## NOTES

### FORTHCOMING ISSUES

ISSUE	RELEASE DATE
April 2002	10 April 2002
May 2002	8 May 2002
June 2002	11 June 2002
July 2002	10 July 2002
August 2002	8 August 2002
September 2002	10 September 2002

### INTRODUCTION

1 This publication contains latest figures for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

### SEASONAL ADJUSTMENT AND TREND ESTIMATION

2 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

3 The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series.

4 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after three months have a negligible impact on the series.

5 ABS statistical series are being impacted by varying degrees as a result of The New Tax System (TNTS), introduced in Australia from 1 July 2000. TNTS includes the removal of Wholesale Sales Tax and the introduction of a Goods and Service Tax (GST), and as a result, a number of ABS data series will reflect significant and subsequent impacts. Further information can be found in *Information Paper: ABS Statistics and The New Tax System* (Cat. no. 1358.0).

### SYMBOLS AND OTHER USAGES

n.a.	not available
n.p.	not available for separate publication (but included in totals where applicable)
n.y.a.	not yet available
..	not applicable
—	nil or rounded to zero
p	preliminary — figure or series subject to revision
r	figure or series revised since previous issue

Stevan R. Matheson  
Regional Director, Tasmania

## MAIN FEATURES

### THE LABOUR FORCE

Trend estimates There were an estimated 218,800 persons (based on *trend* estimates) in the labour force in January 2002 and an estimated 373,200 civilian Tasmanians aged 15 years or more, yielding a labour force participation rate of 58.6%, compared to 59.5% in January 2001. The Australian labour force participation rate for January 2002 was 63.8% compared to 63.5% in January 2001 (see table 39 and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

For Tasmanian males, the *trend* estimate of the participation rate was 67.7% in January 2002 compared to 68.8% in January 2001. For Tasmanian females, the *trend* estimate of the participation rate was 50.1% in January 2002, compared to 50.8% in January 2001 (see table 3).

### EMPLOYMENT

State comparisons There was a decrease of 1.2% in the number of Tasmanians employed over the 12 months to January 2002. Employment over the same period increased in New South Wales and Victoria by 1.1%, Queensland by 1.9%, South Australia by 1.5% and Western Australia by 0.5%. The increase in the national employment figure over the same period was 1.2% (see table 39 and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

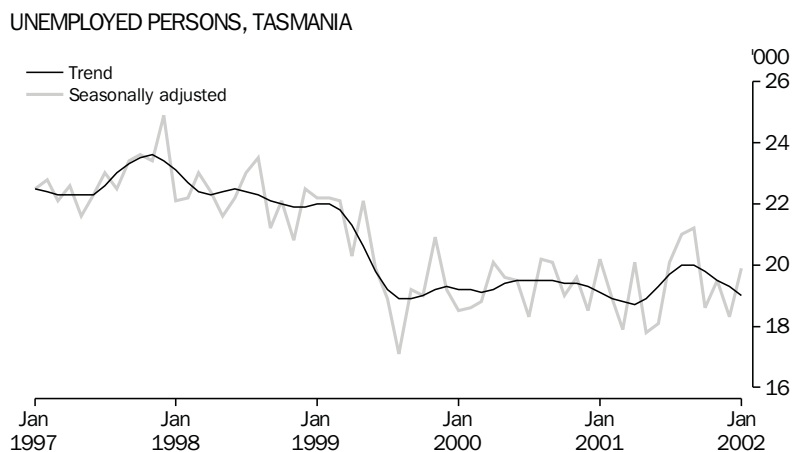

Trend estimates

EMPLOYED PERSONS, TASMANIA

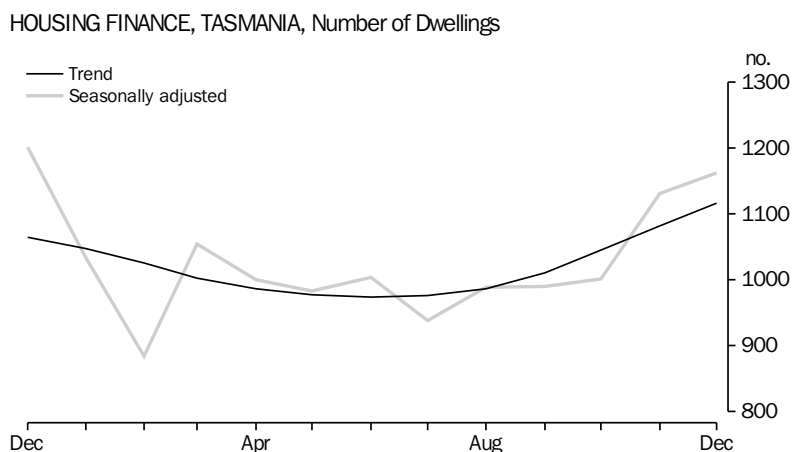

## UNEMPLOYMENT

Trend estimates The *trend* estimate of the number of unemployed persons in Tasmania for January 2002 was 19,000, compared to 19,100 in January 2001. The *trend* estimate of the unemployment rate for January 2002 was 8.7% compared to 8.6% in January 2001. The Australian *trend* estimate of the unemployment rate was 6.8% in January 2002 compared to 6.4% in January 2001 (see table 3 and 39, and *Labour Force, Australia, Preliminary* (Cat. no. 6202.0)).

## HOUSING FINANCE

Trend estimates The latest *trend* series for the number of housing finance commitments in Tasmania shows an increase of 3.2% between November 2001 and December 2001. The *trend* series shows an overall decrease of 4.9% between December 2000 and December 2001. The national *trend* series shows an increase of 17.8% for the year December 2000 (44 880) to December 2001 (52 871), with a decrease of 0.3% between November 2001 (53 020) and December 2001 (52 871).

HOUSING FINANCE AUSTRALIA, Number of dwellings

The latest *trend* series for the total value of commitments for Tasmania shows a 2.2% increase between November 2001 and December 2001. The *trend* series from December 2000 to December 2001 showed an increase of 24.7%. The national *trend* series shows the value of commitments having increased by 0.1% between November 2001 (8 064m) and December 2001 (8 073m). (see table 28 and *Housing Finance for Owner Occupation, Australia* (Cat. no. 5609.0)).

#### BUILDING APPROVALS

Original terms There were 160 dwelling units approved during December 2001, including 156 new houses. While the number of dwelling units approved during December 2001 declined from the November 2001 figure of 170, the number of dwelling units approved has increased from 57 during December 2000. The number of dwelling units approved in the 12 months to December 2001 (1,571) rose 1.1% from those approved in the 12 months to December 2000 (1,554).

At current prices, the value of total building was \$28.2m in December 2001, 21.4% below the November 2001 figure of \$35.9m and 28.2% above the December 2000 figure of \$22.0m. Residential building contributed \$19.2m and non-residential building \$9.0m in December 2001 (see table 27 and *Building Approvals, Australia* (Cat. no. 8731.0)).

REPLACEMENT OF NEW  
MOTOR VEHICLE  
REGISTRATIONS (NMVR)  
STATISTICS

Original terms     The ABS has ceased the monthly NMVR collection. From January 2002, the ABS has replaced the NMVR collection with data from the Federal Chamber of Automotive Industries (FCAI). The new data directly measures economic activity in relation to the sales of new motor vehicles and is considered to be of high quality.

State level data is available, effectively replacing Table 34 'Registrations of New Motor Vehicles'. Data for State comparisons is also provided in Table 39 'Major Statistical Indicators — Australia and State Comparisons'.

For more information please refer to the paper *Developments in New Motor Vehicle Statistics, 2001* (Cat no. 9313.0).

RETAIL

Trend estimates     In *trend* terms, the estimate of retail turnover in Australia for December 2001 was \$13,871.7m, 0.3% increase from November 2000 (\$13,825.3m). In *trend* terms, the estimate of retail turnover in Tasmania for December 2001 was \$294.2m, 3.4% above the figure recorded in December 2000 (\$284.6m). (see table 35 and *Retail Trade, Australia* (Cat. no. 8501.0)).

LIVESTOCK SLAUGHTERING

Trend estimates     In December 2001 the *trend* estimate for the number of livestock slaughtered saw increases in the cattle and calves series (up by 3.2%) and the pig series (up by 5.2%) while the sheep and lambs series recorded a 2.7% decrease compared to last month.

The estimate for the number of cattle and calves slaughtered in December 2001 was 20,000, down by 2.6% on the estimate for December 2000 and down by 13.9% compared to December 1999.

The estimated number of sheep and lambs slaughtered in December 2001 was 71,100, up by 7.3% on the number for December 2000 but down by 15.1% on December 1999.

An estimated 5,930 pigs were slaughtered in December 2001 which represented a 24.6% increase in the *trend* estimate compared to December 2000, and an increase of 2.1% compared to December 1999. (See table 21).

## OVERSEAS TRADE

The value of Tasmania's exports for the month of December 2001 was \$190 million, an increase of 3% on the month of November. Australia's exports for December 2001 totalled \$10,215 million, an increase of 1% on the previous month.

Tasmania's major export destinations for the month of December 2001 were Japan (\$41.1 million), United States of America (\$38.4 million) and Hong Kong (\$24.5 million). Major commodity groups exported for the month were non-ferrous metals (\$48.7 million), fish, crustaceans and molluscs (\$23.0 million) and medical and pharmaceutical products (\$19.5 million).

(a) Usual residents of Tasmania.

(b) Deaths of children under one year of age.

(c) Total fertility rate. The sum of age specific fertility rates (live births at each age of a mother per female population of that age). It represents the number of children a woman would bear during her lifetime if she experienced age-specific fertility rates at each age of her reproductive life.

(d) Standardised death rate. The overall death rate, per 1,000 persons, that would have prevailed in a standard population if it had experienced at each age the death rates of the population being studied. The standard population used in these calculations is all persons in the 1991 Australian population.

(e) Rate per 1,000 live births.

(f) Crude marriage rate is the number of marriages registered during the financial year, per 1,000 estimated resident population at 31 December of that year.

(a) For explanation of terms and concepts, refer to *Labour Force, Australia, Preliminary* (Cat. no. 6202.0). At April 2001, estimates for prior periods were revised because of some minor definitional changes.

(b) Seasonal factors are reviewed annually to take account of each additional year's data. The results of the review are used to compile revised seasonally adjusted and trend estimates each February. Trend estimates for the most recent months are also revised each month; see Notes on page 2.

(a) Source: Australian Dairy Corporation.

(b) Includes the whole milk equivalent of farm cream intake.

(c) Includes butter equivalent of butter oil.

(d) Includes spinning, weaving and carpet making. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant.

(e) Metallurgical refining index (Base year: 1979-80 = 100.0). Output from selected establishments covering the smelting and refining of ferro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 manufacturing Census. For multi product establishments, value added was apportioned to products on the basis of gross receipts from each product.

(a) Excludes motor vehicles, parts, petrol, etc.

(b) ABS retail seasonally adjusted and trend estimates for earlier periods are revised each month. See Cat. no. 8501.0 for more details.

(c) Data from July 2000 reference month onwards are recorded inclusive of GST. See Cat. no. 8501.0 and page 2 of this publication for more details.  
A break in the trend series occurred between June and July 2000 because of the impact of The New Tax System on Retail turnover.

(d) Includes Department stores and Other retailing.

(a) It is difficult to get a complete picture of Tasmania's trade performance as imports recorded by the ABS include only goods imported directly into the State from overseas, and reported by the Australian Customs Service. Many of Tasmania's goods imported for direct consumption, or input into further processing industries, arrive via interstate ports, and are not included in this table.

(b) Includes re-exports.
