Oct 94	Oct 95	% change	
9 235.4	9 890.2	7.1	

OCTOBER KEY POINTS

TREND ESTIMATES

- The trend estimate of turnover for Retail and Hospitality and service industries increased by 0.3% in October 1995. This is the fifth consecutive month that growth has eased.
- Over the past three months the trend estimate has increased by \$136.0m. Of this amount, \$100.7m was attributable to the Food retailing group, \$18.7m to the Recreational good retailing group and \$17.7m to the Hospitality and services group. Department stores and the Household good retailing group recorded decreases.

TAKE CARE!
Trend estimates are revised as new monthly data become available.

INDUSTRY ANALYSIS

- The growth rate has eased across all industry groups.
- The Food, Clothing and soft good and Recreational good retailing groups are showing the strongest growth.
- Department stores and the Household good retailing group are in decline.
- The trend estimate for retail only industries, i.e. excluding the Hospitality and services group, has shown a growth pattern very similar to that for total Retail and Hospitality and service industries.

INQUIRIES

- For further information about these and related statistics, contact Bill Powell on 06 252 6132. For information about constant price estimates contact Leon Ting on 06 252 6807.

ORIGINAL ESTIMATES

- In original terms, Australian retail turnover increased by 6.6% in October 1995 compared to October 1994.
- Chains and other large retailers recorded growth of 5.6% for the same period while small retailers showed growth of 7.6%.

	November 1995	5 January 1996
	December 1995	2 February 1996
	January 1996	1 March 1996

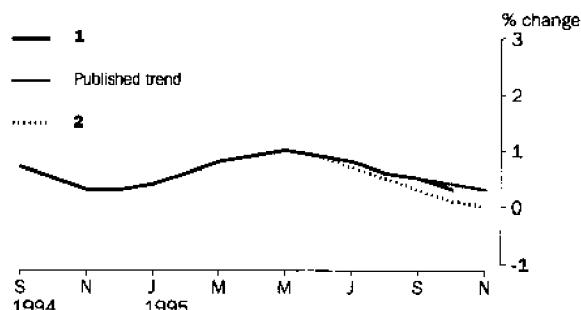

CHANGES IN THIS ISSUE	There are no changes in this issue.
-----------------------	-------------------------------------

SAMPLING ERRORS	Standard errors for the Australian estimates (original data) for October 1995 contained in this publication are:	
	DATA SERIES	ESTIMATE
	Level of retail turnover (\$m)	9 934.8
	Change from September to October (\$m)	330.9
	% change from September to October	3.4
	For more information see the Explanatory notes, paragraphs 12–15, or contact Bill Powell on 06 252 6132.	

WHAT IF? The most recent trend estimates published in this release are likely to be revised when next month's seasonally adjusted estimates become available. To assist readers of this publication in analysing retail trends, the effect of two possible scenarios on the previous trend estimates of the percentage change in retail turnover are presented below.

- 1 The November seasonally adjusted estimate of retail turnover is 1.0% higher than the October estimate.
- 2 The November seasonally adjusted estimate of retail turnover is 1.0% lower than the October estimate.

TAKE CARE!
Trend estimates are subject
to revision as subsequent
data becomes available.
See Explanatory note 9.

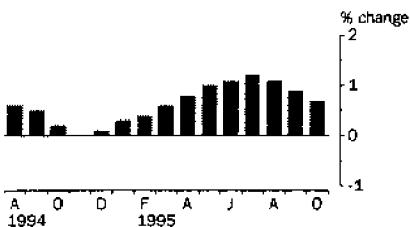

W. McLennan
Australian Statistician

STATE TRENDS

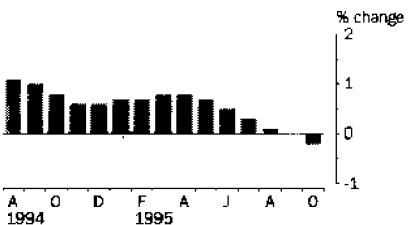

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

NEW SOUTH WALES

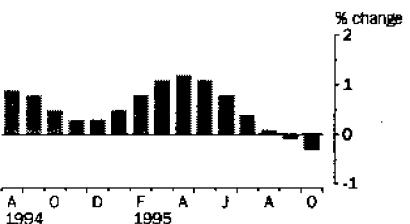

Following an increase of 1.2% in July the trend estimate growth rate has eased over the last three months. Department stores and Household good retailing groups are in decline.

VICTORIA

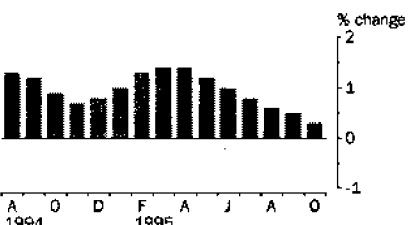

The growth rate has eased from a rise of 0.8% in April to a fall of 0.2% in October, due mainly to the decline in the Clothing, Other retailing and Hospitality and services groups.

QUEENSLAND

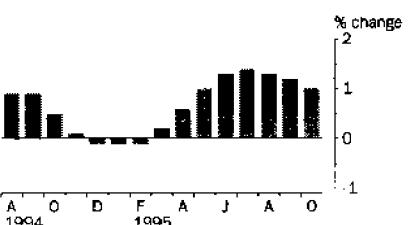

The trend estimate for Queensland has been in decline for the last two months. Growth rates are weak, or in decline for all industry groups.

SOUTH AUSTRALIA

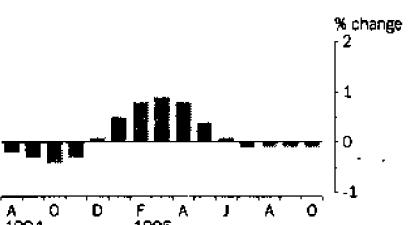

The South Australian trend estimate grew by 0.3% in October, continuing the easing of the growth rate since April 1995. Food, Recreational good and Other retailing show strong growth.

WESTERN AUSTRALIA

Over the last six months the trend estimate has shown strong growth. Apart from Department stores and the Clothing group, all industries are showing strong growth.

TASMANIA

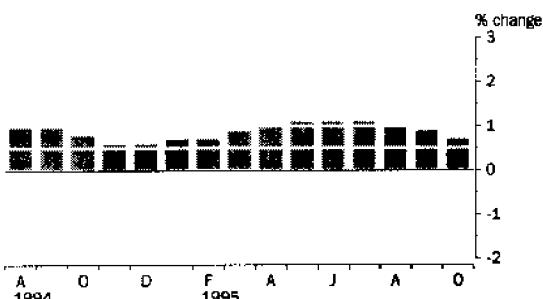

The Tasmanian trend estimate has shown falls of 0.1% for the last four months. Most industries are showing weak growth, while the Hospitality and services group is in decline.

INDUSTRY TRENDS

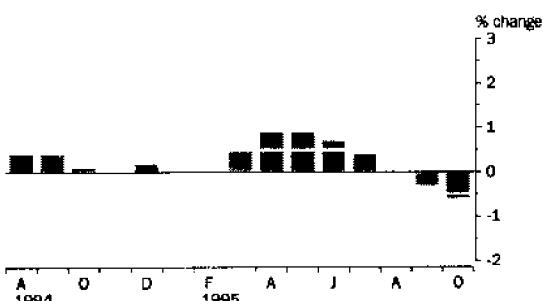

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

FOOD RETAILING

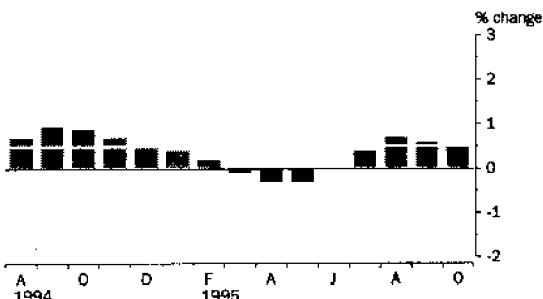

Although easing, the trend estimate growth rate remains relatively strong. Over the last three months New South Wales, South Australia and Western Australia have recorded the strongest growth.

DEPARTMENT STORES

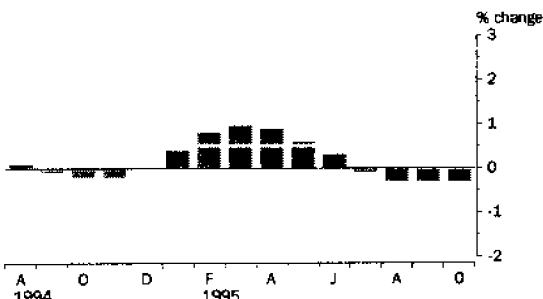

The Department stores trend estimate has declined in the last two months after a short period of strong growth between April and June 1995. All States have recorded decreases in the trend estimate during the last two months.

CLOTHING AND SOFT GOOD RETAILING

The Clothing and soft good retailing group has recorded average increases of about 0.5% over the last four months. Prior to this, the trend estimate was in decline. Growth has been strongest in New South Wales, Tasmania and the two Territories.

HOUSEHOLD GOOD RETAILING

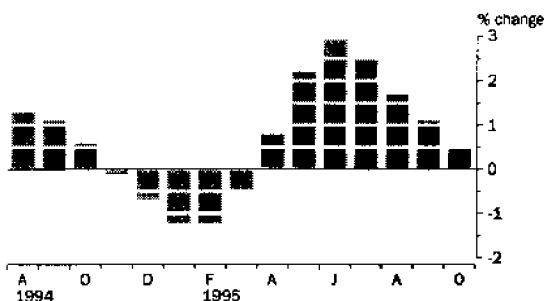

Following strong growth in March and April 1995 the trend estimate has been in decline since July. Across the States the trend estimate is either weak or in decline.

INDUSTRY TRENDS (continued)

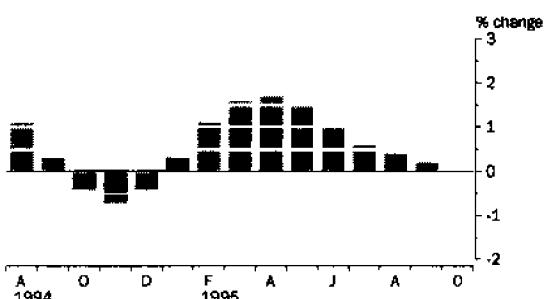

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

RECREATIONAL GOOD RETAILING

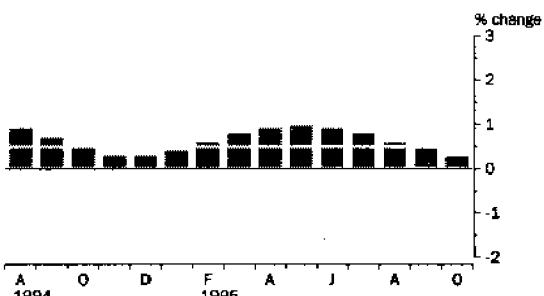

The very strong growth in the trend estimate for this industry has eased markedly in recent months to 0.5% in October. Whilst growth is strong in New South Wales, it is moderate in other States.

OTHER RETAILING

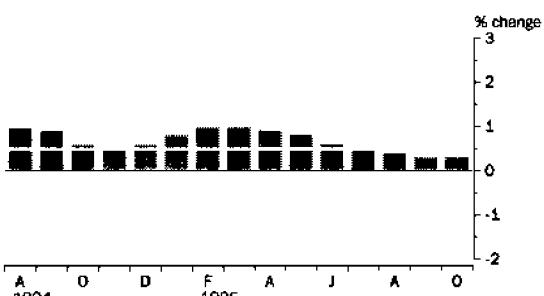

Growth in the trend estimate has fallen from 1.7% in April to zero in October. Growth over this period has been weakest in Victoria and Queensland.

TOTAL RETAIL (excluding Hospitality and Services)

Movements in the trend estimate for Retail (excluding Hospitality and services) has shown a similar pattern to that for Total industries (including Hospitality and services).

HOSPITALITY AND SERVICES

This group has recorded weak growth during the last three months following a period of relatively strong growth. Apart from New South Wales, all States are showing weak growth or are in decline.

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State. The principal objective of the Retail Trade survey is to show month to month movement of retail turnover.
- 2** Estimates of turnover contained in this publication are based on a survey of about 7,000 retail and selected service businesses (covering 20,000 outlets). All 'large' businesses are included in the survey, while a sample of about 4,400 'smaller' businesses is selected. The 'large' business' contribution of approximately 54 per cent of the total estimate ensures a highly reliable Australian total turnover estimate.

SCOPE AND COVERAGE

- 3** The Retail Trade survey covers all employing businesses, with at least one retail establishment. The scope of the survey (classified according to the Australian and New Zealand Standard Industrial Classification [ANZSIC]) is detailed below:

- Food Retailing
 - Supermarkets and grocery stores (5110)
 - and non-petrol sales of identified convenience stores of petrol stations
 - Takeaway food retailing (5125)
 - Other food retailing
 - Fresh meat, fish and poultry retailing (5121)
 - Fruit and vegetable retailing (5122)
 - Liquor retailing (5123)
 - Bread and cake retailing (5124)
 - Specialised food retailing n.e.c. (5129)
- Department Stores (5210)
- Clothing and Soft Good Retailing
 - Clothing retailing (5221)
 - Other clothing related retailing
 - Footwear retailing (5222)
 - Fabric and other soft good retailing (5223)
- Household Good Retailing
 - Furniture and floorcovering retailing
 - Furniture retailing (5231)
 - Floor covering retailing (5232)
 - Domestic hardware and houseware retailing (5233)
 - Domestic appliance retailing
 - Domestic appliance retailing (5234)
 - Recorded music retailing (5235)
- Recreational Good Retailing
 - Newspaper, book and stationery retailing (5243)
 - Other recreational good retailing
 - Sport and camping equipment retailing (5241)
 - Toy and game retailing (5242)
 - Photographic equipment retailing (5244)
- Other Retailing
 - Pharmaceutical, cosmetic and toiletry retailing (5251)
 - Other retailing
 - Antique and used good retailing (5252)
 - Garden supplies retailing (5253)
 - Flower retailing (5254)
 - Watch and jewellery retailing (5255)
 - Retailing n.e.c. (5259)

SCOPE AND COVERAGE (continued)	<ul style="list-style-type: none"> • Hospitality and Services <ul style="list-style-type: none"> Hotels and licensed clubs <ul style="list-style-type: none"> Pubs, taverns and bars (5720) Clubs (Hospitality) (5740) Cafes and restaurants (5730) Selected services <ul style="list-style-type: none"> Video hire outlets (9511) Hairdressing and beauty salons (9526)
DEFINITION OF TURNOVER	<p>4 Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc.) and net takings from gaming machines etc.</p>
SEASONAL ADJUSTMENT	<p>5 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.</p> <p>6 In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). There is some evidence suggesting possible changes in retail trading patterns, including increased activity on weekends and public holidays. The impact of these changes on the seasonal pattern and trading day component of the data is being investigated and can only be confirmed once sufficient data becomes available. While these changes may impact on the unadjusted and seasonally adjusted data, the trend estimate is less likely to be affected. Further, the seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes). The seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.</p> <p>7 The State component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the Australian Group totals.</p> <p>8 As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. For Retail Trade, the results of the latest review are shown in the July issue each year.</p>
TREND ESTIMATES	<p>9 The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The monthly trend estimates are derived by applying a 13-term Henderson-weighted moving average to the respective seasonally adjusted series. These trend series are used to analyse the underlying behaviour of the series over time. In the case of the quarterly constant price estimates a 7-term Henderson-weighted moving average is applied.</p> <p>10 For further information, see <i>A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview</i> (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.</p>
CONSTANT PRICE STATISTICS	<p>11 To enable analysis of the movement of retail activity in 'real' terms, estimates of retail turnover at constant (average 1989–90) prices are compiled and published each quarter. Constant price retail turnover series are derived by deflating the original current price series of retail turnover by specially compiled indexes of price change.</p>
RELIABILITY OF ESTIMATES	<p>12 There are two types of error possible in estimates of retail turnover:</p> <p><i>Sampling error</i> which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.</p>

RELIABILITY OF ESTIMATES
(continued)

Non sampling error which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

STANDARD ERRORS

13 Seasonally adjusted, trend and constant price estimates are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same as for the original estimates. For trend estimates, the standard errors are likely to be smaller. For constant price estimates, the standard errors may be up to 10 per cent higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.

14 To assist users in assessing the reliability of estimates, each data series has been given a grading of A to D. Where:

- A represents a relative standard error on level of less than 2 per cent. The published estimates are highly reliable for movement analysis;
- B represents a relative standard error on level between 2 and 5 per cent, meaning the estimate is reliable for movement analysis purposes;
- C represents a relative standard error on level between 5 and 10 per cent, meaning users are advised to exercise some caution in interpreting movements for such series; and
- D represents a relative standard error on level greater than 10 per cent (mainly affects unpublished state by industry series).

15 The table below provides an indicator of reliability for key retail turnover estimates.

	Food retailing	Department stores	Clothing and soft good retailing	Household good retailing	Recreational good retailing	Other retailing	Hospitality and services	Total

UNPUBLISHED DATA

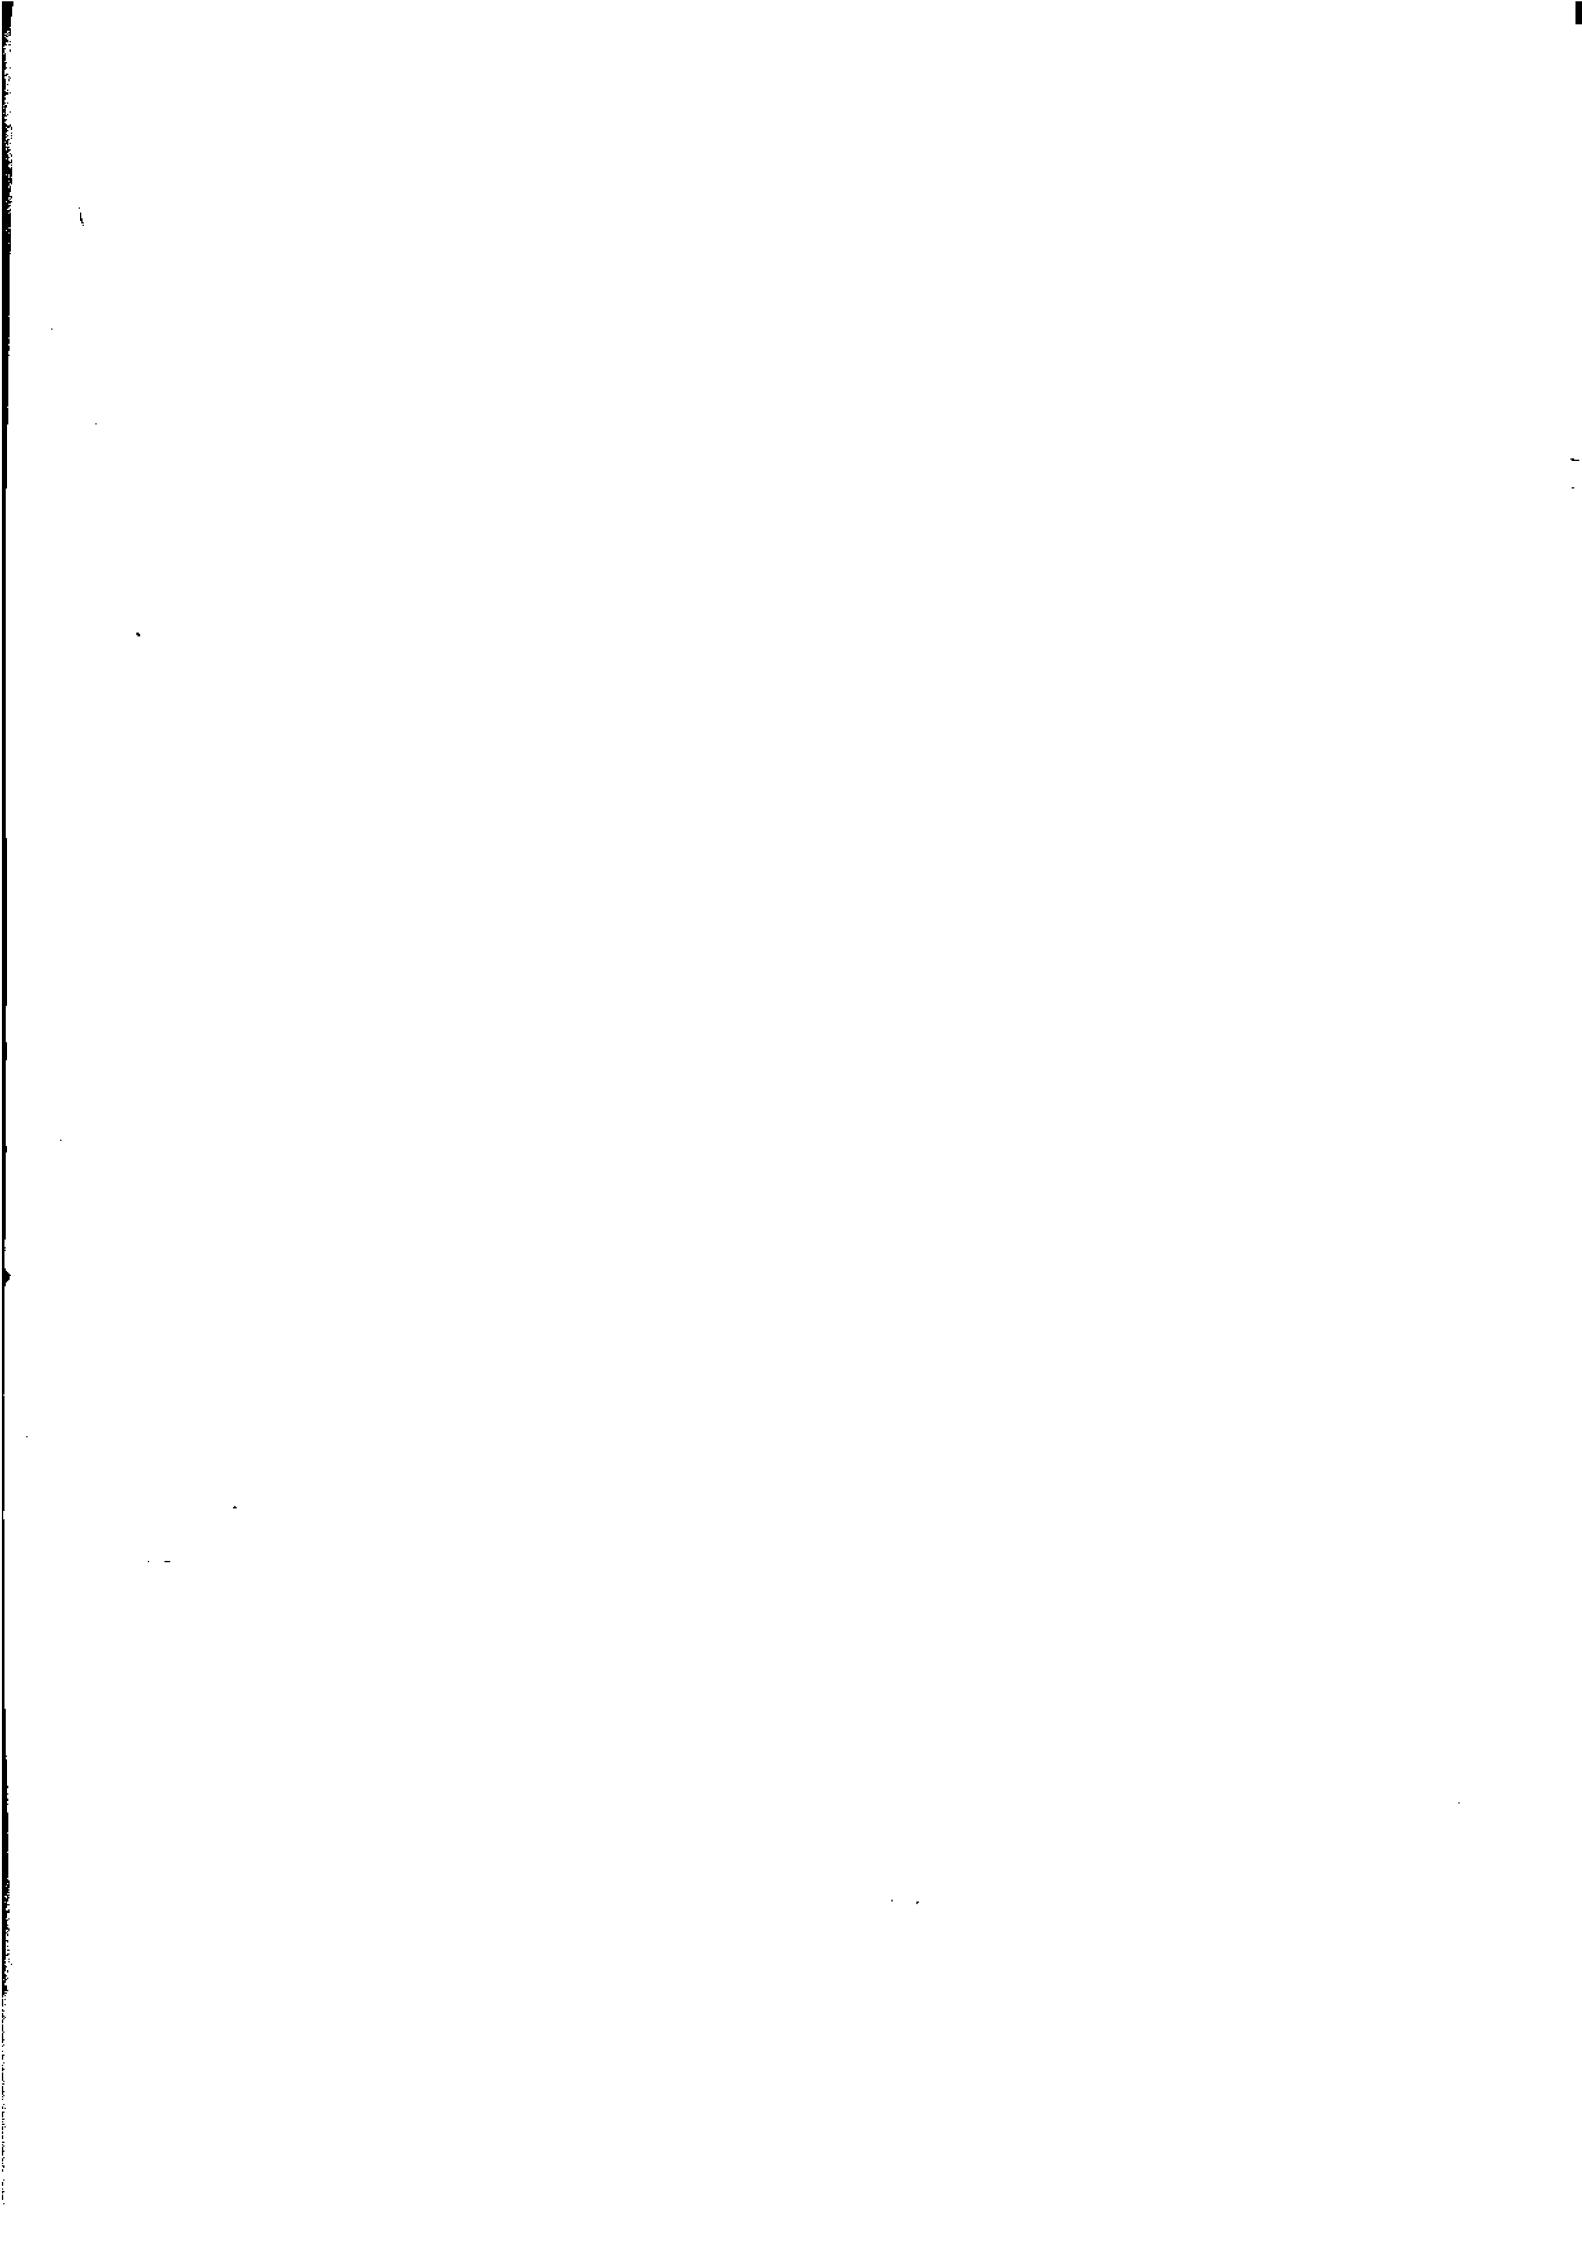

16 The Retail Survey Special Data Service provides additional retail trade statistics which include further State industry dissections through to 'top ten' industry reports. For more information, contact the Retail Trade Special Data Services manager on (06) 252 5220.

RELATED PUBLICATIONS

17 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

SYMBOLS AND OTHER USAGES

n.p. not available for publication, but included in totals
r revised

FOR MORE INFORMATION . . .

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service - you can telephone the ABS Subscription Service Australia wide toll free on 1800 0206 08.

ELECTRONIC SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:
