INTRODUCTION

STATISTICS PRESENTED IN THIS PUBLICATION

This publication presents a range of education and labour force statistics produced from the 2001 Census of Population and Housing for the Australian Capital Territory (ACT). For comparative purposes, it includes 1996 Census data presented on 2001 Census geography.

The tables in this publication provide selected characteristics of the population for Statistical Divisions (SDs), Statistical Subdivisions (SSDs) and Statistical Local Areas (SLAs). The purpose of these tables is to allow a broad comparison of characteristics between geographic areas.

This publication also contains the Basic Community Profile (BCP) for the ACT. This set of tables is provided to illustrate the wide range of data available from the Census. The BCP consists of 33 tables. This publication contains tables 22 to 33 which focus on education and labour force characteristics. The remainder of the BCP, tables 1 to 21, is published in *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas, Australian Capital Territory* (cat. no. 2015.8).

The statistics in this publication are presented on the basis of where people were counted on Census Night ('as enumerated' counts).

One of the important features of the Census is that it describes the characteristics of Australia's population for small geographic areas and small population groups. While not available in this publication, data at the smallest geographic level (Collection District) are available in a range of census products. For more information on these products, please refer to the Appendix—Census Products and Services. Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *2001 Census Dictionary* (cat. no. 2901.0). The Explanatory Notes in this publication provide a discussion of the scope and coverage of the Census, the different measures of population, and the limitations of census data.

This publication is one of a series of publications which provide data at the SIA level for each state and territory. A similar publication is also available for the whole of Australia, providing data at SSD level. See the Appendix—Census Products and Services for more information.

SUMMARY OF FINDINGS

LABOUR FORCE

In the Australian Capital Territory (ACT), the labour force grew from 161,219 to 169,586 persons aged 15 years and over, an increase of 5.2%, compared with 6.6% for Australia.

EMPLOYED

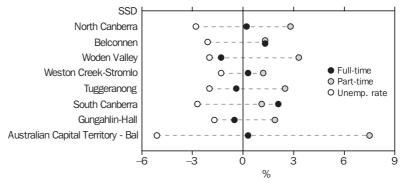

In 2001, there were 160,866 employed persons of which 107,179 were full-time workers and 50,263 were part-time. This represented an increase of 7.7% (11,451 persons) since 1996.

Full-time/Part-time

In 2001, there was an increase in the proportion of full-time workers who represented 63.2% of the labour force, up from 62.7% in 1996. This was the only increase of all states and territories.

In the period 1996 to 2001, the number of persons employed part-time grew from 44,750 in 1996 to 50,263 in 2001, an increase of 12.3%, compared with 17.6% for Australia. These workers represented 29.6% of the labour force in 2001, compared with 27.8% in 1996.

FULL/PART-TIME EMPLOYED AND UNEMPLOYMENT RATE, Difference in proportions of the labour 1996 to 2001 force—

Source: 1996 and 2001 Censuses. ABS

The Statistical Subdivisions (SSDs) to experience the largest increase in the proportion of full-time workers were South Canberra (to 67.9% in 2001 from 65.7% in 1996) and Belconnen (to 61.3% from 60.0%). Only three SSDs in the ACT recorded a fall in this proportion (Woden Valley (to 62.6% from 63.9%), Gungahlin-Hall (to 67.8% from 68.3%) and Tuggeranong (to 63.9% from 64.3%)).

Every SSD experienced an increase in the proportion of part-time workers. The largest were recorded in Australian Capital Territory - Bal (to 28.1% in 2001 from 20.6% in 1996) and Woden Valley (to 30.4% from 27.1%). The smallest increase was in the SSD of South Canberra (to 25.9% from 24.8%).

In 2001, high proportions of full-time workers were recorded in the metropolitan Statistical Local Areas (SLAs) of City (85.5%), Kingston (77.1%), Majura (76.8%) and Phillip (73.8%). Harman (88.3%) and Duntroon (83.9%), as expected of military bases, also recorded high proportions of full-time workers.

The highest concentrations of part-time workers, as proportions of persons in the labour force, were recorded in the SLAs of Acton (67.7%), Pialligo (36.8%) and Bruce (36.2%).

SUMMARY OF FINDINGS continued

Occupation

In 2001, the largest occupation groups were Professionals (41,976 persons or 26.1%), Intermediate Clerical, Sales and Service Workers (29,092 persons or 18.1%), Associate Professionals (22,782 persons or 14.2%), Managers and Administrators (18,372 persons or 11.4%), and Elementary Clerical, Sales and Service Workers (15,039 persons or 9.3%). These proportions are similar to those recorded in 1996.

Within the Canberra SLAs, high proportions of employed persons working as Professionals were recorded in City (50.6%), Aranda (41.4%), O'Connor (41.1%), Campbell (40.3%) and Cook (40.0%).

High proportions of persons employed as Intermediate Clerical, Sales and Service Workers were recorded in the metropolitan SLAs of Acton (25.9%), Latham (23.5%), Holt (22.9%) and Richardson (22.4%).

High proportions of persons working as Associate Professionals were recorded in Harman (33.1%), Hall (21.4%), Forrest (19.0%) and Greenway (18.1%).

High proportions of employed persons working as Managers and Administrators were recorded in the SLAs of Duntroon (77.4%), Majura (38.5%), Barton (25.2%), Forrest (22.3%) and City (22.2%).

Industry

In 2001, the four largest industries of employment in the ACT were Government Administration and Defence (38,475 persons or 23.9%), Property and Business Services (23,684 persons or 14.7%), Retail Trade (19,633 persons or 12.2%) and Education (14,276 persons or 8.9%). These industries were also the top four industries in the ACT in 1996.

Since 1996 there has been an increase in the proportions of persons working in Property and Business Services (to 14.7% from 10.7%) and Retail Trade (to 12.2% from 11.4%), while there was a decline in the proportion of persons working in Government Administration and Defence (to 23.9% from 25.5%) and Wholesale Trade (to 2.0% from 2.5%).

At the SIA level, high proportions of persons employed in Government Administration and Defence were recorded in Duntroon (83.8%), Harman (82.6%), Majura (74.4%), Kingston (41.5%) and Phillip (35.8%).

Some of the highest proportions of persons employed in Property and Business Services were recorded in the metropolitan SLAs of Forrest (29.4%), City (26.6%), Hall (25.3%), Barton (20.3%) and Yarralumla (20.2%).

High proportions of persons employed in Retail Trade were noted in the SLAs of Acton (24.0%), Conder (17.5%), Richardson (17.3%), Charnwood (16.8%) and Gilmore (16.3%).

The highest proportion of persons employed in the Education industry were in the SLAs of Aranda (17.9%), Acton (17.2%), City (16.1%) and Weetangera (16.0%).

UNEMPLOYMENT

The number of unemployed persons decreased by 26.1% to 8,720 in 2001 from 11,804 in 1996. The unemployment rate fell to 5.1% in 2001 from 7.3% in 1996. This compares with an unemployment rate of 7.4% for Australia, down from 9.2% in 1996.

SUMMARY OF FINDINGS continued

UNEMPLOYMENT continued

While the number of unemployed persons looking for full-time work fell by 36.1% (to 5,334 in 2001 from 8,351 in 1996), those unemployed persons looking for part-time work only decreased by 1.9% (to 3,386 in 2001 from 3,453 in 1996).

At the SSD level, the largest declines in the unemployment rates between 1996 and 2001 were recorded in North Canberra (to 6.9% from 9.7%), South Canberra (to 4.6% from 7.3%) and Belconnen (to 5.9% from 8.0%).

In 2001, the SLAs with the highest unemployment rate in Canberra were Acton (21.9%), Oaks Estate (14.5%), Turner (11.3%), Reid (11.2%) and Belconnen Town Centre (11.1%).

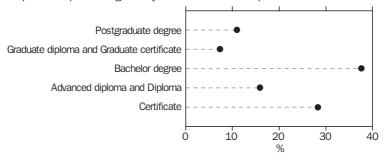

For those aged 15–24 years, the unemployment rate fell to 11.1% in 2001 from 14.6% in 1996. This compares with a decline to 13.8% from 15.7% for Australia.

The highest youth unemployment rates in Canberra were recorded in the SLAs of Oaks Estate (28.2%), Reid (24.8%), Acton (23.4%), Symonston (23.3%) and Turner (21.1%).

NON-SCHOOL
QUALIFICATION
Level of Education

In 2001, there were 112,578 persons aged 15 years and over with a qualification, accounting for 46.2% of all persons aged 15 years and over in the ACT. Between 1996 and 2001 this proportion rose from 40.4% (an increase of 19,691 persons). In Australia, the proportion rose to 34.7% from 30.0%.

NON-SCHOOL QUALIFICATION: LEVEL OF EDUCATION, Proportion of persons aged 15 years and over with a qualification—2001

Source: 2001 Census, ABS

Of those with a qualification, 37.6% (42,282 persons) held a Bachelor Degree, 28.3% (31,831 persons) held a Certificate, 18.3% (20,604 persons) held a Postgraduate Degree or Graduate Diploma and Graduate Certificate and 15.9% (17,861 persons) held an Advanced Diploma and Diploma as their highest qualification.

Of persons aged 15 years and over, the highest proportions of persons with a Bachelor Degree or higher as their highest level of qualification were recorded in the metropolitan SLAs of Barton (47.8%), Kingston (46.2%), Forrest (45.9%), Campbell (44.1%) and Aranda (44.0%). The Remainder of ACT recorded 31.2%.

High proportions with an Advanced Diploma and Diploma were recorded in the metropolitan SLAs of Harman (16.4%), Chapman (10.3%), Greenway (10.0%), Torrens (9.5%) and Fraser (9.4%). The Remainder of ACT recorded 5.0%.

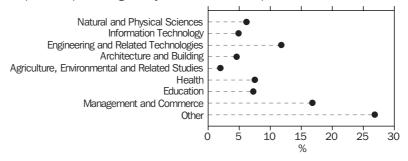

SUMMARY OF FINDINGS continued

Level of Education continued

The highest proportions of persons with a Certificate as their highest level of qualification were recorded in the metropolitan SLAs of Harman (26.0%), Majura (22.5%), Dunlop (20.7%), Banks (19.9%) and Conder (19.3%). The Remainder of ACT recorded 13.6%.

Field of Study

NON-SCHOOL QUALIFICATION: FIELD OF STUDY, Proportion of persons aged 15 years and over with a qualification—2001

Source: 2001 Census, ABS

Of all persons aged 15 years and over with a qualification, their highest level qualifications were most commonly held in the fields of Management and Commerce (22,588 persons or 16.8%), Engineering and Related Technologies (15,849 persons or 11.8%), Health (10,042 persons or 7.5%), and Education (9,762 persons or 7.3%). Other, which includes Society and Culture, Creative Arts, Food, Hospitality and Personal Services, and Mixed Programmes (35,984 persons or 26.8%) also recorded a high proportion.

BASIC COMMMUNITY PROFILE

ABOUT THE BASIC
COMMUNITY PROFILE

The key characteristics from the Census are summarised in a set of 33 standard tables which make up the Basic Community Profile (BCP).

The first 21 tables (B01–B21) provide a range of social, demographic and housing characteristics from the Census and are published for Australia and each state and territory in *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (cat. nos 2015.0–8). Similar BCP tables are available for other geographic areas, including Collection Districts, Local Government Areas, Postal Areas and Suburbs.

The remainder of the BCP series (B22–B33) are included in this publication and provide education and labour force related data.

BCPs for Statistical Local Areas are available from our web site free of charge.

For further information about the Community Profile Series, please refer to the Appendix—Census Products and Services.

SELECTED CHARACTERISTICS (SECOND RELEASE PROCESSING),

EXPLANATORY NOTES

SCOPE AND COVERAGE

- **1** The 2001 Census of Population and Housing was held on 7 August 2001. Australia's first national Census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to count the number of people in Australia on Census Night, identifying their key characteristics and those of the dwellings in which they live.
- 2 The Census aims to count every person who spent Census Night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people in Australia on Census Night who are excluded from the Census are foreign diplomats and their families.
- 3 The Census includes people on vessels in or between Australian ports, on board long distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on Census Night are counted while people leaving an Australian port for an overseas destination before midnight on Census Night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than one year, only basic demographic data are available. The Census includes homeless people and people camping out.
- 4 All occupied dwellings are counted in the Census with the exception of diplomatic dwellings. Unoccupied private dwellings are also counted with the exception of unoccupied dwellings in caravan parks, marinas and manufactured home estates, and units in accommodation for the retired or aged (self-care). Unoccupied residences of owners, managers or caretakers of such establishments are counted.
- **5** Details about the 2001 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *2001 Census of Population and Housing: Nature and Content* (cat. no. 2008.0).

STATISTICAL LOCAL AREA BOUNDARIES

6 The boundaries of Statistical Local Areas (SLAs) are revised from time to time to accord with changes to Local Government Area (LGA) boundaries and to meet needs for small area information. The boundaries shown in this publication are those applying at the time of the 2001 Census. Further information on geographic classifications is contained in *Statistical Geography: Volume 1—Australian Standard Geographical Classification (ASGC), 2001* (cat. no. 1216.0).

BASIC COMMUNITY PROFILE TABLES B22 TO B33

7 Tables numbered B22 to B33 contained in this publication are from the *Census of Population and Housing: Basic Community Profile* (cat. no. 2001.0). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to the Appendix.

ABS POPULATION ESTIMATES

8 This publication contains population counts based on a 'place of enumeration' basis. 'Place of enumeration' means where the person was counted on Census Night. The Census can provide person counts based on 'place of usual residence' for Collection Districts (CDs) and aggregations of CDs.

EXPLANATORY NOTES continued

ABS POPULATION ESTIMATES

- **9** The Estimated Resident Population (ERP) is the official Australian Bureau of Statistics (ABS) estimate of the Australian population. The ERP is based on results of the Census of Population and Housing. It is compiled as at 30 June of each census year and updated quarterly between censuses. The intercensal estimates of the resident population are revised following the next census.
- **10** The ERP is derived from census usual residence counts, by making the following three important adjustments:
 - An adjustment for census net underenumeration (or undercount). The level
 of underenumeration is derived from the Post Enumeration Survey which is
 conducted soon after the Census, and from estimates based on demographic
 analysis.
 - The inclusion of an estimated number of Australian residents who are temporarily overseas on Census Night and are therefore not covered by the Australian Census. The number of such people is estimated from statistics on overseas arrivals and departures.
 - The third adjustment occurs because the Census does not fall on 30 June. For example, the 2001 Census was held on 7 August. Back dating of population estimates from 7 August to 30 June is accomplished using data from birth and death registrations, overseas arrivals and departures, and estimates of interstate migration, for the period 1 July to 7 August.
- **11** ABS population estimates are published in *Australian Demographic Statistics* (cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (cat. no. 3201.0) produced annually. ERPs for SLAs are published in *Regional Population Growth, Australia and New Zealand* (cat. no. 3218.0).
- **12** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, states and territories. These projections are published every two years in *Population Projections, Australia* (cat. no. 3222.0).
- **13** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
 - Partial non-response: In some cases where an answer is not provided to a
 question an answer is imputed (often from other information on the form).
 In other cases a 'Not stated' code is allocated.
 - Processing error: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
 - Random adjustment: Table cells containing small values are randomly
 adjusted or suppressed to avoid releasing information about particular
 individuals, families, or households. The effects of these adjustments are
 statistically insignificant.
 - Respondent error: Because processing procedures cannot detect or repair all
 errors made by people in completing the forms, some remain in final data.
 - Undercount: Although the Census aims to count each person, there are some people who are missed and others who are counted more than once.
 The data in this publication are not adjusted for the net undercount.

DATA LIMITATIONS

EXPLANATORY NOTES continued

DATA LIMITATIONS continued

14 Further information on data quality is provided progressively in *Census Update* and in *2001 Census Papers*.

OVERSEAS VISITORS

15 Overseas visitors are defined differently for the 2001 Census. For the 1996 Census overseas visitors were defined as any person who stated they would be in Australia for less than 6 months. For the 2001 Census they are defined as any person who stated they would be in Australia for less than 12 months. Data for overseas visitors are restricted to age, sex and marital status.

LABOUR FORCE STATISTICS

- **16** The labour force statistics collected from the Census are valuable in providing data for small groups of the population. They are not to be confused with the statistics from the monthly Labour Force Survey, which are only available at state, territory and capital city level.
- **17** Census figures differ from the survey figures because of differences in scope, questionnaire design and collection procedures. For more information refer to *Census Working Paper 99/2—1996 Census: Labour Force Status* and the *2001 Census Fact Sheet—Labour Force Status*.
- **18** Official monthly labour force statistics are published in *Labour Force*, *Australia* (cat. no. 6203.0), produced monthly.

CALCULATIONS OF PROPORTIONS

- **19** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example in table 4 the proportion of persons aged 15 years and over with qualification for each geographic area is calculated by dividing the number of persons who stated that they had a non-school qualification by the total population of the geographic area and expressing the result as a percentage. The total population includes the category 'Not stated'.
- **20** For census variables which include data for overseas visitors i.e. age, sex and marital status, the category 'Overseas visitor' is also included in the denominator.

CALCULATION OF MEDIANS

- **21** A median is a measure of central tendency. It is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.
- **22** There are a number of issues to be aware of:
 - The categories 'Not stated' and 'Not applicable' are not included in the calculation of medians.
 - The category 'Overseas visitor', is excluded in the calculation of all medians in this publication.
 - If a median falls into a category that has a text-only label, then a value of '0' is used for that category. For this publication this is only relevant to the calculation of median income, as the income classification includes categories 'Nil income' and 'Negative income'.
 - When calculating a median on a classification containing ranges, the median may fall into a range which is open-ended. In this case, the median would be set to the number in the label. For example, in the calculation of 'Median weekly individual income', if the median was to fall in the last range \$1,500 or more, then \$1,500 would be allocated as the median.

EXPLANATORY NOTES continued

CALCULATION OF MEDIANS continued

■ 'Median monthly housing loan repayment' and 'Median weekly rent' are based on the ranged variables HLRD01 and RNTD01 respectively. This is due to difficulties associated with the large number of small cells when using individual dollar values to perform these calculations. An adjustment has been made to HLRD01, with the range \$1,500 and over changed to \$1,500-\$1,999 and an additional range \$2,000 and over added.

SELECTED AVERAGES

- **23** 'Median monthly housing loan repayments' is applicable to occupied private dwellings being purchased and includes dwellings being purchased under a rent/buy scheme.
- **24** 'Median weekly rent' is applicable to occupied private dwellings being rented. It excludes dwellings being occupied rent free, Visitor only households and Non-classifiable households.
- **25** 'Median weekly individual income' is applicable to persons aged 15 years and over.
- 26 'Median weekly family income' is applicable to families in occupied private dwellings. It excludes families where at least one family member aged 15 years and over did not state an income, and families where at least one family member aged 15 years and over was temporarily absent.
- 27 'Median weekly household income' is applicable to occupied private dwellings. It excludes households where at least one member aged 15 years and over did not state an income, and households where at least one member aged 15 years and over was temporarily absent.
- 28 'Mean household size' is applicable to occupied private dwellings. It is based on the number of persons usually resident in the dwelling. It includes partners, children, and co-tenants (in group households) who were temporarily absent on Census Night. A maximum of three temporary absentees can be counted in each household. It excludes Non-classifiable households.

UNADJUSTED DOLLARS

29 The 1996 Census dollar values for 'Median weekly individual income', 'Median monthly housing loan repayment' and 'Median weekly rent' have not been adjusted into 2001 dollars.

APPENDIX CENSUS PRODUCTS AND SERVICES

2001 PRODUCTS AND SERVICES

A wide range of products and services are available from the 2001 Census of Population and Housing. Brief descriptions of these are included below. For more detailed information on the 2001 Census range of products and services, please refer to the *2001 Directory of Census Statistics* (cat. no. 2910.0).

Census products fall into two broad types: reference products and data products. Most of the reference products from the 2001 Census are available free of charge from the ABS web site.

CENSUS REFERENCE PRODUCTS

2001 Census Dictionary

The 2001 Census Dictionary (cat. no. 2901.0) is a comprehensive reference guide to the 2001 Census of Population and Housing. The Dictionary includes a complete listing of 2001 Census classifications. It describes new topics introduced for 2001 and highlights classification changes that have occurred since the 1996 Census. The Dictionary also explains the concepts relevant to census collection, processing and output of data.

How Australia Takes a Census

How Australia Takes a Census (cat. no. 2903.0) provides information about the history of the census, the planning process and the way in which the census is conducted.

Geographic Classifications and Codes

Statistical Geography: Volume 1—Australian Standard Geographical Classification (ASGC) 2001 Census Edition (cat. no. 1216.0) provides information about the names and codes of the standard geographic areas used in the 2001 Census. Statistical Geography: Volume 2—Census Geographic Areas Australia 2001 Census Edition (cat. no. 2905.0) and Statistical Geography: Volume 3—Australian Standard Geographical Classification (ASGC) Urban Centres/Localities: 2001 Census Edition (cat. no. 2909.0) provide information on additional geographic areas.

2001 Census Statistical Local Area Maps These reference maps show the Statistical Local Areas (SLAs) from the 2001 Census. Each map shows the boundary of an SLA and the Collection District boundaries contained within.

Digital Boundaries

Census boundaries are made available electronically as *Digital Boundaries*. They include all of the Australian Standard Geographical Classification (ASGC), Urban Centres and Localities, and Census-specific areas.

CENSUS DATA PRODUCTS

Census Snapshots

Census Snapshots are a new product designed to provide a summary overview for selected geographic areas and are available from the ABS web site, free of charge. *Census Snapshots* contain subsets of Community Profile data, including person counts, age and birthplace, presented in a narrative form for easy access by a wide audience. A 1901 *Census Snapshot* for Australia is also available to celebrate the Centenary of Federation.

Estimated Resident Population

The Estimated Resident Population (ERP) is the official ABS population estimate. It is based on census usual residence counts, and is updated quarterly using births, deaths and migration data.

Two publications containing ERP data, based on 2001 Census figures are:

- Australian Demographic Statistics 2001 Census Edition, cat. no. 3101.0
- Regional Population Growth, Australia 2001 Census Edition, cat. no. 3218.0.

Selected Characteristics

The *Census of Population and Housing* suite of publications contains data and commentary on various person and dwelling characteristics from the 2001 Census at selected geographic levels. There are three series of publications in the suite with the following subtitles:

APPENDIX CENSUS PRODUCTS AND SERVICES continued

Selected Characteristics continued

- Selected Social and Housing Characteristics, Australia 2001, cat. no. 2015.0
- Selected Social and Housing Characteristics for Statistical Local Areas 2001, cat. nos 2015.1–8
- Selected Characteristics for Urban Centres and Localities, Australia 2001, cat. no. 2016.0
- Selected Characteristics for Urban Centres and Localities 2001, cat. nos 2016.1–7
- Selected Education and Labour Force Characteristics, Australia 2001, cat. no. 2017.0
- Selected Education and Labour Force Characteristics for Statistical Local Areas 2001, cat. nos 2017.1–8.

Community Profile Series

The Community Profile Series provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six Community Profiles:

- Basic Community Profile (cat. no. 2001.0) contains 33 tables of detailed data
 covering dwelling, household and family topics. This profile is available for all
 standard census geographic areas, Commonwealth and State Electoral
 Divisions, Postal Areas, and Suburbs, for the states/territories and Australia.
- Indigenous Profile (cat. no. 2002.0) contains 29 tables of key Census characteristics for Aboriginal and Torres Strait Islander people, for all ASGC areas from Statistical Local Area (SLA) level to whole of Australia, as well as Indigenous Areas and Aboriginal and Torres Strait Islander Commission (ATSIC) regions.
- *Time Series Community Profile* (cat. no. 2003.0) contains 22 tables comparing data from the 1991, 1996 and 2001 Censuses where the classifications are comparable. Data are presented on 2001 geographic boundaries.
- Usual Residents Profile (cat. no. 2004.0) contains 28 tables of data for persons usually resident in the selected area. This is the only community profile based on place of usual residence.
- Expanded Community Profile (cat. no. 2005.0) contains 49 tables available
 for SLAs and larger areas, comprising more detailed versions of some of the
 Basic Community Profile tables, plus additional tables.
- Working Population Profile (cat. no. 2006.0) contains 19 tables of labour force and related data on the characteristics of employed people.

Classification Counts

Classification Counts (cat. nos 2022.0–8) provide frequency counts for 2001 Census variables in complete classificatory detail, for every state/territory and Capital City Statistical Division, cross-classified by sex where applicable.

CLIB2001

CLIB2001 is an electronic product provided free of charge to public libraries through the ABS Library Extension Program. The product contains a large volume of tabulated data and software that allows access, display and printing of the data. For 2001 this product will be available as both a CD-ROM and (limited access) Internet-based product. CLIB2001 comprises the complete 2001 Census Community Profile Series and Classification Counts.

CDATA 2001

CDATA 2001 is a CD-ROM product which contains a large volume of tabulated census data, digital boundaries and base map data, with software to produce tables, maps and graphs of the data. The product is available at the Australia and state/territory levels.

APPENDIX CENSUS PRODUCTS AND SERVICES continued

CDATA 2001 continued

There are two *CDATA 2001* products available, offering different levels of functionality:

CDATA 2001—Full Geographic Information System (GIS): This version is aimed at the expert GIS user who requires detailed spatial data analysis using Structured Query Language, geocoding and importation of 'client own' data.

CDATA 2001—Quickbuild: This version has been designed for GIS users with more basic spatial analysis requirements. It allows users to produce data reports, graphs and/or maps. The product is aimed at inexperienced or intermediate GIS users. CDATA 2001—Quickbuild users will also have the option to upgrade to CDATA 2001—Full GIS if so desired.

Social Atlas Series

The *Social Atlas* (cat. nos 2030.0–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city. These will be released from November 2002.

AUSTRALIA IN PROFILE—A REGIONAL ANALYSIS

Australia in Profile—A Regional Analysis (cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 2001 Census, with the focus on regional distributions and comparisons.

CONSULTANCY SERVICES

The following census specific services are available:

- Customised Profiles Service provides community profile data tailored to your needs, on a variety of media.
- *Customised Table Service* provides detailed cross-classified tables tailored to your needs on a variety of media.
- Customised Geographic Data Reports Service provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).
- Customised Mapping Service provides both Customised Thematic Maps and Customised Reference Maps on request.

GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *2001 Census Dictionary* (cat. no. 2901.0).

Couple family

This is a family based on two persons who are in a registered or de facto marriage and who are usually resident in the same household. The family may include any number of dependents, non-dependents and/or other related individuals. As it is not necessary for a parent-child relationship to be formed, a couple family can consist of a couple without children.

Family

A family is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household. The basis of a family is formed by identifying either a couple, parent-child or other blood relationship. Information on persons temporarily absent on Census Night is considered in family coding.

Full-time/Part-time employment

This variable is based on the number of hours worked in all jobs held by employed people during the week before Census Night. It excludes any time off but includes any overtime or extra time worked:

- Part-time workers: employed people who worked up to 34 hours
- Full-time workers: employed people who worked 35 hours or more.

Geographic areas

The tables in this publication are at the levels of Statistical Local Area, Statistical Subdivision and Statistical Division, as defined by the 2001 Census edition of the Australian Standard Geographical Classification (ASGC).

Statistical Local Area (SLA): These areas consist of one or more Collection Districts and cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical Subdivision (SSD): These areas consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical Division (SD): These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross state or territory boundaries. However, the Other Territories, Jervis Bay Territory and the Territories of Christmas Island and Cocos (Keeling) Islands together form one SD. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

State/territory (STE): States and territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian states and five territories which are part of geographic Australia and included in the 2001 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands. In the ASGC, Jervis Bay Territory, the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands are combined to form Other Territories (OT).

For this series of publications, data for Other Territories are published down to SSD level in 2017.0 (Australia), and down to SLA in 2017.1 (New South Wales) for Jervis Bay Territory and 2017.5 (Western Australia) for Christmas Island and Cocos (Keeling) Islands.

GLOSSARY continued

Geographic areas continued

More information about definitions, and lists of codes and names of the geographic areas can be found in *Statistical Geography Volume 1—Australian Standard Geographical Classification (ASGC) 2001* (cat. no. 1216.0).

Household

A household is defined as a group of two or more related or unrelated people who usually reside in the same dwelling, who regard themselves as a household, and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, without combining with any other person.

Under this definition, in a group house where occupants share the dwelling, each occupant who usually supplies his/her own food should be counted as a separate household and issued with a separate Household Form. In practice, however, most such households usually only complete one form.

Household income

Household income is the sum of the individual incomes of each resident present in the household on Census Night. If any resident aged 15 years or over is temporarily absent, or does not state their income, then household income is not derived for that household

Although visitors' incomes are excluded in the calculation of household income, household income is still calculated for households that comprise only visitors, in order to collect data on household incomes in holiday resorts.

Income

People aged 15 years and over are asked to indicate their usual gross weekly income by selecting an income range on the census form. There are 16 options ranging from 'Negative income', 'Nil income' through to '\$1,500 or more per week'. For example, a person with a gross weekly income of \$650 per week would tick the range '\$600–\$699 per week'. Gross weekly income is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes: family allowance, parenting payment, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

Industry (of employment)

This variable describes the industries in which employed people (aged 15 years and over) work, and is coded to the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (cat. no. 1292.0).

Labour force

The labour force is made up of employed and unemployed people aged 15 years and over.

Labour force status

Labour force status identifies whether a person aged 15 years or over is employed, unemployed or not in the labour force.

Employed — includes those people who, during the week prior to Census Night, work for payment or profit; have a job from which they are on leave or otherwise temporarily absent; are on strike or stood down temporarily; or work as unpaid helpers in a family business.

Unemployed — includes people who, during the week prior to Census Night, do not have a job but are actively looking for work (either full-time or part-time) and are available to start work.

Not in the labour force — includes people aged 15 years and over who are not employed or unemployed as defined above. This includes people who are retired, pensioners and people engaged solely in home duties.

Non-School Qualification: Field of Study

This variable describes the field of study of the highest completed non-school qualification.

GLOSSARY continued

Non-School Qualification: Field of Study continued The full classification for levels of education and fields of education, together with an explanation of the conceptual basis of the classification, can be found in the publication Australian Standard Classification of Education (ASCED) (cat. no. 1272.0).

Non-School Qualification: Level of Education

This variable describes the level of education of the highest completed non-school qualification (e.g. bachelor degree, diploma).

The full classification for levels of education and fields of education, together with an explanation of the conceptual basis of the classification, can be found in the publication Australian Standard Classification of Education (ASCED)

(cat. no. 1272.0).

Occupation This variable describes the main job held by employed people (aged 15 years and

over) during the week prior to Census Night, and is coded using the ASCO — Australian Standard Classification of Occupations, Second Edition, 1996

(cat. no. 1220.0).

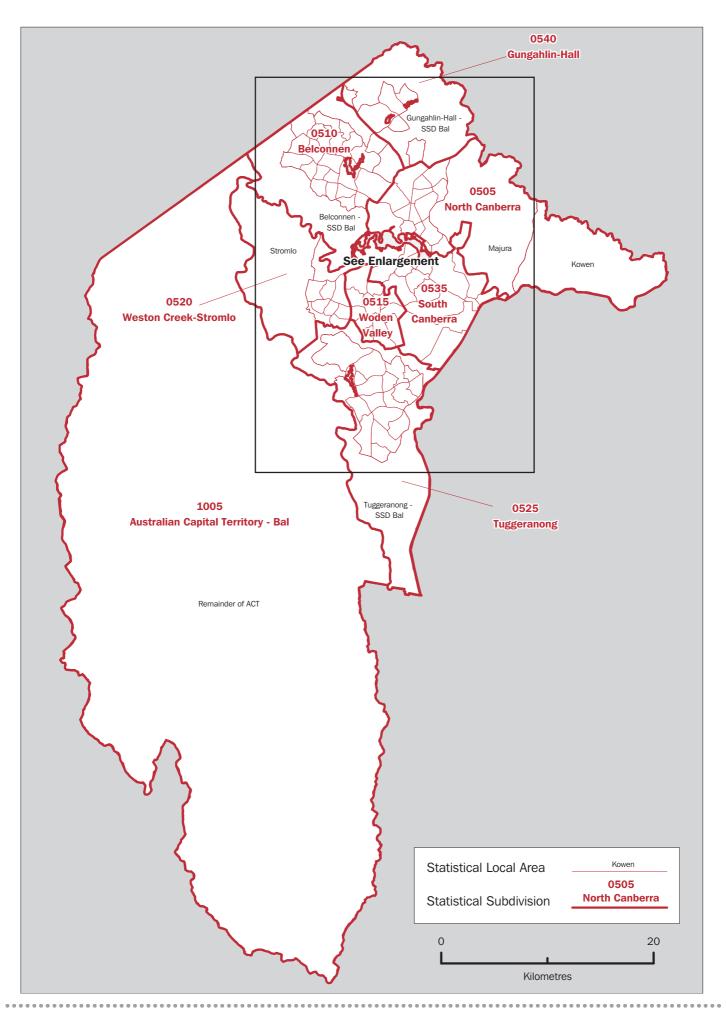

One parent family A one parent family consists of a lone parent with at least one child (regardless of

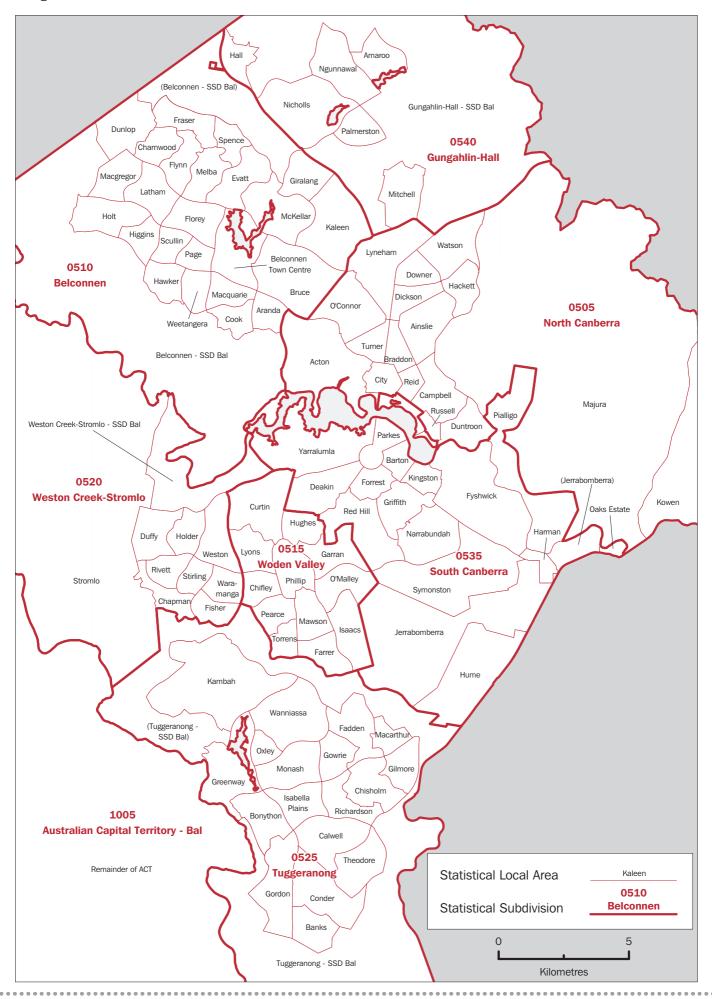

age) who is usually resident in the household. The family may also include any

number of other related individuals.

The unemployment rate is the number of unemployed people expressed as a Unemployment rate

percentage of the labour force.
