ABOUT THIS PUBLICATION

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

CHANGES IN THIS ISSUE

There are no changes in this issue.

SYMBOLS AND OTHER

USAGES

n.a. not availablen.y.a. not yet available

\* subject to sampling variability too high for most practical purposes

not applicable

0, 0.0 nil or rounded to zero

ROUNDING

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

INFORMATION

More detailed information on each series, including explanatory and technical notes, can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

South Australia

#### SOUTH AUSTRALIAN OVERVIEW

- The value of merchandise exports, where the final stage of production was in South Australia, was \$371.1m in January 1998.
- The value of merchandise imports released from Customs control in South Australia was \$331.0m in January 1998, down from \$342.3m the previous month.
- The trend estimate for retail turnover has shown strong growth over the past four months and has increased 0.9% between December 1997 and January 1998.
- The trend for total new vehicle registrations increased by 1.9% in January 1998 and has risen for eight consecutive months.
- The trend estimate for dwelling unit approvals increased 0.9% in January 1998 and 15.8% when compared with January 1997.
- The Consumer Price Index (all groups) in Adelaide showed no change between the September 1997 and December quarter 1997 and a decrease of 1.1% between the December quarters 1996 and 1997.
- The Price Index of Materials Used in House Building rose 0.4% in December quarter 1997 and the Price Index of Materials Used in Building Other Than House Building increased by 0.3%.
- In December 1997 there were 12,967 short-term overseas visitor arrivals and 12,652 short-term resident departures from South Australia.
- The trend estimate of employed persons was 653,100 in February 1998, 1.3% lower than the level of 12 months ago (662,000).
- The trend unemployment rate for South Australia has generally risen over the past 12 months; up from 9.5% in February 1997 to 9.9% in February 1998.
- The number of working days lost through industrial disputes showed no change between November and December 1997 (both 400).
- Total housing finance commitments (original figures including alterations and additions) fell 22.8% to \$219.8m, 10.9% less than the previous January.

## STATE ACCOUNTS

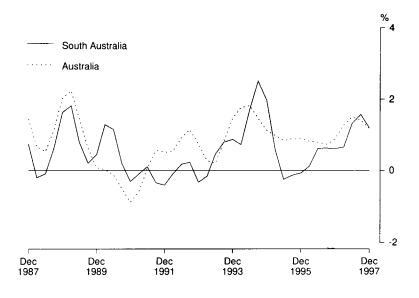

NOTE: The ABS no longer compiles quarterly State Account estimates. However, some of the information previously included in *Australian National Accounts: State Accounts*: (Cat. No.5242.0) is now provided in a new Standard Data Service entitled *Australian National Accounts: Quarterly State Details* (Cat. No.5206.0.40.001). This information will be available quarterly, usually within one week of the release of the quarterly Australian National Accounts.

## Trend (Constant prices)

State final demand (SFD) increased by 1.2% in the December quarter with the rate of increase down from the peak of 1.6% in the September quarter 1997. The national rate was also 1.2%. Growth through the year to December quarter 1997 was 4.8% compared with the national rate of 5.5%. Contributing to the slowing in the growth of SFD was a decline in the growth rate of private gross fixed capital expenditure from 3.1% in the September quarter to 1.0% in the December quarter, the lowest rate of increase for approximately 2 years.

Private final consumption expenditure rose 1.4% (the national rate was 1.5%). The rate of increase in final consumption expenditure has been fairly constant for the past 3 quarters. Growth through the year to December quarter was 4.6% compared with the national rate of 5.0%.

## State final demand: Trend (Constant prices)(a)

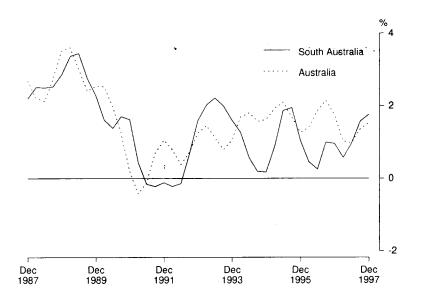

(a) Quarterly changes

Trend (Current prices)

Wages, salaries and supplements grew by 1.8% in the December quarter and has, for the past two quarters, grown at a slightly faster rate than the national rate, reversing a previous trend evident from the December quarter 1995. Growth through the year to the December quarter was 5.0%, the same as the national rate.

## Wages, salaries and supplements: Trend (Current prices)(a)

(a) Quarterly changes

#### INTERNATIONAL ACCOUNTS

Merchandise exports

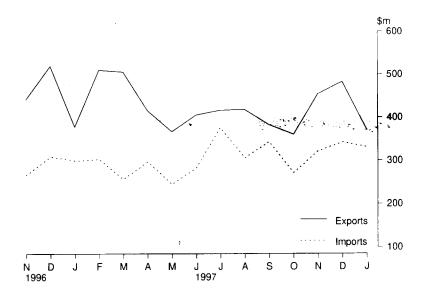

The value of merchandise exports, where the final stage of production was in South Australia, was \$371.1m in January 1998. This was 23.2% less than December 1997 and 2.2% less than January 1997. The major commodity groups exported were cereals and cereal preparations (\$92.9m) and metals and metal manufactures (\$56.2m). The largest increase in exports occurred in fish and crustaceans, up 78.1% to \$24.4m while the largest decrease was in road vehicles, parts and accessories, down to \$15.1m from \$72.3m.

The major destinations of South Australian exports were the Middle East (\$50.4m) and, despite a fall from last month of \$16.3m, Japan at \$38.3m. Exports to the United States of America had the largest reduction, falling 75.9% to \$19.3m. This was largely the result of a \$49.6m fall in exports of road vehicles, parts and accessories. Exports to New Zealand increased 36.7% to \$23.8m, largely accounted for by an increase of \$4.0m in exports of petroleum and petroleum products. Exports to the ASEAN countries, China and Japan all fell, contributing to the decline in exports to East Asia, down 21.0% to \$155.5m.

#### Merchandise imports

The value of merchandise imports released from Customs control in South Australia fell to \$331.0m in January 1998. This represents a 3.3% decrease from December 1997, however when compared to the same time last year, imports increased 10.2% (\$30.7m). The reduction in imports was largely the result of a \$20.0m fall (17.3%) in machinery imports, which was partially offset by a \$15.7m increase in the imports of chemicals. All other selected commodity groups, except textiles and metals and metal manufactures experienced a reduction in imports.

## Merchandise exports and imports

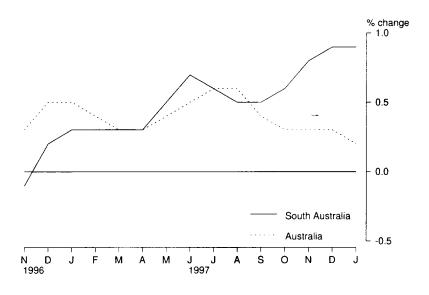

#### CONSUMPTION AND INVESTMENT

Retail turnover

The trend estimate for retail turnover has shown strong growth over the past four months and has increased 0.9% between December 1997 and January 1998. Increases in the trend estimates for food retailing, household goods retailing and other retailing have contributed to the growth in the series.

Over the three months to January 1998 the trend estimate for retail turnover has increased \$21.7m, with the main contributors being food retailing (\$13.5m) and other retailing (\$7.9m). The hospitality and services trend estimate partially offset these increases with a fall of \$9.2m.

#### Retail turnover: Trend

In original terms, South Australian retail turnover was \$856.0m, a fall of 19.8% from December 1997 and an increase of 10.6% from January 1997. Australian turnover was \$11,262.7m, a 22.7% decrease and 5.6% increase for the corresponding periods. South Australia's share of the Australian total was 7.6%.

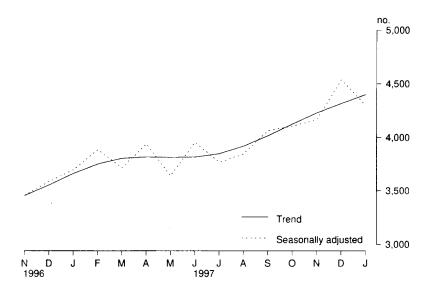

#### New motor vehicle registrations

The trend for new motor vehicle registrations rose for the eighth consecutive month, increasing 1.9% to 4,401 in January 1998. The Australian trend also increased when compared to December 1997 and January 1997, up 0.8% and 16.6% respectively.

In original terms, new motor vehicle registrations fell to 3,366 in January 1998, down from 4,483 (24.9%). This was the result of a fall in both passenger and other vehicle registrations, down 23.8% and 31.2% respectively. The leading makers of vehicles registered in South Australia for January 1998 were Mitsubishi (497), Holden (464), Ford (413), Toyota (380) and Hyundai (251).

Australian total new vehicle registrations (original) decreased almost one quarter (24.4%) to 51,335 in January 1998.

## New motor vehicle registrations

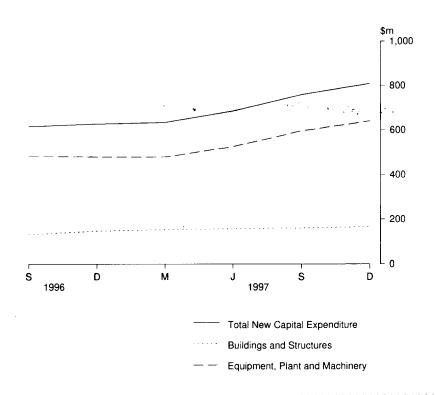

#### Private new capital expenditure

The trend estimate at current prices for private new capital expenditure for the December quarter 1997 increased 6.6% from the previous quarter to \$810m. Expenditure on both buildings and equipment increased, up 3.7% and 7.4% respectively. Over the same period the Australian total also increased, up 0.7%.

In original terms, private new capital expenditure for the December quarter 1997 was \$927m, an increase of 29.5% on the previous quarter and 34.7% on the December quarter 1996. Equipment, plant and machinery accounted for \$735m and buildings and structures \$192m.

## Private new capital expenditure, type of asset: Trend

#### Tourist accommodation

The number of rooms available in hotels, motels and guesthouses in South Australia for December quarter 1997 fell by 54 (0.5%) from December quarter 1996, to 10,897. The room occupancy rate increased to 58.3%, the highest December quarter rate recorded since the commencement of the Survey in 1975. Takings for all accommodation types increased when compared to December quarter 1996, with holiday flats, units and houses having the largest percentage increase, up 24.6%. Average takings per room night occupied rose to \$82 for hotels, motels and guesthouses.

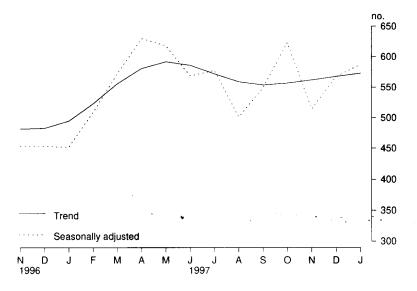

#### **PRODUCTION**

#### **Building** approvals

The trend for total dwelling units approved increased 0.9% for January 1998. In original terms, the total number of dwellings approved for January 1998 was 431, down 16.0% from the previous month yet still 22.8% higher than that of a year earlier. The low number (372) of new houses approved for January was the sole reason for the fall in dwelling approvals this month.

For Australia, the trend for total dwelling units approved increased 1.8% from the previous month. Over the last year the trend for total dwelling units increased by 15.6%. In original terms, South Australia accounted for 3.9% of the total dwelling units approved in Australia during January 1998.

## Dwelling units approved

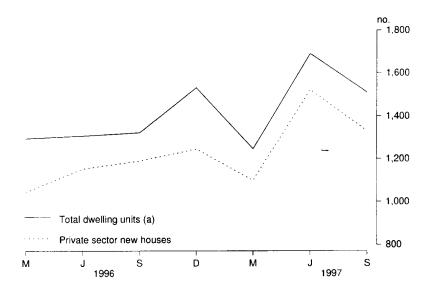

The total value of building approved in January 1998 for South Australia was \$60.8m, of which \$37.4m was new residential building and \$16.1m non-residential building. The value of non-residential building for January 1998 is the lowest monthly value since January 1993. The Educational sector contributed \$6.5 million to this value for January 1998.

**Building activity** 

For the September quarter 1997, the trend for the total number of dwelling units commenced in South Australia increased marginally and follows a rise of 4.1% in the June quarter 1997. In original terms, 1,509 dwelling units were commenced in the September quarter 1997, a decrease of 182 or 10.8% from the previous quarter.

During 1996–97 there were 5,790 dwelling units commenced, a decrease of 2.9% from the 1995–96 financial year figure. Both the number of new houses and new other residential building commenced decreased when compared to the previous financial year, falling 10.7% to 5,113 and 19.1% to 651 respectively.

## Dwelling units commenced

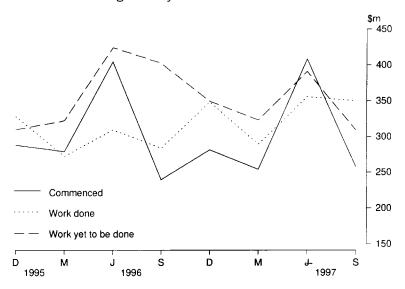

(a) Includes conversions.

The total value of building work commenced during the September quarter 1997 fell by 36.9% to \$257.7m from previous quarters high of \$408.4m. This fall can be mostly attributed to a 57.7% fall in the non-residential building sector, in particular, the Hotels etc., Shops, Health and Miscellaneous categories. The value of total building work commenced for 1996–97 continued to decline, falling 5.4% from the previous financial year to \$1,181.9m.

The total value of building work done during the September quarter 1997 fell by 1.7% to \$349.7m compared with a 5.5% increase nationally. Compared with the September quarter 1996, South Australia had a 23.5% increase in the value of total building work done. This was higher than the national increase of 9.5%. For the 1996–97 financial year, \$1,275.9m of building work was done in South Australia, 5.7% more than the previous financial year.

The total value of building work yet to be done was \$309.1m at the end of September quarter 1997, a fall of 20.9% from the previous quarter while the corresponding national figure increased by 5.6% to \$11,246.1m. Expressed as a proportion of the national total, the total value of building work yet to be done in South Australia was 2.7% for the September quarter 1997.

## Value of building activity

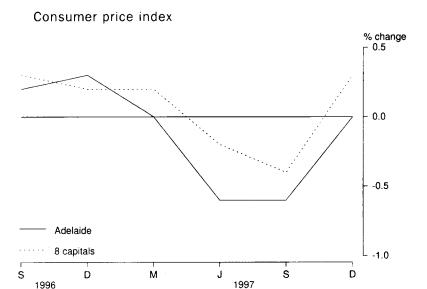

## Engineering construction

In South Australia, the value of engineering construction work done for the September quarter 1997 was down 16.9% to \$255.5m compared with a 12.0% fall nationally. South Australia's share of the national total of \$3,755m was 6.8%. The value of work commenced during the quarter for South Australia rose 32.1% to \$409.1m as did the corresponding national figure, increasing by 13.2% to \$5,003.1m. The State's proportion of national engineering and construction commencements was 8.2% for the September quarter 1997.

## PRICES

## Consumer Price Index

The Consumer Price Index (all groups) in Adelaide showed no change between the September 1997 and December 1997 quarters and a decrease of 1.1% between December 1996 and December 1997 quarters. Movements in groups between September and December 1997 included falls in housing and transportation, down 2.2% and 0.7% respectively and increases in health and personal care, up 3.5% and tobacco and alcohol, up 1.0%.

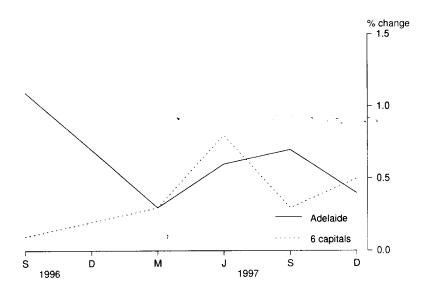

## House building materials index

A 0.4% increase was recorded for the Price Index of Materials used in House Building in Adelaide for the 1997 December quarter. The main contributors to the rise were plaster products, aluminium windows and doors and cupboards and fittings. The weighted average for the six State capitals recorded a rise of 0.5% for the same period.

For the 12 months to December 1997, Adelaide recorded a rise of 2.1% in the Index, with the weighted average of the six State capitals recording a rise of 1.8% for the same period.

## Materials used in house building

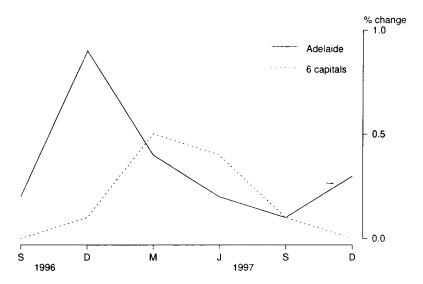

#### Non-house building materials index

For the December quarter 1997, the Price Index of Materials Used in Building Other than House Building showed a rise of 0.3% for Adelaide. Clay bricks, aluminium windows and non-ferrous pipes were the main contributors to the rise, with structural timber and paint recording decreases. For the same period, the weighted average of the six State capitals showed no movement.

The Index recorded a rise of 0.9% for the 12 months to December 1997, while a 1.1% rise was recorded for the weighted average of the six State capitals.

## Materials used in building other than house building

#### House prices indexes

During the December quarter 1997 the Price Index of Established Houses in Adelaide rose by 0.9%, while over the year to the December quarter the index increased 3.8%. Over the corresponding periods, the weighted average of the eight capital cities index increased 1.9% and 6.0% respectively.

The Project Home Price Index increased by 0.5% during the December quarter 1997 and 4.8% when compared to the same time the previous year. Nationally, the index rose 0.1% from the September quarter and 0.8% from the December quarter 1996.

#### Passenger transport cost index

The Passenger Transport Cost Index measures changes in the costs of operating a public transport passenger bus service in Adelaide. Costs covered include labour costs, leasing charges, registration and insurance, repairs and maintenance, fuel and overheads. The index has been compiled on a quarterly basis from September 1995 with a base of 100.0 in 1993–94. The September quarter 1997 index was 108.2, a 0.2% increase from the June quarter 1997. The index showed a 3.9% increase in the 12 months to September 1997.

#### LABOUR FORCE AND DEMOGRAPHY

#### Population

At 30 September 1997 the estimated resident population of South Australia was 1,481,599. This was an increase of 1,792 persons from the June quarter and was due to a natural increase of 1,322 persons and a net migration gain of 470 persons.

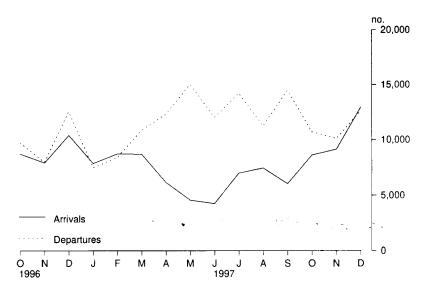

#### Short-term overseas visitor arrivals

In December 1997 there were 12,967 short-term overseas visitor arrivals to South Australia. This represents an increase when compared to both November 1997 and December 1996, up 41.9% and 24.6% respectively. Australia also experienced an increase when compared with November 1997, up 18.1%. However, when compared with the same time the previous year, total visitors fell 3.6%. The proportion of short-term visitors to South Australia rose from 2.4% in November to 2.9% in December 1997.

#### Short-term resident departures

There were 12,652 short-term resident departures in December 1997. This is approximately one quarter more than November 1997 (25.1%). However, when compared with December 1996 (12,552), there was little change, up 0.8%. Similar increases were recorded for Australia, up 29.3% from November 1997 and 2.0% from December 1996. South Australia accounted for 4.2% of short-term resident departures.

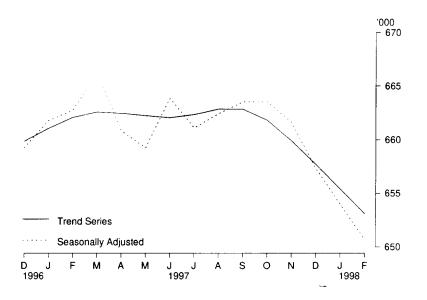

## Short-term arrivals and departures

#### **Employment**

The trend estimate of employed persons in South Australia was 653,100 in February 1998, 1.3% lower than the level of 12 months ago (662,000).

## Employed persons

## Unemployment

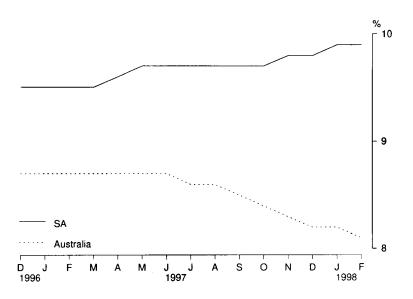

The trend unemployment rate for South Australia has generally risen over the past 12 months, up from 9.5% in February 1997 to 9.9% in February 1998.

At February 1998, the median duration of unemployment (one half of all observations lie above this value, and the other half below) in South Australia was 25 weeks, higher than the 17 weeks recorded 12 months ago.

In original terms, the teenage full-time unemployment rate in South Australia was 34.4% in February 1998, up from the 32.5% recorded in the previous month.

The trend estimate of the unemployment rate for Australia has decreased for eight consecutive months, reaching 8.1% in February 1998. This is considerably lower than the 8.7% recorded 12 months earlier.

## Unemployment rates: Trend

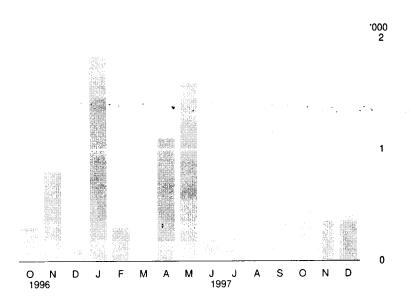

## Industrial disputes

There were 400 working days lost through industrial disputes during December 1997, the same amount as the previous month. South Australia had a low level of industrial disputation, contributing only 1.8% to the national level of 22,500 working days lost.

The number of working days lost in South Australia in the 12 months to December 1997 was 8,000, much lower than the 41,600 days lost in the 12 months to December 1996.

## Working Days Lost

#### Overtime

In original terms, the proportion of employees who worked overtime in November 1997 was 15.0%. The same percentage was recorded in November 1996.

In November 1997, employees who worked overtime recorded an average of 6.5 overtime hours per week. This was slightly higher than the 6.4 overtime hours recorded 12 months earlier.

#### INCOMES

#### Average weekly earnings

The trend estimate of average weekly ordinary time earnings of full-time adult male employees in South Australia has decreased slightly (0.1%), from \$696.10 in August 1997 to \$695.50 in November 1997. In contrast, earnings for females increased from \$586.90 in August 1997 to \$593.10 in November 1997.

Between Austust 1997 and November 1997, the trend estimate of average weekly total earnings of all employees (including part-time workers) in South Australia rose by 0.6% to \$545.50. Over the same period, the national level increased by 1.0% to \$593.70.

Note: Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

#### Award rates of pay

In the 12 months to June 1997, the weekly award rates of pay index for full-time employees in both South Australia and Australia increased by 1.4%.

For both full-time adult male and female employees in South Australia, the largest annual movement in the index occurred in Manufacturing, with increases of 2.0% and 6.8% respectively. In contrast, for the Communication industry division, both recorded a nil movement in the index.

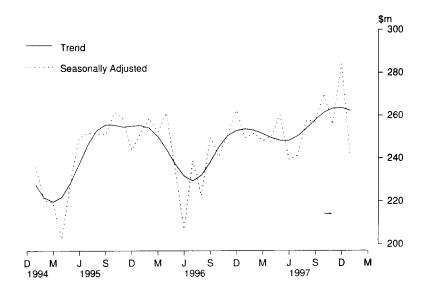

Note: June was the last month of issue of this index. It will be replaced by a wage costs index, due for release in late March 1998 and covering the December 1997 quarter. Non-wage costs, for example fringe benefits tax and payroll tax, will be added in consecutive stages to produce a composite labour costs index. This indicator should be available in early 1999.

#### FINANCIAL MARKETS

#### Housing finance

The trend estimate for the value of commitments decreased 0.5% during January 1998 to \$262.3m, the first monthly fall since May 1997. Despite the decrease, the trend was still 3.4% above January 1997. The seasonally adjusted value of commitments fell 15.3% to \$240.5m. Nationally, the trend was up for the month, 10.0% above the previous January.

## Secured housing finance commitments(a)

(a) Excludes alterations and additions. Includes refinancing.

Total housing finance commitments (original figures including alterations and additions) decreased 22.8% to \$219.8m, 10.9% below the previous January. Nationally new lending commitments were down 16.9%, marginally below January 1997. The number of dwellings financed in South Australia fell 19.9% to 2,563 with a 4.1% decrease in the average value to \$82,300.

Construction of dwellings decreased \$25.7m, down 23.1% from December 1997 and 13.3% below the previous January. South Australia's proportion of the nation's construction of dwellings dropped to 4.6%. Commitments for the purchase of established dwellings fell 16.6% to \$132.6m, 8.6% less than January 1997. Commitments for newly erected dwellings were down 31.0% to \$6.5m.

Refinancing decreased 36.7% to \$46.0m, marginally below January 1997 and representing 20.9% of total new lending commitments. Nationally, refinancing fell 12.6% for the month, down 15.5% compared with January 1997 and representing 16.2% of total new lending commitments.

Alterations and additions in South Australia decreased 12.1% to \$8.9m, 41.8% below the previous January.

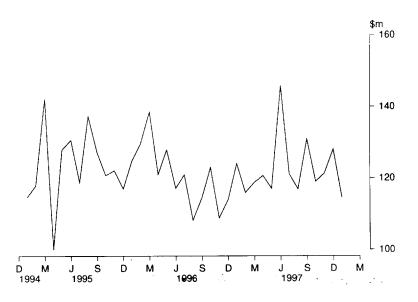

#### Personal finance

Total commitments for South Australia fell 15.8% to \$196.5m, 7.3% below January 1997. For Australia, total commitments fell 16.2% in original terms, 13.4% above the previous January. Seasonally adjusted, the national total translates to an increase for the month of 4.3%.

Fixed loan commitments for South Australia decreased 10.6% to \$114.5m, 7.7% below the previous January. The two main falls were debt consolidation, down 25.2% to \$7.8m, 31.0% below January 1997, and refinancing, down 13.1% for the month to \$11.1m, 44.9% below the previous January. Used motor cars and station wagons, the largest category, fell 2.8% to \$37.2m, 4.2% below January 1997. New motor cars and station wagons decreased 5.3% to \$15.1m, but were 3.9% up over the year. Household and personal goods were down 22.6% for the month to \$3.5m, 10.6% above the previous January. The only category to increase was commitments for individual residential blocks of land, up 14.6% to \$4.3m.

Total revolving credit facilities decreased 22.1% to \$82.0m, 6.9% below January 1997. Both secured and unsecured revolving credit facilities decreased, down 17.7% and 26.4% respectively.

#### Fixed loan commitments, all lenders

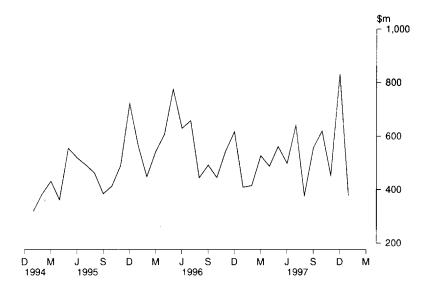

## Commercial finance

Total commercial finance commitments decreased 54.4% to \$379.1m, 7.3% below January 1997. Nationally the fall was 35.7% for the month, 15.2% lower than January 1997. South Australia's proportion of the national total dropped to 3.7%.

Revolving credit facilities decreased 58.7% to \$132.7m, 12.2% below the previous January. The bulk of the fall was in finance, investment and insurance, down \$130.6m to \$8.7m, which was however 63.7% above January 1997. In December 1997 this category had increased \$131.2m. The other main falls were manufacturing, down 40.0% to \$27.5m and wholesale trade, down 64.6% to \$6.5m. These categories also had substantial increases in December.

## Commercial finance commitments, all lenders

Commitments under fixed loan facilities decreased to \$246.5m (51.7%), 4.5% below the previous January. All categories were down, in particular, mining (down 96.1%), manufacturing (down 79.8%), property and business services (down 58.7%) and recreation, personal and other services (down \$79.4m). All these four categories had large increases in the previous month.

## Lease finance

New finance lease commitments resumed the downward trend evident since June last year with a fall of 23.5% to \$15.3m. However, the total for the month was significantly above January 1997 and 1996. Nationally the drop for the month was 28.4%, to be 10.3% above January 1997.

The main decrease was for new motor cars and station wagons not subject to depreciation, the largest category, which was down 25.3% to \$4.9m, however still 25.0% above January 1997. Construction and earthmoving equipment decreased 70.7% to \$0.6m, 52.9% below the previous January. This drop followed nine months with relatively high commitments for construction and earthmoving equipment. Of the four categories to increase, office machines had the largest increase, up 65.6% to \$1.4m.

#### FORWARD OUTLOOK

#### Composite leading indicator for Australia

The Composite Leading Indicator (CLI) is a single time series produced by aggregating eight individual economic indicators, and has been developed by the ABS as an experimental series to supplement existing forms of economic analysis and modelling.

The CLI summarises the early signals contained in a selection of economic indicators and is designed to assist the detection of turning points between successive expansions and slow downs of economic activity as measured by constant price GDP(A). It does not attempt to forecast the level of economic activity.

#### Composite leading indicator for Australia continued

In the September quarter 1997:

- the experimental CLI rose 0.03%, following rises of 0.17% and 0.13% in the March quarter 1997 and June quarter respectively.
- Of the eight components used in its compilation, four made positive contributions and three made negative contributions to the change in the September quarter 1997.
   The largest positive contribution continued to come from the All Industrials index component, while the largest negative contribution was from the trade factor.

The quarterly data are released in more detail in the *Australian Economic Indicators* (Cat. no. 1350.0). The CLI was the topic of the Focus article in the September 1993 edition of *South Australian Economic Indicators* (Cat. no. 1307.4). A review of the performance of the CLI and its components was published in the July 1997 issue of Cat. no. 1350.0.

#### Australian business expectations

Surveys of business expectations have been available to decision makers for a number of years from several sources. These surveys provided *qualitative* indicators in the form of the net proportion of businesses expecting a rise or fall in future business conditions. Since the December quarter 1993, the ABS has been compiling a *quantitative* indicator of business expectations in the form of an expected weighted aggregate change in a range of economic variables. These data are available on a quarterly basis in *Australian Business Expectations* (Cat. no. 5250.0).

*Short term*—South Australian businesses expect an increase of 0.2% in the sales of goods and services in the March quarter 1998 compared with the December quarter 1997. All other States (except the Northern Territory) expect a fall in the sales of goods and services, with Australia expecting a 0.3% decline.

*Medium term*—Businesses in South Australia expect sales of goods and services in the December quarter 1998 to be 4.3% above December quarter 1997, the highest of all States and Territories. The largest expected increases for South Australia were in Mining (15.7%) and Finance and Insurance (5.8%). The expectation for Australian sales of goods and services was a growth of 2.9%.

# FOR MORE INFORMATION...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

#### **ABS Products and Services**

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

## National Dial-a-Statistic Line

0055 86 400

Steadycom P/L: premium rate 25c/20 secs.

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

#### Internet

http://www.abs.gov.au

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
