SUMMARY OF FINDINGS

Value of building activity at average 1989-90 prices, seasonally adjusted, June quarter 1994

Changes in the value of building activity in the June quarter 1994 compared with the previous quarter and a year previously are summarised below (seasonally adjusted, at average 1989-90 prices):

	Percentage change on			
	Building work done		Building work commenced	
	March qtr 1994	June qtr 1993	March qtr 1994	June qtr 1993
New residential building	10.2	15.9	5.6	14.3
Alterations and additions to residential buildings	5.6	8.8	14.4	20.3
Non-residential building	7.1	6.4	0.5	25.9
Total building	8.1	10.9	3.5	18.8

The value of total *building work done* in the June quarter 1994 increased by 8.1 per cent when compared with the March quarter 1994 estimate and by 10.9 per cent when compared with the June quarter 1993. The value of work done on alterations and additions to residential buildings in the June quarter 1994 rose by 5.6 per cent over the March quarter 1994. The value of non-residential building work done increased by 7.1 per cent over the March quarter 1994 and was 6.4 per cent above the June quarter 1993 estimate.

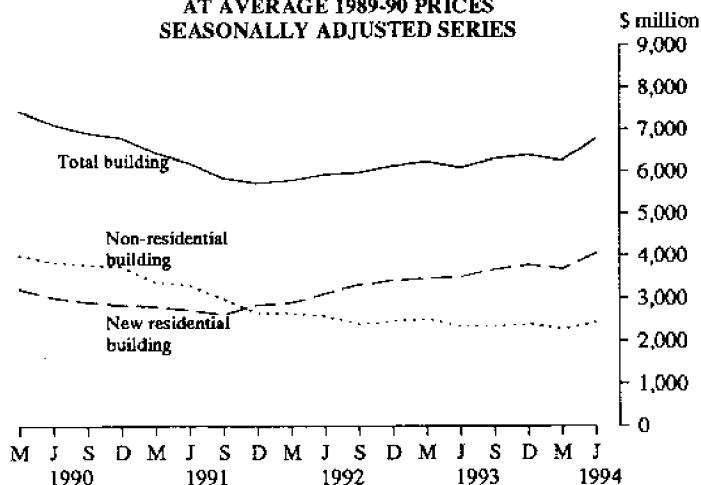

The value of total *building work commenced* in the June quarter 1994 increased by 3.5 per cent over the March quarter 1994 estimate and was 18.8 per cent above the level recorded twelve months earlier. The value of new residential building work commenced rose by 5.6 per cent in the June quarter 1994, (the twelfth consecutive quarter

where the value of residential work commenced has grown), and was more than 7 per cent above the previous peak in new residential building commencements, recorded in the March quarter 1989. The value of new other residential building (flats, townhouses, apartments, etc.) commencements fell by 2.3 per cent (from a high March quarter 1994). However this was more than offset by an increase of 9.4 per cent in the June quarter 1994. The value of non-residential building commenced rose slightly (by 0.5%) in the June quarter 1994 but was 25.9 per cent above the level recorded twelve months earlier. The value of work commenced on alterations and additions to residential buildings in the June quarter 1994 increased by 14.4 per cent over the March quarter 1994 estimate and was 20.3 per cent above the level of activity recorded in the June quarter 1993.

Value of building activity at average 1989-90 prices, 1993-94

The value of total *building work done*, expressed at average 1989-90 prices, in the 1993-94 financial year (\$25,707.7m) was 5.2 per cent higher than the 1992-93 estimate of \$24,436.2m and 10.4 per cent higher than the value of work done in 1991-92. Increases in Victoria (5.8%), Queensland (7.9%), Western Australia (21.2%), Tasmania (11.3%), Northern Territory (25.8%) and the Australian Capital Territory (0.1%) more than offset small declines in New South Wales (-0.4%) and South Australia (-2.9%). For Australia, the value of new residential building work done rose by 10.9 per cent in 1993-94, compared with 1992-93. The value of work done on non-residential building during 1993-94 fell by 2.9 per cent when compared with the previous year and was more than 40 per cent below the peak levels of 1989-90. The value of work done on alterations and additions to residential buildings rose by 5.3 per cent in 1993-94.

VALUE OF WORK DONE
AT AVERAGE 1989-90 PRICES
SEASONALLY ADJUSTED SERIES

VALUE OF WORK COMMENCED
AT AVERAGE 1989-90 PRICES
SEASONALLY ADJUSTED SERIES

Non-residential building, current prices, 1993-94

There was \$8,471.3m of non-residential *building work done* during 1993-94, a fall of 2.7 per cent compared with the 1992-93 figure of \$8,708.0m and 14.6 per cent below the level recorded in 1991-92. The value of non-residential building work done during 1993-94 fell in New South Wales (-8.2%), Victoria (-4.4%) and South Australia (-19.9%), more than offsetting rises in Queensland (2.3%), Western Australia (19.5%), Tasmania (24.2%), Northern Territory (33.3%) and the Australian Capital Territory (1.0%).

Nationally, the most notable falls in the value of non-residential building work done were in the Factories (down by 18.0% in 1993-94 following a 9.9% fall in 1992-93) and Offices (down by 25.7% in 1993-94 following a 28.6% fall in 1992-93) categories. The most notable rises were in the Shops (up 24.9% in 1993-94 following a small fall in 1992-93), Education (up 2.3% in 1993-94 following a 5.9% rise in 1992-93), Health (up 15.7% in 1993-94 following a 31.8% rise in 1992-93), and Hotels, etc (up 6.9% in 1993-94 following a 59.1% fall during 1992-93) categories.

There was \$8,709.3m of non-residential building work commenced during 1993-94, an increase of 14.0 per cent over the 1992-93 figure of \$7,640.7m and 9.0 per cent above the 1991-92 level of commencements. The most notable rises were in the Shops (28.5%), Offices (9.3%), Other business premises (54.3%), Entertainment and recreational (41.8%) and Miscellaneous (10.8%) categories. The main categories where the value of non-residential building commencements decreased were Education and Health, which fell by 8.9 per cent and 6.4 per cent respectively.

Dwelling unit commencements and completions, June quarter 1994

In *seasonally adjusted terms*, there were 46,531 dwelling units commenced in the June quarter 1994, an increase of 4.0 per cent over the March quarter 1993 estimate of 44,727 and the highest estimate of dwelling unit commencements ever recorded in a quarter. The previous

highest quarterly estimate of dwelling unit commencements was 45,457 in the June quarter 1973. Private sector house commencements rose by 6.0 per cent in the June quarter 1994 to 32,860, the highest quarterly estimate of private sector houses commenced ever recorded.

There were 39,801 dwelling units completed in the June quarter 1994, a decrease of 3.5 per cent from the March quarter 1994 estimate of 41,259.

Dwelling unit commencements, 1993-94

In *original terms*, there were 178,111 dwelling units commenced in 1993-94, 10.2 per cent higher than the 1992-93 estimate of 161,605 and the highest recorded annual estimate for dwelling units commenced. The 1993-94 estimate is 1.8 per cent above the previous annual peak of 174,963 for this series recorded in 1988-89.

There were 126,633 houses commenced in 1993-94, an increase of 8.1 per cent over the 1992-93 estimate of 117,179 but 4.3 per cent below the previous peak for this series in 1988-89 (132,379). There were 51,478 other residential buildings commenced in 1993-94, which is the highest recorded annual estimate for this series, and 15.9 per cent higher than the 1992-93 estimate of 44,426 and 1.1 per cent above the previous peak for this series in 1973-74 (50,922).

On a State by State basis, percentage movements between 1992-93 and 1993-94 in the number of dwelling units commenced were:

	NSW	Vic	Qld	SA	WA	Tas	NT	ACT	Aust.
Houses	6.4	8.5	6.9	1.8	21.1	5.5	45.9	-27.3	8.1
Other residential	6.3	46.2	28.2	-14.7	15.9	-0.7	21.9	19.6	15.9
Total dwellings	6.4	11.8	13.0	-1.4	19.7	3.8	38.5	-6.1	10.2

In addition to the commencement of new dwellings, 3,895 dwellings were also commenced as a result of the construction of non-residential buildings and alterations and additions to existing buildings (including conversions to dwelling units), compared with 1,483 dwellings in 1992-93.

EXPLANATORY NOTES

Introduction

This publication contains detailed results from the quarterly Building Activity Survey.

2. The statistics were compiled on the basis of returns collected from builders and other individuals and organisations engaged in building activity. The quarterly survey consists of two components:

- (a) A sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;
- (b) A complete enumeration of jobs involving construction of new residential buildings other than private sector houses, all alterations and additions to residential buildings (other than private sector houses) with an approval value of \$10,000 or more, and all non-residential building jobs with an approval value of \$50,000 or more.

3. From the September quarter 1990, only non-residential building jobs (both new and alterations and additions) with an approval value of \$50,000 (previously \$30,000) or more are included in the survey.

4. The use of sample survey techniques in the Building Activity Survey means that reliable estimates of private sector house building activity, including alterations and additions to houses are generally only available at the State/Territory and Australia levels. However, dwelling unit commencement data for regions below State/Territory level are shown in the monthly series of dwelling unit commencements compiled by the ABS. Data from this series, unlike that compiled from the Building Activity Survey, are based on information reported by local and other government authorities.

Scope and coverage

5. The statistics relate to *building* activity which includes construction of new buildings and alterations and additions to existing buildings. Construction activity not defined as building (e.g. construction of roads, bridges, railways, earthworks, etc.) is excluded.

6. Building jobs included in each quarter in the Building Activity Survey comprise those jobs selected in previous quarters which have not been completed (or commenced) by the end of the previous quarter and those jobs newly selected in the current quarter. The population list from which jobs are selected for inclusion comprises all approved building jobs which were notified to the ABS (refer paragraph 2) up to but not including the last month of the reference quarter (i.e. up to the end of August in respect of the September quarter survey). This introduces a lag to the statistics in respect of those jobs notified and commenced in the last month of the reference quarter (i.e. for the month of September in respect of the September quarter survey). For example, jobs which were notified as approved in the month of June and which actually commenced in that month are shown as commencements in

the September quarter. Similarly, building jobs which were notified in the month of September and which actually commenced in that month are shown as commencements in the December quarter.

Definitions

7. A *building* is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision for regular access by persons.

8. A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for *long term* residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of non-residential building.

9. A *residential building* is defined as a building predominantly consisting of one or more dwelling units. Residential buildings can be either *houses* or *other residential buildings*:

- (a) A *house* is defined as a detached building predominantly used for long term residential purposes and consisting of only one dwelling unit. Thus, detached 'granny flats' and detached dwelling units (such as caretakers' residences) associated with non-residential buildings are defined as houses for the purpose of these statistics;
- (b) An *other residential building* is defined as a building which is predominantly used for long term residential purposes and which contains (or has attached to it) more than one dwelling unit (e.g. includes townhouses, duplexes, apartment buildings, etc.).

10. The number of dwelling units created by alterations and additions to existing buildings, and through the construction of new non-residential buildings, is not included in the tables but is shown as a footnote to Table 1.

11. *Commenced*. A building is defined as commenced when the first physical building activity has been performed on site in the form of materials fixed in place and/or labour expended (this includes site preparation but excludes delivery of building materials, the drawing of plans and specifications and the construction of non-building infrastructures, such as roads).

12. *Under construction*. A building is regarded as being under construction at the end of a period if it has been commenced but has not been completed, and work on it has not been abandoned.

13. *Completed.* A building is defined as completed when building activity has progressed to the stage where the building can fulfil its intended function. In practice, the ABS regards buildings as completed when notified as such by respondents to the survey.

Valuation of building jobs

14. The value series in this publication are derived from estimates reported on survey returns as follows:

- (a) *Value of building commenced or under construction* represents the anticipated completion value based, where practicable, on estimated market or contract price of building jobs excluding the value of land and landscaping. Site preparation costs are included. Where jobs proceed over several quarters the anticipated completion value reported on the return for the first (commencement) quarter may be amended on returns for subsequent (under construction) quarters as the job nears completion;
- (b) *Value of building completed* represents the actual completion value based, where practicable, on the market or contract price of jobs including site preparation costs but excluding the value of land and landscaping.
- (c) *Value of building work done during the period* represents the estimated value of building work actually carried out during the quarter on jobs which have commenced;
- (d) *Value of building work yet to be done* represents the difference between the anticipated completion value and the estimated value of work done on jobs up to the end of the period.

Building classification

15. *Ownership.* The ownership of a building is classified as either *public sector* or *private sector* according to the sector of the intended owner of the completed building as evident at the time of approval. Residential buildings being constructed by private sector builders under government housing authority schemes whereby the authority has contracted, or intends to contract, to purchase the buildings on or before completion, are classified as public sector.

16. *Builder type.* Houses are classified according to the type of builder as follows:

- (a) *Contractor-built houses.* Those constructed by a private recognised building contractor, either under contract, or in anticipation of sale or rental;
- (b) *Houses built by other than contract builders.* Those constructed by an owner (other than a recognised building contractor) or under his direction, without the services of a single contractor responsible for the whole job. Houses built by businesses (other than recognised building contractors) and public sector organisations are also included in this category.

17. *Functional classification of buildings.* A building is classified according to its intended major function. Hence a building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the building and not to the function of the group as a whole. An example of this can be seen in the treatment of building work approved for a factory complex. In this case a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while factory buildings would be classified to Factories. An exception to this rule is the treatment of group accommodation buildings where, for example, a student accommodation building on a university campus would be classified to Educational.

18. Example of the types of individual buildings jobs included under each main functional heading are shown in the following lists:

- (a) *Houses.* Includes 'cottages', 'bungalows', detached caretakers'/managers' cottages, rectories;
- (b) *Other residential buildings.* Includes blocks of flats, home units, attached townhouses, villa units, terrace houses, semi-detached houses, maisonettes;
- (c) *Hotels, etc.* Includes motels, hostels, boarding houses, guest houses, holiday apartment buildings;
- (d) *Shops.* Includes retail shops, restaurants, cafes, taverns, dry cleaners, laundromats, hair salons, shopping arcades;
- (e) *Factories.* Includes paper mills, oil refinery buildings, brickworks, foundries, power-houses, manufacturing laboratories, workshops as part of a manufacturing process;
- (f) *Offices.* Includes banks, post offices, council chambers, head and regional offices;
- (g) *Other business premises.* Includes warehouses, storage depots, services stations, transport depots and terminals, electricity sub-station buildings, pumping station buildings, telephone exchanges, mail sorting centres, broadcasting stations, film studios;
- (h) *Educational.* Includes schools, colleges, kindergartens, libraries, museums, art galleries, research and teaching laboratories, theological colleges;
- (i) *Religious.* Includes churches, chapels, temples;
- (j) *Health.* Includes hospitals, nursing homes, surgeries, clinics, medical centres;
- (k) *Entertainment and recreational.* Includes clubs, theatres, cinemas, public halls, gymnasiums, grandstands, squash courts, sports and recreation centres;
- (l) *Miscellaneous.* Includes law courts, homes for the aged (where medical care is not provided as a nor-

mal service), orphanages, gaols, barracks, mine buildings, glass houses, livestock sheds, shearing sheds, fruit and skin drying sheds, public toilets, and ambulance, fire and police stations.

Reliability of the estimates

19. Since the figures for private sector house building activity (including alterations and additions) are derived from information obtained from a sample of approved building jobs they are subject to sampling error; that is, they may differ from the figures that would have been obtained if information for all approved jobs for the relevant period had been included in the survey. A measure of the likely difference is given by the relative standard error of each estimate. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all approved jobs had been included, and about nineteen chances in twenty that the difference will be less than two standard errors. Relative standard errors of the estimates are shown in Tables 23 and 24.

20. An example of the use of standard errors is as follows: If the number of new private sector houses commenced is 30,000 and the associated standard error is 1.5 per cent, there are about two chances in three that the value which would have been derived if information had been obtained about all approved private sector house hobs would have been within the range 29,550 to 30,450 and about nineteen chances in twenty that the value would have been within the range 29,100 to 30,900.

21. The imprecision due to sampling variability, which is measured by the relative standard error, should not be confused with inaccuracies that may occur because of inadequacies in the source of building approval information, imperfections in reporting by respondents, and errors made in the coding and processing of data. Inaccuracies of this kind are referred to as non-sampling error, and may occur in any enumeration whether it be a full count or only a sample. Every effort is made to reduce the non-sampling error to a minimum by the careful design of questionnaires, efforts to obtain responses for all selected jobs, and efficient operating procedures.

Seasonal adjustment

22. Seasonally adjusted building statistics are shown in Tables 4 and 5. In the seasonally adjusted series, account has been taken of normal seasonal factors and the effect of movement in the date of Easter which may, in successive years, affect figures for different quarters. Details regarding the methods used in seasonally adjusting the series are available on request.

23. Since seasonally adjusted statistics reflect both irregular and trend movements, an upward or downward movement in a seasonally adjusted series does not necessarily indicate a change of trend. Particular care should therefore be taken in interpreting individual quarter to quarter movements. Each of the component series shown has been seasonally adjusted independently. As a consequence, while the unadjusted components in the original series shown add to the totals, the adjusted components may not add to the adjusted totals. Further, the difference

between independently seasonally adjusted series does not necessarily produce series which are optimal or even adequate adjustments of the similarly derived original series. Thus the figures which can be derived by subtracting seasonally adjusted private sector dwelling units from the seasonally adjusted total should not be used to represent seasonally adjusted public sector dwelling units.

Estimates at constant prices

24. Estimates of the value of commencements and work done at average 1989-90 prices are presented in original terms for each State and Territory, and in original and seasonally adjusted terms for Australia.

25. Constant price estimates measure changes in value after the direct effects of price changes have been eliminated. The deflators used to revalue the current price estimates in this publication are derived from the same price data underlying the deflators compiled for the dwellings and non-dwelling construction components of the national accounts aggregate 'Gross fixed capital expenditure'.

26. Estimates at constant prices are subject to a number of approximations and assumptions. Further information on the nature and concepts of constant price estimates is contained in Chapter 4 of *Australia National Accounts: Concepts, Sources and Methods* (5216.0).

27. The factors used to seasonally adjust the constant price series are identical to those used to adjust the corresponding current price series.

Unpublished data and related publications

28. The ABS can also make available certain building approvals and activity data which are not published. Where it is not practicable to provide the required information by telephone, data can be provided in the following forms: microfiche, photocopy, computer print-out, floppy disk and clerically extracted tabulation. A charge may be made for providing unpublished information in these forms.

29. Users may also wish to refer to the following publications which are available on request:

Building Approvals, Australia (8731.0) — issued monthly

Building Activity, Australia: Dwelling Unit Commencements, Preliminary (8750.0) — issued quarterly

Engineering Construction Activity, Australia (8762.0) — issued quarterly

Construction Activity at Constant Prices, Australia (8782.0) — issued quarterly

Public Sector Construction Activity, Australia, 1988-89 (8775.0)

Construction Industry Australia, Summary of Private Sector Operations, 1988-89 (8771.0)

Housing Finance for Owner Occupation, Australia (5609.0) — issued monthly

Price Index of Materials Used in House Building, Six State Capital Cities and Canberra (6408.0) — issued monthly

Price Index of Materials Used in Building Other Than House Building, Eight Capital Cities (6407.0) — issued monthly

House Price Indexes: Eight Capital Cities (6416.0) — issued quarterly

30. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays,

a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The *Catalogue and Publications Advice* are available from any ABS office.

Symbols and other usages

- . . not applicable
- nil or rounded to zero
- r figure or series revised since previous issue
- n.a. not available

31. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycom P/L, premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
