KEY POINTS

### BALANCE ON GOODS AND SERVICES

- The trend estimate of the *balance on goods and services* was a deficit of \$2,723m in February 2008, an increase of \$141m (5%) on the revised deficit in January 2008.
- In seasonally adjusted terms, the *balance on goods and services* was a deficit of \$3,289m in February 2008, an increase of \$754m (30%) on the revised deficit in January 2008.
- The increase in the seasonally adjusted deficit was due to the fall in *goods and services credits*, mainly *non-rural and other goods*, outweighing the fall in *goods and services debits*, mainly *intermediate and other goods*.

### CREDITS (EXPORTS OF GOODS & SERVICES)

- Seasonally adjusted, goods and services credits fell \$790m (4%) to \$18,260m. Non-rural and other goods fell \$774m (6%) and rural goods rose \$23m (1%). Services credits fell \$40m (1%).
- The fall in *non–rural and other goods* was driven by *metal ores and minerals*, which fell \$624m (18%) and *coal, coke and briquettes*, which fell \$281m (16%).

### DEBITS (IMPORTS OF GOODS & SERVICES)

- Seasonally adjusted, goods and services debits fell \$37m to \$21,548m. Intermediate and other goods fell \$125m (1%) and consumption goods fell \$93m (2%) while capital goods rose \$269m (7%). Services debits fell \$89m (2%).
- The fall in *intermediate and other goods* was driven mainly by *processed industrial supplies n.e.s.*, which fell \$108m (6%) and *fuels and lubricants*, which fell \$78m (3%).

### INQUIRIES

For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070 or Selvi Sekhar on Canberra (02) 6252 5540.

## ANALYSIS AND COMMENTS

BALANCE ON GOODS AND Services	The trend estimate of the balance on goods and services in February 2008 was a deficit of \$2,723m, an increase of \$141m (5%) on the revised deficit in January 2008.
	In seasonally adjusted terms, the balance on goods and services in February 2008 was a deficit of \$3,289m, an increase of \$754m (30%) on the revised deficit in January 2008.
EXPORTS OF GOODS AND SERVICES	The trend estimate of goods and services credits rose \$91m between January and February to \$18,663m.
	In seasonally adjusted terms, goods and services credits fell \$790m (4%) to \$18,260m. Non–rural goods fell \$765m (7%) and other goods fell \$8m (1%) while rural goods rose \$23m (1%). Services credits fell \$40m (1%).
Exports of goods	GOODS CREDITS

<sup>(</sup>a) Trend breaks of \$430m to April 2004, \$819m to April 2005 and \$500m to April 2006 have been applied.

#### RURAL GOODS

The trend estimate of rural goods exports rose \$44m (2%) to \$2,150m.

In seasonally adjusted terms, exports of rural goods rose \$23m (1%) to \$2,157m.

The seasonally adjusted series for cereal grains and cereal preparations was up \$70m (18%) for the month.

Partly offsetting this rise were:

- meat and meat preparations, down \$21m (4%)
- wool and sheepskins, down \$20m (8%).

In original terms, exports of rural goods rose \$337m (18%) to \$2,169m.

### NON-RURAL GOODS

The trend estimate of non-rural goods exports rose \$10m to \$11,142m.

In seasonally adjusted terms, exports of non-rural goods fell \$765m (7%) to \$10,721m.

Components falling in seasonally adjusted terms were:

- metal ores and minerals, down \$624m (18%)
- coal, coke and briquettes, down \$281m (16%)
- other manufactures, down \$194m (13%).

Partly offsetting these were:

- metals (excluding non-monetary gold), up \$234m (26%)
- other non-rural (including sugar and beverages), up \$66m (7%).

Exports of goods continued

Exports of Services

NON-RURAL GOODS continued

In original terms, exports of non-rural goods fell \$108m (1%) to \$10,092m.

The main movements in the original series contributing to seasonally adjusted series were:

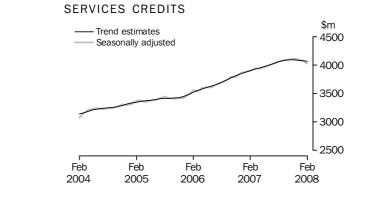

- metal ores and minerals, down \$481m (15%), in contrast to an average January to February rise of 11% over the previous three years, with:
  - non-agglomerated iron ore, down \$458m (27%) with volumes down 25% and prices down 2%
  - alumina, down \$84m (19%) with volumes down 18% and prices down 1%
  - uranium, down \$43m (55%) with volumes down 7% and prices down 52%.
- coal, coke and briquettes, down \$384m (21%), compared to an average January to February fall of 14% over the previous three years, with:
  - metallurgical coal, down \$282m (26%) with volumes down 29% and prices up 3%
  - non-metallurgical coal, down \$122m (17%) with volumes down 19% and prices up 2%.

### OTHER GOODS

The trend estimate of other goods exports rose \$48m (4%) to \$1,303m.

In seasonally adjusted terms, exports of other goods fell \$8m (1%) to \$1,353m with non-monetary gold, down \$18m (2%).

In original terms, exports of other goods fell \$7m (1%) to \$1,350m.

In trend terms, services credits fell \$12m to \$4,068m.

In seasonally adjusted terms, services credits fell by \$40m (1%) to \$4,029m.

The components contributing to the fall in the seasonally adjusted estimates were:

- travel services, down \$39m (2%)
- transportation services, down \$8m (1%).

Partly offsetting these effects was the other services component, up \$7m (1%).

In seasonally adjusted terms, tourism related services credits fell \$47m (2%) to \$2,501m. This series is seasonally adjusted independently to the series that comprise services credits.

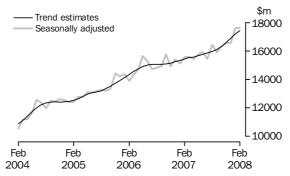

## ANALYSIS AND COMMENTS continued

### IMPORTS OF GOODS AND SERVICES

The trend estimate of goods and services debits rose \$231m (1%) between January and February to \$21,386m.

In seasonally adjusted terms, goods and services debits fell \$37m to \$21,548m. Consumption goods fell \$93m (2%), intermediate and other merchandise goods fell \$72m (1%) and other goods fell \$53m (6%) while capital goods rose \$269m (7%). Services debits fell \$89m (2%).

#### Imports of goods GOODS DEBITS

#### CONSUMPTION GOODS

The trend estimate of imports of consumption goods rose \$53m (1%) to \$5,121m.

In seasonally adjusted terms, imports of consumption goods fell \$93m (2%) to \$5,082m.

The main components contributing to the fall in the seasonally adjusted estimates were:

- non-industrial transport equipment, down \$116m (7%)
- toys, books and leisure, down \$32m (8%).

Partly offsetting these were:

- textile, clothing and footwear, up \$17m (3%)
- consumption goods n.e.s., up \$14m (1%).

In original terms, imports of consumption goods fell \$26m (1%) to \$4,831m.

### CAPITAL GOODS

The trend estimate of imports of capital goods rose \$43m (1%) to \$3,865m.

In seasonally adjusted terms, imports of capital goods rose \$269m (7%) to \$4,002m.

The main component contributing to the rise in the seasonally adjusted estimates was civil aircraft, up \$404m.

Partly offsetting this were:

- machinery and industrial equipment, down \$108m (7%)
- ADP equipment, down \$42m (7%).

In original terms, imports of capital goods rose \$155m (4%) to \$3,639m.

Imports of goods continued

Imports of services

### INTERMEDIATE AND OTHER MERCHANDISE GOODS

The trend estimate of imports of intermediate and other merchandise goods rose \$109m (1%) to \$7,655m.

In seasonally adjusted terms, imports of intermediate and other merchandise goods fell \$72m (1%) to \$7,708m.

The main components falling in the seasonally adjusted estimates were:

- processed industrial supplies n.e.s., down \$108m (6%)
- fuels and lubricants, down \$78m (3%)
- iron and steel, down \$39m (13%)
- organic and inorganic chemicals, down \$35m (8%).

Partly offsetting these were:

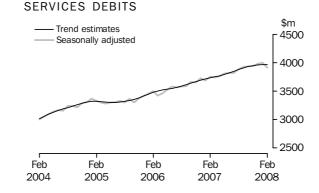

- other parts for capital goods, up \$96m (10%)
- other merchandise goods, up \$73m (53%).

In original terms, imports of intermediate and other merchandise goods fell \$228m (3%) to \$7,599m.

### OTHER GOODS

The trend estimate of imports of other goods rose \$29m (4%) to \$783m.

In both original and seasonally adjusted terms, other goods debits fell \$53m (6%) to \$846m driven by non-monetary gold, down \$74m (10%).

In trend terms, services debits fell \$1m to \$3,963m.

In seasonally adjusted terms, services debits fell \$89m (2%) to \$3,910m.

Components contributing to the fall in the seasonally adjusted estimates were:

- transportation services, down \$54m (4%)
- travel services, down \$42m (3%).

Partly offsetting this effect was other services, up \$8m (1%).

In seasonally adjusted terms, tourism related services debits fell \$78m (4%) to \$1,983m. This series is seasonally adjusted independently to the series that comprise services debits.

(a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank

of Australia in respect of each trading day.

(b) May 1970 = 100. The Trade-weighted index is reweighted annually on 1 October and on special occasions as required.

## EXPLANATORY NOTES

INTRODUCTION	<b>1</b> This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis and merchandise import and export statistics on a recorded trade basis.
	<b>2</b> Merchandise trade statistics on a recorded trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs Service (ACS). Adjustments for coverage, timing and valuation are made to recorded trade data to convert them to a balance of payments basis. The main source for services data is the quarterly Survey of International Trade in Services.
	<b>3</b> More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available on Time Series Spreadsheets or by subscription to tailored services.
CONCEPTS, SOURCES AND METHODS	<b>4</b> The conceptual framework used in compiling Australia's merchandise trade statistics can be found in <i>International Merchandise Trade, Australia: Concepts, Sources and Methods, 2001</i> (cat. no. 5489.0).
	<b>5</b> The conceptual framework used in compiling Australia's balance of payments statistics is based on the Fifth Edition of the International Monetary Fund's <i>Balance of Payments Manual</i> (BPM5,1993). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling the estimates are presented in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0). To bring merchandise trade statistics on a recorded trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by ACS. Adjustments are also made to account for the change of ownership of goods not included in merchandise trade statistics on international merchandise trade on a recorded trade basis and on a balance of payments basis.
	<b>6</b> Both of the Concepts, Sources and Methods publications are available to download for free from the ABS website. Select <i>Methods, Classifications, Concepts &amp; Standards</i> , then choose <i>ABS concepts, classifications and statistical standards</i> and then the catalogue numbers as above.
SEASONAL ADJUSTMENT	7 The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted, however the merchandise exports and imports statistics on a recorded trade basis are not. Monthly original estimates are volatile, being subject to calendar-related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing from the original series systematic calendar related effects, such as seasonal, trading day, length of month and moving holiday influences. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording.
	<b>8</b> The seasonally adjusted statistics in this publication use the concurrent seasonal adjustment technique and Autoregressive Integrated Moving Average (ARIMA) Modelling to estimate factors for the current and previous months. Under concurrent seasonal adjustment, the estimates of seasonal factors are fine tuned as new original estimates become available each period. The seasonally adjusted estimates are subject to revisions at each reference month as the estimates of seasonal factors are improved. For more information on seasonal adjustment methods, see <i>Information Paper: An Introductory Course on Time Series Analysis, Jan 2005</i> (cat. no. 1346.0.55.001), <i>Time Series Analysis</i>

SEASONAL ADJUSTMENT continued	<i>Frequently Asked Questions, 2003</i> (cat. no. 1346.0.55.002), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail <time.series.analysis@abs.gov.au>.</time.series.analysis@abs.gov.au>
ARIMA MODELLING	<b>9</b> ARIMA modelling relies on the characteristics of the series being analysed to project future period data. ARIMA modelling is used on a case-by-case basis where it results in reduced revisions to seasonally adjusted series when subsequent data become available. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process. The ARIMA model is assessed as part of the annual reanalysis and, following the 2007 annual re-analysis, 89% of trade in goods and services time series use an ARIMA model. For more information on the details of ARIMA modelling see <i>Feature article: Use of ARIMA modelling to reduce revisions</i> in the October 2004 issue of <i>Australian Economic Indicators</i> (cat. no. 1350.0).
TREND ESTIMATES	<b>10</b> The month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour because they include irregular or non-seasonal movements. Trend estimates are derived by applying a 13-term Henderson moving average to the seasonally adjusted series. The use of a 13-term Henderson average can result in revisions to the estimates for the most recent six months as additional observations become available. Revisions can also occur because of changes in the original data and as a result of the re-estimation of the seasonal factors. For more information on trend estimates methods, see <i>Information Paper: A Guide to Interpreting Time Series - Monitoring Trends</i> (cat. no. 1349.0), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail <time.series.analysis@abs.gov.au>.</time.series.analysis@abs.gov.au>
SIGN CONVENTION	<b>11</b> In keeping with balance of payments conventions, where statistics are on a balance of payments basis, credit entries (exports) are shown without sign and debit items (imports) are shown as negative entries. For statistics on a recorded trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.
COMMODITY BREAKDOWNS OF GOODS	<b>12</b> For details of the classification used for goods exports on a balance of payments basis (credits), see table 6.6 in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998</i> (cat. no. 5331.0).
	<b>13</b> Details of the classification of goods imports on a balance of payments basis (debits) are provided in table 6.7 in cat. no. 5331.0.
	<b>14</b> The recorded trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification (SITC). The first section of tables 12 and 13 show the most significant commodities (by value) at the SITC 3 digit level. Imports and exports of goods at a more detailed level are available from the Time Series spreadsheets.
COMMODITY BREAKDOWNS OF SERVICES	<b>15</b> The quarterly detailed services data published in table 11 are consistent with the monthly aggregates shown in table 9.
	<b>16</b> Monthly indicators for many of the services components that are only surveyed quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. The estimates for these items shown in table 9 are therefore derived by dividing the quarterly estimate by three. Where quarterly survey data are not available, freight debits

## **EXPLANATORY NOTES** *continued*

COMMODITY BREAKDOWNS OF SERVICES continued	are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIF) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last month's data by an average of movements for the same month over the three previous years.
CONFIDENTIALITY OF MERCHANDISE TRADE STATISTICS	<b>17</b> The release of statistics for certain merchandise trade commodities is restricted in order to prevent the identification of the activities of an individual business, where this is requested by the business concerned. These restrictions do not affect the total value of exports and imports, but they can affect statistics at the country, state and commodity levels. For information on the confidentiality restrictions applied to the merchandise trade statistics in this publication, refer to the current <i>International merchandise trade: Confidential Commodities List (CCL)</i> (cat. no. 5372.0.55.001) which can be accessed from ABS web site.
TOURISM RELATED SERVICES	<b>18</b> The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. These series are not compiled on a balance of payments conceptual basis. However, they do provide a reasonable approximation of world tourism related activities.
	<b>19</b> The memorandum items have been derived by re-aggregating relevant components of the international trade in services series of the balance of payments accounts. The tourism related indicator has been derived by combining total travel services (business, education-related and other personal travel), passenger fares, and the air transport component of other transportation services which relates to agency fees and commission receipts.
SERVICES BY STATE AND BY PARTNER COUNTRY	<b>20</b> Annual services data by state and by partner country are released twice yearly. Calendar year data are usually released with the March issue of this publication and financial year data are released with the September issue. Refer to Time series data for details.
	<b>21</b> Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel and communication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Education, Science and Training. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.
	<b>22</b> A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of <i>Balance of Payments and International Investment Position, Australia - Concepts, Sources and Methods</i> (cat. no. 5331.0). Approximately 7% of total services credits and 5% of total services debits for 2006–07 are either confidential, or unable to be allocated to individual countries.
ABS DATA AVAILABLE	<b>23</b> More detailed balance of payments and recorded merchandise trade data, including forward seasonal factors are available as time series spreadsheets or data cubes from the ABS website.
	<b>24</b> More detailed merchandise trade data by commodity, country and state, and statistics included in this and related publications are available on request. Inquiries should be made to the National Information and Referral Service as shown on the back of this publication.

The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.
CAUTIONARY NOTE	<b>27</b> The tables in this publication are presented on two bases. Tables 1–11 contain estimates of Australia's international trade in goods and services which have been adjusted for coverage, valuation and timing to a balance of payments basis. Tables 12–15 contain estimates of merchandise exports and imports based on Australian Customs Service records. Paragraph 5 of the Explanatory Notes provides an explanation of the difference between these bases.
ROUNDING	<b>28</b> Where figures have been rounded, discrepancies may occur between sums of the

**28** Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage movements are calculated from data at the level of precision presented in this publication (i.e. \$m) except for international merchandise trade tables.
