all commodities, values are in respect of production during the year (or season) irrespective of whether or when payments are made. For that portion of production not marketed (e.g. wheat or oats for own feed or seed) estimates are

made from the best available information and, in general, are valued on a local value basis.

Australian Standard Geographical Classification (ASGC)

8. Area statistics are classified according to the Australian Standard Geographical Classification, Edition 10 (1216.0) and its terminology has been adopted in the presentation of agricultural statistics.

Definitions of terms used

- The following are definitions of the terms used.
- (a) Gross value of commodities produced is the value placed on recorded production at the wholesale prices realised in the market place. In general the 'market place' is the metropolitan market. In cases where commodities are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the market place.

Local value of commodities produced is the value placed on commodities at the place of production and is ascertained by deducting marketing costs from the gross value of commodities produced.

Gross and local values of agricultural commodities produced involve some duplication, as they include certain agricultural commodities which are consumed as raw material to produce other agricultural commodities (e.g. hay consumed by livestock).

- (b) Marketing costs include freight, costs of containers, commission and other charges incurred in marketing. Freight costs are only included in marketing costs when the producer or marketing organisation pays a freight company part or all of the cost of transport. Marketing costs are not on a completely comparable basis between States and in addition, accurate information is difficult to obtain for many items.
- (c) Average unit gross values are calculated by dividing the gross value of each commodity produced by the total production of each corresponding commodity.
- (d) Values include any relevant subsidy and bounty payments. Transactions of the Wheat Industry Stabilisation Fund have not been taken into account in the valuation of wheat.
- (c) Livestock slaughterings and other disposals. Values for 'Livestock slaughterings and other disposals' are published as one figure but include two distinct components:
 - (i) value of livestock slaughtered, and
 - (ii) value of net exports.

It should be noted that in this publication *net exports* refers to movement of livestock to and from overseas destinations together with the movement of cattle for slaughter or stores from the Northern Territory. Before 1986–87, the term *net exports* referred to all interstate and overseas movements of cattle, sheep and pigs.

Data on value of livestock slaughterings by State of slaughter is available on request.

(f) Regional gross value of commodities produced. The gross value of agricultural production in statistical divisions has been estimated by applying the State average unit value of production for each commodity or livestock item to the physical volume of production originating in each area. As these

estimates are intended to provide only an indication of the distribution of the value of agricultural production over small areas of the State, the degree of accuracy for each area depends upon the deviation of actual local prices and qualities from the overall State average on which the calculation is based.

Value of Agricultural Commodities Produced, Australia (7503.0)

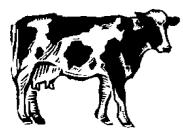

11. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues the *Publications Advice* (1105.0) on Tuesdays and Fridays, which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

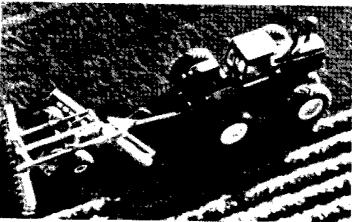

Unpublished statistics

- 12. As well as the agricultural statistics included in this and related publications, the ABS has other unpublished data available e.g. statistics for small geographical areas, minor commodities and data for previous years. Inquiries should be made to the contact shown at the front of this publication. The ABS also has an Agricultural Statistical Package (AgStats) which provides agricultural statistics on MS-DOS compatible floppy disk, magnetic tape and microfiche. AgStats offers a wider range of data, aggregated at smaller geographical areas than those generally available in printed publications. AgStats is available for 1982–83 to 1992–93.
- 13. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Symbols and other usages

n.c.c. not elsewhere classified nit or rounded to zero

AgStats

- enables EASY access (and data manipulation) for the detailed small area agricultural commodity data from the last 6 YEARS of the ABS Agricultural Census
- 1300 individual Statistical Local Areas can be cross referenced with any or all of over 800 commodity data items

For more information ...

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our Offices (see below for contact details).

Information Consultancy Service

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our Offices (see below for contact details).

Electronic Data Services

A growing range of our data is available on electronic media. Selections of the most frequently requested data are available, updated daily, on Discovery (Key *656#). Our PC TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC Ausstats service enables on-line access to a data base of thousands of up-to-date time series. Selected data sets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our Offices on the numbers below.

Bookshops and Subscriptions

There are over 500 titles available from the ABS Bookshops in each of our Offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free on 008 02 06 08 Australia wide.
