AUSTRALIA

EMBARGOED UNTIL 11:30AM WED 3 JULY 1996

## MAY KEY FIGURES

## INQUIRIES

- For further information about these and related statistics, contact Bill Powell on 06 252 6132. For information about constant price estimates contact Leon Ting on 06 252 6807.

## TREND ESTIMATES

Turnover at current prices (in \$ millions)	Apr 96	May 96	% change
10 194.8	10 210.9	0.2	
May 95	May 96	% change	
9 639.5	10 210.9	5.9	

## SEASONALLY ADJUSTED ESTIMATES

Turnover at current prices (in \$ millions)	Apr 96	May 96	% change
10 142.6	10 210.1	0.7	
May 95	May 96	% change	
9 589.7	10 210.1	6.5	

## MAY KEY POINTS

### TREND ESTIMATES

- Growth in the Australian Retail and Hospitality/Services trend series has slowed in recent months to a weak 0.2% in May 1996.
- The industry group contribution to the current trend growth pattern is varied. While the Food retailing group contributed \$76.2m to the Australian total growth figure of \$72.1m (covering the three months to May 1996), three other industry groups offset this with falls - Department stores (-\$20.3m), Recreational good retailing (-\$20.3m) and Clothing and soft good retailing (-\$16.3m).

### INDUSTRY ANALYSIS

- The largest group, Food retailing, continued with the moderate growth observed for each month of 1996.
- Other good retailing recorded strong growth over the same period.
- Department stores, along with the Clothing and soft good retailing and Recreational good retailing groups has been in decline for the past few months.

**TAKE CARE!**  
Trend estimates are revised as new monthly data become available.

## ORIGINAL ESTIMATES

- In original terms, Australian retail turnover increased by 7.6% in May 1996 compared to May 1995.
- Chains and other large retailers recorded growth of 8.5% for the same period while small retailers grew by 6.5%.

## R E T A I L   T R A D E   N O T E S

**FORTHCOMING ISSUES**

ISSUE	RELEASE DATE
June 1996	31 July 1996
July 1996	30 August 1996
August 1996	1 October 1996

\* \* \* \* \*

**CHANGES IN THIS ISSUE**

Revisions have been made to the current price series for Department stores in Queensland (from November 1995 to April 1996) and the Food retailing group in Western Australia (for December 1995 and January 1996).

\* \* \* \* \*

**SAMPLING ERRORS**

Standard errors for the Australian estimates (original data) for May 1996 contained in this publication are:

DATA SERIES	ESTIMATE	STANDARD ERROR
Level of retail turnover (\$m)	10 165.0	87.1
Change from April to May (\$m)	405.7	33.0
% change from April to May	4.2	0.3

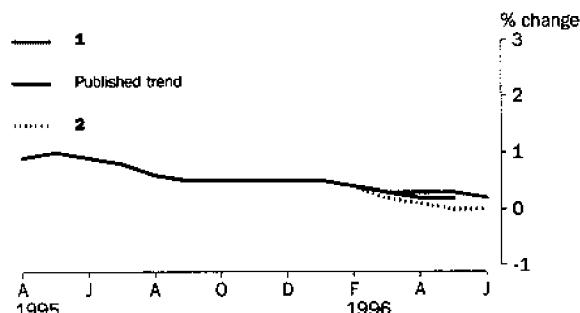

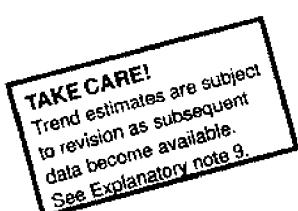

For more information see the Explanatory notes, paragraphs 12-15, or contact Bill Powell on 06 252 6132.

\* \* \* \* \*

**WHAT IF?**

The most recent trend estimates published in this release are likely to be revised when next month's seasonally adjusted estimates become available. To assist readers of this publication in analysing retail trends, the effect of two possible scenarios on the previous trend estimates of the percentage change in retail turnover are presented below.

- 1 The June seasonally adjusted estimate of retail turnover is 1.0% higher than the May estimate.
- 2 The June seasonally adjusted estimate of retail turnover is 1.0% lower than the May estimate.

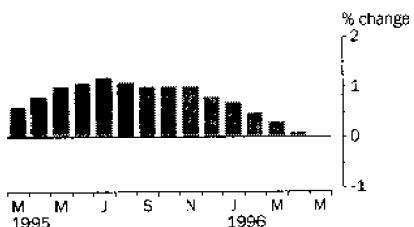

W. McLennan  
Australian Statistician

## STATE TRENDS

---

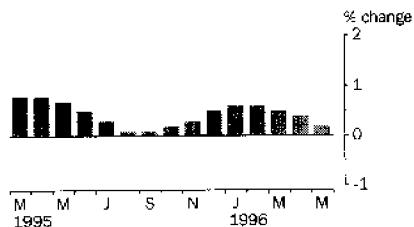

### MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

#### NEW SOUTH WALES

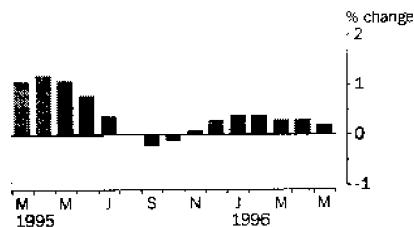

New South Wales recorded zero growth in the trend estimate for May 1996. Decreases were recorded in four of the seven industry groups covered by the survey.

#### VICTORIA

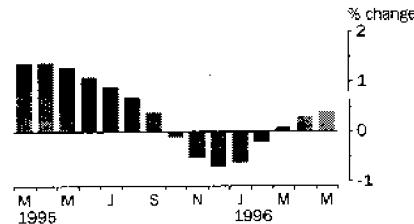

The trend estimate increased by 0.2% in May. Only the Food retailing, Household good retailing and Hospitality and services groups recorded growth.

#### QUEENSLAND

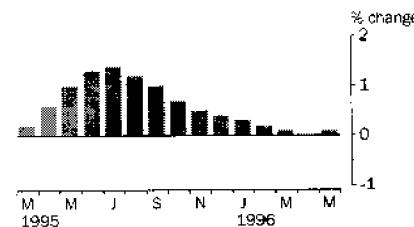

Growth has been weak over recent months. Department stores and the Clothing, Recreational good retailing and Hospitality and services groups are all in decline.

#### SOUTH AUSTRALIA

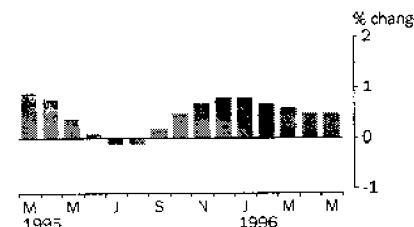

The trend estimate has returned to positive growth in recent months. The Food retailing and the Hospitality and services groups have shown strong recent growth.

#### WESTERN AUSTRALIA

There has been little growth in the trend estimate over the last three months. The strong growth in Other good retailing was offset by a large decline in Household good retailing.

#### TASMANIA

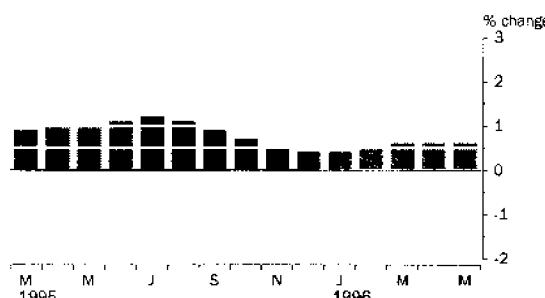

Growth in the Hospitality and services, Food retailing and Household good retailing groups has helped keep the trend estimate growing at around 0.5% for each of the last three months.

## INDUSTRY TRENDS

\*\*\*\*\*

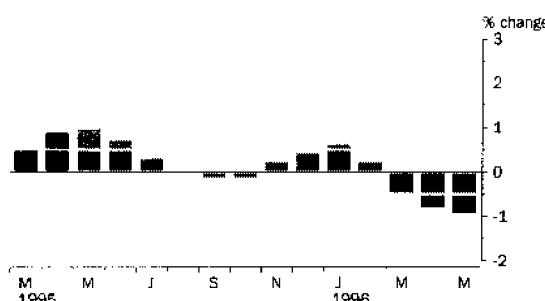

### MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

#### FOOD RETAILING

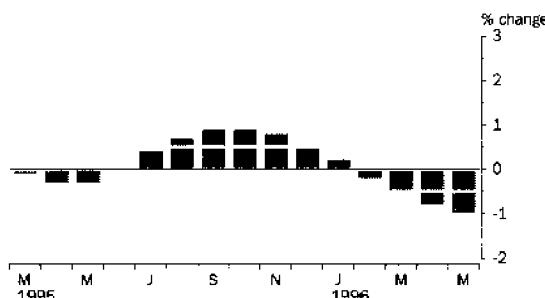

Growth in the trend estimate for this industry has been a moderate 0.6% for each of the last three months. Western Australia has been in decline so far this year. All other States have recorded growth.

#### DEPARTMENT STORES

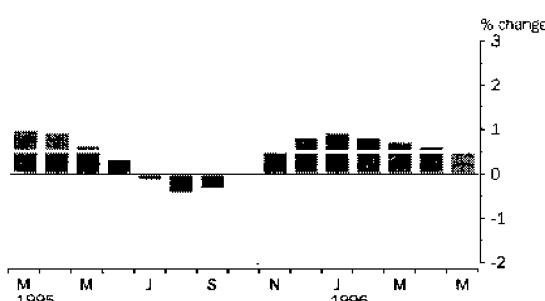

Department stores have been in decline for the last three months. This decline is spread across most States. South Australia was the only State to record growth, although very weak, at 0.1%.

#### CLOTHING AND SOFT GOOD RETAILING

The trend estimate has been in decline for the last four months. Western Australia and the Australian Capital Territory recorded growth. In Tasmania the growth rate was zero. All other States were in decline.

#### HOUSEHOLD GOOD RETAILING

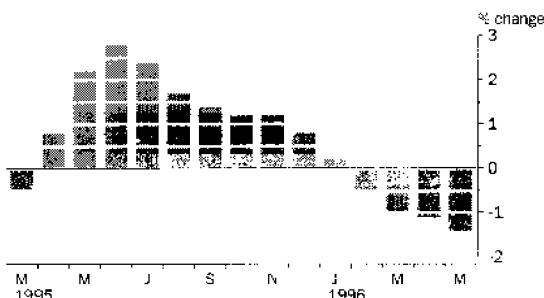

The Household good retailing group continued to record growth although the rate eased over the last four months. All States apart from Western Australia and the Australian Capital Territory have shown growth.

## INDUSTRY TRENDS *(continued)*

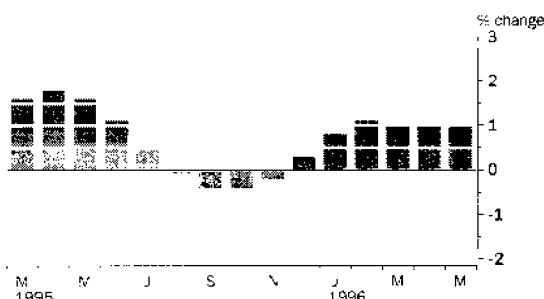

### MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

#### RECREATIONAL GOOD RETAILING

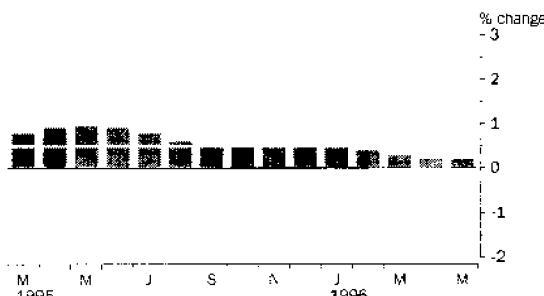

After a period of strong growth in the last half of 1995, the Recreational good retailing group has been in decline since February 1996. Western Australia and the Northern Territory were the only States to record growth.

#### OTHER RETAILING

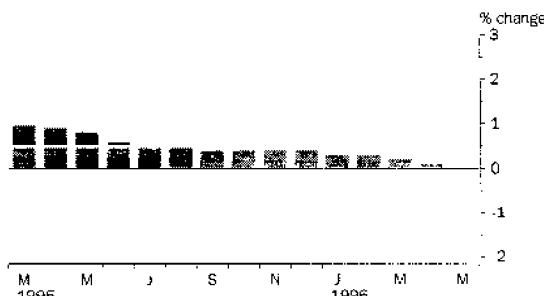

This industry group has shown growth of around 1.0% over each of the last four months. New South Wales, Queensland, South Australia, Western Australia and the Australian Capital Territory all recorded moderate to strong growth.

#### TOTAL RETAIL (excluding Hospitality and Services)

Movement in the trend estimate for Total retail (excluding the Hospitality and services group) was similar to that observed for Total industries (including the Hospitality and services group).

#### HOSPITALITY AND SERVICES

The growth rate has been gradually easing over the last year. At some stage or other over this period all States went through a period of decline. In May 1996 zero growth was recorded.

## **EXPLANATORY NOTES**

---

### INTRODUCTION

**1** This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State. The principal objective of the Retail Trade survey is to show month to month movement of retail turnover.

**2** Estimates of turnover contained in this publication are based on a survey of about 7,000 retail and selected service businesses (covering 20,000 outlets). All 'large' businesses are included in the survey, while a sample of about 4,400 'smaller' businesses is selected. The 'large' business' contribution of approximately 54 per cent of the total estimate ensures a highly reliable Australian total turnover estimate.

### SCOPE AND COVERAGE

**3** The Retail Trade survey covers all employing businesses, with at least one retail establishment. The scope of the survey (classified according to the Australian and New Zealand Standard Industrial Classification [ANZSIC]) is detailed below:

- Food Retailing
  - Supermarkets and grocery stores (5110)
    - and non-petrol sales of identified convenience stores of petrol stations
  - Takeaway food retailing (5125)
  - Other food retailing
    - Fresh meat, fish and poultry retailing (5121)
    - Fruit and vegetable retailing (5122)
    - Liquor retailing (5123)
    - Bread and cake retailing (5124)
    - Specialised food retailing n.e.c. (5129)
- Department Stores (5210)
- Clothing and Soft Good Retailing
  - Clothing retailing (5221)
    - Other clothing related retailing
      - Footwear retailing (5222)
      - Fabric and other soft good retailing (5223)
  - Household Good Retailing
    - Furniture and floorecovering retailing
      - Furniture retailing (5231)
      - Floor covering retailing (5232)
    - Domestic hardware and houseware retailing (5233)
    - Domestic appliance retailing
      - Domestic appliance retailing (5234)
      - Recorded music retailing (5235)
  - Recreational Good Retailing
    - Newspaper, book and stationery retailing (5243)
    - Other recreational good retailing
      - Sport and camping equipment retailing (5241)
      - Toy and game retailing (5242)
      - Photographic equipment retailing (5244)
  - Other Retailing
    - Pharmaceutical, cosmetic and toiletry retailing (5251)
    - Other retailing
      - Antique and used good retailing (5252)
      - Garden supplies retailing (5253)
      - Flower retailing (5254)
      - Watch and jewellery retailing (5255)
      - Retailing n.e.c. (5259)

SCOPE AND COVERAGE (continued)	<ul style="list-style-type: none"> <li>▪ Hospitality and Services           <ul style="list-style-type: none"> <li>Hotels and licensed clubs</li> <li>Pubs, taverns and bars (5720)</li> <li>Clubs (Hospitality) (5740)</li> <li>Cafes and restaurants (5730)</li> </ul> </li> <li>Selected services           <ul style="list-style-type: none"> <li>Video hire outlets (9511)</li> <li>Hairdressing and beauty salons (9526)</li> </ul> </li> </ul>
DEFINITION OF TURNOVER	<p><b>4</b> Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc.) and net takings from gaming machines etc.</p>
SEASONAL ADJUSTMENT	<p><b>5</b> Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.</p> <p><b>6</b> In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). There is some evidence suggesting possible changes in retail trading patterns, including increased activity on weekends and public holidays. The impact of these changes on the seasonal pattern and trading day component of the data is being investigated and can only be confirmed once sufficient data becomes available. While these changes may impact on the unadjusted and seasonally adjusted data, the trend estimate is less likely to be affected. Further, the seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes). The seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.</p> <p><b>7</b> The State component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the Australian Group totals.</p> <p><b>8</b> As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. For Retail Trade, the results of the latest review are shown in the July issue each year.</p>
TREND ESTIMATES	<p><b>9</b> Most monthly trend estimates in this publication have been obtained by smoothing the seasonally adjusted series using a centred 13-term Henderson weighted moving average (7-term for quarterly series). However, to estimate the last six monthly trend values (or the last three quarters) a set of asymmetric moving averages have been designed to reduce a small bias associated with estimating these recent values when the trend growth is increasing or decreasing. Overall, revision to the estimates should be reduced, however, there may be a greater revision to the estimates whenever there are large irregular movements in the seasonally adjusted series.</p> <p><b>10</b> For further information, see <i>A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview</i> (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.</p>
CONSTANT PRICE STATISTICS	<p><b>11</b> To enable analysis of the movement of retail activity in 'real' terms, estimates of retail turnover at constant (average 1989–90) prices are compiled and published each quarter. Constant price retail turnover series are derived by deflating the original current price series of retail turnover by specially compiled indexes of price change.</p>

\*\*\*\*\*  
RELIABILITY OF ESTIMATES

**12** There are two types of error possible in estimates of retail turnover:

*Sampling error* which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

*Non sampling error* which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

## STANDARD ERRORS

**13** Seasonally adjusted, trend and constant price estimates are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same as for the original estimates. For trend estimates, the standard errors are likely to be smaller. For constant price estimates, the standard errors may be up to 10 per cent higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.

**14** To assist users in assessing the reliability of estimates, each data series has been given a grading of A to D. Where:

- A represents a relative standard error on level of less than 2 per cent. The published estimates are highly reliable for movement analysis;
- B represents a relative standard error on level between 2 and 5 per cent, meaning the estimate is reliable for movement analysis purposes;
- C represents a relative standard error on level between 5 and 10 per cent, meaning users are advised to exercise some caution in interpreting movements for such series; and
- D represents a relative standard error on level greater than 10 per cent (mainly affects unpublished state by industry series).

**15** The table below provides an indicator of reliability for key retail turnover estimates.

	<i>Food retailing</i>	<i>Department stores</i>	<i>Clothing and soft good retailing</i>	<i>Household good retailing</i>	<i>Recreational good retailing</i>	<i>Other retailing</i>	<i>Hospitality and services</i>	<i>Total</i>

UNPUBLISHED DATA

**16** The Retail Survey Special Data Service provides additional retail trade statistics which include further State industry dissections through to 'top ten' industry reports. For more information, contact the Retail Trade Special Data Services manager on (06) 252 5220.

RELATED PUBLICATIONS

**17** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

## FOR MORE INFORMATION . . .

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

### INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

### ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

### ELECTRONIC SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:

X.400 (C:Australia,PUB:Telememo,O:ABS,FN:STAT,SN:INFO)
