INTRODUCTION

This publication provides a comprehensive range of statistics on young people aged 12–25 years in New South Wales, using data from the 1996 Census of Population and Housing. The report is one of a series produced for each Australian State and Territory, jointly published by the National Youth Affairs Research Scheme (NYARS) and the Australian Bureau of Statistics (ABS). NYARS was established in 1985 as a cooperative funding arrangement between the Commonwealth and State and Territory Governments to facilitate nationally based research into current social, political and economic factors affecting young people. NYARS is administered under the auspices of Youth Ministers through a working group of the Ministerial Council on Education, Employment, Training and Youth Affairs. Research undertaken assists in the formulation, implementation and assessment of policy by Commonwealth, State and Territory Ministers for Youth.

A similar series, using 1991 Census data, was jointly published by the ABS and NYARS during 1992 and 1993.

The publication features summary tables of selected characteristics of young people at national and local government area levels. More detailed information is presented in five subject-based chapters: population, cultural diversity, living arrangements, education and working life.

Within these broad subject headings, the publication also considers young people in the context of age, sex, and cultural diversity. Comparative data from the 1986 and 1991 Censuses are also included in some tables to provide a time dimension.

CHAPTER 1 **SELECTED CHARACTERISTICS**

NATIONAL SUMMARY—MAIN FINDINGS

On census night 1996, 3,636,900 12–25 year-olds were counted in Australia, representing over one-fifth (21%) of Australians of all ages.

In New South Wales, the most populous State, they numbered 1,201,779, representing one-third of Australia's young people. The Australian Capital Territory had the highest proportion of young people (24%).

Young males outnumbered young females in all States and Territories. Nationally, there were 48,800 more 12–25 year-old males than females.

Cultural diversity

Almost 3% (99,500) of Australia's young people were of Indigenous origin. In the Northern Territory, people who reported that they were of Indigenous origin comprised almost one-third (32%) of all 12–25 year-olds, but in Victoria, they made up fewer than 1% of young people.

Just over 14% of young people in Australia had been born overseas. For 5%, their country of birth had been one of the main English-speaking countries (Canada, Ireland, New Zealand, South Africa, United Kingdom, and the United States of America). The other 9% had been born in other countries.

A high proportion of young people (15%) spoke languages other than English. More than 28% of the Northern Territory's 12–25 year-olds, and 20% of young people in Victoria, reported speaking a language other than English at home.

Living arrangements

Over 42% of young people in Australia were living with their parents as dependent children—either children aged 15 years or under, or dependent students aged 15–24 years. Another 20% lived with their parents as non-dependent children.

Almost one-quarter (24%) of young people had formed families or partnerships, or were living independently, alone or in group households.

Education

Over 87% of Australian 12–17 year-olds, and almost 30% of 18–25 year-olds, were attending schools or other educational institutions. The highest levels of educational participation were reported in the Australian Capital Territory (92% of 12–17 year-olds, and 43% of 18–25 year-olds), and the lowest, in the Northern Territory—75% and 14% respectively.

New South Wales had the highest proportion (32%) of any State or Territory of young people (18–25 years) with post-school qualifications. Nationally, the proportion was 29%.

Working life

Almost one-half (48%) of Australian 15–19 year-olds, and 78% of 20–25 year-olds, were in the labour force, that is, they were employed, or looking for work.

Among young people aged 15–19 years, the highest proportion (23%) were working part-time, compared with 14% in full-time work. For 20–25 year-olds, these positions were reversed—47% were working full-time, and 19% part-time.

Unemployment

Unemployment rates among young people were at 19% for 15–19 year-olds, and 13% for 20–25 year-olds.

Young people's labour force participation is often influenced by their continuing participation in education, and an alternative measure of unemployment levels is the percentage of unemployed in the whole age group. In 1996, this proportion was 9% for 15–19 year-olds, and 10% for 20–25 year-olds.

Income

The median weekly income for 15–25 year-olds in 1996 was \$181.

1.1 YOUNG PEOPLE AGED 12–25 YEARS, National Summary

(a) Proportion of the population who stated that they were employed, or looking for work.

(b) Proportion of the labour force who were looking for work.

(c) Includes persons enumerated in unincorporated areas.

CHAPTER 2

POPULATION

MAIN FINDINGS

On census night (6 August 1996) 1,201,779 young people aged 12–25 years were counted, constituting 20% of all people in New South Wales.

1986 to 1996

Between 1986 and 1996, New South Wales' census count increased by 614,487 (11%) to 5,995,545. The number of young people fell by 25,305 or 2% over the same period.

Young people in New South Wales represent a declining proportion of the total, falling from 23% in 1986 to 21% in 1991, and then to 20% in 1996. This trend can be expected to continue, since the proportion aged 0–11 years has also declined, from 18% in 1986 to 17% in 1996.

YOUNG PEOPLE, Proportion of All Persons

Sex and age

There were slightly more males than females in the 12–25 years age group (609,908 compared with 591,871). Among people aged 26 years and over, the number of females (1,939,155) exceeded the number of males (1,825,904).

Geographic distribution

In 1996, the highest number of young people were counted in the Statistical Division of Sydney (766,391), representing 64% of all young people in New South Wales. Sydney and Murrumbidgee Statistical Divisions had the highest proportion of 12–25 year-olds (both with 21%). They were closely followed by Central West, Northern, Hunter, and Illawarra Statistical Divisions (all 20%).

Only four Statistical Divisions registered increases in numbers of young people between 1991 and 1996 (Hunter, Illawarra, Richmond-Tweed and Mid-North Coast Statistical Divisions). The strongest growth was in the Richmond-Tweed Statistical Division, which increased by 12% (3,694).

MOVEMENT

Young people reported being more mobile than older people. Just over 40% of 12–25 year-olds reported living at a different address than five years previously, compared with only 33% of older people. A similar pattern was evident for residential movement within the previous twelve months, with 22% of young people and only 13% of older people at different address.

The greatest level of residential movement in both the last year and the last five years took place within the State of New South Wales. Among people who had moved within the previous five years, 90% of 12–25 year-olds, and 91% of older people, had moved within the State. Similarly, among those who had moved within the previous twelve months, 91% of young people and 92% of older people had moved within the State.

Young females in New South Wales were more likely to have moved than young males. In 1996, 43% of young women reported living at a different address from five years ago, compared with 37% of young men. For the older population, 32% of females and 34% of males were living at a different address from five years ago.

PEOPLE WHO HAD A DIFFERENT ADDRESS FIVE YEARS PREVIOUSLY

CHAPTER 3

CULTURAL DIVERSITY

MAIN FINDINGS

Indigenous people

In the 1996 Census, 27,821 or 2.3% of young people in New South Wales identified as Indigenous people. This proportion was slightly lower than the national average among young people (2.7%). The 0–9 years age group had the highest proportion of Indigenous people (3.4%) while the proportion of Indigenous people in the older population (aged 26 years and over) was just 1%.

Overseas-born

Almost 16% (190,193) of young people in New South Wales were born overseas. This is one of the highest proportions among the States and Territories. Only Western Australia had a higher proportion (19%), and nationally, the proportion is 14%. In contrast, 30% of people in New South Wales aged 26 years and older were born overseas.

Countries of birth

One-quarter (25% or 47,873) of overseas-born people aged 12–25 years originated from the main English-speaking countries (Canada, Ireland, New Zealand, South Africa, the United Kingdom and the United States of America). Among older people (aged 26 years and over), one-third (33% or 3,765,059) had been born in the main English-speaking countries.

OVERSEAS-BORN, Leading Countries of Birth

Among young people in New South Wales who arrived in Australia prior to 1986, the highest proportion were born in the United Kingdom (16%), followed by those born in Viet Nam (10%). Among those who arrived between 1986 and 1990, the highest proportion were born in the Philippines, New Zealand, Hong Kong, and Viet Nam (9% each).

Among those who arrived more recently (1991–1996), 12,045 were born in one of the main English-speaking countries, and 52,926 were born in other countries. However, the highest proportion (9%) were born in New Zealand, followed by 8% from Hong Kong.

OVERSEAS-BORN YOUNG PEOPLE, Birthplace and Year of Arrival

Birthplace of parents

Of young people in New South Wales who were born in Australia, 644,753 or 66% had both an Australian-born mother and father. Another 317,082 (33%) had at least one parent who had been born overseas. Almost 21% (208,439) had at least one parent born in a non-main English-speaking country.

Languages spoken at home

Almost one-fifth (19%) of young people spoke a language other than English at home. Of these, 15% spoke a Chinese language, and another 15% spoke Arabic (including Lebanese). Among people aged 26 years and over, the most common languages spoken at home other than English were also Chinese languages (15%).

Proficiency in English

The majority (78%) of young people in New South Wales reported speaking English only. Of those young people who spoke another language, 92% reported that they spoke English very well or well.

CHAPTER 4

LIVING ARRANGEMENTS

MAIN FINDINGS

Marital status

Most 15–25 year-olds (76%) in New South Wales were not married. Almost 8% reported being in a registered marriage, and 6% in a de facto marriage. Young females were more likely than young males to be in a partnership (19% compared with 10%).

Living arrangements

Almost 43% of 12–25 year-olds were living with their parents as dependent children. Another 26% of young males, and 17% of young females, were living as non-dependent children with their parents. Young women were more likely than young men to have moved from the family home, forming partnerships and their own families (18% compared with 8% of young males).

YOUNG PEOPLE—Living Arrangements

Living arrangements varied between cultural groups. Almost 20% of young women from non-main English-speaking countries, and 26% of Indigenous young women, had formed partnerships, or their own families. High proportions (29%) of young people from non-main English-speaking countries were living with their parents as dependent students.

Type of dwelling

About 3% of 12–25 year-olds in New South Wales had spent census night in a non-private dwelling. The largest numbers of these young people were in boarding schools or residential colleges (18,031), or staying at hotels and motels (8,962). Another 4,692 young people reported having no usual address.

Type of tenure

A high proportion (59%) of young people occupied dwellings which were owned or being purchased, compared with 69% of people aged 26 years and over.

In comparison, more young people (33%) than older people (aged 26 years and over) (22%) lived in rented dwellings. Almost 64% of Indigenous young people, and 45% of those born overseas in non-main English-speaking countries, were in rented dwellings.

(a) Includes dwellings which were occupied rent free, or under a life tenure scheme.

(b) Comprises non-private dwellings, and migratory or off-shore collection districts.

(c) The main English-speaking countries (other than Australia) are: Canada, Ireland, New Zealand, South Africa, the United Kingdom and United States of America.

MAIN FINDINGS

Attendance at educational institutions

Over half (55% or 664,049) of all 12–25 year-olds were attending an educational institution in 1996. This is an increase from 1991 (53%). The participation rate was the same for both males and females (55%). Most of these young people (63%) were attending secondary school, with a further 5% at primary school.

Between 1991 and 1996 the proportion of all young people who were attending school increased from 36% to 38%. Over the same period, the proportion of young people attending higher education institutions increased from 8% to 9%.

ATTENDANCE AT EDUCATIONAL INSTITUTIONS, 12–25 years

Given the legal age requirement for school attendance, education participation rates were highest for the younger age groups. Almost all (95%) of those in the 12–14 years age group reported that they were still at school, with the majority (166,029) attending government schools. Among 15–17 year-olds, educational participation was lower (81%), with 76% at school and 5% in post-secondary education.

In 1996 equal proportions of young males (8%) were attending University or tertiary institutions and Technical or further educational institutions. In contrast, a higher proportion of young females were attending University or tertiary institutions (10%) than were attending Technical or further education institutions (6%).

Non-main English-speaking birthplace

Two-thirds (67%) of young people in New South Wales who were born overseas in a non-main English-speaking country were attending an educational institution at the time of the 1996 Census. This is much higher than the general level of educational participation for young people (55%) and suggests the presence of an overseas student population. Almost 19% of young people born overseas in a non-main English-speaking country reported attending a University or tertiary institution, compared with only 9% of all young people in New South Wales.

Indigenous people

Among Indigenous young people in New South Wales, 12,275 (44%), were attending an educational institution. Participation was highest among the younger age groups with 91% of 12–14 year olds and 57% of 15–17 year olds in education. Lower levels of educational participation were reported for Indigenous people aged 20–25 years (12%), and just 3% of all Indigenous young people in New South Wales reported attending a University or other tertiary institution.

Education and labour force status

Many young people attending educational institutions were also employed. Among 15–25 year-olds who were attending a tertiary or other institution, 57% were employed either full-time or part-time. In 1996, 37% of young people attending a tertiary or other institution full-time were also working part-time. In 1991, only 29% of full-time students were working part-time, reflecting the general increase in part-time work.

Qualifications

New South Wales had the highest proportion (32%) of people aged 18-25 years with post-school qualifications of all States and Territories.

Also, young people in New South Wales were more highly qualified in 1996 than they were in 1991. The proportion of 15–25 year-olds with post-secondary qualifications increased from 21% to 24%. Among older persons (aged 26 years and over) the proportion increased from 36% to 39%.

Between 1991 and 1996, the proportion of young females holding a bachelor degree or higher increased from 4% to 8% and for young males, from 3% to 5%.

While similar proportions of young males and females held post-school qualifications (21% and 22% respectively), the level of qualification varied between the sexes. The most common qualification held by young males was skilled vocational (11%), followed by a bachelor degree (5%). For young females, the most common qualification was a bachelor degree (7%), followed by basic vocational (4%).

HIGHEST QUALIFICATION, Persons aged 15–25 years

(b) Includes Hairdressing and beauty therapy, Food and hospitality services, and Transport. Also includes Field of study inadequately described.

(c) Includes Field of study not stated.

CHAPTER 6

WORKING LIFE

MAIN FINDINGS

Labour force status

In New South Wales, at the time of the 1996 Census, there were 606,210 15–25 year-olds in the labour force; that is, they were either employed or looking for work. They made up 22% of the total labour force (2,806,544 people). The majority (83%) of these young people were employed.

Participation rates

The labour force participation rate for young people in 1996 was 64%. Participation among Indigenous young people was lower at 55%, and among young people born overseas in a non-main English-speaking country, the participation rate was 44%. This reflected the much higher level of educational participation by this group.

In 1996, fewer young women were in the labour force than young men (62% compared with 66%).

Full-time work

The proportion of young people employed in full-time work fell between 1991 and 1996 from 36% to 34%. This decrease was experienced equally by both young women and men and reflected the general move in the labour force from full-time to part-time work.

Part-time work

The proportions of both young and older people employed in part-time work have increased. Between 1991 and 1996, the proportion of young people in New South Wales who were employed part-time increased from 15% to 20%.

Among the 15–25 year-olds who were employed, 43% of young women, and 28% of young men, were employed part-time.

Unemployment

In 1996, the unemployment rate for young people in New South Wales was 14%—that is, 14% of 15–25 year-olds in the labour force reported that they were looking for work. Among young males, the rate was 16%, compared with 13% for young females.

Another measure of unemployment among young people, which takes account of the varying labour force participation between age groups, is the proportion of the total population in the age group who were unemployed. In New South Wales in 1996, fewer than 6% of 15–17 year-olds were looking for work. Among other age groups, this proportion was almost 13% for those aged 18–19 years, 10% for 20–24 year-olds, and 8% for 25 year-olds. In the total population of 15–25 year-olds, 9% were unemployed.

Industry

In 1996, the largest proportions of young people were employed in Retail trade (25% or 132,084); Manufacturing (11%); and Property and business services (9%). Retail trade employed the highest proportions of both young men and women (23% and 28% respectively). For young men, the next highest were Manufacturing (15%) and Construction (11%). Property and business services, and Health and community services were the next largest employers of young women, each employing 11%.

EMPLOYED YOUNG PEOPLE, Leading Industries of Employment

Occupation

In 1996, 20% (105,402) of employed young people in New South Wales were employed as Intermediate clerical, sales and service workers. The largest proportion (20%) of older people were employed as Professionals. For young men, the most common occupations were Tradespersons and related workers (29%), and Labourers and related workers (14%). Young women were most commonly employed as Intermediate clerical, sales and service workers (30%) and Elementary clerical, sales and service workers (26%).

Income

A high proportion (16%) of young people reported receiving no income at all. In general, there were proportionally more young women at lower income levels and fewer at higher income levels. A partial explanation for this is women's higher participation in part-time work.

EXPLANATORY NOTES

ABOUT THIS PUBLICATION

1 This publication presents detailed information on young people (aged 12–25 years) in New South Wales, using data from the 1996 Census of Population and Housing. Some data from the 1986 and 1991 Censuses are also included for comparative purposes.

SCOPE AND COVERAGE

2 The 1996 Census of Population and Housing was held on 6 August 1996. The first Census was held in 1911 and since 1961 a Census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.

3 The Census aims to count every person who spends census night in Australia. This includes Australian residents in Antarctica and people in the Territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people who spend census night in Australia but are excluded from the Census are foreign diplomats and their families.

4 The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available, and they have been excluded from all tables in this publication. The Census includes people camping out and the homeless.

5 All private dwellings, except diplomatic dwellings, are included in the census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, and hotels are also included.

6 Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census – Nature and Content* (Cat. no. 2008.0).

ABS POPULATION ESTIMATES

7 This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. The Census can also provide person counts based on place of usual residence at the geographic level of Statistical Local Area.

ABS POPULATION ESTIMATES *continued*

- 8** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on census counts which have been adjusted to:
- include people who were in Australia on census night but were missed in the Census;
 - include Australian residents who were temporarily overseas on census night (these people were not within scope of the Census); and
 - exclude overseas visitors counted in the Census who were not usual residents of Australia.
- 9** The adjusted census count is updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.
- 10** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (Cat. no. 3201.0) produced annually.
- 11** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published every two years in *Population Projections* (Cat. no. 3222.0).

DATA LIMITATIONS

- 12** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated.
 - *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
 - *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families or households. The effects of these adjustments are statistically insignificant.
 - *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
 - *Undercount*: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.
- 13** Further information on data quality is provided progressively in *Census Update* and in *1996 Census Data Quality Working Papers*.

OVERSEAS VISITORS

- 14** Census data for overseas visitors (who intended to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors do not contribute to any tables.

LABOUR FORCE STATISTICS

15 The labour force statistics collected from the Census are valuable in providing data for small groups of the population. They are not to be confused with the statistics from the monthly Labour Force Survey, which are only available at State, Territory, capital city and regional level.

16 Census figures differ from the survey figures because of differences in scope, questionnaire design and collection procedures. For more information refer to Census Working Paper 94/1: *1991 Census Data Quality—Labour Force Statistics*.

17 Official monthly labour force statistics are published in *Labour Force, Australia* (Cat. no. 6203.0), produced monthly and *Labour Force, New South Wales and Australian Capital Territory* (Cat. no. 6201.1), produced quarterly.

CALCULATION OF PROPORTIONS

18 When calculating the proportion of the population with a particular characteristic 'Not stated' responses are included in the denominator. For example, in the Main Findings for chapter 3, the proportion of young people (12–25 year-olds) who had been born overseas was calculated by dividing the number of 12–25 year-olds who stated they had been born overseas by the total number of 12–25 year-olds (including those who did not report any country of birth details) and expressing the result as a percentage.

CALCULATION OF MEDIANS

19 A median is a measure of central tendency. It is a mid-value which divides a population distribution into two, with half the observations falling below it and half above. Unlike averages (means), medians are not usually skewed by extreme observations.

20 There are several issues to be aware of:

- The categories 'Income not stated', 'Overseas Visitor', and 'Not applicable' are not included in the calculation of median individual income.
- If a median falls into a category that has a text only label then the median is set to zero. This is relevant to the calculation of median individual income, as the income classification includes categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing an open-ended range and the median falls within that range, the median is set to the number in the label. For example, in the calculation of median individual income, if the median falls in the last range \$1,500 or more, \$1,500 is allocated as the median.

CENSUS PRODUCTS AND SERVICES

21 There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *Directory of Census Statistics* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication). Information is also available on the Internet, at <http://www.abs.gov.au>

SYMBOLS AND OTHER USAGES

22 The following abbreviations and symbols are used in this publication:

| | |
|--------|--|
| A | Area |
| ABS | Australian Bureau of Statistics |
| C | City |
| LGA | Local Government Area |
| n.e.c. | not elsewhere classified |
| n.f.d. | not further defined |
| NYARS | National Youth Affairs Research Scheme |
| SLA | Statistical Local Area |
| .. | not applicable |
| — | nil or rounded to zero |

Where figures have been rounded, discrepancies may occur between the sums of component items and totals.

GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *Census Dictionary, 1996* (Cat. no. 2901.0).

Couple family A family based on two persons who are in a registered or de facto marriage and who are usually resident in the same household. The family may include any number of dependants, non-dependants and/or other related individuals. As it is not necessary for a parent-child relationship to be formed, a couple family can consist of a couple without children.

Dependent child A dependent child is an individual who is either a child aged less than 15 years or a dependent student. To be regarded as a child the individual can have no partner or child of his/her own usually resident in the same household.

A dependent child must be attached to a nominal parent with whom he or she usually resides. This parent must be over 15 years of age.

Dependent student A dependent student is defined as a natural, adopted, step or foster child who is 15–24 years of age and who attends an educational institution as a full-time student, and who has no partner or child of his or her own usually resident in the same household.

Boarders and lodgers living with a family are automatically excluded from all family coding once they are 15 years or older unless some familial relationship is also present. The family relationship then takes precedence over the fact they are boarders or lodgers.

Dwelling A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages are not counted in the Census.

There are private and non-private dwellings.

A *private dwelling* is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; an occupied dwelling in a manufactured home estate; an occupied self-care unit in accommodation for the retired or aged; a houseboat; or tent if it is standing on its own block of land.

An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.

- Employed** Persons aged 15 years and over who, during the week prior to census night, worked for payment or profit; who had a job from which they were on leave or otherwise temporarily absent; were on strike or stood down temporarily; or worked as unpaid helpers in a family business.
- Family** A family is two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.
- Non-related persons living in the same household are not counted as family members (unless under 15 years of age).
- Geographic areas** The tables in this publication are at the levels of Local Government Area, Statistical Division and State/Territory, as defined by the 1996 Census edition of the Australian Standard Geographical Classification (ASGC).
- Statistical Local Area (SLA)*: These areas consist of one or more whole census Collection Districts and cover, in aggregate, the whole of Australia without gaps or overlaps.
- SLAs correspond in many cases to Local Government Areas (LGAs). The main exceptions are:
- where the boundaries of one or more Statistical Subdivisions (SSDs) cut across an LGA, the LGA is split into two or more parts, each of which forms a separate SLA;
 - where a particular LGA is substantially different from other LGAs in terms of size and economic significance, or in terms of user needs for statistics, the LGA may be split into two or more SLAs;
 - where an area is unincorporated (i.e. not part of an LGA) an SLA is created.
- Local Government Area (LGA)*: LGAs are spatial units which represent the whole undivided geographic area of responsibility of either:
- an incorporated local government council; or
 - an incorporated community government council (CGC) where the CGC is of sufficient size and statistical significance.
- LGAs cover only part of Australia. The major areas not covered by LGAs are the large northern parts of South Australia, most of the Northern Territory, and all of the Australian Capital Territory and Other Territories. For the 1996 Census, LGA boundaries are as defined on 5 August 1995 and included in the 1996 edition of ASGC (effective 1 July 1996).
- Statistical Subdivision (SSD)*: These areas are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. They consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.
- Statistical Division (SD)*: These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the three Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands together form the single SD of Other Territories. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

Geographic areas *continued*

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

State/Territory: States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 1996 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, the Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands.

The LGA and SSD boundaries shown in this publication (see the maps on pages 91–93) are those applying at the time of the 1996 Census. Where necessary, 1986 and 1991 statistics in this publication have been recalculated to conform to the 1996 boundaries. Further information on geographic classifications is contained in *Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC)* (Cat. no. 1216.0).

Household A household is a group of people who usually reside in the same private dwelling.

Income People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and workers' compensation received.

Indigenous origin A person is defined to be of Indigenous origin if he or she identified themselves as being of Aboriginal and/or Torres Strait Islander origin.

Industry (of employment) This describes the industries in which employed people (aged 15 years and over) work, and is coded to the *Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993* (Cat. no. 1292.0).

Labour force The labour force is made up of employed and unemployed people aged 15 years and over.

Labour force status Labour force status identifies whether a person is employed, unemployed or not in the labour force for people aged 15 years and over.

Living arrangements This classification is derived from information about the family type and the relationships that exist in the family/household, between the family/household reference person, and each other member of the family/household.

Main English-speaking countries These countries have been defined as 'English-speaking' on the basis of whether Australia has received significant numbers of migrants from them who are likely to speak English. Therefore, the countries regarded as the main English-speaking countries have been the countries of the United Kingdom and Ireland, and the predominantly Anglo-Celtic countries which arose from large-scale British settlement: Australia, Canada, Ireland, New Zealand, South Africa, the United Kingdom and the United States of America. All other countries were classified as non-main English-speaking.

.....

| | |
|-----------------------------------|---|
| Not in the labour force | Persons who were not employed or unemployed as defined above. This category includes people who were retired, pensioners and people engaged in home duties. |
| Occupation (of main job) | Occupation describes the main job held by employed people (aged 15 years and over) during the week prior to census night, and is coded using the <i>ASCO — Australian Standard Classification of Occupations, Second Edition, 1997</i> (Cat. no. 1220.0). |
| One parent family | A one parent family consists of a person who has no spouse or partner usually present in the household but who forms a parent-child relationship with at least one dependent or non-dependent child usually resident in the household. |
| Overseas-born | Overseas-born people are those who stated that they were born in a country other than Australia, those born at sea, and those whose responses were classed as 'Inadequately described' or 'Not elsewhere classified'. |
| Post-school qualifications | In all censuses since 1966, people aged 15 years and over have been asked to describe their post-school qualifications which have been coded according to <i>ABS Classification of Qualifications (ABSCQ), 1993</i> (Cat. no. 1262.0). |
| Social marital status | <p>The relationship status of an individual with reference to another person who is usually resident in the household. A marriage exists when two people live together as husband and wife, or partners, regardless of whether the marriage is formalised through registration. Individuals are, therefore, regarded as married if they are in a de facto marriage or if they are living with the person to whom they are registered as married.</p> <p>Where information about same-sex couples is volunteered, the individuals are classified as partners in a de facto marriage.</p> <p>The term 'Not married', as used in this classification, refers to a person who is not living with another person in either a registered or de facto marriage. This includes persons who live alone, or with other family members, and those in shared accommodation.</p> |
| Unemployed | Persons aged 15 years and over who, during the week prior to census night, did not have a job but were actively looking for work (either full-time or part-time) and were available to start work. |
| Unemployment rate | The unemployment rate is the number of unemployed people expressed as a percentage of the labour force. |
