MAIN FEATURES

SUMMARY

The estimated resident population of Western Australia at 30 June 1999 was 1,861,016, representing an increase of 31,871 persons, or 1.7%, since 30 June 1998.

Almost three quarters (73%) of the State population resided in the Perth Statistical Division, this proportion having remained virtually unchanged since 1991.

In the 12 months to June 1999, population increased in seven of the nine statistical divisions in Western Australia: Perth (23,927 or 1.8%), South West (5,255 or 3.0%), Kimberley (1,845 or 6.7%), Lower Great Southern (544 or 1.1%), Midlands (459 or 0.9%), South Eastern (459 or 0.8%) and Central (35 or 0.1%).

Population fell in the Pilbara and Upper Great Southern Statistical Divisions by 1.4% (568 persons) and 0.4% (85 persons) respectively.

POPULATION, Rate of Growth — Statistical Divisions

(a) Average annual growth rate

MEDIAN AGE

The population of Western Australia, like the Australian population in general, has been ageing steadily over the last twenty years. The median age of the Western Australian population rose from 27.9 years in 1979 to 33.9 in 1999. In comparison, the median age of the Australian population rose from 29.1 years to 34.9 years over the same period.

Among the statistical divisions in Western Australia, the highest median age was recorded by the Lower Great Southern (36.1 years), followed by the South West (35.5 years) and the Midlands (35.4 years).

Four statistical local areas outside Perth had a median age over 40 years. These were Sandstone (42.9 years), Tammin (41.3 years), York (40.4 years) and Shark Bay (40.2 years). Of these, however, only York had a population of more than 500 people. The highest median age within the Perth Statistical Division was recorded by the City of Nedlands (39.5 years).

Lower median ages occurred in the remote northern and eastern parts of the State, with the Kimberley having the lowest median age (28.0 years) of any statistical division. This reflects the younger "working age" profile of the adult population and the relatively large proportion of Indigenous residents, who have generally higher fertility rates and lower life expectancy.

MAIN FEATURES *continued*

As would be expected, statistical local areas with a large proportion of Indigenous people also had a younger age profile and a lower median age. Many such areas had a median age under 29 years. These included Ngaanyatjarraku (26.6 years), Derby - West Kimberley (26.8 years), Halls Creek (26.8 years), Mullewa (26.9 years), Wyndham - East Kimberley (27.8 years), Laverton (27.8 years), Kalgoorlie (28.1 years), Coolgardie (28.6 years), Roebourne (28.6 years) and Ashburton (28.9 years).

PERCENTAGE OF POPULATION IN AGE GROUPS, Western Australia

PERSONS AGED 0-14 YEARS

In 1999, children aged 0-14 years formed 21% of the population of the State and of Australia. The growth rate for this age group, in the 12 months to June 1999, was 0.3%, compared with 0.1% nationally.

The statistical divisions with the largest proportion of children were the Kimberley and the Pilbara, each with about 28% of the population in this age group, while the smallest proportion occurred in the Perth Statistical Division (20%).

The smallest proportions of children in the Perth Statistical Division were recorded in inner city areas, notably Perth - Remainder (5%), Perth - Inner (6%), Fremantle - Inner (8%), Victoria Park (11%), Subiaco (12%) and Vincent (13%).

A statistical local area in the Perth Statistical Division with an exceptionally large proportion of children was Wanneroo - North West, where 30% of the residents (6,740 out of 22,487) were aged 0-14 years. This large outer suburban area includes some of the newest single family housing in the Perth Statistical Division.

MAIN FEATURES *continued*

In the remainder of the State, the largest proportions of children were in the Shires of Murchison, Ashburton, Mullewa, Dalwallinu and Kent, all of which had more than 30% of the population in this age group. The remote Shire of Wiluna had the smallest proportion of children (8%), followed by Sandstone (13%), Cue (16%) and Menzies (16%).

PERSONS AGED 15-64 YEARS

In the 12 months to June 1999, the number of adults in the 15-64 age group in Western Australia grew by 2.1% to an estimated 1,267,120 persons, representing 68% of the total State population. Nationally, the number of people in this age group grew by 1.5% over the same 12 month period.

The South Eastern and Pilbara Statistical Divisions had the largest proportion of people in this age group (70% in each case), followed by the Perth Statistical Division (69%) and the Kimberley Statistical Division (68%).

In the northern and eastern parts of the State, the presence of remote mining operations resulted in an increased proportion of "working age" adults (relative to children and older persons) in statistical local areas such as Wiluna, Leonora, Laverton, Menzies and East Pilbara.

Within the Perth Statistical Division, inner city areas had the largest proportion of people in the 15-64 age group. These included the statistical local areas of Perth - Remainder (83%), Fremantle - Inner (82%), Perth - Inner (80%), Subiaco (77%) and Vincent (74%).

PERSONS AGED 65 YEARS AND OVER

In the 12 months to June 1999, the number of older people (aged 65 years and over) in Western Australia rose by 2.3%, faster than the national increase in this age group over the same period (1.8%). Within Australia, only the Australian Capital Territory (4.0%) and the Northern Territory (3.4%) experienced faster growth.

Of the 196,196 older people in Western Australia in June 1999, 20,717 (11%) were aged 85 years and over. Over the past five years, the number of people aged 85 years and over has increased by 32% from 15,688 in 1994 to 20,717 in 1999. This compares with a total population growth of only 9% over the same period.

In June 1999, people aged 65 years and over accounted for 11% of the State population. However, this proportion was larger in the statistical divisions of the Lower Great Southern (13%) and the South West (12%). In contrast, the Pilbara and the Kimberley had only 2% and 4% of their respective populations in this age group.

Within the Perth Statistical Division, the proportion of older persons was considerably larger than the State proportion in a number of statistical local areas, including Claremont (19%), Victoria Park (18%), Stirling - South East (17%), Cambridge (16%), Nedlands (16%) and Belmont (15%). These are mainly older established residential areas close to the central business district. In contrast, the statistical local area of Joondalup - North, a newer residential area on the northern fringes of the metropolitan region, had the smallest proportion of older persons in the Perth Statistical Division (6%).

SELECTED AGE GROUPS, Statistical Divisions

Outside of Perth, the statistical local areas of Tammin (19%), Albany - Central (18%) and Mandurah (17%) had the largest concentrations of persons in the 65 years and over age group. The smallest proportions occurred in the Pilbara, in the four Shires of Roebourne (1.6%), Ashburton (2.0%), Port Hedland (2.4%) and East Pilbara (2.7%), as well as in the Eastern Goldfields region, notably Coolgardie (1.8%) and Laverton (2.5%).

SEX RATIO

There were 937,021 males and 923,995 females in Western Australia in June 1999, giving a sex ratio (number of males per 100 females) of 101.4.

Males outnumbered females in all statistical divisions except Perth where there were 685,681 females and 678,507 males. The sex ratio ranged from 99.0 in Perth to 124.7 in the Pilbara.

For Pilbara residents in the 15-64 years "working age" group, the excess of males over females was even greater, there being 132.8 males for every 100 females. In the Pilbara shires of Ashburton and East Pilbara, which are dominated by the mining and pastoral industries, the sex ratio for this age group was 145.0 and 151.5 respectively.

The sex ratio for persons aged 15-64 years was similarly high in the South Eastern Statistical Division (132.3). In other statistical divisions, there was less of an imbalance between the sexes, with Perth having the most even ratio of 101.1 males to 100 females.

SEX RATIO (a), Statistical Divisions

(a) Number of males per 100 females.

MAIN FEATURES *continued*

In the 65 years and over age group, the number of females exceeded the number of males in the Western Australian population, there being 80.2 males for every 100 females. However, the sex ratio in this age group varied significantly across statistical divisions, ranging from 76.0 in Perth to 118.7 in the Pilbara.

The excess of females over males in this older age group was greatest in the inner suburban areas of Perth, especially Claremont, Victoria Park and Subiaco, where the sex ratio was 50.7, 54.9 and 55.9 respectively.

RATE OF GROWTH

Perth Statistical Division

In the 12 months to June 1999, the estimated resident population of the Perth Statistical Division increased by 1.8% to 1,364,188 persons.

The City of Stirling, which comprises three statistical local areas, continued as the most populous local government area, with a total of 176,108 residents. This was followed by the Cities of Joondalup (comprising two statistical local areas) with 156,482 residents and Melville with 96,923 residents.

Most local government areas in the Perth Statistical Division recorded population increases in 1998-99, the exceptions being Vincent and Peppermint Grove, which recorded small losses. The fastest rate of growth occurred in the Cities of Perth (7.1%), Wanneroo (4.8%) and Belmont (4.7%).

In numeric terms, the local government area with the largest increase was the City of Wanneroo (comprising three statistical local areas), which grew by 3,415 persons. Large increases were also recorded in the Shire of Swan (2,720), and the Cities of Cockburn (2,554), Gosnells (2,365) and Rockingham (2,121).

Of the statistical local areas in the Perth Statistical Division, Swan, as in previous years, had the largest increase, the additional 2,720 persons (3.5%) bringing its total population to 80,078. However, the statistical local area with the fastest rate of growth was Perth - Inner, which increased by 13.5% (57 persons), bringing its total population to 480.

POPULATION, Rate of Growth — Fastest Growth SLAs, Perth

(a) Average annual growth rate

MAIN FEATURES *continued*

Over the five year period 1994-99, the statistical local areas of Wanneroo - North West and Joondalup - North East maintained the highest annual average rate of growth (9.7% and 5.6% respectively). These were followed by Wanneroo - North East and Rockingham, which had average annual growth rates of 5.4% and 4.8% respectively.

Rest of State

In 1998-99, the estimated resident population of the rest of the State increased by 7,944 to 496,828, an increase of 1.6%.

The South West continued as the most populous statistical division outside Perth, its population growing from 177,582 to 182,837, an increase of 5,255 persons (3.0%). The least populated statistical division was the Kimberley with 29,527 persons. However rapid population growth continued in the Kimberley, which increased by 6.7% (1,845 persons) in the twelve months to June 1999.

Just over half the statistical local areas outside Perth (59 out of 113) experienced some population growth. The largest growth areas were located in the South West Statistical Division. These included Busselton which increased by 1,208 persons (5.9%), Harvey which increased by 870 persons (5.1%) and Dardanup which increased by 759 persons (9.7%).

Mandurah, the most populous statistical local area outside Perth with 44,038 residents, continued to grow, albeit at a slower rate, increasing by 1.4% (603 persons) in 1998-99. Between 1994 and 1999, Mandurah's average annual growth rate was 4.3%.

Fastest growth occurred in the Derby-West Kimberley statistical local area, which grew by 10.4% to 7,783 persons in 1998-99.

The largest population loss in that 12 month period occurred in Geraldton (467 persons), followed by Ashburton (402 persons), Coolgardie (328 persons) and East Pilbara (285 persons).

The statistical local area with the fastest decline in 1998-99 was Carnamah, where the population fell by 7.2% (70 persons) to 900 persons.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains preliminary estimates of the resident population of Western Australia by age and sex at 30 June 1999. Data have been compiled for Statistical Divisions, Subdivisions and Statistical Local Areas (SLAs).

2 The estimated resident population (ERP) is the official ABS estimate of the Australian population.

METHODOLOGY

3 The total population of each SLA is based on results of the 1996 Population Census and calculated for post-census dates by a linear regression model which uses independent indicators of population change such as dwelling approvals and medicare enrolments. These intercensal estimates of the resident population are revised each time a population census is taken.

4 The age and sex estimates were prepared using the cohort component method. Post-censal age distributions were obtained by advancing the age and sex estimates for 30 June 1996 to the next age, subtracting deaths and adding births and net estimated inter-regional and overseas migration. Inter-regional and overseas migration was estimated from the analysis of arrivals and departures data and individual SLA profiles derived from the 1996 census.

5 Other relevant information is also used to supplement the estimates from the regression model when preparing the published estimates. This includes information on significant local factors which might have caused population changes during the relevant period.

6 After each Census final estimates for the preceding intercensal period are calculated by incorporating an additional adjustment (intercensal discrepancy) to ensure that the total intercensal increase at each age agrees with the difference between the estimated resident population at the two respective census dates.

7 A detailed explanation of the concept of estimated resident population, as adopted by the ABS for official population estimates, is contained in the ABS Information Paper: *Population Estimates: Concepts, Sources and Methods* (Cat. no. 3228.0).

Average annual rate of growth

8 The average annual rate of population growth, r , is calculated as a percentage using the formula:

$$r = \left(\sqrt[5]{\frac{P_{99}}{P_{94}}} - 1 \right) \times 100$$

where P_{94} is the ERP at 30 June 1994 and P_{99} is the ERP at 30 June 1999.

GEOGRAPHIC BOUNDARIES

9 The geographic areas used in this publication are defined in the *Australian Standard Geographical Classification, 1999 Edition* (Cat. No. 1216.0). The Cities of Perth, Fremantle, Joondalup, Stirling, Wanneroo and Albany comprise a number of SLAs.

10 SLAs are marked (C) for City, (T) for Town or (S) for Shire. The names and designations are as they existed at 1 July 1999.

11 From 1 July 1999, the Shire of Wanneroo became a City and an area of 469 ha was transferred from Joondalup (C) to Wanneroo (C).

14 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues twice weekly a *Release Advice* (1105.0) which lists publications to be released in the next four working days. These are available from any ABS office or on www.abs.gov.au.

OTHER SERVICES

15 The data in this publication are also available on floppy disk.

16 Estimates of the resident population by age and sex are available for census collection districts (CDs) and CD-derived postal areas on a consultancy basis. Prices are available on application.

17 Population projections data at SLA, CD and postal area level are available on a consultancy basis. Prices are available on application.

18 Further information on the above services can be obtained by ringing Sue Lee on (08) 9360 5935.
