#### **SUMMARY OF FINDINGS**

**UPDATED SERIES** 

Series updated since the July 2000 issue are: average retail prices, building approvals, building commencements, consumer price index, housing finance, labour force, retail turnover, wage and salary earners and gross earnings. The feature article this month on pages 6 is Household Expenditure on Goods and Services in the ACT.

Labour force

At July 2000, the trend unemployment rate for the ACT fell by 0.1 percentage points to 5.2 over June 2000 (2%) and a decrease of 0.5 percentage points since July 1999. The July 2000 trend estimate of unemployed persons in the ACT was down 2% (to 9,100) over the previous month. Trend employment increased by 0.1% to 166,600 persons over this period but recorded a 4% increase over July 1999. The trend ACT participation rate decreased to 72.4%, while the national rate remained steady at 63.8%. Nationally, trend employment increased by 0.3% to 9,081,100 persons in July 2000, while the trend unemployment decreased by 1% (to 631,900 persons). The national trend unemployment rate fell 0.1 percentage points to 6.5%.

Housing finance

The trend number of dwelling units financed (including re-financing) in the ACT in June 2000 was 822, a decrease of 2% over the previous month. The trend estimate for the value of commitments in the ACT was \$110 million, down 3% from the previous month. Re-financing of existing dwellings comprised 14% of the total value of dwelling units financed in June 2000, compared with 10% recorded in May 2000. Nationally, the trend number of dwelling units financed (including re-financing) during June 2000 was 5,556, compared with 5,749 in the previous month, while the trend estimate for the value of commitments decreased to \$5,556 million (down 3.4%) from previous month.

Building approvals

The trend number of dwelling units approved in the ACT decreased by 4.5% to 168 dwelling units in June 2000. Nationally, the trend number of dwelling units approved decreased by 6.8% to 11,914 dwelling units in June 2000.

The value of non-residential building approvals in the ACT in June 2000 was \$18.8 million, a decrease of \$76.9 million over the previous month and an increase of \$6.6 million over June 1999. Nationally, the value of non-residential building approvals for June 2000 was \$990.5 million, a decrease of 7.2% over the previous month, and an increase of 0.3% over June 1999.

New motor vehicle registrations The trend estimate for ACT new motor vehicle registrations in June 2000 was 1,008, down 3.5% over the previous month, and a fall of 10.6% since June 1999. Nationally, the trend for total new motor vehicle registrations in June 2000 decreased by 3.9% to 54,968 over May 2000, and was down 13.6% since June 1999.

Retail turnover

The trend estimate for retail turnover in the ACT for June 2000 was \$247.5 million, an increase of 1.3% over the previous month and up 11.8% compared to June 1999. The national trend retail turnover was up 0.3% to \$12,257.5 million since the previous month and was up 2.5% compared with the previous year.

Consumer price index

The ACT experienced an increase of 0.8% in the All Groups Consumer Price Index (CPI) for the June quarter 2000. This was equal to the national increase of 0.8% during the same period. The ACT annual CPI rate to June quarter 2000 recorded an increase of 3.6%, in the year ended June 2000 while the CPI for the weighted average of the eight capital cities recorded an increase of 3.2% for the same period.

**Building commencements** 

The value of new houses commenced in the ACT in the March quarter 2000 was \$56.1 million, up 5% from the previous quarter and up 45% from the March quarter 1998. Nationally, the value of new houses commenced in the March quarter 2000 recorded a 7% increase from the previous quarter and a 51% increase from a year ago.

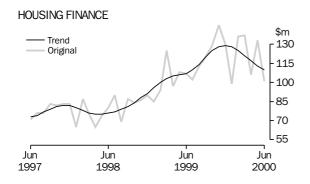

Wage and salary earners

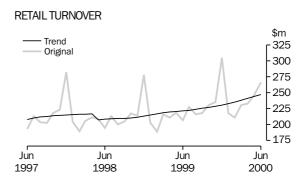

The trend number of wage and salary earners from the public and private sectors in the ACT was 151,900 persons in the February 2000, quarter an increase of 2,400 persons (up 2%) from the November 1999 quarter. This compares to a national increase of 38,800 persons (up 0.5%) in the same period. The proportion of private sector wage and salary earners in the ACT is around 55%. These figures exclude self-employed persons in jobs located in the private sector.

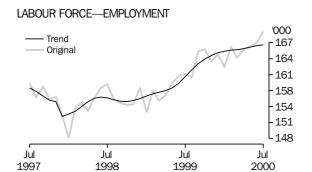

Gross earnings

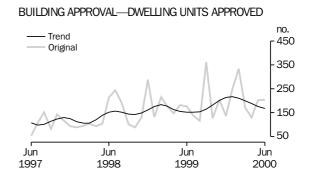

Gross earnings in the ACT for the public sector for the March quarter were \$921.3 million, an increase of 13% on the previous figure, and up 5% compared to the corresponding quarter 1999. From the previous quarter, private sector gross earnings were up 7% to \$604 million, and up 4% from the March quarter 1999. Nationally, public sector earnings were up 1% from the previous quarter, while private sector gross earnings were down 5%.

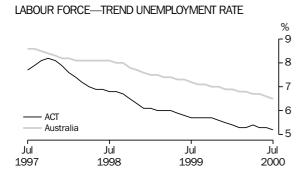

#### **SELECTED BUSINESS INDICATORS**

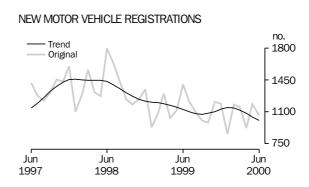

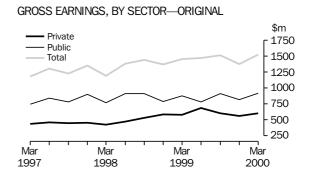

#### **FEATURE ARTICLE**

### HOUSEHOLD EXPENDITURE ON GOODS AND SERVICES IN THE ACT

INCOME AND EXPENDITURE

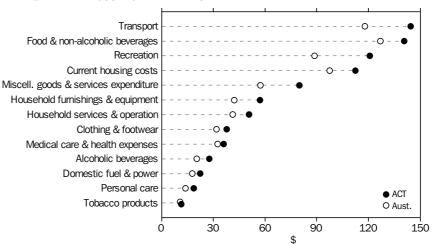

In the 12 months to June 1999, Canberra households spent an average of \$860 each week on goods and services. This is an increase of 16% since the previous survey which was conducted in 1993-94. Part of this increase over the five years can be attributed to inflation and the price of goods and services as measured by the consumer price index (CPI) which rose by 12%. Over the same period, average weekly household income in Canberra increased \$100 (10%) and the average household size remained steady at 2.56 persons.

In 1998-99, the largest broad categories of household expenditure were:

- transport—with average household expenditure of \$144 per week, representing 17% of total household expenditure on goods and services;
- food and non-alcoholic beverages—\$141 per week (16% of total); and
- recreation—\$121 per week (14% of the total).

These categories together account for just under half (47%) of household expenditure on goods and services. The fourth highest category was current housing costs (selected dwelling), with average weekly household expenditure of \$112 per week, representing 13% of the total.

#### AVERAGE WEEKLY HOUSEHOLD EXPENDITURE

Source: Household Expenditure Survey.

Changes in expenditure

The overall increase in average weekly household expenditure on goods and services between 1993-94 and 1998-99 was \$118 or 16%. Over the same period the price of goods and services, as measured by the CPI, rose by 12%.

Changes in expenditure continued The broad expenditure categories recording the largest increases in average weekly expenditure were:

- alcoholic beverages, up \$9 or 48%;
- miscellaneous goods and services, up \$23 or 40%;
- tobacco products, up \$4 or 32%; and
- household services and operation, up \$11 or 28%.

Broad categories which experienced a decrease in average weekly expenditure over the period 1993-94 to 1998-99 were superannuation and life insurance (-29% to \$36) and clothing and footwear (-15% to \$38).

Household characteristics

The level and pattern of expenditure differs between households, reflecting characteristics such as income, household composition, household size and location and is also highly related to the social and demographic characteristics of household members.

In 1998-99, households in the lowest income quintile (the lowest 20% of households when ranked according to income) spent an average \$403 per week on goods and services, compared with \$1,338 by households in the highest income quintile.

Household income also affects the composition of a household's weekly expenditure. For example, food and non-alcoholic beverages accounted for 19% (or \$67) of the expenditure on goods and services of households in the lowest income quintile. In comparison, although the highest income quintile group spent almost 3 times more (\$195), the proportion of total expenditure was similar at 16%.

Characteristics of households most likely to be in the lowest income quintile were:

- lone person households (44%); or
- those with main source of income from government pensions and allowances.

Characteristics of households most likely to be in the highest income quintile were:

- couples with dependent children only (43%); or
- those with employee income (88%).

Household characteristics continued Households with a level of weekly expenditure on goods and services significantly below the average of \$860 for all households included:

- households renting their dwelling from a state or territory housing authority (\$540);
- households in which the reference person was 65 years and over (\$506);
- households relying on government pensions and allowances as their major source of income (\$344);
- lone person households (\$496); and

Other households (comprising those who occupy a dwelling under a life tenure scheme; a rent/buy scheme; or rent-free) with a total average weekly expenditure of \$350.

In contrast, households in which the level of expenditure on goods and services was significantly above the average included:

- households purchasing their home, with an average weekly expenditure of \$1,018;
- couple, one family households with children; for example households consisting of a couple with their dependent and non-dependent children only, had an average weekly expenditure of \$1,319;
- households in which the reference person was a full time employee, with an average weekly expenditure of \$1,003; and
- households in which the reference person was aged 45 to 54 years, with an average weekly expenditure of \$957.

Housing costs

Household characteristics can also help to explain the variation in the composition of expenditure. For example, housing costs accounted for only 5% of total expenditure on goods and services of those households without a mortgage, while households renting from other than a state or territory housing authority spent 19% of their total expenditure on housing.
