FORTHCOMING ISSUES

ISSUE	EXPECTED RELEASE DATE
2001-2002	June 2003

CHANGES IN THIS ISSUE

Revisions

There have been revisions to the balance of payments data back to 1989-90 as a result of the incorporation of the latest available survey data and other source data and the revised treatment of Australia's payments to international development financial institutions.

Data availability

The ABS is currently unable to produce data on Australia's trade in travel services by partner country for the financial year 2000-01. The cause of the problem is the delay in processing by the Department of Immigration and Multicultural and Indigenous Affairs (DIMIA) of international airline passenger cards. The ABS uses the passenger card information processed by DIMIA to produce estimates of overseas arrivals and departures (OADs) by residents and non-residents and estimates of travel services by partner country.

An implication of the lack of travel services by partner country data is that the aggregate measures which incorporate travel services are unavailable for the 2000-01 financial year.

The methodology used by the ABS in estimating compensation of employees relies on the availability of travel data by partner country. Consequently, this data for 2000-01 is also unavailable as are the aggregate measures to which compensation of employees contributes.

Presentational changes

America n.e.s.

From 1998-99, Peru is shown separately and no longer included in America n.e.s. It is now included in the APEC country group.

Asia n.e.s.

From 1998-99, Viet Nam is shown separately and no longer included in Asia n.e.s. It is now included in the APEC country group.

ABOUT THE PUBLICATION

Balance of Payments, Australia: Regional Series (Cat No. 5338.0) is an annual publication presenting comprehensive statistics on Australia's balance of payments by selected countries which supplements the quarterly publication, **Balance of Payments and International Investment Position, Australia** (Cat No. 5302.0). This issue contains regional estimates of Australia's current and capital accounts. The current account includes credit and debit estimates for goods, services, income and current transfers. Services are further broken down into: transportation; travel; communication; construction; insurance; financial; computer and information services; royalties and license fees; other business services; personal, cultural and recreational services; government services; and other. Income is further broken down into compensation of employees and investment income. More detailed income information is available in **International Investment Position, Australia: Supplementary Country Statistics** (Cat No. 5352.0).

Included in the publication are comprehensive tables, as well as explanatory notes. The data is available on an item by region basis or a region by item basis.

The statistics are presented as time series for the years 1989-90 to 2000-01 inclusive and are consistent with those published in the March quarter 2002 issue of **Balance of Payments and International Investment Position, Australia** (Cat No. 5302.0).

ANALYSIS OF RESULTS

Current Account

The current account deficit for 2000-01 was \$18.9b, a decrease of \$14.5b on the deficit of \$33.5b in 1999-2000. The current account deficit as a percentage of Australia's gross domestic product (GDP) fell from 5.3% in 1999-2000 to 2.8% in 2000-01.

The decrease in the current account deficit was the net effect of the following:

- a turnaround of \$13.1b, to a surplus of \$0.1b, in net goods;
- a turnaround of \$2.1b, to a surplus of \$0.7b, in net services;
- an increase of \$0.4b, to \$19.8b, in the net income deficit; and
- a decrease of \$0.2b, to near balance, in the surplus on net current transfers.

CURRENT ACCOUNT, MAJOR AGGREGATES

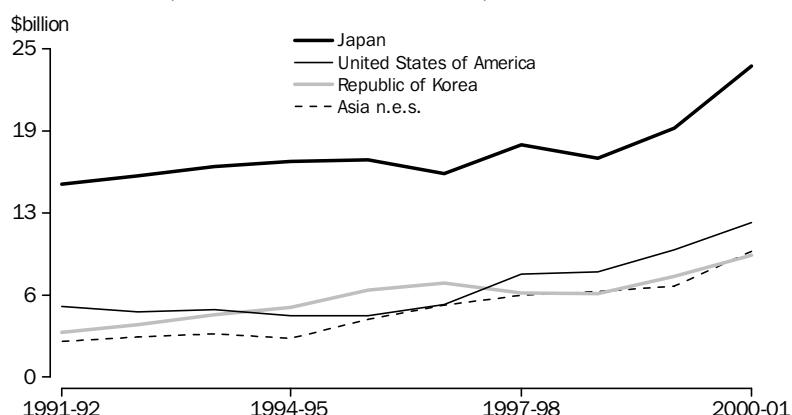

Goods

When analysed by country, Australia's largest net goods surpluses were with Japan (\$8.1b), Asia n.e.s. (\$4.7b), Republic of Korea (\$4.5b) and Taiwan (\$2.6b). The largest net goods deficits in 2000-01 were with the United States of America (\$10.9b), Germany (\$4.8b), People's Republic of China (\$3.1b) and Viet Nam (\$2.0b).

Goods credits

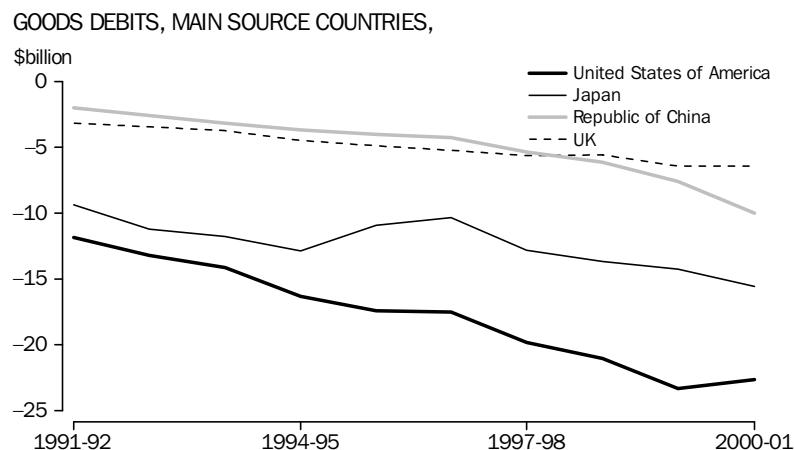

The main destinations for exports of goods in 2000-01 were: Japan (20%), United States of America (10%), Asia n.e.s. (8%), Republic of Korea (8%), New Zealand (6%) and the People's Republic of China (6%). Exports to Japan grew from \$14.7b in 1991-92 to \$19.0b in 1999-2000. There was then a marked increase (25%) to \$23.7b in 2000-01. Increases were recorded for all major commodity groups with the strongest increase in exports of mineral fuels, lubricants and related materials up 37%. Exports to the United States of America and Asia n.e.s. also showed marked increases in 2000-01. The major commodity contributing to the increase of exports to the United States of America was machinery and transport equipment, up 34% from \$2.0b to \$2.7b in 2000-01.

GOODS CREDITS, MAIN DESTINATION COUNTRIES,

Goods debits

The main sources for imports of goods in 2000-01 were: United States of America (19%), Japan (13%), People's Republic of China (8%), United Kingdom (5%) and Germany (5%). Imports from the People's Republic of China have grown strongly from \$2.0b in 1991-92 to \$10.0b in 2000-01, driven by imports of machinery and transport equipment and apparel and clothing accessories.

Concepts, Sources and Methods

The conceptual framework used in Australia's balance of payments (BOP) and international investment position (IIP) statistics is based on the Fifth Edition of the International Monetary Fund's **Balance of Payments Manual** (BPM5, 1993). This framework is summarised in the 1998 edition of the ABS publication **Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods** (Cat No. 5331.0). As well as providing descriptions of the underlying concepts and structure of the BOP and IIP, 5331.0 also describes the sources, methods and terms used in compiling Australia's BOP and IIP statistics. 5331.0 is available on the ABS web site, www.abs.gov.au, under the category 'Statistical Concepts Library'.

Sign Convention

In keeping with BOP conventions, credit items (such as income credits) are shown without sign and debit items (such as income debits) are shown as negative entries.

APPENDIX 3: NOTES ON COUNTRIES AND COUNTRY GROUPS

Inclusions

Monaco and Andorra are included with France. San Marino and Vatican City are included with Italy. Switzerland includes Liechtenstein.

International capital markets

This category is used for securities issued on several markets at once (e.g. Eurobonds) and loans made by a syndicate of lenders in several countries (e.g. Euro-currency or Asian dollar loans).

Reserve Bank gold

The 'Reserve Bank gold' category refers to gold held by the Reserve Bank as part of reserve assets for which allocation by country is not applicable.

Changing composition

Prior to 1992-93, Russian Federation includes all republics of the former USSR. From 1992-93, the unspecified republics of the former USSR are included in either Europe n.e.s. or Asia n.e.s.

Care to be exercised

Care should be exercised in interpreting country data. In the first instance, source data often do not identify the country of the non-resident transactor. Imports of goods are largely classified by the country of origin of the goods rather than by the country from which Australia buys the goods. For example, goods from People's Republic of China that are bought by traders in Hong Kong (SAR of China) and then on-sold to Australia will appear as imports from People's Republic of China, not from Hong Kong (SAR of China).

Care should also be exercised whenever either the residual country groupings designated 'not elsewhere specified' (or n.e.s.) or when the designated 'unallocated' category are significant for the table. 'N.e.s.' categories include: data for those countries in the region that are not separately identified in the tables; and data that are reported for the region as a whole but which cannot be allocated by country. This issue arises in all country tables

Reconciliation

A reconciliation of the current, capital and financial accounts by individual country or region is not possible as goods and services purchased from or sold to another country may be financed by capital raised in a third country. For an explanation refer to Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998 (Cat. No. 5331.0)
