(a) A review of the occupancy of individual caravan parks resulted in reclassification in September quarter 1993 of a net 57 caravan parks from predominantly short-term to predominantly long-term. (b) From September quarter 1992, caravan park sites, etc. permanently reserved but only casually occupied by their tenants have been recorded continuously as site nights occupied irrespective of whether the tenants of individual sites were in residence on any particular night. See Explanatory Notes 11 and 14. Occupancy measures from September quarter 1992 are therefore not comparable with those from previous quarters.

(a) Statistical Local Areas are not shown separately in this table when data for them are confidential or nil. Data for these are aggregated and shown as the Balance of the particular Statistical Division. (b) Snow field resorts are included continuously as capacity (potentially) available irrespective of any off-season closures. The average occupancy rates of establishments in Snowy River (S) actually remaining open during the snow fields off season, therefore, are significantly higher than the overall rates published.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains data for New South Wales from a quarterly survey of tourist accommodation establishments. The period covered by the latest survey is the 3 months ended 31 March 1994.

SCOPE

2 Tourist accommodation establishments currently included in the survey comprise two groups:

- Establishments which provide predominantly short-term accommodation (i.e. for periods of less than 2 months) to the general public. These include:

Hotels, motels and guest houses, with facilities being hotels licensed to operate a public bar and motels, private hotels and guest houses all of which provide a bath (or shower) and toilet in most guest rooms and have breakfast available for guests.

NOTE: From December quarter 1993, hotel, motel and guest house establishments with fewer than five rooms have been formally excluded from the scope of this statistical collection. This change in scope resulted in the exclusion of 20 establishments which in the September quarter 1993 Survey aggregates for New South Wales represented 1.1 per cent of hotel, motel and guest house establishments but accounted for only 0.1 per cent of accommodation capacity, occupancy and takings.

Holiday flats, units and houses (excluding establishments predominantly operated on a time share basis) which are operated by owners or managers who have sole letting rights to at least five flats, units or houses or by real estate agents for short-term letting. They are mainly self-contained in terms of cooking, bath (or shower) and toilet facilities and do not have breakfast available for guests. Data for holiday flats, units and houses include short-term owner occupation as well as paying guest occupation.

Visitor hostels which provide accommodation to visitors on a bed basis (rather than by the room). This category does not include establishments providing charity type accommodation (e.g. Salvation Army hostels) nor hotels, motels and guest houses without in-room facilities which provide accommodation on a per room basis.

- *Caravan parks* which provide either predominantly short-term (i.e. for periods of less than 2 months) or predominantly long-term (i.e. for periods of 2 months or more) accommodation to the general public and which provide powered sites for caravans and toilet, shower and laundry facilities for guests.

3 Data collected and published for each type of establishment (other than holiday flats, units and houses) include both long-term and short-term guests at these establishments.

4 Establishments which provide more than one type of accommodation (e.g. a motel with attached caravan park) are treated as two or more separate establishments. However, self-contained units, flats, cabins, etc. attached to hotels, motels or to caravan parks are included in the capacity for those establishments and not treated as separate holiday flat, unit or house establishments.

DEFINITIONS

5 *Number of establishments.* For hotels, motels and guest houses, caravan parks and visitor hostels, the number of establishments within the scope of the survey which operated for any part of the survey period, or which closed temporarily for the quarter for seasonal reasons.

6 *Number of letting entities.* For holiday flats, units and houses, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period.

7 Capacity in terms of *Guest rooms, Bed spaces, Holiday units or Caravan park sites, etc.* is the maximum number available to accommodate paying guests during the survey period. Capacity closed temporarily for seasonal reasons is included.

8 *Bed spaces.* Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots are excluded.

9 *Total caravan park capacity* comprises *On-site vans, Other powered sites, Unpowered sites and Cabins, etc.*

EXPLANATORY NOTES —continued

DEFINITIONS —continued

10 Room nights available. The number of guest rooms available multiplied by the number of days for which they were available during the survey period. Includes operating periods only for establishments closing (other than for seasonal reasons) or opening during the survey period.

11 Occupancy in terms of *Room nights*, *Unit nights* or *Site nights occupied* refers to the total number of nights each guest room, holiday unit or caravan park site, etc. was occupied during the survey period.

NOTE: From September quarter 1992, caravan park sites, etc. permanently reserved for 2 months or more at the end of the survey period but only casually occupied by their tenants have been recorded continuously as *Site nights occupied* irrespective of whether the tenants of individual sites were in residence on any particular night. (See also paragraph 14 below). Previously, usage of these sites was recorded as *Site nights occupied* only when their tenants were in the park. Total site occupancy rates from September quarter 1992 are therefore not comparable with those from previous quarters.

12 Occupancy in terms of *Guest nights* refers to the total number of nights each paying guest stayed during the survey period.

13 Sites occupied by long-term guests. The total number of sites, etc. occupied at the end of the survey period by guests who have stayed continuously for 2 months or more.

14 Other sites permanently reserved. The total number of powered and unpowered sites, on-site vans and cabins, etc. continuously let for 2 months or more by the end of the survey period to tenants who occupy the sites only on a casual or sporadic basis. Separate data for this item are available only from September quarter 1992.

15 Occupancy rates represent occupancy expressed as a percentage of total capacity available during the survey period – e.g.

Room occupancy rate (%) for the period =

$$\frac{\text{Room nights occupied}}{\text{(Guest rooms)} \times \text{(No. of days in the period)}} \times 100$$

providing that, for establishments closing (other than for seasonal reasons) or opening during the period, the denominator of the above expression includes only operating periods.

16 Guest arrivals. The total number of paying guests counted only on the first night they stayed at the accommodation establishment.

17 Unit lettings. The total number of times a holiday flat, unit or house was occupied by a new tenant, counted only on the first night it was occupied by the new tenant.

18 Average length of stay is expressed in number of days and is calculated:

- for hotels, motels and guest houses and for visitor hostels, by dividing *Guest nights* by *Guest arrivals* and
- for holiday flats, units and houses, by dividing *Unit nights occupied* by *Unit lettings*.

19 Takings from accommodation. Revenue received from the provision of accommodation. Takings from meals are excluded. Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after, the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month. Rental and storage fees paid to caravan parks for the keeping of private vans in parks are included in the takings of the month they are received.

20 Star grading. The grading of hotels and motels with facilities based on the classification system used by members of the Australian Automobile Association (AAA). The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the RACV-RAASA members' publication *Accommodation Australia*, or the individual tour guides produced by members of the AAA. For the purpose of classifying establishments to a star

grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

AUSTRALIAN STANDARD
GEOGRAPHICAL
CLASSIFICATION

21 *Employment.* The number of persons working at accommodation establishments at the end of the survey period (including working proprietors and those working on other than accommodation activities).

22. Statistics presented in this publication have been classified according to the Australian Standard Geographical Classification (ASGC), Edition 2.3. This classification incorporates a number of hierarchic structures of geographic areas. The appropriate spatial units of the main structure of the ASGC used in this publication are defined as follows.

Statistical Local Areas (SLAs) are in most cases either identical with, or have been aggregated to, the previously published whole or part legal Local Government Areas (LGAs) as defined under the (State) *Local Government Act 1919* and comprising cities (C), municipalities (M) and shires (S). In other cases, they are identical to each previously published unincorporated area. In aggregate, SLAs cover the whole of the State without gaps or overlaps. In some cases, legal LGAs overlap Statistical Subdivision boundaries and therefore comprise two SLAs (Part A and Part B) or three SLAs in the case of Cabonne (S) (Part A, Part B and Part C).

Statistical Subdivisions (SSDs). These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.

Statistical Divisions (SDs). These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.

For more detailed information, refer to the ASGC (1216.0).

UNPUBLISHED STATISTICS

23 The ABS may make available on request certain unpublished tourist accommodation statistics. In particular, small geographic area and other tabulations are available for various accommodation types in a time series format. A charge may be made for this information.
