THIS MONTH'S KEY POINTS

TREND ESTIMATES

- The October estimates of retail turnover indicate a slight strengthening in the rate of growth.
- A growth rate of 0.2 or 0.3 per cent has been recorded for each of the last six months.
- The increase over the last year (October 1993 over October 1992) was 3.3 per cent.

TAKE CARE!
Trend estimates are revised as new monthly data become available.

INDUSTRY ANALYSIS

- Grocers have recorded moderate growth of around 0.5 per cent over each of the last three months.
- Growth in the Other food stores industry remains relatively strong but has weakened in recent months.
- Department stores have shown growth in September and October following a short period of decline.

STATE ANALYSIS

- The trend estimates of turnover show moderate growth for New South Wales.
- Tasmania has recorded the strongest growth with Queensland and South Australia also having strong growth.
- Victoria has shown no growth over the last two months.

SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted estimate rose by 0.8 per cent in October 1993 which follows a 0.9 per cent increase in September 1993.

RETAIL TRADE NOTES

FORTHCOMING ISSUES

ISSUE	RELEASE DATE
November 1993	7 January 1994
December 1993	7 February 1994
January 1994	3 March 1994

* * * * *

CHANGES IN THIS ISSUE

Turnover figures are at current prices unless specifically indicated otherwise. As usual, these figures exclude motor vehicle dealers, petrol stations, etc.

Current price data for Other stores in New South Wales, Hotels , clubs, etc, Cafes and restaurants and Other stores in Victoria, Floor coverings stores and Pharmacies in Queensland and Floor coverings stores in Western Australia for September 1993 have been revised in this issue.

* * * * *

SAMPLING ERRORS

Standard errors for estimates for October 1993 contained in this publication are:

DATA SERIES	STANDARD ERROR
Level of retail turnover	\$74 million
Change from September to October	\$23 million
% change from previous month	0.3%

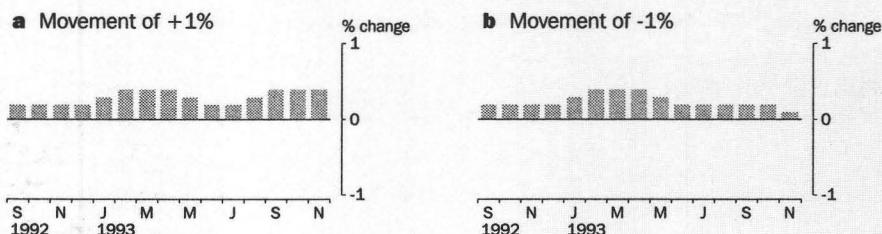

For more information see the Explanatory notes, paragraphs 8–10, or contact Bill Powell on 06 252 6132.

SENSITIVITY ANALYSIS

TAKE CARE
Trend estimates are subject
to revision as subsequent
data become available.
See Explanatory Note 14.

Readers should exercise care in the interpretation of the trend data as the last three observations, in particular, are likely to be revised with the addition of subsequent months' data. To illustrate this, graph 'a' below shows the effect a +1.0 per cent seasonally adjusted result in November 1993 will have on recent trend series movements. Graph 'b' shows what will happen if the November seasonally adjusted result is -1.0 per cent.

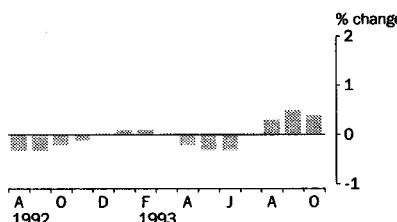

For readers information, November seasonally adjusted percentage changes over the last five years were -0.2 per cent in 1992, -0.3 per cent in 1991, 0.5 per cent in 1990, 1.0 per cent in 1989 and 0.8 per cent in 1988.

RICHARD MADDEN
DEPUTY AUSTRALIAN STATISTICIAN

STATE TRENDS

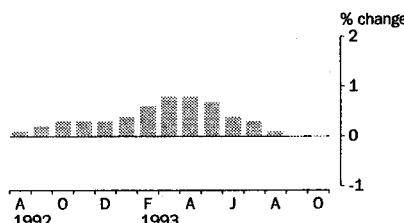

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

NEW SOUTH WALES

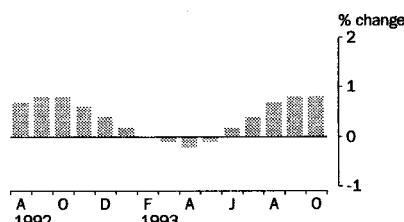

The trend estimates of turnover show moderate growth for New South Wales over the last three months. This follows a long period where growth was either weak or in decline.

VICTORIA

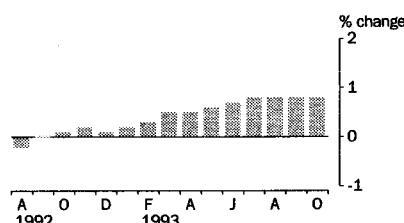

Victoria has recorded zero growth for both September and October 1993. The growth rate has fallen from a peak of 0.8 per cent in both March and April of this year.

QUEENSLAND

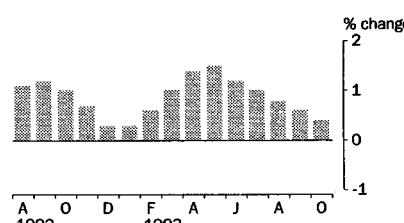

The recent improvement in the trend estimates for Queensland has continued with growth of around 0.8 per cent over each of the last three months.

SOUTH AUSTRALIA

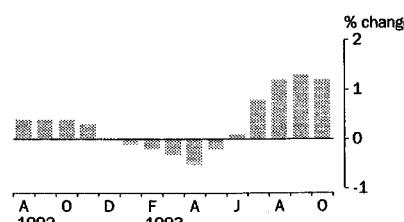

South Australia which was showing moderate growth in the early part of the year has shown strong growth over the last five months.

WESTERN AUSTRALIA

The very strong growth rate evident in Western Australia between March and July of this year has eased over the last three months.

TASMANIA

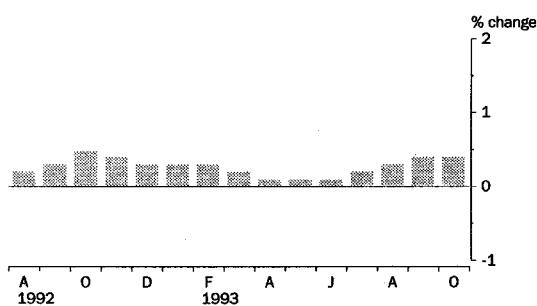

After going through a period of decline in the early months of 1993 the trend estimates show growth of over 1.0 per cent for each of the last three months.

INDUSTRY TRENDS

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

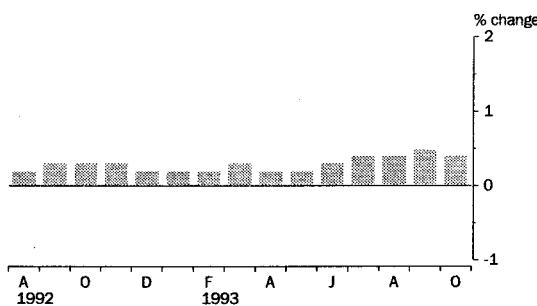

RETAIL INDUSTRIES

Total "Retail only" industries (excluding industries categorised to the Service industry grouping) have shown growth of between 0.3 and 0.4 per cent over each of the last three months which is slightly greater than the "all industries" growth rate.

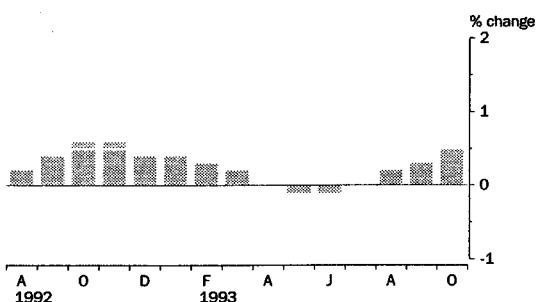

FOOD RETAILING

The improved growth in the trend estimates for this group is a direct result of the increased growth achieved by the Grocery industry. The growth rate for Other food stores has eased slightly while the rate of decline for Butchers has also eased.

NON-FOOD RETAILING

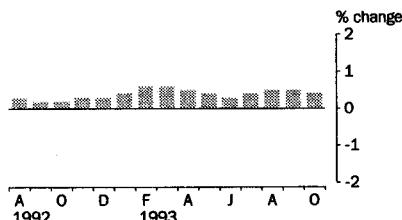

Non-food retailing , which is made up of the Household goods and Other industry groups, has shown steady improvement recently to record a growth rate of 0.5 per cent in October. This follows a period of decline or no growth from April to July 1993. Most industries in this category have shown some improvement over recent months.

INDUSTRY TRENDS (continued)

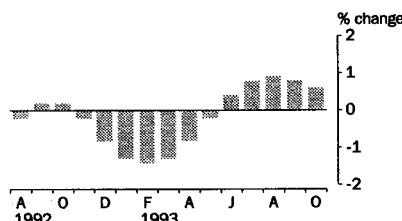

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

GROCERS

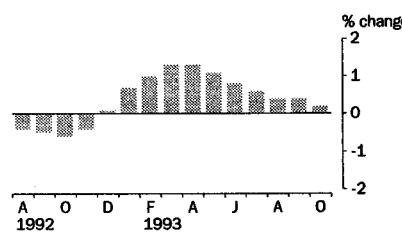

The trend estimates for the Grocery industry have shown moderate growth throughout 1993. There was a slight easing in the growth rate between March and June this year.

OTHER FOOD STORES

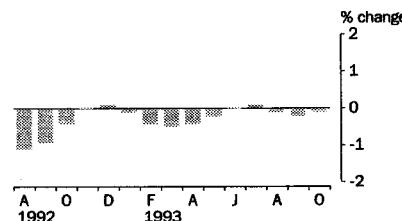

Growth in this industry is still quite strong. However there has been a weakening in the growth rate from 0.9 per cent in August 1993 to 0.6 per cent in October.

HOTELS, CLUBS ETC.

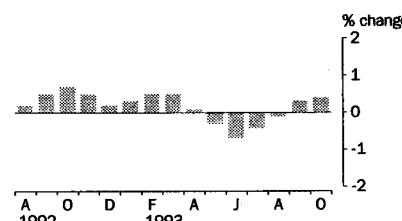

In both March and April 1993 Hotels, clubs, etc recorded growth of 1.3 per cent. Since then the growth rate has dropped each month to the 0.2 per cent recorded for October.

CLOTHING AND FABRIC STORES

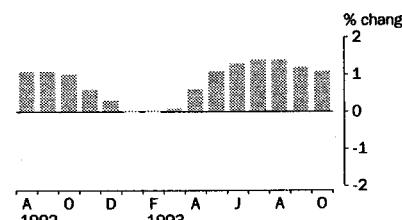

Clothing and fabric stores have either been in decline or showing very weak growth for each of the last fifteen months.

DEPARTMENT STORES

Department store trend estimates were in decline between May and August 1993. They have shown growth of 0.3 per cent in September and 0.4 per cent in October 1993.

ELECTRICAL GOODS STORES

One of the few industries to show strong growth over recent months, Electrical goods stores have recorded monthly increases of over 1.0 per cent since May 1993.

INTRODUCTION

1 This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State.

2 Estimates of turnover contained in this publication are based on a survey of 6,500 retail and selected service businesses (or over 19,000 outlets). All 'large' businesses are included in the survey, while a sample of 'smaller' businesses is selected. The 'large' businesses contribute approximately 50% of the total estimate.

SCOPE AND COVERAGE

3 The scope of the survey:

- includes the following retail trade businesses (Australian Standard Industrial Classification [ASIC]):

- department and general stores (4814, 4815)
- clothing and fabric stores (4843, 4844, 4847)
- footwear stores (4845)
- floor coverings stores (4848)
- furniture stores (4849)
- domestic hardware stores, jewellers (4853, 4854)
- electrical goods stores (4855, 4856)
- grocers, confectioners, tobacconists (4881)
- butchers (4882)
- other food stores (4883, 4885, 4886)
- liquor stores (4884)
- pharmacies (4891)
- newsagents (4894)
- other stores (4892, 4893, 4895-4897)

- excludes the following retail trade businesses:

- motor vehicle dealers, service stations, etc (4861-4868)
- milk and bread vendors (4878-4879)
- shoe repairers (4846)
- electrical appliance repairers n.e.c. (4857)

- includes the following selected service businesses:

- cafes and restaurants (9231)
- hotels, etc (mainly drinking places) (9232)
- licensed clubs (9241-9243)
- hairdressers (9351,9352).

- excludes businesses which do not have employees.

DEFINITION OF TURNOVER

4 Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc).

INDUSTRY DESCRIPTION

5 The description of the industries for which statistics are published in this publication align with the titles given in ASIC, except for the following groupings:

- Other food stores: ASIC classes 4883, 4885, 4886
- Hotels, liquor stores, licensed clubs: ASIC classes 9232, 4884, 9241,9242, 9243
- Clothing and fabrics stores: ASIC classes 4843, 4844, 4847
- Electrical goods stores: ASIC classes 4855, 4856
- Other stores: ASIC classes 4892, 4893, 4895, 4896, 4897, 9351, 9352

CONSTANT PRICE STATISTICS

6 To enable analysis of the movement of retail activity in 'real' terms, estimates of retail turnover at constant (average 1989-90) prices are compiled each quarter. Constant price retail turnover series are derived by deflating the original current price series of retail turnover by specially compiled indexes of price change.

RELIABILITY OF ESTIMATES

7 The two types of error possible in an estimate based on a sample survey are:

Non sampling error which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures. Where there is known non-sampling error — such as an approximate 1 to 2% non-response rate — it is considered that the effect is negligible.

Sampling error which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

STANDARD ERRORS

8 There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all in-scope units had been included, and about nineteen chances in twenty that the difference will be less than two standard errors.

9 Seasonally adjusted, trend and constant price estimates are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same percentage of the estimate as for the unadjusted series. For trend estimates, the standard errors are likely to be smaller. For constant price estimates, the standard errors may be up to 10 per cent higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.

10 The standard errors for some industries in some States are relatively high and users are advised to exercise caution in interpreting movements for such series. Users interested in obtaining the standard errors for any series or further information should contact the person shown in the Inquiries box on page 1 of this publication.

SEASONAL ADJUSTMENT

11 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.

12 In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). For total turnover for Australia, adjustment has also been made for the effects of change in the date of Easter and Australia Day holidays. Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes) and the seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.

TREND ESTIMATES

13 The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates are derived by applying a 13-term Henderson-weighted moving average to the respective seasonally adjusted series. These trend series are used to analyse the underlying behaviour of the series over time.

14 While this smoothing technique enables estimates of trend to be produced for the latest month, it does result in revisions to the estimates for the most recent months as data for subsequent months become available. Generally subsequent revisions become smaller and after 3 months have a negligible impact on the series. For more information see *A Guide to Interpreting Time Series — Monitoring "Trends" — An Overview* (1348.0).

RELATED PUBLICATIONS

15 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

SYMBOLS AND OTHER USAGES

n.p.	not available for publication, but included in totals
ASIC	Australian Standard Industrial Classification
r	revised

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICE

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below for contact details).

ELECTRONIC DATA SERVICES

A growing range of our data are available on electronic media. Selections of the most frequently requested data are available, updated daily, on Discovery (Key *656#). Our TELESTATS service delivers major economic indicator publications ready to download into your computer on the day of release. Our PC AUSSTATS service enables on-line access to a database of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on our electronic data services, contact Information Services in any of our offices (see below).

BOOKSHOP AND SUBSCRIPTIONS

There are over 500 titles available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
