## INTRODUCTION

This publication presents statistics for New South Wales obtained from the 1991-92 Retail and Services Census. It is one of a series of publications from that collection covering each State and Territory.

As well as providing details for New South Wales, final national aggregates are also presented in Appendix 1 of this publication. These aggregates represent final statistics for Australia, an update to the preliminary estimates previously released in *Retailing in Australia, 1991-92* (8613.0).

For the first time, this publication presents retail statistics where the units have been classified in accordance with the *Australian and New Zealand Standard Industrial Classification (ANZSIC)* (1292.0). This is detailed in paragraphs 14-18 of the Explanatory Notes. A concordance showing the relationship between the previous classification used (the Australian Standard Industrial Classification (ASIC)) and the ANZSIC is shown in Appendix 2.

For regional analysis of the retail industry the expressed user requirements were to include a grouping of shopfront businesses, irrespective of whether they were retailing goods or providing personal services. To best satisfy this requirement, locations have been totalled to a level referred to as "Total Shopfront Retailing". This group *excludes* motor vehicle retailing and services outlets, but *includes* some personal service outlets such as hairdressers and cafes and restaurants as well as the traditional retail businesses. Full details of this treatment are given in paragraphs 9 and 10 of the Explanatory Notes.

This publication provides some broad details relating to regional areas below the State level. A range of products providing more detailed statistics are now available through special data services which will provide products of a more specialised nature as well as outputs tailored to individual user needs. Further information about these products is provided at the end of this publication.

## SECTION 1. RETAILING IN NEW SOUTH WALES - AN OVERVIEW

### SHOPFRONT RETAILING

- At 30 June 1992 there were just over 58,950 Shopfront Retailing locations in New South Wales occupying over 11 million square metres of floorspace.
- During 1991-92 these 58,950 locations recorded turnover of just over \$33.1 billion, which represented \$5,583 per head of population. This was slightly higher than the national average of \$5,463.
- At 30 June 1992 there were just over 354,400 people employed in Shopfront Retailing locations which represented 14 per cent of New South Wales' total employment.
- The \$33.1 billion turnover by Shopfront Retailing represented \$93,440 per person employed, higher than the national average of \$90,843.
- In the 12 years since 1980 the number of Shopfront Retailing locations has increased about 26 per cent. The number of people employed in these businesses has increased about 37 per cent from the 258,661 recorded in 1980.
- \$16.2 billion was spent in Personal and Household Good Retailing outlets (ANZSIC Subdivision 52) in 1991-92 which represented about 49 per cent of total Shopfront Retailing turnover.
- Sydney Statistical Division contributed 61 per cent of the State's Shopfront Retailing locations (35,854), 65 per cent of turnover (\$21.7 billion) and 64 per cent of persons employed in retailing (226,193).

#### Regional Perspective

### MOTOR VEHICLE RETAILING AND SERVICES

- At 30 June 1992 there were 11,751 Motor Vehicle Retailing and Services locations operating in New South Wales. These locations employed 72,374 people and during 1991-92 recorded turnover of \$15.7 billion.
- In terms of turnover Car Retailing (ANZSIC Class 5311) was the largest class within the Subdivision with turnover of \$8.4 billion. This was also the largest employing class within the Subdivision with 18,042 persons employed. However in terms of locations the largest class was Automotive Repair and Services n.e.c. (ANZSIC Class 5329) with 4,203 locations.
- The \$15.7 billion turnover recorded in New South Wales by the Motor Vehicle Retailing and Services Subdivision represented \$216,659 per person employed, higher than the national average of \$203,040.

Over \$216,660 per  
person employed

TURNOVER PER PERSON EMPLOYED BY STATE AND TERRITORY;  
1991-1992

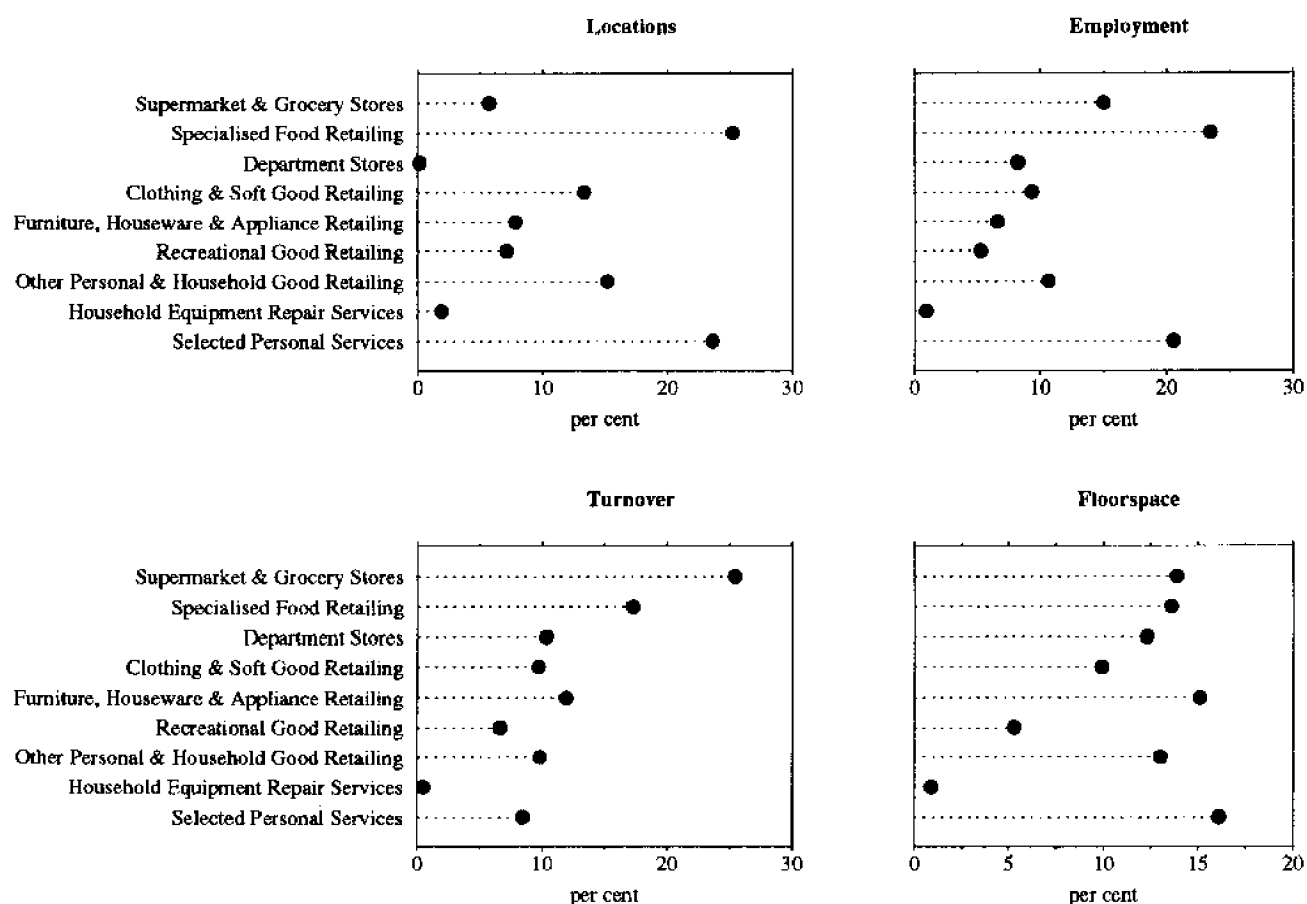

## SECTION 2. SHOPFRONT RETAILING - INDUSTRY ANALYSIS

Shopfront Retailing has been divided into nine industry groups. Eight of the groups are standard industry groups as defined in ANZSIC (see paragraph 14 of the Explanatory Notes), while the ninth is a grouping of related selected personal services industries. The groups included were:

Supermarket and Grocery Stores	– ANZSIC Group 511
Specialised Food Retailing	– ANZSIC Group 512
Department Stores	– ANZSIC Group 521
Clothing and Soft Good Retailing	– ANZSIC Group 522
Furniture, Houseware and Appliance Retailing	– ANZSIC Group 523
Recreational Good Retailing	– ANZSIC Group 524
Other Personal and Household Good Retailing	– ANZSIC Group 525
Household Equipment Repair Services	– ANZSIC Group 526
Selected Personal Services	– ANZSIC Classes 5730, 8632, 9511, 9521, 9522 and 9526.

CHART 2. SHOPFRONT RETAILING: DISTRIBUTION OF KEY MEASURES BY INDUSTRY GROUP, NEW SOUTH WALES, 1991-92

### Supermarket and Grocery Stores turnover \$8,427 million

- The largest of these groups in terms of turnover was the Supermarket and Grocery Stores Group with 3,343 locations recording \$8.4 billion in turnover. At 30 June 1992 this group employed 53,010 people which was 15 per cent of the total number of people employed in Shopfront Retailing.
- The Specialised Food Retailing Group had 14,852 locations operating at 30 June 1992, employed 83,422 people (23 per cent of the total) and recorded turnover of \$5.7 billion. The principal class in this group was Takeaway Food Retailing (ANZSIC Class 5125) in which 6,242 locations employed 43,688 persons and recorded turnover of \$1.7 billion.
- In the Selected Personal Services Group there were 13,902 locations operating at 30 June 1992. These businesses employed 72,834 people (20 per cent of the Shopfront Retailing total) and recorded \$2.8 billion in turnover. The principal class in this group was Cafes and Restaurants with employment of 44,465 and turnover of \$1.7 billion.

### Performance Measures

Two useful performance measures for retailing are the ratios between turnover and employment and turnover and floorspace. These measures indicate that:

- The Furniture, Houseware and Appliance Retailing Group performed best on a turnover to employment basis, recording \$168,515 per person employed, while turnover per square metre of floorspace for this industry was one of the lowest with only \$2,328 per square metre.
- Supermarket and Grocery Stores had both a high turnover to employment ratio recording \$158,968 per person employed and a high \$5,368 turnover per square metre of floorspace.
- Hairdressing and Beauty Salons recorded the lowest turnover per person employed with \$26,961.

(a) Shopfront Retailing includes retail and retail related personal services. Businesses without shopfronts are excluded, see paragraphs 3-10 of the Explanatory Notes.

(b) Includes only part of this ANZSIC Class: excl. are businesses mainly involved in testing sight, diagnosing sight defects or in prescribing spectacles or contact lenses.

### SECTION 3. EMPLOYMENT IN SHOPFRONT RETAILING

**37 per cent increase since 1980**

- The 354,406 people employed in Shopfront Retailing at 30 June 1992 represented 14 per cent of employed persons in New South Wales, and was a 37 per cent increase over the 258,661 people recorded in these industries in June 1980. This increase was due to an estimated 77 per cent increase in part time employment and a 15 per cent increase in full time employment.
- Over the same twelve year period, the total number of persons employed in New South Wales increased only 17 per cent despite part time employment increasing 74 per cent.
- There were 216,119 females employed in Shopfront Retailing representing 61 per cent of the total employment of the sector and 20 per cent of all employed females in New South Wales. The 138,287 males in the sector represented 9 per cent of all employed males.

#### Employment Status

- Of the 354,406 people employed in Shopfront Retailing 190,929 (54 per cent) were working full time.
- The majority of males (66 per cent) employed in Shopfront Retailing worked full-time, while most females (54 per cent) worked part-time.
- Department Stores and Supermarket and Grocery Stores were the only groups where the number of part-time employees outnumbered full-time employment.
- The major employing industry group was Specialised Food Retailing with 83,422 people (23 per cent of the total). Within this group the major industry class was Takeaway Food Retailing (ANZSIC Class 5125) with 43,688 persons employed, of which 61 per cent worked part time.
- The other major employing industry group was the Selected Personal Services Group with 72,834 employed persons. Within this group the major industry class was Cafes and Restaurants (ANZSIC Class 5730) employing 44,465 persons, of which 23,069 (52 per cent) were working part time.

(a) Shopfront Retailing includes retail and retail related personal services. Businesses without shopfronts are excluded, see paragraphs 3-10 of the Explanatory Notes.

(b) Includes only part of this ANZSIC Class: excl. are businesses mainly involved in testing sight, diagnosing sight defects or in prescribing spectacles or contact lenses.

## SECTION 4. 1985-86 RETAIL CENSUS COMPARISONS

This Section provides comparisons with the 1985-86 Retail Census where it is considered feasible (see paragraphs 19-20 of the Explanatory Notes). To enable comparisons to be made without the effects of price changes, turnover statistics for the two periods have been adjusted to a constant price basis before the percentage changes were calculated.

The comparisons relate to the Food Retailing (ANZSIC Subdivision 51) and Personal and Household Good Retailing (ANZSIC Subdivision 52) categories. The Household Equipment Repair Services (ANZSIC Group 526) were not included in the 1985-86 census and these data have been excluded from comparisons made at the ANZSIC Subdivision 52 level. However, the contribution of this group is negligible with 1991-92 results indicating that the 1,106 locations involved recorded turnover of only \$178 million (just over 1 per cent of the total for the Subdivision).

- Most classes within the two Subdivisions showed strong growth in turnover over the six year period 1985-86 to 1991-92. The Food Retailing and Personal and Household Good Retailing Subdivisions recorded increases of 16 and 14 per cent respectively in constant price terms.
- Looking at other measures, the number of locations in Personal and Household Good Retailing increased 9 per cent and employment increased 34 per cent, while Food Retailing recorded a 4 per cent decrease in locations and a 22 per cent increase in employment.
- Furniture, Houseware and Appliance Retailing showed an increase on all measures recording a 7 per cent increase in locations, a 24 per cent increase in employment and a 33 per cent increase in turnover.
- Supermarket and Grocery Store locations decreased 16 per cent over the six year period, while turnover increased 19 per cent and employment 10 per cent.
- Department Stores recorded a decrease on all measures. The number of locations decreased by 3 per cent while both employment and turnover went down by 14 per cent over the six year period. The decline in Department Stores in New South Wales was greater than the national average for both employment (10 per cent) and turnover (6 per cent).

(a) 1985-86 floorspace data not available for Marine Equipment Retailing, therefore floorspace comparisons are not available. (b) Floorspace comparisons exclude Marine Equipment Retailing. (c) Comparisons for ANZSIC Subdivision 52 exclude data for ANZSIC Group 526 as similar data for 1985-86 are not available.

## SECTION 5. STATE COMPARISONS

The key measures, number of locations, persons employed, and turnover were distributed in similar proportions across the six States and two Territories.

### Turnover per person employed

Using the performance measure turnover per person employed, New South Wales with \$93,440 recorded the third highest rate behind the Northern Territory (\$103,483) and the Australian Capital Territory (\$96,049). This was higher than the national average of \$90,843. Queensland with \$87,709 per person employed recorded the lowest rate for any State or Territory.

**CHART 6. SHOPFRONT RETAILING:  
TURNOVER PER PERSON EMPLOYED BY STATE  
1991-92**

### Turnover per head of population

In terms of turnover per head of population New South Wales recorded an average of \$5,583, slightly above the national average of \$5,463. Western Australia and the two Territories recorded higher averages.

**TABLE 4. SHOPFRONT RETAILING: TURNOVER PER HEAD OF POPULATION 1991-92**

(a) Includes retail related personal services, see paragraph 3 of the Explanatory Notes. (b) Shopfront Retailing includes retail and retail related personal services. Businesses without shopfronts are excluded, see paragraphs 3-10 of the Explanatory Notes.

## SECTION 6. REGIONAL DATA

This section provides details of Shopfront Retailing for geographic areas in New South Wales, as defined by the Australian Standard Geographical Classification (see paragraph 26 of the Explanatory Notes). New South Wales is divided into thirteen Statistical Divisions (SDs):

Sydney (SD)  
 Hunter (SD)  
 Illawarra (SD)  
 Richmond-Tweed (SD)  
 Mid-North Coast (SD)  
 Northern (SD)  
 North Western (SD)  
 Central West (SD)  
 South Eastern (SD)  
 Murrumbidgee (SD)  
 Murray (SD)  
 Far West (SD)  
 Off - Shore Areas and Migratory

However, data were not collected from the Off - Shore Areas and Migratory SD as retail activity in this SD was known to be insignificant. Each SD is divided into a number of Statistical Subdivisions (SSDs) and each of these into Statistical Local Areas (SLAs) as shown in Table 6.

### Summary of findings

- The Sydney Statistical Division was the largest Statistical Division in New South Wales with 35,854 locations and turnover of \$21.7 billion. This represented 61 per cent of the State's total Shopfront Retailing turnover.
- Within the Sydney SD, the principal Statistical Local Area was Sydney Inner with 2,071 locations recording almost \$1.8 billion in turnover.
- Outside of Sydney, the two major retailing Statistical Divisions were the Hunter SD with 4,970 locations recording turnover of \$2.8 billion and Illawarra SD with 3,545 locations recording turnover of \$1.8 billion.
- In terms of turnover per person employed the Sydney Statistical Division recorded the highest with \$95,930 per person employed. This was followed by Illawarra (\$93,413) and Murrumbidgee (\$90,507) Statistical Divisions. The State average for New South Wales was \$93,440. Richmond-Tweed Statistical Division recorded the lowest turnover per person employed with \$84,796.

## EXPLANATORY NOTES

### Introduction

The 1991-92 Retail Census was the tenth census of the retail industry since 1948. The strategy adopted for the 1991-92 collection was different from recent censuses in that the data were collected through two independent surveys:

- (i) a census of locations or shops, known as the Retail and Services Census, where a limited range of data was collected from every in-scope retail location in Australia; and
- (ii) a sample survey of retail businesses, known as the Retail Activity Survey, providing estimates relating to business structure and performance as well as commodity sales information.

2. This publication contains data derived from the Retail and Services Census and is one of a series of State and Territory publications prepared from that collection. As well as State and Territory details, this publication also presents final Australian estimates (see Appendix 1) previously released as preliminary in *Retailing in Australia 1991-92*, Catalogue No. 8613.0.

### Scope of the Retail and Services Census

3. The scope of the Census included all shopfront locations operating at 30 June 1992 and classified to Division G (Retail Trade) of the 1993 edition of the Australian and New Zealand Standard Industrial Classification (ANZSIC - see paragraph 14). Also, a range of services (classified to other Divisions of ANZSIC) which predominantly operate from shopfront locations were included because of their association with retailing activity. These outlets have been grouped under the heading "Selected Personal Services" and include:

ANZSIC Class 5730 – Cafes and Restaurants  
 8632 – Optometry and Optical Dispensing  
 9511 – Video Hire Outlets  
 9521 – Laundries and Dry-Cleaners  
 9522 – Photographic Film Processing  
 9526 – Hairdressing and Beauty Salons.

4. Within certain types of retail and services activity, non-shopfront locations (classified to in-scope ANZSIC Classes) were excluded from the scope of the census. Examples of these types of locations include industrial canteens, central photo processors and commercial laundries.

5. The scope of the Census excluded home based businesses, door to door sellers, direct marketers and retail locations operating from non-fixed premises such as occasional market stalls or vans.

6. The ANZSIC classes most affected by these exclusions are as follows:

*ANZSIC Class 5126 Milk Vending.* The whole of the Class has been excluded.

*ANZSIC Class 5269 Household Equipment Repair Services nec.* A number of businesses in this Class operating within other businesses or from home have been excluded.

*ANZSIC Class 5730 Cafes and Restaurants.* Most catering businesses were excluded because they do not operate from a shopfront location. Office and industrial canteens operating from within office blocks and other buildings were also excluded.

*ANZSIC Class 8632 Optometry and Optical Dispensing.* Only those locations mainly engaged in dispensing contact lenses and spectacles have been included. Those locations mainly engaged in optometry have been excluded.

*ANZSIC Class 9522 Photographic Film Processing.* Only those locations providing photographic film processing services from shopfronts have been included. These are mainly mini-labs and agencies in shopping areas.

**Coverage**

7. The aim of the Retail and Services Census was to include all shopfront locations classified to the in-scope industries (see paragraph 3) that were operating at 30 June 1992. Businesses which ceased operations during the year July 1991 to June 1992 were excluded.

8. The population was formed primarily from a listing of retail locations provided on contract from Australia Post. This population was supplemented after checking against the ABS Business Register. Based on a range of quality checks, it is estimated that overall about 2-5% of the businesses in the scope of the Census and operating at 30 June 1992 were not listed. These businesses are generally small, and most likely non-employers. It is considered that the contribution of these businesses to aggregates such as turnover and wages and salaries was negligible.

**Presentation of statistics in this publication**

9. Data in this publication have been presented in a format consistent with expressed user requirements for the grouping of shopfront businesses, irrespective of whether they are retailing goods or providing personal services.

10. For the purposes of this publication ANZSIC Sub-division 51 (Food Retailing), ANZSIC Subdivision 52 (Personal and Household Good Retailing) and the Selected Personal Services (ANZSIC Classes 5730, 8632, 9511, 9521, 9522 and 9526) noted above (see paragraph 3) have been totalled to a level referred to in this publication as "Total Shopfront Retailing". Details for ANZSIC Sub-division 53 (Motor Vehicle Retailing and Services) have been grouped and totalled separately.

**Statistical unit**

11. The business unit about which information is collected and published in relation to the Retail and Services Census is the Location. A Location consists of a single physical site from which a business engages in productive activity on a relatively permanent basis.

12. In the retail industry there are a number of businesses which operate independently within other retail locations. These businesses are generally referred to as "concessions" and do not have a separate shopfront. However, for the purposes of this collection concessions have been treated as a separate location.

**Census disclosure rules**

13. In accordance with the Census and Statistics Act 1905, under which the information in this publication was collected, no data are published that would disclose the operations of an individual location or business. For this reason a number of data items have been aggregated, or the data are not available for publication, but are included in totals where applicable.

**Industry classification**

14. In previous Retail Censuses, units have been classified in accordance with the principles and methods described in the 1983 edition of the Australian Standard Industrial Classification (ASIC), Catalogue No. 1201.0. In this Retail and Services Census, retail locations have been classified in accordance with the Australian and New Zealand Standard Industrial Classification, Catalogue No. 1292.0. A concordance showing the relationship between the two classifications is shown in Appendix 2 of this publication.

15. This new classification, which was developed in conjunction with the New Zealand Department of Statistics to replace the ASIC, will become the standard classification for the production and analysis of industry statistics in both countries.

16. Each Class within the ANZSIC is defined in terms of a specified range of activities designated as primary to it. A location mainly engaged in activities which have been designated as primary to a particular class has been classified to that class regardless of any other secondary activities in which it might be engaged.

17. For example, a location mainly engaged in retailing clothing is classified to ANZSIC class 5221 (Clothing Retailing) even if it also has significant sales in footwear.

18. In the Retail and Services Census, retailers were asked to choose from a list, the category they considered best described their activity. This information was used to code each location to the appropriate ANZSIC class.

<b>Comparison with the 1985-86 Retail Census</b>	<p>19. Direct comparisons with the 1985-86 Census are not possible mainly because of differences in scope and coverage and because a revised industry classification was used. However, to facilitate comparison, Section 4 in this publication provides percentage changes from 1985-86 where it is considered feasible for New South Wales, while comparisons at the Australian level are provided in Table 3 of Appendix 1.</p>
<b>Constant price estimates</b>	<p>20. To enable comparisons to be made without the effects of price changes between 1986 and 1992, turnover statistics for the two periods have been adjusted to a constant price (average 1989-1990 prices) basis before the percentage changes are calculated.</p> <p>21. The constant price estimates used in the comparison tables to enable the calculation of percentage changes in turnover have been derived by adjusting both the 1985-86 and the 1991-92 turnover estimates to average 1989-90 prices. These estimates have been derived using specially compiled indexes of price change.</p>
<b>Reliability of data</b>	<p>22. Because the location census does not have a sample component, the estimates are not subject to sampling variability.</p> <p>23. However, other inaccuracies collectively referred to as non-sampling error may affect the estimates. These non-sampling errors may arise from a number of sources, including:</p> <ul style="list-style-type: none"> <li>• the inability to identify all in-scope locations</li> <li>• errors in the reporting of data by respondents</li> <li>• errors in the capturing or processing of data</li> <li>• the estimation for missing or mis-reported data</li> <li>• definition and classification errors</li> </ul> <p>24. Every effort has been made to reduce non-sampling error to a minimum by the use of well designed collection forms, and the use of efficient operating procedures and systems.</p>
<b>Definitions</b>	<p>25. The information shown in the tables relates to the 1991-92 operations of those locations operating at 30 June 1992.</p> <p><i>Locations at 30 June.</i> The number of in-scope locations in operation at 30 June 1992.</p> <p><i>Persons employed at 30 June.</i> Includes proprietors and partners working on a full or part-time basis, permanent, part-time, temporary and casual employees and managerial and executive employees working for a business during the last pay period ending in June 1992. Unpaid helpers are excluded. Part time employees are those who work less than 35 hours per week.</p> <p><i>Wages and salaries.</i> Gross earnings of all employees, before taxation and other deductions. Drawings of working proprietors and partners of unincorporated businesses are excluded.</p> <p><i>Turnover.</i> Sales of goods (retail and wholesale) and takings from services provided or hiring of goods.</p> <p><i>Floorspace.</i> Total floor area occupied by locations (whether rented, leased or owner occupied) including office space, storage space, selling space, basements and upper floors. Note that this item was not collected for the Motor Vehicle Retailing and Services industries (ANZSIC Subdivision 53).</p>
<b>Statistical areas of New South Wales</b>	<p>26. The statistical area framework used in this publication is provided by the Australian Standard Geographic Classification (ASGC) Catalogue No. 1216.0 Edition 2.1, effective 1 January 1991. Statistics are presented for State/Territory, Statistical Divisions, Statistical Sub-divisions and Statistical Local Areas.</p>

*Statistical Local Areas (SLAs).* are the smallest spatial units in the ASGC for which Retail Census data are published. SLAs equate mainly with Local Government Areas (LGAs) in New South Wales, however, some LGAs have been split for statistical purposes and may consist of two or more SLAs.

*Statistical Subdivisions (SSDs).* This is the intermediate level of the ASGC framework. SSDs consist of one or more SLAs.

*Statistical Divisions (SDs).* New South Wales is divided into thirteen SDs: Sydney; Hunter; Illawarra; Richmond-Tweed; Mid-North Coast; Northern; North Western; Central West; South Eastern; Murrumbidgee; Murray; Far West and Off-Shore Areas and Migratory. Each SD is composed of a number of contiguous SLAs. Only data for the first twelve SDs are published (see Section 6 - Regional Data).

## Other publications

27. Users may also wish to refer to the following Retail Census publications which will be released over the next few months.

*Retailing in Victoria 1991-92, Retailing in Queensland 1991-92, etc for each State and Territory (8623.1 to 8623.8)*

Contain industry data for respective States and Territories equivalent to the statistics included in this publication.

*Retail Industry Australia: (8622.0).*

Contains detailed performance data, including, income and expenditure, net profit and gross product for the Retail Industry. These data are classified by ANZSIC Class and State as well as some details by business size.

*Retail Industry: Commodity Sales Australia 1991-92 (8624.0)*

Contains details of retail sales by commodity item by Industry and States and Territories.

## Availability of unpublished data

28. As well as the statistics included in this and subsequent publications, the ABS has an extensive range of more detailed data from the Retail and Services Census. These more detailed statistics will be made available through special data services which will provide products of a more specialised nature as well as outputs tailored to individual user needs. (See page 4)

29. In addition to the industries described in paragraphs 3-7 of these notes the 1991-92 Retail and Services Census also included four additional Service Industry Classes:

ANZSIC Class    5720 - Pubs, Taverns and Bars  
                      5740 - Clubs (Hospitality)  
                      6641 - Travel Agency Services  
                      7720 - Real Estate Agents.

Details for these Classes have not been included in this publication, but data may be made available on request.

30. Inquiries regarding unpublished data can be made by contacting Karen Lynch (phone (06) 252 5728) or by writing to The Director, Retail and Wholesale Section, Australian Bureau of Statistics, P.O. Box 10, Belconnen, A.C.T. 2616.

## Symbols and other usages

31. The following symbols, where used mean:

n.a not available  
 n.p. not available for separate publication, but included in totals where applicable  
 . . . represents an amount less than half the unit shown.

Where figure have been rounded, discrepancies may occur between the sum of component items and the total.

(a) 1985-86 floorspace data not available for Marine Equipment Retailing, therefore floorspace comparisons are not available. (b) Floorspace comparisons exclude Marine Equipment Retailing. (c) Comparisons for ANZSIC Subdivision 52 exclude data for ANZSIC Group 526 as similar data for 1985-86 are not available.

## APPENDIX 2

Below is a concordance showing the relationship between the Australian and New Zealand Standard Industrial Classification (ANZSIC) and the Australian Standard Industrial Classification (ASIC) which it replaces (see paragraph 13 of the Explanatory Notes). The concordance is formatted with the reference classification (ANZSIC) on the left, and the ASIC categories with which they align. A 'p' after the code indicates that only part of the ASIC category matches the ANZSIC reference category.

Statistical Local Area \_\_\_\_\_  
Statistical Division \_\_\_\_\_

# 1991 Census – Enlargement 1, Statistical Divisions and Statistical Local Areas, Sydney and Outer Region

## **MORE DETAILED INFORMATION FROM THE RETAIL AND SERVICES CENSUS**

This publication, along with others in the series (see Explanatory Notes paragraph 27), provides a broad analysis of the retail industry for 1991-92. The ABS also has an extensive range of more detailed data available from the Retail and Services Census. These more detailed statistics are available through a range of special data service products. Some data are available as standard off-the-shelf products, while information of a more specialised nature can be tailored to an individual's particular needs.

### **Standard products**

Standard products include reports covering one selected Statistical Local Area (SLA) (or a number of selected areas), through to reports covering a complete State or Territory with details down to the SLA level. These reports will provide details of Number of locations, Employment, Wages and salaries, Turnover and Floorspace classified by shop-type.

Also available are reports covering selected shopping areas. Again reports are available for an individual shopping area or for all defined areas in a particular State or Territory.

These reports are available in hardcopy form or as spreadsheets to suit your computing environment.

### **Software supported electronic products**

As well as in spreadsheet form, the 1991-92 Retail Census output will also be available via products which include sophisticated supporting software to enable users to tabulate, graph or map data to suit their individual requirements. These products will be available covering one State or Territory or for the whole of Australia.

### **Customised data services**

If your requirements cannot be satisfied by our range of standard products or electronic products, you may require a customised product tailored to suit your individual needs. It is likely the ABS can provide the retail statistics you need in the format you prefer; we can investigate your requirements and advise you of the costs and timing involved in providing your output.

### **How do you obtain more Retail statistics?**

Contact your nearest ABS Office - see details on the following page.

## *For more information ...*

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

### **Information Consultancy Service**

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

### **National *Dial-a-Statistic* Line**

0055 86 400

(Steadycom P/L: premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

### **Electronic Data Services**

Selections of most frequently requested statistics are available, updated daily, on DISCOVERY (Key \*656#). For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

### **Bookshops and Subscriptions**

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
