

**DWELLING UNIT COMMENCEMENTS REPORTED BY
APPROVING AUTHORITIES, VICTORIA,
NOVEMBER 1995**

MAIN FEATURES

- Trend estimates of the number of dwelling units commenced in November 1995 (1,994) showed a 6 per cent decrease from the level recorded for October 1995 (2,125) and a 16 per cent decrease from the figure for November 1994 (2,373).
- In original terms the number of dwelling units commenced in November 1995 (2,117) was 4 per cent higher than in October 1995 (2,030), but 14 per cent lower than the level recorded for November 1994 (2,467).
- In original terms there were 463 new public sector dwelling units commenced during the five months ending November 1995. This is 67 per cent higher than for the corresponding period ending November 1994 (278).

EXPLANATORY NOTES

INTRODUCTION

1. This publication contains monthly details of the number of new dwelling units reported by approving authorities as having commenced in each Statistical Local Area.

SCOPE AND COVERAGE

2. The statistics were compiled from monthly reports, provided by local and other government authorities, together with licensed private building surveyors, of commencements of new houses and new other residential buildings for which:

- (a) building permits were issued by licensed municipal building surveyors employed in local government authorities;
- (b) contracts (let or day labour work) were authorised by Commonwealth, State, semi-government, and local government authorities;
- (c) building permits were issued by licensed private building surveyors.

The last category reflects implementation of the 1993 Building Act by the Victorian Government from 1 July 1994.

3. The number of dwelling units created by alterations and additions to existing buildings, and through the construction of new non-residential buildings is not included.

DEFINITIONS

4. *Dwelling unit.* A dwelling unit is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels, and holiday apartments, are not defined as dwelling units.

5. *Residential building.* A residential building is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either houses or other residential buildings as follows:

- (a) A house is defined as a detached building predominantly used for long-term residential purposes and consisting of only one dwelling unit. Thus detached "granny flats" and detached dwelling units (such as caretakers' residences) associated with non-residential buildings are defined as houses for the purpose of these statistics.
- (b) An other residential building is defined as a building which is predominantly used for long-term residential purposes and which contains (or has attached to it) more than one dwelling unit (e.g. includes townhouses, duplexes, apartment buildings, etc.).

6. *Commencement.* For the purposes of this statistical series, a residential building is regarded as being commenced on the date when:

- (a) The building work is first inspected by a local government or other government authority building inspector or surveyor, whether the work is passed or not. In general, the first inspection is undertaken at the foundations or footings stage of construction; or
- (b) The building work is determined as commenced by a building inspector or surveyor.

7. Ownership. The ownership of a building is classified as either public sector or private sector according to the sector of the intended owner of the completed building as evident at the time of approval. Residential buildings being constructed by private sector builders under government housing authority schemes whereby the authority has contracted, or intends to contract, to purchase the buildings on or before completion, are classified as public sector.

SEASONAL ADJUSTMENT

8. Original and seasonally adjusted building statistics are shown in Table 2. In the seasonally adjusted series, account has been taken of normal seasonal factors and "trading day" effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month) and the effect of movement in the date of Easter which may, in successive years, affect figures for different months.

9. Since seasonally adjusted statistics reflect both irregular and trend movements, an upward or downward movement in a seasonally adjusted series does not necessarily indicate a change of trend. Particular care should therefore be taken in interpreting individual month to month movements.

TREND ESTIMATES

10. Trend estimate dwelling unit commencement statistics are shown in Table 2. The trend estimates have been derived by applying a 13-term Henderson-weighted moving average to the series.

11. While this technique enables trend estimate data for the latest period to be produced, it does result in revisions to the trend estimate series for the most recent months as additional observations become available. There may also be revision as a result of changes in the original data, and as a result of the re-estimation of the seasonal factors.

GEOGRAPHIC CHANGES

12. Statistics published in this issue of Dwelling Unit Commencements Reported By Approving Authorities, Victoria are presented in accordance with the revised geographic boundaries contained in the Australian Standard Geographical Classification (ASGC) Edition 2.5. The 'Off shore and migratory' category has been excluded from all tables.

13. Edition 2.5 of the ASGC includes major changes to Victorian Statistical Local Areas (SLAs). Some changes to Statistical Division (SD) and Statistical Sub-division (SSD) boundaries have also been necessary. These changes are the last required to incorporate the recent Local Government boundary re-structures. Complete details of the changes are available in the ABS Information Paper *Victorian Local Government Amalgamations 1994-95: Changes to the Australian Standard Geographical Classification* (1257.0).

14. Table 3 shows commencements statistics according to the new SLA structure and includes data for periods prior to July 1995 relating to those geographic areas for which no boundary changes have been made. Table 1 includes data for the Melbourne Statistical Division for periods prior to July 1995 because only minor boundary changes have been made. (Historical data for other SDs subject to boundary changes can, in some instances, be provided as a special data service. Charges apply for these services.)

COMPARABILITY

15. Because of the difference in data sources, collection methodologies, and timing of notification of commencements, care should be exercised in comparing quarterly data derived from monthly dwelling unit commencements statistics, with the quarterly dwelling unit commencements statistics from the Building Activity Survey (published in *Building Activity, Victoria* 8752.2).

UNPUBLISHED DATA

16. The ABS can also make available certain dwelling unit commencement data which are not published. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms: microfiche, photocopy, computer printout, and manually extracted tabulation. A charge may be made for providing unpublished information in these forms.

RELATED PUBLICATIONS

17. Users may also wish to refer to the following building and construction publications which are available on request:

- *Building Approvals, Australia* (8731.0) (monthly) (\$14.50)
- *Building Approvals, Victoria* (8731.2) (monthly) (\$15.00)
- *Building Activity, Victoria* (8752.2) (quarterly) (\$14.00)

All publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0) which is available from any ABS Office.

ELECTRONIC SERVICES

18. A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

SYMBOLS

In this publication, Cities are marked (C), Rural Cities (RC), Boroughs (B), and Shires (S).

n.a. not available

· nil or rounded down to zero

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

STUART JACKSON

Deputy Commonwealth Statistician

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L, premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year, for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about these electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There is a large number of ABS publications available from ABS bookshops (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are supplied by mail on a regular basis (telephone Subscription Service toll free on 1800 02 0608 Australia wide).
