22 831.5	23 572.5		3.2

THIS MONTH'S KEY POINTS

TREND ESTIMATES

- The growth in the trend estimate of retail turnover has weakened in September 1994, but remains a relatively strong 0.6 per cent following growth of 0.8 per cent in August and 0.9 per cent in July.
- Growth over the past year (September 1994 on September 1993) was strong at 8.2 per cent.

TAKE CARE!
Trend estimates are revised as new monthly data become available.

INDUSTRY ANALYSIS

- The Grocery industry has shown strong growth of around 0.9 per cent per month over the last five months.
- Growth in the Hotels, liquor stores and licensed club industry has weakened.
- Clothing and Department stores have recorded growth over the last two months.

STATE ANALYSIS

- South Australia, Victoria, Queensland and Western Australia have shown strong growth over recent months.
- Growth has weakened slightly in New South Wales, while the trend growth remains stable in Tasmania and the Australian Capital Territory.

INQUIRIES

- For further information about these and related statistics, contact Bill Powell on 06 252 6132, or Leon Ting on 06 252 6807 for information about current price estimates.

SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted estimate fell by 1.6 per cent in September 1994. This followed rises of 2.1 per cent in August 1994 and 2.5 per cent in July 1994.
- In seasonally adjusted constant price terms the estimate of turnover for September quarter 1994 rose by 3.2 per cent. This followed a fall of 0.2 per cent in June quarter 1994.

FORTHCOMING ISSUES	ISSUE	RELEASE DATE
	October 1994	8 December 1994
	November 1994	9 January 1995
	December 1994	1 February 1995

CHANGES IN THIS ISSUE Turnover figures are at current prices unless specifically indicated otherwise. As usual these exclude motor vehicle dealers, petrol stations, etc.

As advised in the June issue, the Retail Trade Survey has been redesigned and data on the new basis were to be released in the July issue. However, work associated with converting the time series to the new basis proved to be more involved than anticipated and will not be released until the October issue. As a result the data presented herein is on the old survey design basis.

SAMPLING ERRORS Standard errors for estimates for September 1994 contained in this publication are:

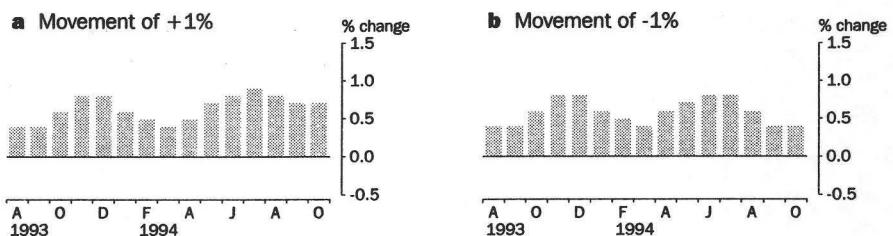

DATA SERIES	STANDARD ERROR
Level of retail turnover	\$71 million
Change from August to September	\$26 million
% change from previous month	0.3%

For more information see the Explanatory notes, paragraphs 8–10, or contact Bill Powell on 06 252 6132.

SENSITIVITY ANALYSIS

Readers should exercise care in the interpretation of the trend data as the last three observations, in particular, are likely to be revised with the addition of subsequent months' data. To illustrate this, graph 'a' below shows the effect a +1.0 per cent seasonally adjusted result in October 1994 will have on recent trend series movements. Graph 'b' shows what will happen if the October seasonally adjusted result is -1.0 per cent.

TAKE CARE
Trend estimates are subject
to revision as subsequent
data become available.
See Explanatory Note 14.

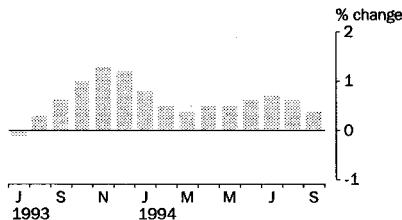

For readers' information, October seasonally adjusted percentage changes over the last five years were 1.0 per cent in 1993, 0.9 per cent in 1992, 2.6 per cent in 1991, 0.4 per cent in 1990 and -0.7 per cent in 1989.

RICHARD MADDEN
ACTING AUSTRALIAN STATISTICIAN

STATE TRENDS

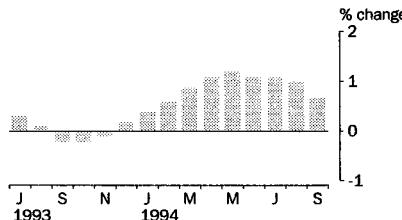

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

NEW SOUTH WALES

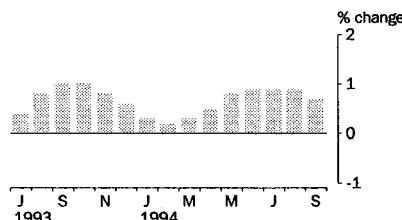

The growth in the trend estimate has weakened slightly over recent months, returning to the levels observed in the earlier part of 1994.

VICTORIA

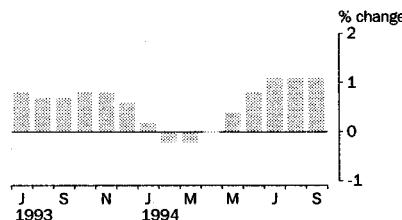

The strong growth over recent months in Victoria appears to be weakening with growth of 0.7 per cent in September, down from 1.2 per cent in May 1994.

QUEENSLAND

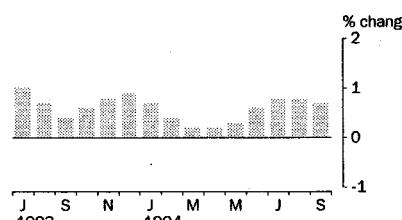

Queensland trend estimates recorded growth of around 0.8 per cent over the last five months.

SOUTH AUSTRALIA

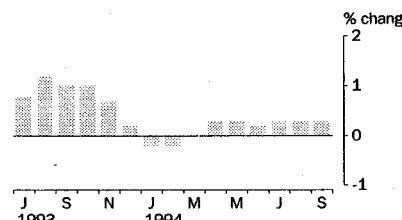

The trend estimates have shown strong growth of 1.1 per cent over each of the last three months. In the early part of 1994 the trend estimates showed weak growth or were in decline.

WESTERN AUSTRALIA

The Western Australian trend estimate has increased by about 0.7 per cent over each of the last four months.

TASMANIA

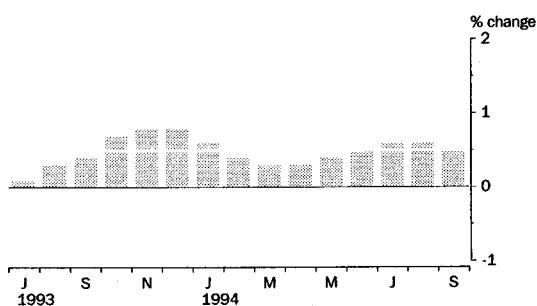

Growth in the trend estimate has been consistent at about 0.3 per cent over the past six months.

INDUSTRY TRENDS

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

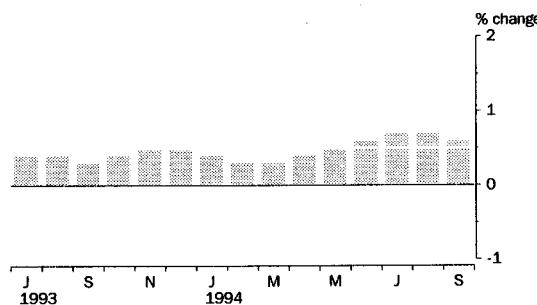

RETAIL INDUSTRIES

The Retail industries group (excluding industries categorised to the Service industry groupings) has shown steady growth over the last four months of between 0.5 and 0.6 per cent per month.

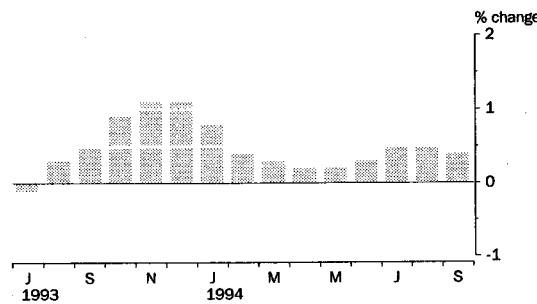

FOOD RETAILING

Growth in the trend estimate for the food group has been moderate over the last six months. Grocer turnover has grown quite strongly, Butcher turnover has remained flat, while turnover for Other food stores has declined.

NON-FOOD RETAILING

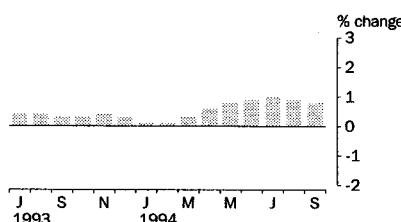

This group, consisting of the Household goods and Other retail industry groups, has shown a strengthening in the growth of trend estimates over recent months. Over the last three months growth has been around 0.5 per cent per month.

INDUSTRY TRENDS (continued)

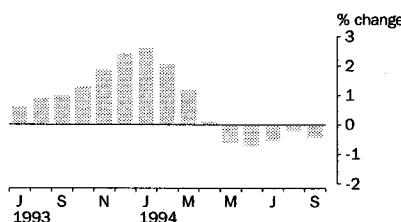

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

GROCERS

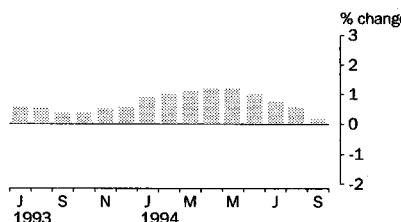

Grocery trend estimates continue to influence the Australian total trend. A peak of 1.0 per cent growth in trend was reached in July. This has eased slightly to 0.8 per cent in September.

OTHER FOOD STORES

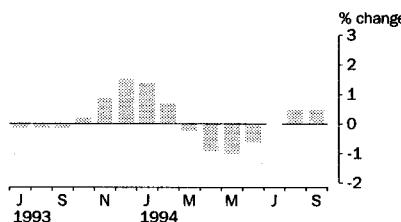

Turnover for the Other food stores industry has been in decline for the last five months.

HOTELS, CLUBS ETC.

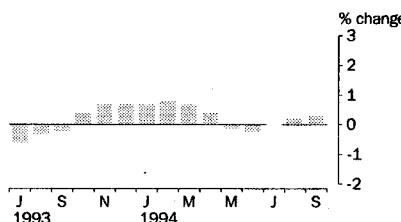

The period of strong growth in this industry appears to have come to an end with monthly growth dropping from 1.2 per cent in April and May 1994 to 0.2 per cent in September.

CLOTHING AND FABRIC STORES

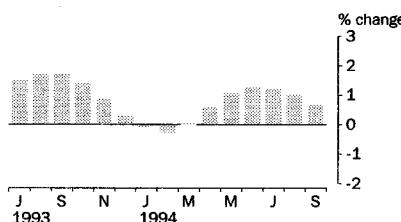

Clothing and fabric stores have shown growth over the last two months. Zero growth was recorded in July while in the four months prior to that the trend estimates were in decline.

DEPARTMENT STORES

Department stores have shown weak growth over the last two months. This follows a short period of decline or zero growth in May to July 1994.

ELECTRICAL GOODS STORES

The strong growth observed in previous months has weakened slightly, but growth in September was still strong at 0.7 per cent.

INTRODUCTION

- 1** This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State.
- 2** Estimates of turnover contained in this publication are based on a survey of 6,500 retail and selected service businesses (or over 19,000 outlets). All 'large' businesses are included in the survey, while a sample of 'smaller' businesses is selected. The 'large' businesses contribute approximately 50% of the total estimate.

SCOPE AND COVERAGE

3 The scope of the survey:

- includes the following retail trade businesses (Australian Standard Industrial Classification [ASIC]):
 - department and general stores (4814, 4815)
 - clothing and fabric stores (4843, 4844, 4847)
 - footwear stores (4845)
 - floor coverings stores (4848)
 - furniture stores (4849)
 - domestic hardware stores, jewellers (4853, 4854)
 - electrical goods stores (4855, 4856)
 - grocers, confectioners, tobacconists (4881)
 - butchers (4882)
 - other food stores (4883, 4885, 4886)
 - liquor stores (4884)
 - pharmacies (4891)
 - newsagents (4894)
 - other stores (4892, 4893, 4895-4897)
- excludes the following retail trade businesses:
 - motor vehicle dealers, service stations, etc (4861-4868)
 - milk and bread vendors (4878-4879)
 - shoe repairers (4846)
 - electrical appliance repairers n.e.c. (4857)
- includes the following selected service businesses:
 - cafes and restaurants (9231)
 - hotels, etc (mainly drinking places) (9232)
 - licensed clubs (9241-9243)
 - hairdressers (9351,9352).
- excludes businesses which do not have employees.

DEFINITION OF TURNOVER

- 4** Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc).

INDUSTRY DESCRIPTION

- 5** The description of the industries for which statistics are published in this publication align with the titles given in ASIC, except for the following groupings:

- Other food stores: ASIC classes 4883, 4885, 4886
- Hotels, liquor stores, licensed clubs: ASIC classes 9232, 4884, 9241, 9242, 9243
- Clothing and fabrics stores: ASIC classes 4843, 4844, 4847
- Electrical goods stores: ASIC classes 4855, 4856
- Other stores: ASIC classes 4892, 4893, 4895, 4896, 4897, 9351, 9352

CONSTANT PRICE STATISTICS

- 6** To enable analysis of the movement of retail activity in 'real' terms, estimates of retail turnover at constant (average 1989-90) prices are compiled each quarter. Constant price retail turnover series are derived by deflating the original current price series of retail turnover by specially compiled indexes of price change.

RELIABILITY OF ESTIMATES

- 7** The two types of error possible in an estimate based on a sample survey are:
- Non sampling error* which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures. Where there is known non-sampling error — such as an approximate 1 to 2% non-response rate — it is considered that the effect is negligible.
- Sampling error* which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

STANDARD ERRORS

- 8** There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all in-scope units had been included, and about nineteen chances in twenty that the difference will be less than two standard errors.
- 9** Seasonally adjusted, trend and constant price estimates are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same percentage of the estimate as for the unadjusted series. For trend estimates, the standard errors are likely to be smaller. For constant price estimates, the standard errors may be up to 10 per cent higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.
- 10** The standard errors for some industries in some States are relatively high and users are advised to exercise caution in interpreting movements for such series. Users interested in obtaining the standard errors for any series or further information should contact the person shown in the Inquiries box on page 1 of this publication.

SEASONAL ADJUSTMENT

- 11** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.
- 12** In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). For total turnover for Australia, adjustment has also been made for the effects of change in the date of Easter and Australia Day holidays. Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes) and the seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.

TREND ESTIMATES

13 The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson-weighted moving average to the respective seasonally adjusted series. These trend series are used to analyse the underlying behaviour of the series over time.

14 While this smoothing technique enables estimates of trend to be produced for the latest month, it does result in revisions to the estimates for the most recent months as data for subsequent months become available. Generally subsequent revisions become smaller and after 3 months have a negligible impact on the series. For more information see *A Guide to Interpreting Time Series — Monitoring "Trends" — An Overview* (1348.0).

RELATED PUBLICATIONS

15 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

SYMBOLS AND OTHER USAGES

ASIC	Australian Standard Industrial Classification
r	revised

FOR MORE INFORMATION . . .

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below).

ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below).

BOOKSHOP AND SUBSCRIPTIONS

There are over 500 titles available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
